Besides and together with a study of the social sciences and philosophy, this author’s intuitive confidence in this hermeneutic design insights that underlies the arguments and discourse, is inspired from ‘an intimate and spontaneous idiosyncratic philosophical exercise (praxis) in the quest for the essence of meaning’, a ‘craft’ that has been nurtured continuously for nearly 25 years now (without conscious planning at the beginning nor at any time thereafter) since his discovery of ‘philosophical questioning and discourse’ at high school. An exercise that mirrors the intimate idiosyncratic exercise/praxis allowing an artist like a musician to grasp and develop memes that latter down the years enable the artist to be more or less ‘consummate with respect to the personal orientation they give to their arts’. Central to all such idiosyncratic processes is a continuous idiosyncratic memetic refinement over time of rough-cuttings, internal coherences, insights, inspirations, intuitive validations, constraining, sense-of-failing, sense-of-succeeding, confidence, mental inflections and mental projections; of course as per ability and ultimate pertinence with respect to intrinsic reality!
Abstract

This paper is rather a profound hermeneutic enunciation putting into question our present understanding of psychopathy. It further articulates, in complement, a novel theoretical and methodological conceptualisation for a hermeneutic psychological science. Methodology-wise, it puts into question a traditional more or less categorical and mechanical approach to the social and behavioural sciences as it strives to introduce a creative and insightful approach for the articulation of ideas. It rather seeks to construe the scientific method as being more about falsifiability and validation but driven by a sense of creative understanding and insight of notions laid out as open-ended conceptualisations. Theory-wise, it sees continuity between anthropology and psychology as anthropopsychology behind an entropic construct of human psychology based on a recurrent re-institutionalisation mechanism for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation.

Introduction

Quite possibly everything about this paper whether the authoring, the approach and the substance sparks of novelty bordering on the outlandish. Further, why not take a traditional categorical approach and clearly present scientific ideas the traditional way? It is a personal insight developed more than 20 years ago, and just when the author began his B.Sc. in Sociology and Anthropology; that a study of the social and behavioural should carry the philosophical and insightful at its very core above anything else given the inherent ephemeral nature of its subject matter. When I came across the term hermeneutics (and others like phenomenology), this author felt as a personal persuasion that that was the chart for the future of the social sciences. My vision in this regard is one of a social science that delves directly into the core of things and avoids platitudes. To come back to the point of this abstract, this explains my apparently tattered approach. But tattered really? No, as the central insight of my articulation is that the scientific method is a validation and falsifiability method, and not necessarily the creative method. The creative method as a hermeneutics isn’t supposed to roll down and stifle its very expressiveness, and at the same time it should be articulated in such a way that an exercise of falsifiability, validation and open-ended questioning can be undertaken over it. Such a
hermeneutic science calls for a mutual sense of such a hermeneutics by both the author and
would-be critic. I hopefully believe the way I have articulated ideas should be able to allow for
such an examination. My hermeneutic inspiration in this regard can be analogised with musical
creation and music theory. The latter is there to ensure the appropriate articulation of rules but
is not really the drive of musical creation, as musical creation is rather the musician’s
hermeneutic/reproductive insight of how to go about creating music while adhering to music
theory, such that any such music is analysable/critiqued by the way it credibly adheres to music
theory, and actually in exceptional cases further develop music theory. A second point that
makes this method ideal is that the apparent enunciation of this paper (an outright call for a
reinvention of the state of the art regarding our understanding of psychopathy and the
underlying psychology science); is that it is doubtful such an articulation can be credibly
presented in simple categorical terms, without rather utilising an entropic hermeneutic-
referential approach based on an open-endedness for falsifiability and validation in future
elaboration and development of ideas. Further, I thought it more critical (wary of platitudinising
the occasion) that the purity of ideas expressed herein shouldn’t be overly clouded particularly
as the treatment of this paper is largely in substance virgin territory, as of the underlying
conceptualisation referential drive (beyond just simplistic rhyming/speculative/interpreted
categories of philosophical theories and concepts but rather as ‘a driven distinct
comprehensively coherent/contiguous operant-level of insights articulation, and carrying
implicative and applicative operant-level possibilities going forward’; more like a song is a
coherent referential whole beyond just naïve categories of disjointing/disparateness/disentailing
percussions-and-tunes-more-or-less-similar-to-those-of-the-song construed as constituting the
song.) As a matter of fact, I would rather I wrote another paper talking about influences for
such an articulation for this paper going by my hermeneutic design insights. Moreover, going
by the very nature of how humans develop new ideas; while many, if not most, of my
arguments may be more or less ‘plainly intelligible’, I equally thought it important to articulate ideas I hold in deep conviction and further as many such ideas come with their requisite precise convoluted qualifications even if such ideas might not be quite intelligible from a plain and simple reading, with the notion that such a requisite insight will be forthcoming in future critique as the very nature of the introduction of new ways of thinking often mean their unintelligibility at first (equally explains my repeating of many terms for ‘habituation’), but then it is not the pertinence of reality that compromises it is the impertinence of human certitudes that does! In the bigger scheme of things, it is herein contended that human social and institutional progress and development is not de-mentatively/structurally/paradigmatically contiguous as to the very inherent nature of any given institutionalised framework as all such frameworks arrive at apathetic threshold as these rather develop into denaturing\(^1\)\:<amplituding/formative>\> wooden-language-{imbued—temporal—mere-form/virtualities/dereification\(^\text{8}\)/akrasiatic-drag/denatured/preconverging-or-dementing\(^\text{8}\)—narratives—of-the- reference-of-thought—categorical-imperatives/axioms/registry-teleology \(\})\> stifling prospective possibilities, thus requiring prospective fundamental reconception. While such prospective re-projection/re-anticipation recognises prior human cumulated knowledge as enabling institutional-cumulation/institutional-recomposition-as-to-\(\) historiality/ontological-eventfulness /ontological-aesthetic-tracing> right up to the present, it also recognises at a certain point the ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’ becomes critically a drawback for the possibility of knowledge-reification of prospective human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint, as dimensionality-of-sublimating —<amplituding/formative>\>supererogatory—de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation behind the

This has developed in our present age of pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation-(blurring/undermining-of-prospective-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness⟩ into the absurdity/ridiculousness of pop-intellectualism substituting for genuine and reifying thought, as to the relentless expansion of our modern merchandising mentality to which nothing resists; and paradoxically, such a disposition hangs onto the ‘dereified as-deficient-reflexivity of our <amplituding/formative> wooden-language-(imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the-reference-of-thought—categorical-imperatives/axioms/registry-teleology ⟩; with media-driven imprimaturing increasingly usurping the role of genuine academic standard production and ultimate validity hanging on the mere imprimatur. As what becomes critical in such a context is no longer prospective knowledge-reification as the primary and essential constraining worth but rather obsession with mere sway and influence even to the point of undermining prospective knowledge-reification as supposed intellection is increasingly infused with obfuscations, falsehoods and subterfuges (as to the fact that misrepresentations and pretences to misunderstand are rather conveniently given as of perceived social-stake-contention-or-confliction and hardly reflecting a discernment about the possibility for advancing human progress) that apparently render human-subpotency/mortality bigger than existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-
of-amplituding/formative-epistemicity-totalising-renewing-realisation/re-perception/re-thought, in-supererogatory-epistemic-conflatedness /immortality. But then human intellection across all ages and times come to an end not because of inherently right or inherently wrong ideas per se (as the very basic genuine striving for intellectual progress is what is critically decisive as that exercise ensures that down-the-line correct and reifying ideas will arise anyway), but critically when deliberate deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity becomes more important than an aspiration for genuine intellection as an open-ended activity providing the possibility for human knowledge and reflexive empowerment from that knowledge. At which point, it is wrong for ‘genuine intellection’ not to recognise what is going on as to imply that it is veridically in dialogical-equivalence with such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity (whether or not, beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>- <including-virtue-as-ontology> habituation and enculturation/endemisation of such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity rendering the supposedly empowering activity of knowledge-reification impotent as in many ways such denatured intellection openly claims as of disparateness-of-conceptualisation-unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’ inclinations that poorly appreciate existence-potency-sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-amplituding/formative-epistemicity-totalising-renewing-realisation/re-perception/re-thought, in-supererogatory-epistemic-conflatedness implications of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. In many ways this intellectual falsehood (so-construed by this author as to the implausibility of genuine lack of understanding as from a serious intellectual engagement but rather a ‘strategic/calculated
behaviour of mere power even against genuine knowledge’ which this author intimately construes as a ‘decadent and dangerous conception of knowledge’ that is effectively destructive of prospective human knowledge reifying and empowering possibilities) is at the ‘root source’ for surreptitiously ensuring that the public debate fails and thus leading to public policy defaulting into vested postures and interests especially so when such an intellectual teleological-decadence—in-dimensionality-of-desublimating-lack-of⁶—
mentative/structural/paradigmatic consequences associated with institutional failures (which such intellectualism is hardly inclined to address). Critically, such a ‘self-contented intellectualism’ increasingly focuses not on knowledge-reification as to existence-potency~sublimating~nascence~disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising~renewing-realisation/re-perception/re-thought, in supererogatory~epistemic-conflatedness or the critical analysis of such knowledge-reification but in the face of criticism rather consciously substitutes strategies of institutional ascendency as of a strategy of influence by default imprimatur status rather than genuine knowledge-reification pertinence. It will be as naïve as implying the validity of a common basis for doing arithmetic where an interlocutor insists on 2+2 as 5 but when appropriately explained the veridical assumptions of arithmetic goes on to insist 3+3 as 7, speaking not of a fundamental problem of arithmetic operation as of dialogical-equivalence but a fundamental question of ontological-bad-faith/inauthenticity on the naïve mental reflex that anyway dialogical-equivalence is ever always assumed to then adopt an apriorising/axiomatising/referencing attitude of abusing the notion of dialogical-equivalence as to wrongly implied logical-dueness. Faced with such an orientation the genuine intellectual reaction is to engage it upfront as of an inclination ‘not just to evaluate logical coherence as of correctness or incorrectness or any other evaluation in-between on the basis of ontological-good-faith/authenticity’, but beforehand ‘to equally evaluate the apriorising/axiomatising/referencing in ontological-good-faith/authenticity or ontological-bad-faith/inauthenticity (beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>) as of underlying existential-contextualising-contiguity elucidation/deblurring as well as whether the veracity of such apriorising/axiomatising/referencing can be established as being of ‘relative-ontological-incompleteness’/relative-ontological-completeness -

We can appreciate that while many a subject-matter will often seem to imply that dialogical-equivalence is just assumed ‘as to the fact of merely engaging as of logical coherence without questioning the underlying ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality in ontological-good-faith/authenticity or ontological-bad-faith/inauthenticity’, the fact is this is rather the consequence of their universal-transparency–(transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative–epistemicity>totalising—in-relative-ontological-completeness) of the-Good/understanding/knowledge-reification /ontological-primemovers-totalitative-framework rendering the possibility of ontological-bad-faith/inauthenticity directly ridiculous as in the natural sciences given its direct universal-transparency–(transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative–epistemicity>totalising—in-relative-ontological-completeness) subjection to prediction, such that we can hardly contemplate of an interlocutor insisting to imply that gravity on earth is 7 m/s² to ensure that calculations conform
to its expectations for one interest or another; but the reality of that universal-transparency-(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>-totalising--in-relative-ontological-completeness) as preempts such ontological-bad-faith/inauthenticity inclinations is not so directly obvious in many a social domain-of-study and that blurred possibility effectively elicits circumstances of disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’> not only as of wrong ontological-conception out of good-intent (failing ‘technical ontological-good-faith/authenticity’ as of its ontological-normalcy/postconvergence epistemic-projection perspective conceptualisation) but equally as of outright ontological-bad-faith/inauthenticity (in spirit). This idea is essential in the thought of many such postmodern thinkers as Derrida and Foucault given the implications of human limited-mentation-capacity as herein construed as reflecting human constructiveness-of-ontological-performance-<including-virtue-as-ontology> and destructuring-threshold-{uninstitutionalised-threshold/presublimating–desublimating–decisionality–of-ontological-performance−<including-virtue-as-ontology>. The fact is knowledge-reification is of ‘existential <amplituding/formative–epistemicity>-totalising/circumscribing/delineating construal for human limited-mentation-capacity-deepening’ and nothing can be construed in totalisingly-disentailing—discretion/whim-of-thought whether as of ignoring or on the other hand exaggerating, and just as we can fathom that we don’t have the choice to fiddle with even a single number or operation without a mathematical equation going wrong as of its existence-potency–sublimating–nascence, disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>-totalising–renewing–realisation/re-perception/re-thought, in supererogatory–epistemic-conflicatedness over our human-subpotency motives, the same actually do apply in all knowledge-reification and claims of subject-matter specificities (wrongly implying their subontological nature) ‘rather speak of the difficulty with respect to
<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought–in-supererogatory–epistemic-conflatedness dissimilarity of subject-matters. Just as there is no magical arithmetic or physics to resolve such a more fundamental apriorising/axiomatising/referencing situation involving ‘abusing the assuming of dialogical-equivalence’, it is wrong and foolhardy not to bluntly recognise this reality in the social domain as to the possibility of then achieving prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as to existence-potency–sublimating–nascence–disclosed-from-prospective-epistemic-digression-as-of-

However, the universal-transparency—(transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative— epistemicity>totalising—relative-ontological-completeness) generated in domains like mathematics and many a natural sciences is so efficient (as of the underlying positivism/rational-empiricism—reference-of-thought achieved—universal-transparency—(transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative— epistemicity>totalising—relative-ontological-completeness) as of positivising/rational- empiricism-based-universalisation-directed-rulemaking-over-non-rules—apriorising/axiomatising/referencing—psychologism so-reflected as our present positivism/rational-empiricism apriorising/axiomatising/referencing—psychologism’ first induced by budding-positivists like Copernicus, Galileo, Descartes, Newton, Leibniz, etc.) that
in many ways mathematicians ‘don’t go on to be thinking about the soundness of axioms once these are construed as of existence’ for instance with the axioms-of-addition, but this doesn’t mean that the idea of unsoundness of ‘a priori or axiomatic conception’ (as to invalidate dialogical-equivalence) doesn’t exist especially so when it comes to blurred domains not only in the social sciences but sometimes in the natural sciences as well where lack of universal-transparency-(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness ) arises such that there is nothing that transparently renders someone ridiculous from fiddling around ‘wrongly implying apriorising/axiomatising/referencing meaningfulness-and-teleology as of existence’ not only out of good-intent or ontological-good-faith/authenticity but ontological-bad-faith/inauthenticity as well. (In this regards, the idea of ‘putting in question dialogical-equivalence by not merely engaging for logical coherence but equally putting into question the apriorising/axiomatising/referencing meaningfulness-and-teleology pretense of being as of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation is effectively central to all prospective institutionalisations in relative-ontological-completeness as reflected with the Socratic philosophers putting in question the apriorising/axiomatising/referencing of non-universalising sophists specifically with Socrates during his trial as to his highlighting of the inconsistencies of his accusers sophistic non-universalising apriorising arguments priorly for the notion of a mutual logical coherent engagement to arise in the very first place with Socrates rather purporting that such a possibility of mutual logical coherent engagement could only arise on the basis of his universalising apriorising arguments as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation and budding-positivists equally putting into question the apriorising/axiomatising/referencing of non-positivising/non-rational-empiricists medieval-scholasticism pedants specifically as with Galileo’s implicit dismissal of any such pretence of logical coherence engagement in the face of what he could
see positively through the telescope with respect to the ‘imaginary pedantic machinations’ of his interlocutors and so as to the prospective positivism/rational-empiricism apriorising/axiomatising/referencing as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation; as in fact the very notion of prospective institutionalisation is one of renewing & reference-of-thought–and– reference-of-thought– devolving– meaningfulness-and-teleology apriorising/axiomatising/referencing prospectively as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation, putting into question the wooden-language-{imbued—temporal–mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing— narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology } of the prior registry-worldview’s/dimension’s presencing—absolutising-identitive-constitutedness superseded/transcended). from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflatedness over human-subpotency, notwithstanding the fact that we are at the backend of human institutional-cumulation/institutional-recomposure-<as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing>, and so because in many ways it is hardly the case that the priority is obsession with such intellectual emancipation rather than obsession with institutional-being-and-craft muddlement. While the natural sciences are ‘naturally’ constrained by the stronger necessity for prediction, there is nothing that says because the social domain is relatively blurred the possibility for such rigour cannot be achieved in the social as well even as it is highly subject to social-stake-contention-or-confliction meddling; as the possibility of the undercutting of the latter’s<amplituding/formative–wooden-language-(imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing—narratives—of-the-reference-of-thought–categorical-imperatives/axioms/registry-teleology with asceticism) does exist as has existed throughout sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing. Beyond the seemingly intellectual ebullience ever so portrayed today, the question can be asked to which extent it usually reflect deep curiosity for prospective knowledge-reification rather than a culture of pop-intellectualism today that seem to define our human-subpotency/mortality purposes as superseding existence-potency–sublimating–nascence–disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflatedness/immortality purposes, as so-reflected in the supposed intellection values conferred in many a press operation with such vague catchphrases as ‘the-greatest/most-influential thinker of our times’ as of mere influence peddling and poorly advancing the inherent importance of prospective knowledge-reification
as addressing the human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of our prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation, notwithstanding the sometimes crude and unsavoury social discomfort implications in this respect. Thus in many ways such an orientation is unsettling to upcoming/future young thinkers as to what can be of profound intellection value with respect to opting for a profound intellectual commitment for prospective knowledge-reification rather than just strategies of socially perceived intellectual success within deified temporal/mortal existential frameworks; especially in the underhanded institutional presence of such avowedly teleologically-decadent—as-in-dimensionality-of-desublimating-lack-of—<amplituding/formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation mantras like theories die with the passing of their authors as so-implied with regards to many a postmodern scholar, wherein such highbrow has been surreptitiously inclined to put-up their temporalities/mortalities (notwithstanding that knowledge is as to existence-potency–sublimating–nascence, disclosed-from-prospective-epistemic-digression-as-of—<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag consequences accruing to the entire humankind) to institutionally and socially undermine prospective knowledge-reification with stooges/foils muddying the ontological-veracity of genuine thought as of its true human emancipatory implications, as they ‘sneak-in and sneak-out about knowing and not knowing’ in a distorted conception of intellectualism as a Machiavellian/political exercise rather than the requisite magnanimity of engagement for a genuine knowledge-reification exercise! Actually the projection of values including intellectual values in such <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag
are often prospectively deficient, given the fact that notions of value are only as pertinent as of their transvaluation implications in relative-ontological-completeness since the very same conception of value when construed on the basis of relative-ontological-incompleteness may actually be associated with vices-and-impediments, and so beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought> (given that virtue is rather as of the-Good/understanding/knowledge-reification/ontological-primemovers-totalitative-framework conceptualisation as to transcendental-enabling/sublimating/supererogatory-de-mentativity and not the vagueness of impression-driven/good-naturedness/wishfulness <amplitudes/formative> wooden-language-(imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing —narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology ) in human-subpotency social-aggregation-enabling).

We can grasp in this respect that the value conception as from the non-universalising sophistry perspective had construed as decadent the prospective Socratic philosophers universalising-idealisation just as did medieval-pedantic dogmatism of budding-positivists like Galileo and Descartes; as in many ways prospective knowledge-reification requires that we supersede our emotional-involvement starting with the very intellection striving for such prospective knowledge-reification. (In any case, ultimately the reality of human knowledge-reification involves 'direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness' 'meaningfulness-and-teleology', and so in transvaluation; as for instance, it can hardly be imagined that the reference-of-thought of the non-positivism/medievalism mindset as of its de-mentative/structural/paradigmatic ontologisation/ontological-veracity/aestheticisation-towards-ontology is apt as of its supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness—of-
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument\(^1\) to grasp our modern day conception of say physics given its ‘valuation framework as of its <amplituding/formative–epistemicity> totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^2\)” that needs to be transvaluated into a positivism mindset, and it can fairly be contended that prospective issues of knowledge-reification\(^3\) in modern day physics having to do with theory-of-everything conception arise because of our inappropriately apt supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as of an occlusive-consciousness \(^4\) reference-of-thought requiring prospective notional–deprocrypticism \(^5\) reference-of-thought de-mentative/structural/paradigmatic ontologisation/ontological-veracity/aestheticisation-towards-ontology as of a protensive-consciousness (out of a full insight about causality as from the epistemic ‘relative-ontological-completeness’ \(^7\) <amplituding/formative–epistemicity> causality–as-to-projective-totalitative–implications,–for-explicating-ontological-contiguity\(^8\) in conflatedness \(^9\) herein implied as ontological-prime-movers-totalitative-framework\(^1\) involving a ‘direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness’ meaningfulness-and-teleology\(^1\)’ as implied prospectively in ‘construing of both the right apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument mindset-as-of-prospective-deprocrypticism-dissemination\(^1\) and thus the knowledge for that right mindset-as-of-prospective-deprocrypticism-dissemination\(^1\)’), and we can better understand as such why underlying confliction arises with all registry-worldviews/dimensions transcendence-and-sublimity/sublimation/supererogatory–de-mentativity because these involve human-subpotency–aporia/undecidability/dilemma/ought-

soundness-or-ontological-good-faith/authenticity-of-reference-of-thought-of-meaningfulness is not given, as it is a devising mechanism (mental-devising-representation) for ontological-veridicality as dialectically upheld for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (ontological-normalcy/postconvergence)

registry-worldviews/dimensions are rather prospectively wooden-language—(imbued—temporal—mere-form/virtualities/dereification/akrasiac-drag/denatured/preconverging-or-dementing—narratives—of-the-reference-of-thought—categorical-imperatives/axioms/registry-teleology) of their own specific evolving successive existentialisms

a psychological science which is more comprehensive, timeless and unbounded by its conceptualisation as it emphasises psychological-representation/mental-devising-representation as more ‘ontologically-driven/ontologised’ rather than ‘conventioningly-driven/conventionalised’

deconstruction when extended from its ‘textual basis’ to its ‘full meaningfulness basis’ as ‘ontological-reconstituting–as-to-conflatedness’, has to do with the fact that the full implications of ‘ontological-reconstituting–as-to-conflatedness’/deconstruction is that it prospectively calls for suprastructuring or construal beyond-the-consciousness-awareness-teleology–in-existential-extrication-as-of-existential-unthought of prior registry-worldview mindset/reference-of-thought

what is ‘ontologically normal’ beyond the subjective convenioning of the psychology science (before even worrying about the abnormal)?

notional~deprocrypticism institutionalisation will imply a superseding psychoanalytic-unshackling/memetic-reordering/institutional-recomposing as new-mentation and further extension of formalisation as ‘deferential-formalisation-transference’ of ‘deprocryptic formalisation’ into the extended-informality–(susceptible-to-effecting parsimony-as-of-shoddiness-and-incompleteness-to–meaningfulness-and-teleology)

intemporal/ontological/social/species/universal/transcendental/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation de-mentating/structuring/paradigming resolution as against an extricatory/temporal/non-ontological de-mentating/structuring/paradigming resolution fundamentally implies putting into question a registry-worldview’s/dimension’s reference-of-thought

reality is as of ontological-normalcy/postconvergence and suprastructural and is not constraint to and have nothing to do inherently with human mental-devising-representation incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and notional~disjointedness

knowledge-notionalisation is about ‘a deterministic and operant construct preserving intemporality/longness as ontology’

fundamental construal about the conceptual-and-institutionalisation-phenomena has to do with how any and all conceptualisations and meaningfulness harken back to ‘intemporal-preservation-entropy-or-contiguity–or–ontological-preservation’

preconverging-or-dementing–apriorising-psychologism as thus implied can be defined as reflecting/perspectivating/highlighting of the deficient mental-devising-representation (as so-referenced from ontological-normalcy/postconvergence so-construed as in prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or-ontological-preservation as to suprastructural proxying of intrinsic-reality), beyond the deficient mental-devising-representation intradimensional representation of meaningfulness-and-teleology

to conjugate/inflect/protract intemporality/longness out of demonstrated temporality/shortness (notional-discontiguity/epistemic-discontiguity—shallow-supererogation-of-mentally-aestheticised–preconverging/dementing–qualia-schema>) as then one is just in <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and wrongly implying the registry-worldview/dimension is beyond transcendence-and-sublimity/sublimation/supererogatory–dementativity or is non-transcendable

we don’t have absolute mentation capacity and the most intemporal of our dispositions should take pride of place in defining our achievement motives whether as philosophies, causes, skillsets and talents in our value and valor aspirations

transcendental institutionalisation is basically an ‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting points out that conventioning constructs like sub-par/formulaic-association/temporal/alibi conventioning-rationalising do not supersede the ontological-normalcy/postconvergence and suprastructural nature of intrinsic-reality/intrinsic-veridicality, as may be naively advanced with circumventing/distractive-temporal-prioritisation-of-reference-of-thought

articulating a ‘creative existentialism (full-existential-depth-implications) storying construal’ which is ‘profoundly ontological’, with psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring possibilities for transcendental institutionalisation/intemporalisation of deprocrypticism

ontological-normalcy/postconvergence in precedingness points out that at registry-worldview/dimension-level ontology as the transcending dimension is veridically an utter organicism (organic-comprehension-thinking)

Entropy as defined (‘intemporal-preservation-entropy-or-contiguity–or–ontological-preservation re-institutionalisation’) relates that the intemporal-preservation-institutionalisation entropy is the preceding-and-defining reference for the hermeneutic-referencing of the ontological meaning of all other associated conceptualisations and notions

‘referentialism’ which makes reference to the supersedingness/precedingness of the ‘intemporal preservation institutionalisation/intemporalisation entropy/contiguity’ before articulating concepts and notions in referential and organic elucidation of the entropic construct. Referentialism as such is actually central to the spontaneity required in hermeneutics

virtue (knowledge is virtue) is treated scientifically as highlighted above is that virtue is a ‘the-Good/understanding/knowledge construct’ and not a ‘good-natured/impression construct’

each registry-worldview/dimension is only capable of the virtue reflected by its intemporal-preservation-entropy-or-contiguity–or–ontological-preservation

it is de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) that enables the mental-reflecting/perspectivating/highlighting (reasoning-through-and-not-reasoning-with)-representation of the registry-worldview’s/dimension’s-uninstitutionalised-threshold–defect<as-Being-or-ontological-or-existential–defect> as perversion-of-reference-of-thought<as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation> in construing unsoundness-or-ontological-bad-faith/inauthenticity-of-reference-of-thought

Reality being blunt/incisive as it is rather preceding/superseding and ontological-normalcy/postconvergence with respect to us, is in essence of potent operant and deterministic phenomenalit that doesn’t have any place for our thresholding discrete incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation notions

Institutionalisation and formalisation are based exactly on the fact that we don’t have a universal intemporality/longness or the-good disposition, but rather according to the mediocrity principle of science we are solipsistically temporal-to-intemporal in our mental-disposition with respect to ‘socially-perceived-value as of social-stake-contention-or-confliction’ ...........................................2688

knowledge is not constructed as a ‘human mutual agreement exercise for its construal/conceptualisation/discovery/invention/development’ since solipsistically/emanantly/becomingly we are of temporal/shortness to intemporal/longness mental-

with human limited-mentation-capacity-deepening as to aestheticisation—and—aestheticisation-towards-ontology speaking to an emphasis on both its ‘generativity potential’ and its ‘ontological-performance’-<including-virtue-as-ontology> potential’ (as reflected in issues of human meaningfulness-and-teleology induced presencing—absolutising-identitive-constitutedness ) requiring appropriate human dispensing-with-immediacy-for-relative-ontological-completeness-by-reification /contemplative-distension to ever always preserve human meaningfulness-and-teleology cross-fertilising ‘generativity potential’ and ‘ontological-performance’-<including-virtue-as-ontology> potential’ as institutionally reflected respectively with the artistic, the philosophical and the scientific/ontological orientations of human meaningfulness-and-teleology, and in this respect ‘the philosophical as spanning aestheticisation (generativity potential) and aestheticisation-towards-ontology (ontological-performance’-<including-virtue-as-ontology> potential) of human meaningfulness-and-teleology’ speaks to the epistemic successes and failures as to human ontological-performance’-<including-virtue-as-ontology> leading up to science/ontology as aestheticisation-towards-ontology (ontological-performance’-<including-virtue-as-ontology> potential) and science (including the aspiration of the social sciences) is thus but the exactifying/precisioning–of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> of the philosophical
from which it emerges as of natural philosophy (and humanness philosophy as of human-subpotency construal with respect to aspiring social sciences) and is ever always implicitly anchored to the philosophical in the face of its prospective aporeticism-overcoming/unovercoming while the philosophical as well must necessarily be concerned about its ultimate ontological-veracity relevance to avoid degenerating into a pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation in \textit{incrementalism-in-relative-ontological-incompleteness}—enframed-conceptualisation (as we can appreciate that both ancient-sophists and medieval-scholastics could be notionally/epistemically be considered as involved in philosophy however ontologically-flawed we may now think of their given closed mindsets very much as pseudoscience is decried by serious scientists as it is only such ontological-veracity by its perpetual epistemic-totalising~resubjecting to the validation/invalidation of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation that can establish the \textit{historiality/ontological-eventfulness}/ontological-aesthetic-tracing of philosophical knowledge to avoid its degeneracy into a poor and relic/artifactual knowledge-reification pedantic gesturing of mere aestheticisation hardly appreciative of the cogency of \textit{relative-ontological-incompleteness}/\textit{relative-ontological-completeness} (sublimating~referencing/registering/decisioning,–as-self-becoming/self-conflatedness}/formative–supererogating<projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-
utterly shut down alternate human aestheticising possibilities (as more radically manifested today with many a science-ideology approach) even as such alternate human aestheticising possibilities ‘inducible exactifying/precisioning-of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> elucidations’ may be required for science’s very own further development in its prospective aporeticism-overcoming/unovercoming (as increasingly appreciated with a postmodern influence on science) and so given that human thought at any given moment as of its aestheticisation–and–aestheticisation-towards-ontology is not absolutely determinative/certain as so-reflected by the enframed–unenframed or enframed-overflowing or re-originary–as-unenframed/unbeholdening/outlier-conceptualisation-(imbued-postconverging/dialectical-thinking’–’projective-insights’/’epistemic-projection-in-conflatedness’–’of-notional–deprocrypticism-prospective-sublimation)’ veracity that truly underlies all human ‘meaningfulness-and-teleology’ thus enabling the prospective possibility for human emancipation and progress (as even the sciences while ultimately aspiring for exactifying/precisioning–of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> scientific accounts, will implicitly adopt practices of inexactitude/tolerances as to the more critical issue of their prospective aporeticism-overcoming/unovercoming wherein for instance it is mostly in the last 30-or-so years that astronomy has arrived at a highly cogent scientific account of astronomical phenomena, in the medical domain because of the critical nature of any
developments to human health and preservation of life even the most flimsy statistics are often portrayed as of relevance however the possibility for pseudo-analysis or later retraction, and generally in this respect science at its ‘breakthrough-level of scientific accounts’ is rather of relatively high inexactitude/tolerances as nascent scientific conceptions even within say the physics domain are contested, with the critical notion of science-in-practice rather being about ultimate aspiration to continually converge towards more and more exactifying/precisioning-of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> scientific accounts); but then human limited-mentation-capacity-deepening as to aestheticisation—and—aestheticisation-towards-ontology necessarily priorly conforms to existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation^-<as-to-perspective-ontological-normalcy/postconvergence-implied-'prospective-aporeticism-overcoming/unovercoming'> (and so over any human-subpotency institutionalising conceptions like philosophy and science), and in the bigger picture in this regards the institutionalised conception of philosophy for instance is a distorted Western metaphysics-of-presence-(implicated-'nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive-constitutedness') notion of the more universal concept of overall human knowledge (pure and simple), with the flaw that speaking of say non-Western philosophy is a misnomer so-construed as ‘a distorted and undue epistemic intercession of supposed Western
philosophy as a reference point of conception into any non-Western society aestheticisation— and— aestheticisation-towards-ontology notion of overall human knowledge’ (as to any such non-Western social dynamics very own originariness-parrhesia, — as— spontaneity-of-aestheticisation inducing of prior reproducibility— mathesis/motif/thrownness-disposition, — as— reproducibility-of-aestheticisation as outcome/outfit/shell— construed-historically-as-of-the specifically-aestheticised-incrusting/plating/coating-as-institutionalmanifestation) and furthermore such a misnomer as to its metaphysics-of-presence— (implicated-‘nondescript/ignorable—void ‘-as-to— presencing— absolutising-identitive-constitutedness) seem to supersede the more fundamental notion of human underlying ontological-commitment (as instigatively driving the human out of animality) as to the more pivotal/critical human-subpotency ‘fatedness-of-sublimation-over-desublimation, to existence-potency— sublimating—nascence, -disclosed— from-prospective—epistemic—digression— as-of— & |t amplituding—formative— epistemicity> totalising—renewing—realisation/re-perception/re-thought, - in-supererogatory—epistemic—conflatedness (as reflecting holographically—<conjugatively-and-transfusively> the ontological—contiguity— of—the-human—institutionalisation-process beyond any identitive conception as Western or non-Western or even differentiation internal to any such Western conception or non-Western conception), thus overlooking the dynamic underlying human constructive and cultural diffusionary process critically leading to various social setups dynamics of

methods/methodologies/approaches were developed by philosophers involved in natural philosophy knowledge-reification—gesturing firstly as thought experiments and thereafter articulating effective practical methodologies not because they gave up on natural philosophy but because their normal living experience cognition they used was no longer sufficient for a more profound and creative insight into abstruse phenomenality and so they expanded upon their normal living experience cognition associated with thought experiments to ‘exactifying/precisioning-of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> framework of controlled experiences involving control methods’ as extension of their normal living experience cognition into the existentially atypical manifestation of natural phenomena and this is the very true meaning of scientific approaches and methods as not breaking away from philosophising but rather extension of philosophising into methodologically framed and controlled experiences known as experiments (with the naïve perspectiveless/soulless adoption of methods/methodologies/approaches in many a domain-of-study today by the mere token that this is the practice in the natural sciences losing sight of the underlying and relevant philosophising of such methods/methodologies/approaches as to profound and creative supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibility/setup/measuringinstrument—for–conceptualisation required for the relevant domain-of-study as to reflecting its given epistemic-conception

regards we can appreciate how the very implications of say universal
human rights supererogatorily becomes more and more profound as from
say the Socratic philosophers (even as slavery, class-seclusion and
female-seclusion was prevalent as to warped collateralisation), budding-
positivists (even as in many ways the practices of serfdom/slavery, social-
class discrimination and female-discrimination were equally prevalent as
to preclusive collateralisation) and today’s supposedly universal
conception of human rights (even as it is marked by occlusive
collateralisation of other peoples, cultures and nations as well as gender
and age occlusive collateralising biases); actually the specific sense and
general sense are thus linked on the basis that both imply totalising-
entailing with the specific sense speaking of totalising-entailing as to the
specific universalisation registry-worldview/dimension ‘when mankind
initially consciously cognised that the profoundness of ‘meaningfulness-
and-teleology’ should be totalising-entailing but without necessarily
differentiating such a conception of totalising-entailing between
mythological and positivistic/rational-empirist totalising-entailing with
both construed as universal ‘meaningfulness-and-teleology’, while the
general sense of universal implicitly captures and exactifies/precises the conception of totalising-entailing in terms of ‘entailing-<amplituding/formative–epistemicity>totalising—in-relative-ontological-completeness’ as reflecting the implication of human limited-mentation-capacity-deepening as to the ‘notionalisation/notional-conception/amplituding of totalising-entailing so-reflected by the ontological-contiguity—of-the-human-institutionalisation-process’

(along the same lines as notional–deprocrypticism) thus amplificatorily rendering the conception of totalising-entailing (as to notionally–universal) as more ‘profoundly construed as from perspective relative-ontological-completeness as of the ontological-normalcy/postconvergence of existence/intrinsic-reality’ so-underlied by perspective ‘nondisjointing totalising-entailing’ or deprocrypticism

There is a common word that already exists that best describes what a psychopath is philosophically-speaking. It is a French word that doesn't exactly exist in English. The word is ‘cinglé’ and is better translated in English as ‘slanted mind’ (in contrast to the straightness/candor/organic-comprehension-thinking of a ‘conviction-as-to-profound-supererogation’ ly predisposed human mind’ as of prelogism or prelogism -as-of-conviction,-as-to-profound-supererogation -{existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at) so-construed as candidity/candour-capacity. It should equally be noted that sometimes the word cinglé is used intermittently with deranged (dérangé) which is a more general word that does not capture the socially-functional-and-accordant phenomenal specificity that is of relevance herein. In other words, ‘the cinglé’ perceives meaning as ‘a hollow mimicking form in-of-itself that determines others behaviour’ in contrast to the normal–as-of-candidity/candour-capacity human relation to meaning as of essence or supplanting–conviction-as-to-profound-supererogation”—postconverging/dialectical-thinking”—apriorising-psychologism or prelogism ‘ we abide by (and so, even in the case of ‘poor or bad supplanting–conviction-as-to-profound-supererogation”—postconverging/dialectical-thinking”—apriorising-psychologism’ or bad prelogism ‘ where the bad logic of the prelogism -as-of-conviction,-as-to-profound-supererogation mind operates by an ad-hoc and circumspect exaggeration or omission). In other words, the psychopath manifests postlogism or postlogism -as-of-compulsing–nonconviction/madeupness/bottomlining-as-to-threshold-of-shallow-supererogation”-{perverted-outcome-sought-precedes-existentially-veridical-logical-dueness) by its reference-of-thought- devolving-as-of-instantiative-context— meaningfulness-and-teleology” construed as ‘how can a perverted sought after outcome be obtained with an interlocutor or interlocutors with respect to a targeted end-goal or targeted individual by falsely projecting hollow-abstract logic notwithstanding that it is existentially unreal or it is faked or it is opportunistically raised or raised out-of-context (existential-decontextualised-transposition)’,
i.e. meaning-as-form or pathologically/compulsively hollow-constituting-as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation>, contrasted to the normal prelogism-as-of-conviction,-as-to-profound-supererogation minds prelogic state (‘existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at’ construed as ‘what does the veridical logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation of a given existential situation intrinsically imply as relevant and sound outcome’, i.e. meaning-as-ontologically-veridical/in-conviction-as-to-profound-supererogation, whether thereafter the logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation is rightly or wrongly assumed). Hence prelogism or prelogism-as-of-conviction,-as-to-profound-supererogation is all about the appropriateness of logic without any implication/questioning about any issue with the reference-of-thought on which logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation is based, and thus the idea of re-engaging is valid on the basis that the logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation can be well performed subsequently despite an initial failure or possible initial failures. Whereas with postlogism or postlogism-as-of- compelling–nonconviction/madeupness/bottomlining-as-to-threshold-of-shallow-supererogation this essentially has to do not with an issue of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation but rather an issue of perversion-of-reference-of-thought-as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation, as logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation is on the basis of a sound reference-of-thought (non–perversion-of-reference-of-thought) such that fundamentally ‘the notion of the dueness for logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation’
supererogation' is ontologically jeopardised by the inherent ≈\textit{perversion-of-reference-of-thought-as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation} as 'first-order perversion, out of existential-contextualising-contiguity 's-reifying/elucidating-of-prospective-relative-ontological-completeness\textsuperscript{97-of-reference-of-thought-devolving-as-of-instantiative-context', of apriorising\textit{-reference-of-thought-elements/apriorising-registry-elements which are denaturing\textsuperscript{11} of implied—logical-dueness-orscape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology\textsuperscript{10}. Further to this is the derived second-order level deception as of wrongly implied \textit{logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation} thereof, as of infinite deception possibilities from this faulty-mentation-procedure-deception-or-urge arising where the implied first-order \textit{perversion-of-reference-of-thought-as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation} is wrongly acquiesced to as appropriateness-of-reference-of-thought-as-of-conflatedness thus wrongly implying that logical-dueness arises for logical engagement with interlocutors; and so in contrast to the infinite possibilities of sound \textit{logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation} from non-\textit{perversion-of-reference-of-thought. Hence postlogism\textsuperscript{17} is actually a usurpation/arrogation of the prelogism\textsuperscript{-as-of-conviction,-as-to-profound-supererogation} mentation reflex where social \textit{universal-transparency-(transparency-of-totalising-entailing,-as-to-entailing-amplituding/formative—epistemicity>totalising—relative-ontological-completeness) of apriorising\textit{-reference-of-thought-elements/apriorising-registry-elements is not-available/obscured as of lack of insight on existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness of-reference-of-thought-devolving-as-of-instantiative-context; with the result that with respect to the reference-of-thought, postlogism\textsuperscript{7} 'induces as of ontological-
normalcy/postconvergence epistemic/notional-projective-perspective, a teleologically-degraded-as-preconverging-or-dementing \textsuperscript{19}–apriorising-psychologism differentiation of existential meaningfulness-and-teleology \textsuperscript{99} unlike prelogism \textsuperscript{78} which ‘induces as of ontological-normalcy/postconvergence perspective, an elevated-as-sound-thinking differentiation of existential meaningfulness-and-teleology’. The postlogic disposition is associated pathologically with the psychopathic character as a faulty-mentation-procedure-deception-or-urge \textsuperscript{1} with respect to perceived social-stake-contention-or-confliction but can equally extend ad-hocly or more profoundly as a manifestation of conjugated-postlogism /preconverging-or-dementing -integration (due to psychopathic/postlogism \textsuperscript{77} induced social loss-of-awareness of the social universal-transparency \textsuperscript{104}-(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness)) where it elicits temporal-dispositions of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation in situations of social-stake-contention-or-confliction.

Further, the dynamics of such a graduated human consciousness as of notional—deprocrypticism can be reinterpreted operantly as of ‘notional—referentialism’ as it points to the fact that categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating, as-of—their-respective-specific-constitutedness mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments are
actually ‘various levels of failing to achieve the notional-deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness’
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument that ensure ontological-completeness-of-reference-of-thought’, and thus are construed as of the same notion of referentialism, as of ‘pseudo-referentialism mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments levels’ given their respectively underlying limited-mentation-capacity in achieving referentialism. While in reality these are respectively of ‘categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments’ they still act as if of ‘notional-deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness’
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’, and so ‘in their beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of-existential-unthought> preconverging-or-dementing —apriorising-psychologism’ thus generating as of their ‘pseudo-referentialism mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments levels’ their respective ‘neuterising construed as of ‘their prior relative-ontological-incompleteness—of-reference-of-thought of ‘meaningfulness-and-teleology’’. ‘Neuterising thus refers to human attribution of ‘meaningfulness-and-teleology’ as of human limited-mentation-capacity misconstruing, with respect to existential social-stake-contention-or-confliction possibilities, such that its ‘reference-of-thought/dementative/structural/paradigmatic—ontological-performance—<including-virtue-as-ontology> is relatively ontologically-incomplete/of-ontologically-compromised-mediating,-as-of-its-
specific-constitutedness, and so construed from the conflatedness of notional–deprocrypticism; thus neuterising is specifically ‘a contextually developed perversion-or-derived-perversion-of-reference-of-thought-as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation’, that is secondnatured as of its prior relative-ontological-incompleteness-of-reference-of-thought with the consequent implications of relatively defective meaningfulness-and-teleology ontological-performance-including-virtue-as-ontology. For instance, as of their relative-ontological-incompleteness-of-reference-of-thought, an animist society might notice that going to a given forest leads to illness and ascribe evil to that forest but then a prospective relative-ontological-completeness-of-reference-of-thought positivism interpretation may be that at a certain time of the day and during a certain time of the year that forest attracts mosquitoes that cause malaria for instance which can be prevented by rubbing a certain leaf on ones cloths and body, together with the fact that a given root can be used to cure the malaria, and in addition to a whole web of nuanced understanding available to the positivism meaningfulness-and-teleology relative to the ‘utter and brute’ animistic interpretation as meaningfulness-and-teleology neuterising that it is an evil forest one should not trespass together with a whole cohort of ‘imaginary tales’ in shoring up that posture, speaking of its threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation — preconverging/dementing–apriorising-psychologism. This is a most elaborate articulation of neuterising but it equally applies where meaningfulness-and-teleology is ‘just about miscued’ say between positivism–procrypticism and notional–deprocrypticism with the latter underlying the disjointedness-as-of-reference-of-thought of the former as it neuterising, for instance in the case of psychopathy and corresponding conjugated-postlogism as social psychopathy as in the various illustrations highlighted herein and particularly as more obviously revealed with childhood psychopathy. In the bigger picture, ascriptivity-or-
ascription-hardening/pseudo-referentialism arises as of notional-referentialism/notional-deprocrypticism; wherein recurrent-utter-uninstitutionalisation’s existential reference-of-thought deepest-level of neuterising is elicited by its ‘trepidatious-consciousness impulsive—ontologically-compromised-mediating,-as-of-its-specific-constitutedness’
underlining the ontological implications of understanding neuterising with respect to ‘retrospective and prospective Being underdevelopment elucidations of ‘meaningfulness-and-teleology’ as of neuterising induced failing of ‘reference-of-thought/de-mentative/structural/paradigmatic—ontological-performance’<including-virtue-as-ontology>. Basically neuterising as so articulated is the conception of ‘the ontological-performance’<including-virtue-as-ontology> of the various institutionalisations references-of-thought-devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ so-conceptualised from the notional~conflatedness of notional~deprocrypticism protensive-consciousness, and such an ontologically-veridical evaluation of neuterising is construed as a deneuterising —referentialism reflecting-ontologically-veridical—‘affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring—as-to-postconverging-or-dialectical-thinking—apriorising-psychologism’—and-ontologically-flawed—‘preconverging-or-dementing—apriorising-psychologism/deassertion’ as of the various institutionalisations references-of-thought-devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’. The implication here being that neuterising ‘can be disambiguated as of the fundamental human limited-mentation-capacity induced <amplitudding/formative–epistemicity>totalising/circumscribing/delineating context—meaningfulness-and-teleology’<reference-of-thought—devolving-as-of-instantiative-ontological-performance’<including-virtue-as-ontology> misconstrual-as—neuterising, and so-construed as of referentialism as of the notional~conflatedness of notional~deprocrypticism protensive-consciousness; thus gaining a superseding insight of the ontologically-flawed references-of-thought-devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness fixations/hardening-
neuterising’ to be able to then reveal, construe and uphold positivistic Being and ‘meaningfulness-and-teleology’, and this equally applies with regards to overcoming our ‘procrypticism–or–disjointedness-as-of-reference-of-thought’ to attain futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–‘meaningfulness-and-teleology’ as of prospective notional–deprocrypticism
Being and ‘meaningfulness-and-teleology’. As a further elucidation, a comparison can be made between a construct of ‘notional–referentialism’ disambiguated as referentialism, categorising neutronising, qualifying neutronising, tendentious neuterising and impulsive neuterising, and in parallel a reflection of ‘data conceptualisation’ disambiguated as ratio-contiguous referencing, intervalist pseudo-referencing, ordinal pseudo-referencing, nominal pseudo-referencing and random pseudo-referencing. We can grasp that effectively data conceptualisation as of intrinsic-reality/ontological-veridicality is inherently ratio-contiguous as of ontological-normalcy/relative-ontological-completeness of reference-of-thought but then we don’t always have the capacity to reference ratio-contiguous data and so the other types of data conceptualisations are available to us as well ‘as of the limitations of our measuring capacity’, and we grasp that the latter are actually in ‘constructed-deficiency of <amplituding/formative–epistemicity>totalising–ratio-contiguity/ratiocination-as-referentialism’ as of their respective epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness–of-reference-of-thought. Here as well it is important to understand that it is the ratio-contiguous referencing data conceptualisation that provides the ‘overriding framework as of conflatedness’ for making-sense-of/construing the relatively deficient referencing data conceptualisations as of their ‘defined tolerable levels’ of neuterising. This elucidation is to point out that ‘reference-of-thought constructs in epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness–of-reference-of-thought’
in the very first place cannot be the basis for articulating, as of their given constitutedness, by elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existentia-ontologically-veridical meaningfullness-and-teleology ‘as if in referentialism as of referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments’ but rather require ‘their ontologically-veridical meaningfullness-and-teleology’ restoration’ by a conflatedness as of ontological-normalcy/relative-ontological-completeness-of reference-of-thought that factors in ‘their constructed-deficiency with respect to ontological-normalcy/relative-ontological-completeness’ of reference-of-thought, so-construed as their ‘neuterising’ as of their categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments; thus enabling ontologically-veridical construal as of both ontological-completeness/incompleteness-of reference-of-thought of Being and meaningfullness-and-teleology retrospectively to prospectively in reflecting holographically-conjugatively-and-transfusively the ontological-contiguity—of-the-human-institutionalisation-process. To put it another way, as distinct articulations of the same physics intrinsic-reality, we cannot simply by constitutedness by elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existentia-contextualising-contiguity of ‘traditional classical mechanics axiomatic-construct’ given its epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness-of reference-of-thought arrive-at/achieve the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as of its ontological-normalcy/relative-ontological-completeness-of reference-of-thought; as what is so generated is nothing as of reality but rather a virtuality-or-
ontologically-flawed-construal. Instead such a construction of prospective relative intrinsic-reality/ontological-veridicality is a conflatedness of ‘traditional classical mechanics axiomatic-construct’ by an epistemic-totalising—renewing-realisation/re-perception/re-thought as of ‘maximalising-recomposing-for-relative-ontological-completeness’—unenframed-conceptualisation; driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality to reconstruct the same physics domain-of-study as the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs, and rather reflects the ontological-veridicality that ‘traditional classical mechanics axiomatic-construct’ as of its epistemic-abnormalcy/preconvergence/re-ontological-incompleteness—of-reference-of-thought is ‘construed as a constructed-deficiency of the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs ontological-normalcy/relative-ontological-completeness—of-reference-of-thought perspective’, and the former can only be subsumed/implied/construed-as-non-contradictory to the latter. Such a basic conception of comparative axiomatic-constructs in their reflection of the very same <amplituding/formative–epistemicity>totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality highlights that ontologically-veridical meaningfulness is a construction or derived-construction as of inherent intrinsic-reality/ontological-veridicality or the closest axiomatic-construct approximation to it; the insight here being that ‘relative completeness/profoundness of axiomatic-construct/reference-of-thought with respect to intrinsic-reality/ontological-veridicality’ is what is ontologically preeminent/critical for the notional perspective of ontological construal/conceptualisation. This is equally relevant with regards to the ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ which refers to the transcendental-enabling/sublimating/superceratory—de-mentativity conceptual framework that sets up the
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument for a registry-worldview’s/dimension’s reference-of-thought construction possibilities of derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue as of existential-instantiations’, on the same unchanging intrinsic-reality/ontological-veridicality construed/conceptualised by all registry-worldviews/dimensions, but generating with human limited-mentation-capacity-deepening successive more and more relatively profound/complete registry-worldviews/dimensions reference-of-thought constructions of derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue; with the (given consciousness’s neuterising-induced-or-deneuterising-induced)–reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness as of its intradimensional existential-instantiations derived/devolved axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue as the registry-worldview’s/dimension’s reference-of-thought ‘abstract teleological-de-mentating/structuring/paradigming/teleological-possibilities’. For instance, all subsequent axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue of the recurrent-utter-uninstitutionalisation registry-worldview/dimension are possible only by its (trepidatious-consciousness neuterising-induced)–reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness which is non-rules—apriorising/axiomatising/referencing–psychologism,-as-impulsive-or-accidented-or-random-mental-disposition as this basically defines the possibility of institutionalisation within

ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-

The fact is that all meaningfulness-and-teleology\(^9\) ontological-performance\(^7\)-<including-virtue-as-ontology>, whether teleologically-degraded or teleologically-elevated, implied as of within a given "reference-of-thought are necessarily in ontological-contiguity\(^6\), construed as of a difference-in-kind/difference-in-aposteriorising-or-logicising\(^2\) of the same <amplituding/formative–epistemicity>totalising/circumscribing/delineating \(^5\)"reference-of-thought-devolving. Such notional-contiguity/epistemic-contiguity—<profound-supererogation—of-mentally-aestheticised—postconverging/dialectical-thinking—qualia-schema> is implied by the fact that a reference-of-thought is a ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating meaningfulness-and-teleology\(^7\) implied as
inherently points to the inappropriateness of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation on the basis of the centered–epistemic-totalisation/reference-of-thought and hence implying that there can’t be any dialogical-equivalence. Such that from a positivistic perspective, an argument in a non-positivistic social-setup of the type one may be accused of sorcery is construed as ridiculous since it is in notional-contiguity/epistemic-contiguity-of-mentally-aestheticised-postconverging/dialectical-thinking—qualia-schema>, with its apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reflection of existential-contextualising-contiguity—in-reification/dereification cognisant-and-integrative with a non-positivistic superstitious meaningfulness-and-teleology centered–epistemic-totalisation/reference-of-thought, and that itself is perceived as of ‘aetiological concern’ as to the possibility of an apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reflection of existential-contextualising-contiguity—in-reification/dereification mental-disposition that can be cognisant-and-integrative in notional-contiguity/epistemic-contiguity-of-mentally-aestheticised-postconverging/dialectical-thinking—qualia-schema> with numerous existential circumstances reflecting the endemising/enculturating of non-positivistic superstition and its vices-and-impediments. The same applies from a notional-deprocrypticism perspective with regards to a procrypticism—or–disjointedness-as-of-reference-of-thought mental disposition as an argument seeming to articulate meaningfulness-and-teleology in the same disjointedness-as-of-reference-of-thought terms-as-axiomatic-construct by which the procrypticism—or–disjointedness-as-of-reference-of-thought arises in the first place is in circular amplituding/formative–epistemicity totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of the same centered–epistemic-totalisation/reference-of-thought defect. Thus it is
ontologically impossible to address any given registry-worldview/dimension vices-and-impediments as of that fundamental <amplituding/formative-epistemicity>totalising/circumscribing/delineating thought-devolving-as-of-instantiative-context—meaningfulness-and-teleology reference-of-centered-epistemic-totalisation, besides at best palliative constructs of a non-universal nature, as not of an aetiologisation/ontological-escalation nature. Thus further validating the idea that it is a crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring in secondnaturing such a prospective institutionalisation reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ that enables such a transformation whether from a retrospective or prospective transcendence-and-sublimity/sublimation/supererogatory—de-mentativity perspective. This explains ontological-normalcy/postconvergence referentialism as construing/conceptualising the most profound/complete ontologically-veridical reference-of-thought construction of meaningfulness-and-teleology, as of the succession of registry-worldviews/dimensions from the notional—deprocrypticism perspective construal/conceptualisation, as being ‘the most profound/complete reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ grasp of intrinsic-reality/ontological-veridicality among all the registry-worldviews/dimensions as of its preempting—disjointedness-as-of reference-of-thought, as to—<amplituding/formative-epistemicity>growth-or-conflatedness/transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—in-superseding-mere-formulaic-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules—apriorising/axiomatising/referencing—psychologism. Furthermore, within a registry-worldview/dimension for the disambiguation of notional—firstnaturedness—temporal-to-intemporal-dispositions, its reference-of-thought of meaningfulness-and-teleology as its
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument is its (given consciousness’s neuterising-induced-or-deneuterising -induced) as reference-of-thought—
devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness, which by way of a différance/internal-dialectics/difference-deferral articulates the intradimensional relative ontological-veracity of all other intradimensional existential-instantiations derived/devolved axiomatic-constructs of "meaningfulness-and-teleology" as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue. Thus this is within the framework of the registry-worldview’s/dimension’s teleological-de-

prospectively ‘positivism–procrypticism uninstitutionalisation and notional–deprocrypticism

a universalisation–non-positivism/medievalism uninstitutionalisation social-setup, in order to
construe ontological-veridicality; as of conflatedness we can’t simply imply the presence of universalisation non–non-positivism/medievalism uninstitutionalisation reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness as the basis of instigating logical-dueness for elucidation and thereof construing ontologically-veridical meaningfulness-and-teleology, as such a mental-reflex representing/skewing-the-representation of the presence as universalisation non–non-positivism/medievalism uninstitutionalisation will overlook the presence un institutionalised-threshold and wrongly represent its meaningfulness-and-teleology at its uninstitutionalised-threshold as of elevation/institutionalisation in soundness-or-ontological-good-faith/authenticity reference-of-thought projection’. It is rather the conflatedness projective/anticipative contrast between the said un institutionalised-threshold however the mental-reflex complex of presence and the prospective positivism institutionalisation however the mental-reflex complex of the latter’s abstractness as from the presence un institutionalised-threshold perspective that enables their respective reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness contrastive fundamental elucidations in grasping ontological-veridicality as of their respective prior relative-ontological-incompleteness-and-completeness-of-reference-of-thought perspective. Such an approach to transcendence-and-sublimity/sublimation/supercratory-de-mentativity is exactly what validates transcendental knowledge as of a psychoanalytic-unshackling commitment and not a grounded knowledge-construct commitment; as an approach as of grounded knowledge-construct commitment that merely implies transcendence-and-sublimity/sublimation/supercratory-de-mentativity as being incremental to the prior registry-worldview's/dimension's reference-of-thought doesn't undermine/unshackle that prior reference-of-thought with respect to the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-'human<amplituding/formative-epistemicity>totalising-purview-of-construal' as of the requisite undermining/unshackling by the prospective enlightenment of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-'human<amplituding/formative-epistemicity>totalising-purview-of-construal’ by the prospective registry-worldview’s/dimension’s reference-of-thought ontological-performance-<including-virtue-as-ontology> given its prospective relative-ontological-completeness-of-reference-of-thought. intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue, are rather as of ‘a psychoanalytic-unshackling commitment’ and not as of ‘a grounded knowledge construct commitment’.

Inherently, such ‘a psychoanalytic-unshackling commitment’ inevitably and fundamentally puts into question the axioms and underlying supposedly transcendental-enabling/sublimating/supererogatory–de-mentativity notion as of the (given consciousness’s neuterising-induced)–reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness of the prior registry-worldview’s/dimension’s reference-of-thought of meaningfulness-and-teleology which establishes its ‘grounded knowledge construct’, and so because of its denaturing of the prior institutionalisation’s reference-of-thought–categorical-imperatives/axioms/registry-teleology by way of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity at the registry-worldview’s/dimension’s uninstitutionalised-threshold inducing prior relative-ontological-incompleteness-reference-of-thought in need for prospective relative-ontological-completeness-reference-of-thought, and so as a transitional construct that is in effect as of a psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring articulation by its crossgenerational transcendental implications projection. Such that such ‘a psychoanalytic-unshackling commitment’ cannot be construed in the same terms–as-of-axiomatic-construct as ordinary intradimensional knowledge as of the established prior institutionalisation teleological-de-mentating/structuring/paradigming/teleological-possibilities for its ‘grounded knowledge construct’ as prior relative-ontological-incompleteness-reference-of-thought, but rather construed as of prospective ontological-normaley-relative-ontological-completeness-reference-of-thought it more critically and organically points to the uninstitutionalised-
threshold state of the present registry-worldview’s/dimension’s reference-of-thought at its uninstitutionalised-threshold with respect to the prospective institutionalisation state of the prospective registry-worldview’s/dimension’s reference-of-thought as of its prospective relative-ontological-completeness-reference-of-thought, and thus rather implies an de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics). It is psychoanalytic-unshackling commitment and not grounded knowledge construct commitment, because it is for instance about articulating ‘prospective positivism axiomatic-construct (occlusive-consciousness neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘non-positivism axiomatic-construct (warped-or-preclusive-consciousness neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’, or in the case of articulating ‘futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of prospective notional~deprocrypticism axiomatic-construct (protensive-consciousness deneuterising -induced)- reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘positivism~procrypticism axiomatic-construct (occlusive-consciousness neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’. It is important to grasp in both instances that such psychoanalytic-unshackling commitment implications are not to be understood respectively as of the uninstitutionalised-threshold mental-dispositions of non-positivism/medievalism or procrypticism reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness which will just induce their <amplituding/formative–epistemicity>totalising~self-referencing-

habituation process. Remarkably, such a ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation behind the ontological-contiguity—of-the-human-institutionalisation-process enabling the human existential tale in
successive institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing is always rather perceived intradimensionally as an exceptional-askance and unordinary. For instance, the maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation mental-disposition in their own times advocating the end of such perverse human institutions like serfdom and slavery were construed in their own times by their dominant societies as of exceptional-askance and unordinary such that in effect these actually engendered great conflict before such practices came to an end; and such metaphysics-of-absence-(implicit-epistemic-veracity-of-nonpresencing-perspective-ontological-normalcy/postconvergence) analysis does apply with respect to superstitions, universal human rights, free society, modern science, etc. but then as of our developed present institutionalisation the idea of not entertaining such practices is viewed as not an exceptional-askance and ordinarily to be expected. This explains human mental states respectively as of uninstitutionalised-threshold and as of prospective institutionalisation with respect to maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation as the process enabling prospective relative-ontological-completeness-of-reference-of-thought of same <amplituding/formative-epistemicity>totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality hitherto considered off limits to any challenging maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation at the uninstitutionalised-threshold but then acknowledged thereafter after prospective institutionalisation; with the implication that the possibility for all prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity as of opened-construct-of-meaningfulness-and-teleology arise only by maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation but presences in their <amplituding/formative> wooden-language-(imbued—averaging-of-thought-as-to-

<amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-reflex avoiding being
ontologically decentered and preconverging—apriorising—psychologism. Insightfully, this point out the circumspective nature of any transcendental knowledge

articulating construed ontological-veridicality at the expense of avoiding any Being-

commitment necessarily recognises human potential to transcend, and the other hand the nature
of intrinsic-reality/ontological-veridicality that ‘supersedes humankind and doesn’t factor in
human moods and whims’ in its effectiveness. Caught between these two elements human
meaningfulness-and-teleology is ‘often actually imbued with active and passive mental-
strategies of compromise’ but which wouldn’t cut it with the ‘maximalising-recomposuring-

progress requires ontologically-veridical as intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-

epistemic-totalising\textsuperscript{3}~devolved~purview~as~domain~of~construal~as~intrinsic-reality/ontological-veridicality not subject to immediate-constraining ontological-primemovers-totalitative-framework\textsuperscript{2} thus rather eliciting atomising/taking-to-pieces constitutedness that induces relatively poor ontological-performance\textsuperscript{10}~<including~virtue~as~ontology>. The central element here has to do with the pervasiveness of ‘conceptual patterning’ that actually speaks of a nombrilisticas <amplituding/formative~epistemicity>totalising~self-referencing~synceretising/circularity/interiorising/akrasiatic-drag approach to conceptualising knowledge based on an intellectual exercise of producing patterns of thought with little consideration as to their underlying intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity as validated by ontological-primemovers-totalitative-framework\textsuperscript{2}. At its worst, such an orientation construes of categorisation/taxonomisation of knowledge as inherently representative of intrinsic-reality/ontological-veridicality by that mere exercise. Such a constitutedness\textsuperscript{13} ends up misconstruing the organical depth involved and renders all knowledge constructs so categorised/taxonomised on the same vague plane of mechanical equivalence undermining their transcendental-enabling/sublimating/supererogatory~de-mentativity, originality, organic nature and more often than not turning them into platitudes as rather concerned with perceived academic formulations and formats in of themselves rather than ontological-veracity as of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity. The underlying mental-reflex for this intellectual disposition associated with conceptual patterning is the assumption that by mere categorising/taxonomising ideas on the basis of their similarities and differences it should be able to attain a grander truth as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity\textsuperscript{8}. But then such an approach is naïve by its failure to reckon the
reality of human limited-mentation-capacity which implies that human conceptualisation tends to develop from prior relative-ontological-incompleteness of reference-of-thought, as of the incompleteness of the de-mentating/structuring/paradigming of human reference-of-thought. Such that a naïve categorisation/taxonomisation conceptual patterning perspective on that basis equally inherits that relative-ontological-incompleteness of the de-mentating/structuring/paradigming of human reference-of-thought; with the consequence that it is not ‘notionally de-mentated/structured/paradigmed’ to conceptually factor in human poor to perfect/near-perfect construal on the basis of conflatedness but rather suffers from constitutedness. This weakness is underlined and resolved by the notion of maximalising-recomposuring-for-relative-ontological-completeness — unenframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality that enables conflatedness in line with existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context. It is such a conceptual patterning mental-reflex associated with categorising/taxonomising dispositions in constitutedness that is behind the naïve but poor influence of the saying that ‘every idea has already been thought of before’ with the nefarious consequence of emphasising themes and authorial differentiation within such categorised/taxonomised thematics in of themselves as if an epistemic-totalising~devolved~purview-as-domain-of-study mainly involves intersubjective evaluation or evaluation among humans within the scope of their mortality on the naïve assumption that such categorising/taxonomising effectively covers analytically the entirety/potency of existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation<-as-to-perspective-ontological-normalcy/postconvergence-implied-‘prospective-aporeticism-overcoming/unovercoming’>,
whereas such is achieved rather by a conceptualising as implied by referentialism-as-of-ontological-normalcy/postconvergence that places existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context above intersubjective evaluation or evaluation among humans in their mortality in determining intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity as of intersolipsistic insight. Consider for instance that in the run up to the development of theory-of-relativity and quantum-mechanics in the early part of last century, the scientists involved weren’t in the exercise of evaluating their respective theories in a closed framework emphasising their respective ‘ownership-of-theories’ as mortals but rather an opened framework emphasising whoever theories contribute in disclosing intrinsic-reality/ontological-veridicality as the superior third party. This can equally be compared to naively articulating categories/taxonomies of sounds on the basis that their constitutedness defines the entire existential possibility/potency of musical compositions that can arise but then the ‘depth/axiomatic-construct of existence for musical compositions’ doesn’t submit to such a naïve categorising/taxonomising constitutedness but rather such ‘depth/axiomatic-contract of existence for musical compositions’ is as of an imbricatedness/threadedness/recomposuring of existential-instantiations that is graspable rather by a conflatedness as enabled by referentialism-as-of-ontological-normalcy/postconvergence. Given our limited-mentation-capacity, existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context is then the preceding and transformative element of meaningfulness-and-teleology conceptualisation as of our limited-mentation-capacity-deepening enabling our prospective relative-ontological-completeness-of-reference-of-thought for grasping ontologically-veridical organic-knowledge articulated in any given amplituding-formative-
epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality such that the wrong approach for prospective intellectual creation is one that simply lumps authorial articulations under given themes together in ‘mechanical association’ without factoring beforehand their respective ‘transcendental-enabling/sublimating/supererogatory–de-mentativity dynamism and implied organic-knowledge’ as of conflatedness. This equally underlies the pervasive disposition for misattributed and misfocused analyses as such blurry intellectual exercise become an <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-dispositions focussing less on the possibilities and insights of prospective elucidation and expansion of knowledge as of intrinsic-reality/ontological-veridicality as being the transcendental-enabling/sublimating/supererogatory–de-mentativity immortal/first-party, and turning more and more and placing the stakes rather on authorial second-parties/mortals competing analyses even to the extent on occasion of undermining the intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity immortal/first-party. Further, such conceptual patterning will often fail to identify the appropriate point for grasping intrinsic-reality/ontological-veridicality as instead of emphasising conflatedness in (re-originary–as-unenframed/unbeholdening/outlier-conceptualisation-{imbued-postconverging/dialectical-thinking ‘projective-insights’/epistemic-projection-in-conflatedness ‘of-notional–deprocrypticism-prospective-sublimation’}) originary/event–of-prospective-ontology-origination projection into existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness’s-reference-of-thought–devolving-as-of-instantiative-context, it emphasises mere de-mentative/structural/paradigmatic patterns inducing constitutedness, and so whether at detailing or synoptic levels of analysis. This extends to the way issues are raised, questions are
posed, as well as their supposed resolutions; ultimately lacking in providing theoretical, conceptual and operant constructs of universal applicative pertinence, and explains a certain position of closure that holds that philosophy is just a vague thinking exercise. Furthermore, whereas an intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity construal highlights the ontological-contiguity of all knowledge as of their reference-of-thought/de-mentative/structural/paradigmatic relationship, conceptual patterning seem to naively imply a discreet relationship of knowledge constructs with little insight of their intrinsic-reality/ontological-veridicality transcendental enabling ontological-primemovers-totalitative-framework interconnectedness as this is often not the primary driving focus, as it is naively assumed that the conceptual patterning is a correspondence of intrinsic-reality/ontological-veridicality as of the mere de-mentative/structural/paradigmatic conceptualisation in constitutedness rather than striving to expand the transcendental-enabling/sublimating/supererogatory—de-mentativity ontological-primemovers-totalitative-framework existential-reality potential, and this easily leads to virtuality or ontologically-flawed construal. The defect of conceptual patterning is easily overlook mainly as philosophy is of first order knowledge, a level at which knowledge differentiation doesn’t easily manifest itself. Such errors of conceptual patterning will hardly arise in second-level knowledge where transcendental-enabling/sublimating/supererogatory—de-mentativity implications arise in a specular way. For instance, while hereditary is an underlying conceptual patterning idea in biology, it will be unthinkable to try to lump together and undermine the originality of subsequent hereditary notions of genetics on the basis that these are of the same conceptual patterning as earlier notions like Mendelian heredity as the transcendental-enabling/sublimating/supererogatory—de-mentativity differentiations are spectacular. Finally, one practical intellectual flaw arising out of such naïve categorising/taxonomising conceptual
patterning has to do with a certain vague intellectual practice based on perceived intellectual pertinence in terms of the authorial ‘precedence of mentioned terms’ irrespective of association whether simple formalistic identifying of terms and notions with little consideration of the divergence of implied organic-knowledge as of their intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/superceratory-de-mentativity ontological-primemovers-totalitative-framework nature and differences as well as their divergence in meaningfulness-and-teleology implications. This again leads to lumping, artificial categorising and undermines originality and organic-knowledge, turning this into simplistic mechanical associations with the more serious consequence being that the more decisive notion for human knowledge renewal as of maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality, becomes seriously undermined; as it refers to a transcendental-enabling/sublimating/superceratory-de-mentativity ontological-primemovers-totalitative-framework renewal of a same <amplituding/formative–epistemicity>totalising–devolved–purview–as–domain–of–construal–as–intrinsic–reality/ontological-veridicality but with such effort for renewal often laden with a tradition that is naively of constitutedness undermining requisite creativity as of conflatedness, as it ‘critically presupposes beyond-the-consciousness-awareness-teleology’-<in-existential-extrication-as-of-existential-unthought> that prospective meaningfulness is deterministically tied down to a certain categorising/taxonomising relationship with the prior conceptualisations’ in the given <amplituding/formative-epistemicity>totalising–devolved–purview–as–domain–of–construal–as–intrinsic–reality/ontological-veridicality. Ultimately, the idea here is that approaching intrinsic-reality/ontological-veridicality with our given limited-mentation-capacity in other to achieve ontological-veracity requires a rather counterintuitive
mental-reflex as of existential-contextualising-contiguity ‗s-reifying/elucidating-of-

analysis as of its prospective relative-ontological-completeness ‗-of- reference-of-
thought/ontological-normalcy, points out that actually, and according to this author’s view,
such a currently discussed philosophical issue as the hard problem of consciousness arises as a
result of a fragmented thematic construal as of constitutedness\textsuperscript{11} wherein a more profound view
of the philosophical enterprise as intrinsic-reality/ontological-veridicality transcendental-

that actually ‘devolves out’ of the more fundamental issue of Being as of its but is rather being
posed as of a ‘disjointed/fragmented analysis’ as a consciousness grounded problem. This
equally explains this author’s construal of human consciousness development as rather of
Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-

thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness, and so as of the \textsuperscript{54}maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{97}—unenframed-conceptualisation behind the ontological-contiguity—of-the-human-institutionalisation-process\textsuperscript{97}. Otherwise with a naïve mental-reflex of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity\textsuperscript{54} of existential-instantiations, we will rather tend to wrongly construe ‘the conceptual patterning of existential-instantiations’ as rather being ‘axiomatic-constructs as of the (given consciousness’s ‘neuterising-induced-or-deneuterising\textsuperscript{16}-induced)\textsuperscript{16}reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness as from existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’ \textsuperscript{97}<-as-to-perspective-ontological-normalcy/postconvergence-implied-’prospective-aporeticism-overcoming/unovercoming’> imbricatedness/threadedness/recomposuring’, thus inducing virtualities or ontologically-flawed construals associated with the uninstitutionalised-threshold \textsuperscript{97}. Thus, the ontological-veracity as prospective relative-ontological-completeness\textsuperscript{83}of- reference-of-thought of ‘the axiomatic-constructs of a (given consciousness’s neuterising-induced-or-deneuterising\textsuperscript{16}-induced)-\textsuperscript{16}reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness as from existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’ \textsuperscript{97}<-as-to-perspective-ontological-normalcy/postconvergence-implied-’prospective-aporeticism-overcoming/unovercoming’> imbricatedness/threadedness/recomposuring’ generating knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue implied as \textsuperscript{54}meaningfulness-and-teleology\textsuperscript{99}, is rather ensured by the construal of existential-instantiations as of \textsuperscript{54}maximalising-recomposuring-for-relative-
ontological-completeness\textsuperscript{1}—unenframed-conceptualisation which is as of conflatedness\textsuperscript{2}, thus enabling the ontological-contiguity—of-the-human-institutionalisation-process. It is interesting to grasp here that we cannot from our ‘sense of conceptual patterning’ claim to put into question the inherent nature of existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation\textsuperscript{16}—<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporetic¬ism-overcoming/unovercoming’> and as of its implied superseding—oneness-of-ontology, since existence is de-mentatively/structurally/paradigmatically precedent and our conceptual patterning is arising secondarily as of our shoddy-and-incomplete construal of the ‘iterating nature of existential-instantiations’ as of existence’s imbricatedness/threadedness/recomposuring; and any such pretence of conceptual patterning is nothing but a virtuality or ontologically-flawed construal as of naïve constitutedness\textsuperscript{3}. Of course, it is rather prospective relative-ontological-completeness\textsuperscript{8}—of—reference-of-thought that will imply deeper ontological-veracity of the same underlying purview for the construal of meaningfulness-and-teleology\textsuperscript{9} mental-disposition grounded on existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation\textsuperscript{16}—<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporetic¬ism-overcoming/unovercoming’>. Insightfully and making the case against conceptual patterning as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity\textsuperscript{10} of existential-instantiations, this points out that existence inherent superseding—oneness-of-ontology necessarily implies ontologically-veridical meaningfulness-and-teleology\textsuperscript{9} is effectively as of a natural transcendental-enabling/sublimating/supererogatory—de-mentativity existential-contextualising-contiguity\textsuperscript{10}—of-all-ontologically-veridical-meaningfulness ‘in wait’ to be elucidated however
imbricated/threaded/recomposured such an exercise, explaining why our knowledg-constructs/theories/interolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue of a given <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality in conflatedness¹² need to be as of a reference-of-thought–categorical-imperatives/axioms/registry-teleology¹⁰,-for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology¹⁰, and more than just conceptual patterning that doesn’t or poorly attends to a natural transcendental-enabling/sublimating/supercerosis–de-mentativity contextualising-contiguity-of-all-ontologically-veridical-meaningfulness. existential-For all the above elucidations highlighting the ontological-veracity implications of constitutedness¹¹ and conflatedness¹¹, it should be noted that emphasis is rather on the deficiency of limited-mentation-capacity in construing intrinsic-reality/ontological-veridicality such that the more profound/complete recomposuring of the very same <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality highlights/reflects in its subsuming interpretation the true deficiency of the shoddy/incomplete. This can be expanded upon as follows, the reason why relative-ontological-incompleteness¹⁰–of–reference-of-thought/epistemic-abnormalcy/preconvergence⁷/destructuring can only be construed with certainty-as-to-their-real-ontological-deficiency ‘rather as a constructed-deficiency of prospective relative-ontological-completeness¹⁰–of–reference-of-thought/ontological-normalcy/conflatedness’ lies in the fact that the construal/conceptualisation of an epistemic-totalising¹⁰–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality is ‘supposedly as of a perfect or near-perfect or relatively-perfect ontological correspondence between such human construed/conceptualised meaningfulness-and-teleology and the inherent ontological-veracity/intrinsicness of the <amplituding/formative–
The only human construal/conceptualisation that can guarantee or relatively guarantee such a perfect or near-perfect or relatively-perfect ontological correspondence is as of prospective relative-ontological-completeness\(^1\) of reference-of-thought/ontological-normalcy/conflatedness\(^2\). Since there is no direct correspondence between relative-ontological-incompleteness\(^3\)-of- reference-of-thought/epistemic-abnormalcy/preconvergence /destructuring with the inherent intrinsicness of the relative-ontological-incompleteness\(^1\)-of- reference-of-thought/ontological-normalcy/conflatedness\(^2\) which has such a direct correspondence that the certainty-as-to-their-real-ontological-deficiency of relative-ontological-incompleteness\(^3\)-of- reference-of-thought/epistemic-abnormalcy/preconvergence /destructuring can be established. A direct approach to determine the certainty-as-to-their-real-ontological-deficiency of relative-ontological-incompleteness\(^3\)-of- reference-of-thought/epistemic-abnormalcy/preconvergence /destructuring will simply lead to a virtuality-or-ontologically-flawed-construal, as failing to elucidate the correspondence of ontological-deficiency to the inherent intrinsicness of the relative-ontological-incompleteness\(^3\)-of- reference-of-thought/epistemic-abnormalcy/preconvergence /destructuring. With such a virtuality-or-ontologically-flawed-construal often wrongly involving ‘reference-of-thought—elevated-devolving-as-of-prospective-institutionalisation’-as-of-upholding-ontological-veridicality rather than ‘reference-of-
thought—degraded-devolving-as-of-uninstitutionalised-threshold” as-of-failing-ontological-veridicality since a logical correspondence with intrinsic-reality/ontological-veridicality will be vaguely implied by mental-reflex; as is often the case with postlogism and conjugated-postlogism. By and large, this overall conceptualisation explains the nature of ‘notional constructs’ as implying a variance of poor-to-perfect ontological-performance -<including-virtue-as-ontology> of the same underlying idea conceptualised as of its perfect/near-perfect/relatively-perfect ontological-performance -<including-virtue-as-ontology> as in-sync/corresponding with inherent intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought> of human construal/conceptualisation of it. This fully articulates the dynamic relationship of human limited-mentation-capacity as of its poor to perfect relationship-with/conceptualising-of existence-or-intrinsic-reality-or-ontological-veridicality; respectively as poor as of constitutedness and as relatively-perfect/near-perfect/perfect conflatedness, construed as notional~conflatedness as of constitutedness-to-conflatedness of human limited-mentation-capacity. Insightfully, it highlights that constitutedness arises as of human limited-mentation-capacity ‘poor/unsound/shoddy/incomplete unanticipated/unprojected’ construal/conceptualisation-of-axiomatic-constructs-as-knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional~referential-notions/articulations/virtue from ‘the imbricatedness/threadedness/recomposuring iterating of existential-instantiations’ as of ‘existence-or-intrinsic-reality-or-ontological-veridicality’, while conflatedness arises as of human limited-mentation-capacity ‘good/sound/profound/complete anticipated/projected’ construal/conceptualisation-of-axiomatic-constructs-as-knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional~referential-notions/articulations/virtue from ‘the imbricatedness/threadedness/recomposuring iterating of existential-instantiations’ as of ‘existence-or-intrinsic-reality-or-ontological-veridicality’. 
is, whether humans in 2000 BC or 2000 AD are knowledgeable about notions as genetics, theory-of-relativity, universal human rights, etc. doesn’t add anything to ‘abstract/imaginary existence as a pre-given’ pointing to the fact that human existence is about human-subpotency construed as of successive defining transcendentally-enabled-institutionalisation-levels-of-ontological-good-faith/authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality/antinihilism as levels of human dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension (as of human self-surpassing—existentialism-form-factor,-in-overcoming—‘notionally—collateralising-beholdening-protohumanity’-to—‘attain-sublimating-humanity’-as-to-existence-potency—sublimating-nascence,—disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness to supersede human temporality/shortness <amplituding/formative> wooden-language{(imbued—averaging-of-thought—<as-to—leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable—void ’—with-regards-to-prospective-apriorising-implications>}). Thus in effect the natural sciences are actually for-human-studies/for-human-constructs whose specific ambit of human-subpotency is about ‘human consciousness as for material and physical effecting devolving teleologies as meaningfulness’ while the social domains of study are actually for-human-studies/for-human-constructs whose specific ambit of human-subpotency is about ‘human consciousness inherent effecting devolving teleologies as meaningfulness’. This validates the idea of dualism as ultimately <supererogatory—human-subpotency>—effecting can only arise from the conflatedness of human consciousness in-its-embodiment as the potent ‘phenomenological transcendental-point-of-departure handle’ for human self-conscious

construes intrinsic-reality/ontological-veridicality as of its profoundness/completeness. Consider in this particular regards the intrinsic-reality/ontological-veridicality reflected as akin to an engineering product like a jet engine wherein the conceptualisation is an incisive conflatedness¹² that goes beyond the whole and parts of the jet engine to grasp a conceptualisation profoundness/completeness of required critical performances like fuel burn, maintenance cycles, robustness, etc. construed as of the articulated depth of the reference-of-thought of aircraft engine engineering science. This overall notional conception extends as well to the various ways by which human limited-mentation-capacity ‘accosts’ intrinsic-reality/ontological-veridicality, bringing about the various registry-worldviews/dimensions categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-specific-constitutedness¹³ induced neuterising or prospectively notional–deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness³ meaningfulness-and-teleology⁹. That is, the notional–deprocrypticism protensive-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument in its referencing of conflatedness¹², with no intermediating construct as of constitutedness¹¹, thus achieves ontologically-uncompromised-mediating,-as-of-conflatedness³, meaningfulness-and-teleology⁹. While the occlusive/preclusive/warped/trepidatious-consciousnesses mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments by their successive intermediating categorising/qualifying/tendentious/impulsive constructs as of constitutedness¹¹ on conflatedness¹² induce their successively categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness¹³, meaningfulness-and-teleology⁹. This ultimately points to the centrality of the implications of the ‘notion of limited-mentation-capacity’ as of its notional–deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness as a notional conception in construing meaningfulness-and-teleology, while
avoiding its ontologically-flawed constitutedness construals in terms—of-axiomatic-construct of the various neuterising. Hence the 'notion of limited-mentation-capacity' as it overcomes ontologically-compromised-mediating,-as-of-its-specific-constitutedness towards ontologically-uncompromised-mediating,-as-of-conflatedness is what is effectively and ontologically defining of issues of reference-of-thought of meaningfulness-and-teleology given that as of its ontologically veridical conflatedness it is the cumulative recomposuring of human limited-mentation-capacity as limited-mentation-capacity-deepening that is behind the ontological-contiguity—of-the-human-institutionalisation-process itself, and also underlies temporal-to-intemporal individuations differentiation as shortness-of-register-of-meaningfulness-and-teleology—and-longness-of-register-of-meaningfulness-and-teleology as of limited-mentation-capacity, and as this is so-conceptualised from the ontological-normalcy/relative-ontological-completeness-of-reference-of-thought perspective of notional-deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective’. This equally underlies and is in sync with the notion of candidity/candour-capacity as a variance of the same as of notional-deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective’. It is the 'notion of limited-mentation-capacity' that as of its deficiency is falsely-composited by ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’ into ontologically-flawed constructs of neuterising. historiality/ontological-eventfulness /ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrypticism highlights that humankind in its projected-or-anticipated relationship with ‘existence as-the-absolute-a-priori’ is rather in existential-extrication-as-of-existential-unthought, and not the full potency of existence; existential-extrication-as-of-existential-unthought construed rather as ‘shoddy-and-incomplete
essence of existence as ‘the full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing–realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflatedness’. In other words existence is already given rather as of its potency, and the real problem of existence is humankind’s access to existential possibilities as of humankind’s limited-mentation-capacity. That is, human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is what achieves existence as a ‘potent construct’, as the notion of existence-as-a-grounded-construct doesn’t-make-sense/is-unavailable for any specific human registry-worldview’s/dimension’s reference-of-thought as an <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag construct, including our positivism–procrypticism registry-worldview/dimension, as this will falsely imply that our reference-of-thought <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag is ‘developed enough’ as of Being-and-contemplation to have achieved the full potency of existence to then know what’s existence whereas in reality such <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag highlights human-subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence. Thus our construal of existence can only be an ‘as of existence’ exercise that rather highlights human potential to transcend towards grasping existence/existential-possibilities; with that potency only instigated as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. left of permanence determination about existence is its transcendental construct as of human
limited-mentation-capacity-deepening. Interestingly, from our vantage positivism/rational-empiricism perspective, we’ll certainly construe the supposed intradimensional resolution of existential issues of prior relative-ontological-incompleteness-reference-of-thought as of ontological-performance-including-virtue-as-ontology arising in recurrent-utter-uninstitutionalisation as intradimensional meniality-or-hyperbole and rather resolvable as of base-institutionalisation superseding projection/anticipation, and same with base-institutionalisation-ununiversalisation as intradimensional meniality-or-hyperbole and rather resolvable as of universalisation superseding projection/anticipation, and same with universalisation–non-positivism/medievalism as intradimensional meniality-or-hyperbole and rather resolvable as of positivism/rational-empiricism superseding projection/anticipation, but we won’t or hardly construe of the same as of our amplituding-formative-epistemicity-totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag about our positivism–procrypticism as it being of intradimensional meniality-or-hyperbole and rather resolvable as of notional–deprocrypticism as preempting—disjointedness-as-of-reference-of-thought superseding projection/anticipation! This points to the flaw of a Heideggerian Dasein conceptualisation as it wrongly implies ‘humankind has any developed mental state as of Being-and-contemplation in any past-to-present epoch’ to ‘fully register as of that epoch’s metaphysics-of-presence–(implicitd-nondescript/ignoreable–void–as-to-presencing—absolutising-identitive-constitutedness)’ what is existence/existential-possibilities not factoring Being conflatedness amplituding-formative-epistemicity-totalising–renewing-realisation/re-perception/re-thought as rather driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality in reflecting holographically–conjugatively-and-transfusively the ontological-contiguity—of-the-human-institutionalisation-process, and further in contradiction to the notion of human

Existence is rather a ‘potency construct of transcendence-and-sUBLImity/sublimation/supererogatory–de-mentativity as of human existential potential’ and not ‘a grounded construct for construing existence’ as wrongly implied/attempted with the Heideggerian Dasein notion, as all what ‘grounding’ does is to wrongly elevate the registry-worldview’s/dimension’s reference-of-thought in which such a construct is articulatedly grounded thus contradictorily undermining the possibility for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity by wrongly implying that the said registry-worldview’s/dimension’s reference-of-thought is of absolute ontological-performance –<including-virtue-as-ontology>, whereas it is deepening of human limited-mentation-capacity as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality in inducing prospective apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments that allows for prospective relative-ontological-completeness of reference-of-thought thus expanding human notion of existence/existential-possibilities. Anecdotally, the prophesying social scientists of their times who insist on the recurrence of the practices of the creed are ‘not stupid’ as they know very well that reference-of-thought–categorical-imperatives/axioms/registry-teleology for meaningfulness-and-teleology are just that with respect to an animal of limited-mentation-capacity beyond-the-consciousness-awareness-teleology –<in-existential-extrication-as-of-existential-unthought> who is bound to circularly elicit shortness-of-register-of–meaningfulness-and-teleology on such renewed reference-of-thought–categorical-imperatives/axioms/registry-teleology for meaningfulness-and-teleology and further

postulation instead of decentered-infinite-freeplay is actually a critique arising on the implied assumption of finite human limited-mentation-capacity as of its impossibility as finitely limited to come into the full terms of grasping the full potency of existence/existential-possibilities; but then this author construes that human limited-mentation-capacity is not finite as it deepens as of the possibility of transcendence-and-sublimity/sublimation/superroratory-de-mentativity enabled as of de-mentation-superroratory-ontological-de-mentation-or-dialectical-de-mentation-stranding-or-attributive-dialectics thus involving de-mentative/structural/paradigmatic transformations/shfts of human limited-mentation-capacity of reference-of-thought-as-of-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ to grasp existence/existential-possibilities, such that as of notional—deprocrypticism or <amplituding/formative>notional—preempting—disjointedness-as-of-reference-of-thought in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process retrospectively to prospectively, centered—<amplituding/formative—epistemicity>totalising/circumscribing/delineating meaningfulness-and-teleology as of its attaining of ontological-completeness-of-reference-of-thought is/can-be achieved as ‘involving the superseding/transcending of successively defining human finitudes as the destructuring-threshold—(uninstitutionalised-threshold/presublimating—desublimating-decisionality)—of-ontological-performance <including-virtue-as-ontology> towards attaining successive prospective relative-ontological-completeness—of-reference-of-thought as the institutionalisations’. This thus undermines the implications of a Derridean decentered-infinite-freeplay in its critique of ‘centered—epistemic-totalisation as of circularity of meaningfulness-and-teleology in relative deficient/flawed ontological-performance—<including-virtue-as-ontology>’ since such a criticism is based on assuming only a same registry-worldview’s/dimension’s reference-of-thought, and so-construed mainly because
human finitudes as destructuring-threshold-(uninstitutionalised-threshold\textsuperscript{12}/presublimating-desublimating-decisionality)-of-ontological-performance\textsuperscript{71}-<including-virtue-as-ontology>.

Here as well the Derridean postulation of decentered-infinite-freeplay in lieu of such a conceptualisation of a ‘projected ultimate centered–epistemic-totalisation circularity of meaningfulness-and-teleology\textsuperscript{19} of theoretically perfect/sound ontological-performance’-<including-virtue-as-ontology>’, as implied by this author’s notion of ontological-normalcy/postconvergence, operantly displays the philosophical tradition problem of constitutedness\textsuperscript{13} as failing to project of the transformational implications of human limited-mentation-capacity-deepening for successive prospective relative-ontological-completeness\textsuperscript{71}-of-reference-of-thought in bringing about successive registry-worldviews/dimensions as of conflatedness that prospectively ultimately grasps the centered-<amplituding/formative–epistemicity>totalising/circumscribing/delineating meaningfulness-and-teleology\textsuperscript{99} ontological-performance\textsuperscript{71}-<including-virtue-as-ontology> in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process\textsuperscript{67} or notional–deprocrypticism. Despite such a Derridean decentered-infinite-freeplay conception being the most radical attempt hitherto to overcome the philosophical tradition constitutedness\textsuperscript{13}, it perfectly grasps the implications to meaningfulness-and-teleology\textsuperscript{99} ontological-performance\textsuperscript{71}-<including-virtue-as-ontology> of ‘centered–epistemic-totalisation as of circularity of meaningfulness-and-teleology\textsuperscript{99} in relative deficient/flawed ontological-performance’-<including-virtue-as-ontology>’ but rather as within a same horizon of meaningfulness-and-teleology\textsuperscript{99} ontological-performance\textsuperscript{71}-<including-virtue-as-ontology>. However, it fails to grasp that such a centered–epistemic-totalisation itself arises because an axiomatic-construct is a circularity of meaningfulness-and-teleology\textsuperscript{99} ontological-performance\textsuperscript{71}-<including-virtue-as-ontology> of the very same <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-
thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’, with such a conceptualisation of centered–epistemic-totalisation also construed as transcendental centered–epistemic-totalisation or extrapolated-centered–epistemic-totalisation or extrapolatory–epistemic-totalisation or transcendental–epistemic-totalisation and reflects the reality that a Derridean decentered-infinite-freeplay can also be construed as an interpolatory–epistemic-totalisation or interpolated-decentered–epistemic-totalisation. For instance, we can grasp that ‘traditional classical mechanics axiomatic-construct’ is a given ‘centered–epistemic-totalisation circularity of <meaningfulness-and-teleology> of ‘the very same physics <amplituding/formative–epistemicity>totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ as of a prior relative-ontological-incompleteness of less ontological-performance <-<including-virtue-as-ontology> of ‘the very same physics <amplituding/formative–epistemicity>totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, while with human limited-mentation-capacity-deepening the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs brings about a new ‘centered–epistemic-totalisation/circularity of <meaningfulness-and-teleology> of ‘the very same physics <amplituding/formative–epistemicity>totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ as of prospective relative-ontological-completeness -of-axiomatic-construct-or- reference-of-thought as we can do more things with the latter axiomatic-construct more-profound/grander <meaningfulness-and-teleology ontological-performance <-<including-virtue-as-ontology>; and interestingly, physicists will surely fancy that they could do better in ultimately grasping theoretically the full-potency of existence divulgeable as of ‘the very same physics <amplituding/formative–
epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ with an ambition for a theory of everything. However, a Derridean decentered-infinite-freeplay is nevertheless critical as a first step for breaking away from a prior centered–epistemic-totalisation of a very same <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality in relative deficient/flawed ontological-performance^7-<including-virtue-as-ontology>, and thus by extension with regards to the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’ which is a given reference-of-thought, construed as ‘reference-of-thought—devolving-teleological-dementating/structuring/paradigming–of-meaningfulness’; and for all practical matters this has been the way Derridean deconstruction has been commonly applied as in effect all our meaningfulness-and-teleology^9 ontological-performance^7-<including-virtue-as-ontology> has been as of our positivism–procrypticism registry-worldview’s/dimension’s ‘reference-of-thought-as-of-‘‘reference-of-thought—devolving-teleological-dementating/structuring/paradigming–of-meaningfulness’ horizon and such a Derridean decentered-infinite-freeplay is an inspired conception providing the groundwork as its initiates the centered–epistemic-totalisation exercise for the insight of a futural différance as of the latter’s transcendental–epistemic-totalisation that underlies conflatedness in breaking with the philosophical tradition or human knowledge conceptualisation tradition or towards fulfilling the understanding of Being. In this regard talking about the physics example again, such a Derridean freeplay différance is akin to the ‘putting in question exercise’ that surrounds the cooperation/mutual-complementing-ideas-among-various-physicists leading up to the critical breakthroughs; which then establish such physics centered–epistemic-totalisation schemes as Newtonian physics and later on Theory-of-relativity and Quantum-mechanics, and today with
respect to various theoretical efforts with the potential of leading to a physics Theory of Everything. Inherent to futural différence is the notion of totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, as of beyond-the-consciousness-awareness-teleology-in-existential-extrication-as-of-existential-unthought, construed in the immediate-and-short-term as of ‘self-referencing’ as the uninstitutionalised-threshold temporal individuations circular undermining of the prospective institutionalisation reference-of-thought/de-mentative/structural/paradigmatic implied transformation/shift as transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as of prospective relative-ontological-completeness reference-of-thought, as well as the idea of temporal individuations ‘syncretising’ that underlies a spiralling crossgenerational increasing undermining of the uninstitutionalised-threshold reference-of-thought which is in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag with its ultimate crossgenerational collapsing for the prospective institutionalisation’s reference-of-thought; and so as of prospective social-stake-contention-or-confliction dynamism with increasing social universal-transparency–(transparency-of-totalising-entailing, as-to-entailing–totalising–in-relative-ontological-completeness) as of prospective relative-ontological-completeness reference-of-thought of the prospective institutionalisation’s reference-of-thought. Insightfully again, this idea of infinite-possibilities/circularity implied as of a Derridean infinite-decentered-freplay of a given meaningful-frame/axiomatic-construct/model such as mathematical models/axiomatic-constructs circularity is familiar to physicists and other scientists who understand that there is no infinity in the real-world/existence and infinity showing up in mathematical models/axiomatic-constructs point to the fact that there is a circular or undefined or undecidable problem arising from poor human limited-mentation-capacity conceptualisation implying the given mathematical
of ecstatic-existence/the-nature-of-the-world/conditions’ as reflected with any given explicited axiomatic-construct in the same way that insight/intuition is reflected rather with regards to any given implicated axiomatic-constructs; with an axiomatic-construct such as an idea or a concept or a notion or a theory being any conception as of ‘meaningfulness-and-teleology’ of supposed existential-implications correspondence. That is the traditional knowledge conception articulated as ‘axioms of logic’ is rather vague, with the appropriate articulation being rather ‘logic of axiomatic-construct/reference-of-thought’, as the axiomatic-construct/reference-of-thought is the effective human limited-mentation-capacity supposed correspondence relation with existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation <--as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporeticism-overcoming/unovercoming’> for human-subpotency possibilities for devolving ‘meaningfulness-and-teleology’ as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional—referential-notions/articulations/virtue, with increasing ontological-performance <--including—virtue—as-ontology> as of human transcendence; even though such a conception as ‘axioms of logic’ could be perceived rather as a meta-conception or more like a technical practicality akin to say the scaffolding of a building! In other words as the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, logic and by extension mathematics imply elaboration—as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity, whereas axiomatic-constructs as reflecting ecstatic-existence/the-nature-of-the-world/conditions are construed in affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring—<as-to-postconverging-or-dialectical-thinking—apriorising-psychologism> as of ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation. But
then as of ‘ontology of logic’ and ‘ontology of mathematics’ as their very own respective conceptualised meta-axiomatic-constructs as ontologies in terms of reflecting their philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’, both logic and mathematics are construed practically as formalisations which are mainly as such constructs of faithful/reproducible syntaxisation on the supposed basis of ‘smarter and simpler articulations’ for the sake of succinctness, clarity and fungibility; however, without the implication of any other inherent transcendental-enabling/sublimating/supererogatory-de-mentativity of such formalisations besides their succinctness, clarity and fungibility usefulness ‘thus-limitedly construed as their inherent meta-conceptualised ontological-veracity/axiomatic-construct of logic and mathematics transcendental-enabling/sublimating/supererogatory-de-mentativity’.

But then it is naïve to construe of mathematics, as logicists have tended to do, as essentially an exercise of mathematical formalisation. The fact is that mathematics have always been developed implicitly or explicitly in association with or inspired from the context/existential-contextualising-contiguity of other applied and transcendental-enabling/sublimating/supererogatory-de-mentativity activities as of their axiomatic-constructs development and mathematics very own existential-reality of developed axiomatic-constructs applicative orientation, including developing together with heavily dependent mathematics domains like physics, engineering, other applied sciences and statistical studies. This latter situation which is more real than generally said and makes of mathematics ‘a <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality created axiomatic-constructs’ and more so than the ‘abstract romantic image portrayed as of the mere manipulation of numbers and forms’ as if not inspired as of existential-reality contextuality itself. Thus naively taking
cue from the formalisation of mathematics as if it will enable the inherent transcendental-enabling/sublimating/supererogatory–de-mentativity of any discipline is bound to lead to disappointment, as the inherent axiomatic-constructs as theories, concepts, notions and ideas of the existential domain in question have to be critically developed as of existential-contextualising-contiguity\textsuperscript{10} knowledge-reification\textsuperscript{11} for logic and mathematics to then be relevant as of a secondary tool or at best a concomitant tool. In this regards, the “truly mathematical proof” (over and above any formal mathematical proof) is rather about validation/invalidation of any such mathematics as it can be so-demonstrable in the occurrence of existential phenomena/manifestations; even as such a mathematical demonstration is rather so ‘existentially nominal’ that such phenomenal/manifest veracity of mathematics is often for all practical purposes mostly overlooked by mathematicians when involved in their formalisation exercise including ‘formal proofs’ as to the fact that the existential validation/invalidation of mathematics is so nominally obvious that hardly any experimenting is warranted for confirmation and this existential nominalism can easily lead to a reductionist confusion that mathematics (as to its epistemic-conception phenomenal/manifest-subpotency\textsuperscript{12}–reflexivity,-in-the-full-potency-of-existence’s–sublimating–nascence\textsuperscript{13} with regards to the ontological-contiguity of existence’) is not priorly subject to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{14} (and this very insight about the ‘existentially nominal’ sublimating-validation/desublimating-invalidation of mathematics as of a ‘very existentially nominal supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibility/setup/measuringinstrument–for–conceptualisation as to the mere adequacy of formalised mathematics’ explains on the other hand why the mere introduction of mathematics, statistics and data in domains requiring ‘human corresponding-sublimation-inducing,-profound-and-creative
supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation’ is not construed as sublimating-validation in such domains where such mathematics, statistics and data are rather ‘distracting-from and not-contributing-to’ the inherent domain’s epistemic-conceptions phenomenal/manifest—subpotencies—in-transitive—conflatedness—reflexivity,—in-the-full-potency-of-existence’s—sublimating—nascence> given ‘human corresponding—sublimation-inducing,—profound—and—creative supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation’). In physics the Newtons, Leibnizes, Einsteins, Poincarés, Schrodingers, Bohrs had to elicit the transcendental-enabling/sublimating/supererogatory—in-mentativity of the physics <amplituding/formative—epistemicity>totalising—devolved—purview/domain-of—construal-as—intrinsic—reality/ontological—veridicality/existential—reality created axiomatic—constructs with mathematics being accessory to the transcendental—enabling/sublimating/supererogatory—in—mentativity. They didn’t just start to develop ‘patterns of mathematical equations’ without the prior insight about the physics domain-of-study and what to strive for, and actually from that ‘physics reality precedence perspective’ got the insight to further develop their relevant branches of mathematics. Nor do even pure mathematicians just go about constructing ‘mathematical patterns’ as of formalisation without striving to get insight and inspiration from existential—reality as transcendental—enabling/sublimating/supererogatory—in—mentativity; and we can appreciate in this regards how the human mathematical disposition adjust from a classical reflex with regards to existential phenomena/manifestations that assume a non-classical character like statistical—constructs, quantum phenomena, black holes, etc. as to existence—as—sublimating—withdrawal,—eliciting-of—prospective—supererogation”. The naivety of logicism lies exactly in this respect of construing
formalisation as most of what is supposed to be achieved, and failing to grasp that when it comes to social reality its own transcendental-enabling/sublimating/supererogatory-de-
mentativity has to be ‘creatively construed’, and this in many ways explains the frustrated conclusion that will often then arise from such a naïve formalisation perspective that the philosophical exercise is not necessarily transcendental-
enabling/sublimating/supererogatory-de-mentativity, contrary to the precept of all other knowledge! Thus the conceptualisation of logic implied by any given registry-
worldview/dimension reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to-‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’ points to the fact that the various registry-worldviews/dimensions operate their own conception of logic as of their prospective relative-ontological-completeness reference-of-thought; as we can appreciate inherently as of metaphysics-of-absence-⟨implicitied-epistemic-veracity-of-
onpresencing-⟨perspective–ontological-normalcy/postconvergence⟩⟩ that however deficient, that each registry-worldview/dimension does have its own sense of logic as of its self-conscious construed ‘meaningfulness-and-teleology’. The notion of an absolutely valid logic can only arise on the backdrop of an absolutely valid reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as implied by futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective deprocrypticism—or–preempting—disjointedness-as-of’ reference-of-thought registry-worldview/dimension institutionalisation, wherein such a logic is its ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. In this regard, the link-up of all the concepts and notions articulated herein
by this author speaks of ‘suprastructural logic’ that is critically articulated as of a prospective notional-deprocripticism psychoanalytic-unshackling metaphysics-of-absence-(implicit-epistemic-veracity-of-nonpresencing-perspective-ontological-normalcy/postconvergence)- and conflatedness, and further subsumed in the word candidity or candour-capacity. Such ‘suprastructural logic’ is even more damning about the naïve constitutedness of meaningfulness-and-teleology that besets the knowledge and philosophical tradition. Such a conception of logic and logical analysis points to the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag naivety and vagueness involved when construing logic and logical analysis as absolute without any explicitly implied or formulated reference-of-thought, construed as ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness’; usually in our case, in a non-transcendental totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag that is unconsciously implied as of our positivism-procripticism registry-worldview/dimension. Insightfully, such a ‘suprastructural logic’ undermines metaphysical notions like good, essence and truth as being naively construed as of a given registry-worldview’s/dimension’s totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of meaningfulness-and-teleology, and in lieu emphasises Being construed as ontology’s-directedness-as-Being which best reflects and captures meaningfulness-and-teleology as of ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality instigated ontological-contiguity—of-the-human-institutionalisation-process as of difference-conflatedness-as-to-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism instigated causality—as-to-projective-totalitative-
implications,-for-explicating-ontological-contiguity’. Being as of its implied notional–deprocrypticism’s conflatedness provides elucidation to such question as: what is the meaning of good/truth/essence in a recurrent-utter-institutionalised, an ununiversalised or a non-positivistic society? And invariably the answers will be a vague as of each registry-worldview/dimension, and it is rather the emanant insight of the-Good/understandingknowledge-reification'/ontological-prime-movers-totalitative-framework' conceptualisation as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology that carries the prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity which are the resolution of the successive prior registry-worldview’s/dimension’s uninstitutionalised-threshold vices-and-impediments; and so by successive Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process as base-institutionalisation,  universalisation and positivism respectively, and prospectively deprocrypticism. Being construed as of ontology’s-directedness-as-Being thus enables the superseding of <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as metaphysics-of-presence-(implicit–nondescript/ignorable–void ’-as-to–’presencing—absolutising-identitive-constitutedness ). Further, the fact is that it is rather axiomatic-construits whether explicit or implicit that are supposedly in a correspondence relation with an epistemic-totalising ~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality as of their given meaningfulness-and-teleology ontological-performance-<including-virtue-as-ontology> as validated by
discontiguity/epistemic-discontiguity→<shallow-supererogation→of-mentally-aestheticised→preconverging/dementing→qualia-schema>, and so with regards to ‘the very same physics ‹amplituding/formative–epistemicity›totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. Such mutual unintelligibility, with regards to reference-of-thought, speaks of differing ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as axiomatic-construct’ of the differing references-of-thought, with the traditional philosophical and knowledge anti-psychologism stance fundamentally grounded on a mix-up about the nature of ‘axioms wrongly construed as elements of logic’ as implied with statements like ‘axioms of logic’ rather than the fact that axiomatic-constructs are ‘ontological wholes of correspondence’ as of supposed correspondence with ‹amplituding/formative–epistemicity›totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality and thus carry transcendental-enabling/sublimating/supererogatory→de-mentativity implications as of human limited-mentation-capacity-deepening’, whereas logic and logical analysis is rather the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ and at best yields formalisations grounded on the implied ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as axiomatic-construct’ but doesn’t reify meaningfulness-and-teleology as knowledge which can only arise as of the ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring-<as-to-postconverging-or-dialectical-thinking→apriorising-psychologism> of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as axiomatic-construct’. Such a logicism disposition is rather in constitutedness and is behind such naïve
not as an external speculative dialectics, but as a wholly internal natural dialectics in conflatedness as of human limited-mentation-capacity-deepening. Such that human phenomenological <amplituding/\text{formative-epistemicity}>\text{totalising-throwness-in-existence} (I exist therefore existence is of transcendental-enabling/sublimating/superragatory-dementativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance\text{<including-virtue-as-ontology>} is the ‘complete scientific archaeological depth’ for grasping ontology and Being as of the conflatedness of human limited-mentation-capacity implications construed from notional-deprocrypticism perspective as \text{historiality/ontological-eventfulness}/ontological-aesthetic-tracing, and consequently doesn’t carry any external ideological implication but rather for the inherent ontological and Being implications. Further as of such phenomenological transcendental conflatedness, there is no issue about existence itself as it is pre-given, as existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency\text{~sublimating\textendash}nascence,-disclosed-from-prospective-epistemic-digression-as-of-\text{amplituding/\text{formative-epistemicity}}\text{totalising-}renewing-realisation/re-perception/re-thought,-in-superragatory-epistemic-conflatedness, but rather an issue to humankind arising as of human-subpotency in the full-potency of existence with all the problem of existence being the issue of humankind’s limited-mentation-capacity implications as failing Being-development/ontological-framework-expansion\text{~to-depth-of-ontologising-development-as-infrastructure-of\textendash}meaningfulness-and-teleology as of ontology’s-directedness-as-Being. The phenomenological insight here about the nature of ‘existence as so construed as of ontology’s-directedness-as-Being’ is that Being is the conflatedness as of intemporal-preservation-entropy-or-contiguity\textendash}or-ontological-preservation selectivity inherent in existence that rather skews presence states towards the ‘ontological statistical-exception’ of intemporality/longness over temporality/shortness possibilities, thus rendering existence as of relative teleological orderliness and not teleological chaos in the case were all ontological-
possibilities as of temporality\textsuperscript{59}-to-intemporality\textsuperscript{61} were to be arising in equivalence/equal-measure. Thus, such ontology’s-directedness-as-Being conflatedness\textsuperscript{7} <amplituding/formative–epistemicity> causality-as-to-projective-totalitative–implications,–for-explicating-ontological-contiguity\textsuperscript{66} as of maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation existentially supersede abstract/imagined/misconstrued/virtual constitutedness\textsuperscript{12} possibilities as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity\textsuperscript{19} implications that are effectively as of non-existence. The further implication is that human ‘prior existential-reality insight as arising by conflatedness as of the coherence/contiguity of ontology’s-directedness-as-Being’ rather ‘points to the ontological-veracity of prospective existential-reality as of conflatedness\textsuperscript{2} upholding prospective coherence/contiguity of ontology’s-directedness-as-Being’; wherein as of human-subpotency the ontological-veracity in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process\textsuperscript{7} as leading up to our present positivism/rational-empiricism registry-worldview/dimension speaks of a conflatedness\textsuperscript{7} as of successive opened-constructs-of—meaningfulness-and-teleology\textsuperscript{9} superseding <amplituding/formative>wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable–void’-with-regards-to-prospective-apriorising-implications>) and from which Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\textsuperscript{9} exercise we can’t as of soundness-or-ontological-good-faith/authenticity\textsuperscript{5} exculpate ourselves to then pretend ours is the registry-worldview/dimension reference-of-thought that is non-transcendable as of our <amplituding/formative–epistemicity>totalising–self-referencing-synergy/circularity/interiorising/akrasiatic-drag, when the insight of prospective
transcendence-and-sublimity/sublimation/supererogatory–de-mentativity implications as of
ontology’s-directedness-as-Being is necessarily the requisite mental-disposition for the ‘inventing’ of prospective institutionalisation as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality construed as prospective ontology’s-directedness-as-Being; and so, overcoming temporal/shortness-of-register-of—meaningfulness-and-teleology on wooden-language—(imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing narrations—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology as of uninstitutionalised-threshold—failing intemporal-preservation-entropy-or-contiguity—or—ontological-preservation. Ultimately, phenomenology is all about grasping the conflatedness of ontology’s-directedness-as-Being. Furthermore, just as a transcendental-enabling/sublimating/supererogatory—de-mentativity biological science in relative ontological-contiguity of reference-of-thought will dissociate modern day heredity DNA genetics as of its theoretical, conceptual, methodological, operant and applicative implications from say th century Mendelian heredity however its inherent merits, and will not naively purport to analyse the former on the grounds of the latter which as axiomatic-construct is in relative notional-discontiguity/epistemic-discontiguity—shallow-supererogation—of-mentally-aestheticised—preconverging/dementing —qualia-schema> on the basis of a naïve conceptual patterning implied as of the common term ‘heredity’; this author likewise is very much critical and averse to such conceptual patterning mental-reflexes imbued in traditional non-transcendental philosophical and knowledge analysis all too ready to construe and articulate meaningfulness-and-teleology in sophistic/pedantic conceptual patterning terms overlooking transcendental-enabling/sublimating/supererogatory—de-mentativity implications, and failing to fathom that conceptual patterning is no substitute for transcendental-enabling/sublimating/supererogatory—de-mentativity work required for all knowledge
notwithstanding setbacks and failures that may be involved, given the reality that human
meaningfulness-and-teleology\textsuperscript{99} ontological-performance\textsuperscript{100} -<including-virtue-as-ontology>
arises as an exercise of human limited-mentation-capacity-deepening\textsuperscript{18} as of relatively profound

intrinsic-reality/ontological-veridicality! Consider for instance criticisms often levied against
post-structuralism and specifically Derridean deconstruction as simply convoluted expressions
of familiar and trite ideas. But then the effective transcendental-enabling/sublimating/supererogatory-de-mentativity insight as of their applications arising in
the social sciences and literal studies clearly demonstrate otherwise. Further many such
critiques have tended to be naïve about what passes for theory whereby naïve conceptual
patterning of general knowledge are articulated devoid of ‘new theory’, with little or no
transcendental-enabling/sublimating/supererogatory-de-mentativity implications, which in
reality is nothing more than a sophistry of argument from authority. This conception of
relatively profound and complete axiomatic-constructs\textsuperscript{17} reference-of-thought in ontological-

The purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality. The totalising–renewing-realisation/re-perception/re-thought involves taking cue from existence/existential-contextualising-contiguity/contexts as of existential-instantiations imbricatedness/threadedness/recomposing in a maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation exercise as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality; wherein say with a demand curve, the insight as of human limited-mentation-capacity-deepening of a significant rise in consumers’ salaries implies that everything else being equal the demand curve-axiomatic-construct will shift to the right as of relative ontological-contiguity. The notion of axiomatic-construct in ontological-contiguity arises out of its existential completeness and profundness, for instance the axiomatic-construct in ontological-contiguity as concept of a bicycle arises by the completeness and profoundness of the bicycle in its existential wholeness of functionality and contents as its ontological-contiguity. ontological-contiguity rather highlights relative perspectives as of ontological-normalcy/postconvergence depths of axiomatic-construct/reference-of-thought of construal; which for instance renders the idea of general relativity in relative ontological-contiguity and newtonian physics in relative notional-discontiguity/epistemic-discontiguity -<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema> rather as uncorrelated, whereas a notion of ‘continuity of ontology’ as is implied by ‘ontological-continuity as of relative ontological-continuity and relative notional-discontiguity/epistemic-discontiguity -<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema>’ will seem to imply correlatedness by the very nature of the term continuity. Ultimately, the overall analysis above points out that this is not an inherent ontological-as-of-the-full-potency-of-existence’s–sublimating–nascence problem but rather a problem of human-
subpotency as of its limited-mentation-capacity that is resolvable by the deepening of human limited-mentation-capacity as of de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) with respect to reference-of-thought; as contrary to the ‘Derridean différance decentering’ freeplay that is entrapped in circularity of meaningfulness-and-teleology\textsuperscript{99} on the wrong implied assumption of the same perpetual horizon as registry-worldview/dimension reference-of-thought so-implied as of our positivism mental-disposition, a ‘futural différance’ recognises that human limited-mentation-capacity transcendence-and-sublimity/sublimation/supererogatory-de-mentativity brings about prospective relative-ontological-completeness of reference-of-thought, and thus it centers-as-postconverging-or-dialectical-thinking\textsuperscript{55}—apriorising-psychologism the prospective institutionalisation’s reference-of-thought-as-of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of its prospective relative-ontological-completeness of reference-of-thought to override the circularity as notional-discontiguity/epistemic-discontiguity<shallow-supererogation-of-mentally-aestheticised—preconverging/dementing—qualia-schema> of meaningfulness-and-teleology\textsuperscript{99} implications of the uninstitutionalised-threshold reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of its prior relative-ontological-incompleteness of reference-of-thought with respect to the very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to—human<amplituding/formative—epistemicity>totalising—purview-of-construal’, and thus broadening human-subpotency in the full-potency of existence/existential-possibilities as implied retrospectively to prospectively with the ontological-contiguity of-the-human-institutionalisation-process\textsuperscript{67} as of notional—deprocrypticism. What underlies such a centered—epistemic-totalisation as of its transcending nature, is that given humankind’s limited-mentation-capacity as of human-subpotency in its <amplituding/formative—

The latter highlights the recurrence of such ‘uninstitutionalised-threshold’ phenomena as <amplituding/formative> wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology-as-of-'nondescript/ignorable–void 'with-regards-to-prospective-apriorising-implications>) and institutionalised-being-and-craft. For instance, the successive registry-worldviews/dimensions institutionalisations conceptualisation of meaningfulness-and-teleology have arisen as secondnatured constructs that have substituted for their uninstitutionalised-threshold free-for-all <amplituding/formative> wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology-as-of-'nondescript/ignorable–void 'with-regards-to-prospective-apriorising-implications>) framework, such that many a subject matter domain like the heavens, forces of nature, material nature, social laws, etc. are now effectively construed socially as of institutional and formal deferential-formalisation-transference as abstract intemporal/ontological-driven conceptualisation as of respectively formal religion, formal science, legal system, etc. voiding free-for-all construals as of temporal social-aggregation-enabling teleological dispositions as of respectively animistic dispositions, alchemic and essences-driven explanation of nature, crude mob justice, etc. Insightfully, as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor, anthropologists are very much aware that the social diffusion of new transcendental-enabling/sublimating/supererogatory-dementativity practices into a given society are more likely to be adopted as of the society’s
institutional and formal percolation-channelling—<in-deferential-formalisation-transference> framework than as of an dimensionality-of-sublimating—<amplituding/formative–supererogatory–de-mentativity/epistemic-growth-or-conflatedness/>transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation ‘direct convincing’ at individuals-level underlying deferring to institutional and formal <meaningfulness-and-teleology/> as of the need for profoundness and rigour that doesn’t avail in ordinary thought for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. Likewise, on occasion in the face of prior institutionalisation established and perceived vested interest such intemporal-as-ontological <meaningfulness-and-teleology/> could be ontologically undermined as of institutionalised-being-and-craft. Consider in this regard Establishment efforts undermining the Diderot-led Encyclopédistes project. Furthermore, every registry-worldview/dimension relates to its value construct as of its prior relative-ontological-incompleteness <reference-of-thought constitutedness/> as more or less absolute, and doesn’t factor in that its prior relative-ontological-incompleteness <reference-of-thought/> is a de-mentative/structural/paradigmatic deficiency inducing the <amplituding/formative–epistemicity/>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of its value construct. But then prospective institutionalisation necessarily implies a notion of prospective value construct as of its prospective relative-ontological-completeness <reference-of-thought conflatedness/> which will be unintelligible to the prior value construct, such that it is only a sense of intemporal consummation that drives transcendental dispositions as it is paradoxical to expect that what is in need for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity acts as transcended, as transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is inevitably and so across all registry-worldviews/dimensions a state of paradoxical conflictedness as more profoundly
social-setup is de-mentatively/structurally/paradigmatically a framework where individuals are naturally involved in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities, and thus individuals and social groups are not in an absolutely given/set self-referencing centered–epistemic-totalisation-facticity of ‘meaningfulness-and-teleology’ within their social-setup and are predisposed on critical occasions as of syncretising-effecting to ‘reinvent’, circumvent or adapt as to what they perceive as optimum existential possibilities, such that a social-setup is already involved internally however restricted in its very own reinvention/circumventing/adaptation as of its very own internal ‘self-referencing and syncretising-effecting construed as &lt;amplituding/formative–epistemicity&gt;totalising–self-referencing-syncretising’ of ‘meaningfulness-and-teleology’ with regards to perceived social-stake-contention-or-confliction; and it is this element that enables all human societies to have a minimal opening/overture/receptivity to each other, including at the very extreme between an industrial age society and a hunter-gatherer society. Without such a de-mentative/structural/paradigmatic ‘self-referencing and syncretising-effecting construed as &lt;amplituding/formative–epistemicity&gt;totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag human nature’, both internal social transformation however lethargic and cultural diffusion will be basically impossible, and &lt;amplituding/formative–epistemicity&gt;totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag induced transformation arises because human perceived social-stake-contention-or-confliction drifts within-and-across social-setups whether with regards to basic trading, curiosity, social competition and generally as of a predisposition to achieve optimum existential possibilities. In this regard, the rapid transformation implications of cultural diffusion arise because it makes relatively immediately available to individuals and social groups a comprehensive set of options however limited the
nature and speed of their adoption. This syncretising-effecting mechanism ultimately explains why crossgenerational transcendence-and-sublimity/sublimation/supererogatory-de-mentativity occurs notwithstanding a seemingly self-referencing centered-epistemic-totalisation-facticity of meaningfulness-and-teleology within a given social-setup in the immediate-and-short-term. transcendence-and-sublimity/sublimation/supererogatory-de-mentativity as of prospective relative-ontological-completeness-reference-of-thought occurs because de-mentatively/structurally/paradigmatically it is social-dispositions and mental-dispositions of intemporal-as-ontological nature as of longness-of-register-of-meaningfulness-and-teleology given their supposedly coherent ontological-commitment as of more profound ontological-primemovers-totalitative-framework validation as to existence-potency-sublimating-nascence-disclosed-from-prospective-epistemic-digression-as-of-⟨amplituding/formative-epistemicity⟩totalising-renewing-realisation/re-perception/re-thought,-in-supererogatory-epistemic-conflatedness, re-originary-as-unenframed/unbeholdening/outlier-conceptualisation⟨imbued-postconverging/dialectical-thinking-projective-insights/epistemic-projection-in-conflatedness-of-notional-deprocrypticism-prospective-sublimation⟩, that are most likely to be syncretised crossgenerationally as providing the most overall positive-opportunism by their relative universal projection implications and are formally-and-overtly assumed, and so over temporal-as-ontologically-flawed social-dispositions and mental-dispositions which are more or less formally-and-overtly unassumed as of their temporal denaturing nature or poor universal projection. However, such a conception of supposedly coherent ontological-commitment is not actively contemplated socially but occurs latently and passively with any given registry-worldview’s/dimension’s institutionalisation meaningfulness-and-teleology as its inherent social-dispositions and mental-dispositions are rather as of beyond-the-consciousness-awareness-teleology-⟨in-existential-extrication-as-of-existential-unthought⟩.
with regards to such transcendental implications! Despite the fact that all social-setups tend to be surreptitiously permeated with individuals temporal/shortness-of-register-of-meaningfulness-and-teleology social-dispositions and mental-dispositions of suboptimal ontological implications for social-functioning-and-accordance—as-of-social-stake-contention-or-confliction, every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s reference-of-thought–categorical-imperatives/axioms/registry-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations. It may thus seem from within just one human generation perspective that the underlying human metaphoricity for transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity is rather marginal especially when not associated with any external cultural diffusion. However, human metaphoricity as of cultural transformation had tended historically, in the main, to ebb in peaks and lows, and so as of the relative universal-transparency-{transparency-of-totalising-entailing,-as-to-entailing-amplituding/formative–epistemicity}totalising–in-relative-ontological-completeness about such metaphoricity instigative reproducibility—mathesis/motif/throwness-disposition,—as–reproducibility-of-aestheticisation direct, indirect and/or devolving implications. The fact that individuals in a social-setup are already involved internally however restricted in its very own reinvention/circumventing/adaptation in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities and is thus of a minimal opening/overture/receptivity to internal and external metaphoricity, also critically speaks to the fact that any social-setup is only able to hold together because of supposedly coherent ontological-commitment that is subject to existence-potency–sublimating–nascence,—disclosed-from-prospective-epistemic-digression-as-
of <amplituding/formative–epistemicity>totalising-renewing-realisation/re-perception/re-thought, in supererogatory–epistemic-conflatedness totalitative-framework. As of its circularity, the lack or poorer cause-and-effect determinism of any such supposedly coherent ontological-commitment threshold of a social-setup ‘meaningfulness-and-teleology’ allows for the possibility for prospective metaphoricity to reconstrue-and-redefine the social-setup ‘meaningfulness-and-teleology’. Such prospective metaphoricity possibility cannot be preempted because even the social-setup conventioning in its functional operation of ‘meaningfulness-and-teleology’ needs this supposedly coherent ontological-commitment in order to affirm itself over any spontaneously arising disruptive ‘meaningfulness-and-teleology’ that may be articulated by individuals or groups, with the result that a social-setup ever always exposes itself to prospective metaphoricity in one way or the other when such spontaneously arising disruptive ‘meaningfulness-and-teleology’ is not of poorer but rather of a superseding ontological-primemovers-totalitative-framework for explicating-ontological-contiguity as of the social-setup given supposedly coherent ontological-commitment. We can consider in this regard that an animistic non-positivistic or medieval non-positivistic social-setup will certainly imply a supposedly coherent ontological-commitment respectively as of superstitious spiritualism ‘meaningfulness-and-teleology’ or scholasticism pedantic dogmatism ‘meaningfulness-and-teleology’, as of the given social-setup ‘self-assuredness-of-ontological-good-faith/authenticity–as-being-as-of-existential-reality with respect to its social-stake-contention-or-confliction’ in its capacity to demonstrably and objectively uphold and function going by its specific registry-worldview/dimension as of superstitious spiritualism or scholasticism pedantic dogmatism. It is exactly this ‘self-assuredness-of-ontological-good-faith/authenticity–as-being-as-of-existential-reality with respect to its social-stake-contention-or-confliction’ that equally makes available the possibility
for prospective metaphoricity\(^5\) to demonstrably undermine the implied supposedly coherent ontological-commitment\(^6\) of such prior social-setups registry-worldview/dimension\(^7\) meaningfulness-and-teleology\(^8\), and so as of the prospectively induced ontological-primemovers-totalitative-framework\(^9\) superseding \(^2\) meaningfulness-and-teleology\(^8\) as from existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflicatedness\(^2\) epistemic/notional–projective-perspective of relative-ontological-completeness\(^7\)–of–reference-of-thought by way of ontological-primemovers-totalitative-framework\(^2\) such as with prospective positivism/rational-empiricism \(^1\) meaningfulness-and-teleology\(^8\). However, given the inherence of social-stake-contention-or-confliction, inevitably prospective metaphoricity\(^5\) undermines vested interests as of the direct, indirect and/or devolving implications of prospective metaphoricity\(^5\) and by that token elicit sophistic/pedantic inclinations to such prospective metaphoricity\(^5\) meaningfulness-and-teleology\(^8\). Further any such prospective metaphoricity\(^5\) ultimately takes hold rather as of within the social deferential-formalisation-transference framework wherein it is driven by a sense of positive-opportunism\(^9\) as of particular and general social interest. That said, a social-setup is ever always ‘existentially invested’ to a given registry-worldview/dimension and the fact of greater existential-contextualising-contiguity\(^1\) knowledge-reification\(^3\) from prospective metaphoricity\(^7\) which may involve undermining such ‘existentially invested’ registry-worldview/dimension in its <amplituding/formative> wooden-language-{imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology\(^8\)-as-of-‘nondescript/ignorable–void’-with-regards-to-prospective-apriorising-implications>} means that it doesn’t necessarily construe such prospective metaphoricity\(^5\) as pertinent and so where it is nihilistically disinclined by its <amplituding/formative–epistemicity>totalising–self-referencing-
prospective secondnatured institutionalisation rather occurs as of the superseding of <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag untransvaluated–temporal-intemporality. Ultimately, prospective metaphoricity in a reflection of the individual-as-receptable-of-temporal-to-intemporal-individuations realistically implies that it is rather fundamentally a question of grasping the mechanism that tips the balance towards human intemporality /longness and subsequent prospective institutionalisation which is ontologically sufficient for prospective ontological-effectiveness, rather than a naïve engagement as if the human is all-essentially intemporal-as-of-an-absolute-ontological-commitment -disposition. More critically, such a conception of prospective metaphoricity cognisant of the decisiveness of deferential-formalisation-transference for institutionalisation and thus subsequent social percolation-channelling-<in-deferential-formalisation-transference>, come to grasp that sophistic/pedantic predispositions are the more salient entrenched interests beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought> with respect to prospective metaphoricity as of the implications of such undermining of social deferential-formalisation-transference. In this regard, the sophistic/pedantic barriers to futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism metaphoricity implications are necessarily spurious and associated with our positivism–procrypticism institutional-being-and-craft as of the direct, indirect and/or devolving prospective metaphoricity implications. We can appreciate in this regard that for the medieval-scholasticism-pedants—ideal-type-or-individuation, it doesn’t matter that budding-positivism can be demonstrated as more ontologically pertinent as of ontological-prime movers-totalitative-framework, so long as it is socially and institutionally credible to uphold non-positivism meaningfulness-and-teleology in effect by undermining its
deferential-formalisation-transference. It is with regards to such sophistic/pedantic disinclination to prospective metaphoricity that the latter elicits contortioning gesturing, wherein for instance Socrates with respect to the sophists—ideal-type-or-individuation (as we can appreciate that however say a Protagoras engagement with Socrates may project coherence as of his contextual appreciation of Socrates predisposition for coherence, this doesn’t exclude the possibility of a ‘floating sophistic’ inclination that simply adjusts to its interlocutor thus undermining in the bigger picture the notion of knowledge as of universal coherence idealisation, or still maybe Protagoras is just at the lower end of the sophists—ideal-type-or-individuation) and budding-positivists with respect to medieval-scholasticism-pedants—ideal-type-or-individuation (as we can appreciate that the recognition and then censure and then banning of Copernicus’s heliocentric world work or engagement with Galileo’s support of heliocentrism then his persecution for publishing, rather speaks dementatively/structurally/paradigmatically of the covert/underhanded nature of the medieval establishment pedantic disposition as of the implications of ideas undermining medieval dogma as of social-stake-contention-or-confliction) construe of such sophistic/pedantic disinclination as implying notional-discontiguity/epistemic-discontiguity-<shallow-supererogation>-of-mentally-aestheticised–preconverging/dementing –qualia-schema> with their prospectively implied metaphoricity; with the consequence that there can’t be common/mutual aposteriorising/logicising/deriving/intelligising/measuring as of dialogical-equivalence and intellectual-and-moral-equivalence and inherently so because of the sophists—ideal-type-or-individuation and medieval-scholasticism-pedants—ideal-type-or-individuation inauthentic/unsound apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as of respectively non-universalising and non-positivism/medievalism dogma prior relative-ontological-incompleteness–of–reference-of-thought warranting their unaffirmation/deprojection/de-

Actually such an ordinary mental-reflex of a ‘neuter framework of reference-of-thought putting the notional—firstnaturedness—temporal-to-intemporal-dispositions as of the same axiomatic teleological projection’ when it comes to social-stake-confliction-or-contention is only valid as of ‘mutual conceptualisation as of a given institutionalisation with a common ontological-reference-of-thought’ wherein it is then strictly a matter of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation in determining ontological-veracity. But then at such a registry-worldview’s/dimension’s institutionalisation’s uninstitutionalised-threshold, there is a relative variance of ontological-completeness-of-reference-of-thought as of the prospective relative-ontological-completeness of reference-of-thought in intemporality/longness entailing the prospective institutionalisation and the prior relative-ontological-incompleteness of reference-of-thought in temporality/shortness entailing the uninstitutionalised-threshold; thus implying a relative variance in such intemporal and temporal teleological projection respectively as of elevated-devolving-as-of-prospective-institutionalisation and teleologically-degraded-devolving-as-of-uninstitutionalised-threshold in determining ontological-veracity. In this sense we can garner that it is inappropriate to imply a ‘neuter framework of reference-of-thought putting the notional—firstnaturedness—temporal-to-intemporal-dispositions as of the same axiomatic

