

4D – Dimensions that we perceive

Our reality would occurs on this half plane: Let call it the “Froud” Reality, model related to integrals Appolianan packings or Pythagorean triples and as consequence the , also t to some Hofstader butterfly analog (arXiv:1802.04585v1)

Also seems to be in touch with Seiberg–Witten theory

Slit, Black Hole

Holographic projection, commutative

Alternating direction of time narrow

Wave dominium with two opposite time narrows

Non commutative Counterpart, Two opposite travelling waves , and two narrows of time. This two travelling wave stands the solutions of FKPP equation and also relates to A consequence of the Descartes’ circle theorem and two possible solutions (arXiv:1802.04585v1)
