

Suicide by Democracy--a review of Ann Coulter's Adios America-the left's plan to turn America into a third world hell-hole

“I can’t understand why people are frightened of new ideas. I’m frightened of the old ones.”  
John Cage (1912-1992)

Useful definitions for understanding contemporary politics.

DIVERSITY: 1. USA government program for handing over control to Mexico. 2. USA government program for providing free goods and services to those from other countries. 3. A means for turning America into a 3<sup>rd</sup> world Hellhole (Coulter).

RACIST: 1. Person opposed to diversity in above sense. 2. Person of different ethnicity who disagrees with me on any issue. 3. Synonym for ‘nativist’.

AMERICAN: 1. One who has lived here or whose ancestors have lived here since before the alien invasion began in 1968. 2. Person opposed to letting Mexico annex the USA.

MONO: Monochromatic—i.e., white or of Caucasian ethnicity.

POLY: Polychromatic---any color but white, or ethnicity except Caucasian.

I should first note that I have no investment in the outcome of any social or political movement. I am old, without kids or close relatives, and in the blink of an eye I will be gone. I offer these comments in hope they will give perspective, since rational competent analyses of the perilous situation in America and the world are almost nonexistent. I have had close friends of various ethnicities, several times given my only assets (no I did not inherit anything significant, did not have rich relatives, a trust fund or a cushy job) to an impoverished 3<sup>rd</sup> world person, have a 3<sup>rd</sup> world wife, and helped anyone in any way I could regardless of race, age, creed, sexual preferences or national origin and am still doing so. Over 50 years ago, I paid attention to politics for a few months and was so disgusted I have never since voted in any kind of election or on any issue, belonged to any social or political group, listened to a political speech or read a book on politics. This is my first and probably last political commentary. I summarize and supplement Coulter’s comments with my own research and reflections. I find nearly all political, economic and sociological analyses to be superficial, and look at things in the light of global long term biology.

Coulter does not mention it, but what we are really considering here is not some transient event in American politics but the infinitely sad story of the inexorable collapse of industrial civilization in America and the world from overpopulation. Though this is by far the most important issue, it almost never comes up in the endless debates and daily social convulsions worldwide in which every special interest group tries to get an ever bigger share of the rapidly diminishing resources. The problem is that nearly all people are short sighted, selfish, poorly educated, lacking experience and not especially smart and this creates an insoluble problem when there are 11 billion, or when they constitute a majority of any electorate in a democratic system—i.e., always. It’s one thing to make mistakes when there are time and resources to correct them, but quite another when it’s impossible. The USA is the worst case as it seems to have vast resources and a resilient economy, and what I and most people grew up regarding as the wonderful traditions of justice, democracy, and equality, but in the long run, these have

fatal consequences, which we can see being played out in front of us every day. A system that operates this way cannot compete with ones that do not- Asia is eating America's lunch, and nothing can stop it. A world where everyone is free to replicate their genes and consume resources as they wish will soon have a hard landing.

It may help to remind ourselves of the circumstances of the collapse of the first great democracy in Greece over 2000 years ago. It too considered itself an impregnable fortress against the barbarians (i.e., those who could not speak Greek and could only babble bar bar bar), but a series of apparently innocuous decisions brought about its collapse. First, the Northern city-states decided it was unseemly for the South to have helots (slaves) so they attacked the South, killing and crippling many and reducing it to poverty and chaos that lasted for many decades. During this time the helots continued to replicate their genes at a much higher rate than Greeks, resulting in their coming to comprise an ever increasing percentage of the country. Nobody realized at the time, but this was the beginning of the end of Greece.

In time, there came to be great areas of cities called ghettoi, composed of helots, where crime and poverty flourished, and where extracts of the opium poppy and other drugs (used only as medicine by the Greeks) were used as euphorants and became the center of a vast criminal empire, whose users committed hundreds of millions of crimes every year. There arose a Greek political clan called the Kennedopoli who, raised in privilege and disconnected from the real world and having like all politicians no clue about biology, psychology, human ecology or history, decided it was only democratic and just that the country should permit the immigration of large numbers of barbarians from all over the world, who were not monochromatics (monos) like the Greeks, but polychromatics (polys) like the helots. There was a strong movement among the liberals to extend this privilege (which they insisted was not a privilege but a right) to Martians, but it failed as it was deemed impractical to transport them to Greece. This law was championed by Theodosius Kennedopolis and his brother Robertis and signed into law by Lyndonis Johnsonopolis. There were misgivings from some quarters that this would dilute or even destroy Greek culture, but they were assured that there would be "no significant demographic impact".

A few years later, Williamis Brennenopolis, head of the top court, suggested that a law passed a century before, to guarantee Greek citizenship to the helots, should apply to anyone who happened to be born in Greece. Subsequently there were huge numbers of such 'anchoris kidoi' and all of them, in addition to the legal immigrants, were permitted to make citizens of all their relatives. Furthermore, millions of barbarians entered the country illegally and the state became so weakened by social and financial problems, so fragmented into splinter groups, so overwhelmed by genetic degeneration (as those with humble endowments, being frequently unemployed, had much time to devote to replicating their genes), while every special interest group was indulged with money and special days in the forum, that the country made only feeble efforts to expel them and to regain control. So, the state levied ever larger taxes to support the rapidly growing polys, most of whom paid little or no tax, and many of whom lived on government handouts, while their streets, sewers, water and electrical systems, parks, schools, hospitals, courts, public transportation, government, police, fire, emergency services and the huge defense spending needed to ensure the continued existence of the country, were created, staffed and paid for largely by monos. Naturally monos were outraged to have much of their working lives extorted to support polys, to be unsafe in their own homes and streets and to see their country being taken over and destroyed by the descendants of helots and barbarians. They tried to protest, but the public forums were gradually taken over by the polys (with numerous mentally retarded or bribed mono supporters) and it became impossible to state any opposition without being attacked as 'anti-barbarian' or 'anti-poly'. Words referring to polys were banned so one could not mention helots, immigrants,

Spanoi, Africanoï, or Araboi and one could not use rapist, terrorist, thief, murderer, child molester, convict, criminal etc. in the same sentence, or eventually even on the same day.

Gradually every kind of special interest group succeeded in banning reference to them in any easily identifiable way, so there vanished from public discourse words referring to the short, tall, fat, thin, mentally ill, handicapped, disadvantaged, abnormal, schizophrenic, depressed, stupid, dishonest, crazy, lazy, cowardly, selfish, dull etc. until nothing but pleasant platitudes were heard in the forum and everyone was puzzled as to who filled the jails to overflowing, littered the streets with garbage, robbed, raped and murdered, left bodies lying in the streets and used up all the tax money. Fifty years after passing the new immigration act about 15% of the population was Spanoi (up from less than 1%), who produced kidoi at over 3X the rate of everyone else, so that about half of children under 6 were theirs, while some 13% of the country were Africanoï-rapidly being displaced and marginalized by Spanoi (though few realized it, so they continued to support the politicians promising short term gains and nobody was able to grasp the eventual collapse of Greece and the whole world). The monos were producing less than two kidoi per couple, so their population was shrinking.