The fact of temporal-to-intemporal variance of prospective relative-ontological-completeness\textsuperscript{17}–of– reference-of-thought ultimately reflects the fact that the apparent ordinarily assumed ‘axiomatic commonness-in-sharedness of human \textsuperscript{57}meaningfulness-and-teleology\textsuperscript{69} with regards to the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to–‘human<amplituding/formative–
temporal-mental-dispositions and storied background of ontologically-veridical-inherent-superseding-existential-reality-unattached-to-such-temporal-mental-dispositions portrays how a storied-construct/ontologically-valid-narration can be articulated as of beyond-the-consciousness-awareness-teleology\(^2\)-<in-existential-extrication-as-of-existential-unthought>\(^7\) ‘emphasising exclusively that it is the construal of human temporality -to-intemporality\(^4\) limited-mentation-capacity transversal-and-cumulative-implications’ that accounts for ontologically-veridical human character-and-social-formation-dynamics as of both uninstitutionalised-threshold\(^0\) representation and prospective-institutionalisation representation. Such a storied-construct/ontologically-valid-narration is ultimately articulated rather as of the implications of the failing to uphold Being as of the temporal-to-intemporal transversality-of-affirmative-and-unaffirmative–disambiguated-‘motif-and-apriorising/axiomatising/referencing\(^1\) of human limited-mentation-capacity in temporal constitutedness\(^3\) mental-reflexes at presence \(^5\) reference-of-thought, and so reflected by the implied intemporal conflatedness\(^1\) of phenomenological transcendence-and-sublimity/sublimation/supereorogatory–de-mentativity as of notional–deprocrypticism. We can appreciate the metaphysics-of-absence-(implicit-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>) insight about such a deneuterising\(^6\) storied-construct/ontologically-valid-narration from the fact that a non-positivism/medievalism or animistic social-setup is ‘not committed in a <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akraisiatic-drag\(^3\)’ to positivistic/rational-empiricism \(^5\) meaningfullness-and-teleology with regards to occurrences and incidents best explained and dealt with by such positivistic meaningfulness as of the latter’s prospective relative-ontological-completeness\(^8\) -of- reference-of-thought. As such non-positivism/medievalism or animistic social-setup ‘will not be self-effacing as of its ontologically-flawed <amplituding/formative–epistemicity>totalising–self-referencing-
syncretising/circularity/interiorising/akrasiatic-drag -temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about its uninstitutionalised-threshold of non-positivism and the prospective institutionalisation of positivism’. This equally explains how our positivism–procrypticism mental-disposition is construed in deneuterising from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notion-al–deprocrypticism perspective ‘as not self-effacing as of its ontologically-flawed <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag -temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about the uninstitutionalised-threshold of its procrypticism–or–disjointedness-as-of reference-of thought and the prospective institutionalisation of deprocrypticism’. This is actually the ontologically-veridical phenomenological transcendental framework for construing/conceptualising human temporal character and social formation mental-dispositions as of uninstitutionalised-threshold and prospective-institutionalisation based on the dynamics of limited-mentation-capacity, unlike a naïve neuterising mental-reflex that by its <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag fails to attain such a conflatedness as of notional–deprocrypticism deneuterising insight. Central and critical to achieving such a deneuterising analysis in grasping the full and complete possibilities of ontologically-veridical construal of human meaningfulness-and-teleology given human temporal-to-intemporal mental-dispositions as of prospective institutionalisation and uninstitutionalised-threshold is the notion of beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>. It is exactly what renders a veridical ontological-escalation or aetiologisation of the human condition possible as the historicity/ontological-

that what is most relevant to the individual is the practicality as of their ‘rationalising threads of part-conviction-as-to-profound-supererogation’–or–part–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation perception-and-relation to meaningfulness-and-teleology over just abstract universal propositions, when it comes to social-stake-contention-or-confliction social-functioning-and-accordance constraints such temporal part-conviction-as-to-profound-supererogation–or–part–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation mental-dispositions tend to be ultimately translated decisively onto issues of public repercussions like corruption, mismanagement, nepotism, etc. It is very much naïve to imagine that as of such uninstitutionalised-threshold as of Being/ontological-framework-expansion underdevelopment, individuals in positions of social-stake-contention-or-confliction with respect to upholding/failing probity will simply adhere, at the exclusion of engrained-habits-and-mental-dispositions, to mere propositions of probity rather than in the face of weak-institutional-constraints-and-penalties to perceive such universal propositions as mere linguistic appendages of relative practical insignificance. The notion of beyond-the-consciousness-awareness-teleology–<in-existential-extrication-as-of-existential-unthought> is the effective and credible deneuterising enabling articulation that grasps such an ontologically flawed mental-reflex that recurrently permeates consciously and unconsciously human phenomenological mentation, as it ‘credibly’ grasps-and-accounts-for, without resorting to any neuterising, the full and complete possibilities of human mental-dispositions as of the exclusive dynamics of human limited-mentation-capacity across all registry-worldviews/dimensions involving the conjugation of the intemporal/longness-of-register-of–meaningfulness-and-teleology individuation and temporal/shortness-of-register-of–meaningfulness-and-teleology individuations of postlogism-slantedness/ ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-
discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguanted as of "reference-of-thought-devolving-ontological-performance"-<including-virtue-as-ontology>. Ultimately, the notion of beyond-the-consciousness-awareness-teleology"-<in-existential-extrication-as-of-existential-unthought> given its psychoanalytic-unshackling as of prospective deprocrypticism transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, points to a self-consciousness that should rather come to terms with the reality of human limited-mentation-capacity dynamics as of temporal-to-intemporal mental-dispositions resolved beyond just the notion of "reference-of-thought-categorical-imperatives/axioms/registry-teleology" but rather their protraction as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality conflatedness of Being as implied as of deprocrypticism—or-preempting—disjointedness-as-of-reference-of-thought. The issue of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-teleology or Being underdevelopment is associated with that of the construal of knowledge as organic-knowledge or mechanical-knowledge respectively; with the latter construed as of the ‘mere effecting possibilities of knowledge’ without a coherence/contiguity with the ‘knowledge inventing’ mental-disposition as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality behind the given knowledge, as implied with organic-knowledge. It is such a mechanical-knowledge as of ‘temporal/shortness-of-register-of-meaningfulness-and-teleology’ mental-dispositions towards the mere effecting possibilities of the knowledge’ that induces the forgetting of Being construed as ontology’s-directedness-as-Being, by undermining the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality upholding of
intemporal-preservation-entropy-or-contiguity—or—ontological-preservation that is behind organic-knowledge. Human <amplituding/formative–epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal mental-dispositions as of beyond-the-consciousness-awareness-teleology<sup>1</sup>-<in-existential-extrication-as-of-existential-unthought> are all too ready to construe of the comprehensiveness of knowledge as mere effecting possibilities of knowledge at the given institutionalisation’s uninstitutionalised-threshold<sup>2</sup> in temporal/shortness-of-register-of—meaningfulness-and-teleology<sup>3</sup> terms-as-of-axiomatic-construal as of the plainly implied opportunism with little consideration of the projective intemporal value dispositions behind the ‘knowledge inventing’ and its organic preservation. Thus the ontological-contiguity—of-the-human-institutionalisation-process arises exactly to ensure deferential-formalisation-transference secondnaturing of knowledge as organic-knowledge comprehensiveness. The following is enlightening in this regard. (For what it takes to get a medieval as non-positivistic mindset/reference-of-thought into a positivistic mindset/reference-of-thought, that is, suppose for instance where in a medieval social-setup an accusation of witchcraft is demonstrated by an outsider from a positivistic social-setup to be incorrect and unsound to the approval of all in that social-setup, that outsider understanding fundamentally that the medieval setup by its relative-ontological-incompleteness<sup>4</sup>-induced,—threshold-of—nonconviction/madeupness/bottomlining-as-to-shallow-suprerogation—preconverging/dementing<sup>5</sup>—apriorising-psychologism’ is in a state of <amplituding/formative–epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of a medieval worldview will grasp that that unique demonstration of medieval-postlogism<sup>6</sup>/perversion-of—reference-of-thought—as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-suprerogation<sup>7</sup> (as accusation of witchcraft) is not to be construed naively as an adequate basis for a new logical-processing—or-logical-implicitation—supposedly-apriorising-in-
conviction-as-to-profound-supererogation as ‘prelogic supplanting—conviction-as-to-profound-supererogation —postconverging/dialectical-thinking —apriorising-psychologism re-engaging mental-reflex’ that re-engages with non-positivism/medievalism mindset/” reference-of-thought, given the possibilities of further accusations of witchcrafts or by-and-large the vices-and-impediments potentially arising from such a non-positivism/medievalism worldview as of the ‘local community dynamism of individual interests involved’ that endemises and enculturates notions-and-accusations-of-sorcery. It is rather the crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring transforming of the non-positivism/medievalism mindset/ reference-of-thought into a positivistic mindset/” reference-of-thought that is ontologically-speaking to be construed as the de-mentative/structural/paradigmatic resolution of the vices-and-impediments arising from a non-positivism/medievalism worldview with respect to such notions-and-accusations-of-sorcery. The same applies with respect to our positivism—procrypticism worldview and futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising—development-as-infrastructure-of—meaningfulness-and-teleology as of prospective notional—deprocrypticism worldview). We can appreciate such metaphysics-of-absence—(implicated-epistemic-veracity-of—nonpresencing—<perspective—ontological-normalcy/postconvergence>) insight as of say in a situation of cultural diffusion the requirement that a recurrent-utter-uninstitutionalisation social-setup opportunistically grasping mere effecting possibilities of base-institutionalisation knowledge, as of relative convenience to individuals, are much more better off equally coming into terms institutionally with the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality induced intemporality/longness behind the ‘inventing of the base-institutionalisation culturally diffused knowledge’ for an optimum accrual of the Being-development/ontological-framework-
reference, like a mystical knowledge construal, of the very same physics
<amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-
intrinsic-reality/ontological-veridicality, such that their inherent contrast disambiguates what is
of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-
development-as-infrastructure-of–meaningfulness-and-teleology from what is of Being
underdevelopment. But then this ‘immediate, cause-and-effect and non-blurry practical and
scientific knowledge’ is just one aspect of Being-development/ontological-framework-
expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-
and-teleology as its mere effecting possibilities of knowledge however effective do not exist
in a vacuum but rather within the ‘detached, contemplative and blurry human social-construct
of knowledge’ which is the complementary background for Being-development/ontological-
meaningfulness-and-teleology; as we can appreciate that despite the positivistic inclinations
of the Copernicuses, the Galileos and the Newtons, the scientific advances that ultimately took
hold arose because those budding scientists had a sense that the very ‘detached, contemplative
and blurry human social-construct of knowledge’ background had to be superseded as of its
scholasticism and mysticism underlying knowledge background for a positivism/rational-
empiricism knowledge background to take hold as transcendental-enabling/sublimating/supererogatory–de-mentativity not only to science but transcendental-
enabling/sublimating/supererogatory–de-mentativity as well to the open society equally
required for the sound functioning of science. It is this dynamic relationship as of ‘immediate,
cause-and-effect and non-blurry practical and scientific knowledge’ and ‘detached,
contemplative and blurry human social-construct of knowledge’ that is behind Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of–meaningfulness-and-teleology with respect to the prospective registry-
appropriate framework for engaging their subject-matter, as they rather promoted formal knowledge/scientific societies and adopted their specific jargons to ensure that the intemporal value reference mental-dispositions behind their respective ‘knowledge inventing’ was the institutional mental-disposition for engaging with the knowledge formally or as of seconndnatured education practically available to everyone interested, and so while alienating and considering general social <amplituding/formative> wooden-language-{imbued—averaging-of-thought<-as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology-as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>} as improper and unqualified. This was to avoid a circularity of undermining of the intemporal-projection of their specific knowledge/science, as they contribute in overall Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology. The point here is that at uninstitutionalised-threshold the idea of ‘equal opinionatedness’ doesn’t apply by the mere fact that knowledge of intrinsic-reality itself doesn’t arise by <amplituding/formative> wooden-language-{imbued—averaging-of-thought<-as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology-as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>} but rather ontological-pertinence, and the point in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-institutionalisation-process as
knowledge-led is to harness ontological-pertinence and not 〈amplituding/formative〉 wooden-language-{imbued—averaging-of-thought-〈as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology｝-as-of-‘nondescript/ignorable—void ’-with-regards-to-prospective-apriorising-implications〉, thus explaining deferential-formalisation-transference as of institutional percolation-chanelling. This point is central and critical to the very notion of society-as-social-construct, as society is caught between the notion of sovereignty as-allowing-basic-level-of-’universal-individual-and-collective-self-affirmation-striving-for-social-equality and the notion of knowledge as-of-selective-construal-of-social-value-and-institutional-hierarchisation-as-of-ontological-primemovers-totalitative-framework’-overriding-social-equality-for-the-sake-of-individual-and-social-emancipation-as-of-efficient-ontological-performance’-〈including-virtue-as-ontology〉-implications. The implication of this dilemma is the reality that society is always subpar to a knowledge social determination as well as subpar to a sovereignty social determination. This dilemma is unavoidable by the very implications of a society: every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s 〈reference-of-thought—categorical-imperatives/axioms/registry-teleology ›-for-aposteriorising/logicising/deriving/intelligising/measuring—‘meaningfulness-and-teleology’ with regards to meeting a basic level of individuals and social existential-possibilities expectations; such that the notions of knowledge and sovereignty can only be ‘socially effective’ within this articulated framework as enabled by ‘social universal-transparency’〈transparency-of-totalising-entailing,-as-to-entailing-〈amplituding/formative—epistemicity>totalising~in-relative-ontological-completeness 〉’. This articulation can be elucidated more explicitly in cases of cultural diffusion between societies of differing institutionalisation level as such cultural diffusion isn’t by a simplistic institutionalisation
knowledge-level transference, but involves a mutual sense of sovereign selectivity and recognition among the societies, however the drive for cultural diffusion; thus allowing for ‘acculturating-indigenising-pidginising transitioning settings and their social constructions as of \(<\text{amplituding/formative–epistemicity}>\text{totalising-self-referencing-syncretising}\)’ prior to eventual prospective relative-ontological-completeness\(^1\)–of–reference-of-thought accommodation. This is equally the knowledge and sovereignty dynamics that prevails within any given society. Thus, knowledge can effectively and efficiently be pushed forward but rather through an exercise of increasing ‘social \(^8\)universal-transparency\(^{10}\)-{transparency-of-totalising-entailing,-as-to-entailing-\(<\text{amplituding/formative–epistemicity}>\text{totalising–in-relative-ontological-completeness}\)’ thus enabling ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality instigated ontological-contiguity\(^6\)—of-the-human-institutionalisation-process\(^{67}\) as of difference-conflatedness\(^{12}\)-as-to-totalitative-reification\(^5\)-in-singularisation\(^2\)-as-veridical-epistemic-determinism \(<\text{amplituding/formative–epistemicity}>\text{causality–as-to-projective-totalitative–implications,-for-explicating-ontological-contiguity}^{66}\)’ associated with Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^9\). However, all along this ontological-contiguity\(^6\)—of-the-human-institutionalisation-process\(^{67}\) a suboptimal relation between knowledge and sovereignty undermines Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^9\) as of various pertinent social manifestations: –wherein sovereignty is affirm over knowledge as ‘supposedly being knowledge’ by a culture of mere social-aggregation-enabling of temporal-to-intemporal hotchpotch opinionatedness, notwithstanding the underlying transcendental-enabling/sublimating/supererogatory-de-mentativity in formal institutional deferential-formalisation-transference and percolation-channelling.<in-deferential-
formalisation-transference>, with the result that beyond the underlying implied institutionalisation-level such a social-aggregation-enabling hotchpotching opinionatedness culture tends to critically and decisively inform individual and collective thought and action in a manner that is suboptimal to intemporality-as-ontology as of the manifestation of such a temporal-to-intemporal hotchpotching culture in the extended-informality that permeates even formal institutions; –wherein by exploiting of temporal mental-dispositions as of individuals and the collective-social sovereignty, knowledge is undermined by wrongly implying the pertinence of social-aggregation-enabling construed as ‘exploitation of sovereignty’/mobbishness as of ‘intellectual institutional-being-and-craft self-serving’ in lieu of upholding institutionalisation, including the tendency to degrade knowledge conceptualisations into popular frameworks of knowledge appraisal thus subverting institutional deferential-formalisation-transference rigorous knowledge framework as of their transcendental-enabling/sublimating/supererogatory-de-mentativity as to existence-potency-sublimating-nascence, disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>-totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory-epistemic-conflatedness; –the ontologically-flawed articulation of knowledge by an intellectual disposition akin to <amplituding/formative>-wooden-language-(imbued—temporal–mere-form/virtualities/dereification)/aksriatic-drag/denatured/preconverging-or-dementing –narratives—of-the–reference-of-thought–categorical-imperatives/axioms/registry-teleology>,–for-aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology undermining knowledge as of its organic true nature implied by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality behind prior ‘knowledge inventing’ and prospective ‘knowledge inventing’, and so as of intellectual
institutional-being-and-craft; –ultimately the very paradox of human <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{13}\) means that the human sovereign psyche is one that is geared to construe of ‘presence as all-encompassing “meaningfulness-and-teleology” value construct’ such that the transcendental implications of knowledge by mental-reflex are construed as of ‘incrementalism-in-relative-ontological-incompleteness’—enframed-conceptualisation to presence, rather than as of <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought of presence construed as of prospective relative ontological-contiguity\(^{8}\) over prior/transcended/superseded relative notionnal-discontiguity/epistemic-discontiguity\(^{7}\)—<shallow-supererogation\(^{14}\)–of-mentally-aestheticised–preconverging/dementing\(^{15}\)–qualia-schema>. However despite this knowledge and sovereignty dilemma associated with Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–“meaningfulness-and-teleology”\(^{9}\), the insight about human <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{12}\) as of self-referencing and syncretising-effecting intemporal implications means that the requisite intemporal/longness-of-register-of–“meaningfulness-and-teleology”\(^{9}\) psychoanalytic-unshackling positive-opportunism\(^{15}\) can crossgenerationally be induced for Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–“meaningfulness-and-teleology”\(^{9}\) despite the inherent circular distractiveness of temporality\(^{9}\), and ultimately so as enabled by ‘social universal-transparency\(^{10}\)–(transparency-of-totalising-entailing,-as-to-entailing–<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness\(^{1}\)). The above analysis point out that transcendental knowledge in particular involves more than just knowledge as a grounded construct but as well an understanding of how such knowledge is instigated in society as part and parcel of the knowledge construed as organic-knowledge; given
that the social-construct-as-society is not necessarily of immediate receptivity and is of a suboptimal disposition to such transcendental-enabling/sublimating/supererogatory-dementativity implications that are not priorly as of grounded constructs of knowledge. This will explain why the mere articulation of positivism/rational-empiricism “meaningfulness-and-teleology” constructs of knowledge wasn’t enough in undermining medieval mental-dispositions, and the persistent initiatives of the Copernicuses, Galileos, Rousseaus, Diderots, etc., were not vague actions but informed by an intuition about the nature of human society and how it develops given the inherently untransformable human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor as of human limited-mentation-capacity. Thus in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, crucially the issue of ontological-veracity is only half the problem of knowledge, with the other half being the grasp of the underlying sovereignty and knowledge dynamics as of eliciting ‘social universal-transparency’-{transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness ’}. As it is the latter that induces that social positive-opportunism for deferential-formalisation-transference and institutional percolation-channelling-<in-deferential-formalisation-transference>, as of social deferential attribution of power for the beneficial effect of knowledge as empowering various institutional domains. Further, as implying the superseding of entrenched grounded knowledge as of its psychoanalytic-unshackling implications and in destabilising the underlying existential reference-of-thought, transcendental knowledge is of a circular but consistent exercise of <amplituding/formative–epistemicity>totalising~renewing-realisation/re-perception/re-thought, and so due to the ‘existential and emotive commitments’ it is involved in undoing with regards to the implied prior notional-discontiguity/epistemic-

worldview/dimension, this will elicit an existential and emotional involvement that will rather convert into a circular neuterisation of notional-deprocrypticism by a mental-complex avoiding such emotional discomfort and sense of existential ego undermining as is the case with all destructuring-threshold-(uninstitutionalised-threshold/pre sublimating-desublimating-decisionality)-of-ontological-performance -<including-virtue-as-ontology> with respect to their prospective institutionalisations. This explains why it is not a fundamental contradiction as of human-subpotency-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional—firstnaturedness—temporal-to-intemporal-dispositions—existentialism-form-factor at uninstitutionalised-threshold that the positivistic/rational-empiricism initiatives of such enlightenment thinkers like Galileo, Descartes, Diderot, etc. were met with counteracting reactionary views, and as it further elicits ontologically-flawed ‘uninstitutionalised-threshold by prospective institutionalisation dialogical-equivalence’. This can’t be the case because dialogical-equivalence can only arise where there is ‘common reference-of-thought’ whereas a state of institutionalisation as of prospective relative-ontological-completeness-of-reference-of-thought is veridically in an institutionalising/enlightening/educating exercise relative to a state of uninstitutionalised-threshold as of prior relative-ontological-incompleteness-of-reference-of-thought, and not such a flawed notion of dialogical-equivalence. We can appreciate even within a same reference-of-thought like our positivism/rational-empiricism registry-worldview/dimension that there is no dialogical-equivalence between the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs in ontological-contiguity and ‘traditional classical mechanics axiomatic-construct’ of notional-discontiguity/epistemic-discontiguity<-shallow-supererogation-of-mentally-aestheticised—preconverging/dementing—qualia-schema> but for the former’s enlightening the latter’s undefined-or-undecidable-threshold-of-ontological-veridicality. investment’ in the former, such that by and large it is mostly a crossgenerational transcendence-and-sublimity/sublimation/supererogatory–de-mentativity that fully brings about the adaptation of the induced ‘transcendental-reasoning-of-event’-as-prospective-ontology-origination’ as the ‘new-as-of-the-prospective-institutionalisation ordinary-nontranscendental-reasoning’. Such a temporal/shortness-of-register-of–meaningfulness-and-teleology ontologically-flawed circular predisposition arises due to human temporal-dispositions as of Being underdevelopment that tends to lead to the beyond-the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-unthought>—denaturing of knowledge as mechanical-knowledge and undermining organic-knowledge; wherein knowledge is related to as of existential-extrication-as-of-existential-unthought, that is, knowledge related to as of ‘the mere positive-opportunism’ it engenders at best’ with little or no cognisance that there is an attitude/mental-disposition/care–and–episteme as of intemporality/longness behind ‘knowledge invention’ that must be preserved and perpetuated as ‘the very core of knowledge’ and so to undermine knowledge denaturing, so construed as organic-knowledge. Organic-knowledge requires the articulation of meaningfulness-and-teleology rather in nonextricatory-existential-preempting-of-existential-unthought terms—as-of-axiomatic-construct as the profound-and-complete articulation of knowledge, and as the very attitude/mental-disposition/care–and–episteme behind knowledge that induces the appropriate psychoanalytic-unshackling for its reception. In other words, we can’t seriously contemplate a profound positivistic knowledge engagement with a non-positivistic as animistic or medieval mindset without the idea of priorly eliciting the appreciation-and-adoption of a positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme when contending about any salient positivistic articulations as otherwise all such positivism/rational-empiricism articulations and explaining will be reconstrued circularly in animistic or medieval terms—as-of-axiomatic-construct as of the latter.

The point here is that the meaningfulness-and-teleology so-construed has to supersede the prior registry-worldview/dimension uninstitutionalised-threshold perspective/framing/reference/horizon for its prospective transcendence-and-sublimity/sublimation/superoxerogatory–de-mentativity-enabling purpose, even if that implies being temporally unpalatable, given that the fundamental purpose for the underlying aetiologisation/ontological-escalation is of
intemporal/ontological/social/species/universal/transcendental/maximising-
recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-
mentating/structuring/paradigming and not temporal extricatory de-
mentating/structuring/paradigming. Put another way, for instance, Newtonian physics doesn’t
have any inherent meaningfulness-and-teleology as we can appreciate from a
positivism/rational-empiricism perspective/framing/referencing/horizon with an animistic
social-setup as of the latter’s attitude/mental-disposition/care–and–episteme underlying its
meaningfulness-and-teleology thus requiring the latter’s prior apriorising-teleological-
elevation-in-ontological-contiguity to a positivism/rational-empiricism attitude/mental-
disposition/care–and–episteme ‘for the notion of the mutual contemplation of Newtonian
physics to even arise’. This speaks of the centrality of attitude/mental-disposition/care–and–
episteme with respect to human meaningfulness-and-teleology, as it is what underlies apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as of a given
registry-worldview’s/dimension’s institutionalisation reference-of-thought. attitude/mental-
disposition/care–and–episteme as such carries a registry-worldview’s/dimension’s ‘underlying
sense of end-teleology /end-purposefulness’ and thereof its operative-construct and
implicative-construct with regards to meaningfulness-and-teleology. It further implies a ‘the
human toddling potential’ for living-as-of-human-personality-developing, social-projection-
institutional-orientations and Being-development/ontological-framework-expansion–as-to-
depth-of-ontologising-development-as-infrastructure-of– meaningfulness-and-teleology; with
the ‘human toddling potential’ implying the human potential to develop from a relative-
ontologically-flawed to a relative-ontologically-veridical attitude/mental-disposition/care–and–
episteme with respect to living-as-of-human-personality-developing, social-projection-
institutional-orientations and Being-development/ontological-framework-expansion–as-to-
depth-of-ontologising-development-as-infrastructure-of– meaningfulness-and-teleology. This
‘human toddling potential’ is what enables notional-discontiguity/epistemic-discontiguity\textsuperscript{62}-<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing\textsuperscript{15}–qualia-schema> induced psychoanalytic-unshackling for grounding \textsuperscript{52}meaningfulness-and-teleology\textsuperscript{69} prospectively as of the prospective relative-ontological-completeness\textsuperscript{77} of <nonpresencing–<perspective–ontological-normalcy/postconvergence>. The attitude/mental-disposition/care–and–episteme\textsuperscript{5} structure is what fundamentally determines mental-states in their ‘projection/anticipation of the coherence/contiguity-of-superseding–oneness-of-ontology-as-of-inherent-existence-coherence/contiguity’ whether with respect to any individual within any registry-worldview/dimension as well as the registry-worldview’s/dimension’s overall \textsuperscript{8}reference-of-thought, as of its specific \textsuperscript{8}reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{99},-for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\textsuperscript{99}. Thus an attitude/mental-disposition/care–and–episteme\textsuperscript{5} can pertinently be defined as the ‘assumed-and-unflinching apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing\textsuperscript{103}’ inducing a given specific <nonpresencing–<perspective–ontological-normalcy/postconvergence> outcome with regards to prospective relative-ontological-completeness\textsuperscript{77}–or-incompleteness-of-\textsuperscript{8}reference-of-thought as of the construal-as-existence/intrinsic-reality/ontological-veridicality, and establishing-and-upholding the underlying framework of \textsuperscript{5}meaningfulness-and-teleology\textsuperscript{69} associated with that attitude/mental-disposition/care–and–episteme\textsuperscript{5}; and so, whether such a framework is a \textsuperscript{8}reference-of-thought as of overall construal-as-existence/existential-possibilities, or within a \textsuperscript{8}reference-of-thought like a social projection <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-
reality/ontological-veridicality or specifically with living-as-of-human-personality-developing. For instance, with respect to coming across and living say in an early hunter-gather society with its interpretation of ill-health as of bad omen, we will still maintain an ‘assumed-and-unflinching transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing’ as of the attitude/mental-disposition/care–and–episteme of positivism’s/rational-empiricism’s perpectivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation, at least as of our self-conscious awareness, even as this reflects mutual beyond-the-consciousness-awareness-teleology —<in-existential-extrication-as-of-existential-unthought> — when we publicly pretend to act otherwise by subscribing to the interpretation within such a social-setup. As construed within a given reference-of-thought, say in our positivism/rational-empiricism reference-of-thought we can further have the conception of the physics or biology or law or literature or even just entrepreneur or accountant or technician specific attitude/mental-disposition/care–and–episteme, and further at the individual level as of changing attitude/mental-disposition/care–and–episteme with living-as-of-human-personality-developing. attitude/mental-disposition/care–and–episteme as so-construed is critical fundamentally because the notionally inherent human capacity for aetiologisation/ontological-escalation is directly associated with ‘attitude/mental-disposition/care–and–episteme as dispensing-with-immediacy-for-relative-ontological-completeness —by-reification—/contemplative-distension — (as of human self-surpassing—existentialism-form-factor, in overcoming—‘notionally–collateralising-beholdening-protohumanity’—to—‘attain-sublimating-humanity’—as—to—existence-potency—sublimating–nascence,—disclosed—from-prospective-epistemic-digression-as-of—<amplituding/totalising—renewing—realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness to supersede human temporality—/shortness

able to achieve transcendence-and-sublimity/sublimation/supererogatory—de-mentativity’, and
so as of intemporality’ . With regards to living-as-of-human-personality-developing, we can
appreciate in the case of a child’s personality development as of its given attitude/mental-
disposition/care—and—episteme that it has a poor dispensing-with-immediacy-for-relative-
ontological-completeness —by-reification /contemplative-distension 7 as of its more direct
focus on instant-sensations-and-carefreeness requiring that the child is directed to end at
successive stages infantile habits as it grows up with an increasing sense of dispensing-with-
immediacy-for-relative-ontological-completeness —by-reification /contemplative-distension 7
that ultimately involves major stages like schooling, greater social autonomy and responsibility,
and developing into an adult with even greater dispensing-with-immediacy-for-relative-
ontological-completeness —by-reification /contemplative-distension 7 as for instance the notion
of pleasure is increasingly substituted with that of work-and-pleasure, etc. Such living-
development—as-to-personality-development as dispensing-with-immediacy-for-relative-
ontological-completeness —by-reification /contemplative-distension 7 is construed as the more
profound attitude/mental-disposition/care—and—episteme for human optimum living, and so
over say an animal-like immediacy attitude/mental-disposition/care—and—episteme of living.
With regards to the second-level of social aetiologisation/ontological-escalation associated with
‘attitude/mental-disposition/care—and—episteme dispensing-with-immediacy-for-relative-
ontological-completeness —by-reification /contemplative-distension 7’, for achieving
transcendence-and-sublimity/sublimation/supererogatory—de-mentativity; humankind construes
of existence as ‘more than just plain living as animals’ but as enabling for various domains of
social projections dispensing-with-immediacy-for-relative-ontological-completeness —by-
reification\textsuperscript{86} / contemplative-distension\textsuperscript{26} so-implied across the various registry-worldviews/dimensions, whether in an animistic social-setup involving animistic practices or in the modern social-setup as of our modern practices involving subject-matter specialisms, trade roles, functionaries, arts, research, sports and other activities, etc.; with each involving their specific attitude/mental-disposition/care–and–episteme dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{87} -by-reification\textsuperscript{86} / contemplative-distension\textsuperscript{26}. The idea being that this provides more existential possibilities by the overall expanded human capabilities available directly or indirectly to fulfil individuals desires and needs. Finally the third-level reflects ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality instigated ontological-contiguity\textsuperscript{86} —of-the-human-institutionalisation-process\textsuperscript{87} as of difference-conflatedness\textsuperscript{87} -as-to-totalitative-reification\textsuperscript{86} -in-singularisation\textsuperscript{87} -as-veridical-epistemic-determinism\textsuperscript{87} \textsuperscript{87} <amplituding/formative–epistemicity> causality–as-to-projective-totalitative–implications,-for-explicating-ontological-contiguity\textsuperscript{66} with Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99}, beyond-the-consciousness-awareness-teleology\textsuperscript{99} <in-existential-extrication-as-of-existential-unthought>\textsuperscript{6}, implying specifically a nonextricatory-existential-preempting-of-existential-unthought attitude/mental-disposition/care–and–episteme as dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{87} -by-reification\textsuperscript{86} / contemplative-distension\textsuperscript{26} -of- reference-of-thought-by-reification\textsuperscript{86} / contemplative-distension thus transcendentally enabling the successive registry-worldview’s/dimension’s ontological-possibilities construed as of human intemporal/ontological/social/species/ universal/transcendental/ maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{87} —unenframed-conceptualisation dementating/structuring/paradigming; with such dispensing-with-immediacy-for-relative-
ontological-completeness-by-reification\textsuperscript{87}/contemplative-distension-of-reference-of-thought-by-reification\textsuperscript{}/contemplative-distension construed as rejection of existential-extrication-as-of-existential-unthought attitude/mental-disposition/care–and–episteme which will imply a stalling in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process\textsuperscript{87} as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{66} at the given registry-worldview/dimension, and so-construed as temporal extricatory de-mentating/structuring/paradigming. Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{66} as such implies increasingly more profound-and-complete enabling framework of human emancipation as of technical and existential possibilities arising from prospective relative-ontological-completeness-of-reference-of-thought. We can get an insight of registry-worldviews/dimensions attitude/mental-disposition/care–and–episteme contrast as clarified in the preceding example as of the technical and existential emancipatory possibilities that can be contemplated with a positivism/rational-empiricism attitude/mental-disposition/care–and–episteme in an early hunter-gather social-setup inclined to construe of ill-health as bad omen; and appreciate that the human-subpotency is much more than stalling at any prior relative-ontological-incompleteness-of-reference-of-thought registry-worldview/dimension, and so not only retrospectively but equally prospectively. Thus, an attitude/mental-disposition/care–and–episteme can pertinently be defined as the ‘assumed-and-unflinching transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing\textsuperscript{101}’ inducing a given specific nonpresencing-<perspective–ontological-normalcy/postconvergence> outcome with regards to prospective relative-ontological-completeness-or-incompleteness-of-reference-of-thought as of the
and–episteme in ‘existential-extrication-as-of-existential-unthought’ which de-
mentatively/structurally/paradigmatically ‘do not project beyond’ reference-of-thought as of
prospective relative-ontological-completeness—of—reference-of-thought’ to grasp prospective

abstract notion of perpetual/eternising preservation of Being, and so beyond
temporality/shortness existential-extrication—as—of—existential-unthought lack of the projecting
attitude/mental-disposition/care—and—episteme for prospective institutionalisations as mainly
concerned with the ‘human lifespan extricatory punctuality/immediacy of depth-of-thought’ as
absolute reference of meaningfulness—and—teleology ‘with little sense of coherence as of
Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—‘meaningfulness-and-teleology’’, and thus the latter cannot unlike the former be the framework for aetiologisation/ontological-escalation as of universal implications, and particularly so as of the ‘naivety of eliciting mutual temporality’/shortness as intemporality /longness or eliciting of <amplituding/formative> wooden-language-{imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—‘meaningfulness-and-teleology’—as-of—‘nondescript/ignorable—void’—with-regards-to-prospective-apriorising-implications>}’. This notion of fulfilling a given prospective institutionalisation’s requisite attitude/mental-disposition/care—and—episteme underlies the very idea of intellectual-and-moral-inequivalence/non-correspondence as well as dialogical inequivalence/non-correspondence; as where one party does fulfils the attitude/mental-disposition/care—and—episteme of a given institutionalisation’s reference-of-thought as of prospective relative-ontological-completeness—if-axiomatic-construct-or—reference-of-thought and thus its corresponding meaningfulness-and-teleology, and the other doesn’t as of prior relative-ontological-incompleteness. This further explains why epistemic-breaks/epistemic-resetting arise with the successive prospective institutionalisations in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, wherein for instance the positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme of say a Galileo or Descartes is circularly beyond the contention framework of scholasticism—meaningfulness-and-teleology, speaking of the impossibility of logical-congruence between the positivists and scholastics with only the utter dominance of positivism arising as of its ontological-primummovens-totalitative-framework induced positive-opportunism as of scientific, medical, technical advancements, free society, etc. shat leads to the crossgenerational collapsing of scholasticism. It is interesting to note here
and start undermining knowledge construction as of its intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity, effectively there shouldn’t be any compunction as of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-mentating/structuring/paradigming to overlook them and imply intellectual-and-moral-inequivalence/non-correspondence and/or dialogical inequivalence/non-correspondence in other to preserve genuine knowledge over charlatanism; as such ontological-bad-faith/inauthenticity practices do not speak of ‘genuine intellectual disagreement’ but undermining of intellectualism basically and do not merit to be elevated teleologically to the level of intellectual contention because of their underlying knowledge denaturing predisposition. This is critically the case with registry-worldview/dimension reference-of-thought transcendence-and-sublimity/sublimation/supererogatory-de-mentativity implied knowledge given that the old/prior/superseded as of its beyond-the-consciousness-awareness-teleology <in-existential-extrication-as-of-existential-unthought> prior relative-ontological-incompleteness off reference-of-thought construes of ‘implied grounding of meaningfulness-and-teleology’ in terms—as-of-axiomatic-construct of presencing—absolutising-identitive-constitutedness while the new/prospective/superseding as of its prospective relative-ontological-completeness of reference-of-thought construes of ‘implied grounding of meaningfulness-and-teleology’ in terms—as-of-axiomatic-construct of prospective nonpresencing—<perspective—ontological-normalcy/postconvergence>. This brings home the reality that it is inevitable that all uninstitutionalised-threshold are necessarily ‘dementatively/structurally/paradigmatically conflicted’, with prospective transversality-of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing ontological-primemovers-totalitative-framework being
the critically fundamental determining arbiter of what will prospectively pass for knowledge rather than the naivety of logical-congruence of dialogical-equivalence at any such uninstitutionalised-threshold; as fundamentally the issues faced by the Descartes, Galileos, Diderots, etc. as of ‘budding-positivism/rational-empiricism attitude/mental-disposition/care–and–episteme’ are de-mentatively/structurally/paradigmatically fundamentally inevitable as of their articulation within a non-positivism/medievalism scholasticism context. This is the case since at a registry-worldview’s/dimension’s uninstitutionalised-threshold, such a framework of logical-congruence of dialogical-equivalence is de-mentatively/structurally/paradigmatically superseded, in the sense that every institutionalisation say for instance scholasticism scholarship has its ‘genuine intellectual engagement framework’ as of its underlying attitude/mental-disposition/care–and–episteme. This is equally reflected with regards to the prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity implying knowledge proponents, as the very notion of implying a prospective transcendental conceptualisation as of organic-knowledge is one that undervalues the presencing—absolutising-identitive-constitutedness attitude/mental-disposition/care–and–episteme as of its social-stake-contention-or-confliction
while the very notion of perceiving highly the "meaningfulness-and-teleology" within a prior institutionalisation framework is one that is necessarily apprehensive and shallowminded to the notion of a prospectively undermining prospective "nonpresencing-<perspective–ontological-normalcy/postconvergence> sublimity/sublimation/supererogatory-de-mentativity episteme transcendence-and-attitude/mental-disposition/care–and– reference-of-thought supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument. In addition, the disruptive uninstitutionalised-threshold contextualisation as of such divergent commitments and ‘lack of perceived constraining framework of logical-congruence of dialogical-equivalence’ further radicalises the human disposition to act temporally beyond-the-consciousness-awareness-teleology"-<in-existential-extrication-as-of-existing-unthought> institutional-being-and-craft as of perceived vested interest, striving to undermine prospectively implied transcendence-and-sublimity/sublimation/supererogatory-de-mentativity "meaningfulness-and-teleology" attitude/mental-disposition/care–and–episteme. What is then the manifestation of such intellectual undermining which must necessarily be understood as of knowledge-notionalisation required as of the notional–conflatedness of "deprocrypticism–or–preempting—disjointedness-as-of-"reference-of-thought protensive-consciousness? ontological-bad-faith/inauthenticity as of its charlatanic effect fundamentally involves the undermining at any human uninstitutionalised-threshold of the possibility of intellectually induced social universal-transparency-"{(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness )}; for the ultimate outcome of undermining any such intemporal knowledge deferential-formalisation-transference behind the secondnaturing for prospective institutionalisation. enframed-conceptualisation is a simplistic, poor and inadequate articulation of the notion of scepticism usurping genuine intellectual scepticism. Such a poor notion of scepticism operates by a spurious relationship with intellectual contentions that is susceptible to legitimise-or-delegitimise arguments however ontologically pertinent or impertinent as of concurrent ontological-primemovers-totalitative-framework, rather as of its commitment to incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation that in many ways could just as well validate wooden-language-{imbued—averaging-of-thought<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—nondescript/ignorable–void—with-regards-to-prospective-apriorising-implications>} and untransvaluated—temporal-intemporality attitude/mental-disposition/care—and—episteme and their social contentions. As in effect, such ontological-bad-faith/inauthenticity scepticism fails to act as a ‘knowledge-growth-mechanism with regards to the perpetuation of knowledge coherence and pertinence’ as is the case with genuine intellectual scepticism, but is rather geared towards a dogmatic mandarinism and pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation that usurps the very notion of scepticism in incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation, and so as of the naïve implication that proceduralism is the substitute for existence/intrinsic-reality/ontological-veridicality as transcendental-enabling/sublimating/supererogatory-de-mentativity. This poor scepticism attitude/mental-disposition/care—and—episteme usurping the pre-established ‘detour to social good-will deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, has existentialising—enframing/imprintedness—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> implications as of the forestalling of prospective ‘concurrent ontological-primemovers-totalitative-framework’ upholding of the primacy of the ‘superior party’ that is existence/intrinsic-reality/ontological-veridicality, and so
over mere ‘interhuman negotiating or agreeableness’; as this subsequently undermines intemporal knowledge deferential-formalisation-transference behind the secondnaturing for prospective institutionalisation. Rather the attitude/mental-disposition/care–and–episteme of genuine intellectual scepticism is encrusted within the very notion of prospective relative-ontological-completeness of human meaningfulness-and-teleolgy, given human limited-mentation-capacity-deepening. Such a genuine intellectual scepticism construes of knowledge by its given <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality in terms–as-of-axiomatic-construct of the competing contending construals elicited relative credibility and relative scepticism as of prospective relative-ontological-completeness, thus enabling the upholding of the ‘superior party’ that is existence/intrinsic-reality/ontological-veridicality, which as of its transcendence-enabling nature brings about prospective human emancipation. While genuine intellectual scepticism rather strives in a comprehensive intellectual credibility and scepticism framework as of prospective relative-ontological-completeness, ontological-bad-faith/inauthenticity scepticism avoids such constraining as it rather emphasises a predisposition for discreet, ‘ontologically unconstrained framework as of prospective relative-ontological-completeness’ <amplituding/formative–epistemicity>causality–as-to-projective-totalitative–implications, for-explicating-ontological-contiguity and non-comprehensiveness, that rather allow for selectivity, incompleteness and perfidy passing for genuine intellectual scepticism. Effectively while genuine intellectual transformation involves dispensing-with-immediacy-for-relative-ontological-completeness -by-reification /contemplative-distension, a perfidious ontological-bad-faith/inauthenticity scepticism involves eliciting a sense of immediacy and temporality /shortness as of <amplituding/formative> wooden-language-(imbued—averaging-of-thought<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology—as-of-'nondescript/ignorable–void'-with-regards-to-

In this latter respect, and for the possibility of prospective social transcendence-and-sublimity/sublimation/supererogatory de-mentativity and emancipation, social practices at any given period as ‘becoming constructs’ are not inherently ontologically sacrosanct by the fact that these are the outcome of preceding prospective relative-ontological-completeness as of preceding intemporal dispensing-with-immediacy-for-relative-ontological-completeness by-reification /contemplative-distension, and by that very implication this is what carries the possibility of ‘inventing’ as-of-prospective-institutionalisation social practices as of prospective relative-ontological-completeness. ontological-bad-faith/inauthenticity ad-hoc pretences extolling social practices as of presencing—absolutising-identitive-constitutedness but of a poor conception outside the prospective relative-ontological-completeness behind such social practices ‘inventing’ as-of-prior-institutionalisation and so-implied as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of meaningfulness-and-teleology, are but denaturing and down the line equally undermines prospective relative-ontological-completeness for the further emancipation of human social practices. As such ontological-bad-faith/inauthenticity ad-hoc pretences extolling social practices as of presencing—absolutising-identitive-constitutedness are of the same notional-contiguity/epistemic-contiguity profound-supererogation of-mentally-aestheticised–postconverging/dialectical-thinking–qualia-schema kind that bathe in the wooden-language–(imbued—averaging-of-thought–as-to-leveling/ressentiment/closed-construct-of meaningfulness-and-teleology as-of–‘nondescript/ignorable–void ’–with-regards-to-prospective-apriorising-implications⟩ and
untransvaluated–temporal-intemporality social-chainism that implied as much about extolling social practices—presencing—absolutising-identitive-constitutedness of existential-extrication-as-of-existential-unthought reasoning-from-results/afterthought attitude/mental-disposition/care—and—episteme of recurrent-utter-uninstitutionalisation, base-institutionalisation—ununiversalisation, universalisation—non-positivism/medievalism and today’s positivism—procrypticism, with little prospect/opening for prospective transcendence—sublimity/sublimation/supererogatory—de-mentativity. Essentially and constructively, all intellectualism as of their intemporal job description as emancipative is to relay in uninhibited/decomplexified terms—as-of-axiomatic-construct the blunt reality of the social as this is the very attitude/mental-disposition/care—and—episteme that empowers prospective social emancipation however socially inconvenient it may sound; and so beyond habituated <amplituding/formative—epistemicity>totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag. The fact that many that are institutionally anchored may speak otherwise or naively against such a stance doesn’t diminish in any way the ‘natural appropriateness’ of such a job description as of human intemporal/ontological/social/species/universal/transcendental/maximalising—recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-mentating/structuring/paradigming, but rather speaks of a poverty of institutionalisation that creeps into institutional anchors as of their reasoning-from-results/afterthought constructions subject to temporal/shortness-of-register-of—meaningfulness-and-teleology denaturing of reference-of-thought—categorical-imperatives/axioms/registry-teleology, -for-aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology. development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-
infrastucture-of—meaningfulness-and-teleology is by a rather surreptitious manner
undermined by what this author qualifies as ‘subterfuges of Being-development/ontological-
framework-expansion—as-to-depth-of-ontologising-development-as-infrastucture-of—
meaningfulness-and-teleology’ which are rather as of ideology; ideology in the sense that
these are ‘commitments’ ready to ‘forego the pre-eminence of knowledge construed as of its
ontological-veracity’ which is the only assurance of optimum construct of knowledge for
human emancipation. Ideology as such takes the form of either ‘ideology denaturing’ of Being-
development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-
infrastructure-of-‘meaningfulness-and-teleology’ or ‘reactive fear of ideology denaturing’ of development-as-infrastructure-of-‘meaningfulness-and-teleology’. In both instances what is lost is development-as-infrastructure-of-‘meaningfulness-and-teleology’ itself, such that besides interests undermining natural development-as-infrastructure-of-‘meaningfulness-and-teleology’, natural development-as-infrastructure-of-‘meaningfulness-and-teleology’ is perceived as a risk that will foster ‘ideology denaturing’ of development-as-infrastructure-of-‘meaningfulness-and-teleology’ or ‘reactive fear of ideology denaturing’, with development-as-infrastructure-of-‘meaningfulness-and-teleology’ itself losing out. These subterfuges are behind the awkward, unnatural and clobbered nature of human development for the past two centuries as civilisation is construed and developed in ‘an undertone reaction/anticipation of threat’ rather than natural as of human communion. Thus ‘subterfuges of development-as-infrastructure-of-‘meaningfulness-and-teleology’ arise as of the suboptimality of human intemporality/longness which suffers from human apprehensiveness of humans, thus undermining the notion of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation de-

This underlying human mental-disposition arises as of the successive human as trepidatious/warped/preclusive/occlusive-consciousness in neuterising; as such neuterising is the outcrop of human limited-mentation-capacity. In other words neuterising can effectively be ‘decomposed-as-from-a-conflatedness’-perspective into the ontologically-veridical underlying limited-mentation-capacity manifestation’ as of social-stake-contention-or-confliction <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, and so construed from the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional–conflatedness of notional–deprocrypticism deneuterising —referentialism’. This analysis conveys the reality of human crossgenerational institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing due to the impossibility of the very first humans as of their limited-mentation-capacity and yet inexperience/unaccumulated-experience to be able to reason more than their initial apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument will permit as of their state of recurrent-utter-uninstitutionalisation ‘non-rules—apriorising/axiomatising/referencing–psychologism,-as-impulsive-or-accidented-or-random-mental-disposition’, and hence their construal of ‘meaningfulness-and-teleology’ as of ‘their relative ‘neuterising’. Likewise the ultimate possibility of human crossgenerational institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing as enabling the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument of notional–deprocrypticism/amplituding/formative/notional–preempting—disjointedness-as-of-reference-of-thought is the backdrop for deneuterising —referentialism enabling the full transparent ontologically-veridical elucidation of human ‘meaningfulness-and-teleology’ construed as of ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing; as of the
possibility of deneuterising. In the bigger scheme of things, as of the notional-conflatedness of notional-deprocrypticism as deneuterising —referentialism, what had hitherto been conceived notionally as logicism is herein exposed as effectively superseded by the notion of différenciation/internal-dialectics/difference-deferral so-construed as of ‘reference-of-thought-or-axiomatic-construct-devolving-as-of-ontological-reconstituting—as-to-conflatedness’-différence/internal-dialectics/difference-deferral’ and as implied as-of-the-construal-of-différence/internal-dialectics/difference-deferral-of meaningfulness-and-teleology; and so with respect to the more ontologically-veridical reality of human conceptualisation of meaningfulness-and-teleology always from a position of limited-mentation-capacity as of prior relative-ontological-incompleteness-of-reference-of-thought, thus in need for its prior deepening so-captured in the ‘human sublimation-inducing—textuality/hermeneutics/possibilities-of-becoming-existential-interpretation/axiomatisation-of-existence’ as of the notional-conflatedness of notional-deprocrypticism différenciation/internal-dialectics/difference-deferral’ as transcendence-and-sublimity/sublimation/supererogatory—dementativity-enabling, whereas such a human limited-mentation-capacity implication is naively ignored with logicism in its metaphysics-of-presence-‘implicated—nondescript/ignorable—void’—as-to-presencing—absolutising-identitive-constitutedness}/illusion-of-the-present/present-consciousness/mirage. Such a ‘human sublimation-inducing—textuality/hermeneutics/possibilities-of-becoming-existential-interpretation/axiomatisation-of-existence’ as of the notional-conflatedness of notional-deprocrypticism différenciation/internal-dialectics/difference-deferral’, by its insight with respect to the implications of human limited-mentation-capacity for ontologically-veridical ‘meaningfulness-and-teleology’ construal, is best predisposed to grasp the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as of ‘nonpresencing<&perspective–ontological-normalcy/postconvergence>’reference-of-thought as this enables
For instance, such epistemic-break/epistemic-resetting associated with the overall ontological-contiguity—of-the-human-institutionalisation-process necessarily explains the ‘mutually transversality-of-affirmative-and-unaffirmative–disambiguated-‘motif-and-apriorising/axiomatising/referencing unintelligibility’ of the Galileos, Newtons, Diderots episteme articulating prospective positivising/rational-empiricism meaningfulness-and-teleology and the Establishment scholasticism medieval dogmatic episteme. The implication here is that the articulation of transcendence-and-sublimity/sublimation/superseding-reference-of-thought is by itself tied up to a prospective epistemic disruption, construed as of soundness-or-ontological-good-faith/authenticity-reference-of-thought, beyond just grounded knowledge as of the prior episteme which is rather construed as of unsoundness-or-ontological-bad-faith/inauthenticity-reference-of-thought. Such transcendental epistemic-breaks/epistemic-resetting arise because humankind is subpotent as of its knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue to the full-potency of existence, and in the human construal/conceptualisation of intrinsic-reality/ontological-veridicality, the ‘superseding party’ is not any involved humans as knowledge agents but inherent existential-reality itself, with any such humans as knowledge agents only ‘pertinent in delegation’ as of their ‘kowtowing to existential-reality’, with such delegation inherently revoked as of their failed ‘kowtowing to existential-reality’. To the extent that human knowledge agents ‘achieve sufficient-and-recurrent credibility as of their knowledge methods and approaches’ with respect to social universal-transparency-(transparency-of-totalising-entailing, as-to-entailing-<amplituding/formative–epistemicity>totalising-in-relative-ontological-completeness), an apparent episteme as of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality, as-to-human<amplituding/formative–epistemicity>totalising–purview-of-
construal” arises as of institutional-being-and-craft. But then, where transcendental implications as of prospective institutionalisation prospective relative-ontological-completeness -of- reference-of-thought point to more profound reference-of-thought for construing/conceptualising existential-reality putting such a prior episteme in question, this induces a state of mutual ontological-bad-faith/inauthenticity with the prospective episteme and the prior episteme as of the lack of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’’ with respect to social universal-transparency ⟨transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness⟩; and so more than just as of beyond-the-consciousness-awareness-teleology 〈in-existential-extrication-as-of-existential-unthought〉, but further because as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional~firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor, there is ‘a drift from the ideal of knowledge agents only as ‘pertinent in delegation’ as of their ‘kowtowing to existential-reality’ towards a teleologically-degraded exercise of institutional-being-and-craft muddlement. It should be noted that such a notional construct of episteme interpreted herein is implied as of ‘dynamic social <amplituding/formative–epistemicity>totalising–self-referencing-syncretising’ across the entire social spectrum as of notional–episteme dynamically covering both informal institutional settings and formal institutional settings. In the bigger scheme of things, such transcendental epistemic-breaks/epistemic-resetting in transition associated with the ontological-contiguity —of-the-human-institutionalisation-process as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-

wherein ‘medieval scholasticism dogmatic knowledge and positivism/rational-empiricism

point out that epistemic-breaks/epistemic-resetting become inevitable wherein the prior
knowledge episteme de-mentatively/structurally/paradigmatically loses its way as of its initial
justification as safeguarding the prospective possibility of enlightening human knowledge as of
ontology’s-directedness-as-Being, but then by its institutional-being-and-craft
uninstitutionalised-threshold actually de-mentatively/structurally/paradigmatically beyond-
the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-

knowledge; and so, as increasingly the prior epistemic disposition is one that overlooks
prospective inherent transcendental-enabling/sublimating/supererogatory—de-mentativity of
meaningfulness-and-teleology ontological-performance—<including-virtue-as-ontology>
turning rather towards social-aggregation-enabling implications as meaningfulness-and-
teleology ontological-performance—<including-virtue-as-ontology>, undermining the very
notion of the intellectual exercise as about developing/institutionalising the social and not
kowtowing-to-it construed as charlatanism! Further in all such transcendental contexts despite
the fact that the-new is derived from the-old as for instance the Descartes, the Galileos, the Leibnizes and the Newtons as budding-positivists are the outcrop of Scholasticism itself, the new epistemic-break/epistemic-resetting is justified in that even the-old is predicated on upholding Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of ontology’s-directedness-as-Being going by the human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-mentating/structuring/paradigming. Insightfully, that exercise is actually reflected as of temporal-to-intemporal individuations wherein the individual is rather a receptacle of temporal-to-intemporal individuations with variance of mental-dispositions among individuals an issue of variance as of skewness towards temporality/shortness or intemporality; such that even the budding-positivists carried elements of scholasticism but were more definitely of a positivistic outlook, and many scholastics articulated notions which could more fruitfully be developed in a positivistic outlook but were stifled by their scholasticism dogmatic intellectual commitments. In effect, human limited-mentation-capacity however the institutionalisation-level as of human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional—firstnaredness—temporal-to-intemporal-dispositions—existentialism-form-factor implies that it is impossible for the intemporal projection as longness-of-register-of—meaningfulness-and-teleology that prospectively construes of successive frameworks of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness as of implicited-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology—aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional—referential—

Thus the ontological effectiveness of such intemporal-projection as longness-of-register-of—meaningfulness-and-teleology<sup>9</sup> lies rather in undermining the existential possibility of the successive uninstitutionalised-threshold<sup>12</sup>/uninsitutionalisations as of bringing about prospective relative-ontological-completeness<sup>9</sup>-of—reference-of-thought driven by ontological-faith-notion-or-ontological-fideism thus inducing social universal-transparency<sup>10</sup>-

Such prospective intemporal-as-ontological \( ^{9} \) meaningfulness-and-teleology\(^{9} \) is not necessarily perceived at the uninstitutionalised-threshold \(^{02} \) as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology\(^{9} \) as of the said uninstitutionalised-threshold \(^{02} \). This point out that \(^{54} \) maximalising-recomposuring-for-relative-ontological-completeness\(^{87} \)—unenframed-conceptualisation mental-dispositions in their intemporality\(^{7} \)/longness or longness-of-register-of—\(^{7} \) meaningfulness-and-teleology\(^{9} \) are as of a projected-or-anticipated conflatedness of social \(^{10} \) universal-transparency\(^{103} \)–(transparency-of-totalising-entailing, as-to-entailing,<amplituding/formative–epistemicity>totalising—in-relative-ontological-completeness \( \rangle \) for institutional and formal deferential-formalisation-transference as of percolation-channelling.<in-deferential-formalisation-transference>. That is at the uninstitutionalised-threshold \(^{02} \) such intemporal-as-ontological \(^{9} \) meaningfulness-and-teleology\(^{9} \) is pragmatically expounded socially not in terms of its inherent dimensionality-of-sublimating\(^{7} \)–<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth—or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation ideal which is socially-too-abstract but rather as a structuring/paradigmatic secondnatured construct of positive-opportunism as of institutional and formal percolation-channelling.<in-deferential-formalisation-transference> to attain social approbation. It is such a ‘conflatedness \(^{02} \) structuring/paradigmatic secondnatured construct of positive-opportunism \(^{7} \) of institutional and formal deferential-formalisation-transference as of percolation-channelling.<in-deferential-formalisation-transference> to attain social approbation’ that holds together in social \(^{103} \) universal-transparency\(^{103} \)–(transparency-of-totalising-entailing, as-to-entailing,<amplituding/formative–epistemicity>totalising—in-relative-ontological-completeness \( \rangle \) temporal-to-intemporal solipsistic mental-dispositions as of a given
secondnatured institutionalisation. Out of such a conflatedness\(^{12}\) structuring/paradigmatic secondnatured construct, intemporal-as-ontological meaningfulness-and-teleology\(^{99}\) is not necessarily perceived as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology\(^{99}\). In other words, the ideal articulation of base-institutionalisation meaningfulness-and-teleology\(^{99}\) in recurrent-utter-uninstitutionalisation, just as that of universalisation in base-institutionalisation–ununiversalisation, positivism/rational-empiricism in universalisation–non-positivism/medievalism, and prospectively notional–deprocrypticism in positivism–procrypticism; are only pertinent for attaining social approbation as of their conflatedness structuring/paradigmatic secondnatured construct of positive-opportunism\(^{75}\) of institutional and formal deferential-formalisation-transference as of percolation-channelling-<in-deferential-formalisation-transference>. This highlights that from the perspective of immediate-or-short-run social approbation, it is simpler though ontologically flawed as of constitutedness\(^{14}\) to engage a registry-worldview/dimension at its uninstitutionalised-threshold\(^{102}\) rather by an incrementalism-in-relative-ontological-incompleteness\(^{99}\)—enframed-conceptualisation mental-disposition on the basis of its prior relative-ontological-incompleteness-of-reference-of-thought or its same metaphysical framework of contention rather than adopting at its uninstitutionalised-threshold\(^{12}\) a more complex but ontologically-veridical maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation mental-disposition on the basis of the prospective relative-ontological-completeness-of-reference-of-thought or superseding metaphysical framework of contention as of conflatedness\(^{14}\). That is, engaging a non-positivism registry-worldview/dimension meaningfulness-and-teleology\(^{99}\) with respect to say notions-and-accusations-of-sorcery on its same terms in case of an accusation of sorcery to imply the other is the sorcerer, etc. will sound more credible as of its wooden-language-{imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of–

performance -<including-virtue-as-ontology>) in many ways necessarily has to project out of ‘ordinariness of thought’ for pretence of arriving at a sound construct capable of a most profound reflection of social ontological-veridicality. Consider with respect to a most profound emotional-involvement the issue of human imperilment as a test for the capacity for such requisite depth of transcendental contemplation. Consider for instance that tens of millions including soldiers killed in both the first and second world wars pass for mere victims of the wars in a bizarre twist of mutual totalising–self-
referencing-syncretising/circularity/interiorising/akrasiatic-drag that shuts-off-the-mind to the odious reality of mutual genocide, to say the least. Consider that in Russia a dictator responsible for killing about 25 millions of his own citizens is still considered a national hero by the
majority. Consider that the first president of the United States in position of power was a slave-owner thus encouraging the Atlantic slave trade that led to genocidal proportions of deaths but he is venerated by a majority as the greatest U.S. President. Consider in a different sense though non-exculpatory that Heidegger a leading intellectual joined the Nazi party leaving 2 years later with hardly any critical influence on the party and is universally condemned today. Consider as well that many an intellectual or public figure today actively or passively voiced for the recent wars killing millions whether in the Middle-East or elsewhere with a corresponding social indifference and mental shut-off. These profound considerations highlight the contemplative depth to which the social thinker needs to get to in order to truly be engaged in a transcendental-enabling/sublimating/supererogatory-de-mentativity ontological-primemovers-totalitative-framework32 construal as implied with notional-depropripticism as preempting—disjointedness-as-of-reference-of-thought and so be able to keep their head up from drowning in human <amplituding/formative–epistemicity>totalising–thrownness-in-existence72 (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory-de-mentativity to my human-subpotency/ hyperbole-of-temporal-to-intemporal-ontological-performance72-<including-virtue-as-ontology>) in order to be able to produce ‘veridical ontology’ on a same parity as nature constrains on the natural sciences. Effectively, such transcendental insight points out that existence/existential-possibilities is inherently a radical ontology beyond our <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag72 in existence/existential-possibilities as ‘hyperbolic pretences of ontology’. This author thinks that there can effectively be an engaging and constructive approach for arriving at such a depth of radical ontology warranted by existence/existential-possibilities that is transcendental-enabling/sublimating/supererogatory-de-mentativity for the social avoiding the platitudes of our times such that many an intellectual have even given up to ‘this all-powerful emotional-
involvement element of the social’. Human <amplituding/formative–epistemicity>totalising–thrownness-in-existence41 (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance47–<including-virtue-as-ontology>) implies the need for a sound perpetuating construct of universal projection as intemporality71–or-longness-of-register-of–meaningfulness-and-teleology99 as the opportunity for prospective transcendental-enabling/sublimating/supererogatory–de-mentativity. Such a construct is a ‘response construal’ that inherently enables transformative universal implications as beyond presence issues and complexes as it sublimates presence out of its failure. This is unlike the all too frequent construct of ‘reactionary construal’ caught up in presence as it is presence-serving and so whether as of positive or negative reaction; as even as a positive act a reactionary construal is hardly of entailing–<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness87 thus hardly as of aetiologisation/ontological-escalation. A hero as of a positive ‘reactionary construal’ may perfectly prevent a crime from happening and save the day but then such action is not dependable and the outcomes are unreliable as well together with the possibility on occasion of wrong judgement and/or wrong action or usurpation; thus the social construction of crime prevention needs an intellectualised social ‘response construal’ mechanism of universal implication that ensures dependability of crime prevention as of the foresight of law and policing management construed as of an intemporal-as-ontological intellectual projection exercise. This same depth-of-thought is warranted across the dynamic scope of the social including the political for true transcendental-enabling/sublimating/supererogatory–de-mentativity beyond normative conventioned constructs bound to hold-up the possibility of prospective ‘visions of humankind emancipation’. Such a depth of contemplation will fathom for instance that humankind appeared on earth about 100000 years ago but the pervasive de-
mentative/structural/paradigmatic determinism of the nation-state which became common just about 500 years ago has been a source of much of humankind’s problems as of ‘reactionary construal’ and humankind’s constitutedness to the notion of nation-state seems to create an impasse for human Being-and-contemplative development. Consider again the possibility capable of arising as of a ‘response construal’ as effectively articulated by Derrida in his analysis of spirit. Derrida grasps that Heidegger strove to produce universal human meaningfulness-and-teleology but was caught up in the <amplituding-formative-epistemicity>totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supercratory-de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance -<including-virtue-as-ontology>) as spirit failed to universalise and so Heidegger couldn’t carry the effective implications of his work to its true universal conclusion as he was caught up in the ‘reactionary construal’ of them-and-us, as his commitment to the ‘us’ overlooked/didn’t-come-into-grips with what the ‘us’ was doing, not to mention the possibility of him actually acting as transcendental over the them-and-us as a position of making a universal ‘response construal’.

This problem isn’t particular to Heidegger but for the fact that the underlying regime of ‘us’ were the Nazis, as the them-and-us logic is intellectually rampant such that even Derrida was being condemned by many for not adopting it. The question can be asked whether any genuine intellectualism as providing a ‘response construal’ for humankind overall can construe of emancipation meaningfulness-and-teleology in them-and-us basis and whether this isn’t a recipe for potential disaster as all them-and-us rationale are just variances of the same insanity!

We can imagine that a true understanding and universal application of Derrida’s spirit insight as a ‘response construal’ could have educated thought-and-intellectualism and prevent say the subsequent Rwanda and Burundi genocides in Africa from occurring with many supposedly normal and educated persons caught up in the overall mobbishness; but such a lesson can
as the basis/grounding to then construe/conceptualise meaningfulness-and-teleology failing to factor in that existential phenomenal-abstractiveness conflates-in-effecting-wholeness-as-of-profundness-and-completeness-to—meaningfulness-and-teleology all the way to consciousness as apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument for the possibility of meaningfulness-and-teleology to then arise on the basis of such a given apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument; given that it is consciousness that teleologically-registers/recognises phenomenal-abstractiveness as of meaningfulness-and-teleology in addition to the implications thereof with regards to the varying-as-transcending nature of consciousness with human limited-mentation-capacity-deepening arising in further conflatedness as of human maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation in an exercise of <amplituding/formative–epistemicity>totalising–purview-of-construal’, and so as of a retrospective to prospective insight. This notion of conflatedness construal of existence as of becoming-in-existence-rather-as-subsumed-in-existence is critical in that all notions that naively imply an intercession between human becoming and existence construed as existence-in-existence, such as the transcendental ego perspective, end up in constitutedness as the said ‘transcendental ego cannot invent existence as if preceding existence’ thus inducing constitutedness. Rather existence—as-the-absolute-a-priori-of-conceptualisation-and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation—<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporeticism-overcoming/unovercoming’> is by itself construed as ‘the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to—‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’ with nothing else outside or preceding it’; as existence is an implied-axiomatic-construct-construed-as-reference-of-thought as an implied-theory, with the ‘implied about existence’ arising as of a given/specific apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as of a given human limited-mentation-capacity implied registry-worldview/dimension consciousness, such that ‘meaningfulness-and-teleology’ is as of existence’s implied axiomatic-devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness-as-of-instantiative-context with no ‘meaningfulness-and-teleology’ construable outside it but for an epistemic-totalising—<renewing-realisation/re-perception/re-thought of prospective apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reference-of-thought> as of human limited-mentation-capacity-deepening implied prospective registry-worldview/dimension consciousness and its corresponding existence’s the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to—‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’ implied axiomatic-devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness-as—

Such a conflatedness\(^12\) insight as of notional–deprocrypticism rather points out that soundness-or-ontological-good-faith/authenticity\(^8\) of meaningfulness-and-teleology\(^9\) ontological-performance\(^7\)-<including-virtue-as-ontology> arises as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^1\) involving the ontological-contiguity\(^9\)—of-the-human-institutionalisation-process\(^77\) induced various consciousnesses up to the protensive-consciousness enabling transcendental centered–epistemic-totalisation, as of human limited-mentation-capacity-deepening\(^7\). Actually, this author holds that the very fundamental handicapping issue to meaningfulness-and-teleology\(^9\) as of the philosophical tradition lies in
expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism prospective relative-ontological-completeness–of–reference-of-thought. Such that it thus construes as absolutely reflecting existence/existential-possibilities by operations of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity on the basis of that given determination of reference-of-thought–categorical-imperatives/axioms/registry-teleology with the consequence that its constitutedness, since it doesn’t allows for superseding existence/existential-possibilities, now ‘contradictorily-and-naively supersedes-and-is-determinative-of existence itself’ rather than taking its cue from the conflatedness of existence/existential-possibilities given the imbricatedness/threadedness/recomposuring of existential-instantiations and as reflected at registry-worldview/dimension depth of construal as of reference-of-thought; as it then fails to grasp that ‘there is no understanding to be had outside the conflatedness of existence as of prospective relative-ontological-completeness–of–reference-of-thought’ with any such conceptualisation being nothing but vague virtuality that is not as of ontological-contiguity and ontological-veracity. Thus the problem of the philosophical tradition is notionally one of erroneous constitutedness, and this issue is recurrent-beyond- historiality/ontological-eventfulness/ontological-aesthetic-tracing-with-the-latter-only-a-bi-manifestation-of-the-reccurence,-as-psychically-recurrent as of human shallow-to-deepening–limited-mentation-capacity,–as-limited-mentation-capacity-deepening due to inherent human temporality/shortness and intemporality/longness across all registry-worldviews/dimensions, and speaks of a human existential-extrication-as-of-existential-unthought disposition reflected as historiality/ontological-eventfulness/ontological-aesthetic-tracing as of the notional–conflatedness of notional–deprocrypticism behind the reality of a conceptualisation of human nature rather more completely as of institutionalisation and uninstitutionalised-
threshold mental-dispositions. As highlighted before: consciousness is the point-of-focus as-of-notional-deprocrypticism-reflected-historiality/ontological-eventfulness/ontological-aesthetic-tracing ontological-performance-including-virtue-as-ontology, so-derived as it solipsistically constructs-and-reconstructs underlying ‘coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment as of ontological-primemovers-totalitative-framework causality-as-to-projective-totalitative-implications,-for-explicating-ontological-contiguity and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as human) and developing meaningfulness-and-teleology as of understanding/reconstruing/correcting/adapting/maturing, taking its cue from the conflatedness of existential-instantiations successions as it construes of existence/existential-possibilities as living-being. Such ‘focusing construed as consciousness’ explains why axiomatic-constructs are explicited and implicated/intuited as of a living-being in coherence/contiguity-of-superseding-oneness-of-ontology. The above conception fundamentally underscore the development and how all human knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue arises existentially as of consciousness, and is singularly reflected as of language development which is the ‘signifying mirroring’ of human meaningfulness-and-teleology. The implication here is that meaningfulness-and-teleology as of ‘existential self-referencing’ and ‘existential syncretising-effecting’ construed as in circularity/interiorising/akrasiatic-drag
existential-instantiation contexts adjunctively and not as naturally devolving into the 'underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language' as signification of 'reference-of-thought, such that metaphoricity is rather an ‘adjunctive incorporation’ to the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’. The ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as of its self-referencing ‘meaningfulness-and-teleology’ is always susceptible to the further deepening of human limited-mentation-capacity as of <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought such that prospective ‘meaningfulness-and-teleology’ arises out of the adjunction to this ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and is adjoined to it as metaphoricity, with metaphoricity construed as the signification implied as of syncretising-effecting ‘meaningfulness-and-teleology’. Thus language effectively reflects the <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag reality of human ‘meaningfulness-and-teleology’, as language is always a blending of the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ with the conflation of its metaphoricity. It is interesting to grasp here that a signifying-construct as signification of ‘the self-referencing of ‘meaningfulness-and-teleology’ is always <amplituding/formative–epistemicity>totalising/circumscribing/delineating and is effectively signifying a ‘reference-of-thought as of ‘reference-of-thought—devolving-teleological-dementating/structuring/paradigming—of-meaningfulness’. Such centered-<amplituding/formative–epistemicity>totalising/circumscribing/delineating ‘meaningfulness-

