

# So, You Want to Be a Neurosurgeon or a Neurologist?

A Research Guide Provided by the  
Brilliant Andrew Nassif

# What is Neurology?

- “ The study of the central and peripheral nervous system, how it works, and deceases and cures that can change the nervous system’s functionality for the better.
- “ Neurology creates a well valid diagnosis of many neurological disorders, syndromes, or diseases.
- “ The brain itself, is thought to be a miracle organ.

# What is Neurosurgery?

- “ The study of Neurology in correspondence with surgical procedures.
- “ Neurobiology and Neurosurgery are modern methods of diagnosis for the brain.
- “ Ben Carson is the first to separate Cajun twins through a Neurosurgery. He is also one of the most conservatively viewed doctors in the field.

# CYTOTRON, or RFQMR

- “ Using this can use radio frequency to destroy brain tumors, this may be the thought out cure in fundamentals of Neurology.
- “ Another way is to use it to change the brain waves in someone who has Parkinson's disease for example.
- “ These are the types of fundamentals that can be used in the studies of Neurology.

# Neurobiology or Neuroscience

- “ Known as the sequence based study of the accordance and structural analysis of the nervous system.
- “ Neurobiology is a type of interdisciplinary science.
- “ The study of the Nervous system dates back to the time of ancient Egypt.
- “ Some manuscripts noted that the Egyptians had knowledge of all the fundamentals of science and math including Neurology.

# Neurons in the Pigeon Cerebellum

# Neurochemistry

- “ Neurochemistry is the study of chemicals in the brain and how they work or how they react with other chemicals including medicines.
- “ This is an evolving area of Neuroscience and one of the very important.
- “ This field also coordinates with Neurology.

# Fundamentals to the Cure for Neuro Atrophy

- “ Neuro Atrophy occurs when cells in the brain are damaged, however there is a possible way of using skin cells as artificial nervous cells, which may be the very possible cure and fundamental treatment for Atrophy.
- “ This is one of the most commonly renowned idea in the field of neurobiology.