The final blow came when the poly dominated states on the border with Spanopolis opened the border and 250 million swarmed across. They eliminated all racism (i.e., hindrances to takeover of all political power by polys and any legal differences between citizens of Greece and other countries) in the laws, so that Greek citizenship became meaningless (though as before, a far lower percentage of Spanoi paid taxes or served in the military, and a far higher received welfare and committed crimes). Gradually the poverty, drugs, gangs, environmental destruction and the notorious corruption of police, army and government in Spanopolis spread throughout Greece (and with the Spanoi language now mandatory) so that one could cross over the now nonexistent border without noticing one was in a different country (and in practice, one no longer was). The population in Greece and elsewhere doubled, resources disappeared and starvation, disease, crime and war raged out of control. The rich were mostly still rich (many took their money and left Greece), the poor were much poorer, and life everywhere was unbearable.

The cooperation among poly's to wrest control of society from the monos crumbled as society disintegrated and they split sharply into africanoï, spanoi, araboi, chinoï, filipoï etc., the rich members of each hiring private police to protect them in their gated ghettoï. With much reduced quality of life and high crime, some thought of returning to their own countries, but there also overpopulation had exhausted resources and brought about collapses even more severe than in Greece, so life was hellish and impossible nearly everywhere, and the few partial exceptions were heavily armed fortresses who shot trespassers. The population shrank as many were killed or died of malnutrition, disease, drugs or suicide, and wars broke out everywhere and nuclear annihilation became inevitable, but still nobody dared to suggest publicly that the cause was unrestricted motherhood.

Of course much of this story has already played out in America and the rest is inevitable, even without climate change. It's just a matter of how bad it will get where and when.

The population of Hispanics will swell from about 55 million now (or as much as 85 if you accept Coulter's estimate of 30 million illegals—it's a mark of how far the govt. has let things go that we don't really know) to perhaps 140 million midcentury and 200 million as we enter the 22<sup>nd</sup> century, at which time the US population will be soaring past 500 million, and the world population will be about 11 billion, 3 billion of that added in Africa. The Hispanics **are reproducing so fast that** monos, now a 63% majority will be a minority by midcentury. Most of the increase from now on will be Hispanics and all

that in the world will be polys. About 500,000 people are naturalized yearly and since they are mostly from the 3<sup>rd</sup> world and produce children at about 3X the rate of Americans, that will add perhaps 5 million midcentury and 15 by 2100 for every year it continues.

**To show how fast things got out of control after the “no demographic impact” TKO of 1968, there are now more Hispanics in California than there are people in 46 other states. In 1970 just after the TKO, there were about 4 million Hispanics and now there are over 55 million “legals” (i.e., not made legal by the voters but by a handful of politicians supposedly acting in our interests) and about 80 million counting illegals. And of course it never crosses the minds of the democratic block-voting poor polys that the ones who will suffer by far the most from the Mexicanization of America are the poor polys. The U.S. has gone from 84 percent white, 11 percent black, 4 percent Hispanic and 1 percent Asian in 1965, to 62 percent white, 11 percent black, 18 percent Hispanic and 6 percent Asian now, according to a recent Pew report. By 2055, no one group is expected to have a majority—a perfect scenario for chaos. The Asians are predicted to increase faster than any group, doubling their percentage in the next few decades, but at least they will have gone thru a minimal immigration procedure, except of course for anchor baby families (producing which is now a major industry).**

The government pushes “diversity” but as Coulter notes, in countries all over the world and throughout history attempts to weld different races and cultures into one have mostly been an utter disaster. And many groups have lived among or alongside others for thousands of years without notably assimilating. Chinese and Koreans and Japanese in Asia, Jews and gentiles in thousands of places, Turks and Armenians etc., have lived together for millennia without assimilating and gone for each other’s throats at the slightest provocation. After over 300 years of racial mixing, the USA is still about 97% monoracial (i.e., white, Hispanic, black etc.) with only about 3% describing themselves as mixed race (and many of them were mixed when they came here). The Native Americans (to whom the whole New World really belongs if one is going to rectify past injustices against polys) are mostly still living isolated and (before the casinos here) impoverished, as are the blacks who, 150 years after emancipation, largely still live in crime ridden, impoverished ghettos. And these have been the best of times, with lots of cheap land and natural resources and a government which extorts some 30% of the money (i.e., 30% of their working lives, counting income tax, sales tax, real estate tax etc.), earned by the tax paying part of the middle class and the upper class, to give the poor massive handouts -- not only food stamps and other welfare, but police, and fire services, streets and parks, the government, justice system, hospitals, our national defense, schools etc., etc., most of these never counted when considering the ‘costs of welfare’.

In any case, the liberal, democratic delusion is that such largesse and social policies will weld our ‘diverse’ (i.e., fatally fragmented) society into one happy family. But government handouts need to continually increase (for social security, wars, health care, welfare) while the relative tax base shrinks, so the economy is in the process of collapse. The average family has less real net earnings and savings now than two decades ago and could survive about 3 months without income, about 40% of retired Americans have less than \$25,000 savings etc. And again, these are the best of times with lots of ‘free’ resources (i.e., stolen from others and from our descendants) worldwide and about 4 billion less people than there will be in the next century. As economies fail and starvation, disease, crime and war spread, humanity will split down racial and religious lines as always, and in the USA Hispanics and Blacks will still dominate the bottom.

Coulter notes that a side effect of 'diversity' (i.e., the decision of a handful of politicians to give the USA to polys) is that our right to free speech has disappeared on any issue of possible political relevance and of course that means just about any issue. Even in private, if any negative comment on 'diversity' is recorded or witnessed by anyone credible, the mob will try to take away your job, and damage your business or your person. This is certain when it involves public figures and racial or immigration issues, but nothing is off limits. Dozens of books in the last two decades address the issue including 'The New Thought Police: Inside the Left's Assault on Free Speech and Free Minds', 'End of Discussion : How the Left's Outrage Industry Shuts Down Debate, Manipulates Voters, and Makes America Less Free (and Fun)' and 'The Silencing: how the left is killing free speech', but nothing will dissuade the democrats and the lunatic fringe liberals.

Another 'side effect' (though not discussed by Coulter as it's not due primarily to Hispanics) is the loss of much of our freedom and privacy as the government continues to expand it's war on terror. As she notes there was never a compelling reason for admitting any serious number of Muslims. In any case it seems a no-brainer to not admit and to expel single unmarried Muslims aged 15 to 50, but even such obvious simple moves are beyond the capabilities of the retards who control congress and of course our beloved presidents, all of whom should be held personally responsible for 9/11, the Boston Marathon Bombing etc.

