Florentin’s Laws are neither *Murphy’s* (pessimistic) *Laws* nor *Peter’s* (optimistic) Laws, but partially pessimistic, partially optimistic, while another part is indeterminate (as in neutrosophic logic).
Being paradoxist in nature, Florentin’s Laws are especially deviations, modifications, generalizations, contra-sayings, parodies, or mixtures of the previous Murphy-Peter laws.

And also of aphorisms, proverbs, known citations, clichés, scientific results (from physics, mathematics, philosophy, ...), etc.

Alternatively, collations of opposite ideas gathered from folklore, from ads, from literature, from familiar speech.
For example, Murphy’s law
“Anything that can go wrong will go wrong”
which in Peter’s law is stated as:
“If anything can go wrong, Fix It!”
becomes in Florentin’s law, through deviation:
“If anything can go wrong, pass it on to someone else!”
in a Machiavelli way, as a mixture of pessimism / optimism and laugh!
Being paradoxist in nature, Florentin's Laws are especially deviations, modifications, generalizations, contra-sayings, parodies, or mixtures of the previous ones. Alternatively, collations of opposite ideas - gathered from folklore, from ads, from literature, from familiar speech.
Florentin’s Laws
When your team wins, it is thanks to you. If the team looses, it is because of others.
Get a reason to award your friends, and a pretext to punish your enemies.
Even good things have negative side effects. Moreover, negative things have positive side effects.
Don’t play by others’ rules. Build your own rules that allow you to win. If you still don’t win, prove the game is useless.
If he’s better than you, deny him. If he’s worse than you, praise him.
If you can't beat them, beat others.
If bad actions are in your favor, make them look good.
If good actions disadvantage you, undermine them.
Elect the boss who is worse than you are, so you can manipulate him.
As a commander, don’t appoint as second in line one who is smarter than you are.
If things go from bad to worse, they don’t belong to you.
If it matters against you, make as it doesn’t matter.
If it's not worth doing, let others do it.
Oh, God, protect me from my friends, because from my enemies I protect myself!
We are unhappy because we always want what we don’t have and to be where we are not. Moreover, we are happy when we don’t ask for anything – so live an amorphous life!
If you classify the last, switch the order. If you’re somehow in the middle, invent a new world order that sets you in the front.
Interpret the worst thing positively, and the good things negatively.
Failure is good - it brings you experience. Success can make you lazy and arrogant.
The less people understand a theory, the smarter they believe it is. So, make easy things complicated!
The more you work, the more work you have. And the less you work, the less work you have.
If you’re always wrong, re-define the notion of “wrongness”. If you’re always right, forget about!
Don’t visit sites that slander you, neither those that flatter you. Erase them ... from your memory.
Don’t run when you can walk! \{Festina lente.\} Let others struggle!
The faster you go, the more energy you consume and earlier you die… so slow down!
It’s easier to challenge, than to be challenged.
{The best defense is the attack, says a soccer proverb.}
When forced to compromise, don’t hesitate to comprise the compromiser.
Interpret the defeat as a victory, even if no body might believe it. Pay attention to the victory, it might be deceptive...
Don’t doubt when in doubt. Don’t be sure when you’re sure.
If you have no choice, still choose!
When given two choices, take three!
Bless your enemies, they ambition you. Blame your friends, they idle you.
