## Candidacy and the Grand Unification Scheme

## Miguel A. Sanchez-Rey

Abstract
Does any unification candidate necessitate the grand unification scheme?
May 24th, 2016

## Variant [of stringy] and Experiment

Any unification candidate, which can be said to be a variant [of stringy] requires the grand unification scheme or it will yield an endless amount of variant [of stringy]'s. [1] Any unification candidate that is not analogues to a variant [of stringy] may comply with the EOC Guideline but is not subject to the grand unification scheme [2]. Rather it hold no plausibility to experimental stringy.