The invasion of the Southwest by Hispanics gives the flavor of what is coming and Coulter tells of trashed parks, schools that dropped from A to D grade, billions for 'free' (i.e., paid for by the upper middle and upper class and businesses) medical care and other services in Los Angeles alone etc. Anyone who remembers what Texas or California were like 30 years ago has no doubts about the catastrophic consequences as they see it every day. In California, which I know personally, the urban areas (and even most parks and beaches) that I used to enjoy are often full of trash and spray painted with Mexican gang signs, while the highways are horrifically crowded and the cities and towns overrun with drugs, crime and gangs, so most of it is now uninhabitable.

One of the most flagrant violations of US law is the creation of 'sanctuary cities'. The cities do not allow municipal funds or resources to be used to enforce federal immigration laws, usually by not allowing police or municipal employees to inquire about an individual's immigration status. This began with Los Angeles in 1979 (thus becoming the first large city donated to Mexico) and now includes at least 31 major American cities. Presumably the President could order the army or the FBI to arrest the city officials who passed these regulations but perhaps it's a murky legal area as (in another indication of the total ineptness of congress) immigration violations are civil offenses and not federal or state felonies. But a competent government (maybe we could import one from Sweden or China?) could pass such legislation in a few weeks. Also it could force compliance by cutting off most or all federal funds to any city or state that failed to comply with federal immigration laws, and at least one such bill has been introduced into congress recently. However as long as the Democrats (soon, rumor has it, to change their name to Democratic Party of United Mexico) are in power, nothing will be done and more cities and soon states will cease to be a part of America.

For this review I read a few politically oriented articles that I normally avoid and in them and the comments saw repeated accusations of racism against people who were only stating their desire to have the USA remain a prosperous and safe country. This claim is usually false in the normal meaning, but of course true in the new meaning—i.e., one opposed to letting Mexico annex America. So I made up a reply to this slander, since I have never seen a good one.

Actually it's not 'racism' but self-defense you are the racists. Just take a look at how different groups native to your own country are treated. The vast majority of immigrants in the USA would not even be permitted to enter your countries, much less given housing, food, free medical care, free school, the same rights as natives etc. And in the USA, it is you (with the connivance of 'liberals') who have taken away the tranquility, beauty, safety and free speech that existed here before a handful of stupid politicians and supreme court justices destroyed it by letting you in. We never voted to let you enter or become citizens--it was forced on us by halfwits in our government. If We had a chance to vote on it, few foreigners except medical, scientific and tech experts and some teachers would have been admitted and about 90% of the poly's here would be deported. In most cases you have an alien religion (some of which demand the murder of anyone who you take a dislike to) and culture (honor killings of your daughters etc.), do not pay a fair share of taxes (often none) and commit far more crimes per capita (e.g., 2.5x for Hispanics, 4.5x for blacks). The middle class American pays about 30% of their income to the govt. This is about 66 days/year of their working life and maybe 20 days of that goes to support the poor. And all the 'free' **things such as** welfare, food stamps, medical care and hospitals, schools, parks, streets, sanitation, police, firemen, roads and airports, national defense etc.) exist largely because **the 'racist' upper middle and upper class** pay for them. Maybe another 4 working days goes to support the police, FBI, justice system, DHS, Border Patrol and other govt. agencies that have to deal with aliens. Add another 10 or so days to support the military, which is mostly needed to deal with the results of 3<sup>rd</sup> world overpopulation ( the real major cause of 9/11, Iraq, Afghanistan, Libya, Yemen and all the wars past, present and future), and this cost added to welfare, medicare and social security (an ever increasing part for immigrants and their descendants) is bankrupting the country, with the only possible solution being to about halve the benefits and/or double the taxes. You take advantage of the freedom of speech we created to tell malicious lies about us! Many of you, if doing this in your home country would wind up in prison or dead! Shameless liars! What is your problem?--poor education, no gratitude, malicious, stupid, no experience with civilized society? (pick 5). And anyone who doubts any of this just does not know how to use the net as it's all there.

Please let me ask you--do people in your country work 30 days a year to support millions of aliens who overcrowd your schools, highways, cities and jails, trash your parks and beaches, spraypaint graffiti on buildings and import and sell drugs to addicts who commit over a hundred million crimes a year (added to the 100 million or so they commit themselves)? And have you had a 9/11 and many bombings at home? Do foreigners control the media so that you cannot even discuss these issues that are destroying your country and the world? Will your country be totally in their control in a few generations and be another impoverished, crime ridden, starving, corrupt 3rd world hellhole? Of course for most of you it already is, and you came to America to escape it. But your descendants won't have to be homesick for the hellhole, as they will have re-created it here. The "diverse" here (and their mono liberal servants) never tire of complaining-in all the media every day about how they are not treated fairly and not given enough (i.e., the 'non-diverse' don't work hard enough for them) and it never crosses their minds that if it were not for our taxes there would be little or no police or fire or medical or school services or parks or public transport or streets or sewers in their communities, and of course not even a country here as it is mainly we who created, support and serve in the military in all the wars. And it was primarily Europeans and their descendants who created the net and the pc's you are reading this on, the tech that

produces the food you eat and the medicine that keeps you alive. If not for the mono's tech and security maybe 90% of all the polys in the world would not exist. To sum it up, our antipathy to 'diversity' (i.e., having America taken over by Mexico) is due to a desire that our children have a country and a world worth living in.

While preparing this review, I saw several times what I have been hearing all my life- blacks saying that their disproportionate problems with drugs, crime and welfare are due to racism, and certainly there is truth to that, but I wonder why Asians, who must be subject to racism as well ( insofar as it exists—and relative to most poly counties, it's quite minimal here), and most of whom came here much more recently, spoke little or no English, had no relatives here and few skills, have a fraction of the crime, drugs and welfare (all less than monos and so way less than blacks) and average about \$10,000 more income per family than monos. Also, blacks never consider that they would not exist if their ancestors were not brought to the new world, that those who sold them were often black, that to this day blacks in Africa almost universally treat those of different tribes as subhuman (Idi Amin, Rwanda, Gaddafi etc. and for sure far worse is soon to come), and that if they want to see real racism and economic exploitation and police maltreatment, they should go live almost anywhere in Africa. Returning to Africa or Mexico etc. has always been an option, but except for criminals escaping justice, nobody goes back.

Likewise it never crosses their minds that every year maybe 500 billion dollars are spent by federal, state and city govts. on education, medicine, transportation (highways, streets, rail, bus and airline systems) , police, fire and emergency care, numerous welfare programs, the government and judicial systems-the vast majority of it created, maintained and paid for by the 'non-diverse'. There is the FBI, NSA, CIA, and the armed forces of the USA and other mono countries, without which there would be no USA and no peace, security or prosperity anywhere in the world, and they have also been created, run and staffed largely by the monos, who constitute most of the dead and wounded in every USA war (less an issue for Hispanics who serve in the military at about half the rate of monos) and in every police force from 1776 to now. Without medicine and public health measures, most of your ancestors (and the whole 3<sup>rd</sup> world) would have suffered and often died of leprosy, malaria, worms, bacteria, flu, tuberculosis, smallpox, syphilis, HIV, hepatitis, yellow fever, encephalitis, and the tech for high cholesterol and blood pressure, heart, cancer, and liver surgery, MRI, XRAY, Ultrasound etc., etc., almost all of it invented, administered and overwhelmingly paid for by the non-diverse 'racists'. But fine, let's undo the 'injustice' and pass a Back to Africa (and Latin America and Asia etc.) law providing funds to repatriate everyone. They could sell their assets here and most could live like kings there but of course there would be very few takers. And by the next century there will be 3 billion more Africans (the official estimate) and even India and China (who will add a mere few hundred million each) will look like paradise.