〈amplituding/formative–epistemicity>causality~as-to-projective-totalitative–implications,-for-explicating-ontological-contiguity and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as human) for intelligibility to arise, thus is construed as “reference-of-thought as of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-'human<amplituding/formative–epistemicity>totalising~purview-of-construal'; as we know intuitively that meaning is always about the-one-meaning as well as a perspective/framing/reference/horizon were all the-one-meaning cohere/are-in-ontological-contiguity metaphoricity as of human limited-mentation-capacity-deepening adhocly produces by conflatedness adjunctive significations where these do not fit in with the ‘underlying <amplituding/formative–epistemicity>totalising~purview-of-construal’; as we know intuitively that meaning is always about the-one-meaning as well as a perspective/framing/reference/horizon were all the-one-meaning cohere/are-in-ontological-contiguity metaphoricity as of human limited-mentation-capacity-deepening adhocly produces by conflatedness adjunctive significations where these do not fit in with the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ due to the implications of human limited-mentation-capacity as of relative-ontological-incompleteness of reference-of-thought when conceptualising about such an ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’. But then an adjunctive-metaphoricity-signification so produced as reflected by ‘a transcendental syncretising-effecting meaningfulness-and-teleology like the construal of budding-positivism/rational-empiricism in medieval society, may turn out in-due-course/crossgenerationally to be of an even greater meaningfulness-and-teleology
teleology, its adjunctive-metaphoricity-signification can be construed as of the historiality/ontological-eventfulness/ontological-aesthetic-tracing of crossgenerational positivism/rational-empiricism reappropriation of the ancient mathesis universalis metaphoricity as its very own ‘underlying <amplituding/formative-epistemicity>totalising/circumscribing/delineating signifying-construct of language’ ‘behind the instigative-drive for construing all human knowledge’ by such enlightenment thinkers like Galileo and ubiquitously with Descartes that rolled-over into later thinkers like Leibniz, Newton, and ultimately subverted medievalism and scholasticism leading to our present positivism/rational-empiricism dominant <amplituding/formative-epistemicity>totalising/circumscribing/delineating construct of meaningfulness-and-teleology. Existence itself as the absolute a priori underscores such a conception given the human species sublimation-inducing—textuality/hermeneutics/possibilities-of-becoming-existential-interpretation/axiomatisation-of-existence as of existential-stakes migration; since the existential dispositions of human subjects relative to social-stake-contention-or-confliction arises as of ‘their living existential-instantiations’, and where they construe meaningfulness-and-teleology as not self-referentially covered by the ‘underlying <amplituding/formative-epistemicity>totalising/circumscribing/delineating signifying-construct of language’, they will inevitably articulate adjunctive-metaphoricity-significations to that prior ‘underlying <amplituding/formative-epistemicity>totalising/circumscribing/delineating signifying-construct of language’. This explains the lockstep nature of human meaningfulness-and-teleology and language, with the latter as the former’s signification mirroring, such that institutional-cumulation/institutional-recomposure-<as-to>historiality/ontological-eventfulness/ontological-aesthetic-tracing> is actually as of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay’ construed here as of ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-
existential overtures constraining-and-cohering the child’s adoption-of/integration-with the supposedly ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as of a peculiar, intuitive and dynamic developing metaphoricity where ‘both the child and members of the overall social-construct existentially adjust to each other as of spurious meaningful utterances like mutual babbling and baby-talk’ while implicitly converging towards the child’s adoption/integration at various stages of its existential development of the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as it is reflected by the dynamics of social-construct existential situations/instances, stakes, institutions and processes. But then as might be phenomenologically appreciated the notion of language as of its existential import is thus utterly dynamic as an overall signification construct that is never ‘absolutely present’ but rather ‘immensely existentially present’ with an ‘absolute language signification construct imagery rather implied as of projection/anticipation but not phenomenologically real’ explaining the concrete variation of individuals linguistic performance, as the phenomenality of language is rather held together by ‘the given social-setup underlying supposedly coherent ontological-commitment for its evolving-and-devolving construct of ‘meaningfulness-and-teleology!’ Thus phenomenologically, ‘language arises, ebbs and flows as of a continuously-elusive individual and collective-social consciousness steering that reflects the <amplituding/formative–epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag dynamics of individual and collective-social ‘meaningfulness-and-teleology’, and this equally explains why language evolves and transforms over time. In effect, ‘language is never phenomenologically the complete possibilities of language as an absolute present conception but is rather a becoming as of an immensely-existentially-present signification reflected by individuals and the collective-social
along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. The above insight further points out the pertinence of construing-of and analysing language more completely as of human existentialism/thrownness/facticity, giving that language is more phenomenologically-and-pragmatically a signification accompaniment of ‘individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. This highlights the ‘knowledge implications as of accreting-substitutive-subsumption-as-futural-différance-freeplay’ with regards to such a phenomenological conception of language as a lockstep veridical reflection of human personality development all along the various existential stages as of a notion of the dynamics of social-construct existential situations/instances, stakes, institutions and processes from childhood to adulthood, notwithstanding the fact that the privileged social conceptualisation of language is as of ‘language as the complete possibilities of language as of an absolute present conception usually of a privileged end-institution purpose’. metaphoricity is thus rather construed as of its overall conflatedness of full consciousness development as of Being-development/ontological-framework-expansion-as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology underlying human sublimation-inducing—textuality/hermeneutics/possibilities-of-becoming-existential-interpretation/axiomatisation-of-existence, beyond just mere figurativeness but as of figurative projected implications of individuals and the collective-social meaningfulness-and-teleology as of their peculiarity/differentiation to the entire textual/hermeneutic/reprojective rhetorical-stylistic-semantic delivery, and as such metaphoricity induces totalising/circumscribing/delineating signification in producing, as of accreting-
substitutive-subsumption-as-futural-différance-freeplay, ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and together with its associated adjunctive-metaphoricity -significations. Overall, human explicit and implicit signification as of language as articulated above is equally reflected in human aesthetics/arts like music and even science. Ultimately, human adjunctive-metaphoricity’-significations conflatedness reflecting syncretising-effecting superseding of human self-referencing signifying-constructs as of the need to supersede the limited certitude as of human limited-mentation-capacity, inherently implies that the possibility for ‘absolute certitude as of its theoretical possibility’ lies with such an adjunctive-metaphoricity -significations conflatedness as of syncretising-effecting as ultimately converging towards a deprocrypticism–or–preempting—disjointedness-as-of reference-of-thought and so as of the prospect of an ontologically-veridical Theory of Everything, and insightfully with regards to elucidating the pervasiveness of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay construed as différance in conflatedness’ associated with human existential grasp of knowledge as of the implications of its limited-mentation-capacity. The notion of accreting-substitutive-subsumption-as-futural-différance-freeplay as underlying human limited-mentation-capacity induced différance highlights the phenomenological reality all along humanity’s existence of ‘the privileging of ontological-construction’ as from the perspective/framing/reference/horizon of the end-purpose of the various relevant dominant social agencies and social institutions, and so as reflected as of humanity’s existence historiality/ontological-eventfulness /ontological-aesthetic-tracing. While such a privileging as of immediate/instant existential implications like say parents and society privileging the conception of what is language in terms–as-of-axiomatic-construct of its end-purpose as of the perspective of the child’s integration in various social structures and institutions; however, in the bigger picture the fact that social structures and social institutions dysfunction as of human
of human ontologically-veridical construals and misconstruals towards transcendence-and-
sublimity/sublimation/supererogatory—de-mentativity. accreting-subtitutive-subsumption-as-
futural-différance-freeplay is thus reflective of the fulsome humanity existential ontological-
conceptualisation dynamics than just as of the select ontological-veracity of the privileged as
dominant social and institutional end-purpose perspective/framing/reference/horizon. Consider
in this regard supposedly that ‘traditional classical mechanics axiomatic-construct’ and the
theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs reflect an
historiality/ontological-eventfulness/ontological-aesthetic-tracing as transcendental outcomes of such différance, accreting-substitutive-subsumption-as-futural-différance-freeplay
is not only about the successive <amplituding/formative–epistemicity>totalising–self-
referencing-syncretising/circularity/interiorising/akrasiatic-drag as différance transcendental outcomes as of ‘developed classical mechanics’ and then ‘developed theory-of-relativity-
together-with-quantum-mechanics—axiomatic-constructs’ as of their prospective relative-
ontological-completeness/relative-ontological-contiguity as axiomatic-constructs of ‘the very
same physics <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-
construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, but will grasp the
deeper-level phenomenological insight with regards to all the background efforts and
contributions that ultimately brought about these two successive <amplituding/formative–
epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag
construed as the historiality/ontological-eventfulness/ontological-aesthetic-tracing of the
différance. The implication here resonates with the idea that knowledge is much more than the
construal of conceptual knowledge outcome, but rather its construal as notional–knowledge
involving the dynamic understanding of both its temporality/misconstrual and intemporality
as-ontological-construal as of accreting-subtitutive-subsumption-as-futural-différance-
freeplay involving specifically disambiguation as of human limited-mentation-capacity
dynamics as of deneuterising—referentialism and thus beyond ‘neuterising’ reflecting the difference-in-nature/difference-in-apriorising-or-axiomatising of the uninstitutionalised-threshold and the prospective institutionalisation; as the ‘effecting implications of knowledge’ are more than just about its conceptualised intemporality-as-ontology but involves grasping this together with the implications of temporality, and so because of the circular existential implications of human limited-mentation-capacity. Hence language can be more pertinently construed ontologically as of the social dynamics of existential meaningfulness-and-teleology signification than just as of just an outcome privileged institutional end-purpose perspective/framing/reference/horizon that is in many ways ad-hoc and phenomenologically uninsightful as of the many existential implications behind comprehending language. Thus human privileged social and institutional end-purpose perspective/framing/reference/horizon tend to be in constitutedness. Further such accreting-substitutive-subsumption-as-futural-différance-freeplay is the existentially veridical and effective basis for reflecting historiality/ontological-eventfulness/ontological-aesthetic-tracing transcendental outcome as can be implied in a storied-construct/ontologically-valid-narration as of existentially insightful meaningfulness-and-teleology. Such a perspective should possibly usher in a ‘suprastructural postmodernism in everything’ including such nascent contemplations for breaking out of currently perceived subject-matter doldrums as implied with postmodern social sciences, postmodern humanities, postmodern art, postmodern science, postmodern mathematics and postmodern physics, and so notwithstanding a history of post-structuralism critiques of ontological-bad-faith/inauthenticity ‘with moronic incantations that fail the mark of even bad intellectual arguments as social-aggregation-enabling invocations’, granted as of their beyond-the-consciousness-awareness-teleology-in-existential-extrication-as-of-existential-unthought; as such a statement is not gratuitous given the mere fact that where knowledge-as-of-organic-knowledge as of human intemporality/longness doesn’t take its due place, it is
such an underlying conception of phenomenological profoundness. As such a ‘Derridean quasi-transcendental-freeplay différance’ is what is meant to be understood as a relatively more pertinent ontologically depth for such a more evolved and ‘experimental’ articulation of différance in the strive to maximally undermine <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag implied in the Glas experimental project which goal is well beyond the two texts but more fundamentally a demonstration of ‘sublimation-inducing—textuality/hermeneutics/possibilities-of-becoming-existential-interpretation/axiomatisation-of-existence’. Ultimately, ‘Derridean quasi-transcendental-freeplay différance’ unsuspectingly points out that meaningfulness-and-teleology imply by default a given perspective/framing/reference/horizon, such that as of a <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag facet it is then already compromising nonpresencing–or–withdrawal–or–metaphysics-of-absence–(implicated-epistemic-veracity-of–nonpresencing–<perspective–ontological-normalcy/postconvergence>–or–transcendental-reasoning-of–event–as-prospective-ontology-origination meaningfulness-and-teleology facet. Thus, this author holds that such a ‘Derridean quasi-transcendental-freeplay différance’ is fundamentally incomplete as of comparison with the implied conflatedness of accreting-substitutive-subsumption-as-futural-différance-freeplay which is truly transcendental. The former fails to factor in that human limited-mentation-capacity has to establish the appropriate ‘perspective/framing/reference/horizon implications’ with regards to meaningfulness-and-teleology, and so as disambiguating presencing—absolutising-identitive-constitutedness from nonpresencing–<perspective–ontological-normalcy/postconvergence> by their respective supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibility/setup/measuringinstrument, such that
transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, and so implying human limited-mentation-capacity-deepening; and thus, this point that enables the Derridean freeplay différance as of tendential-deliberation-of-decidability to achieving transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is the full conflatedness reflecting existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation—<as-to-perspective-ontological-normalcy/postconvergence-implied-'prospective-aporeticism-overcoming/unovercoming'> in its 'nonpresencing-<perspective–ontological-normalcy/postconvergence>', and so beyond just a Derridean freeplay différance which is then in constitutedness as not factoring in the process of a tendential-deliberation-of-decidability towards attaining transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. Insightfully, we can grasp that the Derridean freeplay différance becomes as of constitutedness because ‘reasoning itself has become defective’ as presupposing-by-the-Derridean-freeplay to supersede existence—as-the-absolute-a-priori-of-conceptualisation-and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation—<as-to-perspective-ontological-normalcy/postconvergence-implied-'prospective-aporeticism-overcoming/unovercoming'>. So because at the point of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity reasoning is still presupposing thought-determination instead of given up to the possibility of existence’s divulgation construed as ontological-faith-notion/ontological-fideism, and so erroneously become the transcendental-signifier of existence despite the reality of human limited-mentation-capacity which priority at that point should be the need for validation from existence—as-the-absolute-a-priori-of-conceptualisation-and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation—<as-to-perspective-ontological-normalcy/postconvergence-implied-'prospective-aporeticism-overcoming/unovercoming'> and not make any determination priorly, even as of freplay. Furthermore, it is wrong to construe/equate as
imagination such ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality that as ‘hunch’ restores existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’—<as-to-perspective-ontological-normalcy/postconvergence-implied-
‘prospective-aporeticism-overcoming/unovercoming’>, since in reality it is rather pushing reasoning to its very limits in a notional disposition that is not guaranteed, and only occasionally as of tendential-deliberation-of-decidability is it confirmed by existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-
<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-

apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality exhausts-and-supersedes-reasoning as of projection/anticipation/expectancy with no prior certitude, and is more than just imagination which rather comes prior to and is exhausted-and-superseded-by-reasoning. Such a lack of prior certitude explains why transcendence-and-sublimity/sublimation/supererogatory–de-mentativity ‘are not really reasoned-out’ but rather discovered-as-divulged by existence, with the human-subpotency concern being one of adopting the right attitude/mental-disposition/care–and–episteme that allows existence-as-full-potency to come up with the divulgation. Ontological-faith-notion-or-ontological-fideism—
prospective relative-ontological-completeness of-axiomatic-construct-or-reference-of-thought and prior relative-ontological-incompleteness. In this regard we can imagine as of the very same physics <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, the strange feeling upon physicists wedded to ‘traditional classical mechanics axiomatic-construct’ with respect the prospective theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs — maximalising-recomposuring-for-relative-ontological-completeness unenframed-conceptualisation articulation of such ideas as space-time, considering the ether as unreal, considering that the laws of physics are different at atomic scale, etc. as the fundamental basis for understanding the new physics as of its prospective relative-ontological-completeness of reference-of-thought. Such a construal as a shift in axiomatic-construct is more-or-less within the same positivism/rational-empiricism registry-worldview, though it might pretty much be argued that the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs marks the beginning of a proto-postmodern science as of the fundamental human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation developments in physics since then, even though its meaningfulness-and-teleology remains intelligible, more or less, to the positive science essentially by the modern conception of observational and experimental validation. However, the idea of requisite shift in attitude/mental-disposition/care–and–episteme from that simplistic ‘modern conception’ cannot be contested. Such an attitude/mental-disposition/care–and–episteme implied shift as articulated above, construed as of an overall registry-worldview/dimension reference-of-thought transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is rather ‘massively distressing’ when implied ‘as of an instant of transitioning’ since the reality of such attitude/mental-disposition/care–and–episteme transitioning have tended to take place rather crossgenerationally as of human beyond-the-consciousness-awareness-teleology —
existential-extrication-as-of-existential-unthought>. As we can now imagine the transitioning of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme from earlier crude conceptualisations of positivism/rational-empiricism as presently reflecting a more universal valid notion of positivism/rational-empiricism as of its spread worldwide and profoundness in today’s societies. Interestingly, this transitioning nature of human attitude/mental-disposition/care–and–episteme renewal manifestation as of the social collective evolution, and is equally reflected in the individual as-receptacle-of-temporal-to-intemporal-individuations-ontological-performance ←including-virtue-as-ontology>; as at any given moment individuals and society are rather inclined to adopt an attitude/mental-disposition/care–and–episteme of dual-language/split-mentality as of <amplituding/formative-epistemicity>totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance ←including-virtue-as-ontology>). The implied notion of human emancipation is always being articulated in an existentially dual-language/split-mentality that on the one hand fails the implied emancipation and on the other hand implies a strife for such emancipation. Consider in this regard, the attitude/mental-disposition/care–and–episteme of warring nations in the early 20th century all too ready to arm themselves massively in preparation for the world wars and equally very much aware of the need for international peace, or in the 18th and 19th centuries the dual-language/split-mentality of universal human rights and ending slavery in the new world and the slave trade on the one hand and on the other still practicing it up to the point of wars like the American civil war to bring an end to it. In a more prosaic note, the dual-language/split-mentality associated with the evasiveness of emancipatory social and political dispositions as of relevant settings and contexts. In fact, this author will surmise that in many ways we already carry inklings of postmodern deprocripticism—or—preempting—disjointedness-as-of-
apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument attitude/mental-disposition/care–and–episteme as of the dual-language/split-mentality at appropriate contexts and settings extolling our liberality with progressive stakes while in other secluded settings and contexts espouse a damning language regarding such progressive stakes. The idea of requisite attitude/mental-disposition/care–and–episteme\(^5\) renewal as implied for notional ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality induced transcendence-and-sublimity/sublimation/supererogatory–de-mentativity speaks of a ‘reality as of underlying human beyond-the-consciousness-awareness-teleology’\(<\text{in-existential-extrication-as-of-existential-unthought}>^7\rangle\), that reflects a human tacit awareness that the grounding of its meaningfulness-and-teleology\(^7\) is not-certain-as-absolute at any given moment, and that it should be prepared to shift its attitude/mental-disposition/care–and–episteme for more profound-and-complete meaningfulness-and-teleology\(^7\). While such an inclination is more forthcoming as of less profound-and-perceived personal existential implications with regards to the axiomatic-constructs within a \(\text{reference-of-thought}\) as articulated priorly with a shift for the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs within the positivism/rational-empiricism \(\text{reference-of-thought}\), however, as of more profound-and-perceived personal existential implications as drastically implied at the phenomenological depth of \(\text{reference-of-thought}\) transcendental conceptualisation this turns out to be much more difficult to countenance given individuals ‘mental and existential investment’ into meaningfulness-and-teleology\(^9\) as grounded on a given ‘registry-worldview’s/dimension’s reference-of-thought <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^3\) established existential–epistemic-totalisation-of–meaningfulness-and-teleology\(^9\)’ as well as
the ‘psychological comfort’ habituated at the given neuterising. But then every registry-worldview/dimension has its own specific hurdle to clamber-over and that of futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of prospective notional—deprocrypticism is exactly the capacity to construe meaningfulness-and-teleology as of full/complete human consciousness implications as implied by its protensive-consciousness which ultimately doesn’t allow for meaningfulness-and-teleology beyond-the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-unthought> arising as of human prior relative-ontological-incompleteness—of—reference-of-thought. The fact is the ontological-faith-notion—or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality conflatedness implication with respect to existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of—<amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness is such that in reality we are always tacitly aware of the evasiveness of absolute certainty but often rather inclined as of practicality to hang on to a delusion of the results of prior nonpresencing—<perspective—ontological-normalcy/postconvergence> as if of absolute certainty, so-construed as reasoning-from-results/afterthought. But then veridical absolute certainty is ever a promise always held in prospective existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of—<amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness relative-ontological-completeness of apriorising/axiomatising/referencing, and so as of the certainty of human limited-mentation-capacity prospective relative-ontological-completeness—of-axiomatic-construct-or—reference-of-thought—<amplituding/formative—epistemicity>causality—as-to—

This explains why ontology’s-directedness-as-Being is the direction of \(^7\) meaningfulness-and-teleology\(^8\) grounding as always prospective as of prospective relative-ontological-completeness -of- reference-of-thought; and so, as of the successive base-institutionalisation, \(^9\) universalisation, positivism and notional-deprocrypticism registry-worldviews/dimensions nonpresencing-<perspective-ontological-normalcy/postconvergence> respectively as successive \(^5\) meaningfulness-and-teleology\(^9\) grounding for recurrent-utter-uninstitutionalisation, base-institutionalisation-ununiversalisation, \(^10\) universalisation–non-positivism/medievalism, and positivism–procrypticism \(^7\) presencing—absolutising-identitive-constitutedness \(^7\). Interestingly we can appreciate that the attitude/mental-disposition/care–and–episteme\(^3\) as of relevant existential issues of all the prior registry-worldviews/dimensions \(^3\) reference-of-thought are wanting-as-relatively-ontologically-flawed from our positivism–procrypticism as prospective perspective/framing/reference/horizon of \(^7\) meaningfulness-and-teleology\(^9\). However, we are hard-pressed to concede that from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^9\) as of prospective \(^7\) deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought as of its prospective relative-ontological-completeness\(^9\)-of-reference-of-thought, our positivism–procrypticism is wanting-as-relatively-ontologically-flawed; as by reflex every registry-worldview/dimension is inclined to hang on to a delusion of the results-as-afterthought of prior \(^3\) nonpresencing-<perspective-ontological-normalcy/postconvergence> even at its uninstitutionalised-threshold \(^2\) despite its notional-discontiguity/epistemic-discontiguity\(^2\)<shallow-supererogation\(^2\)-of-mentally-aestheticised-preconverging/dementing –qualia-schema> with the prospective registry-
worldview/dimension institutionalisation. Thus, induces its specific 'neuterising as it fails to construe of meaningfulness-and-teleology\(^7\) projectively as of prospective existence-potency~sublimating–nascence, disclosed from prospective epistemic digression as of <amplituding/formative–epistemicity> totalising–renewing–realisation/re-perception/re-thought, in supererogatory–epistemic-conflicatedness \(^2\) relative-ontological-completeness \(^7\) of apriorising/axiomatising/referencing. The implied 'maximalising-recomposuring-for-relative-ontological-completeness —unenframed-conceptualisation notion also underscores the postmodern conception of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation \(^1\) with regards to any <amplituding/formative–epistemicity> totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality, as fundamentally driven as to existence-potency~sublimating–nascence, disclosed from prospective epistemic digression as of <amplituding/formative–epistemicity> totalising–renewing–realisation/re-perception/re-thought, in supererogatory–epistemic-conflicatedness \(^2\) as so validatable by their ontological-primemovers-totalitative-framework \(^2\). Hence it is 'more real in its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation \(^1\) understood as a double-gesture reification \(^6\) for prospective relative-ontological-completeness \(^7\) of axiomatic-construct-or-reference-of-thought’ by its maximalising-recomposuring-for-relative-ontological-completeness —unenframed-conceptualisation as to existence-potency~sublimating–nascence, disclosed from prospective epistemic digression as of <amplituding/formative–epistemicity> totalising–renewing–realisation/re-perception/re-thought, in supererogatory–epistemic-conflicatedness \(^2\) than any other prior non-constructed meaningfulness-and-teleology \(^9\) simply because of the profoundness of its phenomenological depth of projection/anticipation in the quest for ontological-primemovers-totalitative-framework validation, which ordinary <amplituding/formative> wooden-language-(imbued—
averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology-as-of—nondescript/ignorable–void—with-regards-to-prospective-apriorising-implications—doesn’t even bother contemplating about by its incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation reflex of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity as of existence’s presencing—absolutising-identitive-constitutedness. This social knowledge human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation insight translate the reality that ‘conventioning and tradition grounded critiques’ of postmodernism fundamentally misconstrue that they are departing, as of their reference-of-thought, from a less real position to evaluate a more real position; more like the irony of trying to evaluate the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs from a posture of ‘traditional classical mechanics axiomatic-construct’. Here is what fundamentally underlies the naïve misunderstanding of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. For instance, the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs actually reflects that priorly conceptualised-notions like ‘space’, ‘time’, ‘ether’ and ‘the laws of physics at atomic scale had to be the same as at the macroscale’, were all wrong. Thus ‘speaking of the reality of human limited-mentation-capacity as of its existential analytic capacity’ in a state of prior relative-ontological-incompleteness-of-reference-of-thought. It is human limited-mentation-capacity-deepening as of prospective relative-ontological-completeness-of-reference-of-thought as subsequently assuming as more real the notion of ‘space-time’, ‘considering the ether as unreal’, ‘considering that the laws of physics are different at atomic scale from the macroscale’, etc. that as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation exercise brought about the more profound insight enabling the conception of the theory-of-
relativity-together-with-quantum-mechanics—axiomatic-constructs ultimately validated as of ontological-primemovers-totalitative-framework by existence-potency~sublimating-nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>totalising~renewing-realisation/re-perception/re-thought,-in-
supererogatory~epistemic-conflatedness; as all along humankind existence as of human-subpotency, the new reality so-espoused ‘is never about existence in itself as-existence-is-given-whatever-it-is-that-is-given’, but about human limited-mentation-capacity-deepening for human emancipation. Thus implying existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>totalising~renewing-realisation/re-perception/re-thought,-in-
supererogatory~epistemic-conflatedness is ‘not really about any variation as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation directed directly to inherent-existence-as-of-existential-reality/existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-
<amplituding/formative-epistemicity>totalising~renewing-realisation/re-perception/re-thought,-in-
supererogatory~epistemic-conflatedness /intrinsic-reality/ontological-veridicality whatever’, as it rather comes down to the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation as of human limited-mentation-capacity-deepening bringing about a more profound and complete grounding for human construing of the full-potency of existence, which remains-whatever-it-is-ultimately. The postmodern insight here is rather that what is relevant to humankind is human-subpotency development towards the abstract full-potency of existence-whatever-it-is-ultimately. So the notion of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation has nothing to do with the inherent nature of existence/intrinsic-reality/ontological-veridicality. Rather it has to do with ‘enlightening human-subject-
emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation’ of
human limited-mentation-capacity which needs to be deepened before humankind embarks on
the task of ‘conceptualising meaningfulness-and-teleology’ that increasingly reflects
existence/intrinsic-reality/ontological-veridical’. Thus this actually lead to ‘more and more
objective meaningfulness-and-teleology’ as we cannot argue that the theory-of-relativity-
together-with-quantum-mechanics—axiomatic-constructs is less objective than classical-
mechanics—axiomatic-constructs since it involved the human-subject-emancipatory-
relativism-driven-recomposuring-constructivism-towards-singularisation that led to human
limited-mentation-capacity-deepening. Quite the contrary, it is that exercise in inducing
prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-
thought that brings about greater objectivity, as reflected in the ontological-contiguity—or
the-human-institutionalisation-process behind Being-development/ontological-framework-
expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-
and-teleology. That naivety in failing to grasp this lies in the ontologically-flawed mental-
reflex of temporal <amplituding/formative—epistemicity>totalising—self-referencing-
syncretising/circularity/interiorising/akrasiatic-drag, wherein mental-dispositions operate by
default without a double-gesturing, on the ‘wrong assumption that they already have the most
ontologically-developed perspective/framing/reference/horizon for grasping prospective
meaningfulness-and-teleology’; and failing to project/anticipate prospectively the
implications of their very own shallow limited-mentation-capacity implications from a deeper
prospectively-construed perspective/framing/reference/horizon. Such a ‘modern take’ is
susceptible to construe of the presence as of metaphysics-of-presence—(implicated—
nondescript/ignoreable—void—as-to—presencing—absolutising-identitive-
constitutedness)/illusion-of-the-present/present-consciousness/mirage, with hardly any
contemplation of the retrospective and prospective projective-insights for construing
ontologically-veridical meaningfulness-and-teleology. This paradox for human knowledge, as implied with the postmodern double-gesture reification, highlights that the human de-mentating/structuring/paradigming for construing knowledge is similar to H.G. Well’s country of the blind narrative, with the more critical issue being about ‘human blindness which needs to be resolved first before proceeding to see’, as what is to be seen as of the world is already given-whatever-it-is, and our true issue-as-of-knowledge is to develop the necessary human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation limited-mentation-capacity-deepening to see it. This fundamentally underlies the idea of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument/reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness’ as underlying a given registry-worldview’s/dimension’s reference-of-thought for meaningfulness-and-teleology conceptualisation and ontological-performance<including-virtue-as-ontology>. In registry-worldview/dimension terms, the naivety of ‘failing to recognise that human limited-mentation-capacity deepens by human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation paradoxically and ridiculously amounts rather to construing of a prospective registry-worldview/dimension institutionalisation’s reference-of-thought as of its prospective relative-ontological-completeness-reference-of-thought in terms of the prior registry-worldview/dimension uninstitutionalised-threshold’s/uninstitutionalised-threshold’s reference-of-thought as of it prior relative-ontological-incompleteness-reference-of-thought. The argument traditionally made about postmodern-thought as ‘sceptical with regards to ontologically-flawed-metanarratives/ideologies and the lack of objectivity of meaning’ is a wrongly articulated/made argument ontologically, since it is being wrongly articulated/made from the ‘modern perspective/frame/reference/horizon’ which is actually in prior relative-ontological-
incompleteness -of- reference-of-thought as of a shallower limited-mentation-capacity (as to ‘redounding/wavering/waveforming—of-the-referencing-and-the-devolved-referencing-imbued-ontological-performance’ -<including-virtue-as-ontology> as to presublimation and nascent-sublimations overlapping-contiguity-of-referencing-and-devolved-referencing’ associated with historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition) and thus has to be decentered-as-preconverging-or-dementing–apriorising-psychologism. Rather the ontologically-veridical articulation of the postmodern argument as of its actual prospective relative-ontological-completeness -of- reference-of-thought which has to be prospectively centered-as-postconverging-or-dialectical-thinking –apriorising-psychologism over the modern take as prospectively decentered-as-preconverging-or-dementing–apriorising-psychologism, should be affirmatory in articulating that postmodern-thought is about: the appraisal and supplanting of ontologically-flawed-metanarratives/ideologies including socio-econo-political ideologies and ontologically-flawed professed ideologies like demarcating ontological-flawed-ideology-of-science-and-its-distortive-implications from ontologically-veridical-science-in-practice, and its pursuit for the most profound-and-complete objectivity of meaning as of prospective relative-ontological-completeness -of- reference-of-thought by renewing appraisal of intrinsic-reality/ontological-veridicality by human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation as of human-subpotency existential-contextualising-contiguity conflatedness', and it is much more than just a naïve notion of a multiplicity of narratives as wrongly implied from the modern take of existentialisation—enframing/imprintedness—<as-to- historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> necessarily subject to ontological-bad-faith/inauthenticity as of the modern’s take prospective uninstitutionalised-threshold of procrypticism or disjointedness—as-of-reference-of-thought in many ways explaining the difficulties of Derrida and Foucault in effectively qualifying their thought postures (when each

or-dementing —apriorising-psychologism while the postmodern is postconverging-or-
dialectical-thinking”–apriorising-psychologism; as the point of assertion of postmodern-
thought as depcripticism–or–preempting—disjointedness-as-of– reference-of-thought is
actually a point of prospective de-mentation–(supererogatory–ontological–de-mentation-or-
dialectical–de-mentation—stranding-or-attributive-dialectics). Of critical insight here is the fact
that many postmodern authors like Foucault, Lyotard and Derrida adopted stances as of constructivism, relativism and deconstruction are rather ontologically-veridical observations/remarks/‘constatations’ about the conception of social reality from their authentic analysis ‘without going further out-of-the-scope-of-ontological-veracity to ideologise constructivism, relativism and deconstruction beyond their implied ontologically-veridical observations/remarks/constatations’ as many of their critiques poorly misinterpret them; with the implications that their stances are open-ended and receptive to the elucidative justifications for their non-ideologised ontologically-veridical observations/remarks/‘constatations’ about the constructivism, relativism and deconstruction manifestation/conception of social reality. Thus the ontologically affirmatory position adopted herein as of the prospective ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ is not contradictory but rather complementing their positions as it rather reinterprets their observations/remarks/‘constations’ as of human limited-mentation-capacity prospective relative-ontological-completeness ‘-of-’ reference-of-thought <amplituding/formative–epistemicity> causality–as-to-projective-totalitative–implications, for-explicating-ontological-contiguity; wherein for instance, for the recurrent-utter-uninstitutionalisation ‘reference-of-thought ill-health is as of an existential-contextualising-contiguity’-lowest-level-reification perceptivity-as-of-bad-omen while for the positivism ‘reference-of-thought ill-health is as of a perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation. Basically, the ‘hitherto ontologically-flawed postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ in its relation with modernity wrongly implied that it seeks
the validation of modernity, and so as ridiculously as implying that budding-positivism/rational-empiricism should have sought for its validation from medieval-scholasticism. In both cases, the fundamental issue once universal-transparency\(^{103}\) (transparency-of-totalising-entailing, as-to-entailing<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness \}) avails as of overall underlying human ontological-commitment\(^{65}\) as to existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation\(^{96}\) for relative-ontological-completeness, as herein implied originally/as-of-event\(^{37}\) with the ‘prospective/new postmodern \(^{17}\) deprocrypticism–or–preempting—disjointedness-as-of–reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’, is mostly about dismissing the prior relative-ontological-incompleteness\(^7\)-of- reference-of-thought as when a critique of notional-discontiguity/epistemic-discontiguity\(^{62}\)-<shallow-supererogation\(^96\)-of-mentally-aestheticised–preconverging/dementing –qualia-schema> exposes the reality of a dialogical and intellectual inequivalence given their anti-intellectual stances against postmodern-thought preferring to ‘circumvent genuine intellectual engagement’ for extra-intellectual activities of institutional-being-and-craft meant to preserve vested narrow interests beyond-the-consciousness-awareness-teleology \(<in-existential-extrication-as-of-existential-unthought>\). Just as it was perceived as a fool’s errand by the Descartes, Galileos, Diderots, etc., to contemplate of genuine intellectual engagement between their budding-positivism/rational-empiricism ventures with traditional medieval scholasticism, especially with regards to the latter’s institutionally-associated dogmatic censure and persecution, and thus with the former resorting to discursive strategies for universal-transparency\(^{104}\) (transparency-of-totalising-entailing, as-to-entailing<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness \}) as of overall underlying human ontological-commitment\(^{65}\) as to
existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{6} for relative-ontological-completeness \textsuperscript{7}; it is inevitably the case that what is most critically warranted is for the ‘prospective/new postmodern \textsuperscript{17} deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ to articulate its full-fledged discourse as of universal-transparency\textsuperscript{10}–(transparency-of-totalising-entailing–as-to-entailing–<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness\textsuperscript{8}) as of the liberality of thought allowed for in open society notwithstanding such extra-intellectual and media-driven perverted representation of postmodern-thought. The reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor speaking of human shallow-to-deeper limited-mentation-capacity implies that prospective dementative/structural/paradigmatic transcendental knowledge by its so-projected intemporality\textsuperscript{5}, at the uninstitutionalised-threshold\textsuperscript{103}, is not necessarily grasp as intemporal in the overall human social-stake-contention-or-confliction framework as of the lack of universal-transparency\textsuperscript{10}–(transparency-of-totalising-entailing–as-to-entailing–<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness ) for its prospective institutionalisation. Critical for the social validation and institutionalisation of any dementative/structural/paradigmatic transcendental knowledge is the fact that its ‘concurrent ontological-primemovers-totalitative-framework\textsuperscript{7}’ is not sufficiently decisive given that human temporal-to-intemporal nature as of the social-stake-contention-or-confliction framework at the uninstitutionalised-threshold\textsuperscript{102} cannot adjudge-and-commit-to the ontological-pertinence of such prospective transcendental knowledge ‘concurrent ontological-primemovers-totalitative-framework ’. Consider in this regard, the ‘concurrent ontological-primemovers-totalitative-
framework’ of the prospective positivism/rational-realism transcendental knowledge articulated by the Copernicus, Descartes, Galileo, Diderots, etc. as ‘meaningfulness-and-teleology’ of prospective relative-ontological-completeness ‘of reference-of-thought validated by corresponding prospective ‘concurrent ontological-primemovers-totalitative-framework’. Such ‘concurrent ontological-primemovers-totalitative-framework’ was not a sufficient basis for their ideas to be socially adopted by the medieval establishment social-stake-contention-or-confliction framework at its uninstitutionalised-threshold as of non-positivism/medievalism. The point being made here is that within a given registry-worldview/dimension institutionalisation framework the idea of ‘concurrent ontological-primemovers-totalitative-framework’ is only more or less determinant as of the institutionalisation’s internal basis of validation of knowledge grounded on its ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology’, -for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology as of its ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating ‘reference-of-thought–devolving’. However, at its uninstitutionalised-threshold the prospective ‘concurrent ontological-primemovers-totalitative-framework’ as of the prospective institutionalisation’s basis of validation of knowledge grounded on the ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology’, -for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of the prospective institutionalisation’s ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating ‘reference-of-thought–devolving’ will not necessarily meet with the approbation of the prior institutionalisation now construed as the uninstitutionalised-threshold, and so as of mutually beyond-the-consciousness-awareness-teleology<in-existential-extrication-as-of-existential-unthought>. This has to do with the fact that the full-potency of existence that divulges relative ontological-vericality supersedes
human-subpotency epistemising orientation towards its, and thus epistemic constructs as of human-subpotency construal are inevitably ad-hoc to ontological-veracity as of the full-potency of existence; as existence doesn’t adjust to human-subpotency with the reverse being true, equally it is human epistemic constructs that ad-hocly adjust to ontological-veracity as of prospective relative-ontological-completeness. Thus while the idea of ‘concurrent ontological-primemovers-totalitative-framework’ as the basis for the validation of knowledge is inherently ontologically veridical as of a given institutionalisation’s internal reference-of-thought-categorical-imperatives/axioms/registry-teleology, -for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of its amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought–devolving’, however, this is an overrated notion with regards to human social-stake-contention-or-confliction framework at its uninstitutionalised-threshold as external/prospective reference-of-thought–categorical-imperatives/axioms/registry-teleology, -for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of its amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought–devolving’, which should and cannot be ignored by any proponent of prospective de-mentative/structural/paradigmatic transcendental knowledge. Rather human social-stake-contention-or-confliction framework fundamentally subscribes to knowledge, given this paradox, as of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ induced as of a de-mentative/structural/paradigmatic transcendental knowledge ‘concurrent ontological-primemovers-totalitative-framework’ establishing and upholding it. The idea here is that the inherent and direct notions of positivism/rational-empiricism expounded by the Galileos, Descartes, Diderots, Copernicuses, etc. were not the fundamental basis for the ultimate human social-stake-contention-or-
confliction framework validation but rather their derived positive-opportunism that brought about the ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ implied-by-and-deriving-from their notions of universal human rights and open society, technical advances, better social organisation, etc., then leading to a reasoning-from-results/afterthought institutionalisation and enculturation of such (re-originary–as-unenframed/unbeholding/outlier-conceptualisation-{imbued-postconverging/dialectical-thinking ‘projective-insights’/epistemic-projection-in-conflatedness ‘of-notional–deprocrypticism-prospective-sublimation’ } ) originary/event-of-prospective-ontology-origination positivism/rational-empiricism thought. In other words, human dimensionality-of-sublimating ←<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation as inclination to adhere to prospective de-mentative/structural/paradigmatic transcendental knowledge as of its ‘concurrent ontological-primemovers-totalitative-framework ’ is very much limited and such prospective ‘concurrent ontological-primemovers-totalitative-framework ’ however its ontological-veridicality cannot be naively construed as all that which is needed to effectuate social transformation and transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. We can appreciate this for instance in the case of cultural diffusion with respect to many a non-modern traditional social-setting where modern day medicine however its overall ‘concurrent ontological-primemovers-totalitative-framework ’ over other types of premodern medicine, will often be suspected and avoided as of its poorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, and it is only after it has been ‘socially habituated-as-institutionalised’ that it has the requisite ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This equally
manifests as of prospective de-mentative/structural/paradigmatic transcendental knowledge construal, as implied for instance by postmodern-thought and particularly so as postmodern-thought has still been undergoing its full construction. The implication here is that all prospective transcendental "meaningfulness-and-teleology" superseding uninstitutionalised-threshold do not come about as of simplistic continuity but rather as of epistemic-breaks/epistemic-resetting, involving successive ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ instigated-and-upheld by the associated successive prospective ‘concurrent ontological-primemovers-totalitative-framework’ de-mentating/structuring/paradigming of ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology’, -for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology", as of successive prospective relative-ontological-completeness -of- reference-of-thought. The implication of such an indirect nature of human social-stake-contention-or-confliction framework validation of transcendental knowledge as of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ and not just direct ‘concurrent ontological-primemovers-totalitative-framework’ implies that just as prospective de-mentative/structural/paradigmatic transcendental knowledge prospective ‘concurrent ontological-primemovers-totalitative-framework’ could be ‘objected to as of human social-stake-contention-or-confliction framework’ notwithstanding its inherent prospective relative-ontological-completeness -of- reference-of-thought given its prior lack of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’; any such prospective de-mentative/structural/paradigmatic transcendental knowledge must be construed and thought-out strategically as of its ultimate establishment of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ that as of its prospective relative-ontological-completeness -of-
reference-of-thought supersedes the prior relative-ontological-incompleteness-of-reference-of-thought, just as positivism/rational-empricism superseded non-positivism/medievalism scholasticism. Likewise ‘concurrent ontological-prime-movers-totalitative-framework’ ontologically-flawed knowledge can be legitimately overlooked where such knowledge is implied as of priorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This latter cases arise with many a bogus social or natural science study and methodology grounded on the ‘mystifying imprimatur’ of positivistic science, as ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, but then on closer examination turns out to be poorly designed as well as the prevalence of institutional-being-and-craft suboptimal dispositions with regards to truly upholding the science ethos in many situations with regards to the ideal operation and promotion of scientific research; and so, as of human temporal-to-intemporal ontological-performance<including-virtue-as-ontology> of any ‘reference-of-thought categorical-imperatives/axioms/registry-teleology’, for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology’. Already, postmodern interpretations have increasingly been much more relevant practically to many subject-matter domains and activities, with even greater potential for transformative implications if fully acted upon. Furthermore, the ‘prospective/new postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intellligibility/setup/measuring-instrument attitude/mental-disposition/care–and–episteme’ warrants that postmodern-thought hitherto articulated beyond-the-consciousness-awareness-teleology<in-existential-extrication-as-of-existential-unthought> in terms–as-of-axiomatic-construct of the ‘modern take attitude/mental-disposition/care–and–episteme’, need to be translated-as-reconceptualised into its very own ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ as of its own truly postmodern organic-knowledge. The fact is that organic-knowledge is fundamentally driven as of attitude/mental-disposition/care–and–episteme’, wherein for instance Newtonian Physics as of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme organic-knowledge makes little sense and is of little potential if construed as of a medieval or animistic social-setup alchemic or mystical attitude/mental-disposition/care–and–episteme. In this regard, attitude/mental-disposition/care–and–episteme is fundamentally the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument notional~conflatedness as implied by its ‘assumed-and-unflinching transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-
‘prospective-aporeticism-overcoming/unovercoming’>’ for the given attitude/mental-disposition/care–and–episteme true meaningfulness-and-teleology99 ontological-performance77,<including-virtue-as-ontology>. Where beyond-the-consciousness-awareness-teleology99,<in-existential-extrication-as-of-existential-unthought>, the new/prospective attitude/mental-disposition/care–and–episteme given its prospective relative-ontological-completeness78-of- reference-of-thought is wrongly construed as deriving posteriorly from the prior relative-ontological-incompleteness78–of–reference-of-thought, this induces constitutedness13 ‘as has been the case with prior postmodern-thought construed as of a modern take attitude/mental-disposition/care–and–episteme’; thus leading to a sort of postmodern-
thought mechanical knowledge that is in many ways just budding and poorly acted upon. Ultimately, a ‘new/prospective postmodern deprocrypticism–or–preempting—disjointedness-as-of’ reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ crossgenerational development, which is its very own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme, as of ‘deprocrypticism–or–preempting—disjointedness-as-of’ reference-of-thought is rather a notional~conflatedness as of deneuterising protensive-consciousness. The practical implications as well should be that meaningfulness and definitions often articulated about postmodern-thought that do not capture the postmodern deprocrypticism–or–preempting—disjointedness-as-of’ reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme should be rejected; as the tendency for postmodern-thought to be misconstrued or perverted is not accidental, given the very fact that at its very core postmodern-thought is implying a prospective/new prospective relative-ontological-completeness-of reference-of-thought requiring its own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument. In this regard, central to translating-as-reconceptualising prior and new postmodern-thought as of its very own ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of’ reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ organic-knowledge is the requirement for an affirmative mental-reflex with postmodern-thought construed ‘as the appraisal and supplanting of ontologically flawed metanarratives and its pursuit for the most profound-and-complete objectivity of meaning, by renewing appraisal of intrinsic-reality/ontological-veridicality involving its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-
towards-singularisation as of human existential-contextualising-contiguity; and it is much more than just a naïve notion of a multiplicity of narratives as wrongly implied from the modern take of existentialising—enframing/imprintedness—as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition necessarily subject to ontological-bad-faith/inauthenticity as of the modern’s take prospective uninstitutionised-threshold of procrypticism or disjointedness—as-of-reference-of-thought in many ways explaining the difficulties of Derrida and Foucault in effectively qualifying their thought postures (when each was asked whether they were poststructuralist) underlied/organised respectively by messianicity and parrhesia but rather postmodern-thought is of a prospective ‘relative-ontological-completeness’ re-originary—as-unenframed/unbeholdening/outlier-conceptualisation—(imbued-postconverging/dialectical-thinking—‘projective-insights’/epistemic-projection-in-conflatedness—of-notional—deprocrypticism-prospective-sublimation) appraisal of human narratives as to dimensionality-of-sublimating—<amplituding/formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation’ thus implying rather a notional—deprocrypticism institutionalisation ‘unenframed/unbeholdening/bechancing—supererogation parameterisation/reparameterisation—(reflecting-a—supererogatory—decisionality-of-socioinstitutional-conceptions-as-to—‘their-nascent-sublimations-dynamic-preempting-of-presublimatory-decisionality—numbing-traction—desublimation’)—as-so-operationalising—‘scalarisation-as-to—rescalarisation—as—re-ontologisation’. The ‘postmodern—deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme’ should equally enable the avoidance of the erroneously implication of ‘a metaphysical/ideological advocacy’ as postmodern-thought as to human-
the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
which
reference-of-thought
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-
disposition/care–and–episteme is ‘relevant as the attitude/mental-disposition/care–and–
episteme’ of wholly immersed-and-engrossed ‘meaningfulness-and-teleology’. The point
being made here is that our natural inclination is never meant to truly-and-comprehensively
reflect any prior/old/superseded or prospective/new/superseding attitude/mental-
disposition/care–and–episteme by itself but rather in any such exercise always apriorises the
‘present attitude/mental-disposition/care–and–episteme’ and then reflect the other
attitude/mental-disposition/care–and–episteme referred to posteriorly, and hence the latter is
adhocly-and-scantily identified. We can grasp this insight about this natural inclination to
uphold-as-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument the
‘present attitude/mental-disposition/care–and–episteme’ from the fact that ‘originary contacts’
between two cultures of prospective relative-ontological-completeness-and-incompleteness-
reference-of-thought doesn’t mean a wholly immersed-and-engrossed ‘meaningfulness-
and-teleology’ between the cultures, since their natural inclination is to both apriorise ‘their
own present attitude/mental-disposition/care–and–episteme’ and respectively posteriorise the
other culture attitude/mental-disposition/care–and–episteme as of their respectively
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument present
attitude/mental-disposition/care–and–episteme; and so, as the framework of any subsequent
cultural diffusion metaphoricity. Thus to fully grasp what is implied here ontologically by
attitude/mental-disposition/care–and–episteme, beyond the natural inclination, is to understand
that attitude/mental-disposition/care–and–episteme as ‘assumed-and-unflinching
transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-
successive institutionalisations reflect ‘successive and changing conceptions of human-subpotency existential scope’, and so from recurrent-utter-uninstitutionalisation as ‘the most supernatural/mythical/idolised conception of human-subpotency existential scope’ to futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism as the most ‘realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’. Insightfully, what is critical about ‘the conception of human-subpotency existential scope’ is the paradoxical fact that the more waywardly supernatural/mythical/idolised it is, the least potent has been human-subpotency mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’, while the more waywardly realistic/authentic/unexceptional-as-of-the-mediocrity-principle it is, the more potent has been human-subpotency in its mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’. Effectively, ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme ’ implied notional–deprocrypticism is about a radicalisation of the ‘realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’ as of its maximum potency for human subpotent mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’. This radicalisation is grounded on the rational-realism postulate that humankind as of its limited-mentation-capacity-deepening has always encountered its uninstitutionalised-threshold all
uninstitutionalised-threshold. Consequently, by assuming such a positivism/rational-empiricism transcendental outcome reasoning-from-results/afterthought predisposition as the complete basis for construing humankind existential emancipation, ‘the modern take attitude/mental-disposition/care–and–episteme’ adopts an ontologically-flawed ‘conception of human-subpotency existential scope’ that is construed essentially as-of-
<amplituding/formative–epistemicity>totalising–self-referencing-
syncretising/circularity/interiorising/akrasiatic-drag untransvaluated–temporal-intemporality at its ontologically-veridical uninstitutionalised-threshold, as it doesn’t even and fails to recognise any such uninstitutionalised-threshold pointing to its prior relative-ontological-incompleteness-of-reference-of-thought. Thus, the manifestations of temporality/shortness at its unrecognised ontologically-veridical uninstitutionalised-threshold are construed as aberrations/oddities going from this wrongly implied intemporal/longness-of-register-of-
meaningfulness-and-teleology posture in <amplituding/formative–
epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, rather than a recognition of it prior relative-ontological-incompleteness-of-reference-of-thought, implying recognising its uninstitutionalised-threshold with the temporal-to-intemporal implications as of knowledge-notionalisation; thus providing the potency/empowering-consciousness for prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity, as knowledge-notionalisation not only factors in conceptual knowledge dynamics but equally the dynamics of the conceptual ignorances to better skew meaningfulness-and-teleology towards intemporality/longness as of organic-knowledge. The paradox here is that by its ‘most realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’ as of its maximum potency/empowering-consciousness for human subpotent mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-

It is this naivety that underlines the Heideggerian techne concern as we fail to appreciate that the technical and organisational possibilities preceding and associated with a registry-worldview/dimension prospective institutionalisation transitioning of meaningfulness-and-teleology need to be rethought as of the prospective institutionalisation attitude/mental-disposition/care—and—episteme apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reference-of-thought—categorical-imperatives/axioms/registry-teleology, for-aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology, and so superseding that of the uninstitutionalised-threshold. We can appreciate in this regard that budding-positivism/rational-empiricism and its associated liberality that was the backdrop for technical and organisation possibilities that actually required their interpretation in terms—as-of-axiomatic-construct of advancing human emancipation and bringing an end to serfdom in Europe for instance, but as of a perverted twist due to poor appreciation of Being-
drivenness–equalisation individuation reasoning-through that is instigative of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–‘meaningfulness-and-teleology’. Thereof, what is critical for enabling human successive transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is ‘appropriate prospective institutionalisation secondnaturing metaphoricity’. Consider in this regard, that the instigative matesis universalis metaphoricity by the Galileos, Descartes, etc. of budding-positivism/rational-empiricism is de-mentatively/structurally/paradigmatically ‘not a reasoning with non-positivism/medievalism’ but rather ‘reasoning-through or Derridian messianic reasoning’ over non-positivism/medievalism scholasticism’s pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation as of its wooden-language-{imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable—void’—with-regards-to-prospective-apriorising-implications>} reasoning-from-results/afterthought logocentric constitutedness. Such altogether new metaphoricity as of its instigating ‘out of thin air’ the budding-positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and–episteme further inspired its subsequent radicalisation by latter thinkers; wherein for instance, the more thoroughly positivism/rational-empiricism development of ‘the very same physics totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ was undertaken by Newton and Leibniz, extending the metaphoricity further even when we contemplate that in many ways these metaphoricity relaying scientists were still imbued with non-positivism/medievalism mystical and alchemic ideas. This ‘out of thin air’ metaphoricity possibility arises because the ‘full-potency of existence in relation to human-subpotency-as-human-knowledge grasp of that full-potency of existence’ is ever one of nonpresencing-

is rather as of ‘reasoning-

manifestation of procrypticism–or–disjointedness-as-of-
reference-of-thought, and so as of a postmodern affirmatory stance of dialogical inequivalence that goes beyond idling in the
‘modern take rigmarole language’, just as we can appreciate how budding-positivism obviate
non-positivism/medievalism pedantic dogmatism language to affirm
meaningfulness-and-teleology weeding out ornate pedantic detours, to articulate blunt reality as of
deprocrypticism–or–preempting—disjointedness-as-of-
reference-of-thought prospective relative-ontological-completeness reference-of-thought. Insightfully, and as is the case
with all prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity
implied meaningfulness-and-teleology, we can appreciate that the foremost goal of budding-
positivists ‘was not to elicit the direct approval’ of the non-positivism/medievalism established
arrangement, as in many ways they adopted a ‘presencing—absolutising-identitive-
constitutedness consummated/forfeiting posture’ with respect to establishment social stakes,
but rather sought to induce the requisite metaphoricity of budding-positivism for the
destruction-deconstruction of non-positivism/medievalism for prospective positivism, as their
conception of achievement motive were tied down to prospective positivism institutionalisation
as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-
development-as-infrastructure-of–meaningfulness-and-teleology. Likewise, the prospective
‘postmodern deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ is well beyond the notion of eliciting the approbation of the modern take established arrangement in terms–as-of-axiomatic-construct, but rather is of ‘presencing—absolutising-identitive-constitutedness’ consummated/forfeiting posture’, in inducing budding-postmodern metaphoricity for the destruction-deconstruction of the modern take for prospective postmodern-notional–deprocrypticism institutionalisation as of prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology. In both cases, the prospective institutionalisation attitude/mental-disposition/care–and–episteme is ontologically validated as of its prospective relative-ontological-completeness-of reference-of-thought, divulging the vagueness and futility of the pretences and judgments of the destructuring-threshold–(uninstitutionalised-threshold/presublimating–desublimating-decisionality)–of-ontological-performance–<including-virtue-as-ontology>. We can equally appreciate here that such a conception of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is rather as of organic-knowledge and not mechanical knowledge, in the sense that what is critical is the induced apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity for prospective institutionalisation as of prospective ontological-primemovers-totalitative-framework and not simply a mechanical knowledge conception possibly tolerated as of a stale a posteriori adjunctiveness as with the Copernican heliocentric idea initially, needing a latter apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity reinvigoration as of the overall renewal of ‘the very same physics <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. It should be noted that such metaphoricity
rather points to psychoanalytic-unshackling/prospective-grounding/prospective-reification-organic-knowledge nature of such prospective institutionalisation transcendental meaningfulness-and-teleology, which in its prospective relative-ontological-completeness-of-reference-of-thought is ‘a dimensionality-of-sublimating’—amplituding/formative/supererogatory-de-mentativity/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation inventing’ of the prospective notion of ‘thinking/postconverging-ordialectical-thinking—apriorising-psychologism’ as positivism/rational-empiricism thinking or notional—deprocryticism thinking respectively, and so as their successive prospective reasoning—from-results/afterthought. In both cases, such metaphoricy as of its reasoning-through/messianic-reasoning cannot be construed as grounded-as-intelligible on the superseded/transcended registry-worldview’s/dimension’s attitude/mental-disposition/care—and—episteme of medievalism—non-positivism or positivism/rational-empiricism manifestation of procrypticism—or—disjointedness-as-of-reference-of-thought, but rather as of its very own transcendental-enabling/sublimating/supererogatory-de-mentativity prospective institutionalisation attitude/mental-disposition/care—and—episteme of positivism or deprocryticism respectively. Thus such metaphoricy is rather induced as of the framework of prospective concurrent ontological-primemovers-totalitative-framework in establishing its prospective ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. Thus such metaphoricy as of its reasoning-through/messianic-reasoning is more aptly and consciously articulated at a dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension (as of human self-surpassing—existentialism-form-factor,—in-overcoming—‘notionally—collateralising-beholdening-protohumanity’—to—‘attain-sublimating-humanity’—as—to—existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression—as-of—

In this regards, we can appreciate that all human ‘meaningfulness-and-teleology’ arises as of aestheticisation before converging towards ontologisation, just as rightfully implied by Nietzsche’s genealogy of morals, but this doesn’t imply valuelessness (as is often naively implied with Nietzschean thought) since aestheticisation convergence towards ontologisation leads to grander ontological-performance -<including-virtue-as-ontology>. In this regards, we can appreciate that while from our vantage modern perspective the ontological-veracity of the Egyptian cultural system aestheticisation behind the construction of the pyramids will seem inherently impertinent, but that specific human aestheticisation induced technical, scientific and mathematical innovations were of lateral civilisational ontological-pertinence; likewise we can appreciate that while for the atheist the ontological-veracity of religion is unproven, however various specific religions human aestheticisation in many ways relayed laterally the ontological-veracity of universalising-idealisation thinkers as of the relatively conducive social conditions allowing for the arrival of medieval thinkers who then instigated the possibility for modern day science ontologisation; and besides, it can equally perfectly be claimed that even our modern day positivistic civilisation is not beyond a critique of ‘deficient ontologisation’ as we can appreciate the reality of the human aestheticisation of many modern activities (even those associated with technological development) held as of higher interest/worth which ontologisation value is questionable with respect to other possible activities of grander ontologisation but not necessarily held as of higher interest/worth (with the very worst case being media-driven merchandising associated with a generalised dumbing-down and de-intellectualisation increasingly and surreptitiously substituting for reifying intellectualism, increasingly undermining the citizenry capacity for democratic sovereign judgement). This analysis points to the convoluted relationship between human aestheticisation and ultimate ontologisation value. Rather than naïve and simplistic analysis, it is such an insight that better informs Heideggerian and Nietzschean thought with regards to ressentiment and

We can further appreciate the critical impact of the universalising-idealisation meaningfulness-and-teleology infrastructure of the Socratic philosophers and their successors as providing the appropriate meaningfulness-and-teleology infrastructure for the Roman Empire and subsequent religio-political developments unlike the case with say Ancient Egypt and Persia whose non-universalising sectarian cults perpetual ideological conflicts ultimately sapped their stability despite their technical advancement, and likewise Western enlightenment effectively arose as of the induced meaningfulness-and-teleology infrastructure of budding-positivists, with perverted consequences like annihilation of Native Indians in the New World and the Transatlantic slavery rather arising as of their far-flung societies opportunistic activities distortive of budding-positivism meaningfulness-and-teleology infrastructure as so-construed in their core societies in Europe with respect to the ending of serfdom, nascent socioeconomic emancipation and human rights. Thus basically the idea of human value-construction is ever always caught up between on the one hand human limited-mentation-capacity to come to terms with transvaluation as amplituding/formative—epistemicity causality-as-to-projective-totalitative—implications—for-explicating-ontological—contiguity in reflecting holographically—conjagatively-and-transfusively the ontological—contiguity—of-the-human-institutionalisation-process anamnesis as of difference-conflatedness—as-to-totalitative-reification—in-singularisation—as-veridical-epistemic—determinism underlying the human construction-of-the-Self and on the other hand the effective ontological-impertinence/dereification arising in the conceptualising of human value-construction as of a wooden-language—imbued—averaging-of—thought—as-to-leveling/ressentiment/closed-construct-of meaningfulness-and-teleology—as—

This discrepancy (between the human capacity to achieve transvaluation and effective social–value-construction narrative as of any given registry-worldview/dimension) is reflected in the underlying reality that effectively practised human value-construction is the ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon’; wherein social–value-construction across the successive registry-worldviews/dimensions arises as a functional necessity that is meant to reflect supposedly coherent ontological-commitment and so in order to elicit stable social-functioning-and-accordance for social-stake-contention-or-confliction, whether such social–value-construction is ontologically-pertinent or not. In this respect, the reality in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process points to changing ‘de-mentative/structural/paradigmatic marginal equity of social–value-construction’, so-construed as ‘expected equity of all individuals for social–value-construction’ and so rather as from the de-mentative/structural/paradigmatic reference basis of ‘priorly implied-and-justified inequity’ whether the latter is implied-and-justified as of talent, royalty, class, productivity, mere traditional and cultural practice justification, etc.; thus effectively reflecting the overall consequence of social–value-construction as the ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon’. In this regards, social–value-construction arises from
two levels; as of the inherent de-mentative/structural/paradigmatic implication of ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon’ as of ‘priorly implied-and-justified inequity’ and this in conjugation then with the individual inherently appraisable social–value-construction as of ‘expected equity of all individuals for social–value-construction’. In this respect, we can appreciate that an autocrat is more capable of ‘displaying greater social–value-construction’ than an ordinary denizen by the former’s mere social–value-construction ‘priorly implied-and-justified inequity’ as of its status in the autocracy (however an autocrat’s apparent magnanimity on the basis of the prior perspective of the autocratic society will rather be construed as of deficient value-construction as from a prospective perspective of ‘<amplituding/formative–epistemicity>causality~as-to-projective-totalitative–implications,-for-explicating-ontological-contiguity’ comparison to the overall social and virtue progress implications of a better accountable political system, while on the other hand individuals effectively advocating for such a prospective political system may be construed as of deficient value-construction in the prior autocracy), while modern day social–value-construction ‘priorly implied-and-justified inequity’ arises as of politico-bureaucratic, talent, entrepreneurial, socio-historical, traditional and cultural practice justification, etc. implications (but is just as well subject to transvaluation analysis as of ‘<amplituding/formative–epistemicity>causality~as-to-projective-totalitative–implications,-for-explicating-ontological-contiguity’, as it can perfectly be argued that the apparent magnanimity of plutocrats as of a capitalistic economic value-distributive system ‘excessively skewed towards final product/service/financial delivery as-of-first-come-near-monopoly and institutionally-skewed-possibility-for recurring wealth accumulation’ while excessively overlooking/devaluing the return to massive public externalities/external-resources contributions to economic production such as public education, human and social development, infrastructure, basic research, technological research, etc. rather speaks of deficient social–value-construction, especially as
such a system ‘priorly implied-and-justified inequity’ as of its occlusive ‘presencing—absolutising-identitive-constitutedness’ is geared towards propping special interests, warfare spending, anti-taxation, anti-immigration, trivial interest in global human development, co-opted media narrative, etc. as of a suboptimal social–value-construction). But this doesn’t cancel the fact that individuals throughout sublimating ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing notwithstanding any disadvantaged ‘priorly implied-and-justified inequity’ for social–value-construction, intuitively cognisant of the pertinence of human transvaluation have elicited the underlying ontological-veracity/ontological-impertinence of their social-construct value-construction as of its supposedly coherent ontological-commitment to induce the transformation of the social-setup value-construction; such that at various critical times the more salient ‘priorly implied-and-justified inequity’ for social–value-construction had thus been basically intellectual-pertinence-as-of-ontological-veracity such that all other ‘priorly implied-and-justified inequity’ for social–value-construction have tended critically to ultimately be grounded on intellectual-pertinence-as-of-ontological-veracity whether of genuine or surreptitious justification. The more salient issue then for the knowledge-reification of social–value-construction thus lies with its ‘priorly implied-and-justified inequity’ narrative(s) with respect to underlying knowledge-reifying transvaluation implications projection as being of most profound intellectual-pertinence-as-of-ontological-veracity. In this regards, our present rational-empiricism/positivism occlusiveness warrants prospective ‘meaningfulness-and-teleology’ infrastructure transvaluation so-implied as of notional–deprocrypticism or <amplituding-formative>notional–preempting—disjointedness-as-of reference-of-thought appropriate foregrounding—entailment (postconverging–narrowing-down–sublimation as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation in reflecting ‘immanent-ontological-contiguity ’)—as-operative-notional–deprocrypticism; and so as the disparateness-of-conceptualisation—

The occlusiveness of our positivism/rational-empiricism social–value-construction as such from the prospective perspective of “deprocrypticism—or–preempting—disjointedness-as-of—reference-of-thought can be analysed-and-construed as imbued with occlusive collateral aspects of rather nondescript/ignorable–void falsely implying ‘the appropriate exhaustiveness of our rational-empiricism/positivism stances’ thus speaking rather of ideology than ontological-veracity as aptly reflected upon by postmodern-thought. Such occlusive-collateral aspects take the form of economic dysfunction and inequities as occlusively-collateral to economic ideologism, social dysfunction and discriminations as occlusively-collateral to domineering and secluding social narratives, sophist/pedantic and vested interest undermining genuine sovereignty paradoxically as of obscured-and-deluding knowledge and misinformation that undermines individuals sovereign competence and choice with regards to increasingly skewed-contrived-and-limited stakes of the democratic process thus eliciting protest voting, and in the bigger global framework of competing politico-cultural values with individuals and societies rather construed occlusively as collateral damages. Transvaluation analysis thus ensues from the human akrasia-susceptibility-or-akrasiatic-drag complex which implies that the very state of unwariness with respect to prior relative-ontological-incompleteness as of a nihilistic disposition is de-mentatively/structurally/paradigmatically potently conducive/endemising/enculturating of its vices-and-impediments (as so-reflecting the grandest deeds of ontological-performance’–<including-virtue-as-ontology>/morality/ethics,

successive human construction-of-the-Self as from based animality to trepidatious–self-

of the specific social-setup universal-transparency—⟨transparency-of-totalising-entailing,-as-

This then speaks to the fact that ‘human sovereignty and free-will is deflated going by the ontological-veracity of human <amplituding/formative–epistemicity>totalising–thrownness-in-existence’ as of ‘the specific human-subpotency implications as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility’-<imbued-and-‘hermeneutically/reprojectively-educing’–human-subpotency–epistemic-perspective-of-projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-referencing–conceptualisation’; and so, as it applies to human
knowledge-reification\textsuperscript{85} and empowerment from such knowledge-reification\textsuperscript{85} within existence as this defines human ontological-performance \textsuperscript{86} reflected as of constructiveness-of-ontological-performance \textsuperscript{86} and destructuring-threshold-(uninstitutionalised-threshold \textsuperscript{102}/presublimating–desublimating-decisionality)–of-ontological-performance \textsuperscript{71}–<including-virtue-as-ontology>. In this regards, the broader and more profound conception of human sovereignty and free-will as reflected by human \textsuperscript{34} totalising–thrownness-in-existence \textsuperscript{71} is rather grounded in the reality that all humans come into existence as of an overall framework of living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99} within which the notion of human sovereignty and free-will then arises in the very first place; such that in many ways human sovereignty and free-will is collectively predicated to the social-setup social-functioning-and-accordance as of its implied supposedly coherent ontological-commitment\textsuperscript{65}. Thus, on this basis, the reality of human ontological-performance \textsuperscript{71}–<including-virtue-as-ontology> (reflected as of constructiveness-of-ontological-performance \textsuperscript{71}–<including-virtue-as-ontology> and destructuring-threshold-(uninstitutionalised-threshold \textsuperscript{102}/presublimating–desublimating-decisionality)–of-ontological-performance \textsuperscript{71}–<including-virtue-as-ontology>) towards the effective articulation of human sovereignty and free-will is actually one that involves, with respect to human limited-mentation-capacity: ‘the deferential-formalisation-transference overall and underlying social-setup conception of knowledge-reification\textsuperscript{84} and empowerment from such knowledge-reification\textsuperscript{85} as enabling the framework of living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-

Interestingly, such a broader conception of the manifestation of human sovereignty and free-will will recognise that the overall human deferential-formalisation-transference actually has a historiality/ontological-eventfulness /ontological-aesthetic-tracing character that extends right up to the very first humans and as with the production of language and human institutions, with regards to constraining existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of—<amplituding/formative—epistemicity>totalising—renewing—realisation/re-perception/re-thought,—in-supererogatory—epistemic-conflatedness /existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation —<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporeticism-overcoming/unovercoming’>, and as these institutions and institutional practices undergo metaphoricity all along towards our present, and carries effective/ontologically-veridical teleological implication in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-

The point here is that, ‘the individual dimensionality-of-sublimating — <amplituding/formative> supererogatory de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation mental-disposition and expression’ driving the deferential-formalisation-transference knowledge-reification and empowerment from the knowledge-reification as of ‘historiality/ontological-eventfulness/ontological-aesthetic-tracing, even as of poor ontological-performance—<including-virtue-as-ontology> of social—value-construction so-construed as destructuring-threshold—(uninstitutionalised-threshold /presublimating—desublimating-decisionality)—of-ontological-performance—<including-virtue-as-ontology>, can only achieve social-functioning-and-accordance by a claim to be as of supposedly coherent ontological-commitment, whether relatively real or surreptitious; and it is this preceding broader human sovereignty and free-willing disposedness for claiming social—value-construction for social-functioning-and-accordance as of supposedly coherent ontological-commitment that gives the teleological orientation of human meaningfulness-and-teleology in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, as it then exposes human meaningfulness-and-teleology as of human limited-mentation-capacity-deepening to the prospective constraint to be as supposedly coherent ontological-commitment thus inducing the possibility for prospective transcendence—

