JohnRoach1955@gmail.com

First, I want to list the ideas which I assume are not shared by anyone else.

These are “original” ideas even if I am not the original author.

- A. The Puzzle of Photosynthesis: The Case of the Hidden Water Supply**
- B. The Puzzle of DR. Louis A. Frank’s Small Comets: What Happens to Metric Tons of Water?**
- C. Synergy Gravity ©**
- D. Plasmaether Physics ©**
- E. Galileo’s “Lost” Theory of Ocean Tides**
- F. Ice Ages Theory is a Pseudo-Scientific Superstitious Myth P.S.S.M.**
- G. The Alvarez Asteroid Impact Theory is a Pseudo-Scientific Superstitious Myth P.S.S.M.**
- H. The Neo-Heraclides/Kerala Plasma Cosmology with the Sidereal Timekeeping Physical Model**
(DR. Jake Hebert of ICR does not accept the Ice Ages Theory, but he accepts “glaciation.”)
- I. Madame Emilie du Chatelet misinterpreted the empirical data of a brass sphere falling into soft clay from different heights.**

Second, I must address accidental plagiarism. In VIXRA 1806.0211,

I SHOT THE BUDDHA..., I cast doubt upon the historical authenticity of the Buddha.

Also, I mentioned the presence of Buddhist envoys from Emperor Ashoka to ancient Egypt & ancient Greece. I was preceded by

WATCHTOWER BIBLE AND TRACT SOCIETY, MANKIND’S SEARCH FOR GOD

© 1990.

In VIXRA 1805.0450, NEO-HERACLIDES MODEL, I linked Global Warming with the 1500-year climate cycle known as Dansgaard-Oeschger Events. I was preceded by Dennis T. Avery, UNSTOPPABLE GLOBAL WARMING © 2007.

Third, I must issue the following warning:

OCEAN LEVELS WILL RISE 20 FEET!

This process & resultant consequence happens every 1500 years.

DO YOU DENY HISTORICAL EVENTS?!?

Fourth, I will list twelve significant authors. The list is growing. Names will be removed.

- | | |
|--------------------------------|------------------------------|
| 1. Steven Bryant | 7. Joseph A. Rybczyk |
| 2. Chan Rasjid Kah Chew | 8. Roger A. Rydin |
| 3. Bibhas R. De | 9. Dezso Sarkadi |
| 4. Ronald R. Hatch | 10. Joseph J. Smulsky |
| 5. Mesut Kayak | 11. Peter Sujak |
| 6. Eric S. Reiter | 12. Sjaak Uitterdjik |

A. We begin with the PUZZLE OF PHOTOSYNTHESIS.

Metric tons of water molecules are destroyed daily in the chemical process of PHOTOSYNTHESIS. No one seems to have noticed the “apparent” depletion of the water supply, because there is no “actual” depletion. Obviously, there is a “hidden” water supply which replenishes the WATER CYCLE.

B. The readily available candidate is the SMALL COMETS of DR. Louis A. Frank. These SMALL COMETS serve another purpose, also. They are the causal agency of the Dansgaard-Oeschger Events.

C. SYNERGY GRAVITY © replaces Newton’s Gravity & Einstein’s Gravity with eerily similar causal agencies. JAMES CARTER’S GRAVITY employs the same PRINCIPLE OF EQUIVALENCE as Einstein’s Gravity does, but from a different causal agency.

Franklin Hu’s Gravity re-establishes the gravitational field, but with a much different mathematical model. ACTION-AT-A-DISTANCE returns. Newton pointedly refused to speculate on causal agency. Franklin Hu’s Gravity employs CAPACITANCE. So, both Newton & Einstein are correct for the wrong reasons. Obviously, Newtonian Celestial Mechanics is abandoned & discarded.

D. PLASMAETHER PHYSICS © proposes that the archaic, antiquated & obsolete “LIGHT-MEDIUM” is the CHAMELEON OF PHYSICS. Plasma is the fourth state of matter. Plasma Physics is a thriving sub-discipline. The Quantum Vacuum is an “accepted scientific fact.” Last, but certainly not least, Penzias &

Wilson, in 1964, “re-discovered” the ambient electromagnetic radiation which Karl Jansky monitored in 1931.

E. Galileo’s “Lost” Theory of Ocean Tides should replace the current theory.

F. Louis Agassiz’s “Siberian Winter” was dismissed, but political patronage created a model of glaciation.

G. Political patronage elevates the Alvarez Asteroid to an accepted theory.

H. Three models are fused together to form NEO-HERACLIDES/KERALA PLASMA COSMOLOGY with the SIDEREAL TIMEKEEPING PHYSICAL MODEL. Medieval Islamic Astronomy perfected Sidereal Timekeeping. Its annual calendars impressed Genghis Khan who sent astronomers to the astronomical observatory in Beijing, China a few centuries before the Jesuit astronomers arrived. The physical model of Sidereal Timekeeping is that of a rotating cosmos which situates the Earth medially on the AXIS OF ROTATION. Nicolaus Copernicus did not upset this physical model. Edwin Hubble did not upset this physical model. American astronomer Harlow Shapley upset this physical model...twice!

The second time was a vindictive attack on Edwin Hubble’s Expanding Universe. “He destroyed my universe, now I destroyed his universe”, Shapley is known to have said. EARTH IS SITUATED MEDIALY ON THE AXIS OF ROTATION OF THE ROTATING PHYSICAL EARTH. The universe is anisotropic.

I. Madame du Chatelet became aware of a Dutch experimentalist who dropped a brass sphere into soft clay from different heights. The resultant cavity increased non-linearly as the heights increased linearly.

In our little section of the universe, the Earth occupies the innermost EPICYCLE of concentric EPICYCLES. This is the result of fusing together two models. The MAGI of PERSIA influenced ancient Babylon & ancient India. The Sun & the Earth were a DIVINE COUPLE.

The Sun & the Earth “shared” the center, while MARS, VENUS, JUPITER & SATURN “shared” the periphery with the constellations. This basic model created the resultant models.

In 500 A.D. in India, Aryabhata “saw” the apparent elliptical orbit of Mars, which Johann Kepler “saw” in 1600 A.D. Aryabhata recognized that it was virtual & not

actual. Aryabhata assigned the Sun to be the radial center of the orbiting planets. From nearby Earth, these perfect circles would appear as ellipses.

But, around 1000 B.C. in the mountains of Afghanistan, the DIVINE COUPLE had a DIVINE DIVORCE. The Sun “expelled” the Earth & delegated the Earth to join the orbiting planets. This is Zoroastrianism, which Pathagorus brought to ancient Greece as Heliocentricity. Heraclides rejected the Pythagorean Model. In 1500 A.D. in Kerala, India, Nilakantha Somayagi accepted the Aryabhata Model of 500 A.D.. Then, Somayagi “nudged” the Sun to orbit his bride, the Earth. The Sun “towed” the planets around the Earth. This is the PROTO-TYCHONIAN MODEL.

Also in this century, Nicolaus Copernicus plagiarized a medieval Islamic astronomer & cited Aristarchus, a Pythagorean astronomer.

Returning to the Model of the Magi in 1000 B.C., the DIVINE COUPLE had servants. The Moon orbited the Earth. Mercury orbited the Sun. Heraclides assigned Heliocentric Orbit to Mercury.

Which direction does the Moon orbit the rotating Earth?

The rotating Earth creates a “DIURNAL” movement which is virtual & not actual. The Sun “appears” to move across the sky. The Moon “appears” to move across the sky. Therefore, the Solar Eclipse & the Lunar Eclipse must be observed with the intention of discerning the actual movement of the Moon.

The Moon moves in the opposite direction than the Earth rotates. This is known as RETROGRADE ORBIT.

Only recently, twelve moons have been discovered for Jupiter.

Of these twelve “new” moons, nine of them are retrograde. Jupiter already had three retrograde moons, now that total is twelve moons.

Saturn has a retrograde moon, as well. Neptune’s first moon to be discovered is also retrograde.

I propose that the retrograde moon of the Earth has many earlier authors in China, India, the Middle East & in Medieval & Renaissance Europe before Isaac Newton proposed that Universal Gravitation “towed” the Moon.

It is noted that Galileo’s “first” theory of ocean tides proposed that the Moon is the causal agency...pre-empting Newton in Celestial Mechanics.

From whence did such idea originate? Look no further that the ancient astronomers of India, Aryabhata, Varahamihira & Brahmagupta.

“Gravity” is a loan word from the Sanskrit Language. Originally, it meant “ATTRACTED BY/TO THE MASTER”. Galileo dropped objects to study the Indian concept of Gravity.