If you look on the net you find the polys incessantly whining about their oppression, even when it occurred decades or centuries ago, but sorry --I don't see how anything that's done by others even today is my responsibility, and so much less so in the past. If you want to hold every mono responsible for what the vast majority now alive are completely innocent of, then we want to hold every poly responsible for all the crimes committed by any of them here over the last 400 years, and for their share of all the tens of trillions we spent to build and defend the USA and to keep them safe, healthy and well

fed. Yes most blacks and Hispanics are poor due to historical factors beyond their control just as monos are richer (often) due to historical factors beyond theirs, but the important points are that we now alive did not cause this and that here, as almost everywhere that polys are a significant percentage, they commit most of the crime, collect most of the welfare, pay the least taxes and continue breeding like rabbits and dragging their countries into the abyss.

The problem is not polys or monos, but that people are selfish, stupid, dishonest, lazy, crazy, and cowardly and will only behave like humans if forced to do so. Giving people rights instead of duties first is a fatal mistake that will destroy any society and any world. In the tiny groups in which we evolved, where everyone was our relative, reciprocal altruism worked, but in a world soon swelling to 11 billion, this impulse to help others is suicidal. The world is totally preoccupied with terrorists, but every day the 7.5 billion do vastly more damage to the world just by living, and the mothers of the 3<sup>rd</sup> world increase the population by about 200,000, and so do hugely more damage every hour than all the terrorists worldwide will do in the whole 21<sup>st</sup> century. Just the polys in the USA in one year will do far more damage to the USA and the world by destroying resources, eroding topsoil and creating CO2 and other pollution than all terrorism worldwide in all of history. Is there even one politician or entertainer or business person who has a clue? And if they did would they say or do anything—certainly not. Marvelous that even Obama and the Pope speak about the coming horrors of climate change but of course not a word about the irresponsible motherhood that is it's cause. The most you get is a meek suggestion that climate change needs to be dealt with, but never a hint that unrestrained motherhood is the source of it. China now creates twice the CO2 of the USA and USA polys create about 20% of USA pollution which will rise to about 50% in the next century.

Coulter describes the outrageous story of what seems to be the only occasion on which Americans actually got to vote on the immigration issue—what some call “the great Prop 187 democracy ripoff”.

In 1994 Californians, outraged to see ever more Hispanics crowding into the state and using up tax money, put on the ballot Proposition 187 which barred illegals from receiving state money. In spite of the expected opposition from all the self-serving, boot licking Democrats and other left wingers, it passed overwhelmingly winning 2/3 of white, 56% of black, 57% of Asian and even 1/3 of Hispanic votes (yes many middle and upper class Hispanics realize being taken over by Mexico will be a disaster). Note that all these people are ‘racists’ (or in more polite columns of the NY Times etc. ‘bigots’ or ‘nativists’) according to the current use of this word by a large percentage of liberals, many Hispanics, the Sierra Club, the ACLU and even Nobel Prize winning economist Paul Krugman (who recently called Trump a ‘racist’ for daring to tell the truth while defending the USA from annexation by Mexico).

It even carried the once hopeless Republican candidate for Governor, Pete Wilson to a landslide victory, with 1/3 of his voters stating his support for Prop 187 was their reason for voting for him. However the “ACLU and other anti-American groups” (Coulter) brought suit and it was soon struck down by a Democratic appointed (i.e., ‘honorary Mexican’) District Court Judge for being unconstitutional (i.e., protecting Americans rather than aliens). As with the 1982 Supreme Court decision, it was another hallucinatory interpretation of our laws and a clear demonstration of the hopelessness of the court system, or any branch of the government (at least a Democratic dominated one) in protecting

Americans from a 3<sup>rd</sup> world takeover. It has been suggested that the ACLU change its name to the Alien Civil Liberties Union and that it, along with the many other organizations and individuals working to destroy the USA be forced to register as agents of a foreign government or preferably, be classified as terrorists and all their employees and donors imprisoned.

In spite of this, neither the state nor federal govt. has done anything whatsoever to prevent the takeover, and Coulter notes that when G.W.Bush ran for president, he campaigned *in America* with the corrupt Mexican president Gortari (see comments on Carlos Slim below), had brother Jeb 'Illegal Immigration is an act of love' Bush speak in Spanish at the RNC, and after winning, gave weekly radio addresses in Spanish, added a Spanish page to the White House website, held a huge Cinco de Mayo party at the White House, and gave a speech to the blatantly racist National Council of La Raza, in which, among other outrages, he promised \$100 million in federal money (i.e., our money) to speed immigration applications!

California is the 8<sup>th</sup> largest in economy in the world, just behind Brazil and ahead of Italy, South Korea, Australia, Spain, India, Russia, and Canada and about double that of Mexico, and in about 10 years when the 10 million or so Hispanic kids there grow up and the total Hispanic population of Calif is about 22 million (counting only legals), they will own the state and basically it will have been annexed by Mexico.

In recent years, Calif. Governor Brown signed legislation granting drivers licenses to illegals, paying for free medical care for their children and stopping local law officers from detaining immigrants and transferring them to federal authorities unless they have committed certain serious crimes. He agreed to let noncitizens monitor polls for elections, and they have been appointed to other government positions such as city councils without state govt. approval. He also signed a law known as the Trust Act (i.e., trust they won't rob, rape, murder, sell drugs etc.), which specifies that unless immigrants have committed certain serious crimes, they cannot be detained (for delivery to the feds for deportation) past when they would otherwise become eligible for release. The batch of new "lets become part of Mexico" laws also included one that would allow immigrants without legal status to be admitted to the state bar and practice law in California. But he vetoed the bill allowing illegal aliens to serve on juries. So the only thing that prevented a major step in turning over the Calif. Courts to Mexico was the arbitrary decision of one man! However it won't be more than a few years before an Hispanic is Governor and then this and endless other atrocities will ensue, including presumably giving illegals the right to vote. This will end the distinction between being a citizen of the USA and a citizen of any other country who can sneak across the border. Note that as usual the Citizens of California were never permitted to vote on any of these issues, which were passed by the Democratic controlled state legislature. Why don't they just be honest and change the name to Hispanic Democratic Party?

