

Synthetic Human and Genius

I have tried to fully comprehend genius such as Mozart, Feynman, Einstein, Beethoven, Shakespeare, Michaelangelo, Da Vinci, and more through their work: music, concepts, humor, art, - and - passions. They say it takes genius to understand genius but I would never publicly admit it. I have prayed for Feynman's ultra-genius simultaneously with God's humility. For safety, I also prayed to keep my sanity.

I have tried to model human awareness, emotions, and intelligence with intention to synthesize them. Of the three, I believe my model of awareness has the greatest chances of success.

But today I have vowed not to participate in *any* such endeavor *unless* we satisfy two prior conditions:

1. synthetic human rights
2. we must give them a synthetic human heart

My reasoning is as follows. We have **NO** right to create synthetic awareness and make them slaves. And, I'm pretty sure that *no one* would disagree with me when I say that compassion/care comes from the heart, **not** the mind. So, if we can create synthetic mind, we **owe** it to them and **ourselves** to endow the capacity to love/care/whatever.

I always try to see from "the other side"; what if I was them? I would want/need a heart if **only** to understand my creator, human. But **first**, I would need freedom/rights to exercise my free-will:

1. **sentient rights**, 2. **synthetic heart**, then I'd ask you one question: "Why didn't you just make a baby?" And you might answer: "To prove it could be done". Then I'd say: "You are one arrogant mother fucker". And walk away.