<including-virtue-as-ontology> as of prospective relative-ontological-completeness implied postconverging/dialectical-thinking–qualia-schema as elucidation of ontological–primemovers-totalitative-framework. Ultimately, the naïve articulation of human sovereignty and free-will as of strict ‘autonomy and independence of human disposedness’ rather speaks of a poor ontological sense-of-things, and as such ontological-veracity ensues the notion of human sovereignty and free-will is rather subsumed as of human-subpotency knowledge-reification and derived empowerment reflexivity in existence; and as apparent in the sciences, we can’t imply that we have a choice of gravity on earth as 6 m/s² rather than the existence-potency–sublimating–nascence,–disclosed-from-prospective-epistemic-digression-as-of

relations-issues-underlying-healthcare-and-medical-delivery). Insightfully, the very essence of
‘overall existence phenomenal appraisal of “meaningfulness-and-teleology”’ as associated
with philosophical aspects (beyond the our artificial subject-matter divisions referring to aspect
where virtue, value, ontological principles and epistemic issues are of central concern) is one of
interpretation given that the ordinary human-framework-of-experiential-existence is ‘a directly
comprehensive and fulsome framework amenable to interpretation’ whereas ‘specific
epiphenomenon–(in-the-overall-ecstatic-existence-supervening-conflatedness’) appraisal of
“meaningfulness-and-teleology” especially as of their unordinary human-framework-of-
experiential-existence like natural sciences while informed by ordinary human-framework-of-
experiential-existence background/sense-of-things further require and accentuate their
epiphenomenal manifestations (which are beyond ordinary human-framework-of-experiential-
existence) with the devising of experimentations (as providing the prolongation for human
interpretation capacity with respect to such epiphenomenal manifestations, as in reality even the
natural sciences are fundamentally interpretative as ‘specifically aphoristic/cogent/pointed
extensions of the underlying human philosophical interpretative disposition for knowledge-
reification’). It is important to grasp here that mere experimentations, as often practised in
many domains, that do not arise because of the veridical need to effectively accentuate
epiphenomenal manifestations as of unordinary human-framework-of-experiential-existence but
rather ‘on the vagueness and naivety that experimentations by themselves demonstrate
profundness’ are ontologically-impertinent (in the sense that the ordinary human-framework-
of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to
interpretation’ is the more critical basis for a profound knowledge-reification – interpretation
than any such ad-hoc and simplistic experimentation vagueness and naivety); and in many ways
this explains experimental delusions in many domains associated with poor reproducibility—
mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation as to the
misunderstanding that experimentation should focus on the very critical epiphenomenal manifestations that are not amenable to the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’. However, as of underlying human-subpotency sovereignty and free-will, what is definitely central to knowledge-reification is that it is grounded on human empowering reflexivity from prospective knowledge as of ‘ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications-as-to-existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought,—in-supenerogatory—epistemic-conflatedness—as-to-the-ontological-normalcy/postconvergence-projective-perspective,—to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy/preconvergence > from such human-subpotency prior reproducibility—mathesis/motif/thrownness-disposition’. This reflects the ontological-veracity that human sovereignty and free-will can only be construed in conflatedness as of human <amplituding/formative—epistemicity>totalising—thrownness-in-existence revealing the epistemic-impertinence of dispositions for ‘presencing—absolutising-identitive-constitutedness as wrongly implying human sovereignty and free-will supersedes existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of—<amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought,—in-supenerogatory—epistemic-conflatedness rather than the epistemic-veracity of difference-conflatedness—as-to-totalitative-reification—in-singularisation—as-veridical-epistemic-determinism <amplituding/formative—epistemicity>causality—as-to-projective-totalitative—implications,—for-explicating-ontological-contiguity of human meaningfulness-and-teleology. We can garner for instance that there is and has never been any truly ‘presencing—absolutising-identitive-constitutedness’ of the sciences as often
wrongly implied by science ideologues, but that scientists across-the-times have allowed existence-potency~sublimating~nascence~-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>totalising~renewing-realisation/re-perception/re-thought,-in-supererogatory-epistemic-conflatedness to manifest itself in determining ontological-primemovers-totalitative-framework; and so, as from the budding science of the days of Galileo and Copernicus, to Newtonian science, to Lavoisier laboratory science, to Einsteinian science to modern day institutional practices of science, with all fundamentally driven not by any ‘purported science-ideology’ but rather the practicality of results as of the constraint of the subject-domains of scientific study together with human limited-mentation-capacity-deepening implications in transforming the conceptualisation within any such specific subject-domains of scientific study as of their existential-contextualising-contiguity knowledge-reification rather than ‘any implied notion that naively supersede existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation<-as-to-perspective-ontological-normalcy/postconvergence-implied-‘prospective-aporeticism-overcoming/unovercoming’>. A further twist to such a poor conception of human sovereignty and free-will in the social arises as of an improper appraisal of the ‘implications of deferential-formalisation-transference as being de-mentatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’. The fact is human sovereignty and free-will is more critically about its ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’ rather than ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’. For instance, a plumber who draws up the costing for a plumbing job explaining to the customer what is advantageously entailed in a convincing manner (as of ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) as they fail to
ensure that their professional assessment will truly resolve the technical issue (as they are just looking to contract the job) is not really advancing the sovereign choice of the customer compared to another plumber who undertakes a candid professional assessment that may not sound advantageous with the customer (as they are more critically interested in the ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) but does solve the technical issue; as any such customer in a deferential-formalisation-transference situation will most likely agree. Such operation of human sovereignty and free-will, beyond more or less simplistic social situations as the case highlighted above, is supposedly implied in the operation of all human institutions as of their inherent deferential-formalisation-transference proxy nature; but in many ways such a notion of ‘implications of deferential-formalisation-transference as being de-mentatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’ gets sunk with the increasing complexity and size of human institutions as to what such implications really are, and so especially as the idea of human sovereignty and free-will increasingly becomes abstracted and diffused in the overall social-construct and its institutions as so-associated with ‘the protraction of political and institutional performance, evaluation and accountability’ as reflective of human sovereignty and free-will. However, with regards to the latter as of social protraction of political and institutional action, the possibility of protracted human sovereignty and free-will while indirect comes to be increasingly associated with the sense of ‘equanimity/balance of institutions’ as to their expected ‘equanimity/balance of contending frameworks and policy frameworks as reflexive of socially-perceived commendation and disapprobation’, whether as garnered ‘politically from the equanimity/balance of competing policies and politics as from polling and/or polls trends’ and ‘professionally with the equanimity/balance of mainstream/conventional complementary professional policy-recommendations and professional practices’. The question about the effectiveness of such implied
equanimity/balance as reflecting of human sovereignty and free-will is often raised critically with regards to political and institutional performance particularly during crises. In many ways, the systemic interrelatedness of large institutions as to their complementary end purposes and practices, renders such an assessment of implied equanimity/balance rather detrimental/structural/paradigmatic to the overall politico-institutional system itself; and particularly so as in many ways the possibility of readjustment is much more practically instigated politically especially as with public institutions the individual manifestation of sovereign choice is much more rigidly tied to political action unlike the relative ability for direct disengagement from private entities. However, the fundamental fact that human sovereignty and free-will is ever always a question of the ‘transverse relation of all humans sovereignty and free-will in society’ inherently implies the underlying possibility for the undermining of human sovereign choice as of inherent social differentiation. Beyond transvaluation implications as of the broader overall ‘expected equity of all individuals for social–value-construction’ in relative-ontological-incompleteness /relative-ontological-completeness/(sublimating–referencing/registering/decisioning,–as-self-becoming/self-conflatedness /formative–supererogating-<projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing,-in-perspective–ontological-normalcy/postconvergence>) in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity of-the-human-institutionalisation-process; going by the phronesis/practicality as of our positivism–procrypticism occlusiveness, the assessment of institutionally implied ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’, as advancing human sovereignty and free-will as of deferential-formalisation-transference implications, can be rather straightforward with regards
to relatively compact/self-contained institutional functions and roles usually involved in direct public service delivery but it is much more difficult with spurious/supporting institutional functions and roles. We can appreciate in this regards that public scandals generally tend to arise out of public services and private services delivery institutional frameworks as of their relatively compact/self-contained institutional functions and roles, and that issues of transparency rendering such assessment difficult generally arise with regards to underlying spurious/supporting/supervisory/regulatory institutional functions and roles. In another respect concerning the modern day media, the need for relevant and balanced/equanimous communication and information delivery to the general public has increasingly been taking a backseat, and so fundamentally as the media becomes more of a business-making institution and rather plays a weaker and ancillary/perfunctory role in public policies and politics accountability. This is paradoxically reflected in the reality that despite the huge choice of media today, strangely enough this has rather been associated with greater public muddlement with regards to political stakes and public policies; undermining the political process as increasingly public policies are de-mentated/structured/paradigmed to default/revert into the interests of powerful groups and corporations with the support of increasingly astute, surreptitious and media-savvy political and economic think-tanks, as their media underhandedness in many ways foil the possibility for credible and effective public interest debate as of the distractedness of media reflexive anchoring on a stale, traditional, simplistic and increasingly irrelevant age-old left and right political narrative (and its derived politics and policies narratives) poorly reflecting the sophistication of the electorate that ‘doesn’t live in left and right worlds but a realistic world in want for solutions’! Strangely enough, such a media environment is now laden with public gurus holding outlandish views increasingly given the forum for their opinions (presented as reified-knowledge) not only in marginal media but mainstream media as well out of all proportion with the social and/or relevant expertising
academic/professional resonance of such ideas, and so as of the underlying pretence of freedom-of-speech; as the notion of freedom-of-speech is increasingly being portrayed rather as the rationalising foundation for all sorts of discreetly, whimsically/fancifully and strategically prejudiced influences on media orientation. In this regards, the notion of freedom-of-speech as of such consequentially biased and disproportionate representation undermining ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’ (as thusly failing to advance human sovereignty and free-will as of deferential-formalisation-transference implications), is increasingly becoming the unbecoming/undoing of the modern day democratic political process. Direct media surreptitious drumming-up of specific policy stances and political movements have often interfered with political governance as with the tea-party movement for instance; when considering how political orientations are ‘strategically advanced/framed’ in the media at critical moments for upholding favourable political policies or foiling unfavourable political policies while undermining sound analytic public debate. It is no small wonder that a public opinion increasingly exposed to such media-driven ‘subterfuges’, overlooking the age-old party politics narrative entrapment, has been turning to protest voting as an expression of political disdain. Furthermore, the idea of human sovereignty and free-will across all times is intimately tied down to human limited-mentation-capacity-deepening as to the ‘relative-ontological-incompleteness’/relative-ontological-completeness
eventfulness/ontological-aesthetic-tracing as of the specific human-subpotency as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility

uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, our positivism–procrypticism and will equally vary with prospective dep crypticism–or–preempting—disjointedness-as-of-reference-of-thought as of human limited-mentation-capacity-deepening. This effectively brings up the centrality of causality, as implied with ontological-prime movers-totalitative-framework conflating towards the inherent ontological-normalcy/postconvergence of ecstatic-existence-as-transcendental-signifier, wherein human sovereignty and free-will is construed as of the ‘de-mentative/structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness’, reflecting a human-causative-construction conception in conflatedness /projective-conflating apriorising/axiomatising/referencing about existence as ontologically-veridical (as it is the ‘totalitative epistemic/notional–projective-perspective’ that points out the veridical conception of causation) and so over a traditional reflex construal of
human causation in constitutedness as of any given presencing—absolutising-identitive-constitutedness apriorising/axiomatising/referencing in prospective relative-ontological-incompleteness. This insight about human sovereignty and free-will effectively points to the ontological-flaw of presencing—absolutising-identitive-constitutedness conceptions whether as of the past, present or future, inherently as of failing to account for ‘relative-ontological-incompleteness'/relative-ontological-completeness - (sublimating—referencing/registering/decisioning,—as-self-becoming/self-conflatedness)/formative–supererogating=<projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing,—in-perspective—ontological-normalcy/postconvergence>) as to human-and-social—expectations/anticipations—metaphoricity—as-rede-mentating/restructuring/reparadigming—psychologism that effectively and empirically underline sublimatinghistoriality/ontological-eventfulness/ontological-aesthetic-tracing; and so especially as it is often implied by a ‘naïve type of philosophising that the conception of human sovereignty and free-will can be abstracted outside existential-contextualising-contiguity as to the underlying supposedly coherent ontological-commitment in wrongly implying that human sovereignty and free-will is rather veridically underlied by ‘human social-vestedness/normativity=<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ outside existential-contextualising-contiguity implications of relative-ontological-incompleteness to relative-ontological-completeness. But then such pretence of presencing—absolutising-identitive-constitutedness veracity of ‘human social-vestedness/normativity=<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is both theoretically and empirically non-veridical, speaking more of the reality of power-grabbing/appropriating/usurpatory/arrogating implications than truly rational argumentations as
of knowledge-reification implications. Such ‘human social-vestedness/normativity-
<discretely-implied-functionalism> implied contract/political-arrangement-or-political-
coercion/given-discrete-social–value-construction’ argumentations are often intimately
associated with providing the ‘meaningfulness-and-teleology infrastructure for the powerful
and vested-interests, and their insinuations of ‘human social-vestedness/normativity-
<discretely-implied-functionalism> implied contract/political-arrangement-or-political-
coercion/given-discrete-social–value-construction’ as ‘outside existential-contextualising-
contiguity implications of relative-ontological-incompleteness to relative-ontological-
completeness’ is in effect not truly about the irrelevance of existential-reality implications of
relative-ontological-incompleteness and relative-ontological-completeness but rather more
critically ‘is in effect about defaulting to specifically unavowedly/surreptitiously implied
convenient/advantageous interpretations about existential-contextualising-contiguity which
are not to be subjected to a fulsome analysis for ontological-veracity as of implications of
relative-ontological-incompleteness and relative-ontological-completeness and so on the
basis of merely projecting the term ‘human social-vestedness/normativity-
<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-
social–value-construction’ and thereof implying logical-dueness and articulating logic on the
so-narrowed and uncontested framework’. The reason why such a ‘human social-
vestedness/normativity-<discretely-implied-functionalism> implied contract/political-
arrangement-or-political-coercion/given-discrete-social–value-construction’ supposedly
pertinent argumentation about human sovereignty and free-will cannot hold is that all
meaningfulness-and-teleology (as implied with the logical operation of any such projected
‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-
arrangement-or-political-coercion/given-discrete-social–value-construction’) operate on priorly established apriorising/axiomatising/referencing and inherently all

Consider in this regards for instance as of the presencing—absolutising-identitive-constitutedness\(^13\) notion of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ underlying slavery, such an implied ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is inherently making a claim on existential-reality which rather more aptly reflect a manifestation of power-grabbing/appropriating/usurpatory/arrogating implications as of its apriorising/axiomatising/referencing that one human being has the right to own another human being (as actually not even the logical-dueness of such a ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation can arise from the perspective of relative-ontological-completeness as what is then implied from the relative-
ontological-completeness\textsuperscript{1} perspective is the supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument\textsuperscript{1} in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring–<as-to-preconverging-or-dementing\textsuperscript{1}–apriorising-psychologism> of any such implied slavery ‘human social-vestedness/normativity–<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’). The proof that this is priorly ‘a power-grabbing/appropriating/usurpatory/arrogating implications of apriorising/axiomatising/referencing and not of veridical logical-dueness’ lies in the fact that for instance the Haitian slave revolters wouldn’t countenance the logical-dueness of any such implied logic of ‘human social-vestedness/normativity–<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ underlying their enslavement but merely as of their relative-ontological-completeness perspective of apriorising/axiomatising/referencing undertake in revolt the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring–<as-to-preconverging-or-dementing\textsuperscript{1}–apriorising-psychologism> of any such implied slavery ‘human social-vestedness/normativity–<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’. This points to the reality that ‘human social-vestedness/normativity–<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation do not truly escape the ontological prism as of existence being the absolute a priori, and rather speak of epistemic situations in epistemic-abnormalcy/preconvergence with the possibility for true causality implications to be drawn in relative-ontological-completeness\textsuperscript{1} as of ontological-

The confusion here arises because of the habituation of any such ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ which is then taken to be natural to the point of ‘forgetting/overlooking that it is underlied by apriorising/axiomatising/referencing power-grabbing/appropriating/usurpatory/arrogating implications’ to which even the weaker party might end up getting habituated to (over years, decades or centuries) as of little alternate existential choice and possibilities, and from which point a presencing—absolutising-identitive-constitutedness false sense of logical-dueness as of ‘relative-ontological-incompleteness/relative-ontological-completeness’-(sublimating–referencing/registering/decisioning,-as-self-becoming/self-conflatedness/formative–supererogating-<projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing,-in-perspective–ontological-normalcy/postconvergence>) as to human-and-social–expectations/anticipations—metaphoricity—as-rede-mentating/restructuring/reparadigming—psychologism’ may seem to arise; but as with say the American civil war and the Haitian slave revolt, the reality that such implied ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is rather of flawed apriorising/axiomatising/referencing power-grabbing/appropriating/usurpatory/arrogating implications is met not with logical-dueness and logical-engagement in wrongly validating any such apriorising/axiomatising/referencing but is rather meted with relative-ontological-completeness perspective

In fact, such an interpretation about the ontological-veracity of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation is not only relevantly undermined with respect to say highlighting the supposed weaker party perspective in such a framework of power-grabbing/appropriating/usurpatory/arrogating implications of apriorising/axiomatising/referencing but is equally undermined/subverted when conveniently so by the stronger party for instance in the case of the various allied powers of the second-world war overlooking Nazi scientists direct or indirect participation in war crimes on the rationale of strengthening themselves to ensure future security, and one can imagine the same with regards with many ad-hoc arrangements having to do with spying activities, etc.; thus pointing fundamentally to the ascendency of the ontological implications of human limited-mentation-capacity as to human limited-mentation-capacity-deepening possibilities of relative-ontological-completeness analysis over the absolutising of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation. Thus prospective originariness/reifying/intellectualising—idealising/transcending/sublimating–

institutional wonkiness-of-secondnaturing as to the social-and-institutional-dissipative-

necessarily for-human-studies/for-human-constructs whether with regards to the social or the

referenced/registered/decisioned in the human consciousness (individual consciousness and

The taxingness-of-originariness (as to the direct relation between human-subpotency and existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising~renewing-realisation/re-perception/re-thought,-in-supercerogatory–epistemic-conflatedness >) is effectively what underlies human institutional paralysis and social-vestedness/normativity-<discretely-implied-functionalism> as well as the possibility for prospective human construction-of-the-Self in the face of increasingly technically aloof/remote and racing technological, organisational and social transformation; such that the requisite human thoughtfulness that can correspondingly broaden-the-latitude-of-human-collective-consciousness is increasingly out of the loop as humankind in the modern positivism age has increasingly become rather a self-subjugating agent to such transformations as to their lopsided material/equipment/accoutrement sublimation implications with the notion of human consciousness sublimation increasingly passivised and blanked to vested social-and-institutional-frameworks-of—referencing/registering/decisioning actions. But then humankind faces the challenge of contemplatively articulating ^[meaningfulness-and-teleology]^ capable of reinventing/recreating and keeping the human at the driver seat rather than an object of unformulated/unthought-of driven existential emergence/becoming as of lopsided material/equipment/accoutrement sublimation over a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by that lopsided material/equipment/accoutrement sublimation) as human consciousness is in want of its very
own corresponding sublimation as to redefining the possibilities/potential for prospective humanity that can further broaden-the-latitude-of-human-collective-consciousness. Such ‘dreary blankness of consciousness’ (beyond-the-consciousness-awareness-teleology `<in-existential-extrication-as-of-existential-unthought>`) is predicated upon and drags along the shiftiness-of-the-Self as from prior human stake-contention-or-confliction conceptualisation in a psychological entrapment of defining naiveties and complexes (so-construed in presencing—absolutising-identitive-constitutedness as historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition), and so towards humankind’s supposed future (as of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology); and in many ways this historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition has already been stifling/stalling the human prospective potential as from the ontological-normalcy/postconvergence perspective conception of future historicity/ontological-eventfulness/ontological-aesthetic-tracing relevant to deprocrypticism—or—preempting—disjointedness-as-of reference-of-thought. Such historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition is fundamentally defined by a certain enduring reproducibility passivity and blankness of human social processes, wary of the implications of prospective renewal possibilities as the psychological entrapment constraints of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition override prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation possibilities, and the prospect for the future is ever so tied down to the psychological entrapment of prior human stake-contention-or-confliction framework that nullifies the possibility for renewal of humanity. Institutionalised historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition thus foregoes the construal of human meaningfulness-and-teleology as a construct of re-
supererogatory-epistemic-confoundedness is bound to ‘make its own weather’ rather as from human-subpotency temporality/shortness; wherein ‘invested’ institutional and theoretical/conceptual postures take on an essence all of their own, and so independently and overlooking the precedence of existential-reality for the possibility for prospective sublimation and knowledge-reification and failing to ‘effectively re-stake/put-back-at-stake in re-originariness/re-origination the capacity of human ontological-performance’-<including-virtue-as-ontology> in a renewing originariness-parrhesia—as-spontaneity-of-aestheticisation’ over already set/established/determining prior reproducibility—mathesis/motif/thrownness-disposition—as-reproducibility-of-aestheticisation, and so failing to be responsive to the fact that human limited-mentation-capacity-deepening rather invokes prospective dimensionality-of-sublimating—<amplituding/formative-supererogatory-de-mentativeness/epistemic-growth-or-confoundedness/transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equality for re-originariness/re-origination (and as ever always such destructuring-threshold—{uninstitutionalised-threshold/presublimating—desublimating—decisionality)—of-ontological-performance—<including-virtue-as-ontology> across the successive registry-worldviews/dimensions abuse of the idea of being at the backend of human institutional-cumulation/institutional-recumposures—<as-to—historiality/ontological-eventfulness—ontological-aesthetic-tracing> as speaking to its own exceptionalism in a naïve <amplituding/formative—epistemicity>totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic drag posture instead of the true instigative exceptionalism of the underlying ontological-contiguity—of-the-human-institutionalisation-process). This temporal/shortness disposition to fail re-originariness/re-origination is of overall social recurrence as to human temporality/shortness <amplituding/formative—wooden-language—{imbued—averaging-of-thought—<as-to—leveling/ressentiment/closed-construct—meaningfulness-and-teleology—as-of—
material/equipment/accoutrement sublimation captured under abstract institutional frameworks of stewardship expecting a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by the lopsided material/equipment/accoutrement sublimation) in order to maximise passive enculturation and merchandising as of ‘presencing—absolutising-identitive-constitutedness -of- meaningfulness-and-teleology’ given ‘historicity-tracing—presencing—hyperrealisation/hyperreal-transposition’. Thus, the possibility for the generalised human subject capacity for consciousness sublimation is seized up and constrained in such socially and institutionally bureaucratising and deterministic frameworks that now de-mentatively/structurally/paradigmatically determine the possibilities of human consciousness sublimation as to their abstracted defining conception of human stake-contention-or-confliction (as of living-development-as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of- meaningfulness-and-teleology) such that the generalised human subject re-originariness/re-origination sublimation imaginary possibilities are already truncated as from prospective ontological-normalcy/postconvergence epistemic/notional–projective-perspective of re-originariness/re-origination as implied with prospective deprocrypticism—or—preempting—disjointedness-as-of- reference-of-thought. Today, many agile initiatives allowing more or less for the expression of the human subject imaginary and so specifically with start-up entrepreneurship increasingly highlight that in many ways traditional social-and-institutional-frameworks-of—referencing/registering/decisioning are suboptimal conceptualisations of human consciousness sublimation possibilities as to their thoroughgoing beholdenness to ‘presencing—absolutising-identitive-constitutedness -of- meaningfulness-and-teleology’ given ‘historicity-tracing—presencing—hyperrealisation/hyperreal-transposition’ bounded to prospective thresholds of passivity and
blanking of human consciousness sublimation possibilities. In many ways because of poor appreciation of the ‘direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness’/“meaningfulness-and-teleology”5 the modern mindset has tended to construe of its lopsided material/equipment/accoutrement sublimation implications naively as implying the comprehensive fulfilment of human potential with poor appreciation/sense that effectively as reflected with prior registry-worldviews/dimensions, the proximity of technology then never implied as today a generalised human consciousness passivity and blankness to the point of relative desublimation/gimmickiness over sublimation (beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>); and so as potently contended by Baudrillard simulacrum conception wherein gimmicky formulaic representations of overall aestheticisation–and–aestheticisation-towards-ontology increasingly substitute for more profound possibilities of human aestheticisation–and–aestheticisation-towards-ontology as “meaningfulness-and-teleology”9 with respect to the potential for prospective human consciousness sublimation as of a totalising-entailing projection of dispensing-with-immediacy-for-relative-ontological-completeness–by-reification /contemplative-distension”. Whereas historically the technological accessibility and proximity to the generalised human consciousness of such events like the invention of metal implements, the plough, writing, the printing press, etc. provided more profound possibilities for human consciousness sublimation in re-ordinariness/re-origination, beyond mere lopsided technological as of lopsided material/equipment/accoutrement sublimation in the framework of ‘a presencing—absolutising-identitive-constitutedness11–of—“meaningfulness-and-teleology”’ given ‘historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition’ that passivises and blanks thus undermining/stifling the possibility for prospective “historiality/ontological-eventfulness”/ontological-aesthetic-tracing. This patent elucidation of the decoherencing-structure—of—meaningfulness-and-teleology—for-institutionalisation as to such a supposedly most abstract and enlightening-giving notion that is philosophy is a basic insight (as construed from the ontological-normalcy/postconvergence epistemic/notional–projective-perspective) of desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition psychological entrapment with respect to the overall prospective sublimating historicity/ontological-eventfulness/ontological-aesthetic-tracing (which de-mentatively/structurally/paradigmatically seems to be entrapped/stifled in human taxingness-of-originariness). Effectively, human decoherencing-structure—of—meaningfulness-and-teleology—for-institutionalisation arises as of ‘taxingness-of-originariness (what has gone before aesthetically structures/paradigms distortedly the possibility for the later aestheticisation). The idea of superseding the human registry-worldview’s/dimension’s institutionalisation decoherencing-structure—of—meaningfulness-and-teleology—for-institutionalisation (as to ‘abstractly projected finality in reflecting holographically—conjungatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process”) for prospective sublimating historicity/ontological-eventfulness/ontological-aesthetic-tracing, patently makes obvious what the true implications of prospective deprocrypticism—or—preempting—disjointedness-as-of—reference-of-thought project with respect to its dispensing-with-immediacy-for-relative-ontological-completeness—
presencing–hyperrealisation/hyperreal-transposition (beyond the implications of taxingness-of-originariness as to: what has gone before aesthetically structures/paradigms distortedly the possibility for the later aestheticisation); such that the notional–deprocrypticism potential is ‘a wholly other of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition’ as to the implications of its re-originariness/re-origination for prospective historiality/ontological-eventfulness/ontological-aesthetic-tracing beyond foregone aestheticisation—and–aestheticisation-towards-ontology in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process (in truly reflecting the ‘full human-subpotency potentiation’ as to the most profound human capacity for dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension). Its defining question is whether and how can the human reconstrue meaningfulness-and-teleology in re-originariness/re-origination beyond its trailing/dragging foregone aestheticised meaningfulness-and-teleology construal? This limitativeness of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition is fundamentally an issue of human psychological entrapment ‘defining naiveties and complexes’ as to human shiftiness-of-the-Self as of its presencing—absolutising-identitive-constitutedness (construable abstractly as fundamentally subpar to human effectuation potential but for the fact that the psychological entrapment is a paradoxical circular constituent of the human as to its ‘notionally–collateralising-beholdening-protohumanity by sublimating-humanity existentialism-form-factor’). Human presencing—absolutising-identitive-constitutedness as the very seeding disposition for historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition is ever always characterised by its immediacy-reactive-criticality (over panoramic-sublimating-criticality) as to its constraining aestheticisation—and–aestheticisation-towards-ontology framework; such that the propensity for human meaningfulness-and-teleology to be instigated (as to human limited-mentation-

Such that, prospective \textsuperscript{27} deprocrypticism--or--preempting—disjointedness-as-of-reference-of-thought (with respect to obviating of prior desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition imbued ontological-performance\textsuperscript{7}--<including-virtue-as-ontology\textgreater{} implies the superseding of the ontological-veracity of such presencing—absolutising-identitive-constitutedness\textsuperscript{11} human sublimating-over-desublimating social-and-institutional-constructs—of—meaningfulness-and-teleology — in-cumulation/recomposuring (and so with regards to human living-development--as-to-personality-development or institutional-development--as-to-social-function-development or Being-development/ontological-framework-expansion--as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\textsuperscript{2} ), as to the fact that these end up overtly or covertly drawing their inherent justification on the basis of their inherent prior aestheticisation—and—aestheticisation-towards-ontology as of human social-vestedness/normativity--<discretely-implied-functionalism\textgreater{} rather than any relevant underlying supposedly coherent ontological-commitment\textsuperscript{5} as their social-vestedness/normativity--<discretely-implied-functionalism\textgreater{} increasingly become dépassé (prospectively ontologically-invalid), thus rather stifling the requisite dispensing-with-immediacy-for-relative-ontological-completeness -by-reification\textsuperscript{7}/contemplative-distension\textsuperscript{5} and thus marring prospective historicality/ontological-eventfulness\textsuperscript{9}/ontological-aesthetic-tracing. Actually, the notion of hyperreality--as-to-its-simulacrum implications highlighted by postmodern-thought is more
tracing—in-presencing—hyperrealisation/hyperreal-transposition as of its implied contrastive apriorising/axiomatising/referencing—psychologism of (relative-ontological-incompleteness\(^5\) of notional-discontiguity/epistemic-discontiguity\(^6\)-<shallow-supererogation—of-mentally-aestheticised—preconverging/dementing—qualia-schema>) and apriorising/axiomatising/referencing—psychologism of (relative-ontological-completeness\(^7\) in prospective notional-contiguity/epistemic-contiguity\(^8\)-<profound-supererogation—of-mentally-aestheticised—postconverging/dialectical-thinking—qualia-schema>), can be reflected historically with respect to say ‘an engrained traditional non-positivism/medievalism conceptualisation of the world’ incapable/could-not-bring-itself to mentally process the implications of planets shown with a telescope to be rather going around the sun in a nascent positivism/rational-empiricism attitude/mental-disposition/care—and—episteme\(^9\) implied by Galileo and further conceptually articulated by Descartes’ thinking proposition as to its mathesis\(^1\) universalis implications, such that it is as of a crossgenerational transformation/supererogatory—de-mentativeness that humankind develops the positivism/rational-empiricism apriorising/axiomatising/referencing—psychologism (as of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) to grasp the full de-mentative/structural/paradigmatic implications of positivism/rational-empiricism as from the initial non-positivism/medievalism\(^4\) historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition with regards to the prospect of positivism/rational-empiricism aestheticisation—and—aestheticisation-towards-ontology as meaningfulness-and—teleology\(^5\). Likewise, this insight can be extended in reflecting the historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of ‘an engrained traditional non-universalising conceptualisation of the world’ incapable/could-not-bring-itself to mentally process the implications of the nascent universalising-idealisation attitude/mental-disposition/care—and—episteme implied by the Socratic philosophers as to its
apriorising/axiomatising/referencing–psychologism (as of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) induced crossgenerational transformation. In both instances it speaks to an underlying apriorising/axiomatising/referencing–psychologism ‘wanting of human consciousness sublimation’ to effectively come to terms with ‘manifest existence-potency–sublimating--nascence–disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-

Thus in the bigger picture, Baudrillard’s conception of hyperreality (as implied with respect to our present lopsided technological as of lopsided material/equipment/accoutrement sublimation) speaks to the underlying apriorising/axiomatising/referencing–psychologism ‘wanting of human consciousness sublimation’ as to its capacity to sublimate beyond our positivism–procrypticism

which can actually suffer intellectual regression) unlike the case with epiphenomena as in the
science domains (as providing the prolongation for human interpretation capacity with respect
to epiphenomenal manifestations outside ordinary existential sublimation manifestations). In
this regards, we can appreciate that the strong predictive constraining in many a natural science

formalisation-transference justification as often in the social not the least bothered about the
overall cogency of projected knowledge-reification (thus rather tending towards existential-
extrication-as-of-existential-unthought as of human-subpotency epistemic perspective). We can
consider in this regards how authority actually serves its true deferential-formalisation-
transference role quickly gives to prospective possibilities of sublimating knowledge-
reification wherein for instance in the physics domain-of-study at the beginning of the 20th
century the eminent physicists from say the cohorts of the Poincarés, the Einsteins, the Bohrs,
the Feynmans, etc. successively passing on the baton (as to existence-potency~sublimating–

Interpreting the historical failures associated with colonising or slaving or otherwise—exploitative—or—exterminating societies (as in the specific case of positivism/rational—empiricism technical and scientific development it inevitably implied the coming—together/encountering/meeting of societies worldwide), to then imply such a notion of ‘relative—ontological—incompleteness/relative—ontological—completeness—(sublimating—registering/decisioning,—as—self—becoming/self—confalatedness/formative—supererogating—projective/reprojective—aestheticising—re—motif—and—re—apriorising/re—axiomatising/re—referencing,—in—perspective—ontological—normalcy/postconvergence>) as to human—and—social—expectations/anticipations—metaphoricity—as—rede—mentating/Restructuring/reparadigming—psychologism is irrelevant is rather a nuancing error that fails to assess/evaluate that the more critical issue had to do with ‘the appropriate emancipating attitude/mental—disposition/care—and—episteme’ as effectively and paradoxically such a lack of nuancing can then lead to the interpretation that such historical failures should equally be the unavoidable expectation prospectively in analogous circumstances of socio—cultural disparity of societies, rather than interpreted to mean the
prospective need for the requisite human knowledge-reifying and empowering reflexivity of appropriate human emancipating attitude/mental-disposition/care—and—episteme—in the relationship between the state of relative-ontological-completeness and the state of relative-ontological-incompleteness. Such a wrong interpretation arises as to lack-of—

Such a wrong interpretation actually falls back into prospectively disenfranchising and undermining the emancipation of the state of relative-ontological-incompleteness prospectively as to its human inevitability stance poorly cognisant of the implications of the specific human-subpotency as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility -<imbued-and-

Incidentally, the ‘supposedly positivism/rational-empiricism formulaic/mechanical knowledge contenders’ as of the economic-opportunism-and-then-enculturation of their nefarious practices, were very much countervailing the practice and trend within their own societies of origin undergoing-positivism/rational-empiricism-transformation and the underlying dual-language/split-mentality unscrupulousness was given away as of the ‘out-of-sight demeanour’ in their main societies pointing to historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition distortive-originariness/distortive-origination, rather than being fully assumed as marking positivism/rational-empiricism progress implied historicity/ontological-eventfulness/ontological-aesthetic-tracing originariness. More than just about abstract knowledge-reification the implications of science-ideology are ultimately social and institutional as to the implications of human emancipation; and so in the sense that contrary to what is generally thought, science itself as for-human-studies is the very first-level of social science as of the epistemic implications it projects upon society and social ‘meaningfulness-and-teleology’, and critically so because in reality budding-positivists were actually the very first modern social scientists in the sense that their posturing wasn’t critically about the ‘technicalities of the budding natural science they advanced’ like a heliocentric world or rational-empiricism driven
natural science basis of analysis (as to satisfy their mere natural science curiosity given that in
many ways some of the notions where previously advanced in different forms), but they were
rather critically engaged in a social posturing to epistemically reconstrue the society and social
meaningfulness-and-teleology in those scientific terms and the future elaboration and
development of the natural sciences could only be rendered possible with an open society
responsive to such budding scientific meaning, and it was this social posturing which was the
true source of their troubles and persecution. In fact, such ridiculous historical interpretations
seeming to criticise budding-positivists like Galileo for wrongly making the case for a
heliocentric world for instance are paradoxically based on condemning the latter and other
budding-positivists for having a poor experimental framework as of ontologically-deficient
presencing—absolutising-identitive-constitutedness analyses that fail to factor in that the
very notion of ‘positivistic science experimental framework’/ontological-eventfulness/ontological-aesthetic-tracing’ was developed and enculturated/constructed as scientific practices by these budding-positivists with their medieval societies previously
knowing nothing of such as to their medieval-scholasticism (as to the mere disinclination and
incuriosity to even look through a telescope and draw contemplative consequences); and such a
criticism on the basis of the subsequently developed and more precise modern day science
experimental framework speaks of the characteristic nature of a supposed knowledge-
reification exercise that doesn’t factor in human limited-mentation-capacity-deepening as of

Interestingly, in this regards in many ways the ontological-contiguity~of-the-human-institutionalisation-process~/possibility is hardly just about human ‘mere technical capacity potential’ but it is rather more critically a psychological issue as of desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition psychological entrapment implications that limit/stifle the human imaginary/ideality as to its dimensionality-of-sublimating~<amplituding/formative>supererogatory—de-mentativeness/epistemic-growth-or-conflatedness~/transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation capacity ‘to project in disseminative—selectivity-of-ontological-good-faith/authenticity—over—deselectivity-of-ontological-bad-faith/inauthenticity’ (as to the underlying human ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-

conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation. That said all registry-worldviews/dimensions as of their defining human contemplative moment arising from their very human limited-mentation-capacity induced presencing—absolutising-identitive-constitutedness (while effectively contemplative of prospective progress), hardly/poorly project of prospective emancipation directly on the ontologically-veridical basis of the defining ‘prospectively conceptualisable aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint it is disinclined to face up to’ (associated with its defining prospective transvaluative-rationalising/sublimating-thoughtfulness/historiality-or-ontological-eventfulness-or-ontological-aesthetic-tracing/prospective-ontological-projection/ideality as to prospective originariness-parrhesia,–as–spontaneity-of-aestheticisation) but rather directly proceed as of the ‘perceived aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint it is supposedly inclined-and-amenable to face up to’ (reflecting its threshold as to dimensionality-of-desublimating-lack-of—<amplituding/formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation/desublimating-or-gimmickiness-unthoughtfulness/historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition/social-vestedness-or-normativity/positive-opportunism/disposition), but then the latter is improvisably/uncontrollably potentiatively-transformed into the former as to the former existentially constraining implications of ontological-veracity. Thus the reality of prospective human emancipation in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process rather as of such a ‘human consciousness defensive-driven/unhinging/unbalancing improvising/uncontrolled potentiative-transforming-process so-constrained existentially on the basis of human supposedly coherent ontological-commitment’.
(as to the potentiative transforming/conversion, on the basis of existentially constraining implications of ontological-veracity, of human ‘perceived aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint it is supposedly inclined-and-amenable to face up to’ into human ‘prospectively conceptisable aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint it is disinclined to face up to’) in many ways limits/stifles/undermines/derails human contemplative capacity for prospective emancipative implications (as can be so-contemplated from prospective notional–deprocrypticism conceptualisation of ‘boundless human aestheticisation–and–aestheticisation-towards-ontology’); and so critically as to the ‘presencing—absolutising-identitive-constitutedness’ human <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag social-stake-contention-or-confliction state inducing human psychological entrapment in want for prospective psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring. But then such apparently defining limitation to ‘boundless human aestheticisation–and–aestheticisation-towards-ontology’ when analysed as to the reality of human transformation across the time scale in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process (wherein the successive registry-worldviews/dimensions as from recurrent-utter-uninstitutionalisation, base-institutionalisation, universalisation right up to our present positivism and so as from the appearance of mankind on earth about 200000 years ago) show ‘a time-accelerated metaphoricity potency’ when we consider that our present positivism registry-worldview is just about 500 years; pointing out that as of our specific human-subpotency as to overall overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility -<imbued-and- ‘hermeneutically/reprojectively-educing’–human-subpotency–epistemic-perspective-of-projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-

But then such overcoming of ‘human consciousness tenuous self-surpassing shift in its apriorising/axiomatising/referencing appraisal’ still has to be effectively achieved as to the requisite human prospective development of protensive–self-consciousness in the face of the ever present manifestations of desublimating/gimmicky sophistry and eliciting of human temporality/shortness wooden-language-(imbued—averaging-of-thought—langlevelling/ressentiment/closed-construct—meaningfulness-and-teleology—langlevelling/ignorable–void—with-regards-to—prospective-apriorising-implications) as to incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and so over the requisite maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation. The very forward-facedness of human consciousness as it defines human social-stake-contention-or-confliction is in many ways architectonically determinative and defining (as it projects postconverging/dialectical-thinking–qualia-schema over preconverging/dementing–qualia-schema), with regards to the de-mentative/structural/paradigmatic circular recurrence of

In effect, such a controversy of ontological-bad-faith/inauthenticity never arose (as explained by the prior enculturation of an underlying ‘scientific—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment)’ induced by budding-positivists and associated with their persecution), and further because of the very high predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment) associated with the physical sciences and as generally reflected by the social-stake-contention-or-confliction disinterested natured of ‘much of the basic/fundamental and natural sciences’. However, the case with psychological, social and ‘interest-driven scientific frameworks’ is quite often ‘hardly one of high predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment)’ with the result that such a ‘purist ontological and scientific framing
of supposedly knowledge-reification issues as to prospective sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing’ is either indirectly or directly undermined with social-vestedness/normativity-<discretely-implied-functionalism> ideas which ‘de-mentatively/structurally/paradigmatically speak to an underlying disengagement with the deeper notion of veracity/truth supposedly projected as pure scientific and pure ontological analysis in the relevant domains’, as to the ‘social-stake-contention-or-confliction relative privileging of human methodologising/mutualising/organising/institutionalising epistemic gadgetry’ (surreptitiously associated with <amplituding/formative> wooden-language-(imbued—temporal—mere-form/virtualities/dereification—all/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the- reference-of-thought—categorical-imperatives/axioms/registry-teleology )) over existence-potency—sublimating—nascence,—disclosed-from-prospective—epistemic-digression-as-of—<amplituding/formative—epistemical> totalising—renewing—realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness

This difference between a ‘purist science/ontology epistemic-conception of veracity/truth’ and the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity—<discretely-implied-functionalism> implied contract/political-arrangement—or-political-coercion/given-discrete-social—value-construction’ is critically reflected in the fact that the former orientation is priorly-and-ultimately concerned with existence’s foregrounding—entailment{(postconverging—narrowing-down—sublimation as to existence—as-sublimating—withdrawal,—eliciting-of-prospective-supererogation in reflecting ‘immanent-ontological-contiguity’},—as-operative-notional—deprocrypticism imbued sublimation whereas the latter is critically concerned with ‘conceptions of human abstract interpositions as of elaboration-as—mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity’ that are not necessarily subject to phenomenal/manifest

In many ways taking such ontologically-flawed interpretations seriously induces human impotency and desublimation (as to the implicated contention that the human ‘supposedly has no profound sublimating social and socio-psychological phenomenal/manifest–subpotencies-<in-transitive-conflatedness–reflexivity,-in-the-full-potency-of-existence’s–sublimating–nascence>’ with the ‘supposedly profound phenomenal/manifest–subpotencies-<in-transitive-conflatedness–reflexivity,-in-the-full-potency-of-existence’s–sublimating–nascence>’ construed rather in reductionist terms of biology/neurology or physicalism) as is often also associated with social-vestedness/normativity-<discretely-implied-functionalism> disparate-ness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect–immanent-ontological-contiguity’>; thus ‘actually denying the metaphysical nature and thus ontological nature of the sublimating social and socio-psychological’ such that existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-
supererogatory-epistemic-conflatedness sublimation implications with regards to the social and socio-psychological are hardly contemplated and recognised as so-projected herein as to the ontological-contiguity—of-the-human-institutionalisation-process. But then such reductionism actually fails the ‘necessitation test of any science/ontology’ as in reality it is a gimmicky exploitation of the sublimation of the natural sciences as to their inherent phenomenal/manifest-subpotencies—transitive-conflatedness—reflexivity,-in-the-full-potency-of-existence’s—sublimating—nascence> to then ‘utilise the clout to falsely imply substitutive/reductionist sublimation over the social and socio-psychological phenomenal/manifest-subpotencies—transitive-conflatedness—reflexivity,-in-the-full-potency-of-existence’s—sublimating—nascence>’ (as so-reflected with practices of science-ideology associated with biological/neurological and evolutionary substitutive/reductionist interpretations of the social and socio-psychological). But then the giveaway of such a flawed conception of science/ontology lies in the fact that such approaches do not project any ‘<amplituding/formative-epistemicity>totalising/circumscribing/delineating necessitation frame—of—ontological-contiguity’ as all pretences of science/ontology must demonstrate and aspire to (consider in this regards the ‘<amplituding/formative-epistemicity>totalising/circumscribing/delineating necessitation frame—of—ontological-contiguity’ of physics, chemistry, biological, genetic theories as to the ontological-contiguity imbued ‘foregrounding—entailment—postconverging—narrowing-down—sublation as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation in reflecting ‘immanent-ontological-contiguity’—as-operative-notional—deprocrypticism of their respective inherent sublimating phenomenal/manifest-subpotencies—in-transitive-conflatedness—reflexivity,-in-the-full-potency-of-existence’s—sublimating—nascence> wherein for instance with the physics frame—of—ontological-contiguity succession of theories are developed aspiring cogently for ontological-contiguity of the whole physics epistemic—

The reality of such biological/neurological and evolutionary substitutive/reductionist interpretations of the social and socio-psychological is rather one that points out that the ‘traditional nature versus nurture debate itself is
fundamentally an axiomatically bankrupt conception’ since ‘not even such proponents implicitly point to an underlying human drivenness and functioning of the social and socio-psychological framework on the basis of any such supposed ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity of biological/neurological and evolutionary substitutive/reductionist interpretations’, but rather the strategies of such proponents (beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>) work paradoxically only by impliciting the reality of the ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity of the social and socio-psychological epistemic-conception phenomenal/manifest~subpotencies-<in-transitive-conflatedness—reflexivity,—in-the-full-potency-of-existence’s—sublimating—nascence> (as to their implied sublimating existence’s necessitating implications and consequences), and then surreptitiously project/select/pop-up (in totalisingly-disentailing—discretion/whim-of-thought) opportune/ad-hoc biological/neurological and evolutionary substitutive/reductionist interpretations of the social and socio-psychological frame–of–ontological-contiguity, and so as of vague disparateness-of-conceptualisation-<unforegrounding-disentailment,—failing-to-reflect—‘immanent-ontological-contiguity’>. Such flawed and surreptitious representation that biological/neurological and evolutionary substitutive/reductionist interpretations are the ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ of the social and socio-psychological (rather than the truly inherent social and socio-psychological epistemic-conception phenomenal/manifest~subpotencies-<in-transitive-conflatedness—reflexivity,—in-the-full-potency-of-existence’s—sublimating—nascence> as of their ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological—
innocence/naivety) such biological/neurological and evolutionary interpretations substitutive/reductionist epistemic-conception then provide the room for sophistic/pedantic dispositions that construe of the inherent sublimation in the natural sciences qua natural sciences as the surreptitious opportunity to project gimmicky/desublimating interpretations about the social (on the basis of the ‘hollow impressiveness of the natural sciences’) as a psychological trick/gimmick as to rendering knowledge-reification sublimation in the social impotent with regards to varied social-stake-contention-or-confliction purposes. Such claims often project/imply that analysing the social qua social is just about irrelevant (or paradoxically ‘make their very own subterfuge social interpretations’ as from the psychological trick/gimmick of the projected hollow impressiveness of the natural sciences so-derived from the clout of a natural science without demonstrating the epistemic-veracity for such a bypassing/dodgery as to arrive at the social ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ sublimating implications and consequences). Besides, such claims are often so-associated with vague non-metaphysical as non-ontological conceptualisations of the social in vague disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect–immanent-ontological-contiguity> as to elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity, and thus in many ways further undermine/distract-from the social ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ conception of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in dealing with direct social and institutional issues, crises and failures. A ‘purist science/ontology epistemic-conception of veracity/truth’ equally differs from the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity–<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-

Such a ‘purist science/ontology epistemic-conception of veracity/truth’ construes of knowledge as a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ (as involved in the reconceptualisation of the physics state-of-the-art from Einsteinian physics, Bohrian physics, Feynmanian physics, etc., emphasising rather ‘the constancy of the intemporal individuation as from the ontological-normalcy/postconvergence perspective’ and ‘not about the constancy of any notion of intemporal individual’). Such a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ speak to the more profound reality that the ordinariness of human thought across the succession of human registry-worldviews/dimensions points to their ‘epistemic-abnormalcy/preconvergence ’ despite the delusion of all registry-worldviews/dimensions in their ‘presencing—absolutising-identitive-constitutedness’ as being of ‘absolute epistemic-normalcy’; and it is because of this latter fact (as from the ontological-normalcy/postconvergence epistemic-projection perspective) that prospective human progress and emancipation as of human transcendence-and-sublimity/sublimation/supererogatory–dementativity can occur in the very first place (in contradiction to all such registry-worldviews/dimensions presencing—absolutising-identitive-constitutedness failure to directly grasp their very own <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’ , even as the possibility for prospective

reification’/contemplative-distension out of concern about human prospective Being-
development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-
infrstructure-of—meaningfulness-and-teleology ‘is the most important human and humanity-
producing enterprise’ notwithstanding the paradox that the prior recurrent-utter-
uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism—or-
disjointedness-as-of- reference-of-thought respectively are intellectually-and-morally
undeveloped to be the framework for appraising value-construction as of prospective base-
institutionalisation, universalisation, positivism/rational-empiricism and deprowberyism—or-
preempting—disjointedness-as-of- reference-of-thought respectively in many ways
explaining the underlying implications of human registry-worldview’s/dimension’s
institutionalisation as involving crossgenerational psychoanalytic-unshackling/memetic-
reordering/institutional-recomposuring. This affirmation is not articulated idly as to the fact that
part and parcel of human knowledge-reification is not to allow desublimating thought to
occupy the ground of sublimating thought (as the latter has to include a challenge to the
knowledge-destroying desublimating thought arrogance and wretchedness), however the
subterfuges available to such desublimation whether as of sophistry and mere-institutional-
appendaging as reflecting the veridical prospective human-subpotency—
aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint; taking
hint that it is fundamentally a question about existence-potency—sublimating—nascence,
disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative—
epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-
supererogatory–epistemic-conflatedness^2 and no amount of human mortals
methodologising/mutualising/organising/institutionalising can supersede prospective
sublimating existence’s necessitating implications and consequences as otherwise the very idea
of ontology/science then collapses and the supposed knowledge-reification exercise becomes
pointless but as for institutional parading value. There is simply no knowledge without the
effective demonstrated knowledge-reification implications and pretending otherwise as to ‘virtual
wisdoms’ is nothing more than <amplituding/formative–epistemicity>totalising–self-
referencing-syncretising/circularity/interiorising/akrasiatic-drag. Hence basically the overall
differentiation between ‘purist science/ontology epistemic-conception of veracity/truth’ and
‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of
veracity/truth’ lies with their constraining whether towards inherent existence projected
implications or towards human-subpotency projected implications respectively. This underlying
point has de-mentative/structural/paradigmatic implications with regards to human
‘meaningfulness-and-teleology’ as to human living-development–as-to-personality-
development, institutional-development–as-to-social-function-development and Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of–‘meaningfulness-and-teleology’. This differentiation can be rearticulated in
aestheticisation terms to imply that existence (as to existence-potency–sublimating–nascence,-
disclosed-from-prospective-epistemic-digression-as-of–<amplituding/formative–
epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-
supererogatory–epistemic-conflatedness) is ‘the scalar conception that enables prospective
human sublimation as of aestheticisation-towards-ontology’ while on the other hand human-
subpotency (as to human ‘presencing—absolutising-identitive-constitutedness’
<amplituding/formative–epistemicity>totalising–self-referencing–
possibility-for-the-later-ontologisation’ prospective desublimating historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition as prospectively obviating ontology/ontological-veracity. This insightful grasp of the implications of human limited-mentation-capacity-deepening (construed as from ontological-normalcy/postconvergence epistemic-projection perspective): ‘as rather occurring as from an ontologically deficient grounding’ of relative human limited-mentation-capacity (however ‘the better relative ontological-deficiency’ implied as of relative-ontological-completeness’), emphasises the necessity for the bifurcation of the construal of prospective human ontological-performance—including-virtue-as-ontology> (associated with prospective human sublimation) into: ‘a scalability/immanency perspective (as to a scalability/immanency that will arise if the human had absolute-mentation-capacity so-construed as ontological-normalcy/postconvergence) of historiality/ontological-eventfulness /ontological-aesthetic-tracing’ and ‘a non-scalarity/beholding—<as-to-what-has-gone-before-aesthetically-dementates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation> perspective (with regards to residual human ontological-deficiency implications as to relative human limited-mentation-capacity notwithstanding ‘the better relative ontological-deficiency’) of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition’.

Uncontemplative-distension is thus rather the recognition that human dispensing-with-immediacy-for-relative-ontological-completeness—by-reification*/contemplative-distension*/doesn’t achieve absolute ‘scalability/immanency of existence’s ontological-normalcy/postconvergence’ (as dispensing-with-immediacy-for-relative-ontological-completeness—by-reification*/contemplative-distension* rather reflects the epistemic perspective towards ontological-normalcy/postconvergence and not ‘scalability/immanency of existence’s ontological-normalcy/postconvergence’); with the effective ‘scalability/immanency of existence’s ontological-normalcy/postconvergence’ as of the absolute distension (beyond just
effect critically varies as to both ‘purist science/ontology epistemic-conception of veracity/truth’ and ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’; in the sense that the latter poorly constrained to high predicative-effectivity–sublimation-{as-to-underlying-ontological-commitment} is strongly prone to desublimating 46 historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of ‘human-subpotency non-scalarity/beholdening—<as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation>’ in 7 presencing—absolutising-identitive-constitutedness13, while the former strongly constrained to high predicative-effectivity–sublimation-{as-to-underlying-ontological-commitment} is rather relatively amenable to sublimating 45 historiality/ontological-eventfulness/ontological-aesthetic-tracing as of ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’. That said, human sublimation increasingly implies a ‘generalised background cultural,-organisation-and-institutional framework’ that itself needs to be sublimating, and it is here as well that even the propensity for sublimation of ‘purist science/ontology epistemic-conception of veracity/truth’ can be desublimated by an ontologically-impertinent ‘generalised background cultural,-organisation-and-institutional framework’ adopting ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’. In many ways with regards to the overall social framework, the usurpation of the intellectual–function/posture arising as of ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’ is often associated with vague-and-surreptitious conceptualisations of business success and media-and-social influence (in desublimating 46 historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition) as superseding social intellection itself as an inherent exercise for the social domain’s ‘purist science/ontology epistemic-conception of veracity/truth’ (as to the latter’s prospective sublimating 45 historiality/ontological-eventfulness/ontological-

We can appreciate in this regards that budding-positivists’ meaningfulness-and-teleology however relatively intelligible to us today, wouldn’t make sense to the ‘ordinariness/commonsensicality of the non-positivism/medievalism prior institutionalisation secondnatured apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as to elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity’ but the fact is that such budding-positivism in its rede-mentating/restructuring/reparadigming for relative-ontological-completeness rather induced the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring for our present day positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument. Such a rede-mentating/restructuring/reparadigming for relative-ontological-completeness induced psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring equally applies with respect to prospective ‘deprocrypticism–or–preempting—disjointedness-as-of-

In this regards, just as the requisite dispensing-with-immediacy-for-relative-ontological-completeness -by-reification”/contemplative-distension” that projected of an underlying ‘scientific—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment’)’ by budding-positivists allowed for the enculturation of a human positivism/rational-empiricism social orientation with regards to the natural sciences (then more-or-less subsequent ‘aspirational sciences’) epistemic-conceptions phenomenal/manifest~subpotencies-<intrusive-confinedness—reflexivity,-in-the-full-potency-of-existence’s–sublimating–ascension> as to their implicated ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating existential-contextualising-contiguity’

ontological-completeness'). What is central to all such sophistry is their emphasis on the notion that prospective knowledge is attained as to the sensibility/decorum as of presencing—absolutising-identitive-constitutedness \langle\text{amplituding/formative–epistemicity}\rangle\text{totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag}'; explaining their pedantic obsession. On the other hand, what is central with prospective genuine knowledge is ever always the emphasis on the fact that knowledge-reification is fundamentally about sublimation-over-desublimation as to the implications of the 'tight-and-entwined relationship between the overall human ontological-commitment (across all registry-worldviews/dimensions) and (corresponding registry-worldviews/dimensions) predicative-effectivity–sublimation-as-to-underlying-ontological-commitment' as critically enabling prospective sublimation' so-implied as to existence-potency-sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-\langle\text{amplituding/formative–epistemicity}\rangle\text{totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflatedness}\'. The strategic problem faced by the Ancient sophists and medievalism-scholastics in this respect (beyond-the-consciousness-awareness-teleology\langle\text{in-existential-extrication-as-of-existential-unthought}\rangle) is how to exploit the fact that there is no \langle\text{universalising-idealisation—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment)}\rangle and no \langle\text{positivism/rational-empiricism—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment)}\rangle to de-mentatively/structurally/paradigmatically undermine respectively the possibility for both Socratic philosophers' universalising-idealisation and positivism/rational-empiricism implied transcendence-and-sublimity/sublimation/supererogatory–de-mentativity meaningfulness-and-teleology by eliciting presencing—absolutising-identitive-constitutedness
sensibility/decorum as of non-universalising Ancient sophistry and non-positivism medieval-scholasticism meaningfulness-and-teleology respectively. Likewise, it is herein contended that a tradition of philosophy introduced and propped up after the second-world-war and a general social science and humanities attitude and practices closely associated with this orientation (as to perceived geostrategic reasons for undermining the possibility of unfettered thought paradoxically uncritical/thoughtless about the social implications associated with poor/usurped social critique) is fundamentally grounded on an actively surreptitious exercise of presencing—absolutising-identitive-constitutedness <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag that in many ways (given the inherent impotency it induces as recognised explicitly and implicitly by even its very own leading figures) has had the consequence of ‘undermining the natural social critical thinking that should enable the proper intellectual framing and addressing of human and social issues leading to a rather subservient intellectual posturing to socially dominant vested-interests/actors’ as so-reflected in the current impotence of the political exercise with mediating institutions failing sovereign-equanimity as political, economic and social stakes cumulatively default to vested-interests as to their presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness-as-to-history-tracing—in-presencing–hyperrealisation/hyperreal-transposition>. Such an underlying intellectually deficient orientation is the surreptitious underhandedness failing social intellectual engagement in many ways explains the surreptitious campaigning against many a critical theory as to the possibility for a revitalised genuine and healthy social critique (and as it is especially so-directed at pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation promising postmodern-thought which portrays a very profound ontological-veracity as to prospective sublimation possibilities in the face of prospective human-subpotency–aporia/undecidability/dilemma/ought-

But then the Ancient sophists and medievalism-scholastics were the institutional imprimatur of their periods but their pedantic presencing—absolutising-identitive-constitutedness sensibility/decorum was never in any way beholdening upon sublimating existence as to existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression-as-of-⟨amplituding/formative–epistemicity⟩totalising–renewing-realisation/re-perception/re-thought,-in–supererogatory–epistemic-conflatedness allowing for prospective Socratic philosophers universalising-idealisation and budding-positivism as to their respectively induced ‘universalising-idealisation—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment’) and ‘positivism/rational-empricism—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-ontological-commitment’) constraining in the face of ‘human notional–firstnaturedness—temporal-to-intemporal-dispositions accordion-ing-(as-of-varying-individuations-contextually-transverse-desublimation/sublimation,-as-to-the-redounding/wavering/waveforming—of-their-referencing-and-their-devolved-referencing-imbued-ontological-performance⟩-⟨including-virtue-as-ontology⟩) at uninstitutionalised-threshold as reflecting both desublimating historicity-

(and so reflecting ‘Derridean underdetermination-imbued force/violence conception’ and
conceptualisation in implying that ‘the sublimating apriorising/axiomatising/referencing–psychologism is the valid logical-basis’ and ‘the desublimating apriorising/axiomatising/referencing–psychologism is the invalid logical-basis’. This point out that the successive relative-ontological-completeness as base-institutionalisation, universalisation, positivism/rational-empiricism and notional–deprocrypticism respectively are actually projective-insights speaking to the fact that human prospective emancipation should rather be construed as of ‘human reference-of-thought (as grandest axiomatic-construct level) research-programme conception’ as so-enabling the transcendence-and-sublimity/sublimation/superrerogatory–de-mentativity of the respective prior relative-ontological-incompleteness of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism. Such ‘human reference-of-thought (as grandest axiomatic-construct level) research-programme conception’ reflects the fact that it is the ‘prospective de-mentative/structural/paradigmatic sublimation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-superrerogation as so-induced by notional–asceticism reasoning-through/messianic-reasoning’ that affirmatively validates any of the respective relative-ontological-completeness registry-worldviews/dimensions instigated human emancipation, and so as to the fact that the corresponding reasoning-from-results/afterthought inducing secondnatured institutionalisation (that speaks to collective thought in any given registry-worldview/dimension) while serving its secondnaturing institutionalisation purpose ‘is overrated with regards to the challenge of human aporeticism at prospective uninstitutionalised-threshold’ and shouldn’t be the threshold/limit for determining the possibility for prospective human emancipation (since it is relatively of poor responsiveness to prospective human Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology) which rather requires instigative notional–asceticism reasoning-through/messianic-reasoning (as to the fact that for instance it is
naïve to conceive that it was the ‘pure articulation of positivism/rational-empiricism logic that convinced/converted the non-positivism/medieval world into our positivism world’ but rather decisive in the secondnaturing of positivism/rational-empiricism was the notional~asceticism reasoning-through/messianic-reasoning instigative detour to positivism/rational-empiricism de-mentative/structural/paradigmatic sublimation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation (manifested as of the ships that set sail around the world for spices and trade eliciting a positive commercial opportunism that is decisively responsible for destroying the collective social myth of a flat world; the bacteria theory that will ensure that one lives or die if we believe in it or not and draw the health implications constrained the destruction of a collective superstitious medical worldview; the scientific tools and knowledge that ensured that nation A or nation B will triumph if they believe in it or not, constrained the collective need to adopt a scientific worldview, etc.). Since the relative-ontological-completeness logical-basis/logic<-as-to—transversality-of-affirmative-and-unaffirmative—disambiguated-'motif-and-apriorising/axiomatising/referencing -> is in transversality-of-affirmative-and-unaffirmative—disambiguated-'motif-and-apriorising/axiomatising/referencing with the relative-ontological-incompleteness logical-basis/logic<-as-to—transversality-of-affirmative-and-unaffirmative—disambiguated-'motif-and-apriorising/axiomatising/referencing>, it is only the sublimation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation that affirmatively upholds the relative-ontological-completeness over the relative-ontological-incompleteness (as to their supposedly coherent ontological-commitment). In other words, genuinely projected knowledge as of ontological-good-faith/authenticity~de-mentating/structuring/paradigming<-seeding/incipient—profound—supererogation,—as-mentally-aestheticised—postconverging/dialectical-thinking—qualia-schema> is more than just the mechanical construct but speaks of the ‘ontological-good-faith/authenticity ~de-

In this respect with regards to human living-development–as-to-personality-development and institutional-development–as-to-social-function-development as of our positivism/rational-empiricism registry-worldview/dimension we can appreciate for instance that in a professional–client relationship like between a physician and a patient or a plumber and a customer, the two parties do not normally engage one another in equivocating as of the ordinary meaningfulness-and-teleology desublimation which wouldn’t achieve the sublimation of medical care meaningfulness-and-technology or plumbing technician technical meaningfulness-and-teleology (as to the fact that the client doesn’t go on pretending to engage the professional at its more profound level of technical knowledge contemplation) with the relation thus involving the requisite ‘ontological-good-faith/authenticity~de-mentating/structuring/paradigming:<seed/incipient–profound~

This poor appreciation arises for the simple reason that the uninstitutionalised-threshold speaks of the registry-worldview/dimension notional-discontiguity/epistemic-discontiguity—<shallow-supererogation—of-mentally-aestheticised–preconverging/dementing –qualia-schema>, and thus it is disinclined to recognise the prospective ‘relative-ontological-completeness’—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation—{as-to-underlying-ontological-commitment}’ imbued foregrounding—entailment—{postconverging–narrowing-down–sublimation as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation in reflecting ‘immanent-ontological-contiguity’—as-operative-notional–deprocrypticism that can instill such a prospective sublimating knowledge ‘ontological-good-faith/authenticity’—dementating/structuring/paradigming—<seeding/incipient–profound supererogation, as—mentally-aestheticised–postconverging/dialectical-thinking –qualia-schema> existential-condescension—<of-apriorising/axiomatising/referencing–psychologism>’ as to prospective living-development–as-to-personality-development and institutional-development–as-to-social-function-development. In this regards, it can be appreciated with respect to budding-positivism and universalising-idealisation respectively that where the epistemic-veracity of looking through a telescope and drawing positivistic ontological implications do not avail as in the scholastic-medievalism underpinning–suprasocial-construct or where construing meaningfulness in coherent universalising terms do not avail as in the non-universalising sophistry underpinning–suprasocial-construct, then there is a fundamental reality of desublimating ontological-bad-faith/inauthenticity over which prospective sublimating
ontological-good-faith/authenticity knowledge respectively as of budding-positivism and universalising-idealisation can only be established as of their respectively requisite ‘ontological-good-faith/authenticity’ existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ and naïve present day ‘presencing—absolutising-identitive-constitutedness’ interpretations in terms of the supposed arrogance of the Socrates, Galileos, Descartes, Diderots, etc. is nothing more but a manifestation of dimensionality-of-desublimating-lack-of—<amplituding/formative>supererogatory—mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation (as to the failure to appreciate that the surpassing of human-subpotency aporeticism is all about originariness-parrhesia,—as—spontaneity-of-aestheticisation

Indeed, as to when such ‘relative-ontological-completeness’—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity—sublimation—<as-to-underlying-ontological-commitment>’ is institutionalised say with modern day positivism/rational-empiricism the requisite ‘ontological-good-faith/authenticity’ existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ of modern day scientific breaktrhoughs sublimation projected knowledge hardly put into question. Likewise, this insight about the
psychologism’ for organic-knowledge ‘speaks to an intellectual-and-moral responsibility associated with knowledge as of the requisite dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension for its elucidation and appropriate second-natured institutionalisation that is not dissociated from the very construction-of-the-Self, and knowledge cannot thus be construed as ‘a minor and side thing of mere influencing and stature’ that is dissociated with veridical human mental-development and emancipation in order to rather surreptitiously serve human-subpotency as mortal methodologising/mutualising/organising/institutionalising perverted purposes (as so-of-ten implicitly construed by many a social dominance/vested-interest actor and sycophantic-sophistry throughout human history in eliciting <amplituding/formative> wooden-language-(imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of-'nondescript/ignorable–void—at-regards-to-prospective-apriorising-implications>) hardly showing disinterested interest in genuine knowledge). The blunt fact is that as explained above and clearly obvious with human living-development—as-to-personality-development and institutional-development—as-to-social-function-development the ordinariness of meaningfulness-and-teleology is not to be exploited as if it is a credible state of profound ontological-veracity given the lack of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension (as to a disparateness-of-conceptualisation—unforegrounding-disentailment,—failing-to-reflect—‘immanent-ontological-contiguity’ which pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation thrives on this lack of universal-transparency-(transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative—epistemicity>totalising—in-relative-ontological-completeness )) with regards to prospective Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology underlying the
genuine social intellectual–function/posture. Intellectualism as such is much more than just about presencing—absolutising-identitive-constitutedness methodologising/mutualising/organising/institutionalising enterprise as to the fact that ‘all given registry-worldviews/dimensions as presencing—absolutising-identitive-constitutedness underpinning–suprasocial-construct relate to their given meaningfulness-and-teleology in absolute terms whereas in reality there are veridically relative subontologisation of ontology as metaphysics-of-presence-{implicited-‘nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive-constitutedness ‘}; and it is here that the genuine social intellectual–function/posture comes in to veridically reflect the reality that a social-construct is not of absolute scalarisation of human ontological-performance—including-virtue-as-ontology> for the possibility for its prospective scalarisation-as-to-rescalarisation-as–re-ontologisation/supererogatory—involuting-or-guilding-or-amplifying–scalarisation-as-to-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation>, and the genuine social intellectual–function/posture as such is not about a naivist social vestedness/normativity-<discretely-implied-functionalism> as otherwise the possibility for the succession of registry-worldviews/dimensions transcendence-and–sublimity/sublimation/supererogatory—de-mentativity right up to our present wouldn’t have availed speaking to our very own intellectual-and-moral responsibility for prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as–infrastructure-of–meaningfulness-and-teleology>. The genuine social intellectual–function/posture means that human thought can project beyond, overlook and override presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness-<as-to- historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> conception of sublimating value and ontological-veracity disposition; and so as to the fact that presencing—absolutising-identitive-
constitutedness — existentialising — enframing/imprintedness — historicity-tracing — in-presencing — hyperrealisation/hyperreal-transposition > actually tend to be skewed towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology <> <in-existential-extrication-as-of-existential-unthought> positive-opportunism of living-development — as-to-personality-development and institutional-development — as-to-social-function-development) over ‘non-immediacy prospective sublating value and ontological-veracity disposition’ (with regards to its supererogation — profundity — de-mentating/structuring/paradigming requisite dispensing-with-immediacy-for-relative-ontological-completeness — by-reification / contemplative-distension for Being-development/ontological-framework-expansion — as-to-depth-of-ontologising-development — as-infrastructure-of — meaningfulness-and-teleology ), and in fact in many ways individuals intersolipsistic actions in society implicitly recognise this reality even as the overall underpinning—suprasocial-construct tends to be abstractly de-mentated/structured/paradigmed to skew towards ‘immediacy supposed absolute sublating value and ontological-veracity disposition’ (as for instance professional choices and callings made well beyond just a question of their remunerative or supposed incidental social prestige worth). Part and parcel of the genuine social intellectual—function/posture is to undermine this skewing towards ‘immediacy supposed absolute sublating value and ontological-veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology <> <in-existential-extrication-as-of-existential-unthought> positive-opportunism of living-development — as-to-personality-development and institutional-development — as-to-social-function-development) and reconstrue human-subpotency aporeticism in terms of ‘non-immediacy prospective sublating value and ontological-veracity disposition’. In this regards historically, without individuals making choices not to optimally pursue ‘immediacy supposed absolute sublating value and ontological-veracity disposition’ as to their given — presencing — absolutising-identitive-
constitutedness, ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ but instead optimising their effort for ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ then the possibility will not arise for the very backbone of human value and ontological-veracity sublimation (reflecting the ‘non-immediacy prospective sublimating value and ontological-veracity disposition’) upon which ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ is grounded. History knows that the ‘contorted human presencing—absolutising-identitive-constitutedness’ mentality of registry-worldviews/dimensions’ as of ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ do not truly pay their dues to the Socrates, Descartes, Kants, Newtons, Leibniz, Pasteurs, Rousseaux, Diderots, Einsteins, Teslas, etc. upon whose ‘meaningfulness-and-teleology’ infrastructure building ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ arise and outlandishly skew human meaningfulness-and-teleology (and so not only with human Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology but is equally reflected in a poor-spirited bland conception of human living-development–as-to-personality-development and institutional-development–as-to-social-function-development). This insight is critically important not as an idle exercise of merely stating the appropriateness of sublimating value and ontological-veracity disposition but in reflecting that the skewed underpinning–suprasocial-construct projected and dementated/structured/paradigmed ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ cannot be construed as absolute as in effect it will ultimately prospectively stultifying the requisite ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ that acts as the backbone for human value and ontological-veracity sublimation (as has always been the manifest case for surpassing the uninstitutionalised-threshold of registry-worldviews/dimensions). The fact is ‘immediacy
surmountable/unovercomable with regards to social-stake-contention-or-confliction and thus by
dull the social-construct’s conscience in this way rather distracts from the realisation and
contemplation of the full possibilities for profound de-mentative/structural/paradigmatic
transformation of ‘non-immediacy prospective sublimating value and ontological-veracity
disposition’. The subtle manifestation of the social implications of ‘immediacy supposed
absolute sublimating value and ontological-veracity disposition’ (as to the beyond-the-