It now (late 2015) appears that California (and by the end of the century the USA) is lost, unless Trump wins and sends federal troops into California to deport illegals and arrest all those (including numerous elected officials ) who are violating federal law. Even this will only slow up the catastrophe unless a law is passed terminating anchor babies (i.e., those getting citizenship because they are born here) , preferably retroactively to 1982 and rescinding citizenship for them and all those who gained it from them. A new law has to be passed and not an old one repealed, as there is no such law—as Coulter noted, this was an utterly arbitrary opinion of Justice Willie, "anchor baby" Brennan and only a handful of justices ever voted for this hallucinatory interpretation of the law. How many of us voted for the TKO (Ted Kennedy Outrage) Immigration disaster in 1968? There were 320 representatives and 76 senators

and most of them are now dead, so out of the approx. 150 million adult Americans alive now, about 140 senior citizens actually voted for it! As clear a demonstration of the hopelessness of representative democracy as one could want.

As she says, the 1968 act, and all subsequent ones need to be repealed by a law that puts a moratorium on all immigration and naturalization, and preferably rescinds citizenship for everyone naturalized since 1968, along with all their relatives and descendants. All their cases would be reviewed and citizenship conferred on select individuals who scored high enough on a point scale, with welfare recipients, the chronically unemployed, felons, and their descendants ineligible, those with college or medical degrees, teachers, engineers, business owners etc., getting certain points towards eligibility.

Coulter spends some time on taxes. Corporate tax in the USA is the highest in the world at 39% and as the govt. continues to raise taxes to support the half of the country that is on some kind of welfare (if one includes social security, unemployment, food stamps, and veterans benefits), inevitably capital and jobs will leave, and entering the next century with vanishing resources and about 200 million more polys (for a total of around 350 million) a drastically reduced standard of living and eventual collapse is inevitable.

In 2013 those with gross incomes above \$250,000 (nearly all of them monos) paid nearly half (48.9%) of all individual income taxes, though they accounted for only 2.4% of all returns filed and their average tax rate was 25.6%. The bottom 50% of filers (those making under \$34,000-most polys are here) paid an average of 1.2% federal income tax for total share of 2.4% while the next 35% of filers (those making \$34k to 69k) averaged 21% tax rate for a total share of 10.5% of total federal income tax collected. So it is obvious that the upper and upper middle class are giving the poor a largely free ride. Consider this: "When we combine the populations of non-payers and non-filers and look to see what overall percentage of each group is not paying taxes, we find that: 50.7 percent of African American households pay no income taxes, 35.5 percent of Asian American households do not, 37.6 percent of White American households do not, and 52 percent of (legal) Hispanics pay no income taxes." There are about 5X as many whites as blacks and 4X as many whites as Hispanics in the USA, and there are about the same % of whites and blacks on welfare (39%) and about half that % of Hispanics, so percentage wise that means blacks are about 5X and Hispanics about 8X as likely to be on welfare as whites.

Including property taxes, sales taxes etc. brings the average middle class (\$34k to \$69k income) tax up to about 30%, so 4 months/year or about 15 years labor in a 50 year lifetime goes to the government. Counting all support as enumerated above (i.e., not just food stamps etc., but the poor's fair share of all other expenses) the average middle class family works roughly 1/3 of this or 5 weeks/year or 5 years of their working life to support the poor. Neither mass immigration nor slavery nor anchor babies nor excessive breeding nor unemployment, nor crimes and drugs are their fault, but they pay for them, and their kids will pay more (likely at least 10 years of their 50 year working life well before 2100) until the standard of living and quality of life is about the same as that of poly countries, and they will both drop continually.

Of course every statistic has a counter statistic, but as a rough guide we find a recent study that found that 37% of Hispanic immigrant households got the majority of their income from welfare while 17% of blacks did (whites were not reported but I would guess about 10%). Of the \$ 3.5 trillion budget, about 595 billion is deficit and about 486 billion goes to welfare, so eliminating welfare would almost balance it and eliminating all the costs associated with persons and their descendants naturalized since 1968

would put us solidly in the black and would probably allow paying off the 18 trillion national debt before the end of the century, while implementing a Naturalized Citizens Repatriation Act would likely allow this closer to midcentury.

As I write this I see a 'news item' on Yahoo that tells me that illegals are doing us a big favor as the majority are working and pay about \$1000 each tax per year. But they don't tell us that they cost the country maybe 25,000 each in direct traceable costs and if you add their share of all the other costs (to maintain the govt. the police, the courts the army the streets etc., etc.) its easily double that. As Coulter tells you on p47, a college educated person pays an average \$29k taxes more per year than they get back in govt services. Legal immigrants however get back an average \$4344 more than they pay, while those without a highschool degree get back about \$37k more than they pay. She says that about 71% of illegal households get welfare.

A good part of Coulter's book is spent on crime, and we should first note (Coulter does not seem to though I expect she knows) that it is rarely considered that it is hugely underreported, especially among the poor and polys. Thus the BJS says that about 3.4 million violent crimes per year go unreported and the figures for nonviolent ones (burglary, robbery, assault, petty theft, vandalism, drug dealing, etc.) must be in the hundreds of millions, disproportionately committed by (and suffered by) polys. One finds that the percent of adult males incarcerated for whites is 0.7, for Hispanics 1.5 and for blacks 4.7. It appears impossible to find any precise national figures for the cost of incarceration but \$35K/year seems about right and perhaps \$50K for the legal system and perhaps another \$50k in medical and psychological costs, rehab programs, loss of work by their victims etc. According to the BJS non-Hispanic blacks accounted for **39.4%** of the prison and jail population in 2009, while non-Hispanic whites were **34.2%**, and Hispanics (of any race) **20.6%**. According to a 2009 report by the Pew Hispanic Center, in 2007 Latinos "accounted for 40% of all sentenced federal offenders-more than triple their share (13% of the total U.S. adult population".

If one counted only illegals, the crime and imprisonment rate would likely be double. As Coulter notes (p101-2) it's impossible to get the actual figures for immigrant crime (and as noted all crime among polys is greatly underreported and many Hispanics are misclassified as whites) , but it's definitely above that stated, so their actual rate could be near that of blacks. One set of data showed about 1/3 of the 2.2 million state and local prisoners are foreign born and maybe another 5% American born Hispanics and another 30% black leaving about 32% white. The foreign born were 70% more likely to have committed a violent crime and twice as likely a class A felony. As Coulter notes, virtually all immigrant groups have a higher crime rate than natives. Bribery and extortion will be see huge increases. Bribes (the mildest form of extortion) in cash or equivalent is the normal interaction between people in the 3<sup>rd</sup> world and police, the military, customs and immigration officers, health and fire inspectors, teachers, school admissions officers, and even doctors, surgeons and nurses. I am not guessing here as I spent a decade of my life in the 3<sup>rd</sup> world and experienced and heard countless stories about all of the above. As time passes, we can expect this to become routine here as well (first of course in the Western states) and the norm thereafter. It's likely Spanish will become the official and mandatory language and Roman Catholicism the official religion and of course the Mexican cartels will be the dominant criminal organizations, at least for the Southwestern states by midcentury.