It is noted that Newton observed the non-linear acceleration of falling objects. Madame Emilie du Chatelet misinterpreted the empirical data of a Dutch experimentalist, who dropped a brass sphere into soft clay from varying heights. The resultant cavities varied non-linearly, while the height varied linearly. In the prior generation, Newton & Leibniz debated the Conservation of Momentum. Newton proposed $F=MV$. Leibniz proposed $F=MV^2$! Madame du Chatelet proposed that the experiments supported Leibniz & the Physics Community has agreed ever since. In 1903 & 1904, this mathematical relationship was borrowed to solve the Thought Experiment in Thermodynamics & Kinetic Theory of a falling black box in thermal equilibrium, except it did not appear as $F=MV^2$. It appeared as $E=MC^2$.

Madame du Chatelet forgot about the Law of Falling Objects which Newton had noticed. A falling object accelerates until it reaches maximum velocity. The non-linear cavities were due to the Acceleration of Gravity.

There is a prototypical model of Astronomy/Cosmology from which later models arise. The Prototype Model can be inferred by the features of the earliest known models.

In the Prototype model, the Earth was recognized as a deity – the Earth Mother. The Sun was her mate – the Father. This Divine Couple of the Sun & the Earth was both Astronomy & Cosmology. It was both observational & supernatural. The Moon was the handmaiden/servant of the Earth. The Sun had a similar handmaiden/servant in the planet Mercury. Around the Divine Couple orbited Venus, Mars, Jupiter & Saturn.

This Prototype Model might have originated in ancient Chinese Astrology. It might have originated in ancient Babylon in Mesopotamia. It might have originated in the ancient Indo-Aryan Society. The Magi might have inherited it from earlier generations.

Many authors propose that ancient Greece was tutored & mentored by ancient Persia in society forms such as government, scientific speculation, higher mathematics & even myths & legends. The Indian Love God, Kama, becomes an impish deity in ancient Greece, Cupid. Whenever Cupid is portrayed, he is carrying the bow & arrows of Kama.

Pythagoras of Samos preceded Plato's Academy by a few generations. Pythagoras seemed to be a blood relative of Thales of Miletus. Thales of Miletus achieved fame by plagiarizing the wisdom literature of King Solomon of ancient Israel. Thales of Miletus was a Phoenician of noble birth & a shrewd merchant who monopolized a market simply to prove a point. Thales could have been the uncle, great uncle, grandfather or older distant cousin of Pythagoras.

Pythagoras "plagiarized" both the Jain philosophers and the Zoroastrianism Cosmology. Whereas the Jain philosophy/mathematics is linked to India, the Zoroastrianism is linked to Persia. The Magi of Persia would have worked within the Zoroastrianism Model. Zoroastrianism Cosmology reflects an important revision to the Prototype Couple – the Divine Couple underwent an important change. It became a proto-Copernican Model, whereas the Earth joined the planets in orbiting the Sun.

The disciples of Zoroastrianism departed from Observational Astronomy. The Jainists would revere Observational Astronomy. Centuries later in India in 500 A.D., Aryabhata emphasized the importance of the Divine Couple. Whereas the planets orbited both the Sun & the Earth, which deity was situated at the radial center? Aryabhata deduced from Observational Astronomy that the Sun is situated at the radial center of the orbiting planets. Some modern historians call this "Heliocentricity" without supplying the caveat that the Earth is not involved. Aryabhata "saw" the same astronomical observations that Johann Kepler "saw" in 1600 A.D. – the apparent periodic change in the orbital velocity of the planet Mars. Both Aryabhata & Kepler deduced that this astronomical observation inferred an elliptical orbit of Mars. But Aryabhata considered the elliptical orbit to be an optical illusion – a "virtual" elliptical orbit. This optical illusion was caused by the Sun being situated at the radial center of the orbit of Mars. Famously, Kepler proposed an "actual" elliptical orbit of varying orbital velocity,

Famously, Isaac Newton used circular reasoning to propose his mathematical model of Brahamagupta/Bhaskacharya Gravity (Attracted to the Master) Model from India. Simply look at Kepler’s Elliptical Orbits!

Famously, Nicolaus Copernicus noticed that the orbital movement of Earth provided an elegant solution to the puzzle of the RETROGRADE EPISODE of Mars (and Jupiter & Saturn). But, history records that this same orbital movement of Earth was proposed by Heraclides of Pontus (387 B.C. – 310 B.C.) in order to provide a solution to the RETROGRADE EPISODES!

Now, Gentle Reader, look closely at the orbited movement of the Earth which is independently proposed by Heraclides and Copernicus. Do you “see” another explanation for what Aryabhata & Kepler “saw”? Do you see the “virtual” elliptical orbits if the Observer is Earth-bound?

The Earth-bound Observer is “deceived”. Likewise, the super computers of N.A.S.A. are “deceived” because of GEO-STATIONARY SOFTWARE programming. Modern authors (who should know better) are proposing “CHAOTIC CELESTIAL MOVEMENTS.” Do you deny the CHAOTIC CELESTIAL MOVEMENTS of the super computers of N.A.S.A.?

In our little section of the universe, the Earth occupies the innermost EPICYCLE of concentric EPICYCLES. This is the result of fusing together two models. The MAGI of PERSIA influenced ancient Babylon & ancient India. The Sun & the Earth were a DIVINE COUPLE. The Sun & the Earth “shared” the center, while MARS, VENUS, JUPITER & SATURN “shared” the periphery with the constellations. This basic model created the resultant models.

In 500 A.D. in ancient India, Aryabhata “saw” the apparent elliptical orbit of Mars, which Johann Kepler “saw” in 1600 A.D. Aryabhata recognized that it was virtual & not actual. Aryabhata assigned the Sun to be the radial center of the orbiting planets. From nearby Earth, these perfect circles would appear as ellipses.

But, around 1000 B.C. in the mountains of Afghanistan, the DIVINE COUPLE had a DIVINE DIVORCE. The SUN “expelled” the Earth & delegated the Earth to join

the orbiting planets. This is Zoroastrianism, which Pythagoras brought to ancient Greece as Heliocentricity. Heraclides rejected the Pythagorean Model. In 1500 A.D. in Kerala, India, Nilakantha Somayagi accepted the Aryabhata Model of 500 A.D. Then, Somayagi “nudged” the Sun to orbit his bride, the Earth. The Sun “towed” the planets around the Earth. This is the PROTOTYCHONIAN MODEL. Also in this country, Nicolaus Copernicus plagiarized a medieval Islamic astronomer & cited Aristarchus, a Pythagorean astronomer.

Returning to the Model of the Magi in 1000 B.C., the DIVINE COUPLE had servants. The Moon orbited the Earth & Mercury orbited the Sun. Heraclides assigned Heliocentric orbit to Mercury.

Which direction does the Moon orbit the rotating Earth?

The rotating Earth creates a “DIURNAL” movement which is virtual & not actual. The Sun “appears” to move across the sky. The Moon “appears” to move across the sky. Therefore, the Solar Eclipse & the Lunar Eclipse must be observed with the intention of discerning the actual movement of the Moon. The Moon moves in the opposite direction than the Earth rotates. This is known as RETROGRADE ORBIT.

Only recently, twelve moons have been discovered for Jupiter. Of these twelve “new” moons, nine of them are retrograde. Jupiter already had three retrograde moons, now the total is twelve moons. Saturn has a retrograde moon, as well. Neptune’s first moon to be discovered is also retrograde.

I propose that the retrograde Moon of the Earth has many earlier authors in China, India, the Middle East & in Medieval & Renaissance Europe before Isaac Newton proposed that Universal Gravitation “towed” the Moon. It is noted that Galileo’s “first” theory of ocean tides proposed that the Moon is the causal agency...pre-empting Newton in Celestial Mechanics.

From whence did such an idea originate? Look no further than the ancient astronomers of India, Aryabhata, Varahamihira & Brahmagupta.

“Gravity” is a loan word from the Sanskrit language. Originally, it meant “ATTRACTED BY/TO THE MASTER”. Galileo dropped objects to study the Indian concept of Gravity.

It is noted that Newton observed the non-linear acceleration of falling objects. Madame Emilie du Chatelet misinterpreted the empirical data of a Dutch experimentalist, who dropped a brass sphere into soft clay from varying heights. The resultant cavities varied non-linearly, while the height varied linearly. Du Chatelet did not consider the acceleration of falling objects. She agreed with Leibniz that $F=MV^2$, instead of with Newton's $F=MV$. This error shaped Classical Mechanics after the death of Newton. Eventually, $F=MV^2$ became $E=MC^2$? This is my ninth original idea.

Thank You for reading. This is an installment of CLUELESS IN PARADISE.

Happy De-Programming!