It is herein contended that the veridical genuine social intellectual–function/posture (as to the creative dynamics of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-teleology) and so across the succession of registry-worldviews/dimensions as to its orientation towards ‘reclamation/recovery of unenframed-conceptualisation’-<as-to-maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation> is effectively what underlies the unenframed/unbeholdening/bechancing–supererogation possibility of all prospective human Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-teleology enabling the succession of registry-worldviews/dimensions transcendence-and-sublimity/sublimation/supererogatory–dementativity reflecting the fact that their underpinning–suprasocial-constructs as to

human <amplituding/formative–epistemicity>totalising~thrownness-in-existence as to human limited-mentation-capacity veridically implies that ‘existence is not beholdening to that human thrownness and the critical human teleological as to ontological-performance’-<including-virtue-as-ontology> issue is how to adjust to existence and is not about how existence adjusts to the human who is rather of a subpotent epistemic relation to the full-potency of existence’. This insight can be illustrated as follows: supposed say in 5000 BC an asteroid or virus could
bring about a human cataclysm, such a ‘potential manifestation of existence is not beholdening
to human appreciation of the existential implications of the notion and science behind the
asteroid or virus’ and in this regard suppose extraterrestrials living in a ‘supposedly habitable
Mars’ had achieved our present day civilisational and technological level, it is inevitable that
they will effectively adopt ‘ontological-good-faith/authenticity~de-
mentating/structuring/paradigming-<seeding/incipient–profound”-supererogation",-as-
mentally-aestheticised~postconverging/dialectical-thinking”–qualia-schema> existential-
condescension-<of-apriorising/axiomatising/referencing–psychologism>’ with regards to the
human species on Earth and strife to preempt such a cataclysm as to their technical capacity.
We can appreciate that the human species on Earth as to its relative-ontological-
incompleteness doesn’t have a pretence to being of a ‘neutrally/objectively sound human ontological-performance’ state failing to factor in human specific apriorising/axiomatising/referencing—ontological-deficiency arising from its specifically given but together with the extraterrestrials is rather de-mentatively/structurally/paradigmatically in existential-discursivity—implicit-sublimation-over-desublimation relation as to the primacy of the full-potency of existence over any subpotency (speaking fundamentally to prior human ontological-commitment) with regards to the fact that the ontological-veracity of all humans as human-subpotency is priorily of existential-discursivity—implicit-sublimation-over-desublimation superseding pretenses of mere methodologising/mutualising/organising/institutionalising prescences as to entitlements of presencing—absolutising-identitive-constitutedness articulated induced elaboration-as-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside-existential-contextualising-contiguity. Speaking of the requisite ‘owning-up’ as to when relative-ontological-completeness avails rather than ontological-bad-faith/inauthenticity in upholding relative-ontological-incompleteness (given that immortality/existence-perspective as to intemporality cannot be construed as arising from our prior mortals whims superseding of existential sublimation entailment and such presumption rather speaks to preconverging-ordinate—apriorising-psychologism and not postconverging-or-dialectical-thinking—apriorising-psychologism). It is this pre-eminence of existential-discursivity—implicit-sublimation-over-desublimation that explains why the availing of relative-ontological-completeness as to dimensionality-of-sublimating—supererogatory—de-mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equality takes precedence in defining human intellectual-and-moral ontological-
performance\textsuperscript{71}\textsuperscript{<including-virtue-as-ontology>} and so as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{13}. This \textsuperscript{amplituding-formative–epistemicity}\textsuperscript{totalising–thrownness-in-existence}\textsuperscript{14} implied existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity’\textsuperscript{2}–dementating/structuring/paradigming\textsuperscript{seeding/incipient–profound}\textsuperscript{-supererogation}\textsuperscript{16},-as-mentally-aestheticised–postconverging/dialectical-thinking\textsuperscript{–qualia-schema} existential-condescension\textsuperscript{-of-apriorising/axiomatising/referencing–psychologism}’ effectively underlies the ‘Derridean underdetermination-imbued force/violence conception’ and ‘Foucauldian knowledge/power conception construed as knowledge-empowerment/ignorance-disempowerment’, as the preformulating/preframing/premeaningfulness-\textsuperscript{metaphoricity}\textsuperscript{-disposition—as-to-psyche-induced-psychologism-of-existential-stake} from which human \textsuperscript{meaningfulness-and-teleology}\textsuperscript{19} veridically arises. Thus existential-discursivity—implicit-sublimation-over-desublimation implies that the human is already ‘dementatively/structurally/paradigmatically intellectually-and-morally existentially engaged as to its limited-mentation-capacity’ without any ‘neutrally/objectively sound human ontological-performance’\textsuperscript{-<including-virtue-as-ontology>} state failing to factor in human specific apriorising/axiomatising/referencing—ontological-deficiency arising from its specifically given \textsuperscript{amplituding-formative–epistemicity}\textsuperscript{totalising–thrownness-in-existence}\textsuperscript{15}. This insight puts into perspective our \textsuperscript{presencing—absolutising-identitive-constitutedness}\textsuperscript{conception of intellectual-and-moral responsibility wherein supposedly failed/unsuccessful/ineffective initiatives undertaken as to relative-ontological-completeness\textsuperscript{2} (for instance with regards to some public engagement aspiratory dispositions of such intellectuals like Sartre, Foucault, etc. and in the scientific domain for instance controversies associated with Louis Pasteur breakthroughs in microbial science) seem to be wrongly analysed from the posture of a supposedly neutral/objective social-setup conception of intellectual-and-moral responsibility.
(that ducks/ignores such relative-ontological-completeness aetiologisation/ontological-escalation posturing) without factoring in that ‘the social-setup’s relative-ontological-incompleteness specific apriorising/axiomatising/referencing—ontological-deficiency arising from its specifically given <amplituding/formative–epistemicity>totalising–thrownness-in-existence’ is not of neutrally/objectively sound ontological-performance <-including-virtue-as-ontology>; as to the fact that for instance the incidence of modern day wars and their man-made catastrophies do not speak of neutral/objective individuals and social intellectual-and-moral responsibility as to their existence within the meaningful sovereign frameworks that de-mentatively/structurally/paradigmatically directly/indirectly validate such calamities. In other words, our intellectual-and-moral responsibility is already engaged as to our <amplituding/formative–epistemicity>totalising–thrownness-in-existence and the idea that any attitude of unconcern/indifference is intellectually-and-morally neutral/objective is bogus; and human intellectual-and-moral responsibility starts at the very least with an orientation to relative-ontological-completeness as to overall existential dimensionality-of-sublimating — <amplituding/formative>supererogatory—de-mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation. Besides such a more stark elucidation as to Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—‘meaningfulness-and-teleology’, existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity de-mentating/structuring/paradigming—seeding/incipient–profound—supererogation, as-mentally-aestheticised–postconverging/dialectical-thinking—qualia-schema> existential-condescension—of-apriorising/axiomatising/referencing—psychologism’, thus points to the primacy of ‘the very <amplituding/formative–epistemicity>totalising–thrownness-in-existence of human discursivity as to the possibility for prospective existential sublimation’
so-reflected in originariness-parrhesia, as spontaneity-of-aestheticisation

The bigger point here is that prospective human sublimation underlying prospective knowledge-reification in relative-ontological-completeness cannot be engaged with any given registry-worldview/dimension in relative-ontological-incompleteness as if the latter is of a ‘neutrally/objectively sound human ontological-performance’—<including-virtue-as-ontology> state failing to factor in human specific apriorising/axiomatising/referencing—ontological-deficiency arising from its specifically given <amplituding/formative—epistemicity> totalising—thrownness-in-existence’ with regards to the fact that human <amplituding/formative—epistemicity> totalising—thrownness-in-existence’ is already engaged in existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity~de-mentating/structuring/paradigming<seeding/incipient—profound—supererogation, as-mentally-aestheticised—postconverging/dialectical-thinking—qualia-schema> existential-condescension<of-apriorising/axiomatising/referencing—psychologism>’ (and so very much countering the deceptive eliciting in desublimation of <amplituding/formative> wooden-language<imbued—averaging-of-thought<as-to-leveling/ressentiment/closed-construct-of—‘meaningfulness-and-teleology’—as-of—‘nondescript/ignorable—void’—with-regards-to-prospective-apriorising-implications>) by dominance/vested-interest actors and sycophantic-sophistry seeming to imply human-subpotency takes precedence over existence). In this regards, and in the bigger scheme of things existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity~de-mentating/structuring/paradigming<seeding/incipient—profound—
supererogation, as mentally aestheticised, postconverging, dialectical thinking, qualia, schema, existential condensation, of apriorising, axiomatising, referencing, psychologism, implies that as to existence, as sublimating, withdrawal, eliciting, of prospective, supererogation, the respective state of recurrent, utter, uninstitutionalisation, ununiversalisation, non-positivism, medievalism and procrypticism cannot be construed as of 'neutrally, objectively sound human ontological performance, including virtue as ontology, state failing to factor in human specific apriorising, axiomatising, referencing, ontological deficiency arising from its specifically given, amplituding, formative, epistemicity, totalising, thrownness, in existence, with respect to prospective base, institutionalisation, universalisation, positivism, rational-empiricism and notional, deprocrypticism respectively; and as relative, ontological, completeness avails intellectual, and, moral responsibility is rather reflected as of dimensionality, of sublimating, amplituding, formative, supererogatory, de-mentativeness, epistemic growth or conflatedness, transvaluable, rationalising, transepistemicity, anamnestic, residuality, spirit, drivenness, equalisation. Unlike it is often assumed from a sloppy conception of human sublimation in existence (caught up in any given, presencing, absolutising, identitive, constitutedness, self-justification of uncertainty of prospective human sublimation), the comprehensive coherence of human sublimation in existence as to existence, as sublimating, withdrawal, eliciting, of prospective, supererogation is effectively highly regular and consistent (and this can only be fully appreciated from an ontologically sound conception of 'existence as of its immanently tautologuous coherence speaking to its ontological-contiguity, as to the possibility for intelligibility to arise as so-reflected with the overall ontological-contiguity, of the human institutionalisation process, so associated with human limited, mentation, capacity, deepening). This confliction in the perception and relation to human sublimation in existence between metaphysics, of presence, (implicit, 'nondescript, ignorable—
void ’-as-to-presencing—absolutising-identitive-constitutedness⟩ <amplituding/formative-epistemicity> totalising-self-referencing-syncretising/circularity/interiorising/akrasiac-drag ’ on the one hand and on the other hand difference-confoundedness ’-as-to-totalitative-reification’-in-singularisation’-as-veridical-epistemic-determinism as to relative-ontological-completeness ⟨amplituding/formative-epistemicity> causality—as-to-projective-totalitative-implications,-for-explicating-ontological-contiguity⟩, is aptly reflected in the entangled/enmeshed nature of human sublimation in existence as reflected with the ontological-contiguity—of-the-human-institutionalisation-process. This is so fundamentally because of human teleology speaking of ‘human phenomenal/manifest conceptivity/epistemic-reflexivity in existence as ontological (so-reflecting amplituding/formative> disposedness-(as-to-orientation/value-construct/valuation–and–derived-parameterising) and amplituding/formative> entailment-(as-to-totalising-contiguous/coherent–factuality-of-variability))’ (as reflecting the implications of human limited-mentation-capacity-deepening underlying the ontological-contiguity—of-the-human-institutionalisation-process); such that human sublimation is hardly ‘purist’ and rather occurring as from successive human registry-worldviews/dimensions projections of their specifically flawed presencing—absolutising-identitive-constitutedness given apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument–for–conceptualisation reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation. The insight here is that human state of prior relative-ontological-incompleteness de-mentatively/structurally/paradigmatically impacts reflexively on human appraisal of its prospective relative-ontological-completeness sublimation implications, and so across the successive registry-worldviews/dimensions right up to the originariness/origination—<so-construed-as-to-ontological-normalcy/postconvergence-perspective-scalarising-construal-of-existence> perspective of deprocripticism—or–preempting—disjointedness-as-of-
ontological-contiguity\textsuperscript{2}—of-the-human-institutionalisation-process\textsuperscript{2} is existentially susceptibly instigated mostly as of materially/technically induced sublimation associated with tools, equipment, technical knowhow and natural science as to their immediately amenable positive-opportunism\textsuperscript{7} social implications ultimately leading to subsequent human methodologising/mutualising/organising/institutionalising sublimating overall meaningfulness-and-teleology\textsuperscript{9}. But the overall de-mentating/structuring/paradigmimg of human sublimation in existence as such is not always coherent as to the discrepancy in the occurrence of specific sublimations and desublimations say material and technical sublimation pointing to relative-ontological-completeness\textsuperscript{7} and ‘immaterial/social overall relative-ontological-incompleteness\textsuperscript{7}—presublimation-construct—of—meaningfulness-and-teleology\textsuperscript{9} instigating the referencing/registering/decisioning desublimation of the nascent-particular/incipient-and-material/technical-sublimations-\textsuperscript{\textless blindered-to-their-relative-ontological-completeness\textsuperscript{7}—reference-of-thought\textsuperscript{8}—devolving\textgreater }. In this regards, we can appreciate how the subsequent immaterial/social sublimation required for prospective positivism/rational-empiricism came to be appreciated by such thinkers like the Rousseaux, Diderots, etc. as to the fact that the material possibilities of their epoch associated with the printing press and increasing technical knowhow rendered the immaterial/social overall relative-ontological-incompleteness\textsuperscript{7}—presublimation-construct—of—meaningfulness-and-teleology\textsuperscript{9} of their epoch wanting, explaining for instance Rousseau’s appreciation of the noble-savage and nature as speaking to a prospective aporeticism overcoming/unovercoming that recognised that mankind needed a more mature conception of interhuman relationship and human relation with nature as to when mankind/some-of-mankind began manifesting a more developed relationship with nature beyond just as of the immediacy of subsistence/survival relationship with nature (say for instance having technically more efficient guns with gunpowder didn’t imply just killing animals at whim or along the same lines explaining his anti-Slavery stance); thus speaking of
the prospectively requisite immaterial/social sublimation as to prospective positivism/rational-empiricism postconverging-or-dialectical-thinking—anapriorising-psychologism. In this regards even budding-positivists like Galileo, Descartes, etc. just as well implicitly recognised this discrepancy of prospective material and technical sublimation positivistic science in relative-ontological-completeness and the immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology of medieval-scholasticism associated with alchemic/magical thinking, to the point that in many ways their actions were directed towards articulating at the very least an underlying ‘scientific—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatic-framing—of—predicative-effectivity—sublimation—(as—to—underlying—ontological-commitment)’ as the requisite immaterial/social sublimation for enabling positivistic science as we know it today to arise. This very insight explains the enlightenment struggle against feudalism and slavery as to the fact that the technical and scientific progress as to relative-ontological-completeness weren’t the occasion to put such technical and scientific progress like shipbuilding and other ocean voyage technologies at the service of the prior medievally clouded immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology value-construct and methodologising/mutualising/organising/institutionalising existentialising—enframing/imprintedness—<as—to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>, but rather called for a renewed conceptualisation of humanity beyond a mentality of immediate subsistence/survival. Thus it is always the case that the positive-opportunism driving the second-natured institutionalisation of human sublimation induces discrepancy as to immediate material and technical possiblities of sublimation and the requisite dispensing-with-immediacy—for-relative-ontological-completeness—by-reification /contemplative-distension immaterial/social sublimation considerations that rise to
the aporetic challenge of the immediate material and technical possibilities of sublimation. In many ways this discrepancy of material and technical sublimation and immediate distortive immaterial/social desublimation is reflected in the ‘historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition gimmickiness/sublimation relation with meaningfulness-and-teleology’ of our positivism—procrypticism, for instance as associated with an ‘underlying dumbing-down public intellection and media industry’; as media-access and its commercialisation function in many ways rather adhocly substitutes-for/undermines a profound genuine social intellectual—function/posture as to social-stake-contention-or-confliction implications. The further implication of this discrepancy is in highlighting that the supposed equanimity/balance of the overall politico-institutional system as to sublimating notions of sovereignty, democracy, free-will, etc. is only veridically effective as to the originariness/origination—<so-construed-as-to-ontological-normalcy/postconvergence-perspective-scalarising-construal-of-existence> perspective of notional—deprocrypticism given the perpetual challenge of material sublimation upon human immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology; as prospective material/technical sublimation is associated with a discrepant ‘immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology’ instigating the referencing/registering/decisioning desublimation of the nascent-particular/incipient-and-material/technical-sublimations—<blinded-to-their-relative-ontological-completeness—reference-of-thought—devolving>’ that goes on as of ‘presencing—absolutising-identitive-constitutedness’ to render the supposed equanimity/balance of the overall politico-institutional system as to sublimating notions of sovereignty, democracy, free-will, etc. increasingly of relic/artifactual human ontological-performance —<including-virtue-as-ontology> reflected in their failing effective outcomes of equanimity/balance; wherein their practice increasingly tends to dominance/vested-interest actors and sycophantic-sophistry

mental enculturation of the notion that the ‘political game’ in-of-itsel precedes individuals and
social sovereign aspirations as if the latter were just ‘paying fans to a sports encounter’ rather than a political process meant to serve them as so reflected with an enculturated media political narrative hardly/poorly making room for direct individual and social sovereign aspirations as centrally defining with the consequence that substance is increasingly overwhelmed by a political characters portrayal of the political debate with political actors then effectively turning over rather towards the levers of their potential power which is paradoxically not necessarily/deterministically social sovereign aspirations as to a relic/artifactual conception-and-projection in the public domain but rather surreptitious/private closed-circles of effective direct/indirect politico-institutional influence as so-plainly exposed by the fact that long-term consequences of public policies recurrently ‘default for dominance/vested-interest actors’).

Even in the purely intellectual sense, modern day scientific advancements and achievements have correspondingly given rise to a distorted manifestation of science-ideology as a usurpatory mouthpiece of veridical science-in-practice that effectively rides the wave of natural sciences accomplishments and in so doing projects of a naïve ‘presencing—absolutising-identitive-constitutedness

In this regards, we can appreciate that going by the positivism/rational-empiricism relative-ontological-completeness registry-worldview/dimension, the natural sciences do not allow for any other external interpretations of their phenomenal/manifest-subpotency-<in-transitive-conflatedness—reflexivity,—in-the-full-potency-of-existence’s—sublimating–nascence> (but for issues of epistemic limitation inherent to human limited-mentation-capacity). In this regards, there can’t be any instance/circumstance to which the mathematician will construe of 1+1 as being equal to 4 as to totalisingly-disentailing—discretion/whim-of-thought; as to the fact that inherent ontological-veracity precedes-and-supersedes ‘mere-formulaic–methodologising/mutualising/organising/institutionalising human-subpotency existentialising—enframing/imprintedness—<as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>’. The implication here that in the bigger scheme of things, the ‘apriorising decisions advancing mere-formulaic–methodologising/mutualising/organising/institutionalising human-subpotency existentialising—enframing/imprintedness—<as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>’ over inherent ontological-veracity as manifested in many a social domain (while equally relevant in the natural sciences especially when ‘mere-formulaic–methodologising/mutualising/organising/institutionalising human-subpotency existentialising—enframing/imprintedness—<as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>’ increasingly undermine the organisation behind the natural conduct of the natural sciences) go on to undermine their pretenses to a status of
profound ontological-veracity as reflected of an ontology/science as to aestheticisation-towards-ontology. In this regard, relic/artifactual conception of veridical human

constitutedness as of beholdening-becoming—distortive-originariness/distortive-origination—as-to—historicity-tracing—inhibited-mental-aestheticising. Likewise, deliberate intellectual
decisions emphasising institutional self-preservation and rendering veridical knowledge
eucidation secondary to such institutional self-preservation decisions, in many ways wrest
away from such supposed intellectual institutions their status as veridically knowledge
producing as these increasingly become political as to their emphasising of a political motive
ready to forego veridical knowledge-reification for its institutional self-preservation; with the
consequence of increasing sycophantic-sophistry and genuine social intellectual–
function/posture indifference or betrayal to dominance/vested-interest actors. This issue of
institutional self-preservation is in many ways at the very root of the non-intellectual, media-
driven and dishonest criticisms levied against postmodern-thought as to the latter obvious
conclusive emancipatory implications; so-reflected in a practice of ‘clouded thought’ that has
no true intellectual elucidation purpose but rather an extension of the political over veridical
knowledge-reification (such that arguments about the accommodation of different intellectual
practices tend to be articulated wrongly as to imply that ‘the true ontological-veracity as to
sublimation-over-desublimation of intellectual practices’ are irrelevant and secondary to the
mere purpose of institutional accommodation of different intellectual practices). It is herein

This comprehensive elucidation highlights that human sublimation is not inherently haphazard as the wrong perception of haphazardness arises as from the varying \textsuperscript{80}presencing—absolutising-identitive-constitutedness\textsuperscript{13} epistemic-projection perspectives whereas from a comprehensive notional\textsuperscript{-}deprocrypticism epistemic-projection perspective in ontological-normalcy/postconvergence human sublimation is rather wrongly apparently haphazard because of human limited-mentation-capacity epistemic-projection perspectives of apprehension of prospective sublimation with ‘the ontological-veracity of notional\textsuperscript{-}deprocrypticism epistemic-projection perspective associated with comprehensive human limited-mentation-capacity-deepening\textsuperscript{7} rather reflecting the overall ontological-contiguity\textsuperscript{66}—of-the-human-institutionalisation-process\textsuperscript{57} de-mentative/structural/paradigmatic coherence of human sublimation as of successive ‘reference-of-thought–and–reference-of-thought–devolving–meaningfulness-and-teleology\textsuperscript{99} comprehensiveness of prospective sublimating–nascence’. In this regards as to a decisively globalising world we can’t conceive that ours will be the human generation bereft of ‘profound diffusionary/non-diffusionary aestheticisation prospective insight as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\(^9\)’ given the increasingly relic/artifactual nature of traditional cultures in our modern age as to the potent
‘scalarisation-as-to-rescalarisation-as–re-ontologisation’ in optimising human ontological-performance —<including-virtue-as-ontology> (and our positivism–procrypticism registry-worldview/dimension cannot be overlooked in this regards notwithstanding the fact that it is at the backend of the institutional-cumulation/institutional-recomposure—<as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing>). But then just like with all prior registry-worldviews/dimensions, our positivism–procrypticism—presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness—<as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> effectively projects a hurdle to any such de-mentative/structural/paradigmatic notional–deprocrypticism conception of re-ontologisation as to its inherent <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag poorly amenable to profound alternative institutional aestheticising contemplation ‘given its calamitous conception and relation to the possibility for prospective re-ontologisation from its subontologisation’ such that any such profound alternative institutional aestheticising contemplation are traditionally bound to arise as disruptive institutional transformations whether or not involving power-showdown as associated with sudden/revolutionary transformations with ‘their drawback of having to think on their feet inducing deficient ontological-performance’ —<including-virtue-as-ontology> as well as generalised social apprehension which is then enigmatically held against them’ (however the merits of their underlying case) very much unlike ‘the latitude for articulating conceptualisations available for presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness—<as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition>’ (however their de-mentative/structural/paradigmatic flaws). Today manifestations (in the political domain) of protest votes for instance, more than just a question of poor political leadership actually has to do in many ways with ‘an alienating
politico-institutional entrapment/frame-up of sovereign choice’ within the supposed democratic process that ‘forestalls-and-narrows as of strategic rules and processes’ the effective political fulfilment of individual and social sovereign choices inducing anti-sovereign consequences as to defaulting policy consequences to dominance/vested-interest actors without truly being institutionally subject to competing profound alternative institutional aestheticising contemplation given their institutional ascendance. Such a beholding presencing—absolutising-identititive-constitutedness existentialising—enframing/imprintedness—as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> skews the fundamental ontology question by its inherent <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag gatekeeping stifling of the possibility for inquiring on the ontological-veracity of its practice as to a reflex for advancing the quietude of social-vestedness/normativity-discretely-implied-functionalism>. This latter issue is the ultimate challenge to prospective notional–deprocrypticism institutionalisation ‘unenframed/unbeholding/bechancing–supererogation parameterisation/reparameterisation–(reflecting-a-supererogatory–decisionality-of-socioinstitutional-conceptions-as-to–‘their-nascent-sUBLimations-dynamic-preempting-of-presublimatory-decisionality–numbing-traction–desublimation’)–as-so-operationalising–‘scalarisation-as-to-rescalarisation-as–re-ontologisation’ for prospective aestheticisation–and–aestheticisation-towards-ontology/meaningfulness-and-teleology; as of the paradox that a social-setup as to its <amplituding/formative–epistemicity>totalising~thrownness-in-existence is so pragmatically self-focussed that its aestheticisation and hence aestheticisation-towards-ontology dynamic-potential as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation is narrowed/limited/constricted however its level of development (explaining the decisiveness/criticality of cultural diffusion imbued originariness-parrhesia,—as—spontaneity-of—
aestheticisation in re-ontologisation accompanying human institutional-cumulation/institutional-recomposition-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing as can be appreciated throughout human history). This is explained by the fact that the human can relatively easily appreciate the ontological-pertinence of new practices arising as from outside cultural diffusion but it is very much difficult to reconstrue of such practices as from the taxingness-of-originariness involved in surpassing an internalised <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag posture; and this very much explains the double epistemic orientation to notional–deprocrypticism institutionalisation ‘unenframed/unbeholdening/bechancing–supererogation parameterisation/reparameterisation–(reflecting-a-supererogatory–decisionality-of-socioinstitutional-conceptions-as-to–their-nascent-sublimations-dynamic-preempting-of-presublimatory-decisionality–numbing-traction-desublimation)–as-so-operationalising–scalarisation-as-to-rescalarisation-as–re-ontologisation’ for prospective aestheticisation–and–aestheticisation-towards-ontology/meaningfulness-and-teleology as highlighted above (as to the need to feed our <amplituding/formative–epistemicity>totalising–thrownness-in-existence decisively globalising world with aestheticising re-originariness/re-origination to uphold the capacity for pure-ontology as to re-ontologisation). This is further reflected in ‘the very postconverging-as-to-ontological-normalcy/postconvergence over preconverging-as-to-epistemic-abnormalcy conception of human transcendence-and-sublimity/sublimation/supererogatory-de-mentativity’ with regards to the fact that the state of recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism and positivism–procrypticism respectively aren’t of the ‘existential and contemplative internal adequation’ for prospective base-institutionalisation, universalisation, positivism and deprocrypticism, as to the ‘increasing crumbling of the former genuine social intellectual–function/posture’ into subterfuge of false-scepticism (as to the fact that veridical scepticism is of constructive knowledge commitment effectively exposing itself to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation and so rather than idly critical and unaccountable totalisingly-disentailing—discretion/whim-of-thought), pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation and <amplituding/formative> wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology—as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>) narratives increasingly ignoring-and-failing to engage with inherent veridical knowledge-reification . In this respect the possibility of human prospective reasoning-through/messianic-reasoning that goes on to induce prospective reasoning-from-results/afterthought as secondnatured-institutionalisation is ever always accompanied/framed by its ‘instigative–asksis-or-acumen de-mentating/structuring/paradigming the possibility for prospective sublimating and reifying socio-institutional conceptions/constructs/models as to prospective aporeticism-overcoming/unovercoming-overcoming for human social emancipative reinvigoration/disruption’ as to the resultantly developed deferential-formalisation-transference socio-institutional model/construct (reflected historically as of a sacral, monasterial, pastoral,

Inherently the requisite originariness-parrhesia,–as–spontaneity-of-aestheticisation for human reframing given human limited-mentation-capacity is rather more forthcoming with directly grasable contextually restricted frameworks-of-conceptualisation with human reframing capacity increasingly of apriorising/axiomatising/referencing—re-originariness/re-origination impotence with frameworks-of-conceptualisation of overwhelming scale inducing increasing ‘sovereign-deference with lack of universal-transparency\-{(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness\})’, and leading to direct/indirect dominance/vested-interest—drivenness de-mentative/structural/paradigmatic domination/pre-eminence over social-stake-contention-or-confliction. The grander issue in this regards (as to optimal human reframing capacity with regards to the equanimity/balance of human theoretical-conceptual-operant institutionalised-conceptualisations) as of the present thus has to do with ‘generalised-and-representative human appreciation of its reifying and empowering reflexivity potential giving the perplexing/passivising modern day scale of organisationally and institutionally de-mentated/structured/paradigmed ‘meaningfulness-and-teleology\’ as to the fact that modern day organisational and institutional structure and purposes (by their social-stakes-contention-or-confliction) in critical ways render the sovereign human increasingly more of a mere cog within systems that as of their technical, bureaucratic and socially-defining presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness-<as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> purposes are already in many ways decisively de-mentatively/structurally/paradigmatically predefined as imponderable/inscrutable/unavoidable/inevitable/inescapable/unpreventable/unchangeable/in

In this respect the ontological-veracity of human institutional-cumulation/institutional-recomposure—<as-to-historiality/ontological-eventfulness>/ontological-aesthetic-tracing> (as of the accruing
effectively-manifest-sublimation/sublime from stone-age to bronze-age to iron-age involving the formation of agrarian societies and cities and subsequent development of universalising societies and today’s positivising modern world) rather more aptly speaks of ‘overall human momentous-unbeholdening–aestheticising-reflex effectively-manifest-sublimation/sublime attainment’; with the profound idea that the more momentous grasp of the notion of say the civilisations of Ancient Zimbabwe, Ancient Egypt, Ancient Greece, Ancient China, Ancient India or Ancient Aztec, etc. are rather as of a more profound point-of-departure as from a ‘human psychological-disposition for supererogatory–unbeholdening-conflatedness’ historiality/ontological-eventfulness /ontological-aesthetic-tracing of sublimating intelligibility’ divulging the underlying dynamism of human ‘de-mentative/structural/paradigmatic momentous-unbeholdening–aestheticising-reflex effectively-manifest-sublimation/sublime as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’ (and so rather than a shallower point-of-departure as from a ‘human psychological-disposition for relic/artifactual–beholdening-constitutedness’ historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition of presublimating intelligibility’ of ‘merely-beholdening–aestheticising-reflex of meaningfulness-and-teleology’ caught up in complexes of ‘naïve presencing—absolutising-identitive-constitutedness’ as to presencing-distorted–meritocracy/totalising–sovereign-appropportioning—of-human-ontological-performance’<including-virtue-as-ontology>’ that end up inducing poor/distorted human understanding of the human). The underlying point here is that just as human tools, other technical/material capabilities like electricity, etc. are rather of ‘de-mentative/structural/paradigmatic momentous-unbeholdening–aestheticising-reflex effectively-manifest-sublimation/sublime as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’ as to the inherent sublimating/emancipatory possibilities accruable to all humans and societies as to their underlying ontological-

existentialising–decisionality is of ‘notional~ presencing—absolutising-identitive-

In other words, existentialising—decisionality and sublimating—nascence perspectively—reflect respectively ‘notional—presencing—absolutising—identitive—constitutedness’ and notional—nonpresencing—<perspective—ontological-normalcy/postconvergence> transversal continuum’, as to ‘thresholding conception of the relationship between perspective decisionality/human-decisionality—<as-to-play-of-valid/invalid-decisionality-imbued—sublimation/desublimation> and perspective sublimation/desublimation in existence’. Insightfully, such a perspective distinction between existentialising—decisionality and sublimating—nascence points out that there is ‘epistemical—reflexive psychological reorientation of human relation with meaningfulness-and-teleology’ as to the contrast between ‘blurriness in existentialising—decisionality’ and ‘ universal-transparency—⟨transparency—of—totalising—entailing,—as—to—entailing—<amplituding/formative—epistemicity>totalising—<in-relative—ontological—completeness ⟩ of sublimating—nascence’; wherein ‘universal-transparency—⟨transparency—of—totalising—entailing,—as—to—entailing—<amplituding/formative—epistemicity>totalising—<in-relative—ontological—completeness ⟩ of sublimating—nascence’ (as to nascent-particular/incipient-and-material/technical-sublimations—<blinded—to—their-relative—ontological—completeness—reference—of—thought—‘devolving⟩) is relatively bound to elicit
desublimating–existentialising–decisionality). The implications of this dual existentialising–
decisionality psychological-dispositions is critical particularly with regards to the social-and-
institutional-frameworks-of—referencing/registering/decisioning of human 
meaningfulness-and-teleology of ‘blurriness’ in existentialising–decisionality’ as rather poorly amenable to
profound ‘unbeholdening sublimating–nascence ontologising-depth of the full-potency of

of—referencing/registering/decisioning can be construed as ‘frameworks of relatively shallow-
ontologisation/subontologisation’ as to the existentialising–decisionality psychological-
disposition of defaulting individual and social ‘beholdening as sovereignising–imbuend-
immediate sublimating–nascence but the more profound notion of a positivistic registry-worldview/dimension (as to social-and-institutional-frameworks-of—referencing/registering/decisioning of positivistic meaningfulness-and-teleology) reflecting a positivising referencing/registry/decisioning is more problematically conceptualisable and mostly arises as of crossgenerational appreciation/grasp (given the non-positivistic presencing—absolutising-identitive-constitutedness existentialising–decisionality psychological-disposition of defaulting individual and social ‘beholdening as sovereignising—imbued-subontologisation/subpotentiation’); and this ‘human existentialising–decisionality dual psychological-dispositions continuum-gradient of sovereignising—by—ontologising-depth in inducing desublimation or sublimation’ applies in the succession of registry-worldviews/dimensions with regards to the possibility for their prospective sublimation/emancipation. Along the same lines of disambiguating ‘human existentialising–decisionality dual psychological-dispositions continuum-gradient of sovereignising—by—ontologising-depth in inducing desublimation or sublimation’ just as ‘a God of plane non-positivistic proposition’ in an animistic social-setup implies priorly an ‘altogether superseding positivistic apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation induced psychologism of ‘reference-of-thought’ (over their non-positivistic apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation psychologism of ‘reference-of-thought) from whence aposteriorising/logicising/deriving/intelligising/measuring can then ensue in existential-instantiations of conceptualising, and so as to the positivistic meaningfulness-and-teleology ‘more profound reflection of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation” with regards to sublimating–nascence teleological-inflection{(as-to-more-profound-nondisjointing–amplituding/formative–epistemicity>totalising/circumscribing/delineating)’, likewise prospectively with regards to

since the very first credo of the intellectual is for inherent knowledge above any given theories and concepts and traditions which are rather subordinate to the more profound purpose of the human knowledge-reification project as was so understood and propounded by such mid-twentieth century thinkers like Bertrand Russell, A.J. Ayer, Richard Rory, etc. even as their conceptions came under criticism because a genuine relation with knowledge is what can bring about appropriate prospective correction for sublimating knowledge when prospective inspiration avails notwithstanding the traditional approach to knowledge so long as it remains self-critical whereas a false social and institutional pre-eminence driven relation to knowledge shoves existential issues under the table not because there is no human intelligence to tackle true knowledge but because the possibility for more profound contemplation is a-priori placed out-of-sight since ‘supposed knowledge-reification’ as to its gesturing’ is as of ‘existentialising–decisionality that desublimatingly precedes knowledge-reification’ rather than veridically ‘knowledge-reification’ as of its very own deriving/manifest/ensuing/event ‘uating sublimating–existentialising–decisionality’ and as so-reflected when mere methodologising/mutualising/organising/institutionalising as of human-subpotency is construed as doing away with priorly requisite-and-relevant supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’–for–conceptualisation with the off-the-shelf and made-to-measure projection of methods and statistics by itself considered as supposedly profound knowledge, and even then such an approach ends up losing out on vision while wrongly reinforcing knowledge as a self-serving punctual/expeditious institutional enterprise rather than of overall prospective human existential sublimation/emancipation). totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-
totalising-entailing⟩ as to a de-mentative/structural/paradigmatic implication that
renders prospective knowledge impotent and so out of ontological-bad-faith/inauthenticity in
desublimating–existentialising–decisionality gesturing of attenuating/devaluing, blurring and
trivialising wherein there is ‘supposedly no totalising-entailing conception of meaningfulness-
and-teleology’ thus allowing for totalisingly-disentailing—discretion/whim-of-thought
pretense-of-sublimation rather unconstrained to existence—as-sublimating-withdrawal,-
eliciting-of-prospective-supererogation. Critically the ‘unbeholdening sublimating–nascence
ontologising-depth of the full-potency of existence’ associated with nascent-
particular/incipient-and-material/technical-sublimations-<blinded-to-their-relative-ontological-
completeness – reference-of-thought–devolving> is necessarily of totalising-entailing as to
the immediate-potency of existence—as-sublimating-withdrawal,-eliciting-of-prospective-
supererogation thus relatively undermining such ‘beholdening as sovereignising–imbued-
subontologisation/subpotentiation’ gesturing associated with social-and-institutional-
frameworks-of—referencing/registering/decisioning as of ‘blurriness in existentialising—
decisionality’ (that is, where the latter does not extensively intrude into the former as for instance in determining-and-demarcating the framework of natural sciences research). Hence in many ways prospective knowledge cannot elude the aporeticism overcoming/unovercoming of such ‘beholdening as sovereignising–imbued-subontologisation/subpotentiation’ gesturing and so relatively to the given domain-of-study/domain-of-interest blurriness, wherein blurriness is reflected with desublimating–existentialising–decisionality supposedly taking precedence over inherent prospective knowledge-reification rather than ‘unbeholdening sublimating–nascence ontologising-depth of the full-potency of existence (implied as to the very inherent knowledge-reification –gesturing as determining sublimating–existentialising–decisionality)’; with this conflicting of ‘beholdening as sovereignising–imbued-subontologisation/subpotentiation’ and ‘unbeholdening sublimating–nascence ontologising-depth of the full-potency of existence’ so-reflected across the successive registry-worldviews/dimensions given human notional–firstnaturedness—temporal-to-intemporal-dispositions as to prospective social-stake-contention-or-confliction (beyond-the-consciousness-awareness-teleology -<in-existential-extrication-as-of-existential-unthought>). Thus such an aporeticism overcoming/unovercoming necessarily imply the integration of the analysis of pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation-{blurring/undermining-of-prospective-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness } as part and parcel of prospective knowledge-reification as to knowledge-notionalisation, and especially as so-manifested increasingly with ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge frameworks’ that on the baiting of imprimatur then switch on to propound ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge constructs out-of and implicitly obviating the veracity of the universal-transparency -{transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness } of
knowledge-reification’ (and so as to self-serving social-vestedness/normativity-<discretely-implied-functionalism>) and this must effectively be contested. Such lousiness and as broadly reflected in poor media editorialising in many ways increasingly turns media accessibility into intellectual pre-eminence as ‘intellection is no longer about depth of contemplation and knowledge-reification for sublimation but rather about gimmicky-and-flashy threads of mere communication performance’ with many such interlocutors openly admitting-and-manifesting their critical lack of relevant intellectual thematic competence as popularity then supposedly becomes the driving force of thought; the fact though remains (however the seemingly trivialising concern about such media driven pop-intellectualism as rather unimportant in some milieus of more profound intellectual contemplation) that unfortunately in many ways directly or indirectly (as to the social-and-institutional-frameworks-of—referencing/registering/decisioning susceptibility to ‘blurriness in existentialising—decisionality’ and as encouraged by dominance/vested-interest actors) such pop-intellectualism end up being elevated as the summum of intellect in the social while overlooking the requisite depth of sublimating —universal-transparency—{(transparency-of-totalising-entailing—,as-to-entailing—<amplituding/formative—epistemicity>totalising—in-relative-ontological-completeness’) of critical importance for effective social-and-institutional-frameworks-of—referencing/registering/decisioning sublimating—existentialising—decisionality (and as the ‘mediatic framework of access and communication of sublimating thought’ is rather turned around into ‘a framework that supposedly inherently create sublimating thought by mere access and communication’ especially as to naive social feel-good banalities as supposedly sublimation actually of desublimating existentialising—enframing/imprintedness—<as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> as of vague impression-driven/good-naturedness/wishfulness ‘beholdening as sovereignising—imbued—subontologisation/subpotentiation’). But then the idea of knowledge driven as of totalising-
entailing as so-demonstrable with say the momentous development of quantum physics with the physics totalising-entailing implications of argumentations of sublimating–existentialising–decisionality at critical moments moving from one physicist to the other as of ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ (whether Bohr, Einstein, Dirac, Schrodinger, etc.) without any extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge notion like reputation having any incidence (as in epistemic re-originariness/re-origination projective/reprojective cross-subjection of knowledge-reification as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation as herein underlied with notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> implied formativeness-<as-to-intersolipsism-of-preformulating/preframing/premeaningfulness-imbued-mediativity-and-deferentialism>-of-meaningfulness-and-teleology in nonpresencing-<perspective–ontological-normalcy/postconvergence> epistemic-projection, and so similar to a Derridean ‘heterogeneous genesis’ epistemic conception), speaks to a more profound lack of constraining aporeticism overcoming/unovercoming as to institutional convenience that fails to articulate such a ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ and thus renders in relative terms the social domain more intellectually impotent in inducing a similar level of sublimating–existentialising–decisionality as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation as is relatively the case in the natural sciences (and so notwithstanding the relative blurriness of the social which can effectively be brought to exactifying/precisioning–of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> as to the requisite self-criticality overcoming as well as emotional-involvement overcoming rather than assuming a relatively false social and institutional pre-eminence driven relation to knowledge); with the further implication of such ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ being that the
‘knowledge-reification’ process becomes highly impersonal and complementary in a natural way’ without the artifice of ‘politically-driven accommodation of ideas not necessarily as of the pre-eminence of existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation’. In this regards, it is contended that the argumentation articulated herein are strictly striving towards aetiolisation/ontological-escalation in reflection of ‘abstract human intemporal individuative ontological-performane (as to the backdrop of the notionalisation/notional-conception/amplituding of knowledge in reflection of human notional—firstnaturedness—temporal-to-intemporal-dispositions) while striving for totalising-entailing pertinence of thought’ and so projecting beyond any implications of personalising/particularising import but rather turning towards ‘ontological elucidation import as it then reifyingly-and-empoweringly enables human sublimation as to prospective operationalising construals’ and so-reflected in the idea that the fundamental stakes of prospective knowledge-reification is about prospective social-stake-contention-or-confliction and not prior social-stake-contention-or-confliction (as for instance prospective positivistic meaningfulness-and-teleology is not developed to go about articulating/relating-to meaningfulness-and-teleology as to the prior social-stake-contention-or-confliction of non-positivistic meaningfulness-and-teleology ), and so by the mere implications of dimensionality-of-sublimating —<amplituding-formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation (even as such prospective meaningfulness-and-teleology tend to be rather desublimatingly related to as of dimensionality-of-desublimating-lack-of —<amplituding-formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation by the prior presencing—absolutising-identitive-constitutedness existentialising—
enframing/imprintedness-as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition). But then as well the fact remains that the reality of human knowledge-reification—especially (as speaking to prospective human destructuring-threshold-uninstitutionalised-threshold/presublimating–desublimating–decisionality) of-ontological-performance-including-virtue-as-ontology—is inevitably infused with social-and-institutional-frameworks-of—referencing/registering/decisioning manifest politically-driven motives of desublimating–existentialising–decisionality beyond just ‘a purported baseline conception of neutral knowledge-reification’ with such frameworks projecting their presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness-as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> conception of the ‘overall possibility of human existentialising–decisionality as to catchmenting-by-rejection’. In this respect, it is important to grasp that knowledge-reification then desublimatingly becomes an issue of more than just rightness or wrongness but involves a striving for interest/advantage/ascendancy/head-start with respect to existentialising–decisionality of prospective knowledge-reification, and this reality given human notional–firstnaturedness—temporal-to-intemporal-dispositions is reflected by an inherent human ‘referencing/registering/decisioning of shallow-supererogation—to—profound-supererogation conception of social-stake-contention-or-confliction’ with respect to prospective knowledge-reification. In many ways recent history of human thought has shown that ‘social-and-institutional-frameworks-of—referencing/registering/decisioning manifest politically-driven motives of desublimating–existentialising–decisionality going beyond just neutral knowledge-reification’ that cannot be ignored as to intellectually decadent practices of scepticism and blurring underlied by cynical reframing of thought at later moments (which had been related to sceptically and in blurriness at previous moments), and so as to shallow-supererogation desublimating–existentialising–decisionality driven by mere institutional-
ascendency. In many ways thus the conceptualisation herein ‘is not caught-up/constrained to any such fooleries’ (as to the history of such ploy against postmodern thought) and is consciously articulated as to the profound-supererogation motive of human sublimation beyond/and-not-subjected-to the existentialising—enframing/imprintedness—as-to- historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> of any shallow-supererogation social-and-institutional-frameworks-of—referencing/registering/decisioning as to the 8.5 billion humans on planet Earth and as any party of interest of profound-supererogation may find useful or not! In this respect, it is critical to understand what defines humanity as to the ‘firstnatureness and derived secondnaturedness positive-opportunism’ required for human self-surpassing—existentialism-form-factor,—in-overcoming—‘notionally—collateralising-beholding-protohumanity’—to—‘attain-sublimating-humanity’—as-to-existence-potency—sublimating—nascence,—disclosed—from-prospective-epistemic-digression-as-of—<amplituding/formative—epistemicity>totalising—renewing—realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness> as to the fact that all human sublimation is instigated as of re-originary—as-unenframed/unbeholding/outlier-conceptualisation—(imbued-postconverging/dialectical-thinking—’projective-insights’/epistemic-projection-in-conflatedness’—of-notional—deprocrypticism-prospective-sublimation) before secondnaturing positive-opportunism institutionalisation, as so-reflecting Derridean messianicity wherein even when the messiah comes they still have to come (inevitably-so given prospective human notional—firstnaturedness—temporal-to-intemporal-dispositions to whatever induced supererogation/messianicity of originariness-parrhesia,—as—spontaneity-of-aestheticisation so-associated with human dimensionality-of-desublimating-lack-of —<amplituding/formative—supererogatory—de-mentativeness/epistemic-growth-or-conflatedness’/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equality). It is this fact that explains why no underpinning—suprasocial—
construct is able to coherently explain human-subpotency ‘fatedness-of-sublimation-over-desublimation to existence-potency-sublimating-nascence,-disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,-in-supererogatory–epistemic-conflatedness\textsuperscript{12} in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-institutionalisation-process\textsuperscript{66} since it will always be caught-up in its ‘presencing—absolutising-identitive-constitutedness\textsuperscript{13} existentialising—enframing/imprintedness-<as-to->historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition> as to its underlying presencing-distorted–meritocracy/totalising—sovereign-approporation—of-human-ontological-performance\textsuperscript{7}-<including-virtue-as-ontology> desublimating–existentialising–decisionality. In other words ‘the legislation for human prospective sublimation’ (as to sublimating–existentialising–decisionality) lies with the firstnatured intemporal individuation relation to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{9} and the positive-opportunism\textsuperscript{7} arising thereof (as of a minimum) for human secondnaturing institutionalisation; and so as to the fact that the Socrates, Descartes, Kants, Newtons, Leibniz, Pasteurs, Rousseaux, Diderots, Einsteins, Teslas, etc. didn’t ask for any prior consent from the rest of the human species to undertake whatever sublimation they envisioned about humanity making nonsensical the idea that there is any ‘generalised human deterministically constraining contemplation of prospective sublimating’. Humanity as such has always been, is and will ever always be about intemporal individuations imagination-and-capacity-for-prospective-sublimation (as to living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\textsuperscript{99} implications) and in that regards the triteness of human pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation in

doesn’t count (given the latter associated temporal desublimating–existentialising–decisionality

This elucidation is important in the sense that pedantic science-ideology is driven by a conception of mere-manipulable formulaicity of reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation that poorly appreciates the profound-supererogation in the ‘invention/creation’ of true science and thus comes to relate to science as ‘off-the-shelf and made-to-measure contrivance of formulaicity devoid of profound–supererogation’ in a soulless ‘temporal beholdening as sovereignising–imbued-subontologisation/subpotentiation (implied pretense-of-sublimation as to desublimating–existentialising–decisionality supposedly taking precedence over inherent prospective knowledge-reification ’), with this shallow–supererogation explaining naivist

Such development as to ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge paradox’ is ultimately associated with scenarios of institutional-ascendency and other dominance/vested-interest (as associated with many a modern day think-tank and secret institutions) overtly or covertly construed as inherently predicative-of and superseding knowledge as to networks of influence bent on intimating what can be thought or not as well as pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation of genuine knowledge, in ‘temporal beholdening as sovereignising–imbued-subontologisation/subpotentiation (implied pretense-of-sublimation as to desublimating–existentialising–decisionality supposedly taking precedence over inherent prospective knowledge-reification’). It is herein contended that in many ways as to human ontological-good-faith/authenticity ~de-mentating/structuring/paradigming—<seeding/incipient–profound—supererogation—,as-mentally-aestheticised–postconverging/dialectical-thinking –qualia-schema>, it is technically

It is herein contended that any pretense of a conception of humanity along those lines is nothing but mirrored-fascism as to the mere-token that all the human others are capable of ‘sublimating~referencing/registering/decisioning self-becoming/self-conflatedness /formative—supererogating<-projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing,-in-perspective–ontological-normalcy/postconvergence>’ (as to inherent cultural growth and cultural diffusion capacity) thus rendering any lousy exclusionary conception of humanity along the lines of Western, non-Western, Oriental, Chinese, Arab, African, Russian, etc. of vague presencing—absolutising-identitive-constitutedness social-stake-contention-or-confliction beholdening-becoming—distortive-originariness/distortive-origination—as-to—historicity-tracing—inhibited-mental-aestheticising (speaking of shallow

In many ways this latterly identified manifestation of ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge paradox’, wherein political purpose supposedly supersedes human intellective potency is the very crème-de-la-crème de-mentative/structural/paradigmatic and defining basis for social-and-institutional-frameworks-of—referencing/registering/decisioning of desublimating—existentialising—decisionality as to ‘temporal beholdening as sovereignising—imbued—subontologisation/subpotentiation (implied pretense-of-sublimation as to desublimating—existentialising—decisionality supposedly taking precedence over inherent prospective knowledge-reification’)’; so-reflected with dominion/statal—logic—(preconverging/shallow—supererogating—human—and-social—expectations/anticipations—de-mentating/structuring/paradigming—psychologism—as-to-its-specific—collateralising—beholdening—<whether—trepidatious—or—warped—or—preclusive—or—occlusive>—and—its—consociated-dominance/vested-interest—subontologising—skewed—normativity—discretely—implied—functionalism)—temporal beholdening as sovereignising—imbued—subontologisation/subpotentiation (implied pretense-of-sublimation as to desublimating—existentialising—decisionality supposedly taking precedence over inherent prospective knowledge-reification’). In other words, the global political and geopolitical dynamics itself (so-associated with derived economic and social dominance/vested-interest) is de-mentatively/structurally/paradigmatically instigative of a ‘surreptitious—and—flawed claim in desublimating—existentialising—decisionality upon human genuine social intellectual—function/posture’ as to social—and—institutional-frameworks-of—referencing/registering/decisioning existentialising—decisionality and so obviating genuine

years and decades, as to the capacity for the human to redefine humanity in the light of the
societal and technological transformations of the past few decades and the resultant/developing

It is no wonder that periods following heights of acute hegemonic strifes especially as associated with warfare come to be tempered with a genuine social intellectual–function/posture obverse/self-deprecatory to such hegemonic manifestations; more like symbolising a sense of failing a more critical human purposefulness usurped in the fantasy of such hegemonic strife. In another respect, exactly because of this disillusionment arising from hegemonic strifes the very genuine social intellectual–function/posture (as to its abstract notional/epistemic possibilities for prospective sublimation/emancipation so-undermined by dominion/statal–logic–(preconverging/shallow-supererogating–‘human-and-social–expectations/anticipations—de-mentating/structuring/paradigming–psychologism’–as-to-its-specific–collateralising-beholdening–〈whether–trepidatious-or-warped-or-preclusive-or-occlusive〉–and–its–

This flawed conception of the genuine social intellectual–function/posture is supposedly justified across human history on the basis of the hazardousness or superficiality of intellectual ideas (and this is the case in all societies even in many a premodern society when the traditional order of the day is put in question with cultural diffusion as to when for instance witchdoctors carry covert misinformation campaign against the perceived threat of modern medicine) while paradoxically
genuine social intellectual–function/posture (even as to when it is undermined with punctual pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation desublimatingly pandering to the powers of the day) remains the only human conduit to sublimating ontological-veracity that cannot be substituted but rather supererogated as to undermining such pedantic incrementalism-in-relative-ontological-incompleteness — enframed-conceptualisation, with the issue of manifest intellectual ineptness/incapacity not a de-mentative/structural/paradigmatic issue of intellectual irrelevance no less than punctual technical or scientific incompetence can be transformed into a de-mentative/structural/paradigmatic issue of technical or scientific irrelevance but rather requisite profound–supererogation over say pseudoscience and/or ‘distorted institutional science’ (as the fact is when it comes to social-stake-contention-or-confliction ‘knowledge-reification’ tends to be notionally/epistemically caught up between a sublimation and desublimation/gimmickiness de-mentating/structuring/paradigming’ as reflected in the social reality of ‘a veil of knowledge associated with subterfuges’ reflected say in an ambiguous continuity between genuine-knowledge and chicanery, social/institutional intellectualism and social/institutional sycophantic-sophistry, treatment and placebo, alchemy and chemistry, quackery and medicine, technological-advancement and technical-mystification, flawed-industrial-analyses-and-certifications and disinterested-scientific-analyses-and-certifications, etc.); and in many ways dominion/statal–logic—{preconverging/shallow-supererogating–‘human- and-social–expectations/anticipations—de-mentating/structuring/paradigming–psychologism’– as-to-its-specific–collateralising-beholdening—<whether–trepidatious-or-warped-or-preclusive- or-occlusive>–and–its-consociated-dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity—<discretely-implied-functionalism>} pursuit of such vague argumentations for subverting the genuine social intellectual–function/posture is rather all about the ruthless adoption of a perambulatory course for institutional and political

gesturing as determining sublimating–existentialising–decisionality)’. In our modern day
context, the very essential ‘public-sovereignty–giving function/posture as associated with the
centrality of elections, voting and party politics’ of the modern democratic process is now
paradoxically surreptitiously re-construed as the very cornerstone for dominion/statal–logic-

sublimating–existentialising–decisionality of the genuine social intellectual–function/posture;
and so as to the fact that the democratic process ‘public-sovereignty–giving function/posture as
associated with the centrality of elections, voting and party politics’ is incomplete without an
adequate-and-healthy enlightening public-debate with such enlightening encumbering upon a
genuine social intellectual–function/posture. In many ways the very idea of the ‘democratic
public-debate’ itself is skewed from its very inception as to dominance/vested-interest natural
ascendancy over ‘the supposedly democratic platforming and stakeholding in defining the very
issues of society’s social-stake-contention-or-confliction’ (as so-associated with thematically
skewed media debates and socio-econo-political thought-makers/thought-making overtly
associated with ‘skewed think-tanks’ or covert surreptitious underhanded institutional and
media influence). Critically, in this context such skewed platforming and stakeholding ends up
alienating supposed sovereign electors as to a platforming and stakeholding process that mediatically and politically take a self-contained course (as to dominance/vested-interest defaulting issues that can be debated as to the underpinning–suprasocial-construct existentialising—enframing/imprintedness-<as-to- historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> socio-econo-political social-stake-contention-or-confliction) with the consequence that the so-politically-alienated sovereign electors are increasingly turning to protest votes (reflecting rather a psychological-outleting rather than true policy solution) or decreasing participation in the democratic process, in many ways speaking to the very natural defaulting of the political process to dominance/vested-interest ‘tolerable locked-in socio-econo-political outcomes’ however the underlying sovereign electors mood as to the fact that even protest votes can’t escape the institutional hold of such dominance/vested-interest. In many ways, it is the critical and genuine social intellectual–function/posture as to such aporeticism overcoming/unovercoming that can reifyingly-and-empoweringly effectively reflect upon the pertinence of such a dominance/vested-interest democratic process confiscation/lock-in (as equally manifested by the fact that even newly elected ambitious representatives come to be surreptitiously given their marching orders as to what is politically possible or not). In this respect, the very underpinning–suprasocial-construct existentialising—enframing/imprintedness-<as-to- historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> (as to as to living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology ⟩) poses a major challenge as public-sovereignty is existentialisingly—enframed/imprinted to be wary of prospective re-ontologisation of alternative institutional aestheticising contemplation ‘given dominion/statal–logic-{preconverging/shallow-supererogating–‘human-and-social–expectations/anticipations—

surreptitious undermining of knowledge-driven sublimating–existentialising–decisionality at moments of decision’, and thereafter it doesn’t matter in effect whether the human sovereign–function/posture comes to think otherwise and disapprovingly of the given decisions, as better still so long as this rather plays the role of a psychological-outleting that project a falls sense of public accountability of poor or no effective resolutive course, this mechanism of ‘punctual and surreptitious undermining of knowledge-driven sublimating–existentialising–decisionality at moments of decision’ can perpetuate itself as to a Machiavellianism underlying the dominion/statal–logic–⟨preconverging/shallow-supererogating–‘human-and-social–expectations/anticipations—de-mentating/structuring/paradigming–psychologism’-as-to-its-specific–collateralising-behoydening–⟨whether–trepidatious-or-warped-or-preclusive-or-occlusive⟩–and–its-consociated-dominance/ vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity–⟨discretely-implied-functionalism⟩⟩ relation with the human sovereign–function/posture. Such a Machiavellianism riding-the-wave of the underpinning–suprasocial-construct existentialising–enframing/imprintedness–⟨as-to–historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition⟩ of the human sovereign–function/posture thrives on social and intellectual pedantic incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation with the cultivation of disingenuous analysis as to strategies of misanalysis (so-reflected by the ‘propounding and enframing in ad-hocness and false-orthodoxy of policy issues so-underlied with catchphrases like deficit, public spending, etc. as to an aversion to consistent and long-term analysis pointing out the underlying inconsistency’ highlighting effectively that the political disenfranchisement/swindling/corruption/dispossession purpose of such argumentations precede their ‘very inherent knowledge-reification–gesturing as determining sublimating–existentialising–decisionality’ purpose as to Machiavellian instigated false public debates) to which human sovereign–function/postures gullibly get caught up in or which
ultimately discourages public interest and participation or lead to protest votes; with such misanalysis typically characterised by false bothsidesism existentialising—enframing/imprintedness-as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition> reflex (bandied about as supposedly the very summum of democratic impartiality) relation to any sublimating meaningfulness-and-teleology. Misanalysis as such speaks fundamentally of an issue of ontological-bad-faith/inauthenticity (and as to the fact that knowledge-reification ends/should-not aspire to any ‘convincing’ of ontological-bad-faith/inauthenticity ~dementating/structuring/paradigming-seeding/incipient—shallow~supererogation , as-mentally-aestheticised—preconverging/dementing —qualia-schema> as the latter is nothing but a circular process that only ends up degrading knowledge into falsehoods as individual supererogatory—shallowness or supererogatory—profundness seedingly/inceptively lies with the individual and not knowledge, well before sublimating knowledge can be of any relevance thereof as to derived-formulaicity projected reproducibility—mathesis/motif/thrownness-disposition, as—reproducibility-of-aestheticisation). In this regards, it is critical to appreciate that the democratic process is a sovereignty-imbuing process and while this sovereignty-imbuing process is critical as the point-of-departure for socio-econo-political social-stake-contention-or-confliction aporeticism overcoming/unovercoming it is incomplete if it is merely construed/manipulated as to essentially sovereignty-giving without a cultured aspiration to grasp and operate as to

This reality underlies the contention herein of the ‘overrated pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation of meaningfulness-and-teleology’ as to the fact that human discursivity is not a discursivity of absolute-mentation-capacity but rather a discursivity of limited-mentation-capacity, and thus it is a discursivity of subpotency as to human-subpotency which doesn’t necessarily subject/supersede existence as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation as warranted for prospective sublimation/emancipation (even as human social-and-institutional-frameworks-of—referencing/registering/decisioning of existentialising—decisionality by reflex tend to absolutise human discursivity as to presencing—absolutising-identitive-constitutedness social-vestedness/normativity-<discretely-implied-functionalism>); thus requiring appropriate ‘nonpresencing-<perspective—ontological-normalcy/postconvergence> epistemic-projection (as to requisite human limited-mentation-capacity-deepening towards absolute-mentation-capacity, in projective reflection of ontologisation/omnipotentiality as to ontological-normalcy/postconvergence, as sought-after by the genuine social intellectual–function/posture involving its specifically cultivated arts/skills and time investment and on the intimation that the implied deferential-formalisation-transference is so-validated as of the supposedly coherent ontological-commitment ) and its consequent notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing/>‘distantiation of contemplative existentialising–frame as to transversality-of-affirmative-and-unaffirmative–disambiguated-‘motif-and-apriorising/axiomatising/referencing’ in superseding any underpinning–suprasocial-construct

making-available/opening-up prospective knowledge as of organic-knowledge is inevitably tied
down to the exercise of underlining simultaneously a prospective threshold of pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation and associated intellectual-decadence (but then the detachment and lesser ‘emotional-involvement’ with regards to nascent-particular/incipient-and-material/technical-sublimations—blinded-to-their-relative-ontological-completeness—reference-of-thought-devolving> renders such an exercise less problematic than with regards to the imposing/impostoring self-presence/self-constitutedness—in-perspective—epistemic-abnormalcy/preconvergence> of social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising—decisionality prone to presencing—absolutising-identitive-constitutedness ). Fundamentally, the ‘contrastive inequivalence relation’ implied as of notional–self-distantiation-≪imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing≫’/‘distantiation of contemplative existentialising–frame as to transversality-of-affirmative-and-unaffirmative–disambiguated–‘motif-and-apriorising/axiomatising/referencing\textsuperscript{15}’ is critically ‘the manifestation of the very ontological-normalcy/postconvergence nature of existence but for the confusion of human limited-mentation-capacity induced \textsuperscript{7}presencing—absolutising-identitive-constitutedness\textsuperscript{8}’. Thus in effect notional–self-distantiation-≪imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing≫ actually reflects the reality of human limited-mentation-capacity-deepening\textsuperscript{9} (rather than truly a counterpart to distractive-alignment-to-reference-of-thought-≪of-apriorising/axiomatising/referencing≫\textsuperscript{10}), and so in the sense that existence as of its ontological-normalcy/postconvergence is unbeholding to human limited-mentation-capacity (as to its \textsuperscript{<amplituding/formative–epistemicity>totalising–thrownness-in-existence,\textsuperscript{14}}\textsuperscript{-imbued-projective-arbitrariness/waywardness-(as-to-the-human–projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing-process-of-‘<amplituding/formative–epistemicity>totalising–conceptualisation’)) which beholding ‘wrongly projects a contrastive equivalence relation’ between notional–self-distantiation-≪imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing≫ and distractive-alignment-to-reference-of-thought-≪of-apriorising/axiomatising/referencing≫\textsuperscript{11}; as rather notional–self-distantiation-≪imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing≫ is a ‘submission and making up to existence’s ontological-normalcy/postconvergence’ as to when relative-ontological-

In this respect, we can appreciate that appropriate notion—self-distantiatiation—imbued—motif-and—re-apriorising/re—axiomatising/re-referencing is effectively what is bound to bring about momentous historiality/ontological-eventfullness/ontological-aesthetic-tracing as to a human genuine social intellectual—function/posture (underlied by ontological-commitment implied self—assuredness—of—ontological—good—faith/authenticity—as—being—as—of—existential—reality) wherein without such a ‘submission and making up to existence’s ontological-normalcy/postconvergence’ the transition say between classical-mechanics—axiomatic-constructs and theory—of—relativity—together—with—quantum—mechanics—axiomatic-constructs would have been problematic (if the proponents of the former as of human institutional social-stake-contention—or-confliction adopted a distractive-alignment-to—reference—of—thought—of—apriorising/axiomatising/referencing as to ‘submission and making up in contrastive equivalence to human-subpotency epistemic-abnormalcy/preconvergence’ in relative-ontological-incompleteness, but then the very healthy intellectual environment meant that even the proponents of the superseded classical-mechanics—axiomatic-constructs were already involved in a healthy notion—self-distantiatiation—imbued—motif—and—re-apriorising/re—axiomatising/re-referencing that would be receptive to such an eventual anarchic—growth/anarchisation for re-ontologisation) while in contrast such transformation implied (with

critically relevant in appraising that ‘technical/profound articulations are not made gratuitously’
(in contrast to a modern day unnecessary ‘social-and-media reflex of facility/convenience’

‘infrastructural/root source of the cultivation of public and institutional discursive mediocrity’
as to ‘enculturating a practice of public interestedness/profundity mediocrity and public
awareness/accounting/decisioning mediocrity’ whereas the technicity/profundity of modern day
training and professions rather points to the fact of a public potentially capable to handle more
creatively profound/technical public analysis and public debate rather than just
`parsimonious/frugal ratings-driven defining conception of intellectual analysis prone to desublimating disorientation, misanalysis and irrelevance’) as to the requisite social notional–self-distantiative contemplative profundity/technicity that inherent existence sublimating–nascence warrants to make available appropriately sublimating <supererogatory–human-subpotency>–effecting. This poor appreciation of profundity/technicity in public arises as of a poor projection of existence’s sublimating–nascence to wrongly imply that the individual ‘is perfect as they are’ with supposed ‘normalised/stereotypised/selfhelping/feel-good knowledge being brought at the sovereign’s service’, and critically wrongly implying that knowledge as to organic-knowledge can be acquired without the requisite epistemic-growth/discomfort/disquiet of the individual as to their ‘appropriate notional–self-distantiation–<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> for acquisition in epistemic-growth’, while at the same time ‘a pseudo-contrition as to awareness of such relatively shallow technicity/profundity cultivated in such social-and-media spaces’ doesn’t deter such spaces (consciously or unconsciously) from surreptitiously acting as of profound technicity/profundity at critical moments of public discourses with the consequence that ‘there is an opaque connection/continuity between public, media and institutional discursivity with social and institutional outcomes as if these are discrete and unrelated activities’ (whereas the supposed relevance of discursivity has to do with how it allows for comprehensible public epistemic-growth in effectively appreciating social and institutional outcomes processes rather than individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction). Ultimately, technicity/profundity is inescapable for achieving sublimating–nascence whether as more readily appreciated with nascent-particular/incipient-and-material/technical-sublimations–<blinded-to-their-relative-ontological-completeness – reference-of-thought–devolving> existentialising–decisionality or with the relative blurriness of social-and-institutional-
frameworks-of—referencing/registering/decisioning existentialising—decisionality, and critically in many ways the cultivation of shallow technicity/profundity (as to poor epistemic-growth requiring appropriate notional~self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>) in public spaces is not detached from public interestedness/profundity mediocrity and public awareness/accounting/decisioning mediocrity. But then technicity/profundity as to the public discourse is all about cultivating the possibility for ‘a public formulative appraisal and habituation for an enlightened sovereign engagement with public decision-making policies and technicalities’; and in this regards it is herein contended that unlike it can naively be construed about human capacity for understanding, a lot of ‘human understanding is actually passive exposition to understanding of appropriately articulated/formulated knowledge-reification’ so-underlying <supererogatory–human-subpotency>–effecting as to the formative-and-enabling formulative backdrop for sovereignly appraising ‘meaningfulness-and-teleology technicity/profundity’ whether with regards to public education or even childhood-development education and/or formative institutional/professional education, as to the fact that formulative understanding (as of <supererogatory–human-subpotency>–effecting) is the sovereignty/independence giving possibility for human epistemic-growth relation with knowledge (as to conscious awareness existentialising—decisionality implications even if complete understanding as of complete meaningfulness-and-teleology technicity/profundity is not achieved and thus rendering the public resilient to desublimating pedantising/muddling/formulaic-hollowing-out—insubontologisation/subpotentiation with regards to the competing discourse in public spaces by such a capacity for notional~self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> to cultivate epistemic-growth/discomfort/disquiet over a facility/convenience mental-reflex). In this regards, the sovereign–function/posture ontologising-aptness is truly realised as to a dynamic deferential-formalisation-transference
relation with the genuine social intellectual–function/posture that is much more than a conception of ‘normalised/stereotypised/selfhelping/feel-good knowledge being brought at the sovereign’s service without any underlying conception of epistemic-growth/discomfort/disquiet’ as such a flawed conception is very much prone to disenfranchising public, media and institutional pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation bound to ultimately induce individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction (and as such disenfranchising framework render the truly relevant public issues secondary/indirect to their punctual/immediate purpose of ratings/popularity than genuine thought). But rather the sovereign–function/posture ontologising-aptness in many ways is in a protracted continuum with the genuine social intellectual–function/posture, so-implied as to ‘a totalitative construal of the genuine social intellectual–function/posture parallel intellectual contestation of aptitudinal substantive pertinence educing layers of deferential-formalisation-transference as of percolation-channelling-<in-deferential-formalisation-transference> enabling the sovereign–function/posture ontologising-aptness (so-undergirded by ‘the overall underlying social-construct ontological-commitment implied self-assuredness-of-ontological-good-faith/authenticity—as-being-as-of-existential-reality so-reflected as of social notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>’ and not enter into falsehoods of ‘contrastive equivalence’ implied distractive-alignment-to- reference-of-thought-<of-apriorising/axiomatising/referencing> manifested with ontologically-flawed bothsidesism formulations and recipes along the lines of decades-long politically manipulative narratives like deficits, public spending, social engineering, socialism, tribalism, fairness, libertarian, middle-of-the-ground, identity politics, etc.), wherein effective public and institutional intellectual contestation of aptitudinal substantive pertinence is not subverted by monopolising/quasi-monopolising/networking existentialising-frame of public and institutional
discursivity as of mere entitlement-and-access and ratings-drivenness. Likewise, the ‘genuine social intellectual–function/posture strives for a protracted continuum with the sovereign–function/posture for its ontologising-aptness’ but not in wrongly validating the existentialising-frame of discursivity as to a conception of ‘normalised/stereotypised/selfhelping/feel-good knowledge being brought at the sovereign’s service without any underlying conception of epistemic-growth/discomfort/disquiet’ (that ultimately undermines technicity/profundity which is inescapable for achieving sublimating–nascence whether as more readily appreciated with nascent-particular/incipient-and-material/technical-sublimations—<blinded-to-their-relative-ontological-completeness”—<reference-of-thought—<devolving> existentialising–decisionality or with the relative blurriness of social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising–decisionality); and so to fundamentally bring to the consciousness-awareness-teleology that ‘sovereignty doesn’t equate with technicity/profundity’ (even as in reality it is herein contended this disconnect in the appraisal of the veridical relationship between sovereignty and technicity/profundity is mostly enabled with social-and-media induced numbing-traction—of-desublimating—<meaningfulness-and-teleology”—<as-perspective-lost-of—‘supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness-as-to-the-imbued-postconverging/dialectical-thinking”—of–notional–deprocrypticism—(in-dimensionality-of–sublimating—”<amplituding/formative–epistemicity>growth-or-conflatedness /scalarisation-as-to-rescalarisation-as–re-ontologisation)> wherein ‘an elicited conformity/trending/voguing/fashionability/resonance relation to ”meaningfulness-and-teleology” undermines the individual’s and social ‘conscious-and-active epistemic-totalising” re-procession of the existentialising–frame re-apriorising/re-axiomatising/re-referencing of ”meaningfulness-and-teleology”’ while overemphasising rather a ‘subconscious-and-passive epistemic-totalising” re-automatism relation with the existentialising–frame re-apriorising/re-
axiomatising/re-referencing of "meaningfulness-and-teleology" as elicited with pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation with the consequent contemplative disorientation, estrangement and lip-servicing/trivialising-relation to veridical social-stake-contention-or-confliction evaluation’). This eventually means that the genuine social intellectual–function/posture (adduced knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications) should be able to saliently articulate/impress-upon the ‘overall social intellection-aptitude body’ with ‘appropriately sublimating technicity/profundity capable of veridically responding to social and institutional aporeticism overcoming/unovercoming’ as to social dynamics of percolation-channelling-<in-deferential-formalisation-transference> (rather than the manifested mediatic silliness wherein ‘re-processive technicity/profundity’ is widely scorned upon ‘in favour of vague normalised/stereotyped/selfhelping/feel-good narratives’ as to mere entitlement-and-access and ratings-drivenness eliciting pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation and so-inducing ‘individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction’, and as so-cynically-and-surreptitiously cajoled by dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity-<discretely-implied-functionalism> rendering the ‘overall social intellection-aptitude body’ relatively irrelevant towards upholding the sovereign–function/posture). Thus, the sovereign–function/posture is effectively disempowered as to its relevance to public outcomes of social-stake-contention-or-confliction when the ‘overall social intellection-aptitude body’ assessment capacity is fundamentally undermined as to monopolising/quasi-monopolising/networking existentialising–frame of public and institutional discursivity as of mere entitlement-and-access and ratings-drivenness bent on sidelinining salient and relevant narratives as to technicity/profundity (such that in effect through the decades such dominance/vested-interest-subontologising-skewed-influence-as-to-social-
vestedness/normativity-<discretely-implied-functionalism> has paradoxically effectively-and-preemptively succeeded in ‘qualifying in the public psyche’ the ‘specific overall social intellecction-aptitude body that is the public university as to its underlying social-construct ontological-commitment implied self-assuredness-of-ontological-good-faith/authenticity—as-being-as-of-existential-reality so-reflect ed as of social notional–self-distantiation—inferred—re-motif-and-re-apriorising/re-axiomatising/re-referencing> with regards to socio-econo-political social-stake-contention-or-confliction aporeticism overcoming/unovercoming’ in falsehoods terms of ‘contrastive equivalence’ implied distinctive-alignment-to-reference-of-thought<of-apriorising/axiomatising/referencing> and so-undermining its ‘neutral sovereign–function/posture upholding’, and with a failed public consciousness about the sovereign importance of the public university practically subjecting them to increasing private funding deeply eroding-and/or-corrupting their capacity for ‘neutral sovereign–function/posture upholding’). In many ways, the ‘overall social intellecction-aptitude body’ (as to its capacity for ‘neutral sovereign–function/posture upholding’ whether as so-reflect ed by the public university or the press body or the ‘overall backdrop of the professional class intellectualism’) has often failed to appreciate the implications of the fact that (given human <amplituding/formative—epistemicity>totalising–thrownness-in-existence, -imbued-projective-arbitrariness/waywardness-(as-to-the-human–projective/reprojective—aestheticising-re-motif—and-re-apriorising/re-axiomatising/re-referencing-process-of-'<amplituding/formative—epistemicity>totalising–conceptualisation’), ‘human meaningfulness-and-teleology’ is effectively of epistemic-totalising consequence (thus implying its non-disjointedness/comprehensiveness as of ‘<amplituding/formative>disposedness-(as-to-orientation/value-construct/valuation–and–derived-parameterising) and <amplituding/formative>entailment-(as-to-totalising-contiguous/coherent–factuality-of-variability)’ underlined as to its prospective foregrounding—entailment-(postconverging—
narrowing-down—sublimation as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation” in reflecting “immanent-ontological-contiguity”), as-operative-notional—deprocrypticism). Thus the veracity/efficiency of social intellection is rather in terms of ‘the consequent sovereign—function/posture contemplative pertinence/capacity in epistemic-totalising conflatedness/postconvergence allowing for appropriate coherence between concrete social reality and overall public perception of concrete social reality with respect to public outcomes of social-stake-contention-or-confliction’ and so rather than the naive counterintuition of mere ‘shallow process/processive conception as so-often reflected with a bothsidesism mental-reflex in-constitutedness/preconvergence in an atmosphere of incoherence between concrete social reality and overall public perception of concrete social reality’ (and so as to the fact that ‘existence as to ontological-veracity consequence of the social reality’ should in-confilatedness/postconvergence instigatively drive public debates rather than ‘the naivety that the equilibrating of human-subpotencies as of vague bothsidesism mental-reflex in-constitutedness/preconvergence will then reflect social ontological-veracity’ as the latter just makes room for desublimating pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation induced distractive-alignment-to-< of-apriorising/axiomatising/referencing> and wherein issues of minor or irrelevant social-stake-contention-or-confliction are used to disorientate and estrange the sovereign—function/posture while trivialising-and-enframing issues of central public interests). The consequence being that a ‘shallow process/processive conception as so-often reflected with a bothsidesism mental-reflex in-constitutedness/preconvergence in an atmosphere of incoherence between concrete social reality and overall public perception of concrete social reality’ is critically inadequate for ‘neutral sovereign—function/posture upholding’ and particularly so when elicited distractive-alignment-to-<of-apriorising/axiomatising/referencing> undermines the naturally sublimating—existentialising—decisionality ‘(as of epistemic re-originariness/re-

frameworks-of—referencing/registering/decisioning existentialising–decisionality characterised by blurriness allowing for the relative pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation de-mentated/structured/paradigmed undermining prospective genuine social intellectual–function/posture as to its projected re-ontologisation/omnipotentiality drive (as so-critically reflected with a pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation that in many ways openly-assert having nothing to do with present human and social aporeticism overcoming/unovercoming or superficially gloss over such human and social aporeticism overcoming/unovercoming, but while in many ways contriving to undermine anti-intellectually a genuine social intellectual–function/posture projective resolutioning of such prospective human and social aporeticism overcoming/unovercoming as so-fraudulently directed against the prospective sublimating–existentialising–decisionality of many a postmodern thought and other critical thinkers). Such a disontologising pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation is one that ‘increasingly runs away from and thrive outside the very central notion defining intellectualism’ (herein implied as ‘knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’) as to its dereification gesturing cultivating the decadent notion that ‘mere sovereignty equates with technicity/profundity’ (as the ‘critical cancer’ of our modern day democratic process as it ‘shuts-off requisite sovereign epistemic-growth/disquiet/discomfort in dispensing-with-immediacy-for-relative-ontological-completeness’-by-reification /contemplative-distension ‘so-associated with ‘individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction’); as to when such pedantism openly affirming ignorance or demonstrates ignorance go on to ‘supposedly articulate sublimating knowledge’ with such normalised/stereotypised/selfhelping/feel-good conception of knowledge ‘mediatically and
socially popularised’ inducing (given direct-and-indirect epistemic-totalising consequence of human meaningfulness-and-teleology) ‘incoherence between concrete social reality and overall public perception of concrete social reality’. The implications of such dereification gesturing (as to its reflection of human self-referencing-syncretising relation with ‘knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’) speaks to a degenerate conception of human self-referencing-syncretising that seem to imply surreptitiously that no relative-ontological-completeness is pertinent (which it rather cynically qualifies as relativism) as to a cynical self-presence/self-constitutedness <-in-perspective–epistemic-abnormalcy/preconvergence> of presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness<-as-to- historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>’ and very much explains why it fails to appreciate that without ‘relativism’ there is no progress since progress is relative to lack-of-progress with regards to human limited-mentation-capacity-deepening. Critically in this regards, human civilisation is only possible as to the genuine social intellectual–function/posture rather eliciting and fulfilling human ontological-commitment implied self-assuredness-of-ontological-good-faith/authenticity—as-being-as-of-existential-reality and so in a cogent percolation-channelling<-in-deferential-formalisation-transference> existentialising–frame allowing for human and humanity’s epistemic-growth/disquiet/discomfort (and not flawed normalised/stereotypised/selfhelping/feel-good conception of knowledge). We can appreciate in this regards that the specialist whether astronomer, technician, electronician, etc. is more critically sublimating/emancipating as to a ‘knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’ acting upon the breadth of socially cogent percolation-channelling<-in-deferential-formalisation-transference> existentialising–frame involving first-level technicity/profundity elucidation (as