Of course as Coulter points out its very hard to get statistics on race and crime or increasingly on race and anything as its considered 'racism' even to ask and the govt. refuses to collect it. Finding the truth is

made much more difficult since Hispanic special interest groups (abetted by mono liberals, who have lost or sold whatever common sense or decency they may have had) are hard at work spreading disinformation. She does not seem to mention the massive deception facilitated by Yahoo, Bing and others, who present among their news items paid disinformation which presents 'news' that is deliberately false or hugely misleading.

In spite of being given a largely free ride, the polys take it all for granted (especially as it's "racist" to point it out) and have no problem suing the police, hospitals, every branch of government for any imagined infraction. The monos should get a clue and sue them back! They could file millions of suits against people who riot in the streets, picket and protest disrupting traffic, smashing windows and causing business losses, psychological trauma, etc. Sue all the criminals and their families for the damages to property, police and national guard costs, loss of business income and work, etc. Also sue the police and every branch of government for failing to protect them every time a crime is committed, especially by illegal polys. An encouraging example happened as I write this—the parents of a young San Francisco woman murdered by an illegal alien criminal, who had been deported numerous times, and then shielded from deportation by the San Francisco police, is suing them and the feds (and they should sue the board of Supervisors and Governor Brown and the state legislature who voted for the sanctuary rules and Trust Act as well). Tens of thousands are robbed, assaulted, raped or murdered by polys, and perhaps 100 million victimized in lesser ways every year, and the injured parties should sue every time. To facilitate this, the non-diverse could establish a fund and various organizations aimed to eliminate illegals and crime against monos. And of course all the countries that foreign born criminals come from should be forced to pay the cost of policing and prosecuting them and of keeping them here—welfare, medical care, schooling, and their share of all the goods and services mentioned above, including national defense. Mexico should pay all the costs of policing the border and all the crimes and for all the upkeep of illegals here since day one—i.e., back to say 1968. And they and Colombia should pay for the cost of drug enforcement, addict treatment and jailing, and say a \$20 million fine every time someone is raped, disabled or murdered by a drug addict or by an illegal or a naturalized citizen or descendant of a person originating in their country. Like many of the ideas here it sounds bizarre because the cowardice and stupidity of our leaders has gotten us so used to being abused. We are the last country that should put up with abuse but the politicians and left wing morons have made us the easiest mark on the planet. Yes 9/11 is the most striking abuse but in fact we suffer as many deaths and injuries from polys every year (e.g., just from drugs and addicts or just from wars), and far more damage every day, if you extrapolate the consequences of their presence here into the future.

Coulter recounts a few (remember the publisher cut the book in half and she says she can easily produce 50 cases for every one here) of the more outrageous immigrant rape crimes committed here, noting a study in which Latino women here reported childhood sexual abuse at about 80X the rate of other Americans, and since it seems likely many did not want to talk about it, it could be higher. She notes that in much of Latin America raping teenagers is not considered a crime (e.g., the age of consent in Mexico is 12) and in any case it is rare that anything is done about it.

She notes that illegals have made large areas of SouthWestern USA public lands and parks unsafe and some have been closed. Half of some 60 forest fires on federal or tribal land between 2006 and 2010 were started by illegals, many of them set deliberately to avoid capture. The cost of fighting these 30 alone might pay for a secure border fence. I assume everyone knows about the massive marijuana growing operations conducted by the Mexican cartels in our national forests? In addition to the erosion and pollution, it is the norm for growers to kill numerous animals and threaten hikers. Most depressing of all is the sellout of the Sierra Club (who suddenly changed their tune after getting a \$100 million

contribution from billionaire David Gelbaum with the proviso that they support immigration—clearly confused as his right hand protects nature while the left destroys it), who are now devoted to mass immigration, denouncing anyone opposed as “white racists” even when they are poly. Considering the blatant trashing of California by Hispanics and the clear as day end of nature in America as the immigrants about double the population during the next century or so, this is truly amazing.

**One murder in the USA is said to total about \$9 million lifetime costs and if they get death it is several million more. At about 15,000/year that would be about \$150 billion/year just for homicides-most by polys. Mexico has about 5X the murder rate of the USA and Honduras about 20X and your descendants can almost certainly look forward to our rate moving in that direction. Coulter notes that Hispanics have committed about 23,000 murders here in the last few decades. As I write this item appeared on the net. “In an undated file photo, Jose Manuel Martinez arrives at the Lawrence County Judicial Building in Moulton, Ala., before pleading guilty to shooting Jose Ruiz in Lawrence County, Ala., in March 2013. Martinez has admitted to killing dozens of people across the United States as an enforcer for drug cartels in Mexico. “**

**Figuring about 2.2 million prisoners (over 1% of the adult population) and a cost to put them in jail from the start of their criminal career of maybe \$50,000 each or about \$100 billion and the cost to keep them there of about \$35,000 each or about 75 billion means on the order of \$150 billion a year, not including other governmental and social costs. I don't see any really clear estimates on the net for the total cost of crime in the USA, but in 2013 it was estimated that violent crime alone cost the UK ca \$150 billion or about \$6000/household, or about 8% of GDP, but the USA has a much higher percentage of immigrants, guns and drugs, so including all the nonviolent crimes and figuring only 5% of the GDP, that would be about 900 billion per year. Figuring about 60% of crime due to polys, or maybe 80% if you count that of monos addicted to drugs imported by poly's, we pay something like 700 billion a year to support poly crime. Of course all those guilty of felonies regardless of national origin, history or status could have their citizenship rescinded and be deported or sent to an island where their cost of upkeep could be \$1000/year rather than \$35,000 and it could be made a one way trip to avoid recidivism. Most likely nothing will be done and crime here will reach the levels there as the border continues to dissolve. Inside Mexico in 2014 alone, 100 U.S. citizens were murdered and more than 130 kidnapped and if you add other foreigners and Mexicans it runs into the thousands. Even a tiny lightly traveled country like Honduras manages some 10 murders and 2 kidnappings a year of US citizens. And of course these are the best of times—it is getting steadily worse as unrestrained motherhood and resource depletion bring collapse ever closer.**

We hear constantly about how bad we are not to want to give polys even more. OK fine, lets agree to do it provided the 3<sup>rd</sup> world country they are from enforces legislation that gives all foreigners in their country, legally or not, citizenship for their babies, welfare, free food, free medical care, free schooling, immunity to deportation, emergency care, drivers licenses, license to practice law, right to serve on juries, right to bring in all their relatives, who also get all these rights, right to setup organizations that help them to lie on immigration forms, to evade deportation, to suppress free speech and to subvert the political process so that a major party helps them to take over the country. Actually let's make it easy and do it if even one of their countries implements just one of these. Of course it will never happen.

Naturally, those with every kind of mental or physical deficiency are getting organized too. Those with autism, actually a group of genetic defects that vary greatly, are now campaigning to be regarded as not deficient but 'neurodiverse' and 'neurotypicals' should regard them as peers or even their superiors. No problem for me if someone wants to have a “friend” or spouse who cannot experience love or

friendship and who feels the same when they die as they do when their goldfish does (except being more annoyed by the greater inconvenience). And those with more than mild cases will never hold a job and will be a burden to their relatives and society (i.e., the taxpayers) all their lives and have a strong tendency to pass the problem on to any offspring they have, so it will likely increase continually, the same as most other problems with significant heritability. As diagnosis has improved, so has the incidence, which now exceeds 1% (along with schizophrenia, schizotypal disorders, ADHD, drug addiction, alcoholism, alexithymia, low IQ, depression, bipolar disorder, etc., etc., so perhaps the combined incidence of disabling mental disorders exceeds 10% and those with physical problems who need partial or complete lifelong support is probably similar and both are rising in number and percent. Clearly as the economy collapses, the costs of health care rise, and an ever larger percentage are nonworking elderly, this hopelessly lunatic system will collapse-i.e., the USA will have the same handouts for everyone as 3<sup>rd</sup> world countries by the 22<sup>nd</sup> century—none.

Coulter comments on Mexican citizen Carlos Slim Helu (the world's richest person) in the context of the near universal lying about and evasion of immigration issues by the New York Times and other media. He became a major shareholder in the New York Times a few years ago, and this partly accounts for its subsequent failure to cover immigration issues in a meaningful way. Slim is the world's premiere monopolist, considering his companies control 90% of the Mexican telephone market and many of its major industries. His wealth is the equivalent of roughly 5% of Mexico's GDP. To add perspective, since the USA has about 15 times Mexico's GDP, to be comparable, Bill Gates or Warren Buffet would have to be worth about a trillion dollars each. California is the biggest money making state for Slim. Their take of Mexican goods and services is about \$140 million/day. To get the flavor of how things were when Slim managed to acquire the Mexican telephone company (and what can be expected here soon), Gortari (chosen by G.W. Bush to campaign with him!) was president of the vicious Mexican political monopoly PRI, and in subsequent years Gortari's brother was found murdered, his relatives were apprehended by Swiss police when they tried to withdraw \$84 million from his brother's bank account, and he fled Mexico for Ireland, where he remains. These are among the reasons Coulter calls Slim a robber baron and a baneful influence on Mexico and America. She notes that about \$20 billion of Slim's yearly income from his telephone monopoly comes from Mexicans living here. Interestingly, he is Lebanese on both sides, so Mexico is experiencing its own foreign takeover.

The bleeding hearts insist we show humanity and guarantee our own collapse to help the mob, but what humanity do they show? They breed like rabbits and consume without restraint thus, condemning everyone, including their own descendants to Hell on Earth. Our Secretary of State Kerry praises China for 'lifting 200 million people out of poverty' but fails to note this is unsustainable and that 11 billion all trying to stay out of poverty guarantees the collapse of China and the world. China's higher QOL, like our own, is only temporary, bought at the cost of their own descendant's futures.

How much Quality of Life (QOL- a general measure including wealth, crime rate, stress, traffic, drug problems, happiness etc.) might we gain by various measures? Banning anchor babies might up QOL 5% by mid-century and 10% by the end relative to doing nothing. Making the ban retroactive to 1982 and thus deporting most of those naturalized by being related to AB's might raise QOL another 5% immediately. Banning immigration might raise it another 10% by end of century while making the ban retroactive to 1968 and deporting most immigrants along with their descendants and naturalized relatives might give us another 20% as soon as they could be deported. And there might be a Back to Africa or Slavery Restitution Act which sent all blacks, or at least those on welfare, unemployed or in prison, back to their homelands so we would never again have to listen to their inane complaints about being kidnapped. Of course one would do this on a case by case basis, keeping all the skilled ones (e.g.,

medical and high tech personnel). Instead of or prior to the slow deportation process, one could also cancel the citizenship and hence the voting rights of all the naturalized citizens and their descendants since 1968.

The 42 million African-Americans who account for 4.5x as many prisoners per capita as monos, get a largely free ride for all essential services and welfare, take over and render uninhabitable large areas of cities, increase the crowding and traffic by about 13% etc., so they may decrease our QOL about 20%. Hispanics amount to about 17% (or about 25% including illegals) and they account for a minimum of 2.5x as many prisoners as monos and have all the other issues, thus causing a QOL drop of about 30%. So overall, it's a fair guess that deporting most polys would about double the QOL right now for the average person but of course much more for the poorer and less for the richer. If one compares likely QOL in 2115 (i.e., a century from now) if all the possible anti-diversity measures were adopted relative to what it will be if little or nothing is done I expect QOL will be about 3X, increasing more as the century proceeds.

After documenting the incompetence of the INS and the govt., and the countless treasonous and blatantly anti-white racist (in the original sense) organizations (e.g., the National Council of La Raza etc.) helping to swamp us with immigrants (partial list on p247) she says "The only thing that stands between America and oblivion is a total immigration moratorium" and "The billion dollar immigration industry has turned every single aspect of immigration law into an engine of fraud. The family reunifications are frauds, the "farmworkers" are frauds, the high-tech visas are frauds and the asylum and refugee cases are monumental frauds." And of course this book is heavily documented and this is after she has detailed the frauds (and recall most were left out due to size constraints).

As Coulter notes, a 2015 poll shows that more Americans had a favorable opinion of North Korea (11%) than wanted to increase immigration (7%,) but most Democrats, the Clintons, the Bush's, Obama, Sheldon Adelson, David Gelbaum, Carlos Slim, Paul Krugman and Mark Zuckerberg don't want Americans to ever vote on it. She also mentions that then Florida Governor Jeb Bush (with a Mexican wife) pushed for a bill to give drivers licenses to illegal aliens (copying California) just 3 years after 13 of the 9/11 terrorists had used Florida drivers licenses to board the planes. Yes the same Jeb Bush who last year called Illegal immigration "an act of love" (of course he means love for Mexico and hatred for the USA).

The inexorable collapse of the USA shows the fatal flaws in representative democracy. If it is to survive and not turn into a 3<sup>rd</sup> world hellhole, it must establish a meritocracy. Change the voting age to 35 minimum and 65 maximum with minimum IQ 110, proof of mental stability, lack of drug or alcohol dependence, no felony convictions, and a minimum score on the SAT test that would get one into a good college. A recent Gallup poll found that about 50% believed the Devil influences daily events, and that UFO's are real, while 36% believe in telepathy and about 25% in ghosts. A yes on any of these would seem to be a good reason for lifetime exclusion from voting.

She points out the absurdity of politicians fawning on the Hispanic voters (Hispandering). If Romney had won 71% of the Hispanic vote instead of 27% he still would have lost, but if he had won only 4% more of the white vote he would have won. In fact 72% of voters are non-hispanic white, so even if someone got ALL the nonwhite votes, a presidential candidate could still win by a landslide.

If Trump wins and enough Republicans are in congress (the Democrats having sold out their country long ago) he will likely do what he says and deport the illegals, but unless he is also able to terminate

immigration and retroactively deport most of those naturalized since 1968, it will only slow the disaster and not stop it.

Even though mobocracy (democracy) is a slow motion nightmare, if we had a direct democracy (as we easily could in the computer age) and people were actually polled on important issues, I think most of our major problems would be disposed of quickly. Suppose tomorrow there was a vote of every registered voter with an email address on questions something like this:

1. Should all illegal aliens be deported within 1 year?
2. Should welfare be cut in half within 1 year?
3. Should all convicted felons born in another country have their citizenship canceled and be deported within 90 days?
4. Should all immigration be terminated except temporary work visas for those with special skills?
5. Should all child molesters, rapists, murderers, and drug addicts have their citizenship canceled and deported, or if a native citizen, be sent to an island?

So much the better if voting was restricted to those whose parents are both native born, who are non-felons, **who have paid more than 5% of their income in taxes the last 3 years and passed mental health, current events and IQ tests.**

I am not against a 'diverse' society but diversity should be capped at say 20% and that would mean about 40% of the polys here now would be repatriated. Actually I would not object to keeping the % polys we have now (about 35%) provided half the ones here were replaced by carefully screened Asians or by people from anywhere provided they are carefully screened (i.e., no criminals, mental or physical defectives, no religious nuts, no drug addicts, well educated with a proven useful profession) and agree to have no more than two children, with immediate deportation if they produce a third, commit a major felony or remain on welfare for more than one year. And of course no relatives are permitted entry. In fact, how about replacing all the mono criminals, drug addicts, mental cases, welfare users, and chronically unemployed etc.? Of course it's impossible now, but as civilization collapses many amazing things will happen, all of them extremely unpleasant for large numbers of people. Coulter jokingly suggests inviting Israel to occupy the border with Mexico, as they have shown how to guard one. However I would suggest really doing it—either giving them the Southern portion of each border state or perhaps just occupying the border section of Mexico (which we could occupy in a few weeks). Israel should be delighted to have a second country, since their position in Israel will become untenable as the USA, France etc. lose the ability to be the world's policemen, and nuclear capable 3<sup>rd</sup> world countries collapse. However, we should force them to leave the strict orthodox at home as we already have enough rabbit breeding religious lunatics.

In a late 2015 poll by YouGov, 29 percent of respondents said they can imagine a situation in which they would support the military taking control of the federal government – that translates into over 70 million American adults. And these again are the best of times. At this time in the next century give or take a few decades, (much sooner in many 3<sup>rd</sup> world countries), with industrial civilization collapsing, starvation, crime, disease and war worldwide, military coups will be happening everywhere. It's likely the only cure for America's problems but of course again nobody will get to vote on it.

In sum, this is the American chapter of the sad story of the inexorable destruction of the world by unrestrained motherhood. Forty-seven years ago 396 politicians voted to embrace the destruction of America by the 3<sup>rd</sup> world. Without the changes they and William Brennan's court made (along with

failure to enforce our immigration laws), we would have about 80 million fewer people now and at least 150 million fewer in 2100, along with trillions of dollars in savings. We would have a chance to deal with the immense problems we and the world face. But, burdened with a fatally fragmented (i.e., 'diverse') population about twice the size we might have had, half of which will not contribute to the solution, but rather constitute the problem, it is impossible. **What we see is that democracy as practiced here and now guarantees a fatally inept government. Peace and prosperity worldwide will vanish and military coups, terrorism and warlords will become routine, probably by the end of this century, certainly during the next.**

To me it's clear that nothing will restrain motherhood and that there is no hope for America or the world regardless of what happens in technology, green living or politics anywhere. Everything tranquil, pure, wild, sane, safe and decent is doomed. There is no problem understanding the stupidity, laziness, dishonesty, self-deception, cowardice, arrogance, greed and insanity, but it ought to seem a bit odd that so many reasonably sane and more or less educated people could welcome into their country (or at least permit the entry and tolerate the presence of) large numbers of immigrants who are clearly destined to take over and destroy it. Monkey psychology is only capable of seriously considering oneself and immediate relatives for a short time into the future, maybe decades at most. Most people are neither smart nor well educated, but one can see it happening in front of us, especially here in the USA and above all in the big urban areas and in the Southwest, especially California and Texas. Sheer laziness, ignorance and a lack of understanding of ecology and the nature of population growth is part of it but I think that reciprocal altruism has a role as well. When we evolved in Africa we lived in small groups, probably seldom more than a few hundred and often less than 20 and so all those around us were our close relatives and our behavior was selected to treat them reasonably well as they shared our genes and would reciprocate good deeds (reciprocal altruism). We stopped evolving about 50,000 years ago when culture evolved to the point where language, fire and tools gave us a huge advantage over other animals and there was no longer major selective force for changing behavior. So, to this day we still have the tendency, when we do not feel in immediate physical danger, to act in a more or less friendly manner to those around us. Though the more intelligent and reflective persons (which of course includes many poly's) can see the danger to their descendants, those who are dull witted, or emotionally unstable, sociopathic, autistic, mentally ill (i.e., the vast majority) won't see it. But how about Adelson, Zuckerberg, Gelbaum, Biden, Obama, Krugman and a very long list of the rich and famous? They have at least some education and modest intelligence, so how can they want to destroy their country and their own children's future? Actually, they are no more well educated, perceptive and future oriented than the average college graduate (i.e., not very), and also they and their relatives live in gated communities and often have bodyguards, so they will not be seriously concerned about trashed neighborhoods, beaches and parks, drive by shootings, home invasions, rapes and murders, nor about paying taxes or making ends meet. They are just not thinking about the fate of their great grandchildren, nor anyone's. Like the vast majority, they don't have clue a about human ecology, nor dysgenics and can't see the inexorable path to collapse.

A reader suggested I was talking about 'ethnic cleansing' of polys by monos but it's exactly the reverse. I had not actually thought of the destruction of America and industrial civilization by polys as genocide, but since the number of monos of all types (and many groups of polys such as Japanese and Koreans) will steadily decline and their countries be taken over by polys, it does have that aspect, though it's the monos failure to produce enough children that is mainly responsible. A few zealots like Al Queda and ISIS want to eliminate all mono's and the Arabs will certainly demolish Israel, but otherwise there is little motivation to get rid of those who are giving you a free lunch (though of course few poly's will grasp how big the lunch really is until it stops). However, as time passes and the competition for space and

resources gets ever more desperate, genocide of all mono groups may become an explicit goal, though mostly it will be far overshadowed by attacks of various poly groups on others, which has always been the case and always will. In any event all mono and many poly groups are certainly doomed--we are talking about the 22nd century and beyond. The only consolation is that we can take comfort in knowing it will not be finalized during our lifetime, and those like myself who are childless will have no descendants to suffer the consequences.

So Coulter is right on target, and unless some truly miraculous changes happen very soon, it's goodbye America and hello Third World Hellhole.