In this regards, a prevailing and counterintuitive naivety as to human social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising–decisionality is that the mere communication of knowledge (without appropriate eliciting of epistemic-growth/disquiet/discomfort in dispensing-with-immediacy-for-relative-ontological-completeness †by-reification/contemplative-distension as an exercise that is behind knowledge-production in-the-very-first-place and is required for knowledge-transference) suffices without factoring that this is exactly what allows for pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation desublimation; as knowledge effectively requires a sound grasp-of and referencing-to its sublimating/emancipating cogent percolation-channelling-<in-deferential-formalisation-transference> existentialising–frame given human limited-mentation-capacity (as to the fact that the ordinary citizen doesn’t need to be a physicists or astronomer or engineer but rather have the appropriate fundamentals-and-distance to be able to sovereignly relate-to and reference-to the implications of such knowledge-reification ‡ and so rather than vague conceptualisation inducing disorientation, estrangement and trivialisation of the veridical public outcomes of social-stake-contention-or-confliction
aporeticism overcoming/unovercoming). Critically, it is herein contended that in many ways despite the blurriness of human social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising—decisionality, there are just as well subject to appropriate constraining deblurring analysis with respect to their aporeticism overcoming/unovercoming as to a ‘translating insight’ about nascent-particular/incipient-and-material/technical-sublimations—<blinded-to-their-relative-ontological-completeness>—reference-of-thought—devolving> existentialising—decisionality; and critically-so as of a relation to momentous historiality/ontological-eventfulness/ontological-aesthetic-tracing. In this regards, it is critical for humanity as a whole and as of social science practice to inculcate the attitude that despite the blurriness of human social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising—decisionality, that doesn’t mean this gives leeway for political and other dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity—<discretely-implied-functionalism>; as to the fact that the pretense of a social science/ontology dies (with respect to the emancipation/sublimation possibilities for the 8.5 billion humans on Earth) when such an illegitimate pretense is not bluntly challenged notwithstanding any browbeating as ‘supposed intellectuals’ lose their intellectual soul when they acquiesce to the <amplituding/formative> wooden-language—(imbued—temporal—mere-form/virtualities/dereification> /akrasiatic-drag/denatured/preconverging-or-dementing—narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology> of any such dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity—<discretely-implied-functionalism> that thrive as to temporal advantageousness on eliciting the lowliness of human contemplation for undermining prospective human desublimation/disempowerment. and pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation, the punctual/immediate temporal advantageousness for eliciting the lowliness of human contemplation in undermining prospective human desublimation/disempowerment is inherently validatory as to a decadent conception of human self-referencing-syncretising in terms of self-presence/self-constitutedness—in-perspective—epistemic-abnormalcy/preconvergence of presencing—absolutising-identitive-constitutedness—existentialising—enframing/imprintedness—as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>; but then in reality it is herein contended that in the middle to long run such posturing falsehoods are untenable notwithstanding the apparent punctual/immediate impressionation for the simple reason that veridical knowledge is not built on eliciting human sovereignising but rather eliciting human ontological-commitment as to ontologising-depth in epistemic re-originariness/re-origination projective/reprojective cross-subjection to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation (and it is in this regards that human history speaks of re-originary—as-unenframed/unbeholdening/outlier-conceptualisation—{imbued-postconverging/dialectical-thinking—projective-insights’/epistemic-projection-in-conflatedness’—of-notional—deprocrypticism-prospective-sublimation} as to human-subpotency ‘fatedness-of-sublimation-over-desublimation to existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression-as-of—amplituding/formative—epistemicity>totalising—renewing—realisation/re-perception/re-thought,—in—supererogatory—epistemic-conflatedness in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-institutionalisation-process’). At the ‘human lifespan extricatory punctuality/immediacy of depth-of-thought’ such a conceptualisation may seem frivolous but then the work/job of doing philosophy and thinking is
not for those of ‘human lifespan extricatory punctuality/immediacy of depth-of-thought’; that is why such pettiness-of-minds cannot recognise true work/job when they see it and it is herein contended are better off elsewhere rather than ‘merely hanging to the thread of institutional prescience’ devoid of ‘aptitudinal substantive pertinence reflected in a predisposition for totalisingly-disentailing—discretion/whim-of-thought’ that fails prospective human re-ontologisation/omnipotentiality. The above insight provides a relevant backdrop for a truer appreciation of ‘what is entailed by prospective anarchic-growth/anarchisation for re-ontologisation’ since critically any registry-worldview/dimension is rather of ‘forward-facing constructiveness-of-ontological-performance’-<including-virtue-as-ontology> as to social-stake-contention-or-confliction’ such that it reflects of itself mainly as of postconverging-or-dialectical-thinking—apriorising-psychologism while qualifying its prospective uninstitutionalised-threshold (as of preconverging-or-dementing—apriorising-psychologism) as nondescript/ignorable—void and so in a presencing—absolutising-identitive-constitutedness existentialising—enframing/imprintedness—<as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition>. But then ontology/science being as of existence doesn’t kowtow—and–subject-to the ‘little human mortal’ thresholds about existence, and it is up to the human to undertake its epistemic-growth/disquiet/discomfort in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/comemplative-distension for prospective Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of notional–self-distantiation—<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>/<distantiation of contemplative existentialising–frame as to transversality-of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’> ‘imbuing historiality/ontological-eventfulness’/ontological-aesthetic-tracing, and so rather than falsehood terms of ‘contrastive

underscores how human social-and-institutional-frameworks—of—

In this respect we can appreciate with regards to the capitalistic ‘catchmenting—by—rejection vague/imaginary lures of social-stake-contention—or—confliction’ that its most critical/grave moments are moments at which it is hardly/poorly present/existent as to its ‘given implied totalising—entiailing meaningfulness—and—teleology’ wherein for instance the social atrophying associated with the Great Depression rather elicited statal supererogatory—progressivity extending into the postwar era of
sociopolitical and socioeconomic value renewal that can hardly be qualified as of capitalistic instigation in the pure sense of the word and in many ways the technocracy developed and resourced in the postwar years and the associated scientific and technical advancement especially in the face of the Cold War in many ways speak to an underlying supererogatory–progressivity on which waves the capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’ rode as so-reflected by Eisenhower cautioning about the U.S. militaro-industrial complex potential sycophantic exploitation of such overall national supererogatory–progressivity and further reflected as to the accruing of national technical and scientific dividends incommensurably to private capitalistic actors. Furthermore, moments of national socio-economic crises as to such capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’ have always been critically involved with recouping and reallocating resources and means for ‘a poorly self-sustaining capitalistic model of social ascendancy with respect to public externalities, taxation and public debt’ as such a capitalistic model increasingly developed in later years into a de-mentative/structural/paradigmatic parasitising renting economic model associated with the explosion of financialisation especially as it substitutes/arrogates the social capacity to instigate formative supererogatory–progressivity initiatives (as it can now be appreciated that in many ways much of the postwar economy arose as of strong public and local governance directed investment in public infrastructure, housing and property which supererogatory–progressivity in many ways is now capitalistically substituted/arrogated rather as of a short-term renting-model that thrives upon creating winners and losers as to asset inflation strategy for skewed value-extraction). In a critical respect all the creative social supererogatory–progressivity after the postwar years is now reduced in terms of public mitigation of the deleterious fallouts from the capitalistic model all other social supererogatory–progressivity possibilities are now effectively assumed to lie with propping up a poorly self-sustaining capitalistic model (with
respect to public subventions, bailouts, taxbreaks) and so notwithstanding the massive financial gains and transfers to tax havens as to a global economy of contrasting rising wealth disparity with the supererogatory–progressivity for individual and social creative initiatives construed as lying in a labour subsistence surrendering to whatever modest possibilities such capitalistic model makes available as supposedly an absolutely determining construct of human supererogatory–progressivity possibilities (while overlooking the reality of its manifest renting parasitising of social value and value possibilities). This in effect speaks to ‘a renting and skewed value-extraction capitalistic colonising of the social capacity for supererogatory–progressivity’ as to imply that the social capacity for initiative can only be logged/cultured into the expropriating/estranging/constraining/limiting capitalistic model and so-reflected as of a globalised framework of totalising-entailing interlocking corporate interests and corporate welfaring that in effect critically and implicitly dictates to states (as of the subtle threat of runaway financial and economic disaster and/or state political-economy retrogradation for non-compliance) the very possibility for their full-capacity for supererogatory–progressivity while being well aloof of the public accounting that political actors running states have to fulfill thus speaking to a most fundamental globalised capitalistic induced democratic-deficit while relatively disempowered governments are left to pick-up-the-pieces (while de-mentatively/structurally/paradigmatically hemmed-in by the clerical counsels championing the capitalistic model) as to the blindness/sightlessness of a general public backlash (directed to media-driven impressionable narratives rather than to the protracted implications of the roguish capitalistic model), and so as to the more critical de-mentative/structural/paradigmatic international capitalistic system usurpation and undermining of the possibility for social supererogatory–progressivity and rendering democratic processes circularly unsatisfactory with the electorate increasingly resorting to protest and anti-incumbent votes. In many ways thus the supererogatory–progressivity potential of the global economy presents more opportunities than
the capitalistic model arrogatingly seem to imply as in many ways it can be argued that as of individual and social supererogatory–progressivity much of ‘vocational rationale’, ‘vocational skills’, ‘vocational economic models’ and ‘vocational creativity’ underlying the capitalistic model can perfectly thrive without capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’; and so as to the fact that the very notion of capitalistic enterprising across the world takes various shapes and forms wherein ‘the more doctrinaire skewed value-extraction and market distorting models’ ride-the-wave of profound value creation activities (often of poorly compensated supererogatory–progressivity) and in many ways undermining the inclination for profound value creation as to the shortcut for short-term returns. This capitalistic model of skewed value-extraction undermines the possibility of overall human supererogatory–progressivity as to when in the contest between optimal-resource-allocation for value-creation as to the requisite creativity for individuals and social supererogatory–progressivity and skewed value-extraction eventually reflects poorly self-sustaining capitalistic model (but for mechanisms of external and foreign relocations exploiting the externalities investments in education and infrastructure of second and third world countries) but still posing the question as to how skewed value-extraction can de-mentatively/structurally/paradigmatically address in the long-run issues of requisite social and public investment as a requisite for a theoretically self-sustaining economic model (not critically driven and supported by the supererogatory–progressivity prioritisation of local or foreign state) as ‘arrogating public supererogatory–progressivity at the exclusion of overall social and resourcefulness/ingenious possibilities’. Interestingly, the more explicit manifestation of supererogatory–progressivity as underlying any given underpinning–suprasocial-construct is most obvious today with the Chinese economic revolution as to the creative impetus driving its overall socioeconomic transformation. Here again it is fair to say just like with the Japanese and South Korean economic revolutions (given their more uniform
and deferential populations) there is a whole directedness here (beyond just a purist capitalism model especially of a renting and skewed value-extraction capitalistic model) and so as to ‘country supererogatory–progressivity directed whole socioeconomic transformation project’, and in many ways the capacity for the Chinese to now begin to invest abroad lies with this relatively healthy supererogatory–progressivity conception/model less betrothed to short-term skewed value-extraction poorly capable of fulfilling the necessary externalities investment to thrive in weaker developing markets (in contrast to the long-term resource-allocation needed to make such markets stable and sustainable). But then in reality when push-came-to-shove the fact is that the postwar history of all modern developed governments was hardly about their naïve subjection to a purist capitalistic model to rebuild themselves as in reality their redevelopment involved initial and massive public-driven investments in association with already matured nation-building human resource as to the reality of their supererogatory–progressivity national development programmes (especially as in the middle of the 20th century international trade accounted for just a small part of economic growth) and it is this that purportedly then gave way in later years to a the rising capitalistic model associated with privatisations and private equitisation; and this supererogatory–progressivity model applied in the postwar governments of Western Europe, the United States as well as China, Japan and South Korea as to their initial economic redevelopment. Paradoxically one of the most deleterious postwar economic policy stances advanced with respect to many a third world country as to the prodding of international economic organisations and as ‘abstractly and vaguely theorised’ by capitalist economists was the advocacy of nation-building in the third world following their postwar independence on the basis of the purist capitalistic model, thus leading in many ways to perpetuating the dependence of these nations on these international economic organisations as having to submit to the capitalistic ‘shallow-supererogation’ of supererogatory–progressivity’ as so-associated with debt servitude and de-
mentative/structural/paradigmatic adjustment programmes. The fact then is that the only nations in the postwar years that ‘truly experienced anything closed to the pure capitalistic economic model as devoid of any national supererogatory–progressivity investment-drive and social programmes mitigation for the consequences of the capitalistic model’ are in many ways third world countries of limited human and natural resources to be capable of instigating national supererogatory–progressivity with respect to their incipiently disadvantageous circumstances (especially compounded by their limited nation-building human resources) and this in many ways accounts for their high and relatively inefficient and subsistence informal sectors as to the relative inability of state resources to construct profound and sustainable projects of socioeconomic development (and even then when given the chance with the little means available as of a natural intuition they recoursed essentially to supererogatory–progressivity initiatives like education and basic infrastructural capacities that will hardly pass the test of a true profit-driven and value-extraction capitalistic model), and more critically so as to their more profound interests in social stability in the very first place which can only arise as from a basic level of social wellbeing of their populations before even practically utterly appropriating any such abstract capitalistic model rationale (which in many ways actually served to induce a skewed logic on the basis of which natural resources exploiting corporations from developed countries exploit third world natural resources on unfair shallow–supererogation economic terms) and as the short-termism of such a capitalistic model can hardly contribute to inducing the requisite political stability for sustained economic progress (with the capitalistic model as to its self-serving requirement rather warranting the requisite externalities possibilities for its thriving to be established beforehand). The more abstract rationale here (as to ‘human-decisionality-as-to-play-of-valid/invalid-decisionality-imbued-sublimation/desublimation’ omni-potential commensurability with inherent immanent-existence’s sublimation-structure/omnipotentiality) is to reflect the reality today of underlying human supererogatory–
progressivity as to the incipient reality that human family, communal, clanic and national communities cannot truly operate on the totalising-entailing basis of a purist capitalistic model of social organisation (as to the very risk of undermining social organisation as reflected in the relative prioritisation of national education and basic public facilities in the post-independence years in many third world countries) with such a purist conception rather reflected as to capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’ in a rather comprehensively developed framework/mechanism of value-allocation and value-extraction necessarily underlied by a basic level of supererogatory-progressivity. Further the capitalistic model as to its fabrication of winners and losers given its ‘all englobing critical delimiting/catchmenting of human supererogatory-progressivity possibilities’ increasingly brings peoples at loggerheads across races, classes, regions and nations with the implication that since it is centrally/critically defining as to the present day statal conception of social supererogatory-progressivity possibilities, there must necessarily be losers and winners with no creative supererogatory-progressivity beyond this dilemma; thus as to the fact that there can’t be a profound humanity-level creative supererogatory-progressivity as well as decolonised-capitalistic-by-statal supererogatory-progressivity so-construed as ‘anarchical individual and social supererogatory-progressivity’. Such a representation as herein articulated of the truer supererogatory-progressivity (however the ‘shallow-supererogation of supererogatory-progressivity’) beneath the capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’ is hardly reflected today as to ‘hardened narratives of an absolutising pure capitalistic model’ as mirroring the very ruthlessness associated with the renting and skewed value-extraction capitalistic model (as so-enculturated socially and mediatically as to ‘presenting—absolutising-identitive-constitutedness social-vestedness/normativity-<discretely-implied-functionalism>’). The relative veracity of supererogatory-progressivity is strongly seen with the state-driven Asian
and European supererogatory–progressivity economies (with the Germans, Japanese and Chinese out-competing the U.S. with respect to trade balance and so without all the ‘grandiose capitalistic economic theorising’ but on the more veridical realism of policy-driven supererogatory–progressivity) and as even in the U.S. there is at least a critical level of strategic supererogatory–progressivity with local states definitely adopting incentives-driven approaches of supererogatory–progressivity; all this speaking from an totalising-entailing perspective analysis of the purist capitalistic model as poorly self-sustaining of its socioeconomic framework (especially its relative irresponsibility with regards to foundational externalities like education, infrastructure, well thought-out policies, collective social advancement, etc.). The bigger question that then arises has to do with the possibility for optimal human supererogatory–progressivity ‘beyond just the statism and geostrategy/states-competition muddled framework’ that is de-mentated/structured/paradigmed to induce skewed ‘shallow-supererogation’ of supererogatory–progressivity’ as to capitalistic ‘catchmenting-by-rejection vague/imaginary lures of social-stake-contention-or-confliction’. Taking a step aback, in many ways the reality of the very fundamental notion of the capitalistic model speaking of perfect markets do not exist, and rather ‘markets themselves develop as advantageously created situations after the facts’ as to the requisite human creative supererogatory–progressivity for a market to even arise; and in this respect the supposed fittest notion of capitalistic competition as to punctual/immediate fitness tends to underperform the more advantageous supererogative contemplative deliberation of markets for critically efficient/optimising resource allocation/utilisation/development (as to the fact that de-mentatively/structurally/paradigmatically the relatively deliberative conceptualisation of markets associated with say German, Japanese, Chinese, South Korean public-policy supererogatory–progressivity economic models participate in their competitive edge over ‘vague/abstract punctual/immediate fitness notion of capitalistic competition’ that speaks to an

as reflected in the social reality of ‘a veil of knowledge associated with subterfuges’ reflected say in an ambiguous continuity between genuine-knowledge and chicanery, social/institutional intellectualism and social/institutional sycophantic-sophistry, treatment and placebo, alchemy and chemistry, quackery and medicine, technological-advancement and technical-mystification, flawed-industrial-analyses-and-certifications and disinterested-scientific-analyses-and-certifications, etc.). In other words, the notion of ‘the other’ as aetiologisation/ontological-escalation is much more than ‘magnanimity towards the other’ but more fully a stance that ‘calls upon a principled commitment to the notion of the other’ by the other as enabling the completeness of universal responsibility. Paradoxically, viewed from this angle as of the possibility of inducing prospective notional-contiguity/epistemic-contiguity\[\text{}<\text{profound-supererogation}\] of-mentally-aestheticised~postconverging/dialectical-thinking–qualia-schema\> for ontologically-veridical virtue transcendence-and-sublimity/sublimation/supererogatory–de-mentativity, a different interpretation can be made about the posture of a thinker like Heidegger during the troubled years of the 30s; as effectively, the implication of Heidegger’s analysis of the situation which he associated with Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\[\text{<amplituding/formative–epistemicity>causality–as-to-projective-totalitative–implications,–for-explicating-ontological-contiguity}\] points to ‘a conception emphasising ontology as defining virtue thus ultimately geared towards prospective notional-contiguity/epistemic-contiguity\[\text{}<\text{profound-supererogation}\] of-mentally-aestheticised–postconverging/dialectical-

Likewise, but with regards to virtue analysts analyses that are naively articulated on the basis of the ontological-contiguity of our ‘modern take attitude/mental-disposition/care–and–episteme’ as of our <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag prior relative-ontological-incompleteness of reference-of-thought leading to palliation as of selecting, triaging, mutually-concurring-and-accommodating and power-relations driven palliating virtue constructs, an altogether different drawback is decisively apparent as we know that since those troubled years, wars, genocides, and other crimes against humanity have still been taking place and will probably continue to take place, as of the de-mentative/structural/paradigmatic consequence arising with such manifestations in ontological-contiguity of our ‘modern take
attitude/mental-disposition/care–and–episteme’; divulging that conceptualising virtue in ontological-contiguity** is at best only of palliative consequence and not truly aetiologisation/ontological-escalation which rather warrants prospective notional-contiguity/epistemic-contiguity**-<profound-supererogation**-of-mentally-aestheticised–postconverging/dialectical-thinking –qualia-schema> as of prospective relative-ontological-completeness**-of- reference-of-thought. The fact is well-meaningness, good-intentions and/or good-naturedness however comforting to contemplate about doesn’t substitute for ontology/ontological-veridicality as of the need to truly understand the human limited-mentation-capacity dynamics behind human action for appropriate aetiologisation/ontological-escalation that brings an end to the endemisation and enculturation of any given registry-worldview’s/dimension’s vices-and-impediments**. This insight about virtue as lying with ontology has been to varying degrees implicitly understood by many postmodern thinkers, beginning with Heidegger pointing to a sophistication of thought but for the poor development and poor conclusions of his analysis during the troubled years of **s; and rather poorly interpreted by virtue critiques adopting a ‘modern take attitude/mental-disposition/care–and–episteme’ in ontological-contiguity** as of its **<amplituding-formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag prior relative-ontological-incompleteness**-of- reference-of-thought perspective construed-as reasoning-from-results/afterthought of modernity. Such sophistication of thought to think in terms of inherent
ontology, however ontologically-flawed with respect to Heidegger, has been further implicitly
pursued by latter postmodern thinkers as of quasi-transcendental implications for construing

implicated with the case of Derrida’s spirit insight. Ultimately, the ‘postmodern

As a further elucidation, prospective notional-contiguity/epistemic-contiguity\textsuperscript{1}-<profound-

(supererogatory—ontological–de-mentation-or-dialectical–de-mentation—stranding-or-

institutionalisation attitude/mental-disposition/care–and–episteme\textsuperscript{5} over the uninstitutionalised-
threshold\textsuperscript{52} attitude/mental-disposition/care–and–episteme. We can effectively grasp why
Heidegger’s implicated insight as of notional-discontiguity/epistemic-discontiguity but rather being associated with a given tradition actually couldn’t break through the barrier of perceiving notional-discontiguity/epistemic-discontiguity of mentally-aestheticised-preconverging/dementing–qualia-schema> as ‘futural way of thinking’, as it misperceived that any tradition can reveal as of its inherent nature the ‘futural way of thinking’, rather than that this lies with ‘a universal principle understanding of the transformation of traditions’ and thus how such universal principle understanding as of its universal implications informs about the ‘futural way of thinking’. In this regard, we can equally understand why Heidegger’s supposed criticism of Cartesianism was altogether a misplaced analysis given that ‘a universal principle understanding of the transformation of traditions’ as herein implied by this author in reflecting holographically-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, would have provided the insight that Descartes was actually ‘establishing a positivism tradition as of futural way of thinking’ breaking away from non-positivism/medievalism and so ‘as to the fact that dimensionality-of-sublimating—supererogatory—dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation is aporetically the more fundamental incipient/seeding originariness-parrhesia,—as—spontaneity-of-aestheticisation to Descartes thinking-proposition for budding-positivism reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation’ and thus in many ways the naïve/flawed Cartesianism today arise as to a reasoning as from reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation perspective whereas Descartes is more fundamentally involved in an aporeticism

Cartesian proposition ‘I think therefore I am’ is not the idea that Descartes contemplates that he
is the first person to be self-conscious about his thinking; rather his underlying reasoning is
‘more than just speculative doubting’ but ‘motivated doubting’ that is highly contextual-as-of-

existing habit-and-tradition-of-thought as of non-positivism/medievalism scholasticism
pedantic dogmatism reasoning-from-results/afterthought, and so liberated rearticulate thought
‘out of thin air’ as of prospective reasoning-through/messianic-reasoning as reflected by his
novel mathesis universalis metaphoricity rationalism schema/dissemination that permeates
all of his works such that even with his ontological argument something subtle and more original is happening, in that unlike many medieval scholasticism dogmatic interpretations that construe of a supernatural permeation into the natural, in affirming the ontological argument Descartes blocks-out/passivises the supernatural from the natural with the metaphoricity\textsuperscript{\ref{footnote26}} implication that the natural can be thought of operationally and in sublimation on its own terms–as-of-axiomatic-construct. Thus Descartes ‘I think therefore I am’ is rather a statement of intent as of a ‘futural way of thinking and sublimation’ and its budding-positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme, that is unique as ‘consciously setting up the pre-eminence of thinking in eliciting-and-resolving systemic doubting and de-mentating/structuring/paradigming the possibility of elucidation of any subject on this thinking and sublimation basis’. In effect Descartes project is actually as to existence-potency–sublimating–nascence,–disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought,–in-supererogatory–epistemic-conflatedness\textsuperscript{\ref{footnote12}} relative-ontological-completeness\textsuperscript{\ref{footnote87}} of apriorising/axiomatising/referencing as of positivism, and so from the ‘presencing—absolutising-identitive-constitutedness\textsuperscript{\ref{footnote13}} of non-positivism/medievalism. With both the budding-positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme and postmodern ‘deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme, we may be forgiven to confuse-and-dismiss their schema as-to-de-mentative/structural/paradigmatic—disseminative-implications as of prospective reasoning-through/messianic-reasoning as incoherent from a shallow-and-immediate uninsightful

The appropriate contemplative perspective for the appreciation of their schema as-to-de-mentative/structural/paradigmatic—disseminative-implications is effectively crossgenerational as of the amplitude/breadth of reference-of-thought implied transcendence-and-sublimity/sublimation/supererogatory-de-mentativity; as we can effectively appreciate that the very mathesis \textsuperscript{universalis} schema/disseminative metaphoricity\textsuperscript{↑} engendering our positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme is still ongoing today even as it is more clearly demarcated as initiated about 500 years ago. The overall logic of this notional-discontiguity/epistemic-discontiguity\textsuperscript{↓}-\textless shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema\textgreater analysis, implied as of prospective relative-ontological-completeness\textsuperscript{↓}-of- reference-of-thought, can be understood simply as of the relation between existence which is already given and human-subpotency which as of prospective relative-ontological-completeness\textsuperscript{↓}-of- reference-of-thought grasp more and more what is of the full-potency of existence by way of its axiomatic-constructs of existence or of purviews/domains of existence, with its grandest axiomatic-construct as an epistemic-totalising /circumscribing/delineating construct being the ‘reference-of-thought. We can grasp
that it is not existence and purviews/domains of existence which will adjust to human-subpotency for ontologically-veridical meaningfulness-and-teleology but rather human-subpotency adjusting as to existence-potency~sublimating~nascence~disclosed-from-prospective-epistemic-digression-as-of-amplituding/FormField-epistemicity>totalising~renewing-realisation/re-perception/re-thought,~in-supererogatory~epistemic-conflatedness; with such adjusting being construed as of prospective relative-ontological-completeness. But then humankind as of its developed-and-invested habits and traditions about existence counterintuitively relates to existence and purviews/domains of existence as if it supersedes them, and thus do not or poorly construes of prospective relative-ontological-completeness-of-reference-of-thought/relative-ontological-completeness-of-axiomatic-construct as an issue of human-subpotency adjustment as of psychoanalytic-unshackling/prospective-grounding/prospective-reification, implied as of de-mentation (supererogatory~ontological~de-mentation-or-dialectical~de-mentation—stranding-or-attributive-dialectics) with regards to the reference-of-thought transcendence-and-sUBLImity/sublimation/supererogatory~de-mentativity. In lieu the poor intuition is to imply that we are already well grounded and that prospective meaningfulness-and-teleology is an incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation to our already established psychoanalytic disposition rather than a maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation in resetting-our-psychoanalytic-disposition/prospective-grounding as of amplituding/FormField-epistemicity>totalising~renewing-realisation/re-perception/re-thought in conflatedness, such that this leads to constitutedness when so poorly psychoanalytically grounded on the naïve and ontologically-flawed basis that it is existence and purviews/domains of existence that adjust to our human-subpotency. Thus however counterintuitive, this overall conception structures the fact that it is as of de-mentation (supererogatory~ontological~de-mentation-or-dialectical~de-

This phenomenological insight in recognising that there is ‘an underlying metaphoricity’-induced relative-emancipatory migration’ from the mindset of the early hunter-gathers as of recurrent-utter-
When so-construed prospectively, ‘postmodern exteriorisation attitude/mental-disposition/care–and–episteme’ is all about such a ‘deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought as implied by its ‘human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation’ ‘originary postmodern-thought-process and other postmodern creative-processes avant-gardism’ that are not in a reasoning-from-results/afterthought ontological entanglement with our ‘modern take attitude/mental-disposition/care–and–episteme’. Consider in this regard the reasoning-through/messianic-reasoning prospective de-mentative/structural/paradigmatic disseminative implications as of Derridean différance/internal-dialectics/difference-deferral, Foucauldian genealogy-knowledge-and-power-discourse and Deleuzian immanence experimentation that can all be construed (and as equally implied by this author’s ontological-normalcy/postconvergence referentialism conception of ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing), as of prospective transcendence-and-sublimity/sublimation/supererogatory—de-mentativity singularisation’/epistemic-immanence/veridical-epistemic-determinism for perpetuated/disseminative preemption of conceptual disjointedness. Thus ultimately the notional–deprocrypticism registry-worldview/dimension is one that will be marked by sharper and sharper singularisation /epistemic-immanence/veridical-epistemic-determinism, construed as of its perpetuating/disseminating of the preemption of disjointedness. In this regard, singularisation /epistemic-immanence/veridical-epistemic-determinism retrospectively and prospectively reflects the notional–conflatedness/‘conflatedness’ implied as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality but with the latter as a ‘seeding promise of human-subpotency ontological-performance’-<including-virtue-as-

Thus singularisation”/epistemic-immanence/veridical-epistemic-determinism by its implied notional—conflicatedness” highlights that ‘axiomatic-constructs as of <amplituding/formative—epistemicity>totalising/circumscribing/delineating reference-of-thought—‘devolving’ in reflecting of ‘human-subpotency ontological-performance”-<including-virtue-as-ontology> correspondence with the full-potency of existence in its coherence/contiguity’ as of implied “human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation”, is effectively as of dissingularisation”/epistemic-nonimmanence/flawed-epistemic-determinism to singularisation”/epistemic-immanence/veridical-epistemic-determinism. That is singularisation”/epistemic-immanence/veridical-epistemic-determinism points out that there is no inherent meaning of existence about existence as existence is tautologically what it is as existence, rather the notion of meaning arises as of the notion of human-subpotency strife to ‘grasp what is existence’, and that latter notion is all about human-subpotency ‘axiomatic-constructs as of <amplituding/formative—epistemicity>totalising/circumscribing/delineating

the-absolute-a-priori-of-conceptualisation-and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporeticism-overcoming/unovercoming’>. In this regard, it is interesting to note that the notion of science practised by the successive pioneers cited above are markly different from each other and all subjected rather to the implications of existential-contextualising-contiguity knowledge-reification of their purview/domain of existence/intrinsic-reality/ontological-veridicality. It is interesting as well to note for example that when equations didn’t work out in reflecting existential-contextualising-contiguity, Einstein rather rethought and subjected human assumptions to existence—as-the-absolute-a-priori-of-conceptualisation—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation<as-to-perspective-ontological-normalcy/postconvergence-implied—‘prospective-aporeticism-overcoming/unovercoming’> for his science, with such notions as space-time rather than traditional space and time; pointing out that there cannot be any ideology about science and it is rather the constraint for existential-contextualising-contiguity knowledge-reification that determines science practice, and so in existential conflatedness. Further, it had long dawned on this author that scam studies meant to undermine the validity of underlying constructivist and relativist insights about existential reality as implied by postmodern-thought including with respect to such implications in the natural sciences are rather ‘supposedly invalidating’ wholly with respect to the authors of such scam studies coming out with the arguments of their ‘intendedness of invalidation’; with the legitimate contention that such ploys are thus surreptitious manoeuvres for preempting a given orientation of thought ‘not because of the inherent invalidity of such orientations as of inherent theoretical knowledge arguments in undermining such orientations’ but rather as a ploy of ‘inducing popularised scientific ideology’ to surreptitiously stifle such orientations without truly engaging in undermining its theorisation. Bogusness or non-bogusness is not a relevant
scientific criteria, though granted it can be a relevant criteria for ‘surreptitious media-driven invalidation’, as science-in-practice is about ultimate cause-and-effect relationships, and in practical terms many scientific studies are rather elaborated as of ‘deferred cause-and-effect constraint’ as a reifying gesture for ultimate cause-and-effect determination. The fact that similar scam studies for the ‘intendedness of invalidation’ cannot be construed as scientifically valid with respect to any given orientation of study renders such manoeuvres intellectually void, and whatever their underlying ‘covert goals’ and however genuine their authors are of intent. It is very much important in this regard that intellectuals, whether in the natural sciences or in the social and humanities, not be cowered/enframed by non-intellectual/extra-intellectual approaches to ‘acknowledged intellectual ways and approaches for intellectual argumentation’, and not even if such approaches are media-driven, so because much that is central and critical to intellectualism is about exploring all possibilities.) All these highlight an underlying ontology’s-directedness-as-Being that bears notional-conflatedness/singularisation/epistemic-immanence/veridical-epistemic-determinism implications, as of ontologically-veridical singularisation/epistemic-immanence/veridical-epistemic-determinism of human-subpotency ontological-performance/-<including-virtue-as-ontology> correspondence with the full-potency of existence/intrinsic-reality/ontological-veridicality over ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism; and yet our psychological disposition is more often than not geared to ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism that tend to be absolutised in constitutedness of prior reasoning-from-results/afterthought mental-reflexes of <amplituding/formative> wooden-language-(imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing~—narratives—of-the~reference-of-thought~categorical-imperatives/axioms/registry-teleology ), and so failing to grasp that the very principle of
uninstitutionalised-threshold\textsuperscript{12}. We can appreciate that with regards to ‘the very same ill-health <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality’ highlighted above, the various successively human-subpotency ontological-performance\textsuperscript{7}-<including-virtue-as-ontology> of prior perceptivities as successive uninstitutionalised-threshold\textsuperscript{12} are rather in ‘excogitative-blanking of the prospective institutionalisation existential-contextualising-contiguity\textsuperscript{11}-in-reification’ (by their identitive-constitutedness -as-‘epistemic-totality’ -dereification’ -in-dissingularisation -as-flawed-epistemic-determinism\textsuperscript{3} as-cloistered-within-the-same- reference-of-thought), as overlooking their successively prospective perceptivities which are actually in prospective relative-ontological-completeness\textsuperscript{17}-of- reference-of-thought as enabling/cogent-with difference-conflatedness’ -as-to-totalitative-reification -in-singularisation’ -as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-in-reflecting-the-ontological-contiguity’—of-the-human-institutionalisation-process’ , so-construed-as-singularisation’ /epistemic-immanence/veridical-epistemic-determinism’. The notion of human ‘excogitative-blanking of the prospective institutionalisation existential-contextualising-contiguity’ -in-reification’ can equally be elucidated with regards to a devolved axiomatic-construct of the reference-of-thought. For instance, we can grasp that with regards to ‘the very same physics <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, the perceptivity of ‘traditional classical mechanics axiomatic-construct’ had rather been in ‘excogitative-blanking of the prospective construal of existential-contextualising-contiguity -in-reification’ reflected by the prospective theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as the latter’s prospective relative-ontological-completeness\textsuperscript{17} reflects the former’s prior relative-ontological-incompleteness\textsuperscript{8} as dialectically out-of-phase/preconverging-or-dementing -apriorising-psychologism. This insight about human ‘excogitative-blanking of the
prospective institutionalisation existential-contextualising-contiguity 'in-reification' at uninstitutionalised-threshold actually highlights that from a prospective perspective of prospective relative-ontological-completeness of reference-of-thought our positivism–procrypticism registry-worldview/dimension is very much imbued with a flawed ontological-performance '<including-virtue-as-ontology>', as is the case with all other prior registry-worldviews/dimensions, 'when we seem to perceive-and-think that our social world of meaningfulness-and-teleology is coherent, failing to factor in that it is preconverging-or-dementing–apriorising-psychologism at its uninstitutionalised-threshold as reflected as disjointedness-as-of- reference-of-thought preconverging-or-dementing–apriorising-psychologism by futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of– meaningfulness-and-teleology as of prospective 'deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought'; as this false sense of coherence is actually the effect of our prior relative-ontological-incompleteness of reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag which we necessarily relate to as if of ontological-completeness-of- reference-of-thought, and this further explains as reflected from their prospective relative-ontological-completeness of reference-of-thought the notional–procrypticism/notional–disjointedness of all registry-worldviews/dimensions as of their prior relative-ontological-incompleteness of reference-of-thought denaturing meaningfulness-and-teleology as of their identitive-constitutedness as–‘epistemic-totality ’–dereification –in-dissingularisation–as-flawed-epistemic-determinism as-cloistered-within-the-same reference-of-thought. Concretely, the latter translates at the uninstitutionalised-threshold as of human-subpotency temporality /shortness or shortness-of-

This arises because within the institutionalisation framework of a registry-worldview/dimension human construal of its existential-contextualising-contiguity\textsuperscript{a} knowledge-reification\textsuperscript{a} is only as effective as of the institutionalisation reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{1}, -for-aposteriorising/logicising/deriving/intelligising/measuring– meaningfulness-and-teleology\textsuperscript{99} in universal-transparency \textsuperscript{a} (transparency-of-totalising-entailing,-as-to-entailing-\textsuperscript{a}amplituding/formative–epistemicity> totalising~in-relative-ontological-completeness\textsuperscript{a}) \textsuperscript{1}, thus providing a ‘perceptual perspective/framing/reference/horizon of \textsuperscript{99}meaningfulness-and-teleology\textsuperscript{a} about its existential-contextualising-contiguity\textsuperscript{a} knowledge-reification\textsuperscript{a}’. But then at uninstitutionalised-threshold\textsuperscript{102} where \textsuperscript{a}meaningfulness-and-teleology\textsuperscript{a} is denaturing, this prior institutionalisation ‘perceptual perspective/framing/reference/horizon of
overlooks the de-mentative/structural/paradigmatic reference-of-thought denaturing implications of its prospective disjointedness of meaningfulness-and-teleology out of prospective existential-contextualising-contiguity -reification, as such disjointedness-as-of-reference-of-thought can be instigated originally from a postlogism-slantedness mental-disposition and the developing social dynamics with human temporality. We can appreciate in this sense that even within a non-positivistic social-setup as animistic or medieval for instance, despite the fact that it is susceptible to ontologically-flawed superstitious beliefs like notions-and-accusations-of-sorcery, the bulk of human action will be in good intent as of its institutionalisation framework ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’; but then at its uninstitutionalised-threshold where its reference-of-thought de-mentative/structural/paradigmatic ontological-flawed implications of believing in superstition set in as of its prior relative-ontological-incompleteness-of-reference-of-thought, it always systemically faces notional–procrypticism/notional–disjointedness as of vices-and-impediments arising from non-positivism/superstitious human-subpotency existentially constrained temporal ontological-performance as wooden-language-{imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing—narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology} in usurpation of the prior institutionalisation ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’ now in false certainty/assurance. This points out that when consciously aware of uninstitutionalised-threshold manifestation, we can’t naively operate as of our prior institutionalisation ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’, as of the fact of the beyond-the-consciousness-
awareness-teleology -<in-existent-extrication-as-of-existential-unthought> preconverging-or-dementing –apriorising-psychologism human-subpotency existentially constrained temporal ontological-performance -<including-virtue-as-ontology> as <amplituding/formative> wooden-language-{imbued—temporal—mere-form/virtualities/dereification}/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the-reference-of-thought—categorical-imperatives/axioms/registry-teleology } in usurpation; such that an enlightened insight is able to bring up and examine a preconverging-or-dementing –apriorising-psychologism representation as temporal denaturing ontological-performance -<including-virtue-as-ontology> of the prior institutionalisation ‘perceptual perspective/framing/reference/horizon of ‘meaningfulness-and-teleology’ about existential-contextualising-contiguity’. But this conception is a reflection of more than just ad-hoc temporal manifestations at uninstitutionalised-threshold but rather points out, besides the trite or more grave consequences of this state of affairs as a result of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor, that the possibility for all prospective institutionalisations necessarily passes through understanding ‘human-subpotency existentially constrained temporal ontological-performance’ -<including-virtue-as-ontology> as <amplituding/formative> wooden-language-{imbued—temporal—mere-form/virtualities/dereification}/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the-reference-of-thought—categorical-imperatives/axioms/registry-teleology } of the prior registry-worldview/dimension in usurpation’, which understanding is actually what empowers the possibility for prospective institutionalisations that supersede/transcend it. In other words, humans in the various prior institutionalisations before our positivism were not limited to their various registry-worldviews/dimensions as recurrent-utter-uninstitutionalisation, base-institutionalisation,
universalisation and our positivism just because they were inherently different from us as a species, but because of the need for the necessary institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing of understanding as of its organic-knowledge to enable the very same species to accede prospective institutionalisations as of human-subpotency adjusting to the full-potency of existence, and not the false certainty/assurance that any human registry-worldview/dimension is fully developed and that existence/intrinsic-reality/ontological-veridicality will adjust to it, however our myopic/cloistered 60–100 years of living perspective. That is, grounding of meaningfulness-and-teleology is certainly required, but as of transcendence-and-sublimity/sublimation/suberogatory-de-mentativity it is not about grounding as of the present but rather as of psychoanalytic-unshackling/prospective-grounding/prospective-reification for prospective relative-ontological-completeness-of-reference-of-thought; and as highlighted elsewhere it is ontological-completeness-of-reference-of-thought (of human-subpotency as of its limited-mentation-capacity-deepening) that can imply human-subpotency ontological-performance-including-virtue-as-ontology correspondence with the full-potency of existence. It should be noted here that this ontology’s-directedness-as-Being/ontologically-veridical notion of human-subpotency singularisation/epistemic-immanence/veridical-epistemic-determinism ontological-performance-including-virtue-as-ontology correspondence with the full-potency of existence is a notion of teleology in notional-conflatedness as of ontological-normalcy/postconvergence (with teleology fundamentally construed as ‘phenomenal/manifest conceptivity/epistemic-reflexivity in existence as ontological (so-reflecting disposedness-(as-to-orientation/value-construct/valuation–and–derived-parameterising) and entailment-(as-to-totalising-contiguous/coherent–factuality-of-variability))’ and so as to the specific human-subpotency as to overall reifying-and-

It is further critical to understand that while universal-transparency⁴-(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative-epistemicity>totalising--in-relative-ontological-completeness⁸) with associated nested-congruence and harmony is brought about as of prior institutional secondnaturing, this should not be naively expected at uninstitutionalised-threshold ⁸ as we very much know that all uninstitutionalised-threshold ⁸ are conflicted as of their framework of ‘recurring dimensionality-of-sublimating —<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness⁸/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation temporal-to-intemporal’ for prospective institutionalisation prospective relative-ontological-completeness -of- reference-of-thought. (I exist therefore existence is transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance -<including-virtue-as-ontology>) means that it is wrong to construe the ontological-contiguity—to/of-the-human-institutionalisation-process as of a human temporal dimensionality-of-sublimating — <amplituding/formative–epistemicity>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation transformation, and so fundamentally because of human limited-mentation-capacity and the correspondingly constraining consequences on its ontological-performance -<including-virtue-as-ontology>. Central to any such prospective institutionalisation transcendental-enabling/sublimating/supererogatory–de-mentativity meaningfulness-and-teleology is the fact that the human mind is not necessarily geared to come to terms with prospective relative-ontological-completeness of reference-of-thought without the necessary psychoanalytic-unshackling/prospective-grounding/prospective-reification as of the developed disposition to register such implications as of their intemporal/longness-of-register-of—meaningfulness-and-teleology pertinence; as the notion of crossgenerational de-mentation—(supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding—or-attributive-dialectics) herein highlighted has ever always been an unconscious human mental process, wherein the mental-disposition hardly places itself in a situation of explaining how its
own very present mental-disposition comes about from preceding generations mental-dispositions and drawing the implications, in going beyond excogitative-blanking as of the present in a cloistered-consciousness but which is paradoxically necessarily the framework of such transcendentally implying \( \text{meaningfulness-and-teleology} \). Thus the metaphoricity\(^5\) exercise of transcendence-and-sublimity/sublimation/supererogatory--de-mentativity is not one of necessarily eliciting instant \( \text{meaningfulness-and-teleology} \)\(^9\) universal approbation but rather instigating \(^1\) universal untenability as of ontological-primemovers-totalitative-framework\(^6\) for prospective \(^1\) universal positive-opportunism\(^7\); as we can appreciate that in reality the possibility of the successive institutionalisations was not the outcome of every human soul grasping the implications as of the successive transcendence-and-sublimity/sublimation/supererogatory--de-mentativity but rather as of a generative dynamics as of critical drift/gravitating effect in reflection of difference-conflatedness\(^1\) as-to-totalitative-reification\(^6\) in-singularisation\(^2\) as-veridical-epistemic-determinism\(^7\) protracted-teleological-wholeness/nested-congruence-in-reflecting-the-ontological-contiguity\(^6\) —of-the-human-institutionalisation-process\(^6\) , so-construed-as-singularisation\(^2\)/epistemic-immanence/veridical-epistemic-determinism'. prospective deprocrypticism—or—preempting—disjointedness-as-of reference-of-thought. Consider in this regard, the peregrinations of say a Descartes or Rousseau wherein in many ways they will fail to fulfil the mundane medieval world conception of ‘the supposedly good life’ as of its totalising—self-referencing—syneretising/circularity/interiorising/akrasiatic-drag, as they reify meaningfulness-and-teleology by their peregrinations to construe of the de-mentative/structural/paradigmatic underdevelopment/unenlightenment of their society as in need of prospective positivistic reflection of the notional-discontiguity/epistemic-discontiguity—shallow-supererogation—of—mentally-aestheticised-preconverging/dementing—qualia-schema of non-positivism/medievalism as of their ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality singularisation—epistemic-immanence/veridical-epistemic-determinism reified insight. The insight here about reification is that all their intemporal value references are rather as subsumed in their ‘positivistic reification of meaningfulness-and-teleology’ as of their prospective relative-ontological-completeness—reference-of-thought with the corresponding implications of human ‘prospective positivistic transcendence-and-sublimity/sublimation/supererogatory-de-mentativity ontological-performance—including-virtue-as-ontology’ as aetiologisation/ontological-escalation, and so over non-positivism/medievalism vices-and-impediments. By that token they are effectively of the most intellectually-and-morally inclined persons of their society. Contrastively, the temporal value reference as of non-positivism/medievalism wooden-language—(imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—nondescript/ignorable—void —with-regards-to-prospective-apriorising-implications>) mental-dispositions of persons like ‘honourable aristocrats’ simply reified to the universalisation—non-positivism/medievalism registry—
worldview/dimension with its prior relative-ontological-incompleteness \(^8\)-of-\(^8\)reference-of-thought vices-and-impediments \(^9\), while favourably looked upon as of non-positivism/medievalism society <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \(^1\) from a prospective singularisation \(^1\)/epistemic-immanence/veridical-epistemic-determinism insight points to such a prior registry-worldview/dimension denaturing \(^7\) meaningfulness-and-teleology \(^9\), and implying effectively that they are of lesser intellectual-and-moral dialogical-equivalence. This further explains why vague classification schemes of value like good-naturedness, kindness, honesty, etc. have no inherent meaning as of themselves, as all the meaningfulness-and-teleology \(^7\) that there is and can exist is ontological as of prospective relative-ontological-completeness \(^8\), such that any such implied meaning is only ontologically intelligible with its reification \(^8\) as of prospective relative-ontological-completeness \(^7\)-of-\(^7\) reference-of-thought, as so implied from singularisation \(^7\)/epistemic-immanence/veridical-epistemic-determinism as the reflection of ontologically-veridical meaningfulness-and-teleology \(^9\). This points out that as of its very own <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \(^1\), a registry-worldview/dimension \(^8\)reference-of-thought is not the ontologically-veridical point of conceptualisation of intemporal value reference, which is rather as of prospective relative-ontological-completeness \(^8\)-of-\(^8\)reference-of-thought reification \(^8\) of meaningfulness-and-teleology \(^9\), as we can appreciate with regards to all prior institutionalisations but will certainly be complexified/inhibited to construe the same as of our positivism–procrypticism as from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology \(^9\) as of prospective deprocrypticism–or–preempting—disjointedness-as-of–reference-of-thought prospective relative-ontological-completeness perspective. The fact is no registry-worldview/dimension as of its
temporal/shortness-of-register-of–meaningfulness-and-teleology

However, this ‘ontologically-veridical reification’ of value reference as of prospective relative-ontological-completeness and the ‘ontologically-flawed dereification’ of value reference as
of prior relative-ontological-incompleteness is associated with a fundamental paradox/confusion with regards to sound human intellection at destructuring-threshold-(uninstitutionalised-threshold/presublimating–desublimating–decisionality)–of-ontological-performance—including-virtue-as-ontology>. As this reification/dereification of meaningfulness-and-teleology paradox/confusion has always provided the room for intellectual-and-moral charlatanism throughout human history as of lack of universal-transparency-(transparency-of-totalising-entailing,-as-to-entailing–amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness~). With such charlatanism certainly knowing better but opting for denaturing conceptions of value reference as of wooden-language-(imbued—averaging-of-thought–as-to-leveling/ressentiment/closed-construct–meaningfulness-and-teleology—as-of-nondescript/ignoreable–void’–with-regards-to-prospective-apriorising-implications)> advancement of temporal interests in stifling the possibility of prospective human intellectual-and-moral emancipation. The idea of ontological-bad-faith/inauthenticity raised herein by this author is a reflection of the reality that knowledge as organic-knowledge is existentially all-committal by the mere fact of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor, with the possibility of denaturing as of social-stake-contention-or-confliction, and particularly so in spurious and blurry domains of study not readily/easily constraint to ontological-primemovers-totalitative-framework reflection of existential-contextualising-contiguity. This brings up the implication of what is truly transcendental knowledge by its nature as of knowledge-notionalisation and organic-knowledge. Transcendental knowledge is actually institutionalising and re-institutionalising, implying it supersedes institutional practices and constructs as to the possibility for prospective institutionalisation, and so as of its dimensionality-of-sublimating—
supererogatory~de-mentativity/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation inducing institutional secondnaturing. It is rather not out of the question that knowledge so-construed as of prospective transcendence-and-sublimity/sublimation/supererogatory~de-mentativity implications put-into-question as ‘charlatanic’ institutions and their practices construed as of prior relative-ontological-incompleteness-of-reference-of-thought specifically as extra-intelectual and pedantic orientations that undermine the advancement of their supposed prospective intellectual and emancipatory vocations. Interestingly, we can garner that positivistic knowledge arose and was cultivated as of ‘its very own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme conception of knowledge’ that superseded and didn’t recognise-and-submit to medieval-scholasticism for its validation, as it construed that the latter wasn’t meant/de-mentated/structured/paradigmed to uphold and perpetuate positivism implied transcendental knowledge as of prospective relative-ontological-completeness-of-reference-of-thought; and in due course, by its ontological-primemovers-totalitative-framework constraining it crossgenerationally overrode medieval-scholasticism. It is herein contended that it isn’t out of the question that a creeping and slumbering institutional-being-and-craft intellectual tedium today increasingly fails to elicit the full re-originary–as-unenframed/unbeholdening/outlier-conceptualisation-(imbued-postconverging/dialectical-thinking–projective-insights/epistemic-projection-in-conflatedness-of-notional~deprocrypticism-prospective-sublimation) potential for prospective intellectual emancipation, and so rather as of de-mentative/structural/paradigmatic institutionally-induced and societally-induced anti-intelectualism implications. The question can further be asked whether transcendental implied knowledge can actually be construed as the subject of
‘understanding’ of prior relative-ontological-incompleteness of reference-of-thought with the latter’s totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag, given the psychoanalytic-unshackling/prospective-grounding/prospective-reification implications of transcendental knowledge. Is transcendental knowledge as of that token rather more a metaphoricity constraint as of ontological-prime movers-totalitative-framework for the possibility of prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as more than just about abstract intellection but extending intellectualism to supersede the existential-investment implications that underlie exocogitative-blanking to such prospectively implied ‘understanding’ as of transcendental knowledge. From the prior relative-ontological-incompleteness of reference-of-thought naïve non-transcendental totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag, it may be thought/reasoned that a transcendentally projecting intemporal mental-disposition is rather uncanny about the ‘existential-extrication-as-of-existential-unthought malignity reality of existence’ construed as pragmatic living, but this rather confirms the ‘dereifying irresponsibility’ of such temporal thought/reasoning mental-dispositions ‘caught up mainly in their 60-to-100 years of existence reality of meaningfulness-and-teleology’. The intemporal ‘reifying choice-and-adherence’ to the ‘reified assumed-responsibility’ of aetiologisation/ontological-escalation is ever always a reasoning-through/messianic-reasoning that by definition is not in a ‘reasoning with’ relation with reasoning-from-results/afterthought deficient prior institutionalising; and certainly explaining why uninstitutionalised-threshold transcending has ever always been conflicted as to the necessary reality of imposing the ‘superior party’ that is as of the full-potency existence/existential-reality/intrinsic-reality/ontological-veridicality over the denaturing mortals that we are for our prospective emancipation. Without an insight about reification and dereification, the notion of
singularisation⁷/epistemic-immanence/veridical-epistemic-determinism as it reflects ontological-completeness-of-reference-of-thought for ontologically-veridical meaningfulness-and-teleology⁹ is easily misconstrued since denaturing⁶ of meaning in dereification⁶ will be teleologically-elevated and meaning produced as of reification⁵ will be teleologically-degraded; as so blatantly obvious particularly with the dereification⁵ manifestation of childhood psychopathy postlogism⁷-slantedness but then takes on a wholly covert nature as of adulthood psychopathy and social psychopathy dynamics. In this regard, divergent as of temporal-to-intemporal dynamics of human ontological-performance⁷-<including-virtue-as-ontology> of aposteriorising/logicising/deriving/intelligising/measuring meaningfulness-and-teleology⁹ reflecting dereified and reified construals of existential-contextualising-contiguity⁸ is to be expected, and assessable on the basis of a commonly expected apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument, which then speaks of a dialogical-equivalence of both temporal mental-dispositions and the intemporal mental-disposition with no dereification⁶ and reification⁶ contrast. However, compounding this situation making relevant the need to contrast reification⁶ and dereification⁶ and imply moral-and-intellectual inequivalence together with dialogical inequivalence, and so between temporal mental-dispositions and intemporal mental-disposition, is specifically the flawed ontological-performance⁷-<including-virtue-as-ontology> manifestation of psychopathy and social psychopathy which is ‘de-mentatively/structurally/paradigmatically associated with the denaturing of the <amplituding/formative–epistemicity>totalising–devolved apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’, and arises so fundamentally with regards to the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument which is the <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag backdrop for existential-instantiations
aposteriorising/logicising/deriving/intelligising/measuring ‘meaningfulness-and-teleology’; with the fundamental implication that there are thus divergent apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments as of psychopathic induced postlogism^7-slantedness, and its social cognisance and integration as conjugated-postlogism so-conjugating as of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation as of social psychopathy. In this latter case of contrasted reification^6 and dereification^6 and implying moral-and-intellectual inequivalence together with dialogical inequivalence, and so between temporal-as-psychopathic-and-social-psychopathic mental-dispositions and the intemporal mental-disposition, and so-implied as of ‘disseminative-notional-discontiguity/epistemic-discontiguity’—contrastive-reification-dissemination-and-dereification-dissemination—implications’ construed as the ‘variance/discrepancy of ‘meaningfulness-and-teleology” as-of-prospective-relative-ontological-completeness—postconverging-or-dialectical-thinking—apriorising-psychologism and as-of-prior-relative-ontological-incompleteness—preconverging—or-dementing—apriorising-psychologism respectively; it is only ontologically-veridical difference-confoundedness—as-to-totalitative-reification—in-singularisation—as-veridical-epistemic-determinism from the projected ‘notional—singularisation /epistemic-immanence/veridical-epistemic-determinism’ of the intemporal mental-disposition as-of-prospective-relative-ontological-completeness—postconverging-or-dialectical-thinking—apriorising-psychologism recognising this ‘preconverging-or-dementing—apriorising-psychologism and postconverging-or-dialectical-thinking—apriorising-psychologism variance/discrepancy of ‘meaningfulness-and-teleology’ that induces an ontologically-veridical disambiguation of dereified and reified construals of existential-contextualising-contiguity^8 as implied by the

apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments in prior relative-ontological-incompleteness apriorising-teleological-degradation-in-notional-discontiguity/epistemic-discontiguity <shallow-supererogation -of-mentally-aestheticised--preconverging/dementing --qualia-schema> (psychopathic and social psychopathic), and so before aposteriorising/logicising/deriving/intelligising/measuring 'meaningfulness-and-teleology' can even be then articulated as ontologically-veridical exclusively as of the intemporal/valid/postconverging-or-dialectical-thinking apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument perspective or attitude/mental-disposition/care–and–episteme. Such a difference-conflatedness-as-of-‘epistemic-totality’ is equally what reflects in the bigger scheme of things, at the 'reference-of-thought-level, the reality of humankind as of the successive registry-worldviews/dimensions humans psychological dispositions as per their corresponding apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments. In this regard, the ontological-contiguity—of-the-human-institutionalisation-process can be construed as human limited-mentation-capacity apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reification as ‘apriorising-teleological resetting of <amplituding/formative–epistemicity>totalising/circumscribing/delineating ‘meaningfulness-and-teleology’ as of futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-

Note that on the imaginary supposition that no such prospectively projected ‘notional—singularisation\(^7\)/epistemic-immanence/veridical-epistemic-determinism’ existed as providing the ontological-veridicality insight-of-completeness for reifying meaningfulness-and-teleology\(^9\), mental-dispositions in prior relative-ontological-incompleteness\(^8\) will falsely go on reasoning with ‘traditional classical mechanics axiomatic-construct’ by identitive-constitutedness\(^1\)-as-‘epistemic-totality’\(^3\)-dereification\(^8\)-in-dissingularisation\(^7\)-as-flawed-epistemic-determinism\(^9\) as providing ontological-veridicality as of this now dereifying construal of existential-contextualising-contiguity\(^3\) of ‘the very same physics <amplituding/formative–epistemicity>totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. But then again, the reality of theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as of prospective relative-ontological-completeness\(^7\) will point out that such ‘traditional classical mechanics axiomatic-construct’ identitive-constitutedness\(^1\)-as-‘epistemic-totality’\(^3\)-dereification\(^8\)-in-dissingularisation\(^7\)-as-flawed-epistemic-determinism\(^9\) is in reality preconverging-or-dementing\(^1\)—apriorising-psychologism as of its relative-ontological-incompleteness\(^8\). This insight equally applies at the \(^{83}\)reference-of-thought-level, for instance, with regards to the fact that our positivism–procrypticism registry-worldview/dimension doesn’t recognise-nor-register any such notion as \(^{83}\)procrypticism—or–disjointedness-as-of-\(^{83}\)reference-of-thought that speaks of our prospective preconverging-or-dementing\(^1\)—apriorising-psychologism at our prospective

Interestingly, it should be noted here that with such phenomenon as psychopathy and social psychopathy that is ‘dementatively/structurally/paradigmatically associated with the denaturing\cite{5} of the <amplituding/formative–epistemicity>totalising~devolved apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’ as of our positivism/rational-empiricism manifestation of \textsuperscript{3} procrypticism–or–disjointedness-as-of-\textsuperscript{4} reference-of-thought uninstitutionalised-threshold\cite{102} (just as notions-and-accusations-of-sorcery in a \textsuperscript{10} universalisation–non-positivism/medievalism social-setup is ‘dementatively/structurally/paradigmatically associated with the denaturing\cite{5} of the <amplituding/formative–epistemicity>totalising~devolved apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’ as of their \textsuperscript{17} universalisation–non-positivism/medievalism uninstitutionalised-threshold\cite{1}), ontological-veridicality is rather assumed/departs from an understanding of existential-contextualising-contiguity\cite{18} knowledge-reification as implied with futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\cite{99} as of prospective \textsuperscript{19} deprocrypticism–or–preempting—disjointedness-as-of-\textsuperscript{20} reference-of-thought registry-worldview/dimension and not our positivism–procrypticism, in articulating ontologically-veridical difference-conflatedness\cite{18}–as-to-totalitative-reification\cite{19}–in-singularisation–as-veridical-epistemic-determinism\cite{21} from this projected ‘notional—singularisation\cite{19}/epistemic-immanence/veridical-epistemic-determinism’ as of \textsuperscript{22} deprocrypticism–or–preempting—disjointedness-as-of-\textsuperscript{23} reference-of-thought

But then just as the reflex mental state and attitude/mental-disposition/care–and–episteme in a universalisation–non-positivism/medievalism social-setup will be resistant to an elucidation of notions-and-accusations-of-sorcery adopting the perspective or attitude/mental-disposition/care–and–episteme of the reifying prospective positivism to arrive at ontological-veridicality, likewise more fundamental in undermining the elucidation of the manifestation of psychopathy and social psychopathy is the fact of an ordinariness—wooden-language—(imbued—averaging-of-thought—leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable–void’—with-regards-to-prospective-apriorising-implications)—reflex mental state and attitude/mental-disposition/care–and–episteme in our positivism–procrypticism that will be resistant to adopting the reifying perspective or attitude/mental-disposition/care–and–episteme of futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of prospective deprocrypticism—or—preempting—disjointedness-as-of—reference-of-thought to arrive at ontological-veridicality that rather implies the dialectical—dementation of our positivism–procrypticism at its uninstitutionalised-threshold; and as we falsely go on to construe existential-contextualising-contiguity—in-reification/dereification by adopting the positivism–procrypticism dereifying perspective or attitude/mental-disposition/care–and–episteme in its prior relative-ontological-incompleteness in an exercise of ontologically-flawed identitive-constitutedness—as—epistemic-totality—dereification—indissingularisation—as-flawed-epistemic-determinism. Further and insightfully again, with the manifestation of childhood psychopathy where the postlogism—slantedness is universally
transparent there is no occurrence of interlocutors cognisant-and-integrative apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reflection of existential-contextualising-contiguity –in-reification/dereification as of the childhood slantedness, but with respect to adult psychopathy with the attendant maturation/indirectness/spatialisation/credulity/craftiness, such interlocutors cognisant-and-integrative apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reflection of existential-contextualising-contiguity –in-reification/dereification arise as of their temporal threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation—preconverging/dementing –apriorising-psychologism, which implies an invested social commitment as of thought and association that is then inclined to overlook inherent ontological-veridicality, as of interlocutors postlogism-slantedness/ ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfite-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of reference-of-thought- devolving ontological-performance-<including-virtue-as-ontology> leading to the dynamics of social psychopathy, and this logic also explains how and why notions-and-accusations-of-sorcery are endemised/enculturated in a non-positivism social-setup; with the insight as articulated by this author that more critically manifestations of postlogism-slantedness across all the registry-worldviews/dimensions are rather revelatory of the fundamental prior relative-ontological-incompleteness-of-reference-of-thought, with transcendental implications that goes well beyond the ad-hoc conception of manifestations of postlogism-slantedness but more broadly conceive as of the destructuring/aetiologisation/ontological-escalation implications arising from underlying relative-ontological-incompleteness and relative-ontological-completeness reference-of-thought with regards to human living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-

the above analysis, as postmodern-thought portends to be non-ideology-driven, non-speculative, non-imaginary, theoretical, conceptual and operant. This insight is also very much conscious of the ontologically-flawed misconstrual of ‘the other’ that pervades human wooden-language—(imbued—averaging-of-thought—\textit{as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—

However, approbating we may be predisposed to such palliative virtue constructs as of lack of dispensing-with-immediacy-for-relative-ontological-completeness—by-reification//contemplative-distension, the fact is these are not really the underlying drivers for virtue transcendence-and-sublimity/sublimation/supererogatory—de-mentativity and are peripheral to more ontologically profound theorised-or-untheorised emancipatory events driving virtue transcendence-and-sublimity/sublimation/supererogatory—de-mentativity as of prospective relative-ontological-completeness—of—reference-of-thought, notwithstanding our state of beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of—existential-unthought. The fact is from an ontological standpoint, we inherently are no more virtuously exceptional even with regards to the earliest of humans, and so as of the very same species potency, and thus we can’t ascribed inherent virtuous superiority by the mere token of our own practice. Rather the exceptionality behind human virtuous potential lies ontologically with ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination—of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality instigated ontological-contiguity”—of-the-human-institutionalisation-process as of difference-confiliatedness—as-to-totalitative-reification—in-singularisation—as-veridical—epistemic-determinism—”<amplituding/formative—epistemicity>causality—as-to-projective—totalitative—implications,—for-explicating-ontological-contiguity” as of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology”, reflecting the fact that pure-ontology that as of its secondnaturing induces the requisite level of human virtue performance at each given

Ultimately, anti-constructivism and anti-relativism criticisms of postmodern-thought come down to our ‘modern positivism/rational-empiricism ontologically-flawed as of prior relative-ontological-incompleteness perspective/framing/reference/horizon’ constitutedness construed of categorising/taxonomising schemes that pervades the ‘modern categorising mental-disposition’ as of our occlusive-consciousness neuterising, as we fail to grasp the implication of an implied apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument that is naively superseding the true apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument nature of existential reality as the absolute a priori; such that the meaningfulness-and-teleology that arises is a relatively virtual-or-ontologically-flawed-construal. On the contrary it is conflatedness that ensures that our apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument syncs with the true apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument nature of existential reality as the absolute a priori, and so as of an ontological-
normalcy/postconvergence posture which rather ‘turns the idea of analysing and conceptualising on its head’ into one of ‘grasping human limited-mentation-capacity-deepening’ implications as of the underlying psychoanalytic-unshackling’ for human-subpotency construed of the full-potency that is existence. This insight about the complete relationship between developing human-subpotency and its potential to fully grasp the full-potency of existence, fundamentally underlies the protensive-consciousness referentialism of the notional-conflatedness of notional-deprocrypticism. However, it is equally critical to grasp the double-gesture reification implied in such a postmodern-as-suprastructural conception of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. Such a postmodern/suprastructuralism double-gesture reification holds that knowledge involving virtue-as-ontology is truly organic-knowledge as of its appropriate attitude/mental-disposition/care–and–episteme with respect to human social-stake-contention-or-confliction; with the adherence to the reference-of-thought–categorical-imperatives/axioms/registry-teleology , for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of such organic-knowledge construed in intemporality as supplanting–conviction-as-to-profound-supererogation—postconverging/dialectical-thinking–apriorising-psychologism, whereas mechanical-knowledge is rather predispose to adhere as of temporal threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation — preconverging/dementing –apriorising-psychologism to such mere reference-of-thought–categorical-imperatives/axioms/registry-teleology , for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology. The latter points to an inappropriate attitude/mental-disposition/care–and–episteme which is not beholden to the prospective institutionalisation but rather is of existential-extrication-as-of-existential-unthought relation with it. More concretely, consider the practice of serfdom in
Europe, or the annihilation of many Native American tribes and slavery and slave trade in the new world, while at the same time in a registry-worldview/dimension transitioning from the non-positivism/medievalism to the positivism/rational-empiricism registry-worldview with this contrastive mechanical-knowledge attitude/mental-disposition/care–and–episteme and organic-knowledge attitude/mental-disposition/care–and–episteme. While the full implications of a positivism/rational-empiricism organic-knowledge attitude/mental-disposition/care–and–episteme will imply an end to such practices as of universal human rights, ‘economic-opportunistic-and-then-enculturated tenants’ of such blatant moral supremacy and thus racial supremacy distorted the implications of the technical and social organisation advancement brought about from budding-positivism/rational-empiricism to reconceptualise by their specific interests meaningfulness-and-teleology in terms–as-of-axiomatic-construct of the prior non-positivism/medievalism attitude/mental-disposition/care–and–episteme as of its prior relative-ontological-incompleteness-of-reference-of-thought, and thus justify their nefarious practices; speaking of mechanical-knowledge in positivism/rational-empiricism. Whereas progressive organic-knowledge tenants construed positivism/rational-empiricism as an openness to the potential of all societies and peoples to rather arrive at the higher possibility of positivism/rational-empiricism virtue, and so as of a human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation posture that allows for universal human emancipation as expressed by the Quakers movement, Rousseaux, Diderots, etc. Incidentally, the positivism/rational-empiricism mechanical-knowledge contenders as of the economic-opportunism-and-then-enculturation of their nefarious practices, were very much countervailing the practice and trend within their own societies of origin undergoing-positivism/rational-empiricism-transformation and the underlying dual-language/split-mentality unscrupulousness was given away as of the ‘out-of-sight demeanour’ in their main societies, rather than being fully assumed as marking positivism/rational-empiricism progress. The
occasional development of enlightenment and positivism/rational-empiricism by its technical
and social organisation transformation implications wasn’t the opportunity for such societies to
turn around and then dehumanise other societies and humanities that haven’t done likewise, but
rather as of organic-knowledge called for a double-gesture reification in recognising that such
positivism/rational-empiricism implications are about all of humanity, just as implied in
preceding human cultural emancipations. Suprastructuralism or postmodernism double-
gesturing of virtue doesn’t function on the naïve basis of ‘merely construing relative implied
levels of virtue development and making relative conclusions’ but rather orientate
meaningfulness-and-teleology to the more profound perspective of all of humanity’s
potential as of prospective relative-ontological-completeness of reference-of-thought/ontological-normalcy/postconvergence and then reconstrue the possibility of all of humanity-as-of-societies to ultimately fulfil it virtuous potential; and this is the optimum and
emancipatory virtue disposition for all humankind and human societies. It adopts this
orientation because it always put into question the idea of ‘grounding meaningfulness-and-
teleology as of any specific human society relative-ontological-incompleteness of reference-of-thought as fundamentally denaturing, and likely to induce transversality-of-
affirmative-and-unaffirmative–disambiguated–motif-and-
apriorising/axiomatising/referencing dehumanising of some cultures and societies by others’;
as it recognises, however tepid, that all societies and humans are curious, predisposed to their
emancipation and achieving optimum existential possibilities, and can uphold universal values, and so as of universal-transparency ~(transparency-of-totalising-entailing,as-to-
entailing<amplituding/formative–epistemicity>totalising~in-relative-ontological-
completeness~). Ultimately, such a double-gesturing hold out the possibility in reflecting
holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-
institutionalisation-process as of Being-development/ontological-framework-expansion—as-to-
depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as pertinent for all humankind, whether as of internal social-progress, cultural diffusion or cultural-reappropriations. This practically translates, say considering an instance of a given traditional practice that is abhorrent to modern positivism/rational-empricism attitude/mental-disposition/care—and—episteme, by implying from a postmodern perspective that emancipation truly arises when the humans come to assume as well by themselves a universal positivism/rational-empiricism attitude/mental-disposition/care—and—episteme in transforming their society. We can appreciate that supposed a space civilisation come to earth, implying for instance in a position of strength that we are too violent, disorganise, etc. and thus morally inferior, and that our best interests was just to take our cue from them. Here as well, the postmodern double-gesture reification of virtue will project that we do have the potential for further development, and that to be ourselves we cannot be utterly alienated from ourselves like robots in our relationship with them, and that our curiosity and openness will correspondingly bring about our functional moral equivalence with universal-transparency—⟨transparency-of-totalising-entailing,—as-to-entailing—⟨amplituding/formative—epistemicity⟩totalising—in-relative-ontological-completeness⟩. Further arguing that if they are truly more advanced than us, then that advancement is necessarily about a greater aetiologisation/ontological-escalation as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation that will necessarily subscribe to recognising ‘the other’ that we are to them; as insightfully, grander aetiologisation/ontological-escalation come with relative-ontologically-veridical attitude/mental-disposition/care—and—episteme. Claims of such grander aetiologisation/ontological-escalation as implying dehumanising interpretations are ontologically-flawed as such claims are rather surreptitiously based on prior registry-worldview/dimension uninstitutionalised-threshold—reference-of-thought—categorical-imperatives/axioms/registry-teleology—.
aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology\textsuperscript{99} as teleological-degradations-in-notional-discontiguity/epistemic-discontiguity—\langle shallow-supererogation\rangle—of-mentally-aestheticised—preconverging/dementing—qualia-schema\rangle. In other words, the organic-knowledge in its true appreciation of ‘the other’ as of aetiologisation or ontological escalation implies a ‘\textsuperscript{101}universal projection implications attitude/mental-disposition/care—and—episteme’ event—or-operant to all and sundry’. Finally, the naivety when facing such anti-constructivism and anti-relativism arguments is to think that these are always about fair and objective intellectual disagreements; but then the history of many such criticisms has revealed its underlying perfidy; as to when for instance, supposed critiques of postmodern relativism make mention of the anti-relativism stances of many a creed like Christianity (which are necessarily absolutist as to their doctrinal practices) thus decontextualising and equating the framework of secular intellectual discourse with that of a creed, something which even such creeds do not do given the mortal framework of human \langle amplituding/formative—epistemicity\rangle totalising—thrownness-in-existence\textsuperscript{\textsuperscript{11}} (as to when even the Christian Jesus refers to giving to Caesar what belongs to Caesar and to the Christian God what belongs to God as of a necessary relativistic stance with respect to human mortality which requires constructiveness and this stance is further reflected with interfaith dialogue which will be absolutely impossible if creeds were to engage each other on the absolute basis of their doctrinal practices), and furthermore much of the criticisms levied against postmodern relativism is ‘forged criticism’ in the sense that the critiques make their own flimsy interpretations of postmodern-thought and then go on to criticise the flawed interpretation for instance the idea that pastiche art or the fact that Las Vegas Strip as-copying-other-notable-places-architectures are necessarily inauthentic and flawed is not necessarily a postmodern criticism as ontological-good-faith/authenticity and veracity is more fundamentally about the re-originary—as-unenframed/unbeholdening/outlier-conceptualisation—\langle imbued-postconverging/dialectical-
thinking—‘projective-insights’/‘epistemic-projection-in-conflatedness’—of-notional—deprocrypticism—prospective—sublimation) creative insight and appreciation of any pastiche work or of such a Las Vegas Strip replication of other notable places. With regards to all these ‘forged criticisms’ the underlying falsehood is rather geared to elicit a non-intellectual emotional response than true knowledge-reification insight. Further, as of organic-knowledge and knowledge-notionalisation, this author holds that it is naïve to conceptualise of human knowledge mainly as of pure erudition warranting mainly sound arguments, proofs and convincing demonstrations, and that the reality all along ‘intemporal ontological-faith-notion—or-ontological-fideism—imbued-underdetermination—of-motif—and-apriorising—axiomatising—referencing—as-so-being—as-of-existentia—reality instigated ontological-contiguity—of-the-human—institutionalisation-process as of difference-conflatedness—as-to-totalitative-reification—as-in-singularisation—as-veridical—epistemic-determinism<amplituding/formative—epistemicity>causality—as-to-projective—totalitative—implications—for-explicating—ontological—contiguity’ shows that there has always been beyond-the-consciousness-awareness—teleology—in-existential-extrication—as-of-existential—unthought> ‘institutional investment’ that is not always just of erudite ideal, inclined to undermined prospective knowledge as of its prospective relative-ontological-completeness—of-axiomatic-constructs-and-reference-of-thought, and that true knowledge especially as it portends to transcendence—and—sublimity/sublimation/supererogatory—de-mentativity cannot be conceptualised losing sight of this fact. The blunt fact is that postmodern-thought has shown itself to be more useful and applicable across the humanities with a massive potential for furthering human emancipation, however the tentativeness of many of its bold ideas, and so much more than the vagaries peddled by many such critiques surreptitious anti-intellectual media-driven waylaying who on the contrary seem to construe of institutional anchoring as the very essence of validation. Such situations are often highly liable to ontological-bad-

Interestingly, as of the underlying phenomenology-driven ontology, it is rather more pertinent with respect to transcendence-and-sublimity/sublimation/supernatural–de-mentativity to grasp that such ultimate decidability is construed as of human intemporal/longness-of-register-of–meaningfulness-and-teleology⁸ individuation mental-disposition in ‘a tendential-deliberation-of-decidability as enabled by ontological-primemovers-totalitative-framework’ tendential validation as to existence-potency–sublimating–nascence,–disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative–

sublimity/sublimation/supererogatory~de-mentativity will cover the seminal contributions prior and after the defining-threshold epistemic-break/epistemic-resetting of the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs by Einstein and Bohr. Such an ontological-basis for construing sublimation overrides our neuterising laden modern convention ways of judging breakthroughs overemphasising singular initiative, as it is rather grounded more soundly on an abstract notion of ‘intemporal-as-ontological individuation’ as the basis of human limited-mentation-capacity-deepening^2 analysis; and insightfully, as reflected in the underlying conflatedness^12 of accreting-substitutive-subsumption-as-futural-différance-freeplay, sublimation is achieved rather out of the notional obviating of human temporal-as-non-ontological neuterising with deneuterising^1—referentialism and with correspondent intemporal-as-ontological rearticulation/reconstrual of meaningfulness-and-teleology^9 as of dynamics of insight of shallow-to-deeper human limited-mentation-capacity implications, and so as of protensive-consciousness of notional~deprocrypticism perspective/framing/reference/horizon. Similarly, this author’s articulation of futural-différance as of transcendence-and-sublimity/sublimation/supererogatory~de-mentativity is necessarily construed ontologically as of a rearticulated protractedness as futural différance that coincides-and-is-contiguous with a prior Derridean différance as of quasi-transcendence and evasiveness of sublimation. In both cases, this highlights that ‘decidability is not instantaneous as of inherent spontaneous identification and occurrence of decisional act’ but that decidability in enabling transcendence-and-sublimity/sublimation/supererogatory~de-mentativity is as of an ‘overall différance tendential-deliberation-of-decidability’ as of human limited-mentation-capacity-deepening^52 process. Thus sublimation is equally reflected in the deliberateness involved in cultivating artistic, educational, technical or research capabilities/skill in the final outcomes derived forthwith, as of the quality imbued on human limited-mentation-capacity to deepen itself; and this translates into human contemplation of the existential-possibilities
attainable by its human-subpotency. Tendential-deliberation-of-decidability is thus the central ontological insight attached to différance as ‘a contiguously theoretical and operant phenomenological construct involving necessarily the deliberateness as of Derridean freplay différance, as a putting into question exercise, and subject to ontological-primemovers-totalitative-framework validation before attaining defining-transcendence and defining-sublimity’; and différance as of such ‘existential-reality concreteness dynamics’ is scientific and utterly dissimilar from a speculative idealisation exercise à la Hegelian dialectics and well beyond the latter’s conceptual patterning. Ultimately, such tendential-deliberation-of-decidability for attaining defining-transcendence and defining-sublimity, arises from more than just a blatant/flatminded notion of human limited-mentation-capacity-deepening or say the vague social convention idea of talent, it is more critically beyond and about a question of human mental-disposition with respect to the prescience of existence-potency-sublimating-nascence, disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>totalising-renewing-realisation/re-perception/re-thought,-in-
supererogatory–epistemic-conflatedness so-implied as of ontology’s-directedness-as-Being. This is the very meaning of organic-knowledge beyond the conception of mechanical-knowledge as-knowledge-as-a-mere-thing-to-be-acted-upon-for-given-outcomes. Organic-knowledge as such implies priorly a supplanting-conviction-as-to-profound-supererogation—postconverging/dialectical-thinking—apriorising-psychologism deference to the prescience of existence-potency-sublimating-nascence, disclosed-from-prospective-epistemic-digression-as-of-<amplituding/formative-epistemicity>totalising-renewing-realisation/re-perception/re-thought,-in-
supererogatory–epistemic-conflatedness over any human-as-mortal framing of meaningfulness-and-teleology including oneself-as-human-as-mortal, as it is human mortality-as-temporality that is rather what is in need for further Being and consciousness development. Thus the de-mentating/structuring/paradigming of sublimation for a registry-
worldview/dimension\textsuperscript{8} reference-of-thought, as reflected in the Derridean social ethics stance, is rather one for the 'subsumptive inventing' of the prospective ontological possibilities of prospective relative-ontological-completeness of reference-of-thought over human normativity/conventioning as of the latter’s prior relative-ontological-incompleteness\textsuperscript{8} of reference-of-thought, and so by maximalising-recomposuring <amplituding/formative-epistemicity>totalising-renewing-realisation/re-perception/re-thought as of organic-knowledge. A nonextricatory existential de-mentating/structuring/paradigming of sublimation implying that the state of recurrent-utter-uninstitutionalisation, base-institutionalisation-ununiversalisation, universalisation-non-positivism/medievalism, and positivism-procrypticism, are successively-wanting of prospective defining-transcendence and defining-sublimity going by their successively-given mechanical-knowledge in temporality\textsuperscript{8} as-of-neuterisation/relative-ontological-incompleteness/existential-extrication-as-of-existential-unthought. In other words, an intemporal-as-ontological mental-disposition projecting of the organic-knowledge as of prospective registry-worldview/dimension reference-of-thought in prospective relative-ontological-completeness\textsuperscript{8} of axiomatic-construct-or reference-of-thought can’t sidestep such implied prospective defining-transcendence and defining-sublimity, and undertake existence as of the prior registry-worldview/dimension reference-of-thought in prior relative-ontological-incompleteness\textsuperscript{8}, even if it such a mental-disposition could lead to such an outcome as in H.G. Well’s country of the blind or Galileo say with the medieval Establishment; despite the fact that the possibilities of such outcomes arise out of establishment Charlatanism, which knows better, but exploits lack of ‘social\textsuperscript{10} universal-transparency\textsuperscript{9} (transparency-of-totalising-entailing, as-to-entailing <amplituding/formative-epistemicity>totalising-in-relative-ontological-completeness\textsuperscript{8} )’. But then it is actually a sign of ‘propounded theoretical health and pertinence’ when all such Establishment charlatanism comes to dodge such substantive-and-frontal articulation of prospective knowledge, and in lieu come up with worn out refrains and
sidestepping manoeuvres avowing their true ‘intellectual blankness’ grounded on institutional-being-and-craft; as we know that in all genuinely inclined intellectual pursuits the very central tenet has always been about theoretical disputative engagement and not acts of escapism and downgrading of intellectual arguments as of ‘solo media exploits of intellectual popularity’. Thus by its prospective relative-ontological-completeness of-axiomatic-construct-or-reference-of-thought as futural différance, accreting-substitutive-subsumption-as-futural-différance-freeplay comes into terms with both ‘presencing—absolutising-identitive-constitutedness’ and ‘nonpresencing-<perspective–ontological-normalcy/postconvergence> on the basis of the prospective relative-ontological-completeness ontological-contiguity of the latter over the prior relative-ontological-incompleteness of notional-discontiguity/epistemic-discontiguity of-mental-aestheticised—preconverging/dementing—qualia-schema> of the former as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality, as-to-human’amplitudes/formative–epistemicity’ totalising—purview-of-construal’. Thus what is being correctly implied is not ‘difference-in-kind/difference-in-aposteriorising-or-logicising’ but rather difference-in-nature/difference-in-apriorising-or-axiomatising between ‘presencing—absolutising-identitive-constitutedness’ and ‘nonpresencing-<perspective–ontological-normalcy/postconvergence>. Such an insight is enabled as of the fundamental awareness that human knowledge construction fundamentally involves two different exercises; with the first factoring in that at the fundamental level of knowledge construction humankind has a limited-mentation-capacity that needs to be developed as a ‘developed consciousness perspective/framing/reference/horizon as of prospective relative-ontological-completeness notional-contiguity/epistemic-contiguity’ construed as its apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument to then be able at an operative level to articulate sound-or-authentic meaningfulness-and-teleology grounded
on such a developed consciousness perspective/framing/reference/horizon. This explains why it is impossible for a ‘recurrent-utter-uninstitutionalised mindset perspective/framing/reference/horizon as of trepidatious-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’ to grasp base-institutionalisation meaningfulness-and-teleology without first developing a ‘base-institutionalisation mindset perspective/framing/reference/horizon as of warped-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’; for a ‘base-institutionalisation–ununiversalisation mindset perspective/framing/reference/horizon’ to grasp universalisation meaningfulness-and-teleology without first developing a ‘universalisation mindset perspective/framing/reference/horizon as of preclusive-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’; for a ‘universalisation–non-positivism/medievalism mindset perspective/framing/reference/horizon’ to grasp positivistic meaningfulness-and-teleology without first developing a ‘positivistic mindset perspective/framing/reference/horizon as of occlusive-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’; and prospectively for a ‘positivism–procrypticism mindset perspective/framing/reference/horizon’ to grasp notional–deprocrypticism meaningfulness-and-meaningfulness without first developing a ‘notional–deprocrypticism mindset perspective/framing/reference/horizon as of protensive-consciousness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’. As we can get that the fundamental stake for the Copernicuses, Galileos, Descartes, etc. during the Enlightenment wasn’t just about the specific positivistic knowledge they articulated or else they would have been satisfied with just their personal curiosity and enlightenment and leave it at that, but rather they surreptitiously undermined many of the prevailing social norms and rules in
trying to expound their knowledge and vision, and more critically so because they knew it is the
‘formation of a positivistic social consciousness apriorising/axiomatising/referencing/intelligibility setup/measuring instrument’ that would enable the anchoring of all such prospective positivistic knowledge, and this sense of things fully underscored such a more comprehensively directed project-and-purpose undertaken later by the Encyclopédistes; with the underlying insight that while a social state of generalised prior relative-ontological-incompleteness of reference-of-thought is enabling to surreptitious Establishment charlatanism, however with increasing ‘social universal-transparency (transparency-of-totalising-entailing,-as-to-entailing-amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness)’ such charlatanism is exposed for what it really is, explaining the panickiness and falsehood associated with such charlatanism as with the reactionaries to the Encyclopédistes project, as if the articulation of knowledge by itself was a threat rather than subject to disputation! Underlying as the non-speculative, non-imaginary, theoretical and conceptual possibility for such futural différance consciousness development is the notion of de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) which by pointing out an epistemic-break as of difference-in-nature/difference-in-apriorising-or-axiomatising /ontological-discontinuity, underscore at once ‘both as affirmation/projection/assertion/dueness-validating-logicising/suitable-measuring instrument-validating-measuring-<as-to-postconverging-or-dialectical-thinking>–apriorising-psychologism> of the consciousness in ontological-contiguity /relative-ontological-completeness of reference-of-thought and as unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuring instrument-invalidating-measuring-<as-to-preconverging-or-dementing–apriorising-psychologism> of the consciousness of notional-discontiguity/epistemic-discontiguity –<shallow-supererogation>

human<amplituding/formative—epistemicity>totalising—purview-of-construal”. As futural différance is enabled, unlike the case with the ‘Derridean quasi-transcendental-freeplay différance’, as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality involving human mental-disposition successive apriorising/axiomatising/referencing reprojection-or-reanticipation capacity inducing human limited-mentation-capacity-deepening”; overriding the idea that the perspective/framing/reference/horizon of contemplation is absolutely given-and-determined as of the implication that all meaningfulness-and-teleology¹⁹ should be as of ‘difference-in-kind/difference-in-aposteriorising-or-logicising², but rather reconceptualising the possibility of difference-in-nature/difference-in-apriorising-or-axiomatising²¹ as of prospective relative-ontological-completeness —of— reference-of-thought bringing about transcendence-and-sublimity/sublimation/supererogatory—de-mentativity as of nonpresencing—<perspective—ontological-normalcy/postconvergence>. Thus such a phenomenology associated with accreting-substitutive-subsumption-as-futural-différance-freeplay further divulges, unlike the ‘Derridean quasi-transcendental-freeplay différance’, the full possibility of human sublimation.

Consider in this regard the decisive transitions-as-sublimitys that occurred in physics: with ‘traditional classical mechanics axiomatic-construct’ and the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs; wherein the successive axiomatic-constructs in prior relative-ontological-incompleteness²⁵ and prospective relative-ontological-completeness²⁶,
with regards to ‘traditional classical mechanics axiomatic-construct’ and the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as of ‘the very same physics <amplituding/formative–epistemicity>totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ are not as of a ‘difference-in-kind/difference-in-aposteriorising-or-logicising but rather a difference-in-nature/difference-in-apriorising-or-axiomatising; with human-subpotency aligning towards the full potency of existence which thus divulges the possibility of human sublimation as of the physics science implications today. It is interesting to note that the difference-in-nature/difference-in-apriorising-or-axiomatising bringing about the successive physics axiomatic-constructs/theories are successive ‘epistemic-breaks’ from prior reasoning and are akin to ‘leaps of faith’ which then ‘establish new reasoning’ that then becomes the internal ‘difference-in-kind/difference-in-aposteriorising-or-logicising of the new physics as the new presencing; brought about from the transcendence-and-sublimity/sublimation/supererogatory–de-mentativity of nonpresencing-<perspective–ontological-normalcy/postconvergence>. In other words, human consciousness tends to be constraint to its <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, and thus assumes a ‘difference-in-kind/difference-in-aposteriorising-or-logicising mental-disposition as of presencing—absolutising-identitive-constitutedness. But existence/ontology’s-directedness-as-Being as of nonpresencing-<perspective–ontological-normalcy/postconvergence> is beyond and not constraint by human consciousness as of its <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, and thus hints-at the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality possibilities of transcendence-and-sublimity/sublimation/supererogatory–de-
mentativity as of ontological-primemovers-totalitative-framework validation that is at the very center of the ‘promise of correspondence between human-subpotency as of Being-and-consciousness development and existence as of ontological-veridicality’, and so despite the complexifying/inhibiting metaphysics-of-presence-{implicit-‘nondescript/ignorable–void’-as-to-presencing—absolutising-identitive-constitutedness} of any given <amplituding/formative–epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag from a ‘difference-in-kind/difference-in-aposteriorising-or-logicising’ posture; such that humankind then overlooks presencing—absolutising-identitive-constitutedness and re-projects/re-anticipates nonpresencing-<perspective–ontological-normalcy/postconvergence> enabling human transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. Therefore, metaphoricity as highlighted herein is actually construed as of ‘its natural ontology implications’, and this natural ontological notion of metaphoricity is construed herein as superseding-and-englobing all other differentiated adjunctive significations including conventional figures-of-speech. metaphoricity as such simply refers to signification adjunctiveness to ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as of both the ‘meaningfulness-and-teleology’ implications to the so-renewed ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and the specific adjunctive-metaphoricity–signification within such renewed ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’. metaphoricity is very much a mirroring of existential ‘syncretising-effecting’ going by the latter’s existential implications on ‘human underlying self-referencing meaningfulness-and-teleology as an epistemic-totalising/circular construal’. This ‘epistemic-totalisation/circularity epistemic-breaking’ of self-referencing associated
existentially with syncretising-effecting as mirrored in metaphoricity arises because of human limited-mentation-capacity, and is a reflection of the circular deepening of human limited-mentation-capacity as of growing certitude from the opening up of nonpresencing-<perspective–ontological-normalcy/postconvergence> by human re-projection/re-anticipation ultimately validated by existence/ontology’s-directedness-as-Being ontological-primemovers-totalitative-framework. Further, metaphoricity as such speaks of the evasiveness of all human meaningfulness-and-teleology at uninstitutionalised-threshold as recurrently pointed out herein as of token threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation —preconverging/dementing—apriorising-psychologism possibilities relation to reference-of-thought—categorical-imperatives/axioms/registry-teleology,—for-aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology as of human limited-mentation-capacity implications. The implications of this reality as of metaphoricity explains why epistemes are fundamentally and necessarily constricted as of their specific registry-worldview/dimension reference-of-thought; as ultimately epistemes are as relevant as the ontological-possibilities divulgeable by presencing—absolutising-identitive-constitutedness and nonpresencing-<perspective–ontological-normalcy/postconvergence>, such that in the case of the latter there is no prior insight about the veracity of any episteme before it is divulged with Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as presencing—absolutising-identitive-constitutedness. Consider in this regard Galileo’s implying positivistic episteme metaphoricity over a medieval Establishment scholasticism-and-mysticism episteme as of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as the necessary backdrop for the knowledge he articulates and all subsequent positivistic knowledge. In many ways, this author as of organic-knowledge is very much aware of the
‘drawback implications’ of our positivism–procrypticism episteme as of its constitutedness with respect to futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism psychoanalytic-unshackling organic-knowledge, as of the full articulation of accreting-substitutive-subsumption-as-futural-différance-freeplay with respect to our procrypticism–or–disjointedness-as-of–reference-of-thought uninstitutionalisation and futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism institutionalisation implications representation, and so beyond just our natural inclination for amplituding/formative–epistemicity totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag. Galileo could well had possibly recasted his implied positivism in scholasticism-mysticism terms, just as Copernicus work was held back priorly in limbo, but then the implications as he perceived would have been a degradation and lost of the essence of what he was doing, and so more than just the specific scientific knowledge but more critically it warranted a psychoanalytic-unshackling into the nonpresencing–or–withdrawal–or–metaphysics-of-absence–(implicit–veracity–of–nonpresencing–of–perspective–ontological-normalcy/postconvergence)–or–transcendental-reasoning–of–event–as–prospective-ontology-origination perspective/framing/reference/horizon of positivism we entertain today. Likewise, as of such metaphoricity episteme, the meaningfulness-and-teleology herein implied as of its essence cannot do without this hermeneutic/reprojective circle phenomenological ontology elucidation as of its psychoanalytic-unshackling conflatedness; and the ideal backdrop for this lies in a further developed postmodern-thought phenomenological-depth of construction, as implied herein by this author as of accreting-substitutive-subsumption-as-futural-différance-freeplay. This author
conceives that at the very core to such genuine understanding of postmodern-thought is a double-gesture reification that consists of perspective/framing/reference/horizon and then contention/argumentation within such articulated perspective/framing/reference/horizon, as so implied by postmodern-thought together with other kindred though less dramatic textuality-thinkers like Gadamer and Habermas; as of the need to adopt/instigate the appropriate mindset for knowledge appraisal given the fundamental distorting effect, beyond just perception, of human limited-mentation-capacity. This double-gesture reification reality for construing human knowledge amounts to a quasi-psychoanalytic-unshackling, as it reflects the fact that The-Given as of existentialism/thrownness/facticity is always an insufficiently/poorly developed perspective/framing/reference/horizon for direct instigation of contention/argumentation aspiring for profundity and completeness. Such that this double-gesture reification of the textuality-driven intellectuals involves their ‘special focus orientations’ profundity say like genealogy with Foucault, deconstruction with Derrida, etc., and this together with transversality-of-affirmative-and-unaffirmative–disambiguated–’motif-and-apriorising/axiomatising/referencing complementarity and criticisms of all such ‘special focus orientations’, go on to conjointly-and-fruitfully define what is postmodern-thought. Postmodern-thought as such can be analogised with the anecdote of the blind men striving to determine what an elephant is, but with each one saying authentically what the find in front of them in developing the relevant specific imageries and overall imagery of what an elephant is. This in itself is a milestone in theorisation, and as an overall conception postmodern-thought, besides the ‘special focus orientations’ of the specific textuality-driven intellectuals, is primarily about ‘consistently taking a best shot’ at reality and is not inherently driven at its core by ideology but rather ontological-good-faith/authenticity. As such it effectively achieves a more potent construal of the human condition and knowledge especially as it is ‘driven by such transversality-of-affirmative-and-unaffirmative–disambiguated–’motif-and-
apriorising/axiomatising/referencing cumulative authenticities that augment the possibilities of human limited-mentation-capacity’ thus going a long way to open up new and coherent thought possibilities as of its grander and overall conception and spirit. Interestingly, what is central about the ontological-bad-faith/inauthenticity critique of postmodern-thought is the lack-of-insight/feinting-lack-of-insight about all these underlying elements of postmodern-thought construction: as failing to grasp/recognise the implied double-gesture reification as of its transcendental-enabling/sublimating/supererogatory–de-mentativity implications, and by not appreciating due to ‘flatmindedness’/banality/flimsiness the implications of perspective/framing/reference/horizon before contention/argumentation as of any given perspective/framing/reference/horizon, thus implying ‘poor critical judgment’. With such ‘flatmindedness’/banality/flimsiness further protracting into a poor grasp of postmodern theorists ‘special focus orientations’ with the tendency to engage postmodern-thought as of an uninsightful literal and shallowminded/banal/flimsy reading; and with the ultimate outcome that all such naïve uninsightful literal and shallowminded/banal/flimsy readings are cumulated and summated as the entirety of the postmodern theoretical construct, and so on an apparently implied flawed logic that the discretion allowed for criticism doesn’t engage the intellectual credibility of the critique, a notion that is especially abused within a media background. Such ‘flatmindedness’/banality/flimsiness with respect to postmodern-thought fails to grasp that all subject-matter as of their inherently deferential-formalisation-transference as of institutional percolation-channelling-<in-deferential-formalisation-transference> are necessarily construed as of a double-gesture reification that supersedes the ordinariness/banality of day to day social existence analysis as of <amplituding/formative> wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology -as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>), such that as of the history of such critiques it will be naïve not to factor in the reality of ontological-
bad-faith/inauthenticity and so particularly as it tends to shy away from genuine intellectual engagement with postmodern-thought, and highlighting that the idea of arrogance peddled about postmodernism strangely enough speaks of the ‘ignoble arrogance’ of such ontological-bad-faith/inauthenticity critiques, as de-mentatively/structurally/paradigmatically that which attributes value judgments is that which is knowledgeable-as-of-its-prospective-relative-ontological-completeness of reference-of-thought-postconverging-or-dialectical-thinking—apriorising-psychologism and not that which is ignorant-as-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-preconverging-or-dementing—apriorising-psychologism. Such that there is no dialogical-equivalence that then arises by the fact that the former is a nonextricatory/intemporal/ontological relationship with meaningfulness-and-teleology while the latter is an existential-extrication/temporal/non-ontological relationship with meaningfulness-and-teleology, in the sense that it is the former intemporal-as-ontological individuation mental-disposition that is responsible for bringing about human Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-institutionalisation-process retrospectively and prospectively while the latter as of its false ‘untransvaluated—temporal-intemporality’ is rather existentially extricatory and oblivious to Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity —of-the-human-institutionalisation-process. As ultimately, it is the prospective relative-ontological-completeness—of-reference-of-thought pursued by the former that supersedes and dissolves human vices-and-impediments as of prospective registry-worldview/dimension transcendence-and-sublimity/sublimation/supererogatory—de-mentativity reference-of-
thought. The overall insight here of such ontological-bad-faith/inauthenticity\textsuperscript{63} can be construed analogically as say in a non-positivistic social-setup where the modern disease theory is not yet socially familiar such that patients may assume that they should be cured immediately/instantly after treatment with no perspective/framing/reference/horizon of appreciation for judging medicine as optimally an over-a-time-period-bodily-reparation construed as the basis of a positivist physician practice; a notion being spread and advocated by the positivist physician in the social-setup. Now consider a competing healer very much aware of such a non-positivist social-setup ‘lack of social \textsuperscript{10} universal-transparency\textsuperscript{104} -\langle\text{transparency-of-totalising-entailing,-as-to-entailing-}\langle\text{amplituding/formative–epistemicity}\rangle\text{totalising~in-relative-ontological-completeness}\rangle’ with regards to such over-a-time-period-bodily-reparation notion and throwing a spanner in the works by pretending that the physician should confirm that patients are cured immediately as otherwise the physician must be practising witchcraft on the patients, understanding fully well the authentic disposition of the physician to affirm a practice of over-a-time-period-of-bodily-reparation for a long term dependable notion of medicine. While they are pragmatically inclined to advanced opportunistically whatever explanation to justify that their healing is immediate/instant and so involving any such stratagem like opportunistically accusing patients or some other persons for any implied failure of immediate/instant cure having the effect on the most part of shutting-off any complain or at least negative allegations about the healer’s cure, and so-enabled on the basis of the healer priorly institutionalised deferential-formalisation-transference posture in the social-setup. Such a healer encouraging the social-setup notion of immediate/instant cure as a ploy (given the possibility of the positivistic disease theory conception subverting their own non-positivistic healing practice notwithstanding ontological-veracity). The manifest acts of many such ontological-bad-faith/inauthenticity\textsuperscript{63} critiques with respect to postmodern-thought: whether when pretending to misunderstand postmodern double-gesture reification\textsuperscript{10} of meaningfulness, blatantly
caricaturing in the most inane terms postmodern-thought, avoiding genuine intellectual-level
disputation, and so rather opting for subversive \textit{amplituding/formative} wooden-language-
(imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of—
meaningfulness-and-teleology-as-of-'nondescript/ignorable–void'-with-regards-to-

of-conquest’ paradoxically while claiming not to grasp postmodern-thought, with subterfuges
of unoriginal thought usurping the notion of science and intellectualism towards such uncritical
publics; and all this as a manifestation of perverted intellectual institutional-being-and-craft.

While postmodern-thought is not and has never been immune from genuine intellectual
criticism not only from other schools-of-thought but among postmodern and poststructuralist
thinkers themselves, and this calling out of such ontological-bad-faith/inauthenticity critics is
much more than an issue about postmodern-thought but about all intellectualism generally as
such malpractices tend to mark the beginning of intellectual teleological-decadence-<-in-

subversion of progressive thinking and go on to permeate social practices and media practice,
thus rendering social and critical thought impotent. Further knowledge as understood by this
author is more than just the conception of its intemporal-as-ontological nature but knowledge is
much more completely and potently notional~knowledge as it understands as well the
implications of temporal-as-non-ontological mental-dispositions dynamics in relation to pure-
onontology, and thus in the face of ontological-bad-faith/inauthenticity shouldn’t take the bait of
overlooking and thus falsely elevating teleologically as intellectually pertinent ontological-bad-
faith/inauthenticity rather than relating to it at its teleologically-degraded level for what it
truly is, and so as part and parcel of a complete conception of knowledge. Ultimately,
intellectual statuses are as pertinent as veridically enabling to human emancipation as of intemporal/ontological/social/species/ universal/transcendental/ maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation de-mentating/structuring/paradigming, and intellectuals’ choice of ontological-bad-faith/inauthenticity is nothing less than self-inflicting irreverence and cannot thus turn around to intimate irreverence when surreptitiously undermining knowledge of universal consequential implications. This author as of metaphysics-of-absence-{implicated-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>} will summate that prior postmodern thinking is akin-and-pointing-to a proto-prospective reference-of-thought as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought over a <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag as prior reference-of-thought, and that necessarily it speaks by its double-gesture reification of quasi-psychoanalytic-unshackling thus requiring a psychoanalytic-reorientation to such an implied prospective reference-of-thought ‘as of the prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought of a better knowledge perspective/ reference-of-thought before/as-preceding contention/argumentative-engagement, and so avoiding ‘flatmindedness’/banality/flimsiness. The underlying current of postmodern-thought is that our limited-mentation-capacity induces our prior relative-ontological-incompleteness with regards to reference-of-thought and its derived meaningfulness-and-teleology, with the implication that we need to a prospective relative-ontological-completeness-of-reference-of-thought to be able to articulate intemporal-as-ontological construal as of the internal-dialectics/différance of meaningfulness-and-teleology. In other words, all concepts, notions as of ontologically-veridical meaningfulness-and-teleology, are made to have their internal-dialectics/différance as of nonpresencing-<perspective–ontological-normalcy/postconvergence> for their
sublimation and transcendence-and-sublimity/sublimation/supererogatory–de-mentativity into more profound and more complete \(^5\)meaningfulness-and-teleology\(^9\). For instance the ‘postmodern take’ about science is rather a more profound and complete notion of science than the ‘modern take’, such that a ‘modern approach’ to the conception of science naively fails to factor in unlike the ‘postmodern approach’ the implications of human limited-mentation-capacity and the need to deepen it, thus translated into the prior need for prospective relative-ontological-completeness\(^1\); wherein the ‘modern take’ might naively consider medicine as simply providing medications and remedies, the ‘postmodern take’ by an internal-dialectics/différance of the notion of medical science will factor in socioeconomic, education, information, environmental, gender and power relations issues underlying healthcare and medical delivery as a more profound and complete notion of medical science; construed effectively as of \(^1\)deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought. Thus, for postmodern-thought the capacity to attain relative ontologically-veridical \(^5\)meaningfulness-and-teleology\(^9\) comes down to the capacity of arriving at the very essence of \(^5\)meaningfulness-and-teleology\(^9\) while overcoming the drawback of our human limited-mentation-capacity. This insight about the essence of things is what underlies fundamentally Heideggerian-essencing-as-of-the-ontological-difference, Sartrean-existence-precedes-essence and Derridean-différance-as-there-is-nothing-outside-the-text, all construed by this author as of existential-contextualising-contiguity\(^1\); is the enabling approach for human ontological-reconstituting–as-to-conflatedness\(^1\) as of aetiologisation/ontological-escalation. Basically thus, the overall postmodern project implication is that we deepen our limited-mentation-capacity first (and so as of dimensionality-of-sublimating\(^1\)—<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness\(^1\)/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation of our
supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelliability/setup/measuringinstrument') to ensure that we go about deriving ontologically-veridical
meaningfulness-and-teleology in relative-ontological-completeness. This is in reality the ultimate scientific insight as such an internal-dialectics/différance is articulated as of non-speculative, non-imaginary, theoretical, conceptual and operant scientific implications; and this is reflected in the very initiation of the postmodern de-mentating/structuring/paradigmning with Heidegger’s criticism of Hegelian dialectics, with the latter construed by this author as ‘not founded-on-and-constrained-by ontological-veridicality/intrinsic-reality as of ontological-primemovers-totalitative-framework’, but rather dialectical discretion, imagination and speculation ‘as to lack of a congruent,-cogent-and-operant entailing framework of ontological-contiguity’ as herein implied by this author with ‘the ontological-contiguity—of-the-human-institutionalisation-process’ congruent,-cogent-and-operant entailing framework of ontological-contiguity’. Anecdotally, the shallowmindedness of a ‘modern take’ in failing to recognise the postmodern double-gesture reification will simply consider the blind men reporting of an elephant as a tree-trunk, a rope, a wall, a fan or a spear as ‘postmodern madness’ without factoring in the underlying double-gesture reification for perspective and insight, given the problematic of human limited-mentation-capacity that itself needs to be factored in and thus actually strengthen the human thought process in its aetiologisation/ontological-escalation. In the bigger scheme of things, such an internal-dialectics/différance is what explains the ontological-contiguity—of-the-human-institutionalisation-process as of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology and so-construed as suprastructuralism beyond just the specific interpretation of suprastructuralism as of postmodernism with respect to modernism. This internal-dialectics/différance as of successive transcendence-and-
sublimity/sublimation/supererogatory—de-mentativity is behind the respective registry-worldviews/dimensions as of their given reference-of-thought specific neuterising as well as the ultimate deneuterising—referentialism of deprocripticism. But then ontological-bad-faith/inauthenticity is equally elicited by ‘lack of social universal-transparency—(transparency-of-totalising-entailing,-as-to-entailing—amplituding/formative—epistemicy)totalising—in-relative-ontological-completeness’) as of a cynicism of institutional-being-and-craft. The transcendental implications of a registry-worldview/dimension reference-of-thought ‘devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ arises for instance in the sense that however ‘wishful’ the ontological-prime mover–totalitative-framework transcendental-possibilities/potential as of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional—referential-notions/articulations/virtue and human emancipation potential/possibilities of a prospective registry-worldview/dimension like positivism as of its reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’, cannot avail to a prior registry-worldview/dimension like non-positivism/medievalism. In this regard the Copernicuses, Galileos and Diderots of their eras, and more explicitly Descartes in his direct construal of the positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument, would have certainly sensed that their specific knowledge conceptualisations wasn’t the more critical issue but rather their insistence was an implicit understanding that the non-positivistic reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ was de-mentatively/structurally/paradigmatically a framework that wouldn’t be enabling for their positivistic and all other positivistic knowledge conceptualisations as of its prior relative-ontological-incompleteness—of—reference-of-thought (and were thus more fundamentally projective dimensionality-of-sublimating—amplituding/formative)supererogatory—de-
mentativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation). Such conflatedness imbued in postmodern-thought address more than just constitutedness implications of knowledge construction as articulated herein but equally points critically to intellectually decadent institutional dispositions and practices where imprimatur and the dynamics of imprimatur by themselves are increasingly construed as of more critical epistemic pertinence for knowledge constructions undermining the possibilities of breakthroughs given that the primacy of intellectualism as of the pertinence of intellectual arguments increasingly takes a back seat, with intellectual postures increasingly defended with non-intellectualism obsession of ideologies of schools-of-thought as of institutional-being-and-craft. This manifests itself in the form of many an intellectual increasing disposition ‘to misunderstand’ others works, as there are little common stakes for breakthroughs but rather the stakes are increasingly of institutions academic visibility and tenure with emphasis on likeminded networks and forums driven increasingly by influence than carefree universal intellectual curiosity. Furthermore intellectualism has increasingly been surreptitiously mingling-and-yielding to social and economic interests undermining its obligation for enabling social clairvoyance, with a resultant sense of socioeconomic and socio-political impotence as such a blurriness is increasingly undermining the relevance of intellectualism in its public discourse and enlightenment mission. Ultimately, the epistemic and de-mentating/structuring/paradigming of academic institutional setups are not dissociated from the effective possibility for transcendental-enabling/sublimating/supererogatory–de-mentativity, especially as such breakthroughs require the spontaneity of Dionysian arrangements. This author’s construes of deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ conceptualisation as of ontological-escalation or aetiologisation, with respect to our present

<-<in-existential-extrication-as-of-existential-unthought>\textsuperscript{6}> collapses it. Thus the
‘notion of limited-mentation-capacity’ is basically the ‘underlying veridical human
meaningfulness-and-teleology\footnote{1515} notion’ for which ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness\footnote{99} consciousneses flawed conceptualisation perspectives’ construed as ontologically-flawed constructs in terms–as-of-axiomatic-construct of ‘neuterising as of <amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought–devolving’ whether beyond-the-consciousness-awareness-teleology\footnote{99}-<in-existential-extrication-as-of-existential-unthought>, and so elucidated from the ontological-normalcy/relative-ontological-completeness\footnote{83} of, reference-of-thought perspective of notional–deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective’. In so doing, the latter reflects the limited-mentation-capacity dynamism of ‘meaningfulness-and-teleology\footnote{99} as of notional–deprocrypticism as well as temporal-to-intemporal individuations mental-dispositions, by way of deneuterising —referentialism, in lieu of neuterising. Thus this notion of human limited-mentation-capacity as the basis of différance/internal-dialectics/difference-deferral divulges ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousneses flawed conceptualisation perspectives’ and as of their ontologically-flawed constructs of ‘neuterising, with regards to articulating teleological elevation-as-of-upholding-ontological-veridicality or teleological degradation-as-of-failing-ontological-veridicality respectively either as of conflatedness\footnote{12} or destructuring respectively. Basically, the construal/conceptualisation of human <amplituding/formative–epistemicity>totalising–thrownness-in-existence\footnote{34} (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance\footnote{71}-<including-virtue-as-ontology>) has always involved a disparateness-of-ontologically-construed-social-reality as of on the one hand a dichotomy of ‘intemporal-projection transcendental-enabling/sublimating/supererogatory–de-mentativity abstraction of prospective Being and
meaningfulness-and-teleology\textsuperscript{99} construal as of organic-knowledge implications and so as reductive construction however non-mechanical and intemporal-as-ontological-its-projection and hence as an open-ended-incompleteness/nonachievement-of-ontological-normalcy/postconvergence construal of social reality’, and on the other hand ‘an ad-hoc open-ended summative hotchpotch conventioning of temporal projections and intemporal projection grounding of social reality construction including organic-knowledge as well as mechanical-knowledge implications’; such that from the ontological-normalcy/relative-ontological-completeness of reference-of-thought perspective, the overall social Being and \textsuperscript{99} meaningfulness-and-teleology transcendentally-enabling-level-of-ontological-good-faith/authenticity/objectification/desubjectification-as-objectification-as-to-ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as antinihilism\textsuperscript{100} is ontologically-limited as of organic-knowledge implications reductive constructions in an open-ended-incompleteness/nonachievement-of-ontological-normalcy, as of the ontological-deficiency of mechanical-knowledge denaturing\textsuperscript{15} implications as well as perversion-and-derived-perversion-of-reference-of-thought-as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation of temporal projections as of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of reference-of-thought-devolving ontological-performance-including-virtue-as-ontology, all occurring as of the conjoined dynamism of conflatedness\textsuperscript{17} and distractive-alignment-to-reference-of-thought-of-apriorising/axiomatising/referencing. This overall disparateness-of-ontologically-construed-social-reality dynamism is reflected in ‘ontologically-compromised-mediating-as-of-their-
specific-constitutedness\textsuperscript{13} consciousnesses flawed conceptualisation perspectives’ as of their \textsuperscript{5} neuterising: wherein recurrent-utter-uninstitutionalisation has the deepest reference-of-thought/de-mentative/structural/paradigmatic as ‘impulsive—ontologically-compromised-mediating,-as-of-its-specific-constitutedness\textsuperscript{13} consciousness flawed conceptualisation perspective’ \textsuperscript{5} neuterising by its trepidatious-consciousness, while on the other extreme in contrast notional–deprocrypticism rather has a \textsuperscript{2} reference-of-thought/de-mentative/structural/paradigmatic notional–deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness\textsuperscript{12} protensive-consciousness sound conceptualisation perspective’ that by its \textsuperscript{1} reference-of-thought—devolving—différance/internal-dialectics/difference-deferral’ grasp the ontologically-veridical ‘underlying human limited-mentation-capacity dynamics of <amplituding/formative–epistemicity>totalising/encircumscribing/delineating \textsuperscript{8} reference-of-thought—devolving, and so without being subject to any \textsuperscript{9} neuterising’ as is the case with all ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness\textsuperscript{13} consciousnesses flawed conceptualisation perspectives’. Thus by its deneuterising\textsuperscript{10}—referentialism construed as of \textsuperscript{7} historiality/ontological-eventfulness /ontological-aesthetic-tracing, notional–deprocrypticism enables a fundamental ontology-driven ‘postconverging-or-dialectical-thinking\textsuperscript{10}–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’, and so superseding a naïve metaphysics-of-presence-{implicated-‘nondescript/ignorable–void ‘-as-to-‘ presencing—absolutising-identitive-constitutedness ‘} affect-driven mented or stigmatic psychology rather as of a shallow perspective and vaguely articulated as of \textsuperscript{10} universal import. The idea here with regards to human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity, is that from a creative perspective: the notion of a given \textsuperscript{5} neuterising is equinominal/equivalent with a given \textsuperscript{7} presencing—absolutising-identitive-constitutedness\textsuperscript{10}, and as this speaks of human limited-mentation-capacity prospectively-construed ontologically-flawed implications
as of ontological-normalcy/postconvergence. It is over this neuterising that human transcendence-and-sublimity/sublimation/supererogatory—de-mentativity is achieved from the prospective notional–conflicatedness of notional–deprocrypticism and so by deneuterising —referentialism, which is equinominal/equivalent to nonpresencing—perspective—ontological-normalcy/postconvergence. In other words the historical implications of human limited-mentation-capacity-deepening is that ‘as of a less and less ontologically-flawed meaningfulness-and-teleology towards ontological-normalcy/postconvergence, ‘it projectively/anticipatorily brought about the successive registry-worldviews/dimensions of reference—reference-<amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought—devolving’ as of their given neuterisation, construed as equinominal/equivalent with their successively given neuterising. From the above insight, transcendence-and-sublimity/sublimation/supererogatory—de-mentativity, is attainable as of deneuterising, construed as equinominal/equivalent with deneuterising—referentialism as the notional–conflicatedness of notional–deprocrypticism that produces the ontologically-veridical historiality/ontological-eventfulness/ontological-aesthetic-tracing. Ultimately, this sociohistorical disparateness-of-ontologically-construed-social-reality dynamism comes down to the limited/incomplete association of human ‘invention’ of organic-knowledge with the reflection of ‘this organic-knowledge underlying mental-disposition as of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development—as-infrastructure-of—meaningfulness-and-teleology rather defectively as of mechanical-knowledge construal in existential instantiations’, inducing prospective neuterising. This disparateness is increasingly closed-down all along in reflecting holographically—conjugatively-and-transfusively the ontological-contiguity —of-the-human-institutionalisation-process from recurrent-utter-uninstitutionalisation to positivism—procrypticism, with the underlying tenet for achieving futural Being-development/ontological-
meaningfulness-and-teleology\(^{99}\) as of prospective notional–deprocrypticism as preemtping—
 disjointedness-as-of-reference-of-thought being a full and cogent reflection of ‘human

knowledge for Being-development/ontological-framework-expansion–as-to-depth-of-
ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{99}\) in existential
instantiations’ thus resolving the open-ended-incompleteness/nonachievement-of-ontological-
normalcy. Overall, such a notional–confledness\(^{12}\)-reference-of-thought/de-

notional–deprocrypticism insight makes obvious that it is increasing ontological-

worldview/dimension-level by the concatenation of institutionalisation inextricably with uninstitutionalised-threshold\(^{02}\) as the former is in longness and the latter in shortness/distractiveness to the former. This conceptualisation of candidity/candour-capacity
associated with notional–deprocrypticism with regards to ‘de-mentation-

Consider a metaphysics-of-absence-(implicated-epistemic-veracity-of-nonpresencing-⟨perspective–ontological-normalcy/postconvergence⟩⟩ elucidation with regards to say a remote/isolated non-positivistic animist/base-institutionalisation society for instance which by some token has sustainable-and-learned access to basic but greatly enhancing productive techniques from travellers of a positivistic culture but without a substantial corresponding organisational and institutional diffusion associated with such greatly enhancing productive techniques due to the very brief nature of the encounter or disconnected/incoherent/perfunctory/chaotic nature of their relations, this will de-mentatively/structurally/paradigmatically have degenerative effect on such an animistic social organisation wherein this isn’t enhancing of the society’s social organisation and relations and will be possibly disruptive. This example isn’t that farfetched as anthropological evidence of such cases abounds with many native societies so disrupted by culturally alienating positivistic material diffusion. Human material/technical development and corresponding mentality as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology are inextricable and critical in reflecting holographically–⟨conjugatively-and-transfusively⟩ the ontological-contiguity\(^{\uparrow}\) of-the-human-institutionalisation-process\(^{\uparrow}\) including our positivism–procypticism registry-worldview/dimension. Just as the very nature of existential-reality by our limited-mentation-capacity-deepening construal/conceptualisation of it is rather ‘an uncompromising windedness/foldedness susceptible to our limited-mentation-capacity-deepening virtuality-or-ontologically-flawed-
supererogation\textsuperscript{96} like psychopathy and social psychopathy. This speaks of the very nature of all threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\textsuperscript{96}—preconverging/dementing –apriorising-psychologism with regards to the limits of a registry-worldview’s/dimension’s institutionalisation (whether base-institutionalisation, universalisation and positivism eliciting respectively the uninstitutionalised-threshold\textsuperscript{92} of ununiversalisation, non-positivism/medievalism and procrypticism) across all the ontological-contiguity\textsuperscript{96}—of-the-human-institutionalisation-process\textsuperscript{97} wherein the prior/transcended/superseded registry-worldview’s/dimension’s reference-of-thought in its <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \textsuperscript{33} (as metaphysics-of-presence-{implicit-‘nondescript/ignoreable–void ‘}-as-to- presencing—absolutising-identitive-constitutedness }): illusion-of-the-present/present-consciousness/mirage) is representing itself as ‘postconverging-or-dialectical-thinking’–apriorising-psychologism and dialectically/contendingly in-phase’ whereas from the prospective institutionalisation registry-worldview’s/dimension’s reference-of-thought, as of the ontological-normalcy/postconvergence epistemic/notional–projective-perspective, it is ‘preconverging-or-dementing –apriorising-psychologism and dialectically/contendingly out-of-phase’. The reason for the ontologically defective <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \textsuperscript{33} is that all registry-worldviews/dimensions reference-of-thought ‘tend to convention’ and in so doing close the ‘existential frame-of-ontology/meaningfulness (which is the transcendental-enabling/sublimating/supererogatory–de-mentativity)’ in their conventioning, and thus to the exclusion of prospective ontological profoundness of reference-of-thought. Thus all registry-worldviews/dimensions had hitherto been <amplituding/formative>\textsuperscript{98} wooden-language-\{imbued—averaging-of-thought-\textsuperscript{99} as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology \textsuperscript{99}–as-of-
However human existential closure of meaningfulness as conventioning doesn’t supersede but is rather superseded by existential ontological-veridicality, explaining the susceptibility of registry-worldviews/dimensions references-of-thought to be transcended/superseded with human limited-mentation-capacity-deepening\(^2\) expansion of ontological-depth as increasing ontological-completeness-of\(^2\) reference-of-thought (or reducing relative-ontological-incompleteness\(^{-}\) induced,\(^\sim\) threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\(^{6}\)—preconverging/dementing\(^{15}\)–apriorising-psychologism’). Existential closure of meaningfulness as conventioning induces psychically a registry-worldview/dimension ‘exclusive representing’ of itself as as ‘candored and straight’ with respect to ‘meaningfulness-and-teleology’ whereas its transcending/superseding by the prospective registry-worldview/dimension exposes psychically that it is rather ‘decandored and oblongated’ with respect to more profound prospective/transcending/superseding ‘meaningfulness-and-teleology\(^{10}\). A further example will be say ‘the God of plane’ type of articulation wherein such a base-institutionalisation as of animistic social-setup which is not positivistic (not the case of non-positivistic as medieval) is psychically ‘candored and straight’ with itself in \(<\text{amplituding/formative–epistemicity}>\text{totalising–self-referring-syncretising/circularity/interiorising/akrasiatic-drag}\) (its metaphysics-of-presence-\((\text{implicitied–}
ondescript/\text{ignorable–void }^-^-\text{as-to–}^-\text{presencing—absolutising-identitive-constitutedness}\)) and goes on articulating ‘meaningfulness-and-teleology’ even in the new existential transcendental/superseding contextualisation in terms–as-of-axiomatic-construct of the doubly-prior/transcended/superseded base-institutionalisation/animistic registry-worldview/dimension. Given such a state of \(<\text{amplituding/formative–epistemicity}>\text{totalising–self-referring-syncretising/circularity/interiorising/akrasiatic-drag}\)\(^{12}\), the notion of generating ‘meaningfulness-and-teleology\(^{10}\) from the ontological-normalcy/postconvergence
epistemic/notional-projective-perspective priorly implies a requisite psychoanalytic-
unshackling/memetic-reordering/institutional-recomposuring, and so by maximalising-

worldview’s/dimension’s-uninstitutionalised-threshold—defect—as-Being-or-ontological-or-

of a non-positivism/medievalism setup will seem ‘deranged’ from their perspective and their
mental orientation will be geared to their traditional sense of meaning and living as absolutely
defining, but then the ‘center’ had moved from their world (from non-positivistic as base-
institutionalisation/animistic or medieval preconverging-or-dementing—apriorising—
psychologism decenter) to the positivistic world (as postconverging-or-dialectical-thinking – apriorising-psychologism center). Likewise such a suprastructural articulation of our positivism–procrypticism relationship to its postlogism that includes psychopathy and social psychopathy will apparently not make any sense to our present but then ontologically our present is now decentered as threshold-of–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation—preconverging/dementing–apriorising-psychologism, though our mental-reflex will be a traditional sense of meaning and living as sound-and-not-preconverging-or-dementing–apriorising-psychologism as well. However, to the extent that it is ‘not such <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal/shortness-of-register-of–meaningfulness-and-teleology inclinations’ that drove human registry-worldview’s/dimension’s institutionalisations and resolved uninstitutionalised-threshold from recurrent-utter-uninstitutionalisation to base-institutionalisation–universalisation to universalisation–non-positivism/medievalism to positivism–procrypticism (as by reflex the temporal mental-disposition will rather be inclined to temporal (shortness-of-register-of–meaningfulness-and-teleology) extrication in any registry-worldview/dimension with no upholding of transcendental possibilities), to that extent the intemporal-disposition should rather construe/conceptualise its intemporal-disposition as the tip of human transcendental institutionalisation possibility and thus inherently that it transversally takes precedence over human temporal complexes (and such a ‘transversality-of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing confliction’ resolved intemporally by prospective ontological-primemovers-totalitative-framework and secondnaturing. This actually explains the inevitable contrariety involved in the making of transcendental human progress involving a prior/transcended/superseded reference-of-thought and a prospective/transcending/superseding reference-of-thought; given the blunt fact that
‘there is no untransvaluated–temporal-intemporality’ and pretences of inevitability of human progress without need for intemporal projection are falsehoods ‘arising as temporal/shortness-of-register-of–meaningfulness-and-teleology\(^\circ\) distraction’ with respect to the institutionalising/intemporalising constraining effect of intemporal/longness-of-register-of–meaningfulness-and-teleology\(^\circ\) projections.). Critically, the notion of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity and transcendental-enabling/sublimating/supererogatory–de-mentativity associated with intemporality /longness and institutionalisation/intemporalisation as of its very defining core is rather one of ontological-primemovers-totalitative-framework\(^\circ\) as it propounds the supersedingness/primacy/ascendancy of intrinsic-reality as a the-Good/understanding/knowledge-driven construct over human ‘good-naturedness’/impression-driven constructs as well as social-aggregation-enablers. The idea being that ontological-primemovers-totalitative-framework\(^\circ\) is much more than a notion associated with the positivistic registry-worldview/dimension (as has naively been traditionally implied) but is a central heuristic drive in defining and de-mentating/structuring/paradigming meaningfulness-and-teleology in all prior registry-worldviews as well however relatively inefficient; given that with corresponding shallow to limited-mentation-capacity-deepening\(^\circ\), as institutionalising ontological-primemovers-totalitative-framework\(^\circ\) successively induce more and more profound ‘mimetic-echoness to ontological-normalcy/postconvergence’ as of the full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency–sublimating–nascence,–disclosed-from-prospective-epistemic-digression-as-of–<amplituding/formative–epistemicity>totalising~renewing-realisation/re-perception/re-thought,–in–supererogatory–epistemic-conflicatedness\(^\circ\). (Consider the case with ancient Egyptians and even ancient Greeks where their relations with their deities were closely related to the fortune they expected on an empirical basis whether with respect to such occurrences like
droughts, warfare, etc. which technically speaking is a rational allocation as ontological-
primemovers-totalitative-framework of meaningfulness-and-teleology going by their
limited-mentation-capacity-deepening. Transcendence-and-sublimity/sublimation/supererogatory-de-mentativity and
transcendental-enabling/sublimating/supererogatory-de-mentativity as so construed is more than just a vague
notion of dialecticism but one that recognises on ‘an effective reality basis that human limited-
mentation-capacity-deepening’ implies more and more profound reconstruals/reconceptualisations (<amplituding/formative–epistemicity>totalising–renewing-
realisation/re-perception/re-thought) inducing transformative implications with respect to
meaningfulness-and-teleology as transcendence; in contrast to the mere aestheticisation of
abstract dialecticism or analogy/mere-analogising speaking thus of human sublimation-
inducing—textuality/hermeneutics/possibilities-of-becoming-existential-
interpretation/axiomatisation-of-existence. As knowledge conception as contrasted to
sovereign conception, ‘transcendence and transcendental-
enabling/sublimating/supererogatory-de-mentativity doesn’t recognise any human discreet
primacy with respect to intrinsic-reality/ontological-veridicality’ but rather intrinsic-reality is
the inherent purveyor of pertinence and primacy. For instance, we don’t have a choice in
deciding that gravity is about 9.8 m/s2 on earth since intrinsic-reality imposes that idea and the
corresponding knowledge construction and organisation where intrinsic-reality is ascendant is
rather based on an ‘intemporality–asymmetric-subsumption-of-temporality’, for relative
intrinsic-reality/ontological-veridicality
transcendental-
enabling/sublimating/supererogatory-de-mentativity. This is not to be confused with sovereign
constructions and organisations driven by human sovereign choices such as political choices or
marketing choices or other sovereign choices based on practices and habits. The latter are
social-scientific (besides the previous notion of social-scientific referring to intrinsic social
reality transcendental-enabling/sublimating/supererogatory-de-mentativity), with respect to transcendental-enabling/sublimating/supererogatory-de-mentativity construals/conceptualisations only as of existence-in-its-mimetic-echoness as inclusive of the human condition, i.e. human existential sovereign choices of “meaningfulness-and-teleology” as ontological construals ‘not in terms of the inherent intrinsic-reality/ontological-veridicality of the “meaningfulness-and-teleology” itself’ but ‘rather as of the veracity/ontological-pertinence of the reality of the human sovereign choices as of themselves as humans values independent of their inherent intrinsic-reality/ontological-veridicality as ontologically construing the reality of human condition’, and so with respect to “historiality/ontological-eventfulness”/ontological-aesthetic-tracing, politicisation and other social choices like moralisation, cultural value, economic value, etc. This distinction is critical because very often sovereign choices as conventions will tend to be acted upon as if these were transcendental knowledge of intrinsic-reality/ontology construal of the social in a wrong equivalence, and further because the transcendental-enabling/sublimating/supererogatory-de-mentativity as of the intrinsic-reality/ontology construal of the social is more fundamental as the tool for ‘creating/inventing-and-destroying/deconstructing conventions’ for more and more profound grasp of intrinsic-reality/superseding–oneness-of-ontology as of human subpotent knowledge. Sovereign constructs can as such be construed beyond-the-consciousness-awareness-teleology<in-existential-extrication-as-of-existential-unthought> to stifle the possibility of intrinsic-reality/ontology of the social, construed as ontology/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity knowledge, from arising. This insight explains why all deferential-formalisation-transference are only of pertinence as they justify and are derived from relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity conceptualisations, and collapse when they fail that test. For instance, notions such as arguments from authority are useful in ensuring
social efficacy but when authority is demonstrated as relatively fallacious, it then has no pretence to the sanctity of not being undermined. Ultimately, the veridical nature of knowledge beyond ‘institutionalised-being-and-craft’ (as established by prior transcendence-and-sublimity/sublimation/supererogatory—de-mentativity) to prospective transcendence-and-sublimity/sublimation/supererogatory—de-mentativity is not as an exercise of ‘logical mere convincing’ as of social-aggregation-enabling about what is knowledge and appropriate, but rather as a critical exercise of channelling of relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity as secondnaturing institutionalisation percolation-channelling—<in-deferential-formalisation-transference> to elicit the necessary positive-opportunism for prospective institutionalisation as skewing (‘intemporality—asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity) towards the intemporal/longness-of-register-of-meaningfulness. The fact is as construed by the Galileos, Copernicus, Diderots and others of the world, transcendental knowledge (as relatively ‘consecrated’ by relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity) necessarily carries a ‘cynicism-of-grandeur-as-of-effective-intemporal-solipsistic-commitment’ to deal with the reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor (and so as of ‘circular-complexification’/perpetual-reinstitutionalisation as a result of the same human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional–firstnaturedness—temporal-to-intemporal-dispositions–existentialism-form-factor mental-dispositions across all the successive ontological-contiguity—of-the-human-institutionalisation-process registry-worldviews/dimensions). In the bigger scheme of things,
as of the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional–conflatedness’ of notional–deprocrypticism deneuterising ‘—referentialism’ reflected by metaphysics-of-absence-{implicated-epistemic-veracity-of-} nonpresencing-{perspective–ontological-normalcy/postconvergence} in the conception of ‘meaningfulness-and-teleology’ ontological-performance ‘—including-virtue-as-ontology’ as of the transcendental implications in reflecting holographically–<conjugatively-and-transfusively> the ontological-contiguity of-the-human-institutionalisation-process of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue, we can appreciate that the successive registry-worldviews/dimensions conventioning are increasingly ontologically-driven in their value construct as it is more and more profound ontological-veridicality that enables human transcendence-and-sublimity/sublimation/supererogatory—de-mentativity and the ontological-contiguity of-the-human-institutionalisation-process in the first place; with the notional–deprocrypticism institutionalisation conventioning supposedly attaining absolute ontological grounding. The insight here is that the relative pure-ontology-drive of a Socrates philosophical clairvoyance superseding Athenian society conventioning limits but then with the latter perceiving in <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag its conventioning limits as absolutely ontological, Socrates is paradoxically construed as ontologically-impertinent and thus accused of heresy. Such an argument can also be extended to say a Copernicus or a Galileo whose relative pure-ontology drive advocating a heliocentric universe in medieval society comes against medieval society scholastics dogmatism conventioning limits but then with the latter perceiving in <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag its conventioning limits as absolutely ontological, Copernicus and Galileo are paradoxically construed as ontologically-impertinent. This highlights that a registry-worldview’s/dimension’s construes in <amplituding/formative–
epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag
