Besides and together with a study of the social sciences and philosophy, this author’s intuitive confidence in this hermeneutic design insights that underlies the arguments and discourse, is inspired from ‘an intimate and spontaneous idiosyncratic philosophical exercise (praxis) in the quest for the essence of meaning’, a ‘craft’ that has been nurtured continuously for nearly 25 years now (without conscious planning at the beginning nor at any time thereafter) since his discovery of ‘philosophical questioning and discourse’ at high school. An exercise that mirrors the intimate idiosyncratic exercise/praxis allowing an artist like a musician to grasp and develop memes that latter down the years enable the artist to be more or less ‘consummate with respect to the personal orientation they give to their arts’. Central to all such idiosyncratic processes is a continuous idiosyncratic memetic refinement over time of rough-cuttings, internal coherences, insights, inspirations, intuitive validations, constraining, sense-of-failing, sense-of-succeeding, confidence, mental inflections and mental projections; of course as per ability and ultimate pertinence with respect to intrinsic reality!
Abstract

This paper is rather a profound hermeneutic enunciation putting into question our present understanding of psychopathy. It further articulates, in complement, a novel theoretical and methodological conceptualisation for a hermeneutic psychological science. Methodology-wise, it puts into question a traditional more or less categorical and mechanical approach to the social and behavioural sciences as it strives to introduce a creative and insightful approach for the articulation of ideas. It rather seeks to construe the scientific method as being more about falsifiability and validation but driven by a sense of creative understanding and insight of notions laid out as open-ended conceptualisations. Theory-wise, it sees continuity between anthropology and psychology as anthropopsychology behind an entropic construct of human psychology based on a recurrent re-institutionalisation mechanism for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation.

An Intimate Insight on Psychopathy and a Novel Hermeneutic Psychological Science

Introduction

Quite possibly everything about this paper whether the authoring, the approach and the substance sparks of novelty bordering on the outlandish. Further, why not take a traditional categorical approach and clearly present scientific ideas the traditional way? It is a personal insight developed more than 20 years ago, and just when the author began his B.Sc. in Sociology and Anthropology; that a study of the social and behavioural should carry the philosophical and insightful at its very core above anything else given the inherent ephemeral nature of its subject matter. When I came across the term hermeneutics (and others like phenomenology), this author felt as a personal persuasion that that was the chart for the future of the social sciences. My vision in this regard is one of a social science that delves directly into the core of things and avoids platitudes. To come back to the point of this abstract, this explains my apparently tattered approach. But tattered really? No, as the central insight of my articulation is that the scientific method is a validation and falsifiability method, and not necessarily the creative method. The creative method as a hermeneutics isn’t supposed to roll down and stifle its very expressiveness, and at the same time it should be articulated in such a way that an exercise of falsifiability, validation and open-ended questioning can be undertaken over it. Such a
hermeneutic science calls for a mutual sense of such a hermeneutics by both the author and would-be critic. I hopefully believe the way I have articulated ideas should be able to allow for such an examination. My hermeneutic inspiration in this regard can be analogised with musical creation and music theory. The latter is there to ensure the appropriate articulation of rules but is not really the drive of musical creation, as musical creation is rather the musician’s hermeneutic/reprojecting/supererogating/zeroing insight of how to go about creating music while adhering to music theory, such that any such music is analysable/critiqued by the way it credibly adheres to music theory, and actually in exceptional cases further develop music theory. A second point that makes this method ideal is that the apparent enunciation of this paper (an outright call for a reinvention of the state of the art regarding our understanding of psychopathy and the underlying psychology science); is that it is doubtful such an articulation can be credibly presented in simple categorical terms, without rather utilising an entropic hermeneutic-referential approach based on an open-endedness for falsifiability and validation in future elaboration and development of ideas. Further, I thought it more critical (wary of platitudinising the occasion) that the purity of ideas expressed herein shouldn’t be overly clouded particularly as the treatment of this paper is largely in substance virgin territory, as of the underlying conceptualisation referential drive (beyond just simplistic rhyming/speculative/interpreted categories of philosophical theories and concepts but rather as ‘a driven distinct comprehensively coherent/contiguous operant-level of insights articulation, and carrying implicative and applicative operant-level possibilities going forward’, more like a song is a coherent referential whole beyond just naïve categories of disjointing/disparateness/disentailing percussions-and-tunes-more-or-less-similar-to-those-of-the-song construed as constituting the song). As a matter of fact, I would rather I wrote another paper talking about influences for such an articulation for this paper going by my hermeneutic design insights. Moreover, going by the very nature of how humans develop new ideas; while
many, if not most, of my arguments may be more or less ‘plainly intelligible’, I equally thought it important to articulate ideas I hold in deep conviction and further as many such ideas come with their requisite precise convoluted qualifications even if such ideas might not be quite intelligible from a plain and simple reading, with the notion that such a requisite insight will be forthcoming in future critique as the very nature of the introduction of new ways of thinking often mean their unintelligibility at first (equally explains my repeating of many terms for ‘habituation’), but then it is not the pertinence of reality that compromises it is the impertinence of human certitudes that does! In the bigger scheme of things, it is herein contended that human social and institutional progress and development is not de-mentatively/structurally/paradigmatically contiguous as to the very inherent nature of any given institutionalised framework as all such frameworks arrive at apathetic threshold as these rather develop into denaturing\(^{15}\) wooden-language\(^{8}\) (imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing — narratives—of-the— reference-of-thought— categorical-imperatives/axioms/registry—teleology ) stifling prospective possibilities, thus requiring prospective fundamental reconception. While such prospective re-projection/re-anticipation recognises prior human cumulated knowledge as enabling institutional-cumulation/institutional-recomposure-(as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective—ontological-normalcy/postconvergence-reflected—'epistemicity-relativism’>\(^{19}\) right up to the present, it also recognises at a certain point the ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’ becomes critically a drawback for the possibility of knowledge-reification \(^{7}\) of prospective human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint, as dimensionality-of-sublimating \(\{<\text{amplituding/formative}>\text{supererogatory–dementativeness/epistemic-growth-or-conflatedness }\text{/transvalutive–}\)

with media-driven imprimaturing increasingly usurping the role of genuine academic standard production and ultimate validity hanging on the mere imprimatur. As what becomes critical in such a context is no longer prospective knowledge-reification as the primary and essential constraining worth but rather obsession with mere sway and influence even to the point of undermining prospective knowledge-reification as supposed intellection is increasingly infused with obfuscations, falsehoods and subterfuges (as to the fact that misrepresentations and pretences to misunderstand are rather conveniently given as of perceived social-stake-contention-or-confliction and hardly reflecting a discernment about the possibility for advancing human progress) that apparently render human-subpotency/mortality bigger than existence-potency ~sublimating–nascence,-disclosed-from-prospective-epistemic-digression as to immortality. But then human intellection across all ages and times come to an end not because of inherently right or inherently wrong ideas per se (as the very basic genuine striving for intellectual progress is what is critically decisive as that exercise ensures that down-the-line correct and reifying ideas will arise anyway), but critically when deliberate deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity becomes more important than an aspiration for genuine intellection as an open-ended activity providing the possibility for human
knowledge and reflexive empowerment from that knowledge. At which point, it is wrong for ‘genuine intellection’ not to recognise what is going on to imply that it is veridically in dialogical-equivalence—as-to-psychologismic—apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness—in-self-becoming/self-conflatedness /formative—supererogating> with such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity (whether or not, beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of-existential-unthought) as this only leads to a destructuring-threshold—(uninstitutionalised-threshold/presublimating—desublimating-decisionality)—of-ontological-performance—including-virtue—as-ontology habitation and enculturation/endemisation of such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity rendering the supposedly empowering activity of knowledge-reification impotent as in many ways such denatured intellection openly claims as of disparateness-of-conceptualisation—unforegrounding-disentailment,—failing-to-reflect—immanent-ontological-contiguity inclinations that poorly appreciate existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression implications of transcendence-and-sublimity/sublimation/supererogatory—de-mentativity. In many ways this intellectual falsehood (so-construed by this author as to the implausibility of genuine lack of understanding as from a serious intellectual engagement but rather a ‘strategic/calculated behaviour of mere power even against genuine knowledge’ which this author intimately construes as a ‘decadent and dangerous conception of knowledge’ that is effectively destructive of prospective human knowledge reifying and empowering possibilities) is at the ‘root source’ for surreptitiously ensuring that the public debate fails and thus leading to public policy defaulting into vested postures and interests especially so when such an intellectual teleological-decadence—in-dimensionality-of-desublimating-lack-of—{(amplituding/formative)supererogatory—de-mentativeness/epistemic-growth-or-conflatedness/transvaluative—}

This then provides paradoxically the underlying\textsuperscript{56} meaningfulness-and-teleology\textsuperscript{100} infrastructure for upholding the status quo and inducing in many ways the impotence of the social sciences in thoroughly addressing human-subpotency-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of society that ultimately have serious de-mentative/structural/paradigmatic consequences associated with institutional failures (which such intellectualism is hardly inclined to address). Critically, such a ‘self-contented intellectualism’ increasingly focuses not on knowledge-reification\textsuperscript{87} as to existence-potency\textsuperscript{79} sublimating–nascence, disclosed-from-prospective-epistemic-digression or the critical analysis of such knowledge-reification\textsuperscript{7} but in the face of criticism rather consciously substitutes strategies of institutional ascendency as of a strategy of influence by
default imprimatur status rather than genuine knowledge-reification pertinence. It will be as naïve as implying the validity of a common basis for doing arithmetic where an interlocutor insists on 2+2 as 5 but when appropriately explained the veridical assumptions of arithmetic goes on to insist 3+3 as 7, speaking not of a fundamental problem of arithmetic operation as of dialogical-equivalence-as-to-psychologismic-apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness,-in-self-becoming/self-conflatedness/formative–supererogating but a fundamental question of ontological-bad-faith/inauthenticity on the naïve mental reflex that anyway dialogical-equivalence-as-to-psychologismic-apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness,-in-self-becoming/self-conflatedness/formative–supererogating is ever always assumed to then adopt an apriorising/axiomatising/referencing attitude of abusing the notion of dialogical-equivalence-as-to-psychologismic-apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness,-in-self-becoming/self-conflatedness/formative–supererogating as to wrongly implied logical-dueness. Faced with such an orientation the genuine intellectual reaction is to engage it upfront as of an inclination ‘not just to evaluate logical coherence as of correctness or incorrectness or any other evaluation in-between on the basis of ontological-good-faith/authenticity, but beforehand ‘to equally evaluate the apriorising/axiomatising/referencing in ontological-good-faith/authenticity or ontological-bad-faith/inauthenticity (beyond-the-consciousness-awareness-teleology,<in-existential-extrication-as-of-existential-unthought> as of underlying existential-contextualising-contiguity elucidation/deblurring as well as whether the veracity of such apriorising/axiomatising/referencing can be established as being of ‘relative-ontological-incompleteness/relative-ontological-completeness ⟨sublimating-referencing/registering/decisioning,–as-self-becoming/self-

We can appreciate that while many a subject-matter will often seem to imply that dialogical-equivalence–<as-to-psychologismic–apriorising/axiomatising/referencing–(of-existential–contextualising-contiguity)–conflatedness–</self–conflatedness /formative–supererogating–⟩ is just assumed ‘as to the fact of merely engaging as of logical coherence without questioning the underlying ontological-faith-notion-or-ontological-fideism–imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality in ontological-good-faith/authenticity or ontological-bad-faith/inauthenticity’, the fact is this is rather the consequence of their universal-transparency ⟨transparency-of-totalising-entailing,-as-to-entailing–⟨amplituding/formative–epistemicity⟩totalising–in-relative-ontological-completeness ⟩ of the-Good/understanding/knowledge-reification /ontological-primemovers-totalitative-framework rendering the possibility of ontological-bad-faith/inauthenticity directly ridiculous as in the natural sciences given its direct universal-transparency ⟨transparency-of-totalising-entailing,-as-to-entailing– ⟨amplituding/formative–epistemicity⟩totalising–in-relative-ontological-completeness ⟩ subjection to prediction, such
that we can hardly contemplate of an interlocutor insisting to imply that gravity on earth is \(7 \text{ m/s}^2\) to ensure that calculations conform to its expectations for one interest or another; but the reality of that universal-transparency as preempts such ontological-bad-faith/inauthenticity inclinations is not so directly obvious in many a social domain-of-study and that blurred possibility effectively elicits circumstances of disparate-ness-of-conceptualisation as preempting such ontological-bad-faith/inauthenticity inclinations is not so directly obvious in many a social domain-of-study and that blurred possibility effectively elicits circumstances of disparate-ness-of-conceptualisation.

This idea is essential in the thought of many such postmodern thinkers as Derrida and Foucault given the implications of human limited-mentation-capacity as herein construed as reflecting both human constructiveness-of-ontological-performance and destructuring-thresholds (uninstitutionalised-threshold/presublimating–desublimating-decisionality) of ontological-performance. The fact is knowledge-reification is of ‘existential

Beyond the seemingly intellectual ebullience ever so portrayed today, the question can be asked to which extent it usually reflect deep curiosity for prospective knowledge-reification\footnote{rather than a culture of pop-intellectualism today that seem to define our human-subpotency/mortality purposes as superseding existence-potency\textsuperscript{38}~sublimating–nascence,-disclosed-from-prospective-epistemic-}
digression as to immortality purposes, as so-reflected in the supposed intellection values conferred in many a press operation with such vague catchphrases as ‘the-greatest/most-influential thinker of our times’ as of mere influence peddling and poorly advancing the inherent importance of prospective knowledge-reification as addressing the human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of our prior reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation, notwithstanding the sometimes crude and unsavoury social discomfort implications in this respect. Thus in many ways such an orientation is unsettling to upcoming/future young thinkers as to what can be of profound intellection value with respect to opting for a profound intellectual commitment for prospective knowledge-reification rather than just strategies of socially perceived intellectual success within deified temporal/mortal existential frameworks; especially in the underhanded institutional presence of such avowedly teleologically-decadent–as-in-dimensionality-of-desublimating-lack-of \(<\text{amplituding-formative}>\text{supererogatory-de-dementativeness/epistemic-growth-or-conflicatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation}>\) mantras like theories die with the passing of their authors as so-implied with regards to many a postmodern scholar, wherein such highbrowng has been surreptitiously inclined to put-up their temporalities/mortalities (notwithstanding that knowledge is as to existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression consequences accruing to the entire humankind) to institutionally and socially undermine prospective knowledge-reification with stooges/foils muddying the ontological-veracity of genuine thought as of its true human emancipatory implications, as they ‘sneak-in and sneak-out about knowing and not knowing’ in a distorted conception of intellectualism as a Machiavellian/political exercise rather than the requisite magnanimity of engagement for a
genuine knowledge-reification\textsuperscript{87} exercise! Actually the projection of values including intellectual values in such \textsuperscript{amplituding/formative–epistemicity\>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\> are often prospectively deficient, given the fact that notions of value are only as pertinent as of their transvaluation implications in relative-ontological-completeness\textsuperscript{88} since the very same conception of value when construed on the basis of relative-ontological-incompleteness\textsuperscript{89} may actually be associated with vices-and-impediments\textsuperscript{90}, and so beyond-the-consciousness-awareness-teleology\textsuperscript{91}\textsubscript{\langle in-existential-extrication-as-of-existential-unthought\rangle} (given that virtue is rather as of the-Good/understanding/knowledge-reification\textsuperscript{87}/ontological-primemovers-totalitative-framework\textsuperscript{73} conceptualisation as to transcendental-enabling/sublimating/supererogatory–de-mentativity and not the vagueness of impression-driven/good-naturedness/wishfulness \textsuperscript{amplituding/formative\> wooden-language\textsuperscript{\langle imbued–temporal–mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing narratives–of-the– reference-of-thought– categorical-imperatives/axioms/registry–teleology \rangle} in human-subpotency social-aggregation-enabling). We can grasp in this respect that the value conception as from the non-universalising sophistry perspective had construed as decadent the prospective Socratic-philosophers\textsuperscript{104}\textsuperscript{universalising-idealisation just as did medieval-pedantic dogmatism of budding-positivists like Galileo and Descartes; as in many ways prospective knowledge-reification\textsuperscript{17} requires that we supersede our emotional-involvement starting with the very intellection striving for such prospective knowledge-reification\textsuperscript{11}. (In any case, ultimately the reality of human knowledge-reification involves ‘direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness\textsuperscript{88} \textsuperscript{56}meaningfulness-and-teleology\textsuperscript{104}, and so in transvaluation; as for instance, it can hardly be imagined that the\textsuperscript{84} reference-of-thought of the non-positivism/medievalism mindset as of its de-
underlying confliction arises with all registry-worldviews/dimensions transcendence-and-sublimity/sublimation/supererogatory-de-mentativity because these involve human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint transvaluation as putting in question the old valuation, and in this regards the transcendental/transvaluating conception is universally existential and cannot be just about the physical world without social world implications and vice-versa as so-underlined with the fact that both are for-human-studies/for-human-constructs by the underlying fact that these are the very same human-subpotency implications as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility -{imbued-and-hermeneutically/reprojectively/supererogatingly/zeroingly-educing}–human-subpotency-epistemic-perspective-of-projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-referencing–conceptualisation}; as inevitably the apparently innocuous Copernican, Galilean, Cartesian, Newtonian, etc. conception of the material world in superseding the human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of ‘traditional mythological/supernatural conceptualisation of material world/things as of the universalising but non-positivism–medievalism preclusive-consciousness’ have constructive implications about corresponding requisite prospective social-values in superseding the human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of ‘traditional mythological/supernatural conceptualisation of the social-construct as of the universalising but non-positivism–medievalism preclusive-consciousness’, and the possibility for the further advancement of such material sciences arises from the effectively enabling social-values like freedom-of-speech, opened communication, etc. availing as of the transcending positivism/rational-empiricism occlusive-consciousness. Likewise, it is herein contended that the future possibility for the natural sciences advancement is inseparable from
implying an ontological-performance\textsuperscript{72} that is rather constrained on the prior reproducibility—mathesis/motif/thrownness-disposition, as reproducibility-of-aestheticisation ‘despite the implications as from budding/nascent insights of ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications reflected as existence-potency\textsuperscript{11}—sublimating–nascence,—disclosed-from-prospective-epistemic-digression’ for the need for prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation, to which the Self absconds (in \textsuperscript{amplituding/formative–epistemicity}totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{33} as to limited-mentation-capacity implications) until the perceived induced notional—positive-opportunism\textsuperscript{14} from any such prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation elicits the requisite human limited-mentation-capacity-deepening\textsuperscript{53} (involving prospective knowledge-reification and/or deferential-formalisation-transference) for prospective secondnatured institutionalisation as of renewed prospective reproducibility—mathesis/motif/thrownness-disposition, as reproducibility-of-aestheticisation. Furthermore, besides the conceptualisation articulated herein, what vindicates this idea of apriorising/axiomatic/referencing intellectual break/schism/estrangement is effectively that the possibility for prospective \textsuperscript{39}meaningfulness-and-teleology\textsuperscript{16} is associated with a renewed framework of ontologisation/ontological-veracity/aestheticisation-towards-ontology which is in ‘affirmation/projection by its underlying supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness–of- apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation’ to the superseded framework of ontologisation/ontological-veracity/aestheticisation-towards-ontology as unaffirmed/deprojected; as to the possibility of
the recovery of dimensionality-of-sublimating ⟨amplituding-formative⟩supererogatory-dementativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ prospectively, disentangled from ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’. And finally, after many years of formative contemplation this author is rather dedicated to writing henceforth even if read/skimmed just by a handful or fortuitously or never-but-potentially, whatever cometh, hopefully over the next half a century, and thinks any human who genuinely feels strongly about the need for profound human thought should be able to do likewise, as ultimate responsibility and choice notionally lies with the individual.

- ‘Ctrl + Click’ (on any hyperlinked superscript) for the elucidation of the given term
- ‘Alt + Left-Arrow’ to go back to the previous location in the document (that is precisely at the clicked hyperlinked superscript location)
- ‘Alt + Right-Arrow’ to go in the reverse direction again
- Also the darkened text elaborates upon the immediately prior text and is darkened (to point out its interjecting nature) in order to ease the ‘continuity readability’ of long phrases/sentences while at the same time striving herein for ‘a most profound and extended articulation of exactifying/precisioning–of-sublimation<as-to-entailing-theoretical,-conceptual-and-operant-implications>’

When expressed specifically herein universal/universalised/universalising-<as-to-universalisation> refers to the specific universalisation registry-worldview/dimension as to its ‘universalising apriorising/axiomatising/referencing–rules of entailing<amplituding/formative–epistemicity>totalising meaningfulness-and-teleology’ while when expressed herein in a general sense universal/universalised/universalising actually and precisely refers to ‘totalising-entailing of implied knowledge-reification gesturing’ for instance in the sense that mathematics is universal means mathematics is totalisingly-entailing (with this general sense applying with regards to any given registry-worldview/dimension as to its given ‘entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness apriorising/axiomatising/referencing–rules’ and as further reflecting the implication that registry-worldviews/dimensions of relative-ontological-completeness are of more profound ontologically totalising-entailment apriorising/axiomatising/referencing–rules as so implied as from ‘non-rules totalising-entailing, rulemaking-over-non-rules totalising-entailing, universalisation-directed-rulemaking-over-non-rules totalising-entailing, positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules totalising-entailing, and preempting—disjointedness-as-of-reference-of-thought,-as-to-<amplituding/formative–epistemicity>growth-or-

entailing between mythological and positivistic/rational-empirist totalising-entailing with both construed as universal ‘meaningfulness-and-teleology’, while the general sense of universal implicitly captures and exactifies/precises the conception of totalising-entailing in terms of ‘entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness’ as reflecting the implication of human limited-mentation-capacity-deepening as to the ‘notionalisation/notional-conception/amplituding of totalising-entailing so-reflected by the ontological-contiguity—of-the-human-institutionalisation-process’ (along the same lines as notional–deprocrypticism) thus amplificatorily rendering the conception of totalising-entailing (as to notionally–universal) as more ‘profoundly construed as from perspective relative-ontological-completeness as of the ontological-normalcy/postconvergence of existence/intrinsic-reality’ so-underlied by perspective ‘nondisjointing totalising-entailing’ or deprocrypticism

There is a common word that already exists that best describes what a psychopath is philosophically-speaking. It is a French word that doesn't exactly exist in English. The word is ‘cinglé’ and is better translated in English as ‘slanted mind’ (in contrast to the straightness/candor/organic-comprehension-thinking of a ‘conviction-as-to-profound-supererogation’ predisposed human mind’ so-reflected as prelogism -as-of-conviction,-in-profound-supererogation -<existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> and so-construed as of human candidity/candour-capacity. It should equally be noted that sometimes the word cinglé is used intermittently with deranged (dérangé) which is a more general word that does not capture the socially-functional-and-accordant phenomenal specificity that is of relevance herein. In other words, ‘the cinglé’ perceives meaning as ‘a hollow mimicking form in-of-itself that determines others behaviour’ in contrast to the normal–as-of-candidity/candour-capacity human relation to meaning as of essence or supplanting–conviction-as-to-profound-supererogation —of–‘attendant-intradimensional’-postconverging/dialectical-thinking –apriorising-psychologism or prelogism⁷ we abide by (and so, even in the case of ‘poor or bad supplanting–conviction-as-to-profound-supererogation’ —of–‘attendant-intradimensional’-postconverging/dialectical-thinking –apriorising-psychologism‘) or bad prelogism⁷ where the bad logic of the prelogism –as-of-conviction,-in-profound-supererogation –<existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> mind operates by an ad-hoc and circumspect exaggeration or omission). In other words, the psychopath manifests postlogism –as-of–’compulsing–nonconviction/madeupness/bottomlining–(‘<decontextualising/de-existentialising–of–attendant–intradimensional–apriorising/axiomatising/referencing’–induced-disontologising’–of–the–‘attendant–intradimensional–ontologising’–imbued–<contextualising/existentialising–attendant–

For instance, as of their relative-
ontological-incompleteness reference-of-thought, an animist society might notice that going to a given forest leads to illness and ascribe evil to that forest but then a prospective relative-ontological-completeness reference-of-thought positivism interpretation may be that at a certain time of the day and during a certain time of the year that forest attracts mosquitoes that cause malaria for instance which can be prevented by rubbing a certain leaf on ones clothes and body, together with the fact that a given root can be used to cure the malaria, and in addition to a whole web of nuanced understanding available to the positivism meaningfulness-and-teleology relative to the ‘utter and brute’ animistic interpretation as meaningfulness-and-teleology neuterising that it is an evil forest one should not trespass together with a whole cohort of ‘imaginary tales’ in shoring up that posture, speaking of its threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation apriorising-psychologism. This is a most elaborate articulation of ‘neutering’ but it equally applies where meaningfulness-and-teleology is ‘just about miscued’ say between positivism–procrypticism and notional–deprocrypticism with the latter underlying the disjointedness-as-of–reference-of-thought of the former as it neuterising, for instance in the case of psychopathy and corresponding conjugated-postlogism as social psychopathy as in the various illustrations highlighted herein and particularly as more obviously revealed with childhood psychopathy. In the bigger picture, ascriptivity-or-ascriptition-hardening/pseudo-referentialism arises as of notional–referentialism/notional–deprocrypticism; wherein recurrent-utter-uninstitutionalisation’s existential reference-of-thought deepest-level of neuterising is elicited by its ‘trepidatious-consciousness impulsive—ontologically-compromised-mediating, as-of-its-specific-constitutedness’ apriorising/axiomatising/referencing/intelligibilityset-up/measuringinstrument rulemaking-over non-rules—apriorising/axiomatising/referencing—psychologism’, failing base-

completeness that overcomes the given uninstitutionalised-threshold meaningfullness-and-teleology neuterising’ thus enabling the ontological-normalcy/relative-ontological-completeness reference-of-thought of the prospective institutionalisation. It also explains why naively implying at an uninstitutionalised-threshold that ‘the social universally-non-transparent-thus-non-constraining-element of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality’ is universally attributable as if humans had only the intemporal/longness-of-register-of meaningfullness-and-teleology individuation without temporal/shortness-of-register-of meaningfullness-and-teleology individuations will simply fail to recognise the generation-and-upholding of neuterising and thus unable to reveal perversion-and-derived perversion-of reference-of-thought as-effectively-apriorising-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation; as it is naïve to think that while being at an uninstitutionalised-threshold like universalisation–non-positivism/medievalism by mere-and-vague impression-driven/good-naturedness/wishfulness wooden-language imbued—averaging-of-thought as-to-leveling/ressentiment/closed-construct-of meaningfullness-and-teleology as-of ‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications} in social-aggregation-enabling, people will ‘simply by magic’ find themselves articulating positivistic meaningfullness-and-teleology without grasping that the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring crossgenerational process is effectively the mechanism for ‘overcoming non-positivism/medievalism uninstitutionalisation meaningfullness-and-teleology neuterising’ to be able to then reveal, construe and uphold positivistic Being and meaningfullness-and-teleology, and this equally applies with regards to overcoming our procrypticism–or–disjointedness-as-of reference-of-thought meaningfullness-and-teleology neuterising’ to attain futural Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism. As a further elucidation, a comparison can be made between a construct of ‘notional–referentialism’ disambiguated as referentialism, categorising neuterising, qualifying neuterising, tendentious neuterising and impulsive neuterising, and in parallel a reflection of ‘data conceptualisation’ disambiguated as ratio-contiguous referencing, intervalist pseudo-referencing, ordinal pseudo-referencing, nominal pseudo-referencing and random pseudo-referencing. We can grasp that effectively data conceptualisation as of intrinsic-reality/ontological-veridicality is inherently ratio-contiguous as of ontological-normalcy/relative-ontological-completeness reference-of-thought but then we don’t always have the capacity to reference ratio-contiguous data and so the other types of data conceptualisations are available to us as well ‘as of the limitations of our measuring capacity’, and we grasp that the latter are actually in ‘constructed-deficiency of <amplituding/formative–epistemicity>totalising–ratio-contiguity/ratiocination-as-referentialism’ as of their respective epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness reference-of-thought. Here as well it is important to understand that it is the ratio-contiguous referencing data conceptualisation that provides the ‘overriding framework as of apriorising/axiomatising/referencing–(of-existential-contextualising-contiguity)—conflatedness’ for making-sense-of/construing the relatively deficient referencing data conceptualisations as of their ‘defined tolerable levels’ of neuterising. This elucidation is to point out that reference-of-thought constructs in epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness reference-of-thought in the very first place cannot be the basis for articulating, as of their given apriorising/axiomatising/referencing–(of-existential-contextualising-contiguity)—constitutedness, by elaboration-as-to-mere-

To put it another way, as distinct articulations of the same physics intrinsic-reality, we cannot simply by apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness\(^1\) by elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity\(^9\) of ‘traditional classical mechanics axiomatic-construct’ given its epistemic-abnormalcy/preconvergence\(^9\)/relative-ontological-incompleteness\(^9\) -of-reference-of-thought arrive-at/achieve the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as of its ontological-normalcy/relative-ontological-completeness\(^1\) -of-reference-of-thought; as what is so generated is nothing as of reality but rather a virtuality-or-
ontologically-flawed-construal. Instead such a construction of prospective relative intrinsic-reality/ontological-veridicality is a apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confoundedness of ‘traditional classical mechanics axiomatic-construct’ by an epistemic-totalising~renewing-realisation/re-perception/re-thought as of maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation; driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-

existential-reality to reconstruct the same physics domain-of-study as the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs, and rather reflects the ontological-veridicality that ‘traditional classical mechanics axiomatic-construct’ as of its epistemic-abnormalcy/preconvergence/relative-ontological-incompleteness-of-reference-of-thought is ‘construed as a constructed-deficiency of the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs ontological-normalcy/relative-ontological-completeness-of-reference-of-thought perspective’, and the former can only be subsumed/implied/construed-as-non-contradictory to the latter. Such a basic conception of comparative axiomatic-constructs in their reflection of the very same <amplituding/formative-epistemicity>totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality highlights that ontologically-veridical meaningfulness is a construction or derived-construction as of inherent intrinsic-reality/ontological-veridicality or the closest axiomatic-construct approximation to it; the insight here being that ‘relative completeness/profoundness of axiomatic-construct/reference-of-thought with respect to intrinsic-reality/ontological-veridicality’ is what is ontologically preeminent/critical for the notional perspective of ontological construal/conceptualisation. This is equally relevant with regards to the ‘reference-of-thought—devolving-teleological-dementating/structuring/paradigming—of-meaningfulness’ which refers to the transcendental-
mental-disposition as this basically defines the possibility of institutionalisation within recurrent-utter-uninstitutionalisation as inherently non-existent. Likewise it is the habituated rulemaking-over-non-rules—apriorising/axiomatising/referencing—psychologism as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality for the prospective institutionalisation of base-institutionalisation that is the (warped-consciousness neuterising-induced)- reference-of-thought—devolving-teleological-de-

This insight extends to all successive registry-worldviews/dimensions institutionalisations in construing their teleological-de-mentating/structuring/paradigming/teleological-possibilities. This equally explains the divergence of individuals and societies ontological-performance—including-virtue-as-ontology across registry-worldviews/dimensions even though all humans have the same basic intellectual potential; as within the institutionalisation limits of a registry-worldview’s/dimension’s reference-of-thought—devolving-teleological-de-

<amplituding/formative–epistemicity>totalising/circumscribing/delineating the meaningfulness-and-teleology implied as of the same/common/shared reference-of-thought–categorical-imperatives/axioms/registry-teleology. This explains why it is dementatively/structurally/paradigmatically impossible for either such a non-positivistic social-setup or our procrypticism social-setup to resolve the vices-and-impediments associated with the corresponding reference-of-thought centered–

Thus it is ontologically impossible to address any given registry-worldview/dimension vices-and-impediments as of that fundamental amplituding/formative-epistemicity-totalising/circumscribing/delineating thought-devolving-as-of-instantiative-context meaningfulness-and-teleology reference-of-centered—epistemic-totalisation, besides at best palliative constructs of a non-universal nature, as not of an aetiologisation/ontological-escalation nature. Thus further validating the idea that it is a crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring in secondnaturing such a prospective institutionalisation reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness that enables such a transformation whether from a retrospective or prospective transcendence-and-sublimity/sublimation/supercorogatory—de-mentativity perspective. This explains ontological-normalcy/postconvergence referentialism as construing/conceptualising the most profound/complete ontologically-veridical reference-of-thought construction of meaningfulness-and-teleology, as of the succession of registry-worldviews/dimensions from the notional—deprocrypticism perspective construal/conceptualisation, as being ‘the most profound/complete reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ grasp of intrinsic-reality/ontological-veridicality among all the registry-worldviews/dimensions as of its preempts—disjointedness-as-of-reference-of-thought,-as-to amplituding/formative-epistemicity growth-or-conflatedness/transvaluative-

worldview/dimension for the disambiguation of notional—firstnatures—temporal-to-

Insightfully, historicity/ontological-eventfulness/ontological-aesthetic-tracing\<perspective–ontological-normalcy/postconvergence-reflected–epistemicity\relativism\> as of notional–conflatedness\constitutedness points out that as of the very-same-immanent-existence/intrinsic-reality/ontological-veridicality, as to ‘human amplituding/formative–epistemicity\textasciitilde{}totalising\~purview-of-construal’: it is rather and critically more apt to ‘articulate organically as of ontological-faith-notion-or-ontological-fideism–imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality’ the transcendental construct of prospective base-institutionalisation institutionalisation while in recurrent-utter-uninstitutionalisation uninstitutionalisation (doing so by failing the ‘wooden-language\langle	ext{imbued\~temporal–mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing ~narratives\~of-the- reference-of-thought\rangle’
sublimity/sublimation/supererogatory—de-mentativity to the prospective reference-of-thought for renewal; that is, this will rather bring about the <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of the prior reference-of-thought in ‘incremental circular-complexification’ and so beyond-the-consciousness-awareness-teleology-in-existential-extrication-as-of-existential-unthought on a false notion of ‘an intemporal temporality’, naively passing for intemporality/longness as of intersubjective eliciting of temporality. Such notional-conflatedness for ontological-performance-including-virtue-as-ontology implication is easily understood as of metaphysics-of-absence{implicated-epistemic-veracity-of-nonpresenting<perspective–ontological-normalcy/postconvergence>} when we grasp that a mindset as of a non-positivistic social-setup needs to ‘wean off organically beyond mere mechanical adjustments’ its non-positivism before the notion of ‘a credible logical engagement in terms—as-of-axiomatic-construct of positivism/rational-empiricism with a mindset as of a positivistic social-setup’ can be genuinely entertained. In this regard, the budding-positivists had to implied an utter break with medieval-scholasticism-pedants—ideal-type-or-individuation to avoid the circular problem of their positivism knowledge and science being interpreted in mystical and alchemic terms-as-axiomatic-construct of reference-of-thought–categorical-imperatives/axioms/registry-teleology—for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology.

Such a psychoanalytic-unshackling commitment equally highlights that the idea of a common universal human potential available to all individuals while true is not inherently existentially fulfilled/valorised if that human-subpotency is not effectively to-the-best-of-our-temporal/mortal-superseding-endeavouring unleashed as of a maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-

It is only a crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring in the medium to long-term that can transcendentally ‘wean off’ from such a teleological-de-mentating/structuring/paradigming/teleological-possibilities of a registry-worldview/dimension by habituating a prospective institutionalisation as of its reference-of-thought–and–reference-of-thought–devolving–meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue. This explains as of metaphysics-of-absence-{implicated-epistemic-veracity-of-nonpresencing<-perspective-ontological-normalcy/postconvergence}> why for instance the mere demonstration to approval/acquiescence of positivistic principles/interpretations of intrinsic-reality/ontological-veridicality in a non-positivistic as animistic social-setup or medieval social-setup however frequent the demonstrations within a given limited period of time doesn’t mean that the social-setup has been transformed into a positivistic social-setup; since their existentially habituated state of animism or medievalism teleological-de-mentating/structuring/paradigming/teleological-possibilities as of {warped-or-preclusive-consciousness-neuterising-induced}-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness as intradimensional existential-instantiations derived/devolved axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue, will need to be undone/unshackled psychoanalytically in the medium to long-run to veridically achieve positivism; given that that uninstitutionalised-threshold is in a state of circular-pervasiveness-of-reference-of-

We can get a projected sense of this as of metaphysics-of-absence in that despite the articulation of positivistic principles/interpretations in the animistic social-setup or medieval social-setup, in the short to medium run individuals will keep on overriding and ignoring such positivistic meaningfulness-and-teleology nihilistically, notwithstanding that we may recognise this as of prospective relative-ontological-completeness reference-of-thought, and falling back to construe/conceptualise meaningfulness-and-teleology in non-positivistic animistic or medieval terms—as-of-axiomatic-construct, construed from the positivistic perspective as perversion-and-derived-perversion-of-reference-of-thought-as-effectively-apriorising-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation

as of unsoundness-or-ontological-bad-faith/inauthenticity reference-of-thought. As broadly speaking, a registry-worldview’s/dimension’s reference-of-thought is as of ‘the existential individuations possibilities as to reference-of-thought–prelogism-as-of-conviction,-in-profound-supererogation <existentially-veridical–attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> and threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation as-to–‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing apriorising-psychologism’ reflecting the teleological-de-mentating/structuring/paradigming/teleological-possibilities, established as of
Inherently, such ‘a psychoanalytic-unshackling commitment’ inevitably and fundamentally puts into question the axioms and underlying supposedly transcendental-enabling/sublimating/supererogatory-de-mentativity notion as of the (given consciousness’s neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness of the prior registry-worldview’s/dimension’s reference-of-thought of meaningfulness-and-teleology which establishes its ‘grounded knowledge construct’, and so because of its denaturing of the prior institutionalisation’s reference-of-thought—categorical-imperatives/axioms/registry-teleology by way of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity at the registry-worldview’s/dimension’s uninstitutionalised-threshold inducing prior relative-ontological-incompleteness-reference-of-thought in need for prospective relative-ontological-completeness-reference-of-thought, and so as a transitional construct that is in effect as of a psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring articulation by its crossgenerational transcendental implications projection. Such that such ‘a psychoanalytic-unshackling commitment’ cannot be construed in the same terms—as-of-axiomatic-construct as ordinary intradimensional knowledge as of the established prior institutionalisation teleological-de-mentating/structuring/paradigming/teleological-possibilities for its ‘grounded knowledge construct’ as prior relative-ontological-incompleteness-reference-of-thought, but rather construed as of prospective ontological-normalcy/relative-ontological-completeness-reference-of-thought it more critically and organically points to the uninstitutionalised-threshold state of the present registry-worldview’s/dimension’s reference-of-thought at its uninstitutionalised-threshold with respect to the prospective institutionalisation state of the prospective registry-worldview’s/dimension’s reference-of-thought as of its prospective
relative-ontological-completeness\textsuperscript{88} of\textsuperscript{84} reference-of-thought, and thus rather implies an de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics). It is psychoanalytic-unshackling commitment and not grounded knowledge construct commitment, because it is for instance about articulating ‘prospective positivism axiomatic-construct (occlusive-consciousness\textsuperscript{58} neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘non-positivism axiomatic-construct (warped-or-preclusive-consciousness\textsuperscript{58} neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness’, or in the case of articulating ‘futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\textsuperscript{100} as of prospective notional—deprocrypticism axiomatic-construct (protensive-consciousness deneuterising\textsuperscript{57}-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘positivism—procrypticism axiomatic-construct (occlusive-consciousness\textsuperscript{58} neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness. It is important to grasp in both instances that such psychoanalytic-unshackling commitment implications are not to be understood respectively as of the uninstitutionalised-threshold mental-dispositions of non-positivism/medievalism or procrypticism\textsuperscript{84} reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming-of-meaningfulness which will just induce their \textsuperscript{4}<amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag> mental-dispositions for non–transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, but rather as of a habituated mental-projection perspective from the prospective institutionalisations of positivism

such that counterintuitive to what we might be inclined to think, the development of human psychology is not as of ‘a grounded construction that simply varies incrementally across all times’, but rather ‘a construction which teleological-de-mentating/structuring/paradigming/teleological-possibilities/teleological-potency are sharply rearticulated in succession of institutionalisations as of ontological apriorising/axiomatising/referenceing-of-existential-contextualising-contiguity—conflatedness’, and this is important ‘to avoid unduly considering our whole psychical-nature-and-potential as of our present positivistic institutionalisation mindset/consciousness as of metaphysics-of-presence-implicated-nondescript/ignorable-void—as-to-presencing—absolutising-identitive-constitutedness’, but rather grasp that there are teleological-de-mentating/structuring/paradigming/teleological-possibilities/teleological-potency of our mental-projection and mental-disposition as of deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought '<amplituding/formative-epistemicity>totalising/circumscribing/delineating apriorising/axiomatising/referenceing/intelligibilitysetup/measuringinstrument as of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ beyond just what we can imagine as of our presence as positivism–procrypticism. This analysis brings out what is effectively meaningfulness as it shows that meaningfulness is more completely about apriorising/axiomatising/referenceing/intelligibilitysetup/measuringinstrument—for-operant-or-incidenting-predicative-insights thus involving the '<amplituding/formative-epistemicity>totalising/circumscribing/delineating apriorising/axiomatising/referenceing/intelligibilitysetup/measuringinstrument as of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of the prospective relative-ontological-completeness-of-reference-of-thought of the (given consciousness’s neuterising-induced-or-deneuterising-induced—reference-of-

Within a registry-worldview’s/dimension’s institutionalisation framework the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology" is utterly geared in an <amplituding/formative–epistemicity>totalising~self-referencing-synergetising/circularity/interiorising/akrasiatic-drag of meaningfulness-and-teleology as of ‘operant-or-incidenting-predicative-insights or logical-coherence’ and beyond-the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-unthought> by mental-reflex presupposes-and-assumes the ontological absoluteness/indubitability of its ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’, and wrongly so even at its uninstitutionalised-threshold; such that it is only crossgenerationally that it can attend effectively as of its transcendence-and-sublimity/sublimation/supererogatory–de-mentativity to the reality of temporal denaturing of the said institutionalisation’s reference-of-thought–categorical-imperatives/axioms/registry-teleology at its uninstitutionalised-threshold by elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity, pointing to its perversion-and-derived–perversion-of-reference-

Remarkably, such a maximalising-recomposuring—for-relative-ontological-completeness—unenframed-conceptualisation behind the ontological-
contiguity—of-the-human-institutionalisation-process enabling the human existential tale in successive institutional-cumulation/institutional-recomposure—(as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing—<perspective—ontological-normalcy/postconvergence-reflected—‘epistemicity-relativism’>) is always rather perceived intradimensionally as an exceptional-askance and unordinary. For instance, the maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation mental-disposition in their own times advocating the end of such perverse human institutions like serfdom and slavery were construed in their own times by their dominant societies as of exceptional-askance and unordinary such that in effect these actually engendered great conflict before such practices came to an end; and such metaphysics-of-absence—{implicated-epistemic-veracity-of-nonpresencing—<perspective—ontological-normalcy/postconvergence>} analysis does apply with respect to superstitions, universal human rights, free society, modern science, etc. but then as of our developed present institutionalisation the idea of not entertaining such practices is viewed as not an exceptional-askance and ordinarily to be expected. This explains human mental states respectively as of uninstitutionalised-threshold and as of prospective institutionalisation with respect to maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation as the process enabling prospective relative-ontological-completeness—of-reference-of-thought of same <amplituding/formative—epistemicity>totalising—devolved—purview-as-domain-of-construal—as-intrinsic-reality/ontological-veridicality hitherto considered off limits to any challenging transcendence-and-sublimity/sublimation/supererogatory—de-mentativity as of opened-construct-of—meaningfulness-and-teleology arise only by maximalising-recomposuring—

Insightfully, this point out the circumspective nature of any transcendental knowledge construction exercise as of ontological-tolerance to avoid on the one hand outrightly articulating construed ontological-veridicality at the expense of avoiding any Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\textsuperscript{9} al engagement, as such a psychoanalytical commitment necessarily recognises human potential to transcend, and the other hand the nature of intrinsic-reality/ontological-veridicality that ‘supersedes humankind and doesn’t factor in human moods and whims’ in its effectiveness. Caught between these two elements human meaningfulness-and-teleology\textsuperscript{10} is ‘often actually imbued with active and passive mental-strategies of compromise’ but which wouldn’t cut it with the maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{8}—unenframed-conceptualisation necessary for human development and progress. The central element here has to do with the pervasiveness of ‘conceptual patterning’ that actually speaks of a nombrilistics <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{33}\) approach to conceptualising knowledge based on an intellectual exercise of producing patterns of thought with little consideration as to their underlying intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity as validated by ontological-primemovers-totalitative-framework\(^{7}\). At its worst, such an orientation construes of categorisation/taxonomisation of knowledge as inherently representative of intrinsic-reality/ontological-veridicality by that mere exercise. Such a apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness\(^{13}\) ends up misconstruing the organical depth involved and renders all knowledge constructs so categorised/taxonomised on the same vague plane of mechanical equivalence undermining their transcendental-enabling/sublimating/supererogatory~de-mentativity, originality, organic nature and more often than not turning them into platitudes as rather concerned with perceived academic formulations and formats in of themselves rather than ontological-veracity as of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity. The underlying mental-reflex for this
intellectual disposition associated with conceptual patterning is the assumption that by mere
categorising/taxonomising ideas on the basis of their similarities and differences it should be
able to attain a grander truth as of elaboration-as-to-mere-
extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-
contextualising-contiguity. But then such an approach is naïve by its failure to reckon the
reality of human limited-mentation-capacity which implies that human conceptualisation tends
to develop from prior relative-ontological-incompleteness—of—reference-of-thought, as of the
incompleteness of the preconverging—de-mentating/structuring/paradigming of human
reference-of-thought. Such that a naïve categorisation/taxonomisation conceptual patterning
perspective on that basis equally inherits that relative-ontological-incompleteness of the
preconverging—de-mentating/structuring/paradigming of human reference-of-thought; with
the consequence that it is not ‘notionally postconvergingly—de-mentated/structured/paradigmed’
to conceptually factor in human poor to perfect/near-perfect construal on the basis of
apriorising/axiomatising/referencing—of-existential-contextualising-contiguity—
conflatedness but rather suffers from apriorising/axiomatising/referencing—of-existential-
contextualising-contiguity—constitutedness. This weakness is underlined and resolved by
the notion of maximalising-recomposuring-for-relative-ontological-completeness —
enframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as—
of-existential-reality that enables apriorising/axiomatising/referencing—of-existential-
contextualising-contiguity—conflatedness in line with existential-contextualising-
contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness—of—
reference-of-thought—devolving-as-of-instantiative-context. It is such a conceptual patterning
mental-reflex associated with categorising/taxonomising dispositions in
apriorising/axiomatising/referencing—of-existential-contextualising-contiguity—
constitutedness\(^1\) that is behind the naïve but poor influence of the saying that ‘every idea has already been thought of before’ with the nefarious consequence of ‘emphasising themes and authorial differentiation within such categorised/taxonomised thematics in of themselves’ as if an epistemic-totalising\(^2\)~devolved–purview-as-domain-of-study mainly involves intersubjective evaluation or evaluation among humans within the scope of their mortality on the naïve assumption that such categorising/taxonomising effectively covers analytically the entirety/potency of existence—as-the-absolute-a-priori-of-conceptualisation–and–existence—as-sublimating-withdrawal, eliciting of prospective-supererogation~<as-to-perspective-ontological-normaley/postconvergence-implied–‘prospective-aporeticism-overcoming/unovercoming’>, whereas such is achieved rather by a conceptualising as implied by referentialism-as-of-ontological-normaley/postconvergence that places existential-contextualising-contiguity ‘s-reifying/elucidating-of-prospective-relative-ontological-completeness\(^3\)—of—reference-of-thought—\(^3\)—devolving-as-of-instantiative-context above intersubjective evaluation or evaluation among humans in their mortality in determining intrinsic-reality/ontological-veridicality–transcendental-enabling/sublimating/supererogatory—dem-mentativity as of intersolipsistic insight. Consider for instance that in the run up to the development of theory-of-relativity and quantum-mechanics in the early part of last century, the scientists involved weren’t in the exercise of evaluating their respective theories in a closed framework emphasising their respective ‘ownership-of-theories’ as mortals but rather an opened framework emphasising whosever theories contribute in disclosing intrinsic-reality/ontological-veridicality as the superior third party. This can equally be compared to naively articulating categories/taxonomies of sounds on the basis that their apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity )—constitutedness\(^1\) defines the entire existential possibility/potency of musical compositions that can arise but then the ‘depth/axiomatic-construct of existence for musical compositions’ doesn’t
submit to such a naïve categorising/taxonomising apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness but rather such ‘depth/axiomatic-contruct of existence for musical compositions’ is as of an imbricatedness/threadedness/recomposing of existential-instantiations that is graspable rather by a apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness as enabled by referentialism-as-of-ontological-normalcy/postconvergence.

Given our limited-mentation-capacity, existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness—of-reference-of-thought—devolving-as-of-instantiative-context is then the preceding and transformative element of ‘meaningfulness-and-teleology’ conceptualisation as of our limited-mentation-capacity-deepening enabling our prospective relative-ontological-completeness—of-reference-of-thought for grasping ontologically-veridical organic-knowledge articulated in any given <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality such that the wrong approach for prospective intellectual creation is one that simply lumps authorial articulations under given themes together in ‘mechanical association’ without factoring beforehand their respective ‘transcendental-enabling/sublimating/supererogatory–de-mentativity dynamism and implied organic-knowledge’ as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness. This equally underlies the pervasive disposition for misattributed and misfocused analyses as such blurry intellectual exercise become an <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-dispositions focussing less on the possibilities and insights of prospective elucidation and expansion of knowledge as of intrinsic-reality/ontological-veridicality as being the transcendental-enabling/sublimating/supererogatory–de-mentativity immortal/first-party, and turning more and
more and placing the stakes rather on authorial second-parties/mortals competing analyses even to the extent on occasion of undermining the intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity immortal/first-party. Further, such conceptual patterning will often fail to identify the appropriate point for grasping intrinsic-reality/ontological-veridicality as instead of emphasising apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness in (re-originary–as-unenframed/unbeholdening/outlier-conceptualisations) (imbued-postconverging/dialectical-thinking –‘projective-insights’/‘epistemic-projection-in-conflatedness ’–of-notional–deprocrypticism-prospective-sublimation) (originary/event–of-prospective-ontology-origination projection into existential-contextualising-contiguity’s–reifying/elucidating-of-prospective-relative-ontological-completeness–of–reference-of-thought–devolving-as-of-instantiative-context, it emphasises mere de-mentative/structural/paradigmatic patterns inducing apriorising/axiomatising/referencing–of-existential-contextualising-contiguity)–constitutedness, and so whether at detailing or synoptic levels of analysis. This extends to the way issues are raised, questions are posed, as well as their supposed resolutions; ultimately lacking in providing theoretical, conceptual and operant constructs of universal applicative pertinence, and explains a certain position of closure that holds that philosophy is just a vague thinking exercise. Furthermore, whereas an intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity construal highlights the ontological-contiguity of all knowledge as of their reference-of-thought-as-to-preconverging/postconverging–de-mentating/structuring/paradigming dynamic relationship, conceptual patterning seem to naively imply a discreet relationship of knowledge constructs with little insight of their intrinsic-reality/ontological-veridicality transcendental enabling ontological-primemovers-totalitative-framework interconnectedness as this is often not the
primary driving focus, as it is naively assumed that the conceptual patterning is a correspondence of intrinsic-reality/ontological-veridicality as of the mere de-mentative/structural/paradigmatic conceptualisation in apriorising/axiomatising/referencing-(of- existential-contextualising-contiguity)—constitutedness\(^{13}\) rather than striving to expand the transcendental-enabling/sublimating/supererogatory/de-mentativity ontological-primemovers-totalitative-framework\(^{73}\) existential-reality potential, and this easily leads to virtuality or ontologically-flawed construal. The defect of conceptual patterning is easily overlook mainly as philosophy is of first order knowledge, a level at which knowledge differentiation doesn’t easily manifest itself. Such errors of conceptual patterning will hardly arise in second-level knowledge where transcendental-enabling/sublimating/supererogatory/de-mentativity implications arise in a specular way. For instance, while hereditary is an underlying conceptual patterning idea in biology, it will be unthinkable to try to lump together and undermine the originality of subsequent hereditary notions of genetics on the basis that these are of the same conceptual patterning as earlier notions like Mendelian heredity as the transcendental-enabling/sublimating/supererogatory/de-mentativity differentiations are spectacular. Finally, one practical intellectual flaw arising out of such naïve categorising/taxonomising conceptual patterning has to do with a certain vague intellectual practice based on perceived intellectual pertinence in terms of the authorial ‘precedence of mentioned terms’ irrespective of association whether simple formalistic identifying of terms and notions with little consideration of the divergence of implied organic-knowledge as of their intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory/de-mentativity ontological-primemovers-totalitative-framework\(^{73}\) nature and differences as well as their divergence in meaningfulness-and-teleology\(^{100}\) implications. This again leads to lumping, artificial categorising and undermines originality and organic-knowledge, turning this into simplistic mechanical associations with the more serious consequence being that the more decisive notion for human
knowledge renewal as of maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality, becomes seriously undermined; as it refers to a transcendental-enabling/sublimating/supercerogatory-de-mentativity ontological-primemovers-totalitative-framework renewal of a same <amplituding/formative—epistemicity>totalising—devolved—purview-as-domain-of-construal—as-intrinsic-reality/ontological-veridicality but with such effort for renewal often laden with a tradition that is naively of apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—constitutedness undermining requisite creativity as of apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness, as it ‘critically presupposes beyond-the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-unthought> that prospective meaningfulness is deterministically tied down to a certain categorising/taxonomising relationship with the prior conceptualisations’ in the given <amplituding/formative—epistemicity>totalising—devolved—purview-as-domain-of-construal—as-intrinsic-reality/ontological-veridicality. Ultimately, the idea here is that approaching intrinsic-reality/ontological-veridicality with our given limited-mentation-capacity in other to achieve ontological-veracity requires a rather counterintuitive mental-reflex as of existential-contextualising-contiguity ’s-reifying/elucidating-of-prospective-relative-ontological-completeness—of—reference-of-thought—devolving-as-of-instantiative-context that ‘originally reconstructs the ontological-pertinence of axiomatic-constructs and their derived-conceptualisations’. Such an analytic insight as of a notional—deprocrypticism (protensive-consciousness deneuterising—induced)—reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness analysis as of its prospective relative-ontological-completeness—of—reference-of-
thought/ontological-normalcy, points out that actually, and according to this author’s view, such a currently discussed philosophical issue as the hard problem of consciousness arises as a result of a fragmented thematic construal as of apriorising/ axiomatising/referencing-(of- existential-contextualising-contiguity )—constitutedness wherein a more profound view of the philosophical enterprise as intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supernomatory—de-mentativity ontological-primemovers-totalitative-framework here hasn’t been entertain sufficiently to point out that effectively it is a problem that actually ‘devolves out’ of the more fundamental issue of Being as of its but is rather being posed as of a ‘disjointed/fragmented analysis’ as a consciousness grounded problem. This equally explains this author’s construal of human consciousness development as rather of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology; consciousness defined as of ‘notional <amplituding/formative—epistemicity> totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag human-subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence/intrinsic-reality/ontology-as-of-its-mimetic-echoness or existence-in-reverberation or existence-potency~sublimating—nascence,—disclosed-from-prospective-epistemic-digression. The fundamental fact is that existence as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness—reference-of-thought—devolving-as-of-instantiative-context is the absolute a priori of intrinsic-reality/superseding—oneness-of-ontology prior to any human derived knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional—referential-notions/articulations/virtue, and hence existence as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness—reference-of-thought—devolving-as-of-instantiative-context is the foundational absolute a priori any (given consciousness’s neuterising-induced-or-
deneuterising-induced-reference-of-thought-devolving-teleological-dementating/structuring/paradigming-of-meaningfulness constructs, by which our limited-mentation-capacity can most pertinently accede to by maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as of ontological-normalcy/postconvergence insight. Thus existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation implies it is as of the entire ‘confaltedness' for human construction of ontologically veridical meaningfulness-and-teleology implied as of notional-deprocrypticism; this is notionally known as historiality/ontological-eventfulness/ontological-aesthetic-tracing-perspective–ontological-normalcy/postconvergence-reflected-'epistemicity-relativism'. The implication here is that conceptualisations/construals not only of consciousness but virtue, aesthetics, episteme and nature together with their derived human notional amplituding/formative-epistemicity-totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag notions like psychologisms, ethics and moralities, arts, epistemologies and methodologies, and natural sciences are but as of the (given consciousness’s deneuterising-induced-or-deneuterising-reference-of-thought-devolving-teleological-dementating/structuring/paradigming-of-meaningfulness knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue as derived conceptualisations/construals of the very apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confaltedness that is as of Being-development/ontological-framework-expansion–as-to-depth-

Thus, the ontological-veracity as prospective relative-ontological-completeness—of-reference-of-thought of ‘the axiomaticconstructs of a (given consciousness’s neuterising-induced-or-deneuterising-induced)reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—ofmeaningfulness as from existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’<as-to-perspective—ontological-normalcy/postconvergence-implied—prospective-aporeticism-overcoming/unovercoming'> imbricatedness/threadedness/recomposing Generating knowledge-constructs/theories/intersolipsistic-interessory-notions/notional—referentialnotions/articulations/virtue implied as meaningfulness-and-teleology, is rather ensured by the construal of existential-instantiations as of maximalising-recomposing—for-relativeontological-completeness—unenframed-conceptualisation which is as of apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity )— conflatedness, thus enabling the ontological-contiguity—of-the-human-institutionalisationprocess. It is interesting to grasp here that we cannot from our ‘sense of conceptual patterning’ claim to put into question the inherent nature of existence—as-the-absolute-a-priori-of-
conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation

and as of its implied superseding—oneness-of-ontology, since existence is de-mentatively/structurally/paradigmatically precedent and our conceptual patterning is arising secondarily as of our shoddy-and-incomplete construal of the ‘iterating nature of existential-instantiations’ as of existence’s imbricatedness/threadedness/recomposing; and any such pretence of conceptual patterning is nothing but a virtuality or ontologically-flawed construal as of naïve apriorising/axiomatising/referencing—of-existential-contextualising-contiguity—constitutedness. Of course, it is rather prospective relative-ontological-completeness—of-reference-of-thought that will imply deeper ontological-veracity of the same underlying purview for the construal of meaningfulness-and-teleology—mental-disposition grounded on existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation

Insightfully and making the case against conceptual patterning as of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity of existential-instantiations, this points out that existence inherent superseding—oneness-of-ontology necessarily implies ontologically-veridical meaningfulness-and-teleology is effectively as of a natural transcendental-enabling/sublimating/supererogatory—the-mentativity existential-contextualising-contiguity—of-all-ontologically-veridical-meaningfulness ‘in wait’ to be elucidated however imbricated/threaded/recompusured such an exercise, explaining why our knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional—referential-notions/articulations/virtue of a given

For all the above elucidations highlighting the ontological-veracity implications of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness¹³ and apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness¹, it should be noted that emphasis is rather on the deficiency of limited-mentation-capacity in construing intrinsic-reality/ontological-veridicality such that the more profound/complete recomposuring of the very same⁴<amplituding/formative–epistemicity>totalising~devolved~purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality highlights/reflects in its subsuming interpretation the true deficiency of the shoddy/incomplete. This can be expanded upon as follows, the reason why relative-ontological-incompleteness⁵°of⁶reference-of-thought/epistemic-abnormalcy/preconvergence⁷/destructuring can only be construed with certainty-as-to-their-real-ontological-deficiency ‘rather as a constructed-deficiency of prospective relative-ontological-completeness⁸°of⁹reference-of-thought/ontological-normalcy/conflatedness’¹°lies in the fact that the construal/conceptualisation of an epistemic-totalising~devolved~purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality is ‘supposedly as of a perfect or near-perfect or relatively-perfect ontological correspondence between such human construed/conceptualised⁶°meaningfulness-and-teleology and the inherent ontological-
veridicality rather than ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’ as-of-failing-ontological-veridicality since a logical correspondence with intrinsic-reality/ontological-veridicality will be vaguely implied by mental-reflex; as is often the case with postlogism and conjugated-postlogism. By and large, this overall conceptualisation explains the nature of ‘notional constructs’ as implying a variance of poor-to-perfect ontological-performance of the same underlying idea conceptualised as of its perfect/near-perfect/relatively-perfect ontological-performance as in-sync/corresponding with inherent intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology of human construal/conceptualisation of it. This fully articulates the dynamic relationship of human limited-mentation-capacity as of its poor to perfect relationship-with/conceptualising-of existence-or-intrinsic-reality-or-ontological-veridicality; respectively as poor as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness and as relatively-perfect/near-perfect/perfect apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confatedness, construed as notional~confatedness as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness-to-confatedness of human limited-mentation-capacity. Consider in this particular regards the intrinsic-reality/ontological-veridicality reflected as akin to an engineering product like a jet engine wherein the conceptualisation is an incisive apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness that goes beyond the whole and parts of the jet engine to grasp a conceptualisation profoundness/completeness of required critical performances like fuel burn, maintenance cycles, robustness, etc. construed as of the articulated depth of the \textit{reference-of-thought of aircraft engine engineering science. This overall notional conception extends as well to the various ways by which human limited-mentation-capacity ‘accosts’ intrinsic-reality/ontological-veridicality, bringing about the various registry-worldviews/dimensions categorising/qualifying/tendentious/impulsive—ontologically-

That is, the notional–deprocrypticism protensive-consciousness in its referencing of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument in its referencing of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confledness\(^{3}\), with no intermediating construct as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confledness\(^{12}\) \(^{39}\) neuterising, thus achieves ontologically-uncompromised-mediating,-as-of-confledness\(^{12}\) \(^{6}\) meaningfulness-and-teleology\(^{10}\). While the occlusive/preclusive/warped/trepidatious-consciousnesses mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments by their successive intermediating categorising/qualifying/tendentious/impulsive constructs as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness\(^{1}\) on apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confledness\(^{12}\) induce their successively categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness\(^{3}\) \(^{6}\) meaningfulness-and-teleology\(^{10}\). This ultimately points to the centrality of the implications of the 'notion of limited-mentation-capacity’ as of its notional–deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-confledness\(^{11}\) as a notional conception in construing \(^{1}\) 'meaningfulness-and-teleology'\(^{10}\), while avoiding its ontologically-flawed apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness\(^{1}\) construals in terms—as-of-axiomatic-construct of the various \(^{9}\) neuterising. Hence the ‘notion of limited-mentation-capacity’ as it overcomes ontologically-compromised-mediating,-as-of-its-specific-constitutedness\(^{1}\) towards ontologically-uncompromised-mediating,-as-of-confledness\(^{12}\) is what is effectively and

In other words existence is already given rather as of its potency, and the real problem of existence is humankind’s access to existential possibilities as of humankind’s limited-mentation-capacity. That is, human transcendence-and-sublimity/sublimation/supererogatory~de-mentativity is what achieves existence as a ‘potent construct’, as the notion of existence-as-a-grounded-construct doesn’t-make-sense/is-unavailable for any specific human registry-worldview’s/dimension’s\(^5\) reference-of-thought as an <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^3\) construct, including our positivism–procrypticism registry-worldview/dimension, as this will falsely imply that our reference-of-thought <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^3\) is ‘developed enough’ as of Being-and-contemplation to have achieved the full potency of existence to then know what’s existence whereas in reality such <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^3\) highlights human-subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence. Thus our construal of existence can only be an ‘as of existence’ exercise that rather highlights human potential to transcend towards grasping existence/existential-possibilities; with that potency only instigated as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality for transcendence-and-sublimity/sublimation/supererogatory~de-mentativity. Interestingly, from our vantage positivism/rational-empiricism perspective, we’ll certainly construe the supposed intradimensional resolution of existential issues of prior relative-ontological-incompleteness reference-of-thought as of ontological-performance arising in recurrent-utter-uninstitutionalisation as intradimensional meniality-or-hyperbole and rather resolvable as of base-institutionalisation superseding projection/anticipation, and same with base-institutionalisation–ununiversalisation as intradimensional meniality-or-hyperbole and rather resolvable as of universalisation superseding projection/anticipation, and same with universalisation–non-positivism/medievalism as intradimensional meniality-or-hyperbole and rather resolvable as of positivism/rational-empiricism superseding projection/anticipation, but we won’t or hardly construe of the same as of our <amplituding/formative-epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag about our positivism–procrypticism as it being of intradimensional meniality-or-hyperbole and rather resolvable as of notional–deprocrypticism as preempting—disjointedness-as-of-reference-of-thought superseding projection/anticipation! institutionalisation-process\textsuperscript{68} or notional–deprocrypticism. Despite such a Derridean
decentered-infinite-freeplay conception being the most radical attempt hitherto to overcome the
philosophical tradition apriorising/axiomatising/referencing-(of-existential-contextualising-
contiguity)--constitutedness\textsuperscript{39}, it perfectly grasps the implications to \textsuperscript{59}meaningfulness-and-teleology\textsuperscript{100} ontological-performance -<including-virtue-as-ontology> of ‘centered–epistemic-
totalisation as of circularity of \textsuperscript{56}meaningfulness-and-teleology\textsuperscript{100} in relative deficient/flawed

However, it fails to grasp that such a centered–epistemic-totalisation itself arises
because an axiomatic-construct is a circularity of \textsuperscript{56}meaningfulness-and-teleology\textsuperscript{100} ontological-performance\textsuperscript{72}--<including-virtue-as-ontology> of the very same

mentating/structuring/paradigming–of-meaningfulness’ a centered–epistemic-totalisation is
rather the circular \textsuperscript{50}meaningfulness-and-teleology\textsuperscript{100} representation of the-very-same-

mentating/structuring/paradigming–of-meaningfulness’; and for all practical matters this has been the way Derridean deconstruction has been commonly applied as in effect all our meaningfulness-and-teleology\(^\text{10}\) ontological-performance\(^{12}\)-<including-virtue-as-ontology>

has been as of our positivism–procrystalcism registry-worldview’s/dimension’s \(^{14}\) reference-of-thought-as-of-

mentating/structuring/paradigming–of-meaningfulness’ horizon and such a Derridean decentered-infinite-freeplay is an inspired conception providing the groundwork as its initiates the centered–epistemic-totalisation exercise for the insight of a futural différance as of the latter’s transcendental–epistemic-totalisation that underlies apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity

confatedness\(^{12}\) in breaking with the philosophical tradition or human knowledge conceptualisation tradition or towards fulfilling the understanding of Being. In this regard talking about the physics example again, such a Derridean freeplay différance is akin to the ‘putting in question exercise’ that surrounds the cooperation/mutual-complementing-ideas-among-various-physicists leading up to the critical breakthroughs; which then establish such physics centered–epistemic-totalisation schemes as Newtonian physics and later on Theory-of-relativity and Quantum-mechanics, and today with respect to various theoretical efforts with the potential of leading to a physics Theory of Everything. Inherent to futural différance is the notion of \(^{4}\) <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{33}\), as of beyond-the-consciousness-awareness-teleology\(^{10}\)-<in-existential-extrication-as-of-existential-unthought>\(^{2}\), construed in the immediate-and-short-term as of ‘self-referencing’ as the uninstitutionalised-threshold\(^{103}\) temporal individuations circular undermining of the prospective institutionalisation \(^{8}\) reference-of-thought-as-to-postconverging–de-mentating/structuring/paradigming implied transformation/shift as transcendence-and-sublimity/sublimation/supererogatory–de-mentativity
as of prospective relative-ontological-completeness\textsuperscript{18} -of- reference-of-thought, as well as the idea of temporal individuations ‘syncretising’ that underlies a spiralling crossgenerational increasing undermining of the uninstitutionalised-threshold\textsuperscript{113} \textsuperscript{84} reference-of-thought which is in \textsuperscript{4}<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{13} with its ultimate crossgenerational collapsing for the prospective institutionalisation’s \textsuperscript{84} reference-of-thought; and so as of prospective social-stake-contention-or-confliction dynamism with increasing social universal-transparency\textsuperscript{11} \textsuperscript{104} ⟨transparency-of-totalising-entailing,-as-to-entailing-\textsuperscript{4}<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness⟩ as of prospective relative-ontological-completeness -of- reference-of-thought of the prospective institutionalisation’s \textsuperscript{84} reference-of-thought. Insightfully again, this idea of infinite-possibilities/circularity implied as of a Derridean infinite-decentered-freeplay of a given meaningful-frame/axiomatic-construct/model such as mathematical models/axiomatic-constructs circularity is familiar to physicists and other scientists who understand that there is no infinity in the real-world/existence and infinity showing up in mathematical models/axiomatic-constructs point to the fact that there is a circular or undefined or undecidable problem arising from poor human limited-mentation-capacity conceptualisation implying the given mathematical model/axiomatic-construct is in circular-existential-disjointedness-as-of-prior-relative-ontological-incompleteness\textsuperscript{39} as of the axiomatic-construct relative notional-discontiguity/epistemic-discontiguity\textsuperscript{63} -\textsuperscript{97}<shallow-supererogation -of-mentally- aestheticised~preconverging/dementing –qualia-schema> in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity )— constitutedness\textsuperscript{13}, and thus a need for a more ontologically-complete mathematical model/axiomatic-construct that as of human limited-mentation-capacity-deepening\textsuperscript{53} then resolves/overcomes the circularity/circular-existential-disjointedness-as-of-prior-relative-
ontological-incompleteness reflected in the prior mathematical model/axiomatic-construct by the infinities-as-circular-or-undefined-or-undecidable with a new mathematical model/axiomatic-construct in relative ontological-contiguity as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness, and so as of the very same <amplituding/formative–epistemicity> totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality; and so because human limited-mentation-capacity-deepening induces de-mentatively/structurally/paradigmatically grander human meaningfulness-and-teleology ontological-performance-<including-virtue-as-ontology> of human implicit-or-explicit constructed axiomatic-constructs of purviews/domains of construal-as-intrinsic-reality/ontological-veridicality, and this equally applies by extension to reference-of-thought-as-of—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to—‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’. It should be noted thus that an axiomatic-construct is as of an implied correspondence with the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to—‘human<amplituding/formative–epistemicity>totalising–purview-of-construal’ or <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality, and it supersedes and is defining of logic which is rather the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as reflected with any given explicited axiomatic-construct in the same way that insight/intuition is reflected rather with regards to any given implicited axiomatic-constructs; with an axiomatic-construct such as an idea or a concept or a notion or a theory being any conception as of meaningfulness-and-teleology of supposed existential-implications correspondence. That is the traditional knowledge conception
articulated as ‘axioms of logic’ is rather vague, with the appropriate articulation being rather ‘logic of axiomatic-construct/reference-of-thought’, as the axiomatic-construct/reference-of-thought is the effective human limited-mentation-capacity supposed correspondence relation with existence—as-the-absolute-a-priori-of-conceptualisation-and-existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation for human-subpotency possibilities for devolving meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, with increasing ontological-performance as of human transcendence; even though such a conception as ‘axioms of logic’ could be perceived rather as a meta-conception or more like a technical practicality akin to say the scaffolding of a building! In other words as the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, logic and by extension mathematics imply elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity, whereas axiomatic-constructs as reflecting ecstatic-existence/the-nature-of-the-world/conditions are construed in affirmation/projection/assertion/dueness-validating-logicising/suitable-measuring-instrument-validating-measuring as of postconverging-or-dialectical-thinking—apriorising-psychologism as of maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation. But then as of ‘ontology of logic’ and ‘ontology of mathematics’ as their very own respective conceptualised meta-axiomatic-constructs as ontologies in terms of reflecting their philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding—one-ness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity, and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’, both logic and
mathematics are construed practically as formalisations which are mainly as such constructs of faithful/reproducible syntaxisation on the supposed basis of ‘smarter and simpler articulations’ for the sake of succinctness, clarity and fungibility; however, without the implication of any other inherent transcendental-enabling/sublimating/supererogatory~de-mentativity of such formalisations besides their succinctness, clarity and fungibility usefulness ‘thus-limitedly construed as their inherent meta-conceptualised ontological-veracity/axiomatic-construct of logic and mathematics transcendental-enabling/sublimating/supererogatory~de-mentativity’. But then it is naïve to construe of mathematics, as logicists have tended to do, as essentially an exercise of mathematical formalisation. The fact is that mathematics have always been developed implicitly or explicitly in association with or inspired from the context/existential-contextualising-contiguity of other applied and transcendental-enabling/sublimating/supererogatory~de-mentativity activities as of their axiomatic-constructs development and mathematics very own existential-reality of developed axiomatic-constructs applicative orientation, including developing together with heavily dependent mathematics domains like physics, engineering, other applied sciences and statistical studies. This latter situation which is more real than generally said and makes of mathematics ‘a <amplituding/formative–epistemicity>totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality created axiomatic-constructs’ and more so than the ‘abstract romantic image portrayed as of the mere manipulation of numbers and forms’ as if not inspired as of existential-reality contextuality itself. Thus naively taking cue from the formalisation of mathematics as if it will enable the inherent transcendental-enabling/sublimating/supererogatory~de-mentativity of any discipline is bound to lead to disappointment, as the inherent axiomatic-constructs as theories, concepts, notions and ideas of the existential domain in question have to be critically developed as of existential-contextualising-contiguity knowledge-reification for logic and mathematics to then be
relevant as of a secondary tool or at best a concomitant tool. In this regards, the ‘truly mathematical proof’ (over and above any formal mathematical proof) is rather about sublimating-validation/desublimating-invalidation of any such mathematics as it can be so-demonstrable in the occurrence of existential phenomena/manifestations; even as such a mathematical demonstration is rather so ‘existentially nominal’ that such phenomenal/manifest veracity of mathematics is often for all practical purposes mostly overlooked by mathematicians when involved in their formalisation exercise including ‘formal proofs’ as to the fact that the existential sublimating-validation/desublimating-invalidation of mathematics is so nominally obvious that hardly any experimenting is warranted for confirmation and this existential nominalism can easily lead to a reductionist confusion that mathematics (as to its epistemic-conception phenomenal/manifest-subpotency-(in-transitive-conflatedness – reflexivity,-in-the-full-potency-of-existence’s–sublimating–nascence) with regards to the ontological-contiguity (~ of existence’) is not priorly subject to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation (~) (and this very insight about the ‘existentially nominal’ sublimating-validation/desublimating-invalidation of mathematics as of a ‘very existentially nominal supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument –for–conceptualisation as to the mere adequacy of formalised mathematics’ explains on the other hand why the mere introduction of mathematics, statistics and data in domains requiring ‘human corresponding-sublimation-inducing,-profound-and-creative supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-
apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument –for–conceptualisation’ is not construed as sublimating-validation in such domains where such mathematics, statistics and data are rather ‘distracting-from and not-contributing-to’ the
inherent domain’s epistemic-conceptions phenomenal/manifest-subpotencies-(in-transitive-conflatedness—reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence) given ‘human corresponding-sublimation-inducing,-profound-and-creative supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelligibility/setup/measuring-instrument—for-conceptualisation’). In physics the Newtons, Leibnizes, Einsteins, Poincarés, Schrodinger, Bohrs had to elicit the transcendental-enabling/sublimating/supererogatory-de-mentativity of the physics <amplituding/formative-epistemicity>totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality created axiomatic-constructs with mathematics being accessory to the transcendental-enabling/sublimating/supererogatory-de-mentativity. They didn’t just start to develop ‘patterns of mathematical equations’ without the prior insight about the physics domain-of-study and what to strive for, and actually from that ‘physics reality precedence perspective’ got the insight to further develop their relevant branches of mathematics. Nor do even pure mathematicians just go about constructing ‘mathematical patterns’ as of formalisation without striving to get insight and inspiration from existential-reality as transcendental-enabling/sublimating/supererogatory-de-mentativity; and we can appreciate in this regards how the human mathematical disposition adjust from a classical reflex with regards to existential phenomena/manifestations that assume a non-classical character like statistical-constructs, quantum phenomena, black holes, etc. as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’. The naivety of logicism lies exactly in this respect of construing formalisation as most of what is supposed to be achieved, and failing to grasp that when it comes to social reality its own transcendental-enabling/sublimating/supererogatory-de-mentativity has to be ‘creatively construed’, and this in many ways explains the frustrated conclusion that will often then arise from such a naïve formalisation perspective that the
philosophical exercise is not necessarily transcendental-enabling/sublimating/supern溢atory—de-mentativity, contrary to the precept of all other knowledge! Thus the conceptualisation of logic implied by any given registry-worldview/dimension—reference-of-thought—as-of—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to—‘human-amplituding/formative—epistemicity—totalising—purview-of-construal’ points to the fact that the various registry-worldviews/dimensions operate their own conception of logic as of their prospective relative-ontological-completeness—reference-of-thought; as we can appreciate inherently as of metaphysics-of-absence—implicated-epistemic-veracity-of—nonpresencing—<perspective—ontological-normalcy/postconvergence> that however deficient, that each registry-worldview/dimension does have its own sense of logic as of its self-conscious construed meaningfulness-and-teleology. The notion of an absolutely valid logic can only arise on the backdrop of an absolutely valid reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as implied by futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development—as-infrastructure-of—meaningfulness-and-teleology as of prospective deprocrypticism—or—preempting—disjointedness—as-of—reference-of-thought registry-worldview/dimension institutionalisation, wherein such a logic is its ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. In this regard, the link-up of all the concepts and notions articulated herein by this author speaks of ‘suprastructural logic’ that is critically articulated as of a prospective notional—deprocrypticism psychoanalytic-unshackling metaphysics-of-absence—implicated-epistemic-veracity-of—nonpresencing—<perspective—ontological-normalcy/postconvergence> and apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—
as of its implied notional-deprocrypticism’s apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness provides elucidation to such question as: what is the meaning of good/truth/essence in a recurrent-utter-institutionalised, an ununiversalised or a non-positivistic society? And invariably the answers will be a vague

metaphysics-of-presence—{implicated-nondescript/ignorable—void ’-as-to—presencing—absolutising-identitive-constitutedness }

Further, the fact is that it is rather axiomatic-constructs whether explicit or implicit that are supposedly in a correspondence relation with an epistemic-totalising—devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality as of their given meaningfulness-and-teleology ontological-
performance\textsuperscript{72} \texttt{-<including-virtue-as-ontology>} as validated by ontological-prime movers-totalitative-framework\textsuperscript{72}; so-construed as of the implications of human limited-mentation-capacity when developing axiomation-constructs, with the latter subject to their transcendence-and-sublimity/sublimation/superseding-one ness-of-ontology implied as of the full-potency of existence coherence/contiguity, are ontologically naïve and vague. Thus axiomatic-constructs ontological-veracity are dependent on relative ontological-contiguity\textsuperscript{77}; as axiomatic-construct/reference-of-thought in relative ontological-contiguity\textsuperscript{77} of \texttt{<amplituding/formative-epistemicity>totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality}. An axiomatic-construct is in such relative ontological-contiguity\textsuperscript{67} by its apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness\textsuperscript{12} as of the coherence/contiguity of superseding—oneness-of-ontology implied as of the full-potency of existence coherence/contiguity. An ‘axiomatic-construct/reference-of-thought of notional-discontinuity/epistemic-discontinuity/\texttt{<shallow-supererogation}-of-mentally-aestheticised~preconverging/dementing—qualia-schema> as of an epistemic-totalising—devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ highlights two points of failure/as-discontinuity of \texttt{meaningfulness-and-teleology} \textsuperscript{100} ontological-performance\texttt{<-including-virtue-as-ontology>}, having to do with its apriorising/axiomatising/referencing/intelligibility setup/measuring instrument unsoundness-or-ontological-bad-faith/inauthenticity\textsuperscript{64} and by derivation the
aposteriorising/logicising/deriving/intelligising/measuring; such that a more ontologically-
complete ‘axiomatic-construct/’ reference-of-thought in relative ontological-continuity as of the
very same <amplituding/formative–epistemicity> totalising–devolved—purview/domain-of-
construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ exists rather beyond the
scope of construal of meaningfulness-and-teleology of the prior ‘axiomatic-
construct/reference-of-thought of notional-discontiguity/epistemic-discontiguity
<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema> as of
the very same <amplituding/formative–epistemicity> totalising–devolved—purview/domain-
of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. Thus the
relationship between a prospective institutionalisation and the uninstitutionalised-threshold is
one of relative ontological-contiguity–by–notional-discontiguity/epistemic-discontiguity
<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema> of their differing references-of-thought as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality, as-to-‘human <amplituding/formative–
epistemicity> totalising–purview-of-construal’; for instance, with regards to the relative
ontological-contiguity of reference-of-thought implied as of base-institutionalisation over
the relative notional-discontiguity/epistemic-discontiguity <shallow-supererogation -of-
mentally-aestheticised–preconverging/dementing –qualia-schema> of reference-of-thought
implied as of recurrent-utter-uninstitutionalisation, as of their differing references-of-thought
and thus implied logic with regards to the-very-same-immanent-existence/intrinsic-
reality/ontological-veridicality, as-to-‘human <amplituding/formative–
epistemicity> totalising–purview-of-construal’, reflected as of relative mutual unintelligibility.
In axiomatic-construct terms, it is ‘mentally-unsound/preconverging-or-dementing —
apriorising-psychologism and by derivation illogical’ to be insisting on articulating notions of
relevance to the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs

Such mutual unintelligibility, with regards to reference-of-thought, speaks of differing ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as axiomatic-construct’ of the differing references-of-thought, with the traditional philosophical and knowledge anti-psychologism stance fundamentally grounded on a mix-up about the nature of ‘axioms wrongly construed as elements of logic’ as implied with statements like ‘axioms of logic’ rather than the fact that axiomatic-constructs are ‘ontological wholes of correspondence’ as of supposed correspondence with <amplituding/formative–epistemicity>totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality and thus carry transcendent-enabling/sublimating/supererogatory–de-mentativity implications as of human limited-mentation-capacity-deepening , whereas logic and logical analysis is rather the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ and at best yields formalisations grounded on the implied ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as axiomatic-construct’ but doesn’t reify meaningfulness-and-teleology as knowledge which can only arise as of the maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring as to postconverging or dialectical-thinking apriorising-psychologism of

Such a logicism disposition is rather in apriorising/axiomatising/referencing-{of-existential-contextualising-contiguity)—constitutedness and is behind such naïve contention that philosophy doesn’t carry transcendental implications and actually undermines other approaches that strive for transcendental-enabling/sublimating/supererogatory-de-mentativity by way of conceptual patterning arguments blinded to transcendental implications of knowledge as derived from existence—as-the-absolute-a-priori-of-conceptualisation—sublimating-withdrawal,-eliciting-of-prospective-supererogation—as-to-perspective—ontological-normalcy/postconvergence-implied—

prospective-aporeticism-overcoming/unovercoming’. In the bigger scheme of things, this author holds that the deepest ‘phenomenological transcendental-point-of-departure handle’ in the conception of meaningfulness-and-teleology ontological-performance —<including-virtue-as-ontology> as of transcendence-and-sublimity/sublimation/supererogatory—de-mentativity reflected by metaphysics-of-absence—implicated-epistemic-veracity-of-

nonpresencing—ontological-normalcy/postconvergence—is wholly sufficient as of human limited-mentation-capacity-deepening in accounting for ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-

‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’. This author phenomenological transcendental conception is articulated as of non-speculative, non-imaginary, theoretical, conceptual and operant implications construing/conceptualising in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity of the-human-institutionalisation-process, not as an external speculative dialectics, but as a wholly internal natural dialectics in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness as of human limited-mentation-capacity-deepening. Such that human phenomenological <amplituding/formative–epistemicity>totalising~thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance—<including-virtue-as-ontology>) is the ‘complete scientific archaeological depth’ for grasping ontology and Being as of the apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness of human limited-mentation-capacity implications construed from notional–deprocrypticism perspective as historiality/ontological-eventfulness/ontological-aesthetic-tracing—<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism>, and consequently doesn’t carry any external ideological implication but rather for the inherent ontological and Being implications. Further as of such phenomenological transcendental apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness, there is no issue about existence itself as it is pre-given, as existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency—sublimating–nascence,—disclosed-from-prospective-epistemic-digression, but rather an issue to humankind arising as of human-subpotency in the full-potency of existence with all the problem of existence being the issue of humankind’s limited-mentation-capacity implications as failing Being-development/ontological-framework-expansion—as-to-depth-of-
ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\(^{10}\) as of ontology’s-directedness-as-Being. The phenomenological insight here about the nature of ‘existence as so construed as of ontology’s-directedness-as-Being’ is that Being is the apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity \(^{39}\)—conflatedness \(^{12}\) as of intemporal-preservation-entropy-or-contiguity—or—ontological-preservation selectivity inherent in existence that rather skews presence states towards the ‘ontological statistical-exception’ of intemporality /longness over temporality/shortness possibilities, thus rendering existence as of relative teleological orderliness and not teleological chaos in the case were all ontological-possibilities as of temporality-to-intemporality were to be arising in equivalence/equal-measure. Thus, such ontology’s-directedness-as-Being apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity \(^{39}\)—conflatedness \(^{12}\) <amplituding/formative—epistemicity>causality-as-to-projective-totalitative—implications-of-prospective—nonpresencing—for-explicating-ontological-contiguity as of maximalising-recomposuring-for-relative-ontological-completeness\(^{88}\)—unenframed-conceptualisation existentially supersede abstract/imagined/misconstrued/virtual apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity \(^{39}\)—constitutedness \(^{13}\) possibilities as of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity implications that are effectively as of non-existence. The further implication is that human ‘prior existential-reality insight as arising by apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity \(^{39}\)—conflatedness \(^{12}\) as of the coherence/contiguity of ontology’s-directedness-as-Being’ rather ‘points to the ontological-veracity of prospective existential-reality as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity \(^{39}\)—conflatedness \(^{12}\) upholding prospective coherence/contiguity of ontology’s-directedness-as-

Ultimately, phenomenology is all about grasping the apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness of ontology’s-directedness-as-Being. Furthermore, just as a transcendental-enabling/sublimating/supererogatory—de-mentativity biological science in relative ontological-contiguity of reference-of-thought will dissociate modern-day heredity DNA genetics as of its theoretical, conceptual, methodological, operant and applicative implications from say th century Mendelian heredity however its inherent merits, and will not naively purport to analyse the former on the grounds of the latter which as axiomatic-construct is in relative notional-discontiguity/epistemic-discontiguity—<shallow-supererogation—of-mentally-
aestheticised—preconverging/dementing—qualia-schema> on the basis of a naïve conceptual patterning implied as of the common term ‘heredity’; this author likewise is very much critical and averse to such conceptual patterning mental-reflexes imbued in traditional non-transcendental philosophical and knowledge analysis all too ready to construe and articulate meaningfulness-and-teleology in sophistic/pedantic conceptual patterning terms overlooking transcendental-enabling/sublimating/supererogatory—de-mentativity implications, and failing to fathom that conceptual patterning is no substitute for transcendental-enabling/sublimating/supererogatory—de-mentativity work required for all knowledge notwithstanding setbacks and failures that may be involved, given the reality that human meaningfulness-and-teleology ontological-performance—<including-virtue-as-ontology> arises as an exercise of human limited-mentation-capacity-deepening as of relatively profound and complete axiomatic-constructs of reference-of-thought in ontological-contiguity of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to—‘human’amplituding/formative—epistemicity—totalising—purview-of-construal’ or <amplituding/formative—epistemicity>totalising—devolved—purview-as-domain-of-construal—
as-intrinsic-reality/ontological-veridicality! Consider for instance criticisms often levied against post-structuralism and specifically Derridean deconstruction as simply convoluted expressions of familiar and trite ideas. But then the effective transcendental-enabling/sublimating/supererogatory-de-mentativity insight as of their applications arising in the social sciences and literal studies clearly demonstrate otherwise. Further many such critiques have tended to be naïve about what passes for theory whereby naïve conceptual patterning of general knowledge are articulated devoid of ‘new theory’, with little or no transcendental-enabling/sublimating/supererogatory-de-mentativity implications, which in reality is nothing more than a sophistry of argument from authority. This conception of relatively profound and complete axiomatic-constructs/reference-of-thought in ontological-contiguity can equally be demonstrated in graphical terms as a problem ‘not along the curve created-by-human-limited-mentation-capacity’ in relative notional-discontiguity/epistemic-discontiguity -<shallow-supererogation-of-mentally-aestheticised-preconverging/dementing—qualia-schema> of axiomatic-construct but rather a problem arising as of the need for ‘a change of the curve to-be-created-by-deepening-human-limited-mentation-capacity’ in relative ontological-contiguity of axiomatic-construct for grander human meaningfulness-and-teleology ontological-performance -<including-virtue-as-ontology>, as of the very same -<amplituding/formative—epistemicity-totalising—devolved—purview—as-domain-of-construal-as-intrinsic-reality/ontological-veridicality. rise in consumers’ salaries implies that everything else being equal the demand curve-
axiomatic-construct will shift to the right as of relative ontological-contiguity\textsuperscript{67}. The notion of
axiomatic-construct in ontological-contiguity\textsuperscript{67} arises out of its existential completeness and
profoundness, for instance the axiomatic-construct in ontological-contiguity\textsuperscript{67} as concept of a
bicycle arises by the completeness and profoundness of the bicycle in its existential wholeness
of functionality and contents as its ontological-contiguity\textsuperscript{67}. Ontological-contiguity\textsuperscript{67} rather
highlights relative perspectives as of ontological-normalcy/postconvergence depths of
axiomatic-construct/ reference-of-thought of construal; which for instance renders the idea of
general relativity in relative ontological-contiguity\textsuperscript{67} and newtonian physics in relative notional-
discontiguity/epistemic-discontiguity -<shallow-supererogation -of-mentally-

notion of ‘continuity of ontology’ as is implied by ‘ontological-continuity as of relative
ontological-continuity and relative notional-discontiguity/epistemic-discontiguity -<shallow-
supererogation -of-mentally-aestheticised-preconverging/dementing -qualia-schema>’ will
seem to imply correlatedness by the very nature of the term continuity. Ultimately, the overall
analysis above points out that this is not an inherent ontological-as-of-the-full-potency-of-
existence’s–sublimating–nascence problem but rather a problem of human-subpotency as of its
limited-mentation-capacity that is resolvable by the deepening of human limited-mentation-

Likewise, on occasion in the face of prior institutionalisation established and perceived vested interest such intemporal-as-
ontological meaningfulness-and-teleology could be ontologically undermined as of institutionalised-being-and-craft. Consider in this regard Establishment efforts undermining the Diderot-led Encyclopédistes project. Furthermore, every registry-worldview/dimension relates to its value construct as of its prior relative-ontological-incompleteness of reference-of-thought apriorising/axiomatising/referencing-of-existing-contextualising-contiguity—constitutedness as more or less absolute, and doesn’t factor in that its prior relative-ontological-incompleteness of reference-of-thought is a de-mentative/structural/paradigmatic deficiency inducing the amplituding/formative—epistemicity totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of its value construct. But then prospective institutionalisation necessarily implies a notion of prospective value construct as of its prospective relative-ontological-completeness of reference-of-thought apriorising/axiomatising/referencing-of-existing-contextualising-contiguity—conflatedness which will be unintelligible to the prior value construct, such that it is only a sense of intemporal consummation that drives transcendental dispositions as it is paradoxical to expect that what is in need for transcendence-and-sublimity/sublimation/supererogatory—de-mentativity acts as transcended, as transcendence-and-sublimity/sublimation/supererogatory—de-mentativity is inevitably and so across all registry-worldviews/dimensions a state of paradoxical conflictedness as more profoundly involving a crossgenerational meaningfulness-and-teleology than a grounding conceptualisation! Furthermore, both the prior institutionalisation value construct and the prospective institutionalisation value construct are their respectively given centered—epistemic-totalisation-facticity of meaningfulness-and-teleology, with transcendence-and-sublimity/sublimation/supererogatory—de-mentativity conflictedly implying overriding the prior institutionalisation’s centered—epistemic-totalisation-facticity for the prospective institutionalisation’s centered—epistemic-totalisation-facticity. But then ontological—
contiguity is an empirical fact, and thus the resolution of this transcendence-and-sublimity/sublimation/supererogatory–de-mentativity paradox is rather reflected by the dynamics of human positive-opportunism as of human <amplituding/formative–epistemicity>totalising–self-referencing–syncretising/circularity/interiorising/akrasiatic-drag as social universal-transparency (transparency-of-totalising-entailing–as-to-entailing–amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness) avails with respect to social-stake-contention-or-confliction, wherein while in the immediate-and-short-term human ‘self-referencing’ will seem to imply that it is almost impossible to transcend from a given social conventioning centered–epistemic-totalisation facticity but crossgenerationally human ‘re-conventioning whether driven by a sense of pure-ontology as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality or otherwise with say cultural-diffusion’, as ‘syncretising-effecting’ on meaningfulness-and-teleology with respect to social-stake-contention-or-confliction induces human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. Consider in this regard historical transcendence-and-sublimity/sublimation/supererogatory–de-mentativity elicited by cultural diffusion whether with respect to trading or invasion or voyages of exploration. The fact is a social-setup is de-mentatively/structurally/paradigmatically a framework where individuals are naturally involved in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities, and thus individuals and social groups are not in an absolutely given/set self-referencing centered–epistemic-totalisation-facticity of meaningfulness-and-teleology within their social-setup and are predisposed on critical occasions as of syncretising-effecting to ‘reinvent’, circumvent or adapt as to what they perceive as optimum existential possibilities, such that a social-setup is
already involved internally however restricted in its very own reinvention/circumventing/adaptation as of its very own internal ‘self-referencing and syncretising-effecting construed as \(<\text{amplituding/formative–epistemicity}>\text{totalising–self-referencing-syncretising}\) of \(<\text{meaningfulness-and-teleology}>\text{meaningfulness-and-teleology}\) with regards to perceived social-stake-contention-or-confliction; and it is this element that enables all human societies to have a minimal opening/overture/receptivity to each other, including at the very extreme between an industrial age society and a hunter-gatherer society. Without such a de-mentative/structural/paradigmatic ‘self-referencing and syncretising-effecting construed as \(<\text{amplituding/formative–epistemicity}>\text{totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag}\) human nature’, both internal social transformation however lethargic and cultural diffusion will be basically impossible, and induced transformation arises because human perceived social-stake-contention-or-confliction drifts within-and-across social-setups whether with regards to basic trading, curiosity, social competition and generally as of a predisposition to achieve optimum existential possibilities. In this regard, the rapid transformation implications of cultural diffusion arise because it makes relatively immediately available to individuals and social groups a comprehensive set of options however limited the nature and speed of their adoption. This syncretising-effecting mechanism ultimately explains why crossgenerational transcendence-and-sublimity/sublimation/supererogatory–de-mentativity occurs notwithstanding a seemingly self-referencing centered–epistemic-totalisation-facticity of \(<\text{meaningfulness-and-teleology}>\text{meaningfulness-and-teleology}\) within a given social-setup in the immediate-and-short-term. Transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as of prospective relative-ontological-completeness\(^8\) of reference-of-thought occurs because de-mentatively/structurally/paradigmatically it is social-dispositions and mental-dispositions of
intemporal-as-ontological nature as of longness-of-register-of–meaningfulness-and-teleology given their supposedly coherent ontological-commitment^-implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality> as of more profound ontological-prime movers-totalitative-framework validation as to existence-potency ~sublimating–nascence,-disclosed-from-prospective-epistemic-digression, as re-originary–as-unenframed/unbeholding/outlier-conceptualisation~imbued-postconverging/dialectical-thinking –'projective-insights'/‘epistemic-projection-in-conflatedness ‘-of-notional–deprocrypticism-prospective-sublimation), that are most likely to be syncretised crossgenerationally as providing the most overall positive-opportunism by their relative universal projection implications and are formally-and-overtly assumed, and so over temporal-as-ontologically-flawed social-dispositions and mental-dispositions which are more or less formally-and-overtly unassumed as of their temporal denaturing nature or poor universal projection. However, such a conception of supposedly coherent ontological-commitment^-implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality> is not actively contemplated socially but occurs latently and passively with any given registry-worldview’s/dimension’s institutionalisation meaningfulness-and-teleology as its inherent social-dispositions and mental-dispositions are rather as of beyond-the-consciousness-awareness-teleology^-in-existential-extrication-as-of-existential-unthought> with regards to such transcendental implications! Despite the fact that all social-setups tend to be surreptitiously permeated with individuals temporal/shortness-of-register-of–meaningfulness-and-teleology social-dispositions and mental-dispositions of suboptimal ontological implications for social-functioning-and-accordance—as-of–social-stake-contention-or-confliction, every social-setup as a conventional-construct can only be held together in the
long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s reference-of-thought–categorical-imperatives/axioms/registry-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations. It may thus seem from within just one human generation perspective that the underlying human metaphoricity for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is rather marginal especially when not associated with any external cultural diffusion. However, human metaphoricity as of cultural transformation had tended historically, in the main, to ebb in peaks and lows, and so as of the relative universal-transparency –(transparency-of-totalising-entailing,-as-to-entailing-

We can consider in this regard that an animistic non-positivistic or medieval non-positivistic social-setup will certainly imply a supposedly coherent ontological-commitment ~implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality> respectively as of superstitious spiritualism meaningfulness-and-teleology or scholasticism pedantic dogmatism meaningfulness-and-teleology, as of the given social-setup ‘self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality with respect to its
social-stake-contention-or-confliction’ in its capacity to demonstrably and objectively uphold and function going by its specific registry-worldview/dimension as of superstitious spiritualism or scholasticism pedantic dogmatism. It is exactly this ‘self-assuredness-of-ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality with respect to its social-stake-contention-or-confliction’ that equally makes available the possibility for prospective metaphoricity to demonstrably undermine the implied supposedly coherent ontological-commitment of such prior social-setups registry-worldview/dimension meaningfulness-and-teleology, and so as of the prospectively induced ontological-prime-movers-totalitative-framework superseding meaningfulness-and-teleology as from existence-potency ~sublimating–nascence,–disclosed-from-prospective-epistemic-digression epistemic/notional–projective-perspective of relative-ontological-completeness of reference-of-thought by way of ontological-prime-movers-totalitative-framework such as with prospective positivism/rational-empiricism meaningfulness-and-teleology. However, given the inherence of social-stake-contention-or-confliction, inevitably prospective metaphoricity undermines vested interests as of the direct, indirect and/or devolving implications of prospective metaphoricity and by that token elicit sophistic/pedantic inclinations to such prospective metaphoricity. Further any such prospective metaphoricity ultimately takes hold rather as of within the social deferential-formalisation-transference framework wherein it is driven by a sense of positive-opportunism as of particular and general social interest. That said, a social-setup is ever always ‘existentially invested’ to a given registry-worldview/dimension and the fact of greater existential-contextualising-contiguity knowledge-reification from prospective metaphoricity which may involve undermining such ‘existentially invested’ registry-worldview/dimension in its

Ultimately, prospective metaphoricity, in a reflection of the individual-as-receptable-of-temporal-to-intemporal-individuations realistically implies that it is rather fundamentally a question of grasping the mechanism that tips the balance towards human intemporality /longness and subsequent prospective institutionalisation which is ontologically sufficient for prospective ontological-effectiveness, rather than a naïve engagement as if the human is all-essentially intemporal-disposition as to absolute ontological-commitment.<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-

More critically, such a conception of prospective metaphoricity cognisant of the decisiveness of deferential-formalisation-transference for institutionalisation and thus subsequent social percolation-channelling—in-deferential-formalisation-transference>, come to grasp that sophistic/pedantic predispositions are the more salient entrenched interests beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of-existential-unthought> with respect to prospective metaphoricity as of the implications of such undermining of social deferential-formalisation-transference. In this regard, the sophistic/pedantic barriers to futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism metaphoricity implications are necessarily spurious and associated with our positivism–procrypticism institutional-being-and-craft as of
the direct, indirect and/or devolving prospective metaphoricity\textsuperscript{57} implications. We can appreciate in this regard that for the medieval-scholasticism-pedants—ideal-type-or-individuation, it doesn’t matter that budding-positivism can be demonstrated as more ontologically pertinent as of ontological-primemovers-totalitative-framework\textsuperscript{2}, so long as it is socially and institutionally credible to uphold non-positivism meaningfulness-and-teleology\textsuperscript{100} in effect by undermining its deferential-formalisation-transference. It is with regards to such sophistic/pedantic disinclination to prospective metaphoricity\textsuperscript{71} that the latter elicits contortioning gesturing, wherein for instance Socrates with respect to the sophists—ideal-type-or-individuation (as we can appreciate that however say a Protagoras engagement with Socrates may project coherence as of his contextual appreciation of Socrates predisposition for coherence, this doesn’t exclude the possibility of a ‘floating sophistic’ inclination that simply adjusts to its interlocutor thus undermining in the bigger picture the notion of knowledge as of universal coherence idealisation, or still maybe Protagoras is just at the lower end of the sophists—ideal-type-or-individuation) and budding-positivists with respect to medieval-scholasticism-pedants—ideal-type-or-individuation (as we can appreciate that the recognition and then censure and then banning of Copernicus’s heliocentric world work or engagement with Galileo’s support of heliocentrism then his persecution for publishing, rather speaks de-mentatively/structurally/paradigmatically of the covert/underhanded nature of the medieval establishment pedantic disposition as of the implications of ideas undermining medieval dogma as of social-stake-contention-or-confliction) construe of such sophistic/pedantic disinclination as implying notional-discontiguity/epistemic-discontiguity\textsuperscript{10}<shallow-supererogation -of- mentally-aestheticised–preconverging/dementing –qualia-schema> with their prospectively implied metaphoricity\textsuperscript{7}; with the consequence that there can’t be common/mutual aposteriorising/logicising/deriving/intelligising/measuring as of dialogical-equivalence<as-to- psychologismic–apriorising/axiomatising/referencing-(of-existential-contextualising-

given the inherently confounding ontological-veridicality of human potent beyond-the-

Broadly speaking thus, the amplituding/formative–epistemicity>causality<as-to-projective-

implies that it is naïve to conceive of a ‘neuter framework of reference-of-thought putting the
notional–firstnaturedness—temporal-to-intemporal-dispositions<so-construed-as-from-

of-register-of–meaningfulness-and-teleology mental-disposition elevated-devolving-as-of-

thought–categorical-imperatives/axioms/registry-teleology beyond-the-consciousness-

is upholding reference-of-thought–categorical-imperatives/axioms/registry-teleology for
intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. Actually such an ordinary mental-reflex of a ‘neuter framework of reference-of-thought putting the notional–firstnaturedness—temporal-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence> as of the same axiomatic teleological projection’ when it comes to social-stake-confliction-or-contention is only valid as of ‘mutual conceptualisation as of a given institutionalisation with a common ontological-reference-of-thought’ wherein it is then strictly a matter of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation in determining ontological-veracity. But then at such a registry-worldview’s/dimension’s institutionalisation’s uninstitutionalised-threshold, there is a relative variance of ontological-completeness-of-reference-of-thought as of the prospective relative-ontological-completeness of reference-of-thought in intemporality/longness entailing the prospective institutionalisation and the prior relative-ontological-incompleteness of reference-of-thought in temporality/shortness entailing the uninstitutionalised-threshold; thus implying a relative variance in such intemporal and temporal teleological projection respectively as of elevated-devolving-as-of-prospective-institutionalisation and teleologically-degraded-devolving-as-of-uninstitutionalised-threshold in determining ontological-veracity. In this sense we can garner that it is inappropriate to imply a ‘neuter framework of reference-of-thought putting the notional–firstnaturedness—temporal-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence> as of the same axiomatic teleological projection’ and so, as of an uninstitutionalised-threshold and the prospective institutionalisation; given the variance of temporality/shortness rather as respectively in recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism-or-medievalism, and prospectively procrypticism–or–disjointedness-as-of-reference-of-thought with intemporal-longness rather as respectively in base-institutionalisation, universalisation,

ontologically-flawed totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag–temporal-mental-dispositions and storied background of ontologically-veridical-inherent-superseding-existential-reality-unattached-to-such-temporal-mental-dispositions portrays how a storied-construct/ontologically-valid-narration can be articulated as of beyond-the-consciousness-awareness-teleology\textsuperscript{100}–<in-existential-extrication-as-of-existential-unthought>\textsuperscript{6} ‘emphasising exclusively that it is the construal of human temporality\textsuperscript{99}–to-intemporality\textsuperscript{102} limited-mentation-capacity transversal- and-cumulative-implications’ that accounts for ontologically-veridical human character-and-social-formation-dynamics as of both uninstitutionalised-threshold\textsuperscript{103} representation and prospective-institutionalisation representation. Such a storied-construct/ontologically-valid-narration is ultimately articulated rather as of the implications of the failing to uphold Being as of the temporal-to-intemporal transversality<for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–’motif-and-apriorising/axiomatising/referencing’ of human limited-mentation-capacity in temporal apriorising/axiomatising/referencing–(of-existential-contextualising-contiguity )—constitutedness\textsuperscript{11} mental-reflexes at presence \textsuperscript{14} reference-of-thought, and so reflected by the implied intemporal apriorising/axiomatising/referencing–(of-existential-contextualising-contiguity )—conflicatedness\textsuperscript{12} of phenomenological transcendence-and-sublimity/sublimation/supercratory–de-mentativity as of notional–deprocrypticism. We can appreciate the metaphysics-of-absence–(implicated-epistemic-veracity-of–nonpresencing–<perspective–ontological-normalcy/postconvergence>) insight about such a deneuterising storied-construct/ontologically-valid-narration from the fact that a non-positivism/medievalism or animistic social-setup is ‘not committed in a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’ to positivistic/rational-empiricism \textsuperscript{56} meaningfulness-and-teleology\textsuperscript{100} with regards to
occurrences and incidents best explained and dealt with by such positivistic meaningfulness as of the latter’s prospective relative-ontological-completeness\textsuperscript{89}-of-reference-of-thought. As such non-positivism/medievalism or animistic social-setup ‘will not be self-effacing as of its ontologically-flawed <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag -temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about its uninstitutionalised-threshold\textsuperscript{83} of non-positivism and the prospective institutionalisation of positivism’. This equally explains how our positivism–procrypticism mental-disposition is construed in deneuterising\textsuperscript{16} from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} as of prospective notional–deprocrypticism perspective ‘as not self-effacing as of its ontologically-flawed <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag -temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about the uninstitutionalised-threshold\textsuperscript{83} of its procrypticism–or–disjointedness-as-of-reference-of-thought and the prospective institutionalisation of deprocripticism’. This is actually the ontologically-veridical phenomenological transcendental framework for construing/conceptualising human temporal character and social formation mental-dispositions as of uninstitutionalised-threshold\textsuperscript{101} and prospective-institutionalisation based on the dynamics of limited-mentation-capacity, unlike a naïve neuterising mental-reflex that by its <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag -temporal-mental-dispositions as-if-fails to attain such a apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness as of notional–deprocrypticism deneuterising\textsuperscript{16} insight. Central and critical to achieving such a deneuterising\textsuperscript{16} analysis in grasping the full and complete possibilities of
ontologically-veridical construal of human meaningfulness-and-teleology given human temporal-to-intemporal mental-dispositions as of prospective institutionalisation and uninstitutionalised-threshold is the notion of beyond-the-consciousness-awareness-teleology.<in-existential-extrication-as-of-existential-unthought>. It is exactly what renders a veridical ontological-escalation or aetiologisation of the human condition possible as the historiality/ontological-eventfulness/ontological-aesthetic-tracing of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness as of notional-deprocrypticism. It is most critical because at any registry-worldview/dimension, human self-consciousness is a mental-reflex as of being-only-in-institutionalisation-and-hence-only-of-a—meaningfulness-and-teleology—that-is-intemporal while defectively ignoring-and-undermining the veridicality of uninstitutionalised-threshold-and-its-assorted-and-conjugated-temporal—meaningfulness-and-teleology such that transcendence-and-sublimity/sublimation/supererogatory-dementativity is always perceived as unnatural when, in the sense that ‘it-is-others,-as-of-the-prior-registry-worldviews/dimensions,-that-have-an-uninstitutionalised-threshold-and-the-notion-of-transcendence-is-only-relevant-to-them-as-the-current-presence-is-normal’. The implications of such human mental-reflex as it overlooks human uninstitutionalised-threshold points to the reality that the implied prior institutionalisation ‘projected reflex of entailing—supplanting—conviction-as-to-profound-supererogation—of—attendant-intradimensional’-postconverging/dialectical-

Such that with regards to social-stake-contention-or-confliction possibilities the social psychological reference as of wrongly implied prior institutionalisation ‘projected reflex of entailing-\(\langle\text{amplituding/formative–epistemicity}\rangle\text{totalising–in-relative-ontological-completeness}\rangle\) supplanting-conviction-as-to-profound-supererogation —of-‘attendant-intradimensional’-postconverging/dialectical-thinking –apriorising-psychologism for ‘meaningfulness-and-teleology\(^{100}\)’ is an abstract social constraint to human temporal mental-dispositions. In practicality such human temporal mental-dispositions involve ‘rationalising threads of part-conviction-as-to-profound-supererogation –or–part–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\(^97\) perception-and-relation to 56 meaningfulness-and-teleology\(^{100}\) as of social-stake-contention-or-confliction constraints social-functioning-and-accordance of temporal postlogism\(^{78}\)-slantedness/\(^{77}\)ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of \(^84\)reference-of-thought\(^85\) devolving ontological-performance\(^72\)-\(\langle\text{including-virtue-as-ontology}\rangle\), and so as of beyond-the-consciousness-awareness-teleology\(^{100}\)-\(\langle\text{in-existential-extrication-as-of-existential-unthought}\rangle\) reflecting uninstitutionalised-threshold \(^{103}\) Being undervelopment; wherein with specific regards to a postlogism\(^7\)-slantedness/psychologism mental-disposition and less and less so as of temporal exacerbation/opportunism/affordability, such instigated part-conviction-as-to-profound-supererogation\(^97\) is rather as of a relevant generalised social projection as ‘\(\langle\text{amplituding/formative}\rangle\) wooden-language-\(\langle\text{imbued—temporal—mere-}\)

This operantly defines procrypticism–or–disjointedness-as-of-reference-of-thought as beyond just the construal of new supposedly intemporal reference-of-thought–categorical-imperatives/axioms/registry-teleology of the prospective institutionalisation to preempt the temporally denaturing reference-of-thought–categorical-imperatives/axioms/registry-teleology of the prior institutionalisation, but rather

Overall, the fact is that given that what is most relevant to the individual is the practicality as of their ‘rationalising threads of part-conviction-as-to-profound-supererogation\textsuperscript{97}–or–part–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\textsuperscript{97} perception-and-relation to \textsuperscript{56} meaningfulness-and-teleology\textsuperscript{100} over just abstract \textsuperscript{104} universal propositions, when it comes to social-stake-contention-or-confliction social-functioning-and-accordance constraints such temporal part-conviction-as-to-profound-supererogation\textsuperscript{97}–or–part–nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\textsuperscript{97} mental-dispositions tend to be ultimately translated decisively onto issues of public repercussions like corruption, mismanagement, nepotism, etc. It is very much naïve to imagine that as of such uninstitutionalised-threshold\textsuperscript{103} as of Being/ontological-framework-expansion underdevelopment, individuals in positions of social-stake-contention-or-confliction with respect to upholding/failing probity will simply adhere, at the exclusion of engrained-habits-and-mental-dispositions, to mere propositions of probity rather than in the face of weak-institutional-constraints-and-penalties to perceive such \textsuperscript{104} universal propositions as mere linguistic appendages of relative practical insignificance. The notion of beyond-the-
consciousness-awareness-teleology\textsuperscript{100} \话说-in-existential-extrication-as-of-existential-unthought\textsuperscript{5} is the effective and credible deneuterising\textsuperscript{16} enabling articulation that grasps such an ontologically flawed mental-reflex that recurrently permeates consciously and unconsciously human phenomenological mentation, as it ‘credibly’ grasps-and-accounts-for, without resorting to any neuterising, the full and complete possibilities of human mental-dispositions as of the exclusive dynamics of human limited-mentation-capacity across all registry-worldviews/dimensions involving the conjugation of the intemporal/longness-of-register-of-\textsuperscript{5} meaningfulness-and-teleology\textsuperscript{100} individuation and temporal/shortness-of-register-of-\textsuperscript{5} meaningfulness-and-teleology\textsuperscript{100} individuations of postlogism\textsuperscript{78} slantedness/ ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of \textsuperscript{5} reference-of-thought- devolving ontological-performance\textsuperscript{72} \话说-including-virtue-as-ontology>. Ultimately, the notion of beyond-the-consciousness-awareness-teleology\textsuperscript{100} \话说-in-existential-extrication-as-of-existential-unthought\textsuperscript{5} given its psychoanalytic-unshackling as of prospective deprocrypticism transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, points to a self-consciousness that should rather come to terms with the reality of human limited-mentation-capacity dynamics as of temporal-to-intemporal mental-dispositions resolved beyond just the notion of \textsuperscript{4} reference-of-thought- categorical-imperatives/axioms/registry-teleology\textsuperscript{100} but rather their protraction as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and- apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity) conflatedness\textsuperscript{12} of Being as implied as of deprocrypticism—or–preempting—disjointedness-as-of- reference-of-thought. The issue of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-
teleology of Being underdevelopment is associated with that of the construal of knowledge as organic-knowledge or mechanical-knowledge respectively; with the latter construed as of the ‘mere effecting possibilities of knowledge’ without a coherence/contiguity with the ‘knowledge inventing’ mental-disposition as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality behind the given knowledge, as implied with organic-knowledge. It is such a mechanical-knowledge as of ‘temporal/shortness-of-register-of—meaningfulness-and-teleology mental-dispositions towards the mere effecting possibilities of the knowledge’ that induces the forgetting of Being construed as ontology’s-directedness-as-Being, by undermining the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality upholding of intemporal-preservation-entropy-or-contiguity—or-ontological-preservation that is behind organic-knowledge. Human temporal mental-dispositions as of beyond-the-consciousness-awareness-teleology—are all too ready to construe of the comprehensiveness of knowledge as mere effecting possibilities of knowledge at the given institutionalisation’s uninstitutionalised-threshold in temporal/shortness-of-register-of—meaningfulness-and-teleology terms-as-of-axiomatic-construal as of the plainly implied opportunism with little consideration of the projective intemporal value dispositions behind the ‘knowledge inventing’ and its organic preservation. Thus the ontological-contiguity of-the-human-institutionalisation-process arises exactly to ensure deferential-formalisation-transference secondnaturising of knowledge as of organic-knowledge comprehensiveness. The following is enlightening in this regard. (For what it takes to get a medieval as non-positivistic mindset/ reference-of-thought into a positivistic mindset/ reference-of-thought, that is, suppose for instance where in a medieval

It is rather the crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring transforming of the non-positivism/medievalism mindset/ reference-of-thought into a positivistic mindset/ reference-of-thought that is ontologically-speaking to be construed as the postconverging–dementating/structuring/paradigming resolution of the vices-and-impediments\(^6\) arising from a non-positivism/medievalism worldview with respect to such notions-and-accusations-of-
sorcery. The same applies with respect to our positivism–procrypticism worldview and futurist

requirement that a recurrent-utter-uninstitutionalisation social-setup opportunistically grasping

diffused knowledge’ for an optimum accrual of the Being-development/ontological-framework-
expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-
and-teleology of recurrent-utter-uninstitutionalisation; that is, based on base-
institutionalisation’s ‘rulemaking-over-non-rules—apriorising/axiomatising/referencing—
psychologism’ enabling the superseding of recurrent-utter-uninstitutionalisation vices-and-
impediments as of its ‘non-rules—apriorising/axiomatising/referencing—psychologism, as-
impulsive-or-accidented-or-random-mental-disposition’. Such conceptualisation extends to all
registry-worldviews/dimensions prospective institutionalisation including our positivism–
procrypticism prospective transcendental emancipation to deprocrypticism. Underlying Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of—meaningfulness-and-teleology is the construal of knowledge in both its
‘immediate, cause-and-effect and non-blurry practical and scientific knowledge’ and the
‘detached, contemplative and blurry human social-construct of knowledge’. In many ways as of
meaningfulness-and-teleology\(^{10}\); as we can appreciate that despite the positivistic inclinations of the Copernicus, the Galileo and the Newton, the scientific advances that ultimately took hold arose because those budding scientists had a sense that the very ‘detached, contemplative and blurry human social-construct of knowledge’ background had to be superseded as of its scholasticism and mysticism underlying knowledge background for a positivism/rational-empiricism knowledge background to take hold as transcendental-enabling/sublimating/supererogatory-de-mentativity not only to science but transcendental-enabling/sublimating/supererogatory-de-mentativity as well to the open society equally required for the sound functioning of science. It is this dynamic relationship as of ‘immediate, cause-and-effect and non-blurry practical and scientific knowledge’ and ‘detached, contemplative and blurry human social-construct of knowledge’ that is behind Being-development/ontological-framework-expansion-as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{10}\) with respect to the prospective registry-worldview/dimension as resolving the vices-and-impediments\(^{10}\) of the prior registry-worldview/dimension. But then no matter the succession of institutionalisations as successive Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{10}\), there is an ever present issue of Being underdevelopment as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–‘notional–firstnaturedness—temporal-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor wherein institutionalising 54 reference-of-thought–categorical-imperatives/axioms/registry-teleology\(^{10}\) are always subject at uninstitutionalised-threshold\(^{10}\) to their denaturing\(^{15}\) as of their <amplituding/formative> wooden-language-{imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing}

given human limited-mentation-capacity is rather upheld by ontological-faith-notion-or-

institutionalisation, and involving the requisite deferential-formalisation-transference
secondnaturing of knowledge as organic-knowledge. We can appreciate the latter point in the
sense that with the development of various positivistic scientific and knowledge fields, the
knowledge agents weren’t naïve to imply that the ‘normal social temporal-to-intemporal

contribute in overall Being-development/ontological-framework-expansion–as-to-depth-of-

rather ontological-pertinence, and the point in reflecting holographically-<conjugatively-and-

as of institutional percolation-chanelling. This point is central and critical to the very notion of
society-as-social-construct, as society is caught between the notion of sovereignty as-allowing-
basic-level-of\textsuperscript{104} universal-individual-and-collective-self-affirmation-striving-for-social-
equality and the notion of knowledge as-of-selective-construal-of-social-value-and-

overriding-social-equality-for-the-sake-of-individual-and-social-emancipation-as-of-efficient-
ontological-performance\textsuperscript{71} -<including-virtue-as-ontology>-implications. The implication of this
dilemma is the reality that society is always subpar to a knowledge social determination as well as subpar to a sovereignty social determination. This dilemma is unavoidable by the very implications of a society: every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s reference-of-thought–categorical-imperatives/axioms/registry-teleology–aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations; such that the notions of knowledge and sovereignty can only be ‘socially effective’ within this articulated framework as enabled by ‘social universal-transparency–⟨transparency-of-totalising-entailing,-as-to-entailing–amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness⟩’. This articulation can be elucidated more explicitly in cases of cultural diffusion between societies of differing institutionalisation level as such cultural diffusion isn’t by a simplistic institutionalisation knowledge-level transference, but involves a mutual sense of sovereign selectivity and recognition among the societies, however the drive for cultural diffusion; thus allowing for ‘acculturating-indigenising-pidginising transitioning settings and their social constructions as of totalising–self-referencing-syncretising’ prior to eventual prospective relative-ontological-completeness–of–reference-of-thought accommodation. This is equally the knowledge and sovereignty dynamics that prevails within any given society. Thus, knowledge can effectively and efficiently be pushed forward but rather through an exercise of increasing ‘social universal-transparency–⟨transparency-of-totalising-entailing,-as-to-entailing–amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness⟩’ thus enabling ‘intemporal ontological-faith-notion-or-

However, all along this ontological-contiguity —of-the-human-institutionalisation-process \textsuperscript{15} a suboptimal relation between knowledge and sovereignty undermines Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—\textsuperscript{56} meaningfulness-and-teleology\textsuperscript{100} as of various pertinent social manifestations: —wherein sovereignty is affirm over knowledge as ‘supposedly being knowledge’ by a culture of mere social-aggregation-enabling of temporal-to-intemporal hotchpotch opinionatedness, notwithstanding the underlying transcendent-al-enabling/sublimating/supererogatory—de-mentativity in formal institutional percolation-channelling—\textsuperscript{<in-deferential-formalisation-transference>}, with the result that beyond the underlying implied institutionalisation-level such a social-aggregation-enabling hotchpotch opinionatedness culture tends to critically and decisively inform individual and collective thought and action in a manner that is suboptimal to intemporality\textsuperscript{57}—as-ontology as of the manifestation of such a temporal-to-intemporal hotchpotch culture in the extended-informality that permeates even formal institutions; —wherein by exploiting of temporal mental-dispositions as of individuals and the collective-social sovereignty, knowledge is undermined by wrongly implying the pertinence of social-aggregation-enabling construed as ‘exploitation

<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness).

The above analysis point out that transcendental knowledge in particular involves more than just knowledge as a grounded construct but as well an understanding of how such knowledge is instigated in society as part and parcel of the knowledge construed as organic-knowledge; given that the social-construct-as-society is not necessarily of immediate receptivity and is of a suboptimal disposition to such transcendental-enabling/sublimating/supererogatory–dementativity implications that are not priorly as of grounded constructs of knowledge. This will explain why the mere articulation of positivism/rational-empiricism meaningfulness-and-teleology constructs of knowledge wasn’t enough in undermining medieval mental-dispositions, and the persistent initiatives of the Copernicuses, Galileos, Rousseaux, Diderots, etc., were not vague actions but informed by an intuition about the nature of human society and how it develops given the inherently untransformable human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–‘notional~firstnaturedness—temporal-to-intemporal-dispositions<so-construed-as-from-
perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor as of human limited-mentation-capacity. Thus in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, crucially the issue of ontological-veracity is only half the problem of knowledge, with the other half being the grasp of the underlying sovereignty and knowledge dynamics as of eliciting ‘social universal-transparency’-{transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness }’.

As it is the latter that induces that social positive-opportunism for deferential-formalisation-transference and institutional percolation-channelling,<in-deferential-formalisation-transference>, as of social deferential attribution of power for the beneficial effect of knowledge as empowering various institutional domains. Further, as implying the superseding of entrenched grounded knowledge as of its psychoanalytic-unshackling implications and in destabilising the underlying existential reference-of-thought, transcendental knowledge is of a circular but consistent exercise of \(<amplituding/formative–epistemicity>totalising–renewing–realisation/re-perception/re-thought, and so due to the ‘existential and emotive commitments’ it is involved in undoing with regards to the implied prior notional-discontiguity/epistemic-discontiguity –<shallow-supererogation -of-mentally-aestheticised–preconverging/dementing –qualia-schema> reference-of-thought and introducing the prospective ontological-contiguity reference-of-thought as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to–human<amplituding/formative–epistemicity>totalising–purview-of-construal’. <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought implied as of prospective institutionalisation’s deneuterising. It should thus be noted that such a transcendental exercise is not about passing the test as of the judgment of uninstitutionalised-threshold mental-reflexes of which is ‘ontologically flawed and wanting’ but rather is as of a maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation intemporal-projection transcendental-enabling/sublimating/supererogatory-de-mentativity for prospective institutionalisation relative to such
reassert the ‘prior-or-old-as-now-uninstitutionalised ordinary-nontranscendental-reasoning’ over the ‘transcendental-reasoning-of-event’-as-prospective-ontology-origination’ is fundamentally due to the de-mentative/structural/paradigmatic lifetime ‘mental and existential investment’ in the former, such that by and large it is mostly a crossgenerational transcendence-and-sublimity/sublimation/supererogatory-de-mentativity that fully brings about the adaptation of the induced ‘transcendental-reasoning-of-event’-as-prospective-ontology-origination’ as the ‘new-as-of-the-prospective-institutionalisation ordinary-nontranscendental-reasoning’. Such a temporal/shortness-of-register-of-meaningfulness-and-teleology ontologically-flawed circular predisposition arises due to human temporal-dispositions as of Being underdevelopment that tends to lead to the beyond-the-consciousness-awareness-teleology denaturing of knowledge as mechanical-knowledge and undermining organic-knowledge; wherein knowledge is related to as of existential-extrication-as-of-existential-unthought, that is, knowledge related to as of ‘the mere positive-opportunism’ it engenders at best’ with little or no cognisance that there is an attitude/mental-disposition/care–and–episteme as of intemporality/longness behind ‘knowledge invention’ that must be preserved and perpetuated as ‘the very core of knowledge’ and so to undermine knowledge denaturing, so-construed as organic-knowledge. Organic-knowledge requires the articulation of meaningfulness-and-teleology rather in nonextricatory-existential-preempting-of-existential-unthought terms–as-of-axiomatic-construct as the profound-and-complete articulation of knowledge, and as the very attitude/mental-disposition/care–and–episteme behind knowledge that induces the appropriate psychoanalytic-unshackling for its reception. In other words, we can’t seriously contemplate a profound positivistic knowledge engagement with a non-positivistic as animistic or medieval mindset without the idea of priorly eliciting the appreciation-and-adopt of a positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-

<amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag. The point here is that the meaningfulness-and-teleology so-construed has to supersede the prior registry-worldview/dimension uninstitutionalised-threshold
perspective/framing/reference/horizon/projection for its prospective transcendence-and-sublimity/sublimation/supercratory-de-mentativity-enabling purpose, even if that implies being temporally unpalatable, given that the fundamental purpose for the underlying aetiolisation/ontological-escalation is of intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging-de-mentating/structuring/paradigming and not temporal extricatory preconverging-de-mentating/structuring/paradigming. Put another way, for instance, Newtonian physics doesn’t have any inherent meaningfulness-and-teleology as we can appreciate from a positivism/rational-empiricism perspective/framing/referencing/horizon with an animistic social-setup as of the latter’s attitude/mental-disposition/care–and–episteme underlying its meaningfulness-and-teleology thus requiring the latter’s prior apriorising-teleological-elevation-in-ontological-contiguity to a positivism/rational-empiricism attitude/mental-disposition/care–and–episteme ‘for the notion of the mutual contemplation of Newtonian physics to even arise’. This speaks of the centrality of attitude/mental-disposition/care–and–episteme with respect to human meaningfulness-and-teleology, as it is what underlies apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument as of a given registry-worldview’s/dimension’s institutionalisation reference-of-thought. Attitude/mental-disposition/care–and–episteme as such carries a registry-worldview’s/dimension’s ‘underlying sense of end-teleology/end-purposefulness’ and thereof its operative-construct and implicative-construct with regards to meaningfulness-and-teleology. It further implies a ‘the human toddling potential’ for living-as-of-human-personality-developing, social-projection-institutional-orientations and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-teleology; with the ‘human toddling potential’
attitude/mental-disposition/care–and–episteme; and so, whether such a framework is a reference-of-thought as of overall construal-as-existence/existential-possibilities, or within a reference-of-thought like a social projection amplituding/formative–epistemicity totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality or specifically with living-as-of-human-personality-developing.

For instance, with respect to coming across and living say in an early hunter-gather society with its interpretation of ill-health as of bad omen, we will still maintain an ‘assumed-and-unflinching transversality for-sublimating–existential-eventuating/denouement of affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing’ as of the attitude/mental-disposition/care–and–episteme of positivism’s/rational-empiricism’s perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation, at least as of our self-conscious awareness, even as this reflects mutual beyond-the-consciousness-awareness-teleology in-existential-extrication-as-of-existential-unthought as when we publicly pretend to act otherwise by subscribing to the interpretation within such a social-setup. As construed within a given reference-of-thought, say in our positivism/rational-empiricism reference-of-thought we can further have the conception of the physics or biology or law or literature or even just entrepreneur or accountant or technician specific attitude/mental-disposition/care–and–episteme, and further at the individual level as of changing attitude/mental-disposition/care–and–episteme with living-as-of-human-personality-developing. Attitude/mental-disposition/care–and–episteme as so-construed is critical fundamentally because the notionally inherent human capacity for aetiologisation/ontological-escalation is directly associated with ‘attitude/mental-disposition/care–and–episteme as dispensing-with-immediacy-for-relative-ontological-completeness by-reification/contemplative-distension (as of human self-surpassing—existentialism-form-

With regards to the second—level of social aetiologisation/ontological-escalation associated with ‘attitude/mental-disposition/care—and—episteme dispensing—with-immediacy—for-relative-ontological-completeness—by-reification /contemplative-distension^\(\circ\)’, for achieving

This notion of fulfilling a given prospective institutionalisation’s requisite attitude/mental-disposition/care–and–episteme\textsuperscript{5} underlies the very idea of intellectual-and-moral-inequivalence/non-correspondence as well as dialogical inequivalence/non-correspondence; as where one party does fulfils the attitude/mental-disposition/care–and–episteme\textsuperscript{5} of a given institutionalisation’s \textsuperscript{84}reference-of-thought as of prospective relative-ontological-completeness ’of-axiomatic-construct-or- reference-of-thought and thus its corresponding \textsuperscript{56}meaningfulness-and-teleology\textsuperscript{100}, and the other doesn’t as of prior relative-ontological-incompleteness’. This further explains why epistemic-breaks/epistemic-resetting arise with the successive prospective institutionalisations in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity\textsuperscript{67}—of-the-human-institutionalisation-process\textsuperscript{68}, wherein for instance the positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-
disposition/care–and–episteme of say a Galileo or Descartes is circularly beyond the contention framework of scholasticism meaningfulness-and-teleology, speaking of the impossibility of logical-congruence between the positivists and scholastics with only the utter dominance of positivism arising as of its ontological-primemovers-totalitative-framework induced positive-opportunism as of scientific, medical, technical advancements, free society, etc. that leads to the crossgenerational collapsing of scholasticism. It is interesting to note here that such positivist scholars were ‘never beholden to a convincing exercise with scholasticism but rather with intrinsic-reality/ontological-veridicality’, and for which purpose rather opted to create internally-coherent positivist networks and societies for the perpetuation of positivistic meaningfulness-and-teleology while averting its denaturing by wrongly implying notional-contiguity/epistemic-contiguity profound-supererogation-of-mentally-aestheticised-postconverging/dialectical-thinking–qualia-schema with scholasticism. But rather implying notional-discontiguity/epistemic-discontiguity shallow-supererogation-of-mentally-aestheticised-preconverging/dementing–qualia-schema given the latter’s flawed preconverging–de-mentating/structuring/paradigming as of prior relative-ontological-incompleteness reference-of-thought. The insight here is that more fundamentally knowledge is not about ‘interhuman negotiating or agreeableness’ but more critically about a third party validator known as ‘intrinsic-reality/ontological-veridicality’ which is the transcendental-enabling/sublimating/superrerogatory–de-mentativity above the mortals that are humans, and that the exercise of knowledge construction is rather an interhuman transversality exercise in search for the validation of the ‘superior party that is intrinsic-reality/ontological-veridicality as of ontological-primemovers-totalitative-framework’, and so beyond institutional-being-and-craft and social-aggregation-enabling amplituating/formative wooden-language–imbued–
grounding of ‘meaningfulness-and-teleology’ in terms—as-of-axiomatic-construct of prospective nonpresencing-<perspective–ontological-normalcy/postconvergence>. This brings home the reality that it is inevitable that all uninstitutionalised-threshold are necessarily ‘de-mentatively/structurally/paradigmatically conflicted’, with prospective transversality—<for-sublimating–existential-eventuating/denouement>—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’ ontological-prime movers-totalitative-framework being the critically fundamental determining arbiter of what will prospectively pass for knowledge rather than the naivety of logical-congruence of dialogue-equivalence—<as-to-psychologismic-apriorising/axiomatising/referencing—of–existential-contextualising-contiguity>—conflatedness—in-self-becoming/self-conflatedness /formative–supererogating at any such uninstitutionalised-threshold; as fundamentally the issues faced by the Descartes, Galileos, Diderots, etc. as of ‘budding-positivism/rational-empiricism attitude/mental-disposition/care–and–episteme’ are de-mentatively/structurally/paradigmatically fundamentally inevitable as of their articulation within a non-positivism/medievalism scholasticism context. This is the case since at a registry-worldview’s/dimension’s uninstitutionalised-threshold, such a framework of logical-congruence of dialogue-equivalence—<as-to-psychologismic-apriorising/axiomatising/referencing—of–existential-contextualising-contiguity>—conflatedness—in-self-becoming/self-conflatedness /formative–supererogating is de-mentatively/structurally/paradigmatically superseded, in the sense that every institutionalisation say for instance scholasticism scholarship has its ‘genuine intellectual engagement framework’ as of its underlying attitude/mental-disposition/care–and–episteme’ reference-of-thought supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for–conceptualisation, but then at its uninstitutionalised-threshold (as implied from prospective

Such a poor notion of scepticism operates by a spurious relationship with intellectual contentions that is susceptible to legitimise-or-delegitimise arguments however ontologically pertinent or impertinent as of concurrent ontological-primemovers-totalitative-framework, rather as of its commitment to incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation that in many ways could just as well validate <amplituding/formative> wooden-language-⟨imbued—averaging-of-thought⟩<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of-

As in effect, such ontological-bad-faith/inauthenticity\(^4\) scepticism fails to act as a ‘knowledge-growth-mechanism with regards to the perpetuation of knowledge coherence and pertinence’ as is the case with genuine intellectual scepticism, but is rather geared towards a dogmatic mandarinism and pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation that usurps the very notion of scepticism in \(^5\) incrementalism-in-relative-ontological-incompleteness\(^6\)—enframed-conceptualisation, and so as of the naïve implication that proceduralism is the substitute for existence/intrinsic-reality/ontological-veridicality as transcendental-enabling/sublimating/supererogatory–de–mentativity. Rather the attitude/mental-disposition/care–and–episteme\(^8\) of genuine intellectual scepticism is encrusted within the very notion of prospective relative-ontological-completeness\(^9\) of human meaningfulness-and-teleolgy, given human limited-mentation-capacity-deepening\(^10\). While genuine intellectual scepticism rather strives in a comprehensive intellectual credibility and scepticism framework as of prospective relative-ontological-completeness, ontological-bad-faith/inauthenticity scepticism avoids such constraining as it rather emphasises a predisposition for discreet, ‘ontologically unconstrained framework as of prospective relative-ontological-completeness’ and non-comprehensiveness, that rather allow for selectivity, incompleteness and perfidy passing for genuine intellectual scepticism. Effectively while genuine intellectual transformation involves dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, a perfidious ontological-bad-faith/inauthenticity scepticism involves eliciting a sense of immediacy and temporality/shortness as of wooden-language-(imbued—averaging-of-thought<-as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—’nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>) and untransvaluated–temporal-intemporal-social-chainism as ‘developed thought’, thus deflating the requisite dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension intemporal detachment/backstep for transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. In this latter respect, and for the possibility of prospective social transcendence-and-sublimity/sublimation/supererogatory-de-mentativity and emancipation, social practices at any given period as ‘becoming constructs’ are
not inherently ontologically sacrosanct by the fact that these are the outcome of preceding prospective relative-ontological-completeness as of preceding intemporal dispensing-with-immediacy-for-relative-ontological-completeness -by-reification /contemplative-distension, and by that very implication this is what carries the possibility of ‘inventing’ as-of-prospective-institutionalisation social practices as of prospective relative-ontological-completeness. ontological-bad-faith/inauthenticity ad-hoc pretences extolling social practices as of presencing—absolutising-identitive-constitutedness but of a poor conception outside the prospective relative-ontological-completeness behind such social practices ‘inventing’ as-of-prior-institutionalisation and so-implied as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of– meaningfullness-and-teleology, are but denaturing and down the line equally undermines prospective relative-ontological-completeness for the further emancipation of human social practices. As such ontological-bad-faith/inauthenticity ad-hoc pretences extolling social practices as of presencing—absolutising-identitive-constitutedness are of the same notional-contiguity/epistemic-contiguity kind that bathe in the aestheticised-postconverging/dialectical-thinking –qualia-schema kind that bathe in the wooden-language-averaging-of-thought as-to-leveling/ressentiment/closed-construct-of– meaningfullness-and-teleology as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications> and untransvaluated–temporal-intemporality social-chainism that implied as much about extolling social practices presencing—absolutising-identitive-constitutedness of existential-extrication-as-of-existential-unchought reasoning-from-results/afterthought attitude/mental-disposition/care–and–episteme of recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism and today’s positivism–procrypticism, with little prospect/opening for prospective transcendence-

Essentially and constructively, all intellectualism as of their intemporal job description as emancipative is to relay in uninhibited/decomplexified terms—as-of-axiomatic-construct the blunt reality of the social as this is the very attitude/mental-disposition/care—and–episteme⁵ that empowers prospective social emancipation however socially inconvenient it may sound; and so beyond habituated

The implication here is that ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality is rather about a ‘seeding promise of human-subpotency ontological-performance <including-virtue-as-ontology> equivalence/correspondence with the full-potency-of-existence’s—sublimating—nascence-as-of-its-coherence/contiguity’, but that reasoning-through/messianic-reasoning adduced transcendence-and-

Ultimately, this point out that epistemic-breaks/epistemic-resetting become inevitable wherein the prior knowledge episteme de-mentatively/structurally/paradigmatically loses its way as of its initial justification as safeguarding the prospective possibility of enlightening human knowledge as of ontology’s-directedness-as-Being, but then by its institutional-being-and-craft uninstitutionalised-threshold\textsuperscript{03} actually de-mentatively/structurally/paradigmatically beyond-the-consciousness-awareness-teleology\textsuperscript{14}.–in-existential-extrication-as-of-existential-unthought> undermines the prospective possibility of prospective enlightening human knowledge; and so, as increasingly the prior epistemic disposition is one that overlooks prospective inherent transcendental-enabling/sublimating/supererogatory–de-mentativity of meaningfulness-and-teleology ontological-performance\textsuperscript{77}.–including-virtue-as-ontology> turning rather towards social-aggregation-enabling implications as meaningfulness-and-teleology\textsuperscript{100} ontological-performance\textsuperscript{77}.–including-virtue-as-ontology>, undermining the very notion of the intellectual exercise as about developing/institutionalising the social and not kowtowing-to-it construed as charlatanism! Further in all such transcendental contexts despite the fact that the-new is derived
from the-old as for instance the Descartes, the Galileos, the Leibnizes and the Newtons as budding-positivists are the outcrop of Scholasticism itself, the-new epistemic-break/epistemic-resetting is justified in that even the-old is predicated on upholding Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of ontology’s-directedness-as-Being going by the human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming. Insightfully, that exercise is actually reflected as of temporal-to-intemporal individuations wherein the individual is rather a receptacle of temporal-to-intemporal individuations with variance of mental-dispositions among individuals an issue of variance as of skewness towards temporality/shortness or intemporality; such that even the budding-positivists carried elements of scholasticism but were more definitely of a positivistic outlook, and many scholastics articulated notions which could more fruitfully be developed in a positivistic outlook but were stifled by their scholasticism dogmatic intellectual commitments. In effect, human limited-mentation-capacity however the institutionalisation-level as of human-subpotency- aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional–firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective–ontological-normalcy/postconvergence’—existentialism-form-factor implies that it is impossible for the intemporal projection as longness-of-register-of—meaningfulness-and-teleology that prospectively construes of successive frameworks of ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness as of implicited-and-explicated—reference-of-thought—categorical-imperatives/axioms/registry-teleology—for-aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness—

Thus the ontological effectiveness of such intemporal-projection as longness-of-register-of—meaningfulness-and-teleology\(^{100}\) lies rather in undermining the existential possibility of the successive uninstitutionalised-threshold\(^0\)/uninsitutionalisations as of bringing about prospective relative-ontological-completeness\(^{88}\)-of—reference-of-thought driven by ontological-faith-notion-or-ontological-fideism thus inducing social \(^{106}\) universal-transparency\(^{\langle}\transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative—epistemicity>totalising—in—relative-ontological-completeness\rangle\) which renders untenable temporality\(^{99}\)/shortness as of the given uninstitutionalised-threshold\(^0\) instigated from the prior institutionalisation’s \(^{84}\) reference-of-thought—categorical-imperatives/axioms/registry-teleology\(^{100}\) denaturing\(^15\); as implied with base-institutionalisation prospective relative-ontological-completeness’-of—reference-of-thought over recurrent-utter-uninstitutionalisation, \(^{106}\) universalisation prospective relative-
enabling/sublimating/supererogatory-de-mentativity is not socially integrated directly as of an dimensionality-of-sublimating ({amplituding/formative}supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation) exercise engaging with intemporal-as-ontological meaningfulness-and-teleology. Such prospective intemporal-as-ontological meaningfulness-and-teleology is not necessarily perceived at the uninstitutionalised-threshold as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology as of the said uninstitutionalised-threshold. This point out that maximalising-recomposuring-for-relative-ontological-completeness unenframed-conceptualisation mental-dispositions in their intemporality /longness or longness-of-register-of meaningfulness-and-teleology are as of a projected-or-anticipated apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity) conflatedness of social universal-transparency {(transparency-of-totalising-entailing,-as-to-entailing-,<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness} for institutional and formal deferential-formalisation-transference as of percolation-channelling-<in-deferential-formalisation-transference>. That is at the uninstitutionalised-threshold such intemporal-as-ontological meaningfulness-and-teleology is pragmatically expounded socially not in terms of its inherent dimensionality-of-sublimating ({amplituding/formative}supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation) ideal which is socially-too-abstract but rather as a structuring/paradigmatic secondnatured construct of positive-opportunism as of institutional and formal percolation-channelling-<in-deferential-formalisation-transference> to attain social approbation. It is such a 'conflatedness structuring/paradigmatic secondnatured construct of positive-opportunism of institutional and formal deferential-formalisation-transference as of
percolation-channelling-<in-deferential-formalisation-transference> to attain social approbation’ that holds together in social universal-transparency -{transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising-in-relative-ontological-completeness } temporal-to-intemporal solipsistic mental-dispositions as of a given secondnatured institutionalisation. Out of such a apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)— conflatedness structuring/paradigmatic secondnatured construct, intemporal-as-ontological meaningfulness-and-teleology is not necessarily perceived as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology. In other words, the ideal articulation of base-institutionalisation meaningfulness-and-teleology in recurrent-utter-uninstitutionalisation, just as that of universalisation in base-institutionalisation–ununiversalisation, positivism/rational-empiricism in universalisation–non-positivism/medievalism, and prospectively notional–deprocrypticism in positivism–procrypticism; are only pertinent for attaining social approbation as of their apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)— conflatedness structuring/paradigmatic secondnatured construct of positive-opportunism of institutional and formal deferential-formalisation-transference as of percolation-channelling-<in-deferential-formalisation-transference>. This highlights that from the perspective of immediate-or-short-run social approbation, it is simpler though ontologically flawed as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)— constitutedness to engage a registry-worldview/dimension at its uninstitutionalised-threshold rather by an incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation mental-disposition on the basis of its prior relative-ontological-incompleteness of reference-of-thought or its same metaphysical framework of contention rather than adopting at its uninstitutionalised-threshold a more complex but ontologically-
performance in many ways necessarily has to project out of ‘ordinariness of thought’ for pretence of arriving at a sound construct capable of a most profound reflection of social ontological-veridicality. Consider with respect to a most profound emotional-involvement the issue of human imperilment as a test for the capacity for such requisite depth of transcendental contemplation. Consider for instance that tens of millions including soldiers killed in both the first and second world wars pass for mere victims of the wars in a bizarre twist of mutual totalising–synchronising/circularity/interiorising/akrasiatic-drag that shuts-off-the-mind to the odious reality of mutual genocide, to say the least. Consider that in Russia a dictator responsible for killing about 25 millions of his own citizens is still considered a national hero by the majority. Consider that the first president of the United States in position of power was a slave-owner thus encouraging the Atlantic slave trade that led to genocidal proportions of deaths but he is venerated by a majority as the greatest U.S. President. Consider in a different sense though non-exculpatory that Heidegger a leading intellectual joined the Nazi party leaving 2 years later with hardly any critical influence on the party and is universally condemned today. Consider as well that many an intellectual or public figure today actively or passively voiced for the recent wars killing millions whether in the Middle-East or elsewhere with a corresponding social indifference and mental shut-off. These profound considerations highlight the contemplative depth to which the social thinker needs to get to in order to truly be engaged in a transcendental-enabling/sublimating/supererogatory–de-mentativity ontological-primemovers-totalitative-framework construal as implied with notional–deprocrypticism as preempting–disjointedness-as-of-reference-of-thought and so be able to keep their head up from drowning in human <amplituding/formative–epistemicity>totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance)
<including-virtue-as-ontology>) in order to be able to produce ‘veridical ontology’ on a same parity as nature constrains on the natural sciences. Effectively, such transcendental insight points out that existence/existential-possibilities is inherently a radical ontology beyond our transmittable/formative–epistemicity totalising~self-referencing-synchronising/circularity/interiorising/akrasiatic-drag in existence/existential-possibilities as ‘hyperbolic pretences of ontology’. This author thinks that there can effectively be an engaging and constructive approach for arriving at such a depth of radical ontology warranted by existence/existential-possibilities that is transcendental-enabling/sublimating/supererogatory–de-mentativity for the social avoiding the platitudes of our times such that many an intellectual have even given up to ‘this all-powerful emotional-involvement element of the social’. Human transmittable/formative–epistemicity totalising~thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance -<including-virtue-as-ontology>) implies the need for a sound perpetuating construct of universal projection as intemporality or-longness-of-register-of–meaningfulness-and-teleology as the opportunity for prospective transcendental-enabling/sublimating/supererogatory–de-mentativity. Such a construct is a ‘response construal’ that inherently enables transformative universal implications as beyond presence issues and complexes as it sublimates presence out of its failure. This is unlike the all too frequent construct of ‘reactionary construal’ caught up in presence as it is presence-serving and so whether as of positive or negative reaction; as even as a positive act a reactionary construal is hardly of entailing- transmittable/formative–epistemicity totalising~in-relative-ontological-completeness thus hardly as of aetiologisation/ontological-escalation. A hero as of a positive ‘reactionary construal’ may perfectly prevent a crime from happening and save the day but then such action is not
dependable and the outcomes are unreliable as well together with the possibility on occasion of wrong judgement and/or wrong action or usurpation; thus the social construction of crime prevention needs an intellectualised social ‘response construal’ mechanism of universal implication that ensures dependability of crime prevention as of the foresight of law and policing management construed as of an intemporal-as-ontological intellectual projection exercise. This same depth-of-thought is warranted across the dynamic scope of the social including the political for true transcendental-enabling/sublimating/supererogatory-de-mentativity beyond normative conventioned constructs bound to hold-up the possibility of prospective ‘visions of humankind emancipation’. Such a depth of contemplation will fathom for instance that humankind appeared on earth about 100000 years ago but the pervasive de-mentative/structural/paradigmatic determinism of the nation-state which became common just about 500 years ago has been a source of much of humankind’s problems as of ‘reactionary construal’ and humankind’s apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness to the notion of nation-state seems to create an impasse for human Being-and-contemplative development. Consider again the possibility capable of arising as of a ‘response construal’ as effectively articulated by Derrida in his analysis of spirit. Derrida grasps that Heidegger strove to produce universal human meaningfulness-and-teleology but was caught up in the amplituding/formative–epistemicity–totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance—<including-virtue-as-ontology>) as spirit failed to universalise and so Heidegger couldn’t carry the effective implications of his work to its true universal conclusion as he was caught up in the ‘reactionary construal’ of them-and-us, as his commitment to the ‘us’ overlooked/didn’t-come-into-grips with what the ‘us’ was doing, not to mention the possibility of him actually acting as
transcendental over the them-and-us as a position of making a \textsuperscript{104} universal ‘response construal’. This problem isn’t particular to Heidegger but for the fact that the underlying regime of ‘us’ were the Nazis, as the them-and-us logic is intellectually rampant such that even Derrida was being condemned by many for not adopting it. The question can be asked whether any genuine intellectualism as providing a ‘response construal’ for humankind overall can construe of emancipation \textsuperscript{16} meaningfulness-and-teleology\textsuperscript{100} in them-and-us basis and whether this isn’t a recipe for potential disaster as all them-and-us rationale are just variances of the same insanity!

We can imagine that a true understanding and \textsuperscript{16} universal application of Derrida’s spirit insight as a ‘response construal’ could have educated thought-and-intellectualism and prevent say the subsequent Rwanda and Burundi genocides in Africa from occurring with many supposedly normal and educated persons caught up in the overall mobbishness; but such a lesson can hardly come out from the prevalent them-and-us lazy intellectualism ‘reactionary construal’ which simply provides \textsuperscript{45} <amplituding/formative–epistemicity> totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag comfort to protagonists by its lack-of or pseudo \textsuperscript{104} universal projection. Basically, a phenomenological extended metaphysics-of-absence-\{implicated-epistemie-veracity-of- nonpresencing-\langle perspective–ontological-normalcy/postconvergence\rangle\} as of notional–deprocripticism perspective points out that humankind does have the possibilities of adopting an uninhibited/decomplexified posture for ‘inventing’ a whole new renewal/re-perceiving/re-thinking beyond our apparently constricted metaphysics-of-presence-\{implicated-‘nondescript/ignorable–void ’-as-to- presencing-\textsuperscript{13} absolutising-identitive-constitutedness \} framework which in reality is just presence ‘hyperbolic dazing effect’ utterly distinct from the radical ontology possibilities of existence/existential-possibilities. Transcendence-and-sUBLIMITY/sublimation/\textsuperscript{18} supererogatory–de-mentativity as implied here is with regards to \textsuperscript{60} reference-of-thought/epistemic-totalisation level ‘\textsuperscript{84} reference-of-thought—devolving-
teleological-de-mentating/structuring/paradigming–of-meaningfulness’ which is the ‘ontologically veridical enabling notion of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality, as-to-‘human-amplituding/formative–epistemicity>totalising–purview-of-construal’ in epistemic-conflatedness as of underlying relative-ontological-incompleteness and relative-ontological-completeness reference-of-thought. Such a conceptualisation of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is actually what a Kantian transcendental imagination and other subsequent philosophies of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity it inspired would have strove to arrive at, but according to this author wrongly understood transcendence-and-sublimity/sublimation/supererogatory–de-mentativity rather as of ‘phenomenal-abstractiveness’ as the basis/grounding to then construe/conceptualise meaningfulness-and-teleology failing to factor in that ‘existential phenomenal-abstractiveness conflates-in-effecting-wholeness-as-of-profounness-and-completeness-to—meaningfulness-and-teleology all the way to consciousness as apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument for the possibility of meaningfulness-and-teleology to then arise on the basis of such a given apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’; given that it is consciousness that teleologically-registers/recognises phenomenal-abstractiveness as of meaningfulness-and-teleology in addition to the implications thereof with regards to the varying-as-transcending nature of consciousness with human limited-mentation-capacity-deepening arising in further apriorising/axiomatising/referencing-{of-existential-contextualising-contiguity}—conflatedness as of human maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation in an exercise of <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-

Thus the problem of the philosophical tradition is notionally one of erroneous apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness\(^1\), and this issue is recurrent-beyond-historiality/ontological-eventfulness\(^17\)/ontological-aesthetic-tracing-<perspective—ontological-normalcy/postconvergence-reflected—epistemicity-relativism’—with-the-latter-only-a-bi-manifestation-of-the-recurrence,—as-psychically-recurrent as of human shallow-to-deepening—limited-mentation-capacity,—as-limited-mentation-capacity-deepening\(^71\) due to inherent human temporality /shortness and intemporality\(^12\)/longness across all registry-worldviews/dimensions, and speaks of a human existential-extrication-as-of-existential-unthought disposition reflected as historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective—ontological-normalcy/postconvergence-reflected—epistemicity-relativism’ as of the
conflicatedness of the successive human consciousnesses ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’. Thus consciousness by its full development as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology speaks fundamentally of the entire narrative possibilities of the human species as of human sublimation-educing—textuality/hermeneutic/reprojecting/supererogating/zeroing–as-to-possibilities-of-self-becoming-as-of–‘existential-interpretation/epistemicity-in-apriorising/axiomatising/referencing-of-existence’. Such ‘consciousness apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)–conflicatedness of ‘meaningfulness-and-teleology’ is reflected by the signifying mirroring of ‘meaningfulness-and-teleology’ that is language as of its metaphoricity. Metaphoricity can thus be construed as the signification of articulated meaningfulness-and-teleology as of reference to existential-instantiation contexts adjunctively and not as naturally devolving into the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as signification of ‘reference-of-thought, such that metaphoricity is rather an ‘adjunctive incorporation’ to the ‘underlying totalising/circumscribing/delineating signifying-construct of language’. The ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as of its self-referencing ‘meaningfulness-and-teleology’ is always susceptible to the further deepening of human limited-mentation-capacity as of ‘totalising–renewing-realisation/re-perception/re-thought such that prospective ‘meaningfulness-and-teleology’ arises out of the adjunction to this ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and is adjoined to it as metaphoricity, with metaphoricity construed
as the signification implied as of syncretising-effecting \( ^5 \) meaningfulness-and-teleology \(^{100} \). Thus language effectively reflects the \(<\text{amplituding}/\text{formative–epistemicity}>\text{totalising–self–referencing-syncretising/circularity/interiorising/akrasiatic-drag} \)_ reality of human \( ^5 \) meaningfulness-and-teleology \(^{100} \), as language is always a blending of the ‘underlying \(<\text{amplituding}/\text{formative–epistemicity}>\text{totalising/circumscribing/delineating signifying-construct of language}’ with the apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness \( \) adjacency of its metaphoricity \( \). It is interesting to grasp here that a signifying-construct as signification of ‘the self-referencing of \( ^5 \) meaningfulness-and-teleology \(^{100} \)’ is always \(<\text{amplituding}/\text{formative–epistemicity}>\text{totalising/circumscribing/delineating and is effectively signifying a \( \) reference-of-thought as of \( ^5 \) reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’\( . \) Such centered- \(<\text{amplituding}/\text{formative–epistemicity}>\text{totalising/circumscribing/delineating \( ^5 \) meaningfulness-and-teleology \(^{100} \) construed as \( \) reference-of-thought, and its signification as implied by an ‘underlying \(<\text{amplituding}/\text{formative–epistemicity}>\text{totalising/circumscribing/delineating signifying-construct of language}’ necessarily has to do with the fact that \( ^5 \) meaningfulness-and-teleology \(^{100} \) is as of a ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment \(<\text{implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality}>\) as of ontological-primemovers-totalitative-framework \( ^3 \) \(<\text{amplituding}/\text{formative–epistemicity}>\text{causality~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity} \) and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as

But then an adjunctive-metaphoricity-signification so produced as reflected by ‘a transcendental syncretising-effecting meaningfulness-and-teleology’ like the construal of budding-positivism/rational-empiricism in medieval society, may turn out in-due-course/crossgenerationally to be of an even greater meaningfulness-and-teleology effect over the prior notion of the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and thus prospectively become the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’; and so as of accreting-substitutive-subsumption-as-futural-différance-freeplay, by SUBSUMING some significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ together
with some adjunctive-metaphoricity\textsuperscript{-}significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’, while ELIMINATING some significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and so together with some adjunctive-metaphoricity\textsuperscript{-}significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’, while ELIMINATING some significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’, and finally LEAVING-OUT some significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ and so together with some adjunctive-metaphoricity\textsuperscript{-}significations of the prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’, as its very own as the prospective ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ adjunctive-metaphoricity\textsuperscript{-}significations to which other adjunctive-metaphoricity\textsuperscript{-}significations could be incorporated adjunctively. Effectively, with the positivism/rational-empiricism self-referencing <amplituding/formative–epistemicity>totalising/circumscribing/delineating construct of meaningfulness-and-teleology\textsuperscript{5}, its adjunctive-metaphoricity\textsuperscript{-}signification can be construed as of the historiality/ontological-eventfulness /ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected–‘epistemicity-relativism’> of crossgenerational positivism/rational-empiricism reappropriation of the ancient mathesis\textsuperscript{10} universalis metaphoricity\textsuperscript{7} as its very own ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ ‘behind the instigative-drive for construing all human knowledge’ by such enlightenment thinkers like Galileo and ubiquitously with Descartes that rolled-over into later thinkers like Leibniz,
Newton, and ultimately subverted medievalism and scholasticism leading to our present positivism/rational-empiricism dominant totalising/circumscribing/delineating construct of meaningfulness-and-teleology as of existential-interpretation/epistemicity-in-apriorising/axiomatising/referencing-of-existence as of existential-stakes migration; since the existential dispositions of human subjects relative to social-stake-contention-or-confliction arises as of ‘their living existential-instantiations’, and where they construe meaningfulness-and-teleology as not self-referentially covered by the ‘underlying signifying-construct of language’, they will inevitably articulate adjunctive-metaphoricity-significations to that prior ‘underlying signifying-construct of language’. This explains the lockstep nature of human meaningfulness-and-teleology and language, with the latter as the former’s signification mirroring, such that institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-as-to-ontological-normalcy/postconvergence-reflected-as-epistemicity-relativism is actually as of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay construed here as of ‘intemporal ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality instigated ontological-contiguity—of-the-human-institutionalisation-process as of difference-conflicatedness—as-to-totalitative-reification—in-singularisation—as-so-the-nondisjointedness/entailment-of-prospective-non-presencing—as-veridical-epistemic-

<amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of languages’. In another respect with regards to language acquisition as mirroring a child’s existential integration into the dynamics of social-construct existential situations/instances, stakes, institutions and processes, a new born child existential integration into society, from its perspective, develops as of a dynamics of adjunctive-metaphoricity\textsuperscript{15}-significations in ‘significations accreting-substitutive-subsumption-as-futural-différance-freeplay construed here as the phenomenology of human language acquisition différance’ that fundamentally
mirror the child’s developing existential social relationships as an ordered process of social existential overtures constraining-and-cohering the child’s adoption-of/integration-with the supposedly ‘underlying amplituding/formative–epistemicity-totalising/circumscribing/delineating signifying-construct of language’ as of a peculiar, intuitive and dynamic developing metaphoricity where ‘both the child and members of the overall social-construct existentially adjust to each other as of spurious meaningful utterances like mutual babbling and baby-talk’ while implicitly converging towards the child’s adoption/integration at various stages of its existential development of the ‘underlying amplituding/formative–epistemicity-totalising/circumscribing/delineating signifying-construct of language’ as it is reflected by the dynamics of social-construct existential situations/instances, stakes, institutions and processes. But then as might be phenomenologically appreciated the notion of language as of its existential import is thus utterly dynamic as an overall signification construct that is never ‘absolutely present’ but rather ‘immensely existentially present’ with an ‘absolute language signification construct imagery rather implied as of projection/anticipation but not phenomenologically real’ explaining the concrete variation of individuals linguistic performance, as the phenomenonality of language is rather held together by ‘the given social-setup underlying supposedly coherent ontological-commitment implied–self-assuredness-of-ontological-good-faith/authenticity postconverging–de-mentating/structuring/paradigming as-being-as-of-existential-reality’ for its evolving-and-devolving construct of ‘meaningfulness-and-teleology’! Thus phenomenologically, ‘language arises, ebbs and flows as of a continuously-elusive individual and collective-social consciousness steering that reflects the amplituding/formative–epistemicity-totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag dynamics of individual and collective-social ‘meaningfulness-and-teleology’, and this equally explains why language evolves and
transforms over time. In effect, ‘language is never phenomenologically the complete possibilities of language as an absolute present conception but is rather a becoming as of an immensely-existentially-present signification reflected by individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. The above insight further points out the pertinence of construing-of and analysing language more completely as of human existentialism/thrownness/facticity, giving that language is more phenomenologically-and-pragmatically a signification accompaniment of ‘individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. This highlights the ‘knowledge implications as of accreting-substitutive-subsumption-as-futural-différance-freeplay\(^2\) with regards to such a phenomenological conception of language as a lockstep veridical reflection of human personality development all along the various existential stages as of a notion of the dynamics of social-construct existential situations/instances, stakes, institutions and processes from childhood to adulthood’, notwithstanding the fact that the privileged social conceptualisation of language is as of ‘language as the complete possibilities of language as of an absolute present conception usually of a privileged end-institution purpose’. Metaphoricity\(^1\) is thus rather construed as of its overall apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness\(^2\) of full consciousness development as of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology\(^10\) underlying human sublimation-educing—textuality/hermeneutic/reprojecting/supererogating/zeroing—of-to-possibilities-of-self-becoming-as-of—existential-interpretation/epistemicity-in-

Overall, human explicit and implicit signification as of language as articulated above is equally reflected in human aesthetics/arts like music and even science. Ultimately, human adjunctive-metaphoricity-significations apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confoundedness reflecting syncretising-effecting superseding of human self-referencing signifying-constructs as of the need to supersede the limited certitude as of human limited-mentation-capacity, inherently implies that the possibility for ‘absolute certitude as of its theoretical possibility’ lies with such an adjunctive-metaphoricity-significations apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confoundedness as of syncretising-effecting as ultimately converging towards a deprocripticism—or—preempting—disjointedness-as-of-reference-of-thought and so as of the prospect of an ontologically-veridical Theory of Everything, and insightfully with regards to elucidating the pervasiveness of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay’ construed as différance in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confoundedness’ associated with human existential grasp of knowledge as of the implications of its limited-mentation-capacity. The notion of accreting-substitutive-subsumption-as-futural-
différance-freeplay as underlying human limited-mentation-capacity induced différance highlights the phenomenological reality all along humanity’s existence of ‘the privileging of ontological-construction’ as from the perspective/framing/reference/horizon/projection of the end-purpose of the various relevant dominant social agencies and social institutions, and so as reflected as of humanity’s existence ^historiality/ontological-eventfulness^/ontological-aesthetic-tracing^<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism^>. While such a privileging as of immediate/instant existential implications like say parents and society privileging the conception of what is language in terms—as-of-axiomatic-construct of its end-purpose as of the perspective of the child’s integration in various social structures and institutions; however, in the bigger picture the fact that social structures and social institutions dysfunction as of human limited-mentation-capacity, point to the ‘ontological-veracity of fundamentally re-evaluating the pertinence of only-a-social-and-institutional-end-purpose-perspective/framing/reference/horizon/projection driven basis for ontological-construction’, and so as of a putting into question exercise. Ultimately, such privileged perspective/framing/reference/horizon/projection as of its ‘non-recording and negation’ of a ‘diverse-and-complete existential effecting possibilities accountability for ontological-construction’, and rather assuming the approach of a ‘select privileged ^historiality/ontological-eventfulness^/ontological-aesthetic-tracing^<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism^> ontological-construction’, instead incompletely portrays the operant reality of humanity’s existence as of the cumulation of successive humanity’s ^amplituding/formative–epistemicity^totalising–self-referencing-syncretising/circularity/interiorising/akrasiac-drag as implied with the various institutionalisations finalities. The implication here resonates with the idea that knowledge is much more than the construal of conceptual sublimation knowledge outcome, but rather its construal as notional–knowledge involving the dynamic understanding of both its temporality\(^7\)/misconstrual/desublimation and intemporal\(^8\)-as-ontological-construal as of accreting-substitutive-subsumption-as-futural-différence-freeplay involving specifically disambiguation as of human limited-mentation-capacity dynamics as of deneuterising\(^5\)—referentialism and thus beyond ‘neuterising’ reflecting the difference-in-nature/difference-in-apriorising-or-axiomatising-or-referencing\(^3\) of the uninstitutionalised-threshold\(^3\) and the prospective institutionalisation; as the ‘effecting implications of knowledge’ are more than just about its conceptualised intemporal\(^2\)-as-ontology but involves grasping this together with the implications of temporality\(^9\), and so because of the circular existential implications of human limited-mentation-capacity. Hence language can be more pertinently construed ontologically as of the social dynamics of existential\(^5\) meaningfulness-and-teleology\(^10\).

transcendental-freeplay différance’ is what is meant to be understood as a relatively more pertinent ontologically depth for such a more evolved and ‘experimental’ articulation of différance in the strive to maximally undermine implied in the Glas experimental project which goal is well beyond the two texts but more fundamentally a demonstration of ‘sublimation-educing—textuality/hermeneutic/reprojecting/supererogating/zeroing—as-to-possibilities-of-self-becoming-as-of-’existential-interpretation/epistemicity-in-apriorising/axiomatising/referencing-of-existence’ as multifaceted. Ultimately, ‘Derridean quasi-transcendental-freeplay différance’ unsuspectingly points out that meaningfulness-and-teleology imply by default a given perspective/framing/reference/horizon/projection, such that as of a facet it is then already compromising nonpresencing—or—withdrawal—or—metaphysics-of-absence (implicated-epistemic-veracity-of nonpresencing—<perspective–ontological-normalcy/postconvergence>)—or—transcendental-reasoning-of-event—as-prospective-ontology-origination meaningfulness-and-teleology facet. Thus, this author holds that such a ‘Derridean quasi-transcendental-freeplay différance’ is fundamentally incomplete as of comparison with the implied apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness of accreting-substitutive-subsumption-as-futural-différance-freeplay which is truly transcendental. The former fails to factor in that human limited-mentation-capacity has to establish the appropriate ‘perspective/framing/reference/horizon/projection implications’ with regards to meaningfulness-and-teleology, and so as disambiguating presencing—absolutising-identitive-constitutedness from nonpresencing—<perspective–ontological-
normalcy/postconvergence> by their respective supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument –for–conceptualisation, such that unsuspectingly the ‘Derridean quasi-transcendental-freeplay differance’ not doing that rather represents the \( \text{presencing—absolutising-identitive-constitutedness} \) as the common perspective/framing/reference/horizon/projection for both, thus falsely pointing to ‘difference-in-kind/difference-in-aposteriorising-or-logicising’ between \( \text{presencing—absolutising-identitive-constitutedness} \) and \( \text{nonpresencing—<perspective—ontological-normalcy/postconvergence>} \) (rather than difference-in-nature/difference-in-apriorising-or-axiomatising-or-referencing), and so contradictorily as if both are of the presencing supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness–of-apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument –for–conceptualisation. With the reality that \( \text{nonpresencing—<perspective—ontological-normalcy/postconvergence>} \) is wrongly-and-unsuspectingly given as of common \( \text{presencing—absolutising-identitive-constitutedness} \), thus inducing a relative ontologically-flawed quasi-transcendental freeplay as \( \text{nonpresencing—<perspective—ontological-normalcy/postconvergence>} \) is rather in notional-discontiguity/epistemic-discontiguity <shallow-supererogation–of-mentally-aestheticised–preconverging/dementing–qualia-schema> when analysed as of \( \text{presencing—absolutising-identitive-constitutedness} \). Consider in this regard ‘the very same physics \( \text{amplituding/formative–epistemicity} \) totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ with the articulation as of prior relative-ontological-incompleteness being ‘traditional classical mechanics axiomatic-construct’ and the articulation as of prospective relative-ontological-completeness–of-axiomatic-construct-or-reference-of-thought being the theory-of-relativity-together-with-quantum-mechanics—
relativity-together-with-quantum-mechanics—axiomatic-constructs interpretation as of nonpresencing-<perspective–ontological-normalcy/postconvergence>. In any case thus such a ‘Derridean quasi-transcendental-freeplay différance’ doesn’t have any serious ontological consequences with respect to presencing—absolutising-identitive-constitutedness since it is reflected with the Glas experimental project, but it fails to recognise the possibility of a futural différance where meaningfulness-and-teleology is construed as of the prospective nonpresencing-<perspective–ontological-normalcy/postconvergence> supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of- apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument –for– conceptualisation which points to a prospective relative-ontological-completeness/ontological-contiguity as of the very same <amplituding/formative–epistemicity> totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality; even though it is the first step towards such a futural différance transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. It equally explains such a Derridean conclusion that human sublimation is an always evasive notion given its failure to recognise the difference-in-nature/difference-in-apriorising-or-axiomatising-or-referencing as of the transcendental implications of prospective nonpresencing-<perspective–ontological-normalcy/postconvergence> in inducing sublimation, with such a difference-in-nature/difference-in-apriorising-or-axiomatising-or-referencing arrived at by human limited-mentation-capacity-deepening as of de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) involving ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of- existential-reality driven re-projection/re-anticipation as of prospective apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument about
metaphoricity thus perfectly satisfies the ‘foreboding concern for ontological-veracity’ critically pursued by the Derridean freeplay différance, as it is existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation that phenomenological validates transcendence-and-sublimity/sublimation/supererogatory de-mentativity, and so implying human limited-mentation-capacity-deepening; and thus, this point that enables the Derridean freeplay différance as of tendential-deliberation-of-decidability to achieving transcendence-and-sublimity/sublimation/supererogatory de-mentativity is the full apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—confatedness reflecting existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation in its nonpresencing—in perspective—ontological-normalcy/postconvergence>, and so beyond just a Derridean freeplay différance which is then in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness as not factoring in the process of a tendential-deliberation-of-decidability towards attaining transcendence-and-sublimity/sublimation/supererogatory de-mentativity. Insightfully, we can grasp that the Derridean freeplay différance becomes as of apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness because ‘reasoning itself has become defective’ as presupposing-by-the-Derridean-freeplay to supersede existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation: So because at the point of
transcendence-and-sUBLImity/sUBLimation/Supererogatory—de-mENTativity reasoning is still presupposing thought-determination instead of given up to the possibility of existence’s divulgence construed as ontological-faith-notion/ontological-fideism, and so erroneously become the transcendental-signifier of existence despite the reality of human limited-mentation-capacity which priority at that point should be the need for validation from existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation <as-to-perspective—ontological-normalcy/postconvergence—implied—‘prospective-aporeticism-overcoming/unovercoming’> and not make any determination priorly, even as of freeplay. Furthermore, it is wrong to construe/equate as imagination such ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality that as ‘hunch’ restores existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation <as-to-perspective—ontological-normalcy/postconvergence—implied—‘prospective-aporeticism-overcoming/unovercoming’>, since in reality it is rather pushing reasoning to its very limits in a notional disposition that is not guaranteed, and only occasionally as of tendential-deliberation-of-decidability is it confirmed by existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression as validatable by ontological-primemovers-totalitative-framework. Thus behind ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and—apriorising/axiomatising/referencing—as-so-being-as-of-existent-reality as ‘hunch’ is a transversality—<for-sublimating—existential-eventuating/denouement>—of-affirmative-and—unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’ depth of reasoning and perspective which is pushed to its brink in projection/anticipation/expectancy. The fact is ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-

In this regard we can imagine as of ‘the very same physics’<amplituding/formative—epistemicity>totalising—devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, the strange feeling upon physicists wedded to ‘traditional classical mechanics axiomatic-construct’ with respect the prospective theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs—maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation articulation of such ideas as space-time, considering the ether as unreal, considering that the laws of physics are different at atomic scale, etc. as the fundamental basis for understanding the new physics as of its prospective relative-ontological-completeness—of—reference-of-thought. Such a construal as a shift in axiomatic-construct is more-or-less within the same positivism/rational-empiricism registry-worldview, though it might pretty much be argued that the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs marks the beginning of a proto-postmodern science as of the fundamental human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation—<as-to-the-nondisjointedness/entailment-of-prospective—nonpresencing> developments in physics since then, even though its meaningfulness-and-teleology remains
intelligible, more or less, to the positive science essentially by the modern conception of observational and experimental validation. However, the idea of requisite shift in attitude/mental-disposition/care–and–episteme from that simplistic ‘modern conception’ cannot be contested. Such an attitude/mental-disposition/care–and–episteme implied shift as articulated above, construed as of an overall registry-worldview/dimension reference-of-thought transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is rather ‘massively distressing’ when implied ‘as of an instant of transitioning’ since the reality of such attitude/mental-disposition/care–and–episteme transitioning have tended to take place rather crossgenerationally as of human beyond-the-consciousness-awareness-teleology<sup>100</sup>-<in-existential-extrication-as-of-existential-unthought>. As we can now imagine the transitioning of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme from earlier crude conceptualisations of positivism/rational-empiricism as presently reflecting a more universal valid notion of positivism/rational-empiricism as of its spread worldwide and profoundness in today’s societies. Interestingly, this transitioning nature of human attitude/mental-disposition/care–and–episteme renewal manifestation as of the social collective evolution, and is equally reflected in the individual as-receptacle-of-temporal-to-intemporal-individuations-ontological-performance <including-virtue-as-ontology>; as at any given moment individuals and society are rather inclined to adopt an attitude/mental-disposition/care–and–episteme of dual-language/split-mentality as of <amplituding-formative–epistemicity>totalising–thrownness-in-existence<sup>14</sup> (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance<sup>72</sup>-<including-virtue-as-ontology>). The implied notion of human emancipation is always being articulated in an existentially dual-language/split-mentality that on the one hand fails the implied emancipation and on the other hand implies a strife for such emancipation. Consider in this regard, the
attitude/mental-disposition/care–and–episteme of warring nations in the early 20th century all too ready to arm themselves massively in preparation for the world wars and equally very much aware of the need for international peace, or in the 18th and 19th centuries the dual-language/split-mentality of universal human rights and ending slavery in the new world and the slave trade on the one hand and on the other still practicing it up to the point of wars like the American civil war to bring an end to it. In a more prosaic note, the dual-language/split-mentality associated with the evasiveness of emancipatory social and political dispositions as of relevant settings and contexts. In fact, this author will surmise that in many ways we already carry inklings of postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme as of the dual-language/split-mentality at appropriate contexts and settings extolling our liberality with progressive stakes while in other secluded settings and contexts espouse a damning language regarding such progressive stakes. The idea of requisite attitude/mental-disposition/care–and–episteme renewal as implied for notional ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality induced transcendence-and-sublimity/sublimation/supererogatory—de-mentativity speaks of a ‘reality as of underlying human beyond-the-consciousness-awareness-teleology—<in-existential-extrication-as-of-existential-unthought>’, that reflects a human tacit awareness that the grounding of its meaningfulness-and-teleology is not-certain-as-absolute at any given moment, and that it should be prepared to shift its attitude/mental-disposition/care–and–episteme for more profound-and-complete meaningfulness-and-teleology. While such an inclination is more forthcoming as of less profound-and-perceived personal existential implications with regards to the axiomatic-constructs within a reference-of-thought as
articulated priorly with a shift for the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs within the positivism/rational-empiricism reference-of-thought, however, as of more profound-and-perceived personal existential implications as drastically implied at the phenomenological depth of reference-of-thought transcendental conceptualisation this turns out to be much more difficult to countenance given individuals ‘mental and existential investment’ into meaningfulness-and-teleology as grounded on a given ‘registry-worldview’s/dimension’s reference-of-thought <amplituding-formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag established existential–epistemic-totalisation-of meaningfulness-and-teleology as well as the ‘psychological comfort’ habituated at the given neuterising. But then every registry-worldview/dimension has its own specific hurdle to clamber-over and that of futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of meaningfulness-and-teleology as of prospective notional–deprocrypticism is exactly the capacity to construe meaningfulness-and-teleology as of full/complete human consciousness implications as implied by its protensive-consciousness which ultimately doesn’t allow for meaningfulness-and-teleology beyond-the-consciousness-awareness-teleology <in-existential-extrication-as-of-existential-unthought> arising as of human prior relative-ontological-incompleteness-of reference-of-thought. The fact is the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness implication with respect to existence-potency~sublimating–nascence, disclosed-from-prospective-epistemic-digression is such that in reality we are always tacitly aware of the evasiveness of absolute certainty but often rather inclined as of practicality to hang on to a delusion of the results of prior nonpresencing-<perspective–ontological-
normalcy/postconvergence> as if of absolute certainty, so-construed as reasoning-from-results/afterthought. But then veridical absolute certainty is ever a promise always held in prospective existence-potency18~sublimating–nascence,-disclosed-from-prospective-epistemic-digression relative-ontological-completeness48 of apriorising/axiomatising/referencing, and so as of the certainty of human limited-mentation-capacity prospective relative-ontological-completeness48–of-axiomatic-construct-or-49 reference-of-thought49. <amplituding/formative–epistemicity> causality~as-to-projective-totalitative–implications-of-prospective-normalcy/postconvergence> as if of absolute certainty, so-construed as reasoning-from-results/afterthought. But then veridical absolute certainty is ever a promise always held in prospective existence-potency18~sublimating–nascence,-disclosed-from-prospective-epistemic-digression relative-ontological-completeness48 of apriorising/axiomatising/referencing, and so as of the certainty of human limited-mentation-capacity prospective relative-ontological-completeness48–of-axiomatic-construct-or-49 reference-of-thought49. This explains why ontology’s-directedness–as-Being is the direction of 5meaningfulness-and-teleology100 grounding as always prospective as of prospective relative-ontological-completeness48–of-axiomatic-construct-or-49 reference-of-thought; and so, of the successive base-institutionalisation, universalisation, positivism and notional–deprocrypticism registry-worldviews/dimensions nonpresencing–<perspective–ontological-normalcy/postconvergence> respectively as successive 5meaningfulness-and-teleology100 grounding for recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, and positivism–procrypticism 80presencing—absolutising-identitive-constitutedness13. Interestingly we can appreciate that the attitude/mental-disposition/care–and–episteme as of relevant existential issues of all the prior registry-worldviews/dimensions reference-of-thought are wanting-as-relatively-ontologically-flawed from our positivism–procrypticism as prospective perspective/framing/reference/horizon/projection of 5meaningfulness-and-teleology100. However, we are hard-pressed to concede that from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of– 5meaningfulness-and-teleology100 as of prospective 1deprocrypticism–or–preempting—
than any other prior non-constructed meaningfulness-and-teleology simply because of the profoundness of its phenomenological depth of projection/anticipation in the quest for ontological-prime movers-totalitative-framework validation, which ordinary wooden-language—imbued—averaging-of-thought—leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—nondescript/ignorable—void—doesn’t even bother contemplating about by its incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation reflex of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity as of existence’s presencing—absolutising-identitive-constitutedness. This social knowledge human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation insight translate the reality that ‘conventioning and tradition grounded critiques’ of postmodernism fundamentally misconstrue that they are departing, as of their reference-of-thought, from a less real position to evaluate a more real position; more like the irony of trying to evaluate the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs from a posture of ‘traditional classical mechanics axiomatic-construct’. Here is what fundamentally underlies the naïve misunderstanding of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. For instance, the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs actually reflects that priorly conceptualised-notions like ‘space’, ‘time’, ‘ether’ and ‘the laws of physics at atomic scale had to be the same as at the macroscale’, were all wrong. Thus ‘speaking of the reality of human limited-mentation-capacity as of its existential analytic capacity’ in a state of prior relative-ontological-incompleteness-of-
reference-of-thought. It is human limited-mentation-capacity-deepening as of prospective relative-ontological-completeness of reference-of-thought as subsequently assuming as more real the notion of ‘space-time’, ‘considering the ether as unreal’, ‘considering that the laws of physics are different at atomic scale from the macroscale’, etc. that as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation exercise brought about the more profound insight enabling the conception of the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs ultimately validated as of ontological-primemovers-totalitative-framework by existence-potency—sublimating–nascence,—disclosed-from-prospective-epistemic-digression; as all along humankind existence as of human-subpotency, the new reality so-espoused ‘is never about existence in itself as-existence-is-given-whatever-it-is-that-is-given’, but about human limited-mentation-capacity-deepening for human emancipation. Thus implying existence-potency—sublimating–nascence,—disclosed-from-prospective-epistemic-digression is ‘not really about any variation as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation as of human limited-mentation-capacity-deepening bringing about a more profound and complete grounding for human construing of the full-potency of existence, which remains-whatever-it-is-ultimately. The postmodern insight here is rather that what is relevant to humankind is human-subpotency development towards the abstract full-potency of existence-whatever-it-is-ultimately. So the

That naivety in failing to grasp this lies in the ontologically-flawed mental-reflex of temporal <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag , wherein mental-dispositions operate by default without a double-gesturing, on the ‘wrong assumption that they already have the most ontologically-developed perspective/framing/reference/horizon/projection for grasping prospective meaningfulness-and-teleology; and failing to project/anticipate prospectively
the implications of their very own shallow limited-mentation-capacity implications from a
deeper prospectively-construed perspective/framing/reference/horizon/projection. Such a
‘modern take’ is susceptible to construe of the presence as of metaphysics-of-presence
(implicitned-nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive-
constitutedness )/illusion-of-the-present/present-consciousness/mirage, with hardly any
contemplation of the retrospective and prospective projective-insights for construing
ontologically-veridical meaningfulness-and-teleology. This paradox for human knowledge,
as implied with the postmodern double-gesture reification, highlights that the human
preconverging/postconverging–de-mentating/structuring/paradigming for construing knowledge
is similar to H.G. Well’s country of the blind narrative, with the more critical issue being about
‘human blindness which needs to be resolved first before proceeding to see’, as what is to be
seen as of the world is already given-whatever-it-is, and our true issue-as-of-knowledge is to
develop the necessary human-subject-emancipatory-relativism-driven-recomposuring-
constructivism-towards-singularisation-as-the-nondisjointedness/entailment-of-prospective-
nonpresencing limited-mentation-capacity-deepening to see it. This fundamentally
underlies the idea of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument/‘reference-of-
thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ as
underlying a given registry-worldview’s/dimension’s reference-of-thought for
meaningfulness-and-teleology conceptualisation and ontological-performance-
<including-virtue-as-ontology>. In registry-worldview/dimension terms, the naivety of ‘failing
to recognise that human limited-mentation-capacity deepens by human-subject-emancipatory-
relativism-driven-recomposuring-constructivism-towards-singularisation-as-the-
nondisjointedness/entailment-of-prospective- nonpresencing’ paradoxically and
ridiculously amounts rather to construing of a prospective registry-worldview/dimension
institutionalisation’s reference-of-thought as of its prospective relative-ontological-completeness’s reference-of-thought in terms of the prior registry-worldview/dimension uninstitutionalised-threshold’s reference-of-thought as of its prospective relative-ontological-completeness’s reference-of-thought. The argument traditionally made about postmodern-thought as ‘sceptical with regards to ontologically-flawed-metanarratives/ideologies and the lack of objectivity of meaning’ is a wrongly articulated/made argument ontologically, since it is being wrongly articulated/made from the ‘modern perspective/frame/reference/horizon’ which is actually in prior relative-ontological-incompleteness’s reference-of-thought as of a shallower limited-mentation-capacity (as to ‘redounding/wavering/waveforming—of-the-referencing-and-the-devolved-referencing-imbued-ontological-performance—<including-virtue-as-ontology> as to presublimation and nascent-sublimations overlapping-contiguity-of-referencing-and-devolved-referencing’ associated with historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition) and thus has to be decentered-as-preconverging-or-dementing–apriorising-psychologism.

Rather the ontologically-veridical articulation of the postmodern argument as of its actual prospective relative-ontological-completeness’s reference-of-thought which has to be prospectively centered-as-postconverging-or-dialectical-thinking–apriorising-psychologism over the modern take as prospectively decentered-as-preconverging-or-dementing–apriorising-psychologism, should be affirmatory in articulating that postmodern-thought is about: the appraisal and supplanting of ontologically-flawed-metanarratives/ideologies including socio-econo-political ideologies and ontologically-flawed professed ideologies like demarcating ontological-flawed-ideology-of-science-and-its-distortive-implications from ontologically-veridical-science-in-practice, and its pursuit for the most profound-and-complete objectivity of meaning as of prospective relative-ontological-completeness’s reference-of-thought by renewing appraisal of intrinsic-reality/ontological-veridicality by human-subject-
emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing as of human-subpotency existential-contextualising-contiguity apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness", and it is much more than just a naïve notion of a multiplicity of narratives as wrongly implied from the modern take of <preconverging~'motif-and-apriorising/axiomatising/referencing’–imbuing>—existentialising—enframing/imprintedness—(as-to-historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition) necessarily subject to ontological-bad-faith/inauthenticity as of the modern’s take prospective uninstitutionalised-threshold of procrypticism or disjointedness—as-of-reference-of-thought in many ways explaining the difficulties of Derrida and Foucault in effectively qualifying their thought postures (when each was asked whether they were poststructuralist) underlied/organised respectively by messianicity and parrhiesia but rather postmodern-thought is of a prospective ‘relative-ontological-completeness re-originary—as-unenframed/unbeholdening/outlier-conceptualisation—(imbued-postconverging/dialectical-thinking—‘projective-insights’/‘epistemic-projection-in-conflatedness’—of-notional–deprocrypticism-prospective-sublimation) appraisal of human narratives as to dimensionality-of-sublimating—(<amplituding/formative>supererogatory—dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation) thus implying rather a notional–deprocrypticism institutionalisation ‘unenframed/unbeholdening/bechancing–supererogation parameterisation/reparameterisation (reflecting-a-supererogatory—decisionality-of-socioinstitutional-conceptions—as-to—‘their-nascent-sublimations-dynamic-preempting-of-presublimatory-decisionality–numbing-traction–desublimation’)—as-so-operationalising—‘scalarisation-as-to- rescalarisation-as—re-ontologisation’. The implication here is that hitherto postmodern-thought had been naively and
falsely conceptualised within the ‘modern take attitude/mental-disposition/care–and–episteme’
as of its procrypticism–or–disjointedness-as-of reference-of-thought, instead of implying the
ontologically-veridical ‘subverting of the modern take’ by its very own ‘postmodern

actually a point of prospective de-mentation—supererogatory–ontological–de-mentionation-or-
dialectical–de-mentionation—stranding-or-attributive-dialectics. Of critical insight here is the fact
that many postmodern authors like Foucault, Lyotard and Derrida adopted stances as of
constructivism, relativism and deconstruction are rather ontologically-veridical
observations/remarks/‘constatations’ about the conception of social reality from their authentic
analysis ‘without going further out-of-the-scope-of-ontological-veracity to ideologise
constructivism, relativism and deconstruction beyond their implied ontologically-veridical

the implications that their stances are open-ended and receptive to the elucidative justifications

Just as it was perceived as a fool’s errand by the Descartes, Galileos, Diderots, etc., to contemplate of genuine intellectual engagement between their budding-positivism/rational-empiricism ventures with traditional medieval scholasticism, especially with regards to the latter’s institutionally-associated dogmatic censure and persecution, and thus with the former resorting to discursive strategies for ^104 universal-transparency^{104}<{\text{transparency-of-totalising-entailing,-as-to-entailing}} -<\text{amplituding/} formative-epistemicity>totalising-in-relative-ontological-completeness } as of overall underlying human ontological-commitment^{88} –<\text{implied—self-assuredness-of-ontological-good-faith/authenticity} ~postconverging—dementating/structuring/paradigming –as-being-as-of-existential-reality> as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation^{77} for relative-ontological-completeness ; it is inevitably the case that what is most critically warranted is for the ‘prospective/new postmodern deprocrysticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ to articulate its full-fledged discourse as of ^104 universal-transparency^{104}<{\text{transparency-of-totalising-entailing,-as-to-entailing}} -<\text{amplituding/} formative-epistemicity>totalising-in-relative-ontological-completeness } as of the liberality of thought allowed for in open society notwithstanding such extra-intellectual and media-driven perverted representation of postmodern-thought. human shallow-to-deeper limited-mentation-capacity implies that prospective dem-
tentive/structural/paradigmatic transcendental knowledge by its so-projected intemporality

at the uninstitutionalised-threshold, is not necessarily grasp as intemporal in the overall
human social-stake-contention-or-confliction framework as of the lack of universal-

transparency—\(\langle \text{transparency-of-totalising-entailing-as-to-entailing-} \langle \text{amplituding/formative–}

epistemicity} \text{totalising–in-relative-ontological-completeness} \rangle \) for its prospective
institutionalisation. Critical for the social validation and institutionalisation of any de-
motentive/structural/paradigmatic transcendental knowledge is the fact that its ‘concurrent

ontological-primemovers-totalitative-framework’ is not sufficiently decisive given that human
temporal-to-intemporal nature as of the social-stake-contention-or-confliction framework at the

uninstitutionalised-threshold cannot adjudge-and-commit-to the ontological-pertinence of
such prospective transcendental knowledge ‘concurrent ontological-primemovers-totalitative-
framework’. Consider in this regard, the ‘concurrent ontological-primemovers-totalitative-
framework’ of the prospective positivism/rational-realism transcendental knowledge
articulated by the Corpernicuses, Descartes, Galileo, Diderots, etc. as meaningfulness-and-
teleology of prospective relative-ontological-completeness-of-reference-of-thought
validated by corresponding prospective ‘concurrent ontological-primemovers-totalitative-
framework’. Such ‘concurrent ontological-primemovers-totalitative-framework’ was not a
sufficient basis for their ideas to be socially adopted by the medieval establishment social-
stake-contention-or-confliction framework at its uninstitutionalised-threshold as of non-
positivism/medievalism. The point being made here is that within a given registry-
worldview/dimension institutionalisation framework the idea of ‘concurrent ontological-
primemovers-totalitative-framework\textsuperscript{73}’ is only more or less determinant as of the institutionalisation’s internal basis of validation of knowledge grounded on its \textsuperscript{84}reference-of-thought–categorical-imperatives/axioms/registry-teleology,\textsuperscript{100} for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\textsuperscript{100} as of its \textsuperscript{64}<amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought–devolving’. However, at its uninstitutionalised-threshold\textsuperscript{103} the prospective ‘concurrent ontological-primemovers-totalitative-framework’ as of the prospective institutionalisation’s basis of validation of knowledge grounded on the \textsuperscript{84}reference-of-thought–categorical-imperatives/axioms/registry-teleology,\textsuperscript{100} for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\textsuperscript{100} of the prospective institutionalisation’s \textsuperscript{64}<amplituding/formative–epistemicity>totalising/circumscribing/delineating reference-of-thought–devolving’ will not necessarily meet with the approbation of the prior institutionalisation now construed as the uninstitutionalised-threshold\textsuperscript{103}, and so as of mutually beyond-the-consciousness-awareness-teleology\textsuperscript{100}--<in-existential-extrication-as-of-existential-unthought>. This has to do with the fact that the full-potency of existence that divulges relative ontological-verticality supersedes human-subpotency epistemising orientation towards its, and thus epistemic constructs as of human-subpotency construal are inevitably ad-hoc to ontological-veracity as of the full-potency of existence; as existence doesn’t adjust to human-subpotency with the reverse being true, equally it is human epistemic constructs that ad-hocly adjust to ontological-veracity as of prospective relative-ontological-completeness\textsuperscript{100}. Thus while the idea of ‘concurrent ontological-primemovers-totalitative-framework’\textsuperscript{73} as the basis for the validation of knowledge is inherently ontologically veridical as of a given institutionalisation’s internal \textsuperscript{84}reference-of-thought–categorical-imperatives/axioms/registry-teleology,\textsuperscript{100} for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\textsuperscript{100}
of its \(<\text{amplituding/formative–epistemicity}>\) totalising/circumscribing/delineating \(\text{reference-of-thought–devolving}\), however, this is an overrated notion with regards to human social-stake-contention-or-confliction framework at its uninstitutionalised-threshold \(\text{as external/prospective}\) \(\text{reference-of-thought–categorical-imperatives/axioms/registry-teleology}\), for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of its \(<\text{amplituding/formative–epistemicity}>\) totalising/circumscribing/delineating \(\text{reference-of-thought–devolving}\), which should and cannot be ignored by any proponent of prospective de-mentative/structural/paradigmatic transcendental knowledge. Rather human social-stake-contention-or-confliction framework fundamentally subscribes to knowledge, given this paradox, as of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ induced as of a de-mentative/structural/paradigmatic transcendental knowledge ‘concurrent ontological-primemovers-totalitative-framework’, establishing and upholding it. The idea here is that the inherent and direct notions of positivism/rational-empiricism expounded by the Galileos, Descartes, Diderots, Copernicuses, etc. were not the fundamental basis for the ultimate human social-stake-contention-or-confliction framework validation but rather their derived positive-opportunism that brought about the ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ implied-by-and-deriving-from their notions of universal human rights and open society, technical advances, better social organisation, etc., then leading to a reasoning-from-results/afterthought institutionalisation and enculturation of such \(\text{re-originary—as-unenframed/unbeholdening/outlier-conceptualisation—}\{\text{imbued-postconverging/dialectical-thinking—‘projective-insights’—‘epistemic-projection-in-conflatedness—‘of-notional—deprocrypticism-prospective-sUBLImation}\}\) originary/event–of-prospective-ontology-origination positivism/rational-empiricism thought. In other words,
human dimensionality-of-sublimating \langle \text{amplituding/formative}\text{supererogatory-de-mentativness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation} \rangle \text{as inclination to adhere to prospective de-mentative/structural/paradigmatic transcendental knowledge as of its ‘concurrent ontological-primemovers-totalitative-framework ’ is very much limited and such prospective ‘concurrent ontological-primemovers-totalitative-framework ’ however its ontological-veridicality cannot be naively construed as all that which is needed to effectuate social transformation and transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. We can appreciate this for instance in the case of cultural diffusion with respect to many a non-modern traditional social-setting where modern-day medicine however its overall ‘concurrent ontological-primemovers-totalitative-framework ’ over other types of premodern medicine, will often be suspected and avoided as of its poorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, and it is only after it has been ‘socially habituated-as-institutionalised’ that it has the requisite ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This equally manifests as of prospective de-mentative/structural/paradigmatic transcendental knowledge construal, as implied for instance by postmodern-thought and particularly so as postmodern-thought has still been undergoing its full construction. The implication here is that all prospective transcendental \text{meaningfulness-and-teleology\textsuperscript{100}} superseding uninstitutionalised-threshold \textsuperscript{103} do not come about as of simplistic continuity but rather as of epistemic-breaks/epistemic-resetting, involving successive ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ instigated-and-upheld by the associated successive prospective ‘concurrent ontological-primemovers-totalitative-framework\textsuperscript{73}’ postconverging–de-mentating/structuring/paradigming of
as of successive prospective relative-ontological-completeness\textsuperscript{10} of reference-of-thought. The implication of such an indirect nature of human social-stake-contention-or-confliction framework validation of transcendental knowledge as of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ and not just direct ‘concurrent ontological-primemovers-totalitative-framework’ implies that just as prospective de-mentative/structural/paradigmatic transcendental knowledge prospective ‘concurrent ontological-primemovers-totalitative-framework’ could be ‘objected to as of human social-stake-contention-or-confliction framework’ notwithstanding its inherent prospective relative-ontological-completeness\textsuperscript{10} of reference-of-thought given its prior lack of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’; any such prospective de-mentative/structural/paradigmatic transcendental knowledge must be construed and thought-out strategically as of its ultimate establishment of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ that as of its prospective relative-ontological-completeness\textsuperscript{10} of reference-of-thought supersedes the prior relative-ontological-incompleteness\textsuperscript{10} of reference-of-thought, just as positivism/rational-empricism superseded non-positivism/medievalism scholasticism. Likewise ‘concurrent ontological-primemovers-totalitative-framework’ ontologically-flawed knowledge can be legitimately overlooked where such knowledge is implied as of priorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This latter cases arise with many a bogus social or natural science study and methodology grounded on the ‘mystifying imprimatur’ of positivistic science, as ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, but then on
closer examination turns out to be poorly designed as well as the prevalence of institutional-being-and-craft suboptimal dispositions with regards to truly upholding the science ethos in many situations with regards to the ideal operation and promotion of scientific research; and so, as of human temporal-to-intemporal ontological-performance\(^2\)\(<\text{including-virtue-as-ontology}\>\) of any ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology\(^{100}\),for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\(^{100}\)’. Already, postmodern interpretations have increasingly been much more relevant practically to many subject-matter domains and activities, with even greater potential for transformative implications if fully acted upon. Furthermore, the ‘prospective/new postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ warrants that postmodern-thought hitherto articulated beyond-the-consciousness-awareness-teleology\(^{100}\),<in-existential-extrication-as-of-existential-unthought> in terms–as-of-axiomatic-construct of the ‘modern take attitude/mental-disposition/care–and–episteme’, need to be translated-as-reconceptualised into its very own ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ as of its own truly postmodern organic-knowledge. The fact is that organic-knowledge is fundamentally driven as of attitude/mental-disposition/care–and–episteme, wherein for instance Newtonian Physics as of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme organic-knowledge makes little sense and is of little potential if construed as of a medieval or animistic social-setup alchemic or mystical attitude/mental-disposition/care–and–episteme. In this regard, attitude/mental-disposition/care–and–episteme is fundamentally the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument.
consciousness. The practical implications as well should be that meaningfulness and definitions often articulated about postmodern-thought that do not capture the postmodern deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme should be rejected; as the tendency for postmodern-thought to be misconstrued or perverted is not accidental, given the very fact that at its very core postmodern-thought is implying a prospective/new prospective relative-ontological-completeness-of-reference-of-thought requiring its own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument. In this regard, central to translating-as-reconceptualising prior and new postmodern-thought as of its very own ‘postmodern deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme’ organic-knowledge is the requirement for an affirmative mental-reflex with postmodern-thought construed ‘as the appraisal and supplanting of ontologically flawed metanarratives and its pursuit for the most profound-and-complete objectivity of meaning, by renewing appraisal of intrinsic-reality/ontological-veridicality involving its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation—as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing as of human existential-contextualising-contiguity’; and it is much more than just a naïve notion of a multiplicity of narratives as wrongly implied from the modern take of existentialising—enframing/imprintedness—as-to-historicity-tracing—in-presencing hyperrealisation/hyperreal-transposition necessarily subject to ontological-bad-faith/inauthenticity as of the modern’s take prospective uninstitutionalised-threshold of procrypticism or disjointedness—as-of-reference-of-thought in many ways explaining the

The ‘postmodern ’ deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument attitude/mental-disposition/care–and–episteme’ should equally enable the avoidance of the erroneously implication of ‘a metaphysical/ideological advocacy’ as postmodern-thought as to human-subject-emancipatory-relativism-driven-recomposing/constructivism-towards-singularisation ⟨as-to-the-nondisjointedness/entailment-of-prospective- nonpresencing⟩ is so with regards to the inherent ontological sublimating human possibility in existence/intrinsic-reality/ontological-veridicality as to human-subpotency implied human potential, and so as emphasised and reflected with regards to the need for human limited-mentation-capacity-deepening⁶¹. We can garner insight about how we tend to misconstrue any attitude/mental-
disposition/care–and–episteme that is different from our own ‘present attitude/mental-disposition/care–and–episteme’

episteme of wholly immersed-and-engrossed meaningfulness-and-teleology. The point being made here is that our natural inclination is never meant to truly-and-comprehensively reflect any prior/old/superseded or prospective/new/superseding attitude/mental-disposition/care–and–episteme by itself but rather in any such exercise always apriorises the ‘present attitude/mental-disposition/care–and–episteme’ and then reflect the other attitude/mental-disposition/care–and–episteme referred to posteriorly, and hence the latter is adhocly-and-scantily identified. We can grasp this insight about this natural inclination to uphold-as-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument the ‘present attitude/mental-disposition/care–and–episteme’ from the fact that ‘originary contacts’ between two cultures of prospective relative-ontological-completeness–and-incompleteness-of-reference-of-thought doesn’t mean a wholly immersed-and-engrossed meaningfulness-and-teleology between the cultures, since their natural inclination is to both apriorise ‘their own present attitude/mental-disposition/care–and–episteme’ and respectively posteriorise the other culture attitude/mental-disposition/care–and–episteme as of their respectively apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument present attitude/mental-disposition/care–and–episteme; and so, as the framework of any subsequent cultural diffusion metaphorically. Thus to fully grasp what is implied here ontologically by attitude/mental-disposition/care–and–episteme, beyond the natural inclination, is to understand that attitude/mental-disposition/care–and–episteme as ‘assumed-and-unflinching transversality—<for-sublimating–existential-eventuating/denouement—of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing implies a mental-projection exercise ‘reflecting-and-contemplating a wholly immersed-and-engrossed meaningfulness-and-teleology’ as of their given neuterising-as-of-prior-relative-ontological-incompleteness-of-reference-of-thought if a ‘prior/old/superseded attitude/mental-disposition/care–and–episteme’ or deneuterising-as-of-prospective-relative-ontological-

notional-deprocrypticism as the most ‘realistic/authentic/unexceptional-as-of-the-mediocrity-
principle conception of human-subpotency existential scope’. Insightfully, what is critical about
‘the conception of human-subpotency existential scope’ is the paradoxical fact that the more
waywardly supernatural/mythical/idolised it is, the least potent has been human-subpotency
mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’, while the

existence/intrinsic-reality/ontological-veridicality,-as-to-‘human<amplituding/formative–

preampering—disjointedness-as-of—reference-of-thought
apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument attitude/mental-
disposition/care—and—episteme’ implied notional-deprocrypticism is about a radicalisation of
the ‘realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-
subpotency existential scope’ as of its maximum potency for human subpotent mastery of the
the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘human<amplituding/formative–epistemicity>totalising~purview-of-construal’. This
radicalisation is grounded on the rational-realism postulate that humankind as of its limited-
mentation-capacity-deepening has always encountered its uninstitutionalised-threshold all
along in reflecting holographically—<conjugatively-and-transfusively> the ontological-
contiguity—of-the-human-institutionalisation-process retrospectively and prospectively,
reflecting the reality that humankind is of both a temporal/shortness-of-register-of—

and-teleology nature at uninstitutionalised-threshold, as of prospective institutionalisation
disposition/care—and—episteme’ adopts an ontologically-flawed ‘conception of human-subpotency existential scope’ that is construed essentially as-of \(<\text{amplituding/formative—epistemicity}>\text{totalising—self-referencing-syncretising}/\text{circularity}/\text{interiorising}/\text{akrasiatic—drag}\) untransvaluated—temporal-intemporality\(^2\) at its ontologically-veridical uninstitutionalised-threshold\(^0\) as it doesn’t even and fails to recognise any such uninstitutionalised-threshold\(^0\) pointing to its prior relative-ontological-incompleteness\(^0\)—of—\(^4\) reference-of-thought. Thus, the manifestations of temporality\(^7\)/shortness at its unrecognised ontologically-veridical uninstitutionalised-threshold\(^0\) are construed as aberrations/oddities going from this wrongly implied intemporal/longness-of-register-of—\(^5\) meaningfulness-and-teleology\(^0\) posture in \(<\text{amplituding/formative—epistemicity}>\text{totalising—self-referencing—syncretising}/\text{circularity}/\text{interiorising}/\text{akrasiatic—drag}\)\(^1\), rather than a recognition of it prior relative-ontological-incompleteness—of—reference-of-thought, implying recognising its uninstitutionalised-threshold\(^0\) with the temporal-to-intemporal implications as of knowledge-notionalisation; thus providing the potency/empowering-consciousness for prospective transcendence-and-sublimity/sublimation/supererogatory—de—mentativity, as knowledge-notionalisation not only factors in conceptual sublimation knowledge dynamics but equally the dynamics of the conceptual ignorances/desublimation to better skew \(^5\) meaningfulness-and-teleology\(^0\) towards intemporality—longness as of organic-knowledge. The paradox here is that by its ‘most realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’ as of its maximum potency/empowering-consciousness for human subpotent mastery of the the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality—as—to—‘human—\(<\text{amplituding/formative—epistemicity}>\text{totalising—purview—of—construal}\’, the ‘postmodern deprocrypticism—or—preempting—disjointedness-as—of—reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental—
disposition/care–and–episteme’ grounded on such rational-realism recognition of humankind temporal-to-intemporal nature at its uninstitutionalised-threshold is actually ‘effectively empowered’ to incisively tackle issues arising from human temporality/shortness as of its prospective de-mentative/structural/paradigmatic prospective relative-ontological-completeness -of- reference-of-thought; and so beyond just and ad-hoc palliative resolution of a ‘modern take attitude/mental-disposition/care–and–episteme’ very much inclined to aberrational/oddities conceptioning of such temporality/shortness manifestations thus leading to their endemisation/enculturation from ‘ontologically-flawed and inevitability analyses’ conception. Thus a ‘modern take attitude/mental-disposition/care–and–episteme’ is de-mentatively/structurally/paradigmatically disempowered to address issues of its temporality/shortness as of the vices-and-impediments at its uninstitutionalised-threshold. So because its is ‘existentially invested’ in modern social-stake-contention-or-confliction framework of meaningfulness-and-teleology as of procrypticism–or–disjointedness-as-of-reference-of-thought from where it derives its value-construct and value-reference, as it hardly countenances that prospective transcendental knowledge implied value-construct and value-reference is not meant to be of ‘idle’ relevance to the modern social-stake-contention-or-confliction framework but rather redeploy an altogether empowering perspective of prospective relative-ontological-completeness -of- reference-of-thought postmodern social-stake-contention-or-confliction framework of meaningfulness-and-teleology of value-construct and value-reference at the procrypticism uninstitutionalisation. Such prospective change as of de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) of attitude/mental-disposition/care–and–episteme can be appreciated

as of ontological-primemovers-totalitative-framework, it is rather ‘relatively

And so, as of the intemporal ontological-normalcy/postconvergence epistemic perspective in nonextricatory-existential-preempting-of-existential-unthought attitude/mental-disposition/care–and–episteme\textsuperscript{5} as dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{7}-by-reification\textsuperscript{7}/contemplative-distension\textsuperscript{7} of reference-of-thought-by-reification\textsuperscript{7}/contemplative-distension thus transcendentally enabling the successive registry-worldview’s/dimension’s ontological-possibilities construed as of human intemporal/ontological/social/species\textsuperscript{10}/universal/transcendental\textsuperscript{10}/maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{10}—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming. This underscores Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} implied notion of responsibility as reflected by the Nietzschean metaphor ‘God is dead’, castigatory of ‘beyond-the-consciousness-awareness-teleology\textsuperscript{100}<-in-existential-extrication-as-of-existential-unthought>\textsuperscript{5} attitude/mental-disposition/care–and–episteme’ which is inclined to pass on to ‘a certain Messiah’ the possibility of our Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} with the paradox of assuming the pretence of understanding Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} on that basis on the naivety that such passing on is teleologically-elevating and exonerating of our mortal-as-temporal manifestations so-construed as a ridiculous untransvaluated–temporal-intemporality\textsuperscript{5} notion. This equally points to what is the central ethos of aetiologisation/ontological-escalation implied as of
palliating virtue constructs. The question can actually be asked, as of prospective relative-ontological-completeness\textsuperscript{88}-of-reference-of-thought of the notional-discontiguity/epistemic-discontiguity of this ‘made-up’ normativity supposed ontological-contiguity, whether such a prior relative-ontological-incompleteness\textsuperscript{8}\textsuperscript{a}-of-reference-of-thought as totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag is actually as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} at its uninstitutionalised-threshold\textsuperscript{103}, and in a position, on the basis of such palliation, to address the actual fundamental grounding of its vices-and-impediments\textsuperscript{106}; which in reality are actually ontologically addressable/resolvable as to existence-potency ~sublimating–nascence-, disclosed-from-prospective-epistemic-digression so-implied as of prospective relative-ontological-completeness\textsuperscript{88}-of-reference-of-thought.

What is particular with notional-discontiguity/epistemic-discontiguity <shallow-supererogation> of mentally-aestheticised–preconverging/dementing–qualia-schema> is this insight that fundamentally the appropriate prospective relative-ontological-completeness\textsuperscript{88}-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme precedes-and-is-the-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument-to its requisite meaningfulness-and-teleology\textsuperscript{100} as prospective aetiologisation/ontological-escalation. This reflects the salient and underlying idea about Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} that a given ‘reference-of-thought meaningfulness-and-teleology\textsuperscript{100} cannot be apriorised as of a prior/old prior relative-ontological-incompleteness\textsuperscript{88}-of-reference-of-

We can appreciate in this regard that budding-positivism/rational-empiricism and its associated liberality that was the backdrop for technical and organisation possibilities that actually required their interpretation in terms—

And intuitively from our positivistic angle we can effectively recognise this about all the prior registry-worldviews/dimensions reference-of-thought as we appreciate that by reflex these are just beholden to their very own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reference-of-thought—categorical-imperatives/axioms/registry-teleology, for aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology reasoning-from-results/afterthought, but it is hard from our positivistic angle to then appreciate that prospectively we are equally in such a beheld positivism—procrpticism attitude/mental-disposition/care—and—episteme ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reference-of-thought—categorical-imperatives/axioms/registry-teleology, for aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology, which when shown to be of prior relative-ontological-incompleteness—reference-of-thought as of procrpticism—or—disjointedness-as-of reference-of-thought implies necessarily the need for futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of prospective depocrypticism—or—preempting—disjointedness-as-of reference-of-thought attitude/mental-disposition/care—and—episteme’ ‘apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument reference-of-

Inevitably thus this conundrum points out that the instigating of Being-development/ontological-framework-expansion-as-to-depth-of-ontologising-development-as-infrastructure-of-‘meaningfulness-and-teleology’\(^0\) is as of intemporal/longness-of-register-of-‘meaningfulness-and-teleology’\(^0\) as of intemporal/longness-of-register-of ‘meaningfulness-and-teleology’\(^0\) as of intemporal/longness-of-register-of ‘meaningfulness-and-teleology’\(^0\) as of intemporal/longness-of-register-of ‘meaningfulness-and-teleology’\(^0\) dimensionality-of-sublimating ⟨amplituding/formative/supererogatory-de-mentativeness/epistemic-growth-or-conflicatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ individuation reasoning-through/messianic-reasoning, more like Derridean messianic reasoning, arising as of intellectual-and-moral inequivalence and thus implying the dialogical inequivalence of intemporal and temporal ⟨amplituding/formative/wooden-language⟩ (imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of meaningfulness-and-teleology as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩; given that no secondnatured institutionalisation grounding of meaningfulness-and-teleology\(^0\) exists for prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. The ontological-veracity of such an dimensionality-of-sublimating ⟨amplituding/formative/supererogatory-de-mentativeness/epistemic-growth-or-conflicatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ individuation reasoning-through as of Derridian messianic reasoning can be grasp when we contemplate that in a secondnatured institutionalisation framework of deferential-formalisation-transference we give pre-eminence to say a professional or technician for resolving a technical
problem, and as non-technicians we don’t get involved in wooden-language—{imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—<as-of—‘nondescript/ignorable—void ’—with-regards-to—prospective-apriorising-implications}>—exercise to resolve the technical problem. This outlook is actually ‘seeded’ within dimensionality—of—sublimating—\{<amplituding/formative>supererogatory—de-mentativeness/epistemic—growth—or—conflatedness /transvalvative—rationalising/transepistemicity/anamnestic—residuality/spirit—drivenness—equalisation\} individuation reasoning—through that is instigative of Being—development/ontological—framework—expansion—as—to—depth—of—ontologising—development—as—infrastructure—of—meaningfulness—and—teleology. Thereof, what is critical for enabling human successive transcendence—and—sublimity/sublimation/supererogatory—de—mentativity is ‘appropriate prospective institutionalisation secondnaturings metaphoricity’. Consider in this regard, that the instigative matesis universalis metaphoricity by the Galileos, Descartes, etc. of budding—positivism/rational—empiricism is de—mentatively/structurally/paradigmatically ‘not a reasoning with non—positivism/medievalism’ but rather ‘reasoning—through or Derridian messianic reasoning’ over non—positivism/medievalism scholasticism’s pedantising/muddling/formulaic—hollowing—out—in—subontologisation/subpotentialisation as of its reasoning—from—results/afterthought logocentric apriorising/axiomatising/referencing—(of—existential—contextualising—contiguity)—constitutedness. Such altogether new metaphoricity as of its instigating ‘out of thin air’ the budding—positivism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental—disposition/care—and—episteme’ further inspired its subsequent radicalisation by latter thinkers;
wherein for instance, the more thoroughly positivism/rational-empiricism development of ‘the very same physics’ was undertaken by Newton and Leibniz, extending the metaphoricity further even when we contemplate that in many ways these metaphoricity relaying scientists were still imbued with non-positivism/medievalism mystical and alchemic ideas. This ‘out of thin air’ metaphoricity possibility arises because the ‘full-potency of existence in relation to human-subpotency-as-human-knowledge grasp of that full-potency of existence’ is ever one of nonpresencing;

insight of ‘out of thin air’ metaphoricity as of human limited-mentation-capacity-deepening comes with the possibility of its ontological-prime mover-totalitative-framework validation by existence-potency ~sublimating–nascence, disclosed from prospective-epistemic digression. In this regard, the ontologically-veridical ‘postmodern deprocrypticism–or–preempting–disjointedness-as-of–reference-of-thought apriorising/axiomatising/referencing/intelligibility/setup/measuring instrument attitude/mental-disposition/care–and–episteme’ with respect to our modern take ~amplituding/formative> wooden-language-{imbued—averaging-of-thought,<as-to- leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology as-of–nonescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>} reasoning-from-results/afterthought logocentric apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity) constitutedness is rather as of ‘reasoning-through or Derridian messianic reasoning’ over our positivism/rational-empiricism manifestation of procrypticism–or–disjointedness-as-of–reference-of-thought, and so as of a postmodern affirmatory stance of dialogical inequivalence that goes beyond idling in the ‘modern take rigmarole language’, just as we can appreciate how budding-positivism obviate non-positivism/medievalism pedantic dogmatism language to affirm meaningfulness-and-teleology weeding out ornate pedantic detours, to articulate blunt reality as of deprocrypticism–or–preempting–disjointedness-as-of–reference-of-thought prospective relative-ontological-completeness of reference-of-thought. Insightfully, and as is the case with all prospective transcendence-and-sublimity/sublimation/superceratory—de-mentativity implied meaningfulness-and-teleology, we can appreciate that the foremost goal of budding-positivists ‘was not to elicit the direct approval’ of the non-positivism/medievalism established arrangement, as in many ways they adopted a ‘presencing—absolutising-identitive-constitutedness’ consummated/forfeiting posture’ with respect to establishment
social stakes, but rather sought to induce the requisite metaphoricity\(^1\) of budding-positivism for the destruction-deconstruction of non-positivism/medievalism for prospective positivism, as their conception of achievement motive were tied down to prospective positivism institutionalisation as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{10}\). Likewise, the prospective ‘postmodern\(^7\) deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’\(^{17}\) is well beyond the notion of eliciting the approbation of the modern take established arrangement in terms–as-of-axiomatic-construct, but rather is of ‘presencing—absolutising-identitive-constitutedness\(^{13}\) consummated/forfeiting posture’, in inducing budding-postmodern metaphoricity\(^5\) for the destruction-deconstruction of the modern take for prospective postmodern-notional–deprocrypticism institutionalisation as of prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{10}\). In both cases, the prospective institutionalisation attitude/mental-disposition/care–and–episteme\(^5\) is ontologically validated as of its prospective relative-ontological-completeness\(^1\)–of–reference-of-thought, divulging the vagueness and futility of the pretences and judgments of the destructuring-threshold–(uninstitutionalised-threshold\(^{10}\)/presublimating–desublimating-decisionality)–of-ontological-performance\(^7\)-<including-virtue-as-ontology>.

We can equally appreciate here that such a conception of transcendence-and-superratory—de-mentativity is rather as of organic-knowledge and not mechanical knowledge, in the sense that what is critical is the induced apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity\(^{17}\)
for prospective institutionalisation as of prospective ontological-primemovers-totalitative-framework and not simply a mechanical knowledge conception possibly tolerated as of a stale a posteriori adjunctiveness as with the Copernican heliocentric idea initially, needing a latter apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity reinvigoration as of the overall renewal of ‘the very same physics’ \[\text{amplituding/formative} \text{epistemicity}\text{totalising}–\text{devolved}–\text{purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality}\] . It should be noted that such metaphoricity rather points to psychoanalytic-unshackling/prospective-grounding/prospective-reification organic-knowledge nature of such prospective institutionalisation transcendental meaningfulness-and-teleology, which in its prospective relative-ontological-completeness-of-reference-of-thought is ‘a dimensionality-of-sublimating \[\langle \text{amplituding/formative} \text{supererogatory}–\text{de-mentativity/epistemic-growth-or-conflatedness} /\text{transvaluative-rationalising/ transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation}\rangle \text{inventing} \] of the prospective notion of ‘thinking/postconverging-or-dialectical-thinking–apriorising-philosophism’ as positivism/rational-empiricism thinking or notional–deprocryticism thinking respectively, and so as their successive prospective reasoning-from-results/afterthought. In both cases, such metaphoricity as of its reasoning-through/messianic-reasoning cannot be construed as grounded-as-intelligible on the superseded/transcended registry-worldview’s/dimension’s attitude/mental-disposition/care–and–episteme of medievalism–non-positivism or positivism/rational-empiricism manifestation of procrypticism–or–disjointedness-as-of-reference-of-thought, but rather as of its very own transcendental-enabling/sublimating/supererogatory–de-mentativity prospective institutionalisation attitude/mental-disposition/care–and–episteme of positivism or deprocryticism respectively. Thus such metaphoricity is rather induced as of the framework of prospective concurrent ontological-primemovers-totalitative-framework in establishing its
reasoning metaphoricity brings about the prospectively renewed reasoning-from-results/afterthought instigating the seconndnatureing of prospective institutionalisation, and so as of implied reference-of-thought/axiomatic-constructs reflection of the pre-eminence of the full-potency of existence as of prospective ontological-primemovers-totalitative-framework over human-subpotency with the latter adjusting to existence as-of-de-mentation (supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) enabling its prospective relative-ontological-completeness.

Dimensionality-of-sublimating articulation of reasoning-through/messianic-reasoning cannot be construed as amenable to the contending disposition of prior deferential-formalisation-transference secondnatured institutionalisation, thus the irrelevance/impertinence of any such implied contending as of prior reasoning-from-results/afterthought, as any such contention can only re-arise as of the reasoning-through/messianic-reasoning renewing of secondnatured prospective ‘reason-from-results’/afterthought. Thus the direct implication of reasoning-through/messianic-reasoning is that it can only call upon ‘a kindred sense of things’, as of dimensionality-of-sublimating contemplation that can surpass/overcome temporal nihilistic wooden-language-(imbued—averaging-of-thought—as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of-‘nondescript/ignorable—void’-with-regards-to-prospective-apriorising-implications) as of a protracted-consciousness cognisant of the prospective ontological-performance.-<including-virtue-as-ontology> and human emancipation implications of Being-development/ontological-

It should be noted here that the notion of wooden-language–\{imbued–averaging-of-thought–\textasciitilde{as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology–as-of–\textasciitilde{nondescript/ignorable–void ‘with-regards-to-prospective-apriorising-implications>\}\textasciitilde{as of its nihilism rather speaks to social apathy towards veridical prospective ontological possibilities of emancipation as of aetiologisation/ontological-escalation implications going by the very implications of knowledge-reification\textsuperscript{(17)} as being as of the relative-ontological-completeness\textsuperscript{(8)} perspective, and is not to be confused with naïve and literal interpretations in ‘untransvaluated–temporal-intemporality\textsuperscript{(2)} non-ontological terms of social-stake-contention-or-confliction conceptualisations’ that wrongly seem to imply that knowledge-reification\textsuperscript{(17)} can be contemplated paradoxically as being as of the relative-ontological-incompleteness perspective as may be reflected by mere conceptual-patterning–\{as-devoid-of–‘existential-contextualising-contiguity\textsuperscript{(9)}‘s-reifying/elucidating-of-prospective-relative-ontological-completeness\textsuperscript{(8)}\} in \textasciitilde{presencing—absolutising-identitive-constitutedness\textsuperscript{(13)}} without contemplating that the underlying knowledge-reification\textsuperscript{(17)} process/gesturing implications is definitely as of the relative-ontological-completeness\textsuperscript{(8)} perspective since a untransvaluated–temporal-intemporality\textsuperscript{(2)} non-ontological interpretation will rather imply knowledge dereification\textsuperscript{(17)} and endemising/enculturating of temporal-dispositions as of vices-and-impediments\textsuperscript{(106)} for the simple reason that the latter ‘cannot be ignored and then by magic become virtue’ as the overall for knowledge-reification is to understand human destructuring-threshold–\{uninstitutionalised-threshold /presublimating–desublimating-decisionality\}–of-ontological-performance\textsuperscript{(17)}–\<including-virtue-as-ontology> and then bring about prospective constructiveness-of-ontological-performance\textsuperscript{(17)}–\<including-virtue-as-ontology> as to overall reifying-and-empower\{ing-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility\textsuperscript{(7)}–\{imbued-and-}
This tendency to misconstrue the meaning of wooden-language-{'amplituding/formative'} wooden-language-{'amplituding/formative'} wooden-language-{'amplituding/formative'} and associated philosophical notions like leveling, critically arises because of a poor construal of philosophy as ontologically-driven just like any other knowledge as of ‘baseline re-originary-as-unenframed/unbeholdening/outlier-conceptualisation-imbued-postconverging/dialectical-thinking -’projective-insights’/’epistemic-projection-in-conflatedness ’-of-notional-deprocrypticism-prospective-sublimation\(^{u}\) up-to-date knowledge-reification\(^{u}\) process/gesturing of the specific knowledge area as of inherent existence/ontological implications’ subject to validation and falsifiability\(^{u}\) rather than a naïve construal of philosophy as an imprimatur totalisingly-disentailing—discretion/whim-of-thought exercise on the basis of ‘relic-or-orthodoxy knowledge’ induced disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity ’>. It is herein contended that the critical notion underlying wooden-language-{'amplituding/formative'} wooden-language-{'amplituding/formative'} wooden-language-{'amplituding/formative'} relevant to Heideggerian and Nietzschean thought can actually be interpreted critically as relating rather to ‘originariness-parrhesia,–as-spontaneity-of-aestheticisation over the human atrophying tendency for prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation’ with regards to ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications reflected as existence-potency’~sublimating—nascence,—disclosed-
from-prospective-epistemic-digression. But then Heidegger failed to realise that the induced transcendence-and-sublimity/sublimation/supererogatory-de-mentativity of the Socratic-philosophers' universalising-idealisation as well as that of Descartes and other budding-positivists rational-empiricism/positivism were both originariness-parrhesia,—as—spontaneity-of-aestheticisation disseminative events induced as of ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications reflected as existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression involving transcendence-and-sublimity/sublimation/supererogatory-de-mentativity from non-universalising sophistry and medieval-scholasticism pedantic dogmatism respectively; and so as to the fact that dimensionality-of-sublimating

These induced transcendence-and-sublimity/sublimation/supererogatory-de-mentativity later on became prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation as of their mere ‘atrophying mechanical practice’ with succeeding...
generations, and so just as Nietzsche equally appreciated that Christianity was becoming a mere ‘atrophying mechanical practice’ of succeeding Christian generations as for instance with ascetic practices becoming more of symbolism/aura and losing their inceptive emancipatory inspiration. Thus with all these instances rather warranting renewed originariness-parrhesia,—as—spontaneity-of-aestheticisation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation and so as of prospective projection as implied with the ontological-contiguity—of-the-human-institutionalisation-process, but instead Heidegger will elicit a naïve turn to the pre-Socratics while Nietzsche will express admiration of Buddhism as both being of grander originariness and ontological-good-faith/authenticity.

However going beyond a ‘relic-or-orthodoxy knowledge’ disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’> notion of philosophy, it is herein contended that this relatively deficient analysis reflects the fundamental ontological-deficiency of subsequent philosophies influenced by Kantian philosophy which is rather ‘as a projection within the very same intelligible Cartesian/budding-positivists induced rational-empiricism/positivism registry-worldview’s/dimension’s supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for-conceptualisation’ failing to conceive of the ontological-veracity in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process dimensionality-of-sublimating—<amplituding/formative>supererogatory—de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation> as to difference-conflatedness—as-to-totalitative-reification—in-singularisation—as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing>—as-veridical-epistemic-determinism <amplituding/formative—epistemicity>causality—as-to-

In this regards, we can appreciate that all human meaningfulness-and-teleology arises as of aestheticisation before converging towards ontologisation, just as rightfully implied by Nietzsche’s genealogy of morals, but this doesn’t imply valuelessness (as is often naively implied with Nietzschean thought) since aestheticisation convergence towards ontologisation leads to grander ontological-performance—including-virtue-as-ontology>. In this regards, we can appreciate that while from our vantage modern perspective the ontological-veracity of the Egyptian cultural system aestheticisation behind the construction of the pyramids will seem inherently impertinent, but that specific human aestheticisation induced technical, scientific and mathematical innovations were of lateral civilisational ontological-pertinence; likewise we can appreciate that while for the atheist the ontological-veracity of religion is unproven, however various specific religions human aestheticisation in many ways relayed laterally the ontological-veracity of universalising-idealisation thinkers as of the relatively conducive social conditions allowing for the arrival of medieval thinkers who then instigated the possibility for modern-day science ontologisation; and besides, it can equally perfectly be claimed that even our modern-day positivistic civilisation is not beyond a critique of ‘deficient ontologisation’ as we can appreciate the reality of the human aestheticisation of many modern activities (even those associated with technological development) held as of higher interest/worth which ontologisation value is questionable with respect to other possible activities of grander ontologisation but not necessarily held as of higher interest/worth (with the very worst case being media-driven merchandising associated with a generalised dumbing-down and de-intellectualisation increasingly and surreptitiously substituting for reifying
intellectualism, increasingly undermining the citizenry capacity for democratic sovereign judgement). This analysis points to the convoluted relationship between human aestheticisation and ultimate ontologisation value. Rather than naïve and simplistic analysis, it is such an insight that better informs Heideggerian and Nietzschean thought with regards to ressentiment and leveling (as to wooden-language-(imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable—void ’-with-regards-to-prospective-apriorising-implications>)); pointing to the centrality of originariness-parrhesis,–as–spontaneity-of-aestheticisation as more critically about inducing the necessary human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of prior reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation transformation towards prospective ontologisation rather than the mere critique of any given human aestheticisation as of its inherence, as the fact is all human aestheticisations including religion (which is often a target in modern times, however rightly so on many an occasion) are sub-ontological-<as-to-the-limitation-of-human-subpotency-in-its-reifying-and-empowering-reflexivity-of-the-full-potency-of-existence’s—sublimating–nascence> and the more salient point is in instigating their more profound ontologisation/ontological-veracity/aestheticisation-towards-ontology as of relative-ontological-incompleteness/re/relative-ontological-completeness—{(sublimating–referencing/registering/decisioning,—as-self-becoming/self-conflatedness /formative–supererogating—<projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing,—in-perspective–ontological-normaley/postconvergence>)} <amplituding/formative–epistemicity> causality—as-to-projective-totalitative–implications-of-prospective–nonpresencing,—for-explicating—ontological-contiguity. It is thus not odd that as of human emotional-involvement implications, Socratic-philosophers\textsuperscript{104} universalising-idealisation and budding-positivists projected meaningfulness-and-teleology\textsuperscript{100} infrastructure rather met initially with the antipathy of their underpinning—suprasocial-construct and \textsuperscript{<amplituding/formative>} wooden-language\textsuperscript{60} \{imbuéd—averaging-of-thought-\textsuperscript{<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology-as-of—}}\textsuperscript{100} ‘nondescript/ignorable–void’\textsuperscript{60}—with-regards-to-prospective-apriorising-implications\textsuperscript{⟩} and specifically had to face up respectively with the value-construct conception of their
temporal/sycophantic-sophistic presencing—absolutising-identitive-constitutedness ontologically-flawed disparateness-of-conceptualisation-unforegrounding-disentailment-failing-to-reflect-immanent-ontological-contiguity whether with the Ancient-sophists or medieval-scholasticism pedants. We can further appreciate the critical impact of the universalising-idealisation meaningfulness-and-teleology infrastructure of the Socratic-philosophers and their successors as providing the appropriate meaningfulness-and-teleology infrastructure for the Roman Empire and subsequent religio-political developments unlike the case with say Ancient Egypt and Persia whose non-universalising sectarian cults perpetual ideological conflicts ultimately sapped their stability despite their technical advancement, and likewise Western enlightenment effectively arose as of the induced meaningfulness-and-teleology infrastructure of budding-positivists, with perverted consequences like annihilation of Native Indians in the New World and the Transatlantic slavery rather arising as of their far-flung societies opportunistic activities distortive of budding-positivism meaningfulness-and-teleology infrastructure as so-construed in their core societies in Europe with respect to the ending of serfdom, nascent socioeconomic emancipation and human rights. Thus basically the idea of human value-construction is ever always caught up between on the one hand human limited-mentation-capacity to come to terms with ‘transvaluation as amplituding/formative-epistemicity causality-as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity in reflecting holographically-conjugatively-and-transfusively the ontological-contiguity—of-the-human-institutionalisation-process anamnesis as of difference-conflatedness-as-to-totalitative-reification-in-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing-as-veridical-epistemic-determinism underlying the human construction-of-the-Self and on the other hand ‘the effective ontological-impertinence/dereification arising in the conceptualising of human
value-construction as of a wooden-language imbuéd—averaging-of-thought as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—of—nondescript/ignorable—void—with-regards-to-prospective-apriorising-implications in amplituding/formative—epistemicity—totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag as construing of value-construction within any given registry-worldview’s/dimension’s presencing—absolutising-identitive-constitutedness—meaningfulness-and-teleology and so whether as of trepidatious (recurrent-utter-uninstitutionalisation), warped (base-institutionalisation–ununiversalisation), preclusive (universalisation–non-positivism/medievalism) or occlusive (positivism–procrystalism) implications’. This discrepancy (between the human capacity to achieve transvaluation and effective social–value-construction narrative as of any given registry-worldview/dimension) is reflected in the underlying reality that effectively practised human value-construction is the ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon/projection’; wherein social–value-construction across the successive registry-worldviews/dimensions arises as a functional necessity that is meant to reflect supposedly coherent ontological-commitment—implied—self-assuredness-of-ontological-good-faith/authenticity—postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality and so in order to elicit stable social-functioning-and-accordance for social-stake-contention-or-confliction, whether such social–value-construction is ontologically-pertinent or not. In this respect, the reality in reflecting holographically—conjugatively-and-transfusively the ontological-contiguity—of-the-human-institutionalisation-process points to changing ‘de-mentative/structural/paradigmatic marginal equity of social–value-construction’, so-construed as ‘expected equity of all individuals for social–value-construction’ and so rather as from the de-mentative/structural/paradigmatic reference basis of ‘priorly implied-and-justified inequity’ whether the latter is implied-and-
justified as of talent, royalty, class, productivity, mere traditional and cultural practice justification, etc.; thus effectively reflecting the overall consequence of social–value-construction as the ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon/projection’. In this regards, social–value-construction arises from two levels; as of the inherent de-mentative/structural/paradigmatic implication of ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon/projection’ as of ‘priorly implied-and-justified inequity’ and this in conjugation then with the individual inherently appraisable social–value-construction as of ‘expected equity of all individuals for social–value-construction’. In this respect, we can appreciate that an autocrat is more capable of ‘displaying greater social–value-construction’ than an ordinary denizen by the former’s mere social–value-construction ‘priorly implied-and-justified inequity’ as of its status in the autocracy (however an autocrat’s apparent magnanimity on the basis of the prior perspective of the autocratic society will rather be construed as of deficient value-construction as from a prospective perspective of comparison to the overall social and virtue progress implications of a better accountable political system, while on the other hand individuals effectively advocating for such a prospective political system may be construed as of deficient value-construction in the prior autocracy), while modern-day social–value-construction ‘priorly implied-and-justified inequity’ arises as of politico-bureaucratic, talent, entrepreneurial, socio-historical, traditional and cultural practice justification, etc. implications (but is just as well subject to transvaluation analysis as of as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity, as it can perfectly be argued that the apparent magnanimity of plutocrats as of a capitalistic economic value-
distributive system ‘excessively skewed towards final product/service/financial delivery as-of-first-come-near-monopoly and institutionally-skewed-possibility-for recurring wealth accumulation’ while excessively overlooking/devaluing the return to massive public externalities/external-resources contributions to economic production such as public education, human and social development, infrastructure, basic research, technological research, etc. rather speaks of deficient social–value-construction, especially as such a system ‘priorly implied-and-justified inequity’ as of its occlusive ‘presenting—absolutising-identitive-constitutedness’ is geared towards propping special interests, warfare spending, anti-taxation, anti-immigration, trivial interest in global human development, co-opted media narrative, etc. as of a suboptimal social–value-construction). But this doesn’t cancel the fact that individuals throughout sublimating ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing–<perspective–ontological-normalcy/postconvergence-reflected–‘<epistemicity-relativism’> notwithstanding any disadvantaged ‘priorly implied-and-justified inequity’ for social–value-construction, intuitively cognisant of the pertinence of human transvaluation have elicited the underlying ontological-veracity/ontological-impertinence of their social-construct value-construction as of its supposedly coherent ontological-commitment ¬<implied–self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming =as-being-as-of-existential-reality> to induce the transformation of the social-setup value-construction; such that at various critical times the more salient ‘priorly implied-and-justified inequity’ for social–value-construction had thus been basically intellectual-pertinence-as-of-ontological-veracity such that all other ‘priorly implied-and-justified inequity’ for social–value-construction have tended critically to ultimately be grounded on intellectual-pertinence-as-of-ontological-veracity whether of genuine or surreptitious justification. The more salient issue then for the knowledge-reification of social–value-construction thus lies with its ‘priorly implied-and-justified inequity’ narrative(s) with respect to underlying knowledge-reifying transvaluation implications
projection as being of most profound intellectual-pertinence-as-of-ontological-veracity. In this regards, our present rational-empiricism/positivism occlusivity warrants prospective meaningfulness-and-teleology\(^{10}\) infrastructure transvaluation so-implied as of notional-deprocrypticism or <amplituding/formative>notional-preempting—disjointedness-as-of reference-of-thought appropriate <postconverging entailment-{postconverging narrowing-down–sublimation-as-to ‘existence—as-sumulating-withdrawal,—eliciting-of prospective-supererogation ‘-in-reflecting-‘immanent-ontological-contiguity ’;—as-operative notional–deprocrypticism); and so as the disparateness-of-conceptualisation-<unforegrounding disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’> of our rational-empiricism/positivism occlusivity in its <amplituding/formative> wooden-language-{imbued— averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of— meaningfulness-and teleology—-as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising implications}> tend to rather reflect our <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag . The occlusivity of our positivism/rational-empiricism social–value-construction as such from the prospective perspective of deprocrypticism—or—preempting—disjointedness-as-of- reference-of-thought can be analysed-and-construed as imbued with occlusive collateral aspects of rather nondescript/ignorable–void falsely implying ‘the appropriate exhaustiveness of our rational-empiricism/positivism stances’ thus speaking rather of ideology than ontological-veracity as aptly reflected upon by postmodern-thought. Such occlusive-collateral aspects take the form of economic dysfunction and inequities as occlusively-collateral to economic ideologism, social dysfunction and discriminations as occlusively-collateral to domineering and secluding social narratives, sophistic/pedantic and vested interest undermining genuine sovereignty paradoxically as of obscured-and-deluding knowledge and misinformation that undermines individuals sovereign competence and choice with regards to increasingly skewed-contrived-
and-limited stakes of the democratic process thus eliciting protest voting, and in the bigger
global framework of competing politico-cultural values with individuals and societies rather
construed occlusively as collateral damages. Transvaluation analysis thus ensues from the
human akrasia-susceptibility-or-akrasiatic-drag complex which implies that the very state of
unwariness with respect to prior relative-ontological-incompleteness\(^9\) as of a nihilistic
disposition is de-mentatively/structurally/paradigmatically potently conducive/endemising/enculturating of its vices-and-impediments\(^{10}\) (as so-reflecting the

basis of social–value-construction, it is often claimed, needs to account for the reality of human
sovereignty and free-will as to the ‘autonomy and independence of human disposedness’. But
then such a conception of human sovereignty and free-will seems to imply an ‘existence-in-

This however doesn’t imply the elimination of human sovereignty and free-will but rather effective speaks of human-subpotency within existence-potency ~sublimating–nascence, disclosed from prospective-epistemic-digression, so-construed as ‘human-subpotency ontological-performance’ including virtue-as-ontology within the full-potency-of-existence’s sublimating–nascence-as-of-its-coherence/contiguity; and specifically speaks as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility - (imbued-and ‘hermeneutically/reprojectively/supererogatingly/zeroingly-educing’ human-subpotency epistemic-perspective-of-projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing–conceptualisation), wherein within the absolute a priori framework that is existence, humankind can construe of existence becoming/emanance manifestations allowing for human knowledge-reification and empowerment from the knowledge-reification within existence, with this in itself inducing a human reflexivity as of a human reflexive influence within existence (wherein for instance, a positivistic disease theory of bacteria and biological causation de-mentatively/structurally/paradigmatically induces a whole set of human existential disposedness of emancipatory and curative implications in existence as of human sovereignty and free-will, but also in the very first place the fundamental human existential disposedness at reference-of-thought-level to rational-empiricism/positivism is de-mentatively/structurally/paradigmatically conducive/preparatory for the possibility of such a positivistic disease theory of bacteria and biological causation to be construed by such humans). This then speaks to the fact that ‘human sovereignty and free-will is deflated going by the ontological-veracity of human amplituding-formative–epistemicity totalising–thrownness-in-existence’ as of ‘the specific human-subpotency implications as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility’ - (imbued-and ‘hermeneutically/reprojectively/supererogatingly/zeroingly-educing’ human-subpotency–

In this regards, the broader and more profound conception of human sovereignty and free-will as reflected by human amplituding/formative–epistemicity totalising–thrownness-in-existence is rather grounded in the reality that all humans come into existence as of an overall framework of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology within which the notion of human sovereignty and free-will then arises in the very first place; such that in many ways human sovereignty and free-will is collectively predicated to the social-setup social-functioning-and-accordance as of its implied supposedly coherent ontological-commitment implied—self-assuredness-of-ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality>. Thus, on this basis, the reality of human ontological-performance (reflected as of constructiveness-of-ontological-performance and destructuring-threshold—of-ontological-performance) towards the effective articulation of human sovereignty and free-will is actually one that involves, with respect to human limited-mentation-capacity: ‘the deferential-formalisation-transference overall and underlying social-setup conception of
'prospective-aporeticism-overcoming/unovercoming', and as these institutions and institutional practices undergo metaphoricity all along towards our present, and carries effective/ontologically-veridical teleological implication in reflecting holographically-

Ultimately, the naïve articulation of human sovereignty and free-will as of strict ‘autonomy and independence of human disposedness’ rather speaks of a poor ontological sense-of-things, and as such ontological veracity ensues the notion of human sovereignty and free-will is rather subsumed as of human subpotency knowledge reification\(^\text{\langle uninstitutionalised-threshold\rangle}\) and derived empowerment reflexivity in existence; and as apparent in the sciences, we can’t imply that we have a choice of gravity on earth as \(6 \text{ m/s}^2\) rather than the existence potency\(^\text{\langle uninstitutionalised-threshold\rangle}\) sublimating nascence disclosed from prospective epistemic digression manifestation of \(9.8 \text{ m/s}^2\) and our human sovereignty and free-will is then enabled reflexively with the latter and not the former where we develop and operate technology on that basis for instance, the same equally applies with respect to the social domain in other to avoid mere disparateness of conceptualisation\(^\text{\langle unforegrounding-disentailment,-failing-to-reflect-\langle immanent-ontological-contiguity\rangle\rangle}\). The conception of human sovereignty and free-will so implied as of ‘the specific human subpotency with regards to overall reifying and empowering reflexivity of ecstatic existence as panintelligibility\(^\text{\langle uninstitutionalised-threshold\rangle}\) (imbued and hermeneutically reprojectively supererogatingly zeroingly educating human subpotency epistemic perspective of projective reprojective aestheticising re-motif and re-apriorising re axiomatising re referencing conceptualisation)\(^\text{\langle uninstitutionalised-threshold\rangle}\) basically underlies all human knowledge reification\(^\text{\langle uninstitutionalised-threshold\rangle}\) whether with regards to philosophy as first level ontology pertaining to ‘overall existence phenomenal appraisal of meaningfulness and teleology\(^\text{\langle uninstitutionalised-threshold\rangle}\) as of the very-
existence) with the devising of experimentations (as providing the prolongation for human interpretation capacity with respect to such epiphenomenal manifestations, as in reality even the natural sciences are fundamentally interpretative as ‘specifically aphoristic/cogent/po...tions of the underlying human philosophical interpretative disposition for knowledge-reification’). It is important to grasp here that mere experimentations, as often practised in many domains, that do not arise because of the veridical need to effectively accentuate epiphenomenal manifestations as of unordinary human-framework-of-experiential-existence but rather ‘on the vagueness and naivety that experimentations by themselves demonstrate profoundness’ are ontologically-impertinent (in the sense that the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’ is the more critical basis for a profound knowledge-reification interpretation than any such ad-hoc and simplistic experimentation vagueness and naivety); and in many ways this explains experimental delusions in many domains associated with poor reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation as to the misunderstanding that experimentation should focus on the very critical epiphenomenal manifestations that are not amenable to the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’. However, as of underlying human-subpotency sovereignty and free-will, what is definitely central to knowledge-reification is that it is grounded on human empowering reflexivity from prospective knowledge as of ‘ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications reflected as existence-potency—sublimating—nascence—disclosed—sublimating—nascence—disclosed—from-prospective-epistemic-digression from such human-subpotency prior reproducibility—mathesis/motif/thrownness-disposition’. This reflects the ontological-veracity that human sovereignty and free-will can only be construed in apriorising/axiomatising/referencing-(of—existential-contextualising-contiguity)—conflatedness as of human
revealing the epistemic-impertinence of dispositions for ‘presencing—absolutising-identitive-constitutedness’ as wrongly implying human sovereignty and free-will supersedes existence-potency—sublimating—nascent-disclosed-from-prospective-epistemic-digression rather than the epistemic-veracity of difference-conflatedness as-to-totalitative-reification—in-singularisation—as-the-nondisjointedness/entailment-of-prospective-nonpresencing—as-veridical-epistemic-determinism <amplituding/formative–epistemicity>causality as-to-projective-totalitative–implications-of-prospective-nonpresencing—for-explicating-ontological-contiguity of human meaningfulness-and-teleology. We can garner for instance that there is and has never been any truly ‘presencing—absolutising-identitive-constitutedness’ of the sciences as often wrongly implied by science ideologues, but that scientists across-the-times have allowed existence-potency—sublimating—nascent-disclosed-from-prospective-epistemic-digression to manifest itself in determining ontological-primemovers-totalitative-framework; and so, as from the budding science of the days of Galileo and Copernicus, to Newtonian science, to Lavoisier laboratory science, to Einsteinian science to modern-day institutional practices of science, with all fundamentally driven not by any ‘purported science-ideology’ but rather the practicality of results as of the constraint of the subject-domains of scientific study together with human limited-mentation-capacity-deepening implications in transforming the conceptualisation within any such specific subject-domains of scientific study as of their existential-contextualising-contiguity knowledge-reification rather than ‘any implied notion that naively supersede existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’.

A further twist to such a poor conception of human sovereignty and free-will in the social arises
as of an improper appraisal of the ‘implications of deferential-formalisation-transference as being de-mentatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’. The fact is human sovereignty and free-will is more critically about its ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’ rather than ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’. For instance, a plumber who draws up the costing for a plumbing job explaining to the customer what is advantageously entailed in a convincing manner (as of ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) as they fail to ensure that their professional assessment will truly resolve the technical issue (as they are just looking to contract the job) is not really advancing the sovereign choice of the customer compared to another plumber who undertakes a candid professional assessment that may not sound advantageous with the customer (as they are more critically interested in the ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) but does solve the technical issue; as any such customer in a deferential-formalisation-transference situation will most likely agree. Such operation of human sovereignty and free-will, beyond more or less simplistic social situations as the case highlighted above, is supposedly implied in the operation of all human institutions as of their inherent deferential-formalisation-transference proxy nature; but in many ways such a notion of ‘implications of deferential-formalisation-transference as being de-mentatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’ gets sunk with the increasing complexity and size of human institutions as to what such implications really are, and so especially as the idea of human sovereignty and free-will increasingly becomes abstracted and diffused in the overall social-construct and its institutions as so-associated with ‘the protraction of political and institutional performance, evaluation and accountability’ as reflective of human
sovereignty and free-will. However, with regards to the latter as of social protraction of political and institutional action, the possibility of protracted human sovereignty and free-will while indirect comes to be increasingly associated with the sense of ‘equanimity/balance of institutions’ as to their expected ‘equanimity/balance of contending frameworks and policy frameworks as reflexive of socially-perceived commendation and disapprobation’, whether as garnered ‘politically from the equanimity/balance of competing policies and politics as from polling and/or polls trends’ and ‘professionally with the equanimity/balance of mainstream/conventional complementary professional policy-recommendations and professional practices’. The question about the effectiveness of such implied equanimity/balance as reflecting of human sovereignty and free-will is often raised critically with regards to political and institutional performance particularly during crises. In many ways, the systemic interrelatedness of large institutions as to their complementary end purposes and practices, renders such an assessment of implied equanimity/balance rather de-mentative/structural/paradigmatic to the overall politico-institutional system itself; and particularly so as in many ways the possibility of readjustment is much more practically instigated politically especially as with public institutions the individual manifestation of sovereign choice is much more rigidly tied to political action unlike the relative ability for direct disengagement from private entities. However, the fundamental fact that human sovereignty and free-will is ever always a question of the ‘transverse relation of all humans sovereignty and free-will in society’ inherently implies the underlying possibility for the undermining of human sovereign choice as of inherent social differentiation. Beyond transvaluation implications as of the broader overall ‘expected equity of all individuals for social–value-construction’ in relative-ontological-incompleteness/relative-ontological-completeness {(sublimating–referencing/registering/decisioning,—as-self-becoming/self-conflatedness /formative–supererogating—<projective/reprojective—aestheticising-re-motif—}

phronesis/practicality as of our positivism—procrypticism occlusivity, the assessment of
institutionally implied ‘equanimity/balance of contending frameworks and policy frameworks
as reflective of socially-perceived commendation and disapprobation’, as advancing human
sovereignty and free-will as of deferential-formalisation-transference implications, can be rather
straightforward with regards to relatively compact/self-contained institutional functions and
roles usually involved in direct public service delivery but it is much more difficult with
spurious/supporting institutional functions and roles. We can appreciate in this regards that
public scandals generally tend to arise out of public services and private services delivery
institutional frameworks as of their relatively compact/self-contained institutional functions and
roles, and that issues of transparency rendering such assessment difficult generally arise with
regards to underlying spurious/supporting/supervisory/regulatory institutional functions and
roles. In another respect concerning the modern-day media, the need for relevant and
balanced/equanimous communication and information delivery to the general public has
increasingly been taking a backseat, and so fundamentally as the media becomes more of a
business-making institution and rather plays a weaker and ancillary/perfunctory role in public
policies and politics accountability. This is paradoxically reflected in the reality that despite the
huge choice of media today, strangely enough this has rather been associated with greater
public muddlement with regards to political stakes and public policies; undermining the
political process as increasingly public policies are preconvergingly–de-
mented/structured/paradigmed to default/revert into the interests of powerful groups and
corporations with the support of increasingly astute, surreptitious and media-savvy political and economic think-tanks, as their media underhandedness in many ways foil the possibility for credible and effective public interest debate as of the distractedness of media reflexive anchoring on a stale, traditional, simplistic and increasingly irrelevant age-old left and right political narrative (and its derived politics and policies narratives) poorly reflecting the sophistication of the electorate that ‘doesn’t live in left and right worlds but a realistic world in want for solutions’! Strangely enough, such a media environment is now laden with public gurus holding outlandish views increasingly given the forum for their opinions (presented as reified-knowledge) not only in marginal media but mainstream media as well out of all proportion with the social and/or relevant expertising academic/professional resonance of such ideas, and so as of the underlying pretence of freedom-of-speech; as the notion of freedom-of-speech is increasingly being portrayed rather as the rationalising foundation for all sorts of discreetly, whimsically/fancifully and strategically prejudiced influences on media orientation. In this regards, the notion of freedom-of-speech as of such consequentially biased and disproportionate representation undermining ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’ (as thusly failing to advance human sovereignty and free-will as of deferential-formalisation-transference implications), is increasingly becoming the unbecoming/undoing of the modern-day democratic political process. Direct media surreptitious drumming-up of specific policy stances and political movements have often interfered with political governance as with the tea-party movement for instance; when considering how political orientations are ‘strategically advanced/framed’ in the media at critical moments for upholding favourable political policies or foiling unfavourable political policies while undermining sound analytic public debate. It is no small wonder that a public opinion increasingly exposed to such media-driven ‘subterfuges’, overlooking the age-old party politics narrative entrapment, has been turning to protest voting
as an expression of political disdain. This effectively brings up the centrality of causality, as implied with ontological-primemovers-totalititative-framework conflating towards the inherent ontological-normalcy/postconvergence of ecstatic-existence-as-transcendental-signifier, wherein human sovereignty and free-will is construed as of the ‘dementative/structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness’, reflecting a human-causative-construction conception in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflicatedness/projective-conflating apriorising/axiomatising/referencing about existence as ontologically-veridical (as it is the ‘totalitative epistemic/notional-projective-perspective’ that points out the veridical conception of causation) and so over a traditional reflex construal of human causation in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness as of any given presencing—absolutising-identitive-constitutedness apriorising/axiomatising/referencing in prospective relative-ontological-incompleteness. This insight about human sovereignty and free-will effectively points to the ontological-flaw of presencing—absolutising-identitive-constitutedness conceptions whether as of the past, present or future, inherently as of failing to account for ‘relative-ontological-incompleteness’/relative-ontological-completeness

eventfulness ontological-aesthetic-tracing-perspective-ontological-normalcy/postconvergence-reflected-epistemicity-relativism>; and so especially as it is often implied by a ‘naïve type of philosophising that the conception of human sovereignty and free-will can be abstracted outside existential-contextualising-contiguity as to the underlying supposedly coherent ontological-commitment implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality in wrongly implying that human sovereignty and free-will is rather veridically underlied by ‘human social-vestedness/normativity discretely-implied-functionalism implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ outside existential-contextualising-contiguity implications of relative-ontological-incompleteness to relative-ontological-completeness. But then such pretence of ‘presencing—absolutising-identitive-constitutedness veracity of ‘human social-vestedness/normativity discretely-implied-functionalism implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is both theoretically and empirically non-veridical, speaking more of the reality of power-grabbing/appropriating/usurpatory/arrogating implications than truly rational argumentations as of knowledge-reification implications. Such ‘human social-vestedness/normativity discretely-implied-functionalism implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ arguments are often intimately associated with providing the meaningfulness-and-teleology infrastructure for the powerful and vested-interests, and their insinuations of ‘human social-vestedness/normativity discretely-implied-functionalism implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ as ‘outside existential-contextualising-contiguity implications of relative-ontological-incompleteness to relative-ontological-completeness’ is in effect not truly about the irrelevance of existential-reality implications of
relative-ontological-incompleteness and relative-ontological-completeness but rather more critically ‘is in effect about defaulting to specifically unavowedly/surreptitiously implied convenient/advantageous interpretations about existential-contextualising-contiguity which are not to be subjected to a fulsome analysis for ontological-veracity as of implications of relative-ontological-incompleteness and relative-ontological-completeness and so on the basis of merely projecting the term ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ and thereof implying logical-dueness and articulating logic on the so-narrowed and uncontested framework’. The reason why such a ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ supposedly pertinent argumentation about human sovereignty and free-will cannot hold is that all meaningfulness-and-teleology (as implied with the logical operation of any such projected ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’) operate on priorly established apriorising/axiomatising/referencing and inherently all apriorising/axiomatising/referencing purport to be as of existential-contextualising-contiguity thus subject to analysis as of ‘relative-ontological-incompleteness/relative-ontological-completeness—{sublimating–referencing/registering/decisioning,—as-self-becoming/self-conflictedness/forceformative–supererogating—projective/reprojective—aestheticising/re-motif—and–re-apriorising/re-axiomatising/re-referencing,—in-perspective—ontological-normalcy/postconvergence}— as to human-and-social—expectations/anticipations—metaphoricity—as-rede-mentating/restructuring/reparadigming—psychologism as to their existential-reality veracity, such that fundamentally such ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-

Consider in this regards for instance as of the presencing—absolutising-identitive-constitutedness notion of ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ underlying slavery, such an implied ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is inherently making a claim on existential-reality which rather more aptly reflect a manifestation of power-grabbing/appropriating/usurpatory/arrogating implications as of its apriorising/axiomatising/referencing that one human being has the right to own another human being (as actually not even the logical-dueness of such a ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation can arise from the perspective of relative-ontological-completeness as what is then implied from the relative-ontological-completeness perspective is the supererogatory acuity/perspicacity/astuteness/edginess/incisiveness–of–apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument–for–conceptualisation in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring<as-to-preconverging-or-dementing–apriorising-psychologism> of any such implied slavery ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’). The proof that this is priorly ‘a power-grabbing/appropriating/usurpatory/arrogating implications of
apriorising/axiomatising/referencing and not of veridical logical-dueness’ lies in the fact that for instance the Haitian slave revolters wouldn’t countenance the logical-dueness of any such implied logic of ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ underlying their enslavement but merely as of their relative-ontological-completeness perspective of apriorising/axiomatising/referencing undertake in revolt the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuring instrument-invalidating-measuring apriorising-psychologism of any such implied slavery ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’. This points to the reality that ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation do not truly escape the ontological prism as of existence being the absolute a priori, and rather speak of epistemic situations in epistemic-abnormalcy/preconvergence with the possibility for true causality implications to be drawn in relative-ontological-completeness as of ontological-prime movers-totalitative-framework construable ‘de-mentative/structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness’. The confusion here arises because of the habituation of any such ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ which is then taken to be natural to the point of ‘forgetting/overlooking that it is underlied by apriorising/axiomatising/referencing power-grabbing/appropriating/usurpatory/arrogating

In fact, besides the more starkly demonstrable case with respect to say slavery this equally applies with less starkly obvious situations having to do with human social differentiation as well as any other situations requiring prospective knowledge-reification as the possibility for all human progress arises effectively as a result of the transcending of all such human-subpotency—aporia/undecidability/dilemma/ought-

In fact, such an interpretation about the ontological-veracity of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation is not only relevantly undermined with respect to say highlighting the supposed weaker party perspective in such a framework of power-grabbing/appropriating/usurpatory/arrogating implications of apriorising/axiomatising/referencing but is equally undermined/subverted when conveniently so by the stronger party for instance in the case of the various allied powers of the second-world
war overlooking Nazi scientists direct or indirect participation in war crimes on the rationale of strengthening themselves to ensure future security, and one can imagine the same with regards with many ad-hoc arrangements having to do with spying activities, etc.; thus pointing fundamentally to the ascendency of the ontological implications of human limited-mentation-capacity as to human limited-mentation-capacity-deepening possibilities of relative-ontological-completeness analysis over the absolutising of ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation. Thus any such pretence that ‘human social-vestedness/normativity-implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ argumentation is absolute as of presencing—absolutising-identitive-constitutedness and not subject to prospective ‘relative-ontological-incompleteness/relative-ontological-completeness’ – as to human-and-social–expectations/anticipations—metaphoricity—as-rede-mentating/restructuring/reparadigming—psychologism with regards to an animal of limited-mentation-capacity requiring its prospective limited-mentation-capacity-deepening (and thus paradoxically in want of its very own ‘prospective growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness magnanimity induced originariness-parrhesia,—as—spontaneity-of-aestheticisation’ as to cohere with ecstatic-existence-as-transcendental-signifier—becoming-spontaneity-implications reflected as existence-potency/sublimating—nascence,—disclosed-from-prospective-epistemic-digression)

Thus, there is a direct relation between human-subpotency and existence-potency\textsuperscript{79}—sublimating–nascence,—disclosed-from-prospective-epistemic-digression (so underlied as of the parrhesiastic seeding-promise-of-human-subpotency-ontological-performance\textsuperscript{77}—<including-virtue-as-ontology>—correspondence-with-the-full-potency-of-existence’s—sublimating–nascence—as-of-its-coherence/contiguity), and this is effectively instigated/originated by the human capacity for dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{75}—by-reification\textsuperscript{87}/contemplative-distension\textsuperscript{26} in its construction-of-the-Self with respect to prospective human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint. The underlying point here is that there is no inherent meaningfulness-and-teleology\textsuperscript{100} but rather as of the specific human-subpotency with regards to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility —{imbued-and—'hermeneutically/reprojectively/supererogatingly/zeroingly-educing’—human-subpotency–epistemic-perspective-of-projective/reprojective—aestheticising-re-motif–and–re-apriorising/re-axiomatising/re-referencing~conceptualisation}, that is, as to ‘human-subpotency potential to epistemically converge to the full-potency of existence’; and this underlying structure of reflexivity is the very structure in reflecting holographically—<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process\textsuperscript{68}, however, the surreptitious and opportunistic temporal interpretations to exploit its positive consequences at one moment and to reject it the moment it prospectively challenges-us/puts-us-to-question as of prospective implications of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—\textsuperscript{79}meaningfulness-and-teleology\textsuperscript{100}. The
implication here is that all human knowledge is necessarily for-human-studies/for-human-constructs whether with regards to the social or the natural sciences; as to the fact that all such knowledge is ever only referenced/registered/decisioned in the human consciousness (individual consciousness and collective consciousness respectively as to direct knowledge and indirect knowledge as of deferential-formalisation-transference implications) and functions to broaden-the-latitude-of-human-collective-consciousness with regards to human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in existence. The very possibility for prospective human knowledge generation thus calls for human dimensionality-of-sUBLIMATING \{<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation\} given the reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-‘notional~firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor, with such human dimensionality-of-sUBLIMATING \{<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation\} speaking of true humanity projection for prospective secondnaturing institutionalisation (that goes on to broaden-the-latitude-of-human-collective-consciousness), and so over the wrongfully elicited self-satisfaction of sophistic/pedantic \[^{10}\] presencing—absolutising-identitive-constitutedness\[^{13}\] in existential-extrication-as-of-existential-unthought failing to address the \[^{10}\] universal implications of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint. This underlying human knowledge-notionalisation is what speaks of the distinction between the physician and quack-doctor, the technician/engineer and the scammer, the intellectual and the

In the bigger picture, this speaks to a human socially expanded framework of deferential-formalisation-transference as to various cultivated skills/arts and time investment with their knowledge deferential-formalisation-transference validation as of the supposedly coherent ontological-commitment <implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-

On the other hand, what is typical about quack-doctors, scammers, sophists, etc. with regards to prospective human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint is a predilection for eliciting the idea that ‘human temporality’/shortness <amplituding/formative> wooden-language-{imbued—averaging-of-thought<as-to-

‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩’ is basically of competent judgment (notwithstanding the latter’s underlying banal framework as to the reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-‘notional~firstnatures/time-conservative—which-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence’–existentialism-form-factor, and lack of related cultivated skills/arts and time investment as to the requisite human limited-mentation-capacity-deepening). It is on the basis of ‘so-prepping the human ego’ in an exercise not truly meant to broaden-the-latitude-of-human-collective-consciousness (going by the eventual outcomes of such falsehoods) given that in the very first place the issue has nothing to do with inherent and genuine originariness/reifying/intellectualising—idealising/transcending/sublimating—meaningfulness-and-its-institutionalisation but rather a lulling falsehood that sees our mortal egos as the very target for surreptitiously inducing our moral and intellectual disenfranchisement/swindling/corruption/dispossession; as in effect, overall sophistry as to its underlying social-vestedness/normativity,<discretely-implied-functionalism> undermining of human dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension is effectively about discouraging the possibility for prospective humanity to manifest. But then this intellectualism and sophistry conundrum underlying knowledge-notionalisation (as of prospective human living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology ), demientatively/structurally/paradigmatically marks all human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint as to ‘the uninstitutionalised-threshold attendant framework of lack of social universal-

This very fact is defining as without the latter there wouldn’t be any human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in the very first place; and this very much explains the defining relevance of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–

~sublimating–nascence,-disclosed-from-prospective-epistemic-digression) is effectively what underlies human institutional paralysis and social-vestedness/normativity<discretely-implied-functionalism> as well as the possibility for prospective human construction-of-the-Self in the face of increasingly technically aloof/remote and racing technological, organisational and social transformation; such that the requisite human thoughtfulness that can correspondingly broaden-the-latitude-of-human-collective-consciousness is increasingly out of the loop as humankind in the modern positivism age has increasingly become rather a self-subjugating agent to such transformations as to their lopsided material/equipment/accoutrement sublimation implications with the notion of human consciousness sublimation increasingly passivised and blanked to vested social-and-institutional-frameworks-of—referencing/registering/decisioning actions. But then humankind faces the challenge of contemplatively articulating

meaningfulness-and-teleology

of reinventing/recreating and keeping the human at the driver seat rather than an object of unformulated/unthought-of driven existential emergence/becoming as of lopsided
material/equipment/accoutrement sublimation over a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by that lopsided material/equipment/accoutrement sublimation) as human consciousness is in want of its very own corresponding sublimation as to redefining the possibilities/potential for prospective humanity that can further broaden-the-latitude-of-human-collective-consciousness. Such ‘dreary blankness of consciousness’ (beyond-the-consciousness-awareness-teleology^1^0^<in-existential-extrication-as-of-existential-unthought>) is predicated upon and drags along the shiftiness-of-the-Self as from prior human stake-contention-or-confliction conceptualisation in a psychological entrapment of defining naiveties and complexes (so-construed in presencing—absolutising-identitive-constitutedness as historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition), and so towards humankind’s supposed future (as of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastucture-of—meaningfulness-and-teleology ); and in many ways this historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition has already been stifling/stalling the human prospective potential as from the ontological-normalcy/postconvergence perspective conception of future ^4^historiality/ontological-eventfulness^1^7^/ontological-aesthetic-tracing<-perspective—ontological-normalcy/postconvergence-reflected—epistemicity-relativism> relevant to deprocrypticism—or—preempting—disjointedness-as-of—reference-of-thought. Such historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition is fundamentally defined by a certain enduring reproducibility passivity and blankness of human social processes, wary of the implications of prospective renewal possibilities as the psychological entrapment constraints of historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition override prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation possibilities, and the
for instance like in many ways the practice in modern-day scholarship (especially when poorly constrained to existence-potency—sublimating—nascence—disclosed-from-prospective-epistemic-digression) is bound to ‘make its own weather’ rather as from human-subpotency temporality/shortness; wherein ‘invested’ institutional and theoretical/conceptual postures take on an essence all of their own, and so independently and overlooking the precedence of existential-reality for the possibility for prospective sublimation and knowledge-reification and failing to ‘effectively re-stake/put-back-at-stake in re-originariness/re-origination the capacity of human ontological-performance—including-virtue-as-ontology> in a renewing originariness-parhesis, as—spontaneity-of-aestheticisation’ over already set/established/determining prior reproducibility—mathesis/motif/thrownness-disposition, as—reproducibility-of-aestheticisation, and so failing to be responsive to the fact that human limited-mentation-capacity-deepening rather invokes prospective dimensionality-of-sublimating ⟨amplituding/formative>supererogatory—de—mentativeness/epistemic—growth—or—confoundedness/transvaluative—rationalising/transepistemicity/anamnestic—residuality/spirit—drivenness—equalisation⟩ for re-originariness/re-origination (and as ever always such destructuring—threshold ⟨uninstitutionalised—threshold/presublimating—desublimating—decisionality⟩ of ontological—performance—including—virtue—as—ontology> across the successive registry—worldviews/dimensions abuse of the idea of being at the backend of human institutional—cumulation/institutional—recomposure ⟨as—to—historiality/ontological—eventfulness/ontological—aesthetic—tracing <perspective—ontological—normalcy/postconvergence—reflected—epistemicity—relativism>⟩ as speaking to its own exceptionalism in a naïve <amplituding/formative—epistemicity>totalising—self—referencing—syncretising/circularity/interiorising/akrasiac—drag posture instead of the true instigative exceptionalism of the underlying ontological—contiguity—of—the—human—institutionalisation—process). Such that such ontologically-flawed \(^\text{10}\) presencing—absolutising-identitive-constitutedness\(^\text{13}\) becomes a psychological entrapment of an overwhelming presence hardly capable of profound re-originariness/re-origination but for its thresholding to the accrued \(^\text{47}\) historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition perception of temporal/shortness human stakes-contention-or-confliction framework; with the consequence that this mitigates the possibility to broaden-the-latitude-of-human-collective-consciousness off-the-beaten-path of \(^\text{4}\) historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition \(\text{as of living-development—as-to-personality—}
development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology \(\text{)}\) as to the relation with human lopsided material/equipment/accoutrement sublimation, as such a consciousness increasingly adopts a desublimation/gimmickiness rather than its very own sublimation in tandem with
material/equipment/accoutrement sublimation. This is reflected with the increasing remoteness/aloofness and alienation of the generalised human subject from such material/equipment/accoutrement sublimation captured under abstract institutional frameworks of stewardship expecting a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by the lopsided material/equipment/accoutrement sublimation) in order to maximise passive enculturation and merchandising as of ‘presencing—absolutising-identitive-constitutedness -of—meaningfulness-and-teleology’ given historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition’. Thus, the possibility for the generalised human subject capacity for consciousness sublimation is seized up and constrained in such socially and institutionally bureaucratising and deterministic frameworks that now de-mentatively/structurally/paradigmatically determine the possibilities of human consciousness sublimation as to their abstracted defining conception of human stake-contention-or-confliction (as of living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology) such that the generalised human subject re-originariness/re-origination sublimation imaginary possibilities are already truncated as from prospective ontological-normalcy/postconvergence epistemic/notional–projective-perspective of re-originariness/re-origination as implied with prospective depency/ency–or–preempting—disjointedness-as-of—reference-of-thought.

Today, many agile initiatives allowing more or less for the expression of the human subject imaginary and so specifically with start-up entrepreneurship increasingly highlight that in many ways traditional social-and-institutional-frameworks-of—referencing/registering/decisioning are suboptimal conceptualisations of human consciousness sublimation possibilities as to their thoroughgoing beholdenness to ‘presencing—absolutising-identitive-constitutedness’-of—
meaningfulness-and-teleology given historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition’ bounded to prospective thresholds of passivity and blanking of human consciousness sublimation possibilities. In many ways because of poor appreciation of the ‘direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness’ the modern mindset has tended to construe of its lopsided material/equipment(accoutrement) sublimation implications naively as implying the comprehensive fulfilment of human potential with poor appreciation/sense that effectively as reflected with prior registry-worldviews(dimensions), the proximity of technology then never implied as today a generalised human consciousness passivity and blankness to the point of relative desublimation/gimmickiness over sublimation (beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of-existential-unthought); and so as potently contended by Baudrillard simulacrum conception wherein gimmicky formulaic representations of overall aestheticisation—and—aestheticisation-towards-ontology increasingly substitute for more profound possibilities of human aestheticisation—and—aestheticisation-towards-ontology as with respect to the potential for prospective human consciousness sublimation as of a totalising-entailing projection of dispensing-with-immediacy—for-relative-ontological-completeness by-reification /contemplative-distension. Whereas historically the technological accessibility and proximity to the generalised human consciousness of such events like the invention of metal implements, the plough, writing, the printing press, etc. provided more profound possibilities for human consciousness sublimation in re-orginariness/re-origination, beyond mere lopsided technological as of lopsided material/equipment(accoutrement) sublimation in the framework of ‘a presencing—absolutising-identitive-constitutedness-of-meaningfulness-and-teleology given historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition’ that passivises

Historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition as such actually reflects the dementative/structural/paradigmatic limitation of the given human registry-worldview’s/dimension’s epistemic-gesturing for the construal of ontological-veracity—as-to-inherent-ontological-contiguity at its prospective uninstitutionalised-threshold; speaking of a state of notional-discontiguity/epistemic-discontiguity in relative-ontological-incompleteness in relation to the now prospective notional-contiguity/epistemic-contiguity of the relative-ontological-completeness, as from the ontological-normalcy/postconvergence epistemic/notional-projective-perspective. Effectively, historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition as of its implied contrastive apriorising/axiomatising/referencing—psychologism of (relative-ontological-incompleteness of notional-discontiguity/epistemic-discontiguity in prospective notional-contiguity/epistemic-contiguity and apriorising/axiomatising/referencing—psychologism of (relative-ontological-completeness in prospective notional-contiguity/epistemic-contiguity), can be reflected historically with respect to say ‘an engrained traditional non-positivism/medievalism conceptualisation of the world’ incapable/could-not-bring-itself to mentally process the implications of planets shown with a telescope to be rather going around the sun in a nascent positivism/rational-empiricism attitude/mental-disposition/care—and—episteme implied by Galileo and further conceptually articulated by Descartes’ thinking proposition as to its mathesis universalis implications, such that it is as of a crossgenerational transformation/supererogatory—de-mentativeness that humankind develops the

Likewise, this insight can be extended in reflecting the historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of ‘an engrained traditional non-universalising conceptualisation of the world’ incapable/could-not-bring-itself to mentally process the implications of the nascent universalising-idealisation attitude/mental-disposition/care–and–episteme implied by the Socratic-philosophers as to its apriorising/axiomatising/referencing–psychologism (as of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) induced crossgenerational transformation. In this regards, this author construes such gimmicky pretences of intellection in our modern-day rather ‘intimating of existential-extrication-as-of-existential-unthought as of human-subpotency epistemic perspective’ with regards to otherwise de-mentative/structural/paradigmatic human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint issues (requiring the ontological-normalcy/postconvergence epistemic perspective in nonextricatory-existential-preempting-of-existential-unthought), which articulation and constructive addressing should actually be the very conceptualisation of intellection. In this regards, we can appreciate that the Socratic-philosophers and budding-positivists actually addressed and resolved the human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of their respective times as of sublimating intellectualism (as of ontological-normalcy/postconvergence epistemic perspective in nonextricatory-existential-preempting-of-existential-unthought, involving a sense of intellectual-and-moral sacrifice as to the pre-eminence of ecstatic-existence implications as to existence-potency ~ sublimating–nascence, disclosed-from-prospective-epistemic-digression) undermining their respective gimmickiness-of-thought (in existential-extrication-as-of-existential-unthought as of human-subpotency epistemic perspective) associated with sophists and medieval-scholastics then respectively defining the ‘thought/intellectual Establishment’, and that the possibility for such sublimating intellectualism as to its crude and unsavoury social discomfort implications is hardly a question of eliciting human temporality / shortness <amplituding/formative> wooden-language (imbued—averaging-of-thought—as-to-leveling/ressentiment/closed-construct-of-meaningfulness-and-teleology—as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications>) as of moral and intellectual disenfranchisement/swindling/corruption/dispossession. In the bigger scheme of things

Such meaningfulness-and-teleology in existential-extrication-as-of-existential-unthought as of human-subpotency epistemic perspective as to dimensionality-of-desublimating-lack-of-\langle amplituding/formative\rangle supererogatory-de-mentativeness/epistemic-

In this regards, we can appreciate that the strong predictive constraining in many a natural science domain (as strongly constrained to existence-
potency\textsuperscript{38}–sublimating–nascence,-disclosed-from-prospective-epistemic-digression) induces the manifestation of sublimating thought as from induced requisite cogency of knowledge-reification\textsuperscript{39} (as of ontological-normalcy/postconvergence epistemic perspective in nonextricatory-existential-preempting-of-existential-unthought) unlike is the case in many a blurry domain highly subjected to imprimatur totalisingly-disentailing—discretion/whim-of-thought as to poor deferential-formalisation-transference justification as often in the social not the least bothered about the overall cogency of projected knowledge-reification\textsuperscript{39} (thus rather tending towards existential-extrication-as-of-existential-unthought as of human-subpotency epistemic perspective). We can consider in this regards how authority actually serves its true deferential-formalisation-transference role quickly gives to prospective possibilities of sublimating knowledge-reification\textsuperscript{39} wherein for instance in the physics domain-of-study at the beginning of the 20\textsuperscript{th} century the eminent physicists from say the cohorts of the Poincarés, the Einsteins, the Bohrs, the Feynmans, etc. successively passing on the baton (as to existence-potency\textsuperscript{39}–sublimating–nascence,-disclosed-from-prospective-epistemic-digression), as of ontological-normalcy/postconvergence epistemic perspective in nonextricatory-existential-preempting-of-existential-unthought; whereas in many a blurry domain-of-study, disparatelessness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect-'immanent-ontological-contiguity\textsuperscript{67}'> tend to be the order of the day often assuming a quasi-political strategic orientation as to gimmickiness-of-thought as of existential-extrication-as-of-existential-unthought postures (poorly appreciating the profound knowledge-reification\textsuperscript{39} sublimating-over-desublimating implications of existence-potency\textsuperscript{39}–sublimating–nascence,-disclosed-from-prospective-epistemic-digression) as to the fact that the human mortal whim/discretion-of-thought projected as aura-and-imprimatur comes to be enshrined as being bigger than ecstatic-existence de-mentative/structural/paradigmatic implications. Such an approach is often projected contradictorily as methodologically emulating the natural sciences on the one hand but on the other hand implying that the knowledge-reification 77 implications for the social are different as to the supposedly non-metaphysical (as non-ontological) nature of the social and cultural; failing to grasp/intuit that there can’t be any such thing as non-

Furthermore, the ‘social and cultural is rather priorly constrained to the ontological’ with regards to the fact that ‘scientific and technical capabilities and their implicated socio-organisational and value-referencing construct’ as to their inherent human reifying and empowering reflexivity implications, speaking of the ontological, are not necessarily ontologically-tied-to and/or ontologically-exclusive-of any social and cultural framework or peoples (in the sense that scientific and technical phenomena like electricity, machines, modern medicine, etc., their enabling social utilities/utilisations, and the value/moral outlook of the underlying positivism/rational-empiricism conceptualisations like provision of modern public services, associated freedoms, prospective knowledge-reification and empowering implications, etc. are not strictly meant for given specific social and cultural frameworks, and are rather amenable to all human social and cultural frameworks with regards to ‘relative-ontological-incompleteness’/relative-ontological-completeness (sublimating—referencing/registering/decisioning,—as-self-becoming/self-

More than just about abstract knowledge-reification 75 the implications of science-ideology are ultimately social and institutional as to the implications of human emancipation; and so in the sense that contrary to what is generally thought, science itself as for-human-studies is the very first-level of social science as of the epistemic implications it projects upon society and social

meaningfulness-and-teleology 101, and critically so because in reality budding-positivists were actually the very first modern social scientists in the sense that their posturing wasn’t critically about the ‘technicalities of the budding natural science they advanced’ like a heliocentric world or rational-empiricism driven natural science basis of analysis (as to satisfy their mere natural
science curiosity given that in many ways some of the notions where previously advanced in
different forms), but they were rather critically engaged in a social posturing to epistemically reconstrue the society and social meaningfulness-and-teleology in those scientific terms and the future elaboration and development of the natural sciences could only be rendered possible with an open society responsive to such budding scientific meaning, and it was this social posturing which was the true source of their troubles and persecution. In fact, such ridiculous historical interpretations seeming to criticise budding-positivists like Galileo for wrongly making the case for a heliocentric world for instance are paradoxically based on condemning the latter and other budding-positivists for having a poor experimental framework as of ontologically-deficient presencing—absolutising-identitive-constitutedness analyses that fail to factor in that the very notion of ‘positivistic science experimental framework historiality/ontological-eventfulness/ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism’ was developed and enculturated/constructed as scientific practices by these budding-positivists with their medieval societies previously knowing nothing of such as to their medieval-scholasticism (as to the mere disinclination and incuriosity to even look through a telescope and draw contemplative consequences); and such a criticism on the basis of the subsequently developed and more precise modern-day science experimental framework speaks of the characteristic nature of a supposed knowledge-reification exercise that doesn’t factor in human limited-mentation-capacity-deepening as of relative-ontological-incompleteness to ‘relative-ontological-incompleteness/relative-ontological-completeness ⟨sublimating~referencing/registering/decisioning,—as-self-becoming/self-conflicatedness /formative–supererogating—projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-referencing,—in-perspective–ontological-normalcy/postconvergence⟩) as to human-and-social–expectations/anticipations—metaphoricity—as-rede-mentating/restructuring/reparadigming—psychologism as to

In another respect, given the requisite dispensing-with-immediacy-for-relative-ontological-completeness’-by-reification’/contemplative-distension involved in true human consciousness sublimation, dimensionality-of-sublimating warrants that the conception of veridical human knowledge and emancipation is not beholden on the mere eliciting of a basic positive-opportunism, as ‘the very abstract value-reference commitment for dispensing-with-immediacy-for-relative-ontological-completeness’-by-reification’/contemplative-distension’ that brings about sublimation needs to be construed as to imply ‘it is the underlying organic framing of the induced sublimation’, and so in order to avoid ‘sublimation value-reference usurpation’ wherein the temporal induced positive-opportunism elicits parallel competing meaningfulness-and-teleology (in existential-extrication-as-of-existential-unthought as of human-subpotency epistemic perspective of dimensionality-of-desublimating-lack-of...)

In many ways the underpinning–suprasocial-construct itself as to ‘a rather acerbic and direct positive-opportunism inclination’, while of abstractive apprehension of sublimation possibilities, tend to poorly appreciate the underlying and implied dimensionality-of-sublimating (<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness/transvaluative-

(<amplituding/formative>supererogatory~de-mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ as of the instigative disposition for prospective transcendental-enabling/sublimation possibilities in the sense that even the underpinning–suprasocial-construct framework of say enlightenment despots or philosophising emperors are not truly instigative of budding-positivism or universalising-idealisation thought respectively, nor is our modern-day presencing—absolutising-identitive-constitutedness politically clouded historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition underpinning–suprasocial-construct environment the contemplative beholder of the panacea for prospective human transcendence-and-sublimity/sublimation/supererogatory~de-mentativity potential; as so reflected in their ever always hardly-adaptable/inflexible reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation frameworks of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition. This in many ways explains why ultimate responsibility lies with the abstract individual as to the requisite human dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension (as of human self-surpassing—existentialism-form-factor,—in-overcoming—‘notionally–collateralising-beholdening-protohumanity’—to—‘attain-sublimating-humanity’—as—to—existence-potency ~sublimating—nascence,—disclosed-from-prospective-epistemic-digression to supersede human temporality/shortness <amplituding/formative> wooden-language—(imbued—averaging-of-thought)<as-to-

Interestingly, in this regards in many ways the ontological-contiguity of-the-human-institutionalisation-process possibility is hardly just about human ‘mere technical capacity potential’ but it is rather more critically a psychological issue as of desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition

In effect, such a controversy of ontological-bad-faith/inauthenticity never arose (as explained by the prior enculturation of an underlying ‘scientific—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying-,ontological-commitment <implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality>)’ induced by budding-positivists and associated with their persecution), and further because of the very high predicative-effectivity–sublimation-(as-to-underlying-,ontological-commitment <implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality>) associated with the physical sciences and as generally reflected by the social-stake-contention-or-confliction disinterested natured of ‘much of the basic/fundamental and natural sciences’. However, the case with psychological, social and ‘interest-driven scientific frameworks’ is quite often ‘hardly one of high predicative-effectivity–sublimation-(as-to-underlying-,ontological-commitment <implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality>)’ with the result that such a ‘purist ontological and scientific framing of supposedly knowledge-reification issues as to prospective sublimating historiality/ontological-eventfulness /ontological-aesthetic-tracing<perspective–ontological-
normalcy/postconvergence-reflected-‘epistemicity-relativism’‘ is either indirectly or directly undermined with social-vestedness/normativity-<discretely-implied-functionalism> ideas which ‘de-mentatively/structurally/paradigmatically speak to an underlying disengagement with the deeper notion of veracity/truth supposedly projected as pure scientific and pure ontological analysis in the relevant domains’, as to the ‘social-stake-contention-or-confliction relative privileging of human methodologising/mutualising/organising/institutionalising epistemic gadgetry’ (surreptitiously associated with <amplituding/formative> wooden-language) (imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing —narratives—of-the- reference-of-thought—categorical-imperatives/axioms/registry-teleology) over existence-potency ~sublimating—nascence,-disclosed-from-prospective-epistemic-digression. This difference between a ‘purist science/ontology epistemic-conception of veracity/truth’ and the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social—value-construction’ is critically reflected in the fact that the former orientation is priorly-and-ultimately concerned with existence’s foregrounding—entailment—postconverging—narrowing-down—sublimation-as-to—existence—as-sublimating-withdrawal,—eliciting-of—prospective-supererogation ’-in-reflecting—‘immanent-ontological-contiguity ’;—as-operative—notional—deprocrypticism) imbibed sublimation whereas the latter is critically concerned with ‘conceptions of human abstract interpositions as of elaboration-as-to—merel-extrapolating/constituting/abstracting/deducing/inferring—outside—existential-contextualising-contiguity’ that are not necessarily subject to phenomenal/manifest existence’s foregrounding—entailment—(postconverging—narrowing-down—sublimation-as-to—existence—as-sublimating-withdrawal,—eliciting-of—prospective-supererogation ’-in-reflecting—‘immanent-ontological-contiguity ’;—as-operative—notional—deprocrypticism)’; and
so-peculiarly implied with the ‘importing/exporting of reductionisms’ (as to the fact that there is no physics reductionism of physics or say mathematics reductionism of mathematics or biology reductionism of biology as to being the real and natural orientation for the specific physics, mathematics and biology epistemic-conceptions of their respective epistem-conceptions phenomenal/manifest-subpotencies-(in-transitive-conflatedness-reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence)) to explain human psychological and social phenomena that ‘end up implicitly denying the very obvious reality of the psychological and social subpotencies-(in-transitive-conflatedness-reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence)’. In many ways taking such ontologically-flawed interpretations seriously induces human impotency and desublimation (as to the implicated contention that the human ‘supposedly has no profound sublimating social and socio-psychological phenomenal/manifest-subpotencies-(in-transitive-conflatedness-reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence)’ with the ‘supposedly profound phenomenal/manifest-subpotencies-(in-transitive-conflatedness-reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence)’ construed rather in reductionist terms of biology/neurology or physicalism) as is often also associated with social-vestedness/normativity-discretely-implied-functionalism disparateness-of-conceptualisation-unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’; thus ‘actually denying the metaphysical nature and thus ontological nature of the sublimating social and socio-psychological’ such that existence-potency~sublimating-nascence,-disclosed-from-prospective-epistemic-digression sublimation implications with regards to the social and socio-psychological are hardly contemplated and recognised as so-projected herein as to the ontological-contiguity—of-the-human-institutionalisation-process. But then such reductionism actually fails the ‘necessitation test of any science/ontology’ as in reality it is a gimmicky exploitation of the sublimation of the natural sciences as to their inherent
phenomenal/manifest–subpotencies\{(in-transitive-conflatedness –reflexivity,-in-the-full-
potency-of-existence’s–sublimating–nascence) to then ‘utilise the clout to falsely imply
substitutive/reductionist sublimation over the social and socio-psychological
phenomenal/manifest–subpotencies\{(in-transitive-conflatedness –reflexivity,-in-the-full-

ideology associated with biological/neurological and evolutionary substitutive/reductionist
interpretations of the social and socio-psychological). But then the giveaway of such a flawed
conception of science/ontology lies in the fact that such approaches do not project any

qua natural sciences as the surreptitious opportunity to project gimmicky/desublimating interpretations about the social (on the basis of the ‘hollow impressiveness of the natural sciences’) as a psychological trick/gimmick as to rendering knowledge-reification7 sublimation in the social impotent with regards to varied social-stake-contention-or-confliction purposes. Such claims often project/imply that analysing the social qua social is just about irrelevant (or paradoxically ‘make their very own subterfuge social interpretations’ as from the psychological trick/gimmick of the projected hollow impressiveness of the natural sciences so-derived from the clout of a natural science without demonstrating the epistemic-veracity for such a bypassing/dodgery as to arrive at the social ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ sublimating implications and consequences). Besides, such claims are often so-associated with vague non-metaphysical as non-ontological conceptualisations of the social in vague disparateness-of-conceptualisation<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity’ as to elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity, and thus in many ways further undermine/distract-from the social ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ conception of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in dealing with direct social and institutional issues, crises and failures. A ‘purist science/ontology epistemic-conception of veracity/truth’ equally differs from the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ with the former construing of ‘knowledge as to existential knowledge-reification’7 privileging manifest sublimating outcome in existence’ in contrast to the latter
construing of ‘knowledge as to collective acquiescence as to the privileging of human commendation-or-agreementing/convincing-among-mortals (rather than a detour to existence-potency—sublimating-nascence-disclosed-from-prospective-epistemic-digression) even over manifest sublimating outcome in existence’. Such a ‘purist science/ontology epistemic-conception of veracity/truth’ construes of knowledge as a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ (as involved in the reconceptualisation of the physics state-of-the-art from Einsteinian physics, Bohrian physics, Feynmanian physics, etc., emphasising rather ‘the constancy of the intemporal individuation as from the ontological-normalcy/postconvergence perspective’ and ‘not about the constancy of any notion of intemporal individual’). Such a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ speak to the more profound reality that the ordinariness of human thought across the succession of human registry-worldviews/dimensions points to their ‘epistemic-abnormalcy/preconvergence’ despite the delusion of all registry-worldviews/dimensions in their presencing—absolutising-identitive-constitutedness as being of ‘absolute epistemic-normalcy’; and it is because of this latter fact (as from the ontological-normalcy/postconvergence epistemic-projection perspective) that prospective human progress and emancipation as of human transcendence-and-sublimity/sublimation/supererogatory-de-mentativity can occur in the very first place (in contradiction to all such registry-worldviews/dimensions presencing—absolutising-identitive-constitutedness failure to directly grasp their very own <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, even as the possibility for prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity necessarily involves such a requisite psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring). conception of veracity/truth’ is ever always about the ‘prospective upholding of existence-
potency\textsuperscript{\textregistered}~sublimating–nascence, disclosed-from-prospective-epistemic-digression and dementatively/structurally/paradigmatically so explains the very possibility for human progress. In contrast the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity\textless discretely-implied-functionalism\textgreater implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ is rather more bent upon emphasising human-subpotency methodologising/mutualising/organising/institutionalising grounds for veracity/truth rather than eliciting prospective sublimating existence’s necessitating implications and consequences. Such notions of veracity/truth without articulating existence-potency\textsuperscript{\textregistered}~sublimating–nascence, disclosed-from-prospective-epistemic-digression are vague disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity\textless \textgreater>, and worse still when accompanied by claims of humility as to inherent institutionalised prescience are more often than not mere manifestations of intellectual entitlement; (as to imply the society is inherently beholden to the mere institutionalised imprimatur of intellection even as to when it projects intellectual desublimation associated with pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation\{blurring/undermining-of-prospective-totalising-entailing,-as-to-entailing-\textless amplituding/formative–epistemicity\textgreater totalising~in-relative-ontological-completeness \} as well as intellectually-distortive practices such as blind institutionalised priming/funnelling/staking of specific theoretical postures over genuine and profound ontological elucidation as to existential contextualisation with the associated academic careerism at the very antipode of genuine sublimating intellection) and so as reflecting the modern-day intellection relevant prospective human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint. Interestingly, the ‘purist science/ontology epistemic-conception of veracity/truth’ projects prospective sublimating existence’s necessitating implications and consequences to implicitly
underscore ‘interlocutory humility’ induced as to existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression; as to the fact that humility was rather imbued with the Einsteinian/theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs perspective over the prior institutionalised/classical-mechanics—axiomatic-constructs with the latter never assuming any arrogance as to its prior methodologising/mutualising/organising/institutionalising conception of physics. Critically, with regards to the blurriness of meaningfulness-and-teleology in the social that exposes prospective transcendental dispositions (as to dimensionality-of-sublimating

latter. Ultimately, there is a ‘social underlying sublimating intellection proficiency’ to which all
specific domains of study need to account for their sublimating pertinence; and the possibility
of putting into question all ‘Establishment intellection as of their given ‘presencing—
absolutising-identitive-constitutedness’ (from across the most ancient civilisations to modern
times and so as instigated by the Socrates, Galileos, Descartes, Diderots, etc.) has always arisen within-or-without such epochal Establishment intellecution by the prompting of their ‘social underlying sublimating intellecution proficiency’ which contemplative consciousness is not to be underestimated as to a ‘decadence posturing of intellectual entitlement’. Critically, the possibility of prospective value-construction and pretence of projecting more profound value is indissociable from the capacity of producing the relative-ontological-completeness\(^8\) knowledge that broaden-the-latitude-of-human-collective-consciousness as to the fact that just as prior recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and \(^9\) procrypticism—or—disjointedness-as-of—\(^9\) reference-of-thought respectively are intellectually-and-morally wanting with respect to prospective base-institutionalisation, \(^10\) universalisation, positivism/rational-empiricism and \(^11\) deprocrypticism—or—preempting—disjointedness-as-of—\(^9\) reference-of-thought value-construction respectively; pretences of profound intellecution as to the former are nothing but sophistic/pedantic exploitations of human limited-mentation-capacity as to ‘a delusion of generating knowledge and value from thin air’, and of vital importance in that regards is the fact that that which is in relative-ontological-completeness\(^8\) has to occupy the intellectual-and-moral ground imbued by such relative-ontological-completeness\(^8\). Vague notions of arrogance and wretchedness are nothing but the ontological-veracity of the state of relative-ontological-incompleteness\(^8\), arrogance and wretchedness of thought (as from the ontological-normalcy/postconvergence epistemic/notional~projective-perspective) as to an epistemically-decadent \(<\text{amplituding/formative}>\) wooden-language\(^8\) \{imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing –narratives—of-the- reference-of-thought—categorical-imperatives/axioms/registry-teleology\(^10\)}; and so as to the fact that the magnanimity of dispensing-with-immediacy-for-relative-ontological-completeness -by-reification\(^7\)/contemplative-distension\(^7\) out of concern about human prospective Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology ‘is the most important human and humanity-producing enterprise’ notwithstanding the paradox that the prior recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism—or—disjointedness-as-of-reference-of-thought respectively are intellectually-and-morally undeveloped to be the framework for appraising value-construction as of prospective base-institutionalisation, universalisation, positivism/rational-empiricism and deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought respectively in many ways explaining the underlying implications of human registry-worldview’s/dimension’s institutionalisation as involving crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring. This affirmation is not articulated idly as to the fact that part and parcel of human knowledge-reification is not to allow desublimating thought to occupy the ground of sublimating thought (as the latter has to include a challenge to the knowledge-destroying desublimating thought arrogance and wretchedness), however the subterfuges available to such desublimation whether as of sophistry and mere-institutional-appendaging as reflecting the veridical prospective human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint; taking hint that it is fundamentally a question about existence-potency—sublimating—nascence—disclosed-from-prospective-epistemic-digression and no amount of human mortals methodologising/mutualising/organising/institutionalising can supersede prospective sublimating existence’s necessitating implications and consequences as otherwise the very idea of ontology/science then collapses and the supposed knowledge-reification exercise becomes pointless but as for institutional parading value. There is simply no knowledge without the effective demonstrated knowledge-reification implications and pretending otherwise as to ‘virtual wisdoms’ is nothing more than
referencing-syncretising/circularity/interiorising/akrasiatic-drag 1. Hence basically the overall differentiation between ‘purist science/ontology epistemic-conception of veracity/truth’ and ‘social-vestedness/normativity-discretely-implied-functionalism’ epistemic-conception of veracity/truth’ lies with their constraining whether towards inherent existence projected implications or towards human-subpotency projected implications respectively. This underlying point has de-mentative/structural/paradigmatic implications with regards to human meaningfulness-and-teleology 10 (as to human living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology 1 ). This differentiation can be rearticulated in aestheticisation terms to imply that existence (as to existence-potency–sublimating–nascence,-disclosed-from-prospective-epistemic-digression) is ‘the scalar conception that enables prospective human sublimation as of aestheticisation-towards-ontology’ while on the other hand human-subpotency (as to human presencing—absolutising-identitive-constitutedness 13<amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag 33 ) is ‘a non-scalar conception that induces prospective human desublimation aestheticisation’. The ‘scalarity/immanency of existence’s ontological-normalecy/postconvergence’ as such is reflected with regards to prospectively implied ontological-normalecy/postconvergence construed as of maximalising-recomposuring-for-relative-ontological-completeness 8—unenframed-conceptualisation epistemic-projection perspective while ‘human-subpotency non-scalarity/beholding-as-to-what-has-gone-before—aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ 9 is reflected with regards to its prospectively implied epistemic-abnormalcy/preconvergence 10 construed as of incrementalism-in-relative-ontological-incompleteness 89—enframed-conceptualisation epistemic-projection perspective. Basically,
‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ and ‘human-subpotency non-scalarity/behavioring-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ thus speak to the fact that human prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity implied limited-mentation-capacity-deepening (as to dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension) is actually induced as from human uncontemplative-distension so-construed as ‘dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension’ imbued prospectively of both sublimating historicity/ontological-eventfulness/ontological-aesthetic-trace and desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition; as to prospective sublimating historicity/ontological-eventfulness/ontological-aesthetic-trace ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ as prospectively preserving ontology/ontological-veracity and ‘human-subpotency non-scalarity/behavioring-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ prospective desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition as prospectively obviating ontology/ontological-veracity. This insightful grasp of the implications of human limited-mentation-capacity-deepening (construed as from ontological-normalcy/postconvergence epistemic-projection perspective): ‘as rather occurring as from an ontologically deficient grounding’ of relative human limited-mentation-capacity (however ‘the better relative ontological-deficiency’ implied as of relative-ontological-completeness’), emphasises the necessity for the bifurcation of the construal of prospective human ontological-performance—<including-virtue-as-ontology> (associated with prospective human sublimation) into: ‘a scalarity/immanency perspective (as to a scalarity/immanency that will arise if the human had
absolute-mentation-capacity so-construed as ontological-normalcy/postconvergence) of
historiality/ontological-eventfulness/ontological-aesthetic-tracing-perspective–ontological-normalcy/postconvergence-reflected-epistemicity-relativism’ and ‘a non-scalarity/behavioring-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation-
perspective (with regards to residual human ontological-deficiency implications as to relative
human limited-mentation-capacity notwithstanding ‘the better relative ontological-deficiency’) of
historicity-tracing—in-presencing-hyperrealisation/hyperreal-transposition’. Uncontemplative-distension is thus rather the recognition that human dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension doesn’t achieve absolute ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence (as dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension rather reflects the epistemic perspective towards ontological-normalcy/postconvergence and not ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’); with the effective ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ as of the absolute distension (beyond just relative-ontological-completeness) underlying the overall existential dimensionality-of-sublimating-amplituding/formative-superoerogatory-de-mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation as the inherent ontological-good-faith/authenticity–postconverging-de-mentating/structuring/paradigming effectively reflected as of notional–deprocrypticism. notional–deprocrypticism as such by its ontologically-uncompromised nature ‘technically entails’: prospective human ontological-performance-including-virtue-as-ontology as to sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing-perspective–ontological-normalcy/postconvergence-reflected-epistemicity-relativism’ as of
‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ in overcoming the desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of ‘human-subpotency non-scalarity/beholdening-<as-to-what-has-gone-before-aesthetically-de-
mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation>’ in
-presencing—absolutising-identitive-constitutedness. Translated, this ‘scalarity/immanency 
of existence’s ontological-normalcy/postconvergence’ and ‘human-subpotency non-
scalarity/beholdening-<as-to-what-has-gone-before-aesthetically-de-
mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation>’
underlying prospective human ontological-performance<-including-virtue-as-ontology> with
regards to human meaningfulness-and-teleology speaks to the fact that prospectively induced human sublimation is bound to paradoxically distort-and-desublimate the ontological-veracity appraisal for inducing further and concomitant human sublimation (and so because of the de-mentative/structural/paradigmatic effect of relative limited-mentation-capacity-
deepening in contrast to what will prevail in case of ‘absolute-mentation-capacity of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’). But then such effect critically varies as to both ‘purist science/ontology epistemic-conception of veracity/truth’ and ‘social-vestedness/normativity<discretely-implied-functionalism> epistemic-conception of veracity/truth’; in the sense that the latter poorly constrained to high predicative-effectivity–sublimation{-as-to-underlying,-ontological-commitment<-implied—
self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-
mentating/structuring/paradigming −as-being-as-of-existential-reality>} is strongly prone to
desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of
‘human-subpotency non-scalarity/beholdening-<as-to-what-has-gone-before-aesthetically-de-
mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation>’ in
-presencing—absolutising-identitive-constitutedness, while the former strongly constrained
to high predicative-effectivity–sublimation-⟨as-to-underlying,-ontological-commitment⟩
⟨implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-
mentating/structuring/paradigming –as-being-as-of-existential-reality⟩ is rather relatively
amenable to sublimating ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing-
⟨perspective–ontological-normalcy/postconvergence-reflected–‘epistemicity-relativism’⟩ as of
‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’. That said, human
sublimation increasingly implies a ‘generalised background cultural,-organisation-and-
institutional framework’ that itself needs to be sublimating, and it is here as well that even the
propensity for sublimation of ‘purist science/ontology epistemic-conception of veracity/truth’
can be desublimated by an ontologically-impertinent ‘generalised background cultural,-
organisation-and-institutional framework’ adopting ‘social-vestedness/normativity<discretely-
implied-functionalism> epistemic-conception of veracity/truth’. In many ways with regards to
the overall social framework, the usurpation of the intellectual–function/posture arising as of
‘social-vestedness/normativity<discretely-implied-functionalism> epistemic-conception of
veracity/truth’ is often associated with vague-and-surreptitious conceptualisations of business
success and media-and-social influence (in desublimating ‘historicity-tracing—in-presencing–
hyperrealisation/hyperreal-transposition) as superseding social intellection itself as an inherent
exercise for the social domain’s ‘purist science/ontology epistemic-conception of veracity/truth’
(as to the latter’s prospective sublimating ‘historiality/ontological-eventfulness’/ontological-
aesthetic-tracing-⟨perspective–ontological-normalcy/postconvergence-reflected–‘epistemicity-
relativism’⟩). Critically such a ‘purist science/ontology epistemic-conception of veracity/truth’
analysis very much point out that the social-construct is riddled with narratives of ‘supposedly
veridical ontological justifications/grounds’ but which on closer examination as of ‘purist
science/ontology epistemic-conception of veracity/truth’ turn out to be at the least sub-

Likewise, it is herein contended that a tradition of philosophy introduced and propped up after the second-world-war and a general social science and humanities attitude and practices closely associated with this orientation (as to perceived geostrategic reasons for undermining the possibility of unfettered thought paradoxically uncritical/thoughtless about the social implications associated with poor/usurped social critique) is fundamentally grounded on an actively surreptitious exercise of presencing—absolutising-identitive-constitutedness\textsuperscript{13} <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \textsuperscript{3} that in many ways (given the inherent impotency it induces as recognised explicitly and
implicitly by even its very own leading figures) has had the consequence of ‘undermining the natural social critical thinking that should enable the proper intellectual framing and addressing of human and social issues leading to a rather subservient intellectual posturing to socially dominant vested-interests/actors’ as so-reflected in the current impotence of the political exercise with mediating institutions failing sovereign-equanimity as political, economic and social stakes cumulatively default to vested-interests as to their \[\text{presencing—absolutising-identitive-constitutedness} \langle \text{imbuing—existentialising—enframing/imprintedness—}\langle \text{as-to—}\text{historicity-tracing—in—}\text{presencing—hyperrealisation/hyperreal-transposition}\rangle\]. Such an underlying intellectually deficient orientation is the surreptitious underhandedness failing social intellectual engagement in many ways explains the surreptitious campaigning against many a critical theory as to the possibility for a revitalised genuine and healthy social critique (and as it is especially so-directed at pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation promising postmodern-thought which portrays a very profound ontological-veracity as to prospective sublimation possibilities in the face of prospective human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint); and so-enabled as to no ‘deprocrypticism—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity—sublimation—\langle \text{as-to-underlying,—ontological-commitment} \langle \text{implied—self-assuredness-of-ontological-good-faith/authenticity} \rangle \rangle\]’ (notwithstanding a natural scientific culture that points out that substantive issues are analysed on the basis of their relevant and operant substantive pertinence) as to the overriding possibility of ‘projecting such a \[\text{presencing—absolutising-identitive-constitutedness} \langle \text{sensibility/decorum of institutional imprimatur}\rangle\] that is rather obsessively defensive of institutional pre-eminence over inherent
knowledge-reification. But then the Ancient-sophists and medievalism-scholastics were the institutional imprimatur of their periods but their pedantic presencing—absolutising-identitive-constitutedness sensibility/decorum was never in any way beholdening upon sublimating existence as to existence-potency ~sublimating–nascence,-disclosed-from-prospective-epistemic-digression allowing for prospective Socratic-philosophers universalising-idealisation and budding-positivism as to their respectively induced ‘universalising-idealisation—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation-(as-to-underlying,-ontological-commitment ~implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality)’ and ‘positivism/rational-empricism—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation–(as-to-underlying,-ontological-commitment ~implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality)’ constraining in the face of ‘human notional~firstnaturedness—temporal-to-intemporal-dispositions~<so-construed-as-from-perspective–ontological-normalcy/postconvergence> accordin...

All the knowledge-reification that effectively can be is of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation having to do with human limited-mentation-capacity-deepening as enabling human-subpotency

But then the inclination to assume an ontologically-flawed sophistic/pedantic presencing—absolutising-identitive-constitutedness sensibility/decorum strategy is ever always associated across all registry-worldviews/dimensions with blurriness of meaningfulness-and-teleology as to meaningfulness-and-teleology rather unconstrained to predicative-effectivity–sublimation–(as-to-underlying,-ontological-commitment \(<\text{implied—self-}\) assuredness-of-ontological-good-faith/authenticity \(~\text{postconverging—de-}\) mentating/structuring/paradigming \(~\text{as-being-as-of-existential-reality}\)> as to lack of ‘relative-ontological-completeness’—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation–(as-to-underlying,-ontological-commitment \(<\text{implied—self-assuredness-of-ontological-good-}\) faith/authenticity \(~\text{postconverging—de-}\) mentating/structuring/paradigming \(~\text{as-being-as-of-existential-reality}\)>’). Such ‘human reference-of-thought (as grandest axiomatic-construct level) research-programme conception’ reflects the fact that it is the prospective de-mentative/structural/paradigmatic sublimation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{27} as so-induced by notional–asceticism reasoning-through/messianic-reasoning’ that affirmatively validates any of the respective relative-ontological-completeness\textsuperscript{28} registry-worldviews/dimensions instigated human emancipation, and so as to the fact that the corresponding reasoning-from-results/afterthought inducing secondnatured institutionalisation (that speaks to collective thought in any given registry-worldview/dimension) while serving its secondnaturizing institutionalisation purpose ‘is overrated with regards to the challenge of human aporeticism at prospective uninstitutionalised-threshold\textsuperscript{103} and shouldn’t be the threshold/limit for determining the possibility for prospective human emancipation (since it is relatively of poor responsiveness to prospective human Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{101}) which rather requires instigative notional–asceticism\textsuperscript{4} reasoning-through/messianic-reasoning (as to the fact that for instance it is
naïve to conceive that it was the ‘pure articulation of positivism/rational-empiricism logic that convinced/converted the non-positivism/medieval world into our positivism world’ but rather decisive in the second naturing of positivism/rational-empiricism was the notional—asceticism reasoning-through/messianic-reasoning instigative detour to positivism/rational-empiricism dementative/structural/paradigmatic sublimation as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation (manifested as of the ships that set sail around the world for spices and trade eliciting a positive commercial opportunism that is decisively responsible for destroying the collective social myth of a flat world; the bacteria theory that will ensure that one lives or die if we believe in it or not and draw the health implications constrained the destruction of a collective superstitious medical worldview; the scientific tools and knowledge that ensured that nation A or nation B will triumph if they believe in it or not, constrained the collective need to adopt a scientific worldview, etc.). Since the relative-ontological-completeness logical-basis/logic-as-to—transversality-for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’ is in transversality—<for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’> with the relative-ontological-incompleteness logical-basis/logic-as-to—transversality—<for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’>, it is only the sublimation as to existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation that affirmatively upholds the relative-ontological-completeness over the relative-ontological-incompleteness (as to their supposedly coherent ontological-commitment—<implied—self-assuredness-of—ontological-good-faith/authenticity—~postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality>). In other words, genuinely projected knowledge as of
ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming is more than just the mechanical construct but speaks of the ‘ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming’ existential-condescension<-of-apriorising/axiomatising/referencing–psychologism>‘ as of veridical existential relationship/signature as organic-knowledge. This is more obviously grasped with respect to human living-development–as-to-personality-development and institutional-development–as-to-social-function-development as to the positive-opportunism implications eliciting a decomplexed placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology of such ‘ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming’ existential-condescension<-of-apriorising/axiomatising/referencing–psychologism>‘ but less obvious and poorly grasped with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology. In this respect with regards to human living-development–as-to-personality-development and institutional-development–as-to-social-function-development as of our positivism/rational-empiricism registry-worldview/dimension we can appreciate for instance that in a professional–client relationship like between a physician and a patient or a plumber and a customer, the two parties do not normally engage one another in equivocating as of the ordinary meaningfulness-and-teleology desublimation which wouldn’t achieve the sublimation of medical care meaningfulness-and-technology or plumbing technician technical meaningfulness-and-teleology (as to the fact that the client doesn’t go on pretending to engage the professional at its more profound level of technical knowledge contemplation) with the relation thus involving the requisite ‘ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming’ existential-condescension<-of-apriorising/axiomatising/referencing–psychologism> of the professional with a corresponding
deferential apriorising/axiomatising/referencing–psychologism of the client’ and so as reflecting the sublimating knowledge ontological-good-faith/authenticity~postconverging–dementating/structuring/paradigming beyond-and-above the desublimating ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming of ordinary meaningfulness-and-teleology. However, this sublimating knowledge ‘ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming existential-condescension~<of-apriorising/axiomatising/referencing–psychologism>’ across all registry-worldviews/dimensions is ever always poorly appreciated with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of meaningfulness-and-teleology (even though from a retrospective perspective we can grasp the preconverging/dementing–qualia-schema of ‘the God of plane’ type of articulation of say base-institutionalisation as of animistic social-setup as from our positivism/rational-empiricism reflex ‘ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming existential-condescension~<of-apriorising/axiomatising/referencing–psychologism>’ but it is important to note that such an animistic social-setup doesn’t project of any such preconverging/dementing–qualia-schema placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology going by its presencing—absolutising-identitive-constitutedness just as we will be disinclined to contemplate about the more veridical preconverging/dementing–qualia-schema of our procrypticism–or–disjointedness-as-of-reference-of-thought uninstitutionalised-threshold as from a prospective notional–deprocrypticism perspective projected placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology). This poor appreciation arises for the simple reason that the uninstitutionalised-threshold speaks of the registry-worldview/dimension notional-discontiguity/epistemic-discontiguity ~<shallow-supererogation of mentally-
aestheticised-preconverging/dementing—notia-schema>, and thus it is disinclined to recognise the prospective ‘relative-ontological-completeness’—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity—sublimation—{as-to-underlying, ontological-commitment}—<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality>}’ imbued foregrounding—entailment—{postconverging—narrowing-down—sublimation-as-to—existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation”—in—reflecting—‘immanent-ontological-contiguity’;—as-operative-notional—deprocrypticism) that can instill such a prospective sublimating knowledge ‘ontological-good-faith/authenticity’—postconverging—de-mentating/structuring/paradigming existential-condescension—<of-apriorising/axiomatising/referencing—psychologism>’ as to prospective living-development—as-to-personality-development and institutional-development—as-to-social-function-development. In this regards, it can be appreciated with respect to budding-positivism and universalising-idealisation respectively that where the epistemic-veracity of looking through a telescope and drawing positivistic ontological implications do not avail as in the scholastic-medievalism underpinning—suprasocial-construct or where construing meaningfulness in coherent universalising terms do not avail as in the non-universalising sophistry underpinning—suprasocial-construct, then there is a fundamental reality of desublimating ontological-bad-faith/inauthenticity over which prospective sublimating ontological-good-faith/authenticity knowledge respectively as of budding-positivism and universalising-idealisation can only be established as of their respectively requisite ‘ontological-good-faith/authenticity’ existential-condescension—<of-apriorising/axiomatising/referencing—psychologism>’ and naïve modern-day presencing—absolutising-identitive-constitutedness interpretations in terms of the supposed arrogance of

The blunt fact is that as explained above and clearly obvious with human living-development–as-to-personality-development and institutional-development–as-to-social-function-development the ordinariness of meaningfulness-and-teleology is not to be exploited as if it is a credible state of profound ontological-veracity given the lack of dispensing-with-immediacy-for-relative-ontological-completeness -by-reification/contemplative-distension (as to a disparateness-of-conceptualisation-<unforegrounding-disentailment,-failing-to-reflect—immanent-ontological-contiguity> which pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation thrives on this lack of universal-transparency (transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative—epistemicity>totalising—in-relative-ontological-completeness )) with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology underlying the genuine social intellectual–function/posture. Intellectualism as such is much more than just about presencing—absolutising-identitive-constitutedness methodologising/mutualising/organising/institutionalising enterprise as to the fact that ‘all given registry-worldviews/dimensions as presencing—absolutising-identitive-

The genuine social intellectual–function/posture means that human thought can project beyond, overlook and override presencing—absolutising-identitive-constitutedness\( ^{13} \)\(<\text{preconverging—'motif-and-apriorising/axiomatising/referencing’–imbuing—existentialising—enframing/imprintedness—(as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition)}\) conception of sublimating value and ontological-veracity disposition; and so as to the fact that presencing—absolutising-identitive-constitutedness\( ^{13} \)\(<\text{preconverging—'motif-and-apriorising/axiomatising/referencing’–imbuing—existentialising—enframing/imprintedness—(as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition)}\) actually tend to be skewed towards ‘immediacy supposed absolute sublimating value and ontological-
veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology\textsuperscript{100} -<in-existential-extrication-as-of-existential-unthought>\textsuperscript{6} positive-opportunism\textsuperscript{7} of living-development–as-to-personality-development and institutional-development–as-to-social-function-development) over ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ (with regards to its supererogation -profundity~postconverging–dementating/structuring/paradigming requisite dispensing-with-immediacy-for-relative-ontological-completeness -by-reification /contemplative-distension\textsuperscript{26} for Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\textsuperscript{25}meaningfulness-and-teleology\textsuperscript{100}), and in fact in many ways individuals intersolipsistic actions in society implicitly recognise this reality even as the overall underpinning–suprasocial-construct tends to be abstractly preconvergingly–dementated/structured/paradigmed to skew towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as for instance professional choices and callings made well beyond just a question of their remunerative or supposed incidental social prestige worth). Part and parcel of the genuine social intellectual–function/posture is to undermine this skewing towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology\textsuperscript{100} -<in-existential-extrication-as-of-existential-unthought>\textsuperscript{6} positive-opportunism\textsuperscript{7} of living-development–as-to-personality-development and institutional-development–as-to-social-function-development) and reconstrue human-subpotency aporeticism in terms of ‘non-immediacy prospective sublimating value and ontological-veracity disposition’. In this regards historically, without individuals making choices not to optimally pursue ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ as to their given \textsuperscript{80}presencing—absolutising-identitive-constitutedness\textsuperscript{11} ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ but instead optimising their effort for ‘non-immediacy prospective sublimating
value and ontological-veracity disposition’ then the possibility will not arise for the very backbone of human value and ontological-veracity sublimation (reflecting the ‘non-immediacy prospective sublimating value and ontological-veracity disposition’) upon which ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ is grounded. History knows that the ‘contorted human presencing—absolutising-identitive-constitutedness mentality of registry-worldviews/dimensions’ as of ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ do not truly pay their dues to the Socrates, Descartes, Kants, Newtons, Leibniz, Pasteurs, Rousseaux, Diderots, Einsteins, Teslas, etc. upon whose ‘meaningfulness-and-teleology infrastructure building ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ arise and outlandishly skew human meaningfullness-and-teleology (and so not only with human Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology but is equally reflected in a poor-spirited bland conception of human living-development—as-to-personality-development and institutional-development—as-to-social-function-development). This insight is critically important not as an idle exercise of merely stating the appropriateness of sublimating value and ontological-veracity disposition but in reflecting that the skewed underpinning—suprasocial-construct projected and preconvergently—de-mentated/structured/paradigmed ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ cannot be construed as absolute as in effect it will ultimately prospectively stultifying the requisite ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ that acts as the backbone for human value and ontological-veracity sublimation (as has always been the manifest case for surpassing the uninstitutionalised-threshold of registry-worldviews/dimensions). The fact is ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ as underlying presencing—absolutising-identitive-constitutedness end up as the registry-

This insight can be illustrated as follows: supposed say in 5000 BC an asteroid or virus could bring about a human cataclysm, such a ‘potential manifestation of existence is not beholdening to human appreciation of the existential implications of the notion and science behind the asteroid or virus’ and in this regard suppose extraterrestrials living in a ‘supposedly habitable Mars’ had achieved our modern-day civilisational and technological level, it is inevitable that
they will effectively adopt ‘ontological-good-faith/authenticity ~postconverging–de-
mentating/structuring/paradigming’ existential-condescension<of-
apriorising/axiomatising/referencing–psychologism>’ with regards to the human species on
Earth and strife to preempt such a cataclysm as to their technical capacity. We can appreciate
that the human species on Earth as to its relative-ontological-incompleteness doesn’t have a
pretense to being of a ‘neutrally/objectively sound human ontological-performance-
<including-virtue-as-ontology> state failing to factor in human specific
apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity )—ontological-
deficiency arising from its specifically given <amplituding/formative–
epistemicity>totalising–thrownness-in-existence but together with the extraterrestrials is
rather de-mentatively/structurally/paradigmatically in existential-discursivity—implicated-
sublimation-over-desublimation relation as to the primacy of the full-potency of existence over
any subpotency (speaking fundamentally to prior human ontological-commitment ~<implied—
self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-
mentating/structuring/paradigming –as-being-as-of-existential-reality>) with regards to the
fact that the ontological-veracity of all humans as human-subpotency is priorily of existential-
discursivity—implicated-sublimation-over-desublimation superseding pretenses of mere-
formulaic methodologising/mutualising/organising/institutionalising prescences as to
entitlements of presencing—absolutising-identitive-constitutedness articulated induced elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-
outside—existential-contextualising-contiguity. Speaking of the requisite ‘owning-up’ as to
when relative-ontological-completeness avails rather than ontological-bad-
faith/inauthenticity in upholding relative-ontological-incompleteness (given that
immortality/existence-perspective as to intemporality cannot be construed as arising from our
prior mortals whims superseding of existential sublimation entailment and such presumption
rather speaks to preconverging-or-dementing—apriorising-psychologism and not postconverging-or-dialectical-thinking—apriorising-psychologism). It is this pre-eminence of existential-discursivity—implicit-sublimation-over-desublimation that explains why the availing of relative-ontological-completeness as to dimensionality-of-sublimating (\langle\text{amplituding/formative}\rangle\text{supererogatory–de-mentativeness/epistemic-growth-or-conflicatedness}/\text{transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation}\rangle) takes precedence in defining human intellectual-and-moral ontological-performance—<including-virtue-as-ontology> and so as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation. This implied existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity—postconverging–de-mentating/structuring/paradigming existential-condescension—<of-apriorising/axiomatising/referencing–psychologism>’ effectively underlies the ‘Derridean underdetermination-imbued force/violence conception’ and ‘Foucauldian knowledge/power conception construed as knowledge-empowerment/ignorance-disempowerment’, as the preformulating/preframing/premeaningfulness—<metaphoricity—disposition—as-to-psyche-induced-psychologism-of-existential-stake> from which human meaningfulness-and-teleology veridically arises. Thus existential-discursivity—implicit-sublimation-over-desublimation implies that the human is already ‘de-mentatively/structurally/paradigmatically intellectually-and-morally existentially engaged as to its limited-mentation-capacity’ without any ‘neutrally/objectively sound human ontological-performance—<including-virtue-as-ontology> state failing to factor in human specific apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—ontological-deficiency arising from its specifically given \langle\text{amplituding/formative–epistemicity}\rangle\text{totalising–thrownness-in-existence}\rangle’. This insight puts into perspective our
presencing—absolutising-identitive-constitutedness conception of intellectual-and-moral responsibility wherein supposedly failed/unsucessful/ineffective initiatives undertaken as to relative-ontological-completeness (for instance with regards to some public engagement aspiratory dispositions of such intellectuals like Sartre, Foucault, etc. and in the scientific domain for instance controversies associated with Louis Pasteur breakthroughs in microbial science) seem to be wrongly analysed from the posture of a supposedly neutral/objective social-setup conception of intellectual-and-moral responsibility (that ducks/ignores such relative-ontological-completeness aetiologisation/ontological-escalation posturing) without factoring in that ‘the social-setup’s relative-ontological-incompleteness specific apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—ontological-deficiency arising from its specifically given <amplituding/formative-epistemicity>totalising–thrownness-in-existence’ is not of neutrally/objectively sound ontological-performance,<including-virtue-as-ontology>; as to the fact that for instance the incidence of modern-day wars and their man-made catastrophies do not speak of neutral/objective individuals and social intellectual-and-moral responsibility as to their existence within the meaningful sovereign frameworks that de-mentatively/structurally/paradigmatically directly/indirectly validate such calamities. In other words, our intellectual-and-moral responsibility is already engaged as to our <amplituding/formative-epistemicity>totalising–thrownness-in-existence and the idea that any attitude of unconcern/indifference is intellectually-and-morally neutral/objective is bogus; and human intellectual-and-moral responsibility starts at the very least with an orientation to relative-ontological-completeness as to overall existential dimensionality-of-sublimating (<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation). Besides such a more stark elucidation as to Being-

The bigger point here is that prospective human sublimation underlying prospective knowledge-reification in relative-ontological-completeness cannot be engaged with any given registry-worldview/dimension in relative-ontological-incompleteness as if the latter is of a ‘neutrally/objectively sound human ontological-performance—including-virtue-as-ontology’ state failing to factor in human specific apriorising/axiomatising/referencing—of—existential—contextualising-contiguity—ontological-deficiency arising from its specifically given totalising—thrownness-in-existence with regards to the fact that human is already engaged in existential-discursivity—implicit-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity—postconverging—de-mentating/structuring/paradigming existential-condescension—of—apriorising/axiomatising/referencing—psychologism’ (and so very much countering the deceptive eliciting in desublimation of wooden-language—imbued—

In this regards, and in the bigger scheme of things existential-discursivity—implicated-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity-postconverging–de-mentating/structuring/paradigming existential-condescension-of-apriorising/axiomatising/referencing–psychologism’ implies that as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’, the respective state of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism cannot be construed as of ‘neutrally/objectively sound human ontological-performance-including-virtue-as-ontology state failing to factor in human specific apriorising/axiomatising/referencing-of-existential-contextualising-contiguity—ontological-deficiency arising from its specifically given \(<amplituding/formative–epistemicity>totalising–thrownness-in-existence with respect to prospective base-institutionalisation, universalisation, positivism/rational-empiricism and notional–deprocrypticism respectively; and as relative-ontological-completeness avails intellectual-and-moral responsibility is rather reflected as of dimensionality-of-sublimating \(<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation). Unlike it is often assumed from a sloppy conception of human sublimation in existence (caught up in any given presencing—absolutising-identititive-constitutedness self-justification of uncertainty of prospective human sublimation), the comprehensive coherence of human sublimation in existence as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation is effectively highly regular and consistent (and this can only be fully appreciated from an ontologically sound conception of
existence as of its immanently tautologuous coherence speaking to its ontological-contiguity\(^7\) as to the possibility for intelligibility to arise as so-reflected with the overall ontological-contiguity\(^7\)—of-the-human-institutionalisation-process\(^8\), so-associated with human limited-mentation-capacity-deepening\(^6\)). This conflict in the perception and relation to human sublimation in existence between metaphysics-of-presence\(\langle\text{implicit}-\text{`nondescript/ignoreable–void ‘as-to-presencing—absolutising-identitive-constitutedness}\rangle\) and human teleology\(^10\) speaking of ‘human phenomenal/manifest conceptivity/epistemic-reflexivity in existence as ontological (so-reflecting \(\langle\text{amplituding/formative} \text{–disposedness–⟨as-to-orientation/value-construct/valuation–and–derived-parameterising}\rangle\) and \(\langle\text{amplituding/formative} \text{–entailment–⟨as-to-totalising-contiguous/coherent–factuality-of-variability}\rangle\)’, as reflecting the implications of human limited-mentation-capacity-deepening\(^6\) underlying the ontological-contiguity\(^7\)—of-the-human-institutionalisation-process\(^8\); such that human sublimation is hardly ‘purist’ and rather occurring as from successive human registry-worldviews/dimensions projections of their specifically flawed \(\langle\text{presencing—absolutising-identitive-constitutedness}\rangle\) given apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument–for–

The insight here is that human state of prior relative-ontological-incompleteness de-mentatively/structurally/paradigmatically impacts reflexively on human appraisal of its prospective relative-ontological-completeness sublimation implications, and so across the successive registry-worldviews/dimensions right up to the originariness/origination

in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity —
of-the-human-institutionalisation-process is existentially susceptibly instigated mostly as of
materially/technically induced sublimation associated with tools, equipment, technical
knowhow and natural science as to their immediately amenable positive-opportunism
social implications ultimately leading to subsequent human
methodologising/mutualising/organising/institutionalising sublimating overall
meaningfulness-and-teleology. But the overall postconverging—de-
mentating/structuring/paradigming of human sublimation in existence as such is not always
coherent as to the discrepancy in the occurrence of specific sublimations and desublimations
say material and technical sublimation pointing to relative-ontological-completeness and
‘immaterial/social overall relative-ontological-incompleteness —presublimation-construct–of—
meaningfulness-and-teleology instigating the referencing/registering/decisioning
desublimation of the nascent-particular/incipient-and-material/technical-sublimations
<blinded-to-their-relative-ontological-completeness — reference-of-thought-devolving>’. In this
regards, we can appreciate how the subsequent immaterial/social sublimation required for prospective positivism/rational-empiricism came to be appreciated by such thinkers like the Rousseaux, Diderots, etc. as to the fact that the material possibilities of their epoch associated with the printing press and increasing technical knowhow rendered the immaterial/social overall relative-ontological-incompleteness\(^{89}\)–presublimation-construct–of–‘meaningfulness-and-teleology\(^{100}\) of their epoch wanting, explaining for instance Rousseau’s appreciation of the noble-savage and nature as speaking to a prospective aporeticism overcoming/unovercoming that recognised that mankind needed a more mature conception of interhuman relationship and human relation with nature as to when mankind/some-of-mankind began manifesting a more developed relationship with nature beyond just as of the immediacy of subsistence/survival relationship with nature (say for instance having technically more efficient guns with gunpowder didn’t imply just killing animals at whim or along the same lines explaining his anti-Slavery stance); thus speaking of the prospectively requisite immaterial/social sublimation as to prospective positivism/rational-empiricism postconverging-or-dialectical-thinking\(^{10}\)–apriorising-psychologism. In this regards even budding-positivists like Galileo, Descartes, etc. just as well implicitly recognised this discrepancy of prospective material and technical sublimation positivistic science in relative-ontological-completeness\(^{7}\) and the immaterial/social overall relative-ontological-incompleteness\(^{89}\)–presublimation-construct–of–‘meaningfulness-and-teleology\(^{100}\) of medieval-scholasticism associated with alchemic/magical thinking, to the point that in many ways their actions were directed towards articulating at the very least an underlying ‘scientific—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation–(as-to-underlying,—ontological-commitment—<implied—self-assuredness-of-ontological-good-faith/authenticity—postconverging–de-mentating/structuring/paradigming—as-being-as-of—existential-reality>)’ as the requisite immaterial/social sublimation for enabling positivistic
science as we know it today to arise. This very insight explains ‘the enlightenment struggle against feudalism and slavery as advocated say with such a thinker like Rousseau’ as to the fact that the technical and scientific progress as to relative-ontological-completeness weren’t the occasion to put such technical and scientific progress like shipbuilding and other ocean voyage technologies at the service of the prior medievally clouded immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology value-construct and shallow-supererogating methodologising/mutualising/organising/institutionalising <preconverging—‘motif-and-apriorising/axiomatising/referencing’—imbuing—existentialising—enframing/imprintedness—(as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition), but rather called for a renewed conceptualisation of humanity beyond a mentality of immediate subsistence/survival. Thus it is always the case that the positive-opportunism driving the secondnatured institutionalisation of human sublimation induces discrepancy as to immediate material and technical possibilities of sublimation and the requisite dispensing-with-immediacy-for-relative-ontological-completeness—by-reification*/contemplative-distension*/immaterial/social sublimation considerations that rise to the aporeticism overcoming/unovercoming challenge of the immediate material and technical possibilities of sublimation. In many ways this discrepancy of material and technical sublimation and immediate distortive immaterial/social desublimation is reflected in the ‘historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition gimmickiness/desublimation relation with meaningfulness-and-teleology* of our positivism–procrypticism, for instance as associated with an ‘underlying dumbing-down public intellec­tion and media industry’; as media-access and its commercialisation function in many ways rather adhocly substitutes-for/undermines a profound genuine social intellectual—function/posture as to social-stake-contention-or-confliction implications. The further implication of this discrepancy is in
highlighting that the supposed equanimity/balance of the overall politico-institutional system as to sublimating notions of sovereignty, democracy, free-will, etc. is only veridically effective as to the originariness/origination—{so-construed-as-to-ontological-normalcy/postconvergence-perspective-scalarising-construal-of-existence}—perspective of notional—deprocrypticism given the perpetual challenge of material sublimation upon human immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology—as-of—meaningfulness-and-teleology instigating the referencing/registering/decisioning desublimation of the nascent-particular/incipient-and-material/technical-sublimations—<blinded-to-their-relative-ontological-completeness—reference-of-thought—devolving>—that goes on as of presencing—absolutising-identitive-constitutedness to render the supposed equanimity/balance of the overall politico-institutional system as to sublimating notions of sovereignty, democracy, free-will, etc. increasingly of relic/artifactual human ontological-performance—<including-virtue-as-ontology> reflected in their failing effective outcomes of equanimity/balance; wherein their practice increasingly tends to dominance/vested-interest actors and sycophantic-sophistry induced desublimating narratives as to the <amplituding/formative> wooden-language—{imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct—meaningfulness-and-teleology—as-of—'nondescript/ignorable—void ’—with-regards-to-prospective-apriorising-implications>} displayed in the public domain (caught-up/entrapped in ‘a politico-institutional beholdening relic/artefactual disenfranchising notion of both-sides’ as psyching-subterfuge that renders the common concrete pragmatic aspirations of sovereign individuals increasingly politically irrelevant as to the paradox for instance that the healthier political framework in the years following the second world-war, as hardly subject to closed-circles of effective direct/indirect
politico-institutional influence rampant today, notwithstanding the even greater social prejudice/bigotry/closed-mindedness was able to induce critical progressive social transformations that in many ways the modern-day political framework as to a period of rather profound and real-world cosmopolitanism/opened-mindedness can only dream about) as the more potent possibilities for social transformation are increasingly subdued under politico-institutional defaulting frameworks-and-practices rather surreptitiously subjected to closed-circles of effective direct/indirect politico-institutional influence ‘as to a strategic capacity to elicit old and relatively aporetically irrelevant beholdening narratives of identity as a divide-and-conquer strategy for undermining the real and concrete common sovereign narrative of social transformation possibilities’ as so-reflected with commonly held objective sovereign aspirations that cut across party/ideological affiliations when not subjected to the disenfranchising effects of crafty politicised beholdening narratives of identity with their ‘ad-hoc/arbitrary popping-up in the media at critical electoral moments involving high emotional charge quelling cerebral thinking as of the modern-day efficient disenfranchising technique of flawed apriorising deception involving arbitrarily-skewing-or-debasing-the-terms-of-supposedly-constructively-opened-public-debate’ (as to the wrong mental enculturation of the notion that the ‘political game’ in-of-itself precedes individuals and social sovereign aspirations as if the latter were just ‘paying fans to a sports encounter’ rather than a political process meant to serve them as so reflected with an enculturated media political narrative hardly/poorly making room for direct individual and social sovereign aspirations as centrally defining with the consequence that substance is increasingly overwhelmed by a political characters portrayal of the political debate with political actors then effectively turning over rather towards the levers of their potential power which is paradoxically not necessarily/deterministically social sovereign aspirations as to a relic/artifactual conception-and-projection in the public domain but rather surreptitious/private closed-circles of effective direct/indirect politico-institutional

Even in the purely intellectual sense, modern-day scientific advancements and achievements have correspondingly given rise to a distorted manifestation of science-ideology as a usurpatory mouthpiece of veridical science-in-practice that effectively rides the wave of natural sciences accomplishments and in so doing projects of a naïve presencing—absolutising-identitive-constitutedness epistemic conception of science that in many cases poorly reflects upon effective scientific practices and craft as it poorly appreciates the dynamics of the overall human knowledge and scientific enterprise as to the aestheticisation—and—aestheticisation-towards-ontology underlying the overall ontological-contiguity—of-the-human-institutionalisation-process, so-reflected from such science-ideology poor appreciation of the implications of the historiality/ontological-eventfulness /ontological-aesthetic-tracing rendering the scientific adventure as of a living existential-contextualising-contiguity exercise. Along the same line of intellectual appreciation of prospective sublimation implications as to the fact that nascent-particular/incipient-and-material/technical-sublimations—blinded-to-their-relative-ontological-completeness—reference-of-thought—devolving ‘critically points to an overall nascent knowledge-reification gesturing directly or indirectly prescient of a comprehensive sublimating meaningfulness-and-teleology conception of the given prospective relative-ontological-completeness registry-worldview/dimension’; the possibility for ontology/science is effectively ‘an ontological-contiguity projection as to an all-englobing/all-encompassing construction’ (notwithstanding the epistemic limitation inherent to human limited-mentation-capacity) that captures relative-ontological-completeness induced sublimation as reflected in any subject-matter (as to its phenomenal/manifest—subpotency—(in-transitive-conflatedness—reflexivity,—in-the-full-potency-of-existence’s—sublimating—nascence)) and so as to the subject-matter underlying existential-discursivity—implicated-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity—postconverging—de-mentating/structuring/paradigming existential-condescension—of-apriorising/axiomatising/referencing—psychologism’ (and so as effectively reflected by the overall reference-of-thought and reference-of-thought—devolving/subject-matter ‘relative-ontological-completeness —apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity—sublimation—(as-to-underlying,—ontological-commitment—implied—self-assuredness-of-ontological-good-faith/authenticity —postconverging—de-mentating/structuring/paradigming —as-being-as-of-existential-reality)’). In this regards, we
can appreciate that going by the positivism/rational-empiricism relative-ontological-completeness registry-worldview/dimension, the natural sciences do not allow for any other external interpretations of their phenomenal/manifest-subpotency-(in-transitive-conflatedness-reflexivity,-in-the-full-potency-of-existence’s-sublimating-nascence) (but for issues of epistemic limitation inherent to human limited-mentation-capacity). In this regards, there can’t be any instance/circumstance to which the mathematician will construe of 1+1 as being equal to 4 as to totalisingly-disentailing—discretion/whim-of-thought; as to the fact that inherent ontological-veracity precedes-and-supersedes ‘mere-formulaic–methodologising/mutualising/organising/institutionalising human-subpotency

In this regard, relic/artifactual conception of veridical human
historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective–ontological-normalcy/postconvergence-reflected-'epistemicity-relativism'> rather speaks to deficient knowledge-reification gesturing caught up in presenting—absolutising-identitive-constitutedness as of beholdening-becoming—distortive-originariness/distortive-origination—as-to—historicity-tracing—inhibited-mental-aestheticising. Likewise, deliberate intellectual decisions emphasising institutional self-preservation and rendering veridical knowledge elucidation secondary to such institutional self-preservation decisions, in many ways wrest away from such supposed intellectual institutions their status as veridically knowledge producing as these increasingly become political as to their emphasising of a political motive ready to forego veridical knowledge-reification for its institutional self-preservation; with the consequence of increasing sycophantic-sophistry and genuine social intellectual—function/posture indifference or betrayal to dominance/vested-interest actors. This issue of institutional self-preservation is in many ways at the very root of the non-intellectual, media-driven and dishonest criticisms levied against postmodern-thought as to the latter obvious conclusive emancipatory implications; so-reflected in a practice of ‘clouded thought’ that has no true intellectual elucidation purpose but rather an extension of the political over veridical knowledge-reification (such that arguments about the accommodation of different intellectual practices tend to be articulated wrongly as to imply that ‘the true ontological-veracity as to sublimation-over-desublimation of intellectual practices’ are irrelevant and secondary to the mere purpose of institutional accommodation of different intellectual practices). Today manifestations (in the political domain) of protest votes for instance, more than just a question of poor political leadership actually has to do in many ways with ‘an alienating politico-institutional entrapment/frame-up of sovereign choice’ within the supposed democratic process that ‘forestalls-and-narrows as of strategic rules and processes’ the effective political fulfilment of individual and social sovereign choices inducing anti-sovereign consequences as to defaulting policy consequences to dominance/vested-interest actors without truly being institutionally subject to competing profound alternative institutional aestheticising contemplation given their institutional ascendance. setup between prospective positivistic knowledge and prior non-positivistic knowledge is exactly what can enable pedantic dispositions to cultivate non-positivistic meaningfulness-and-teleology in such a social-setup), and critically in this regards it principally involves pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation—(blurring/undermining-of-prospective-totalising-entailing,-as-to-entailing-

full-potency of existence’ associated with nascent-particular/incipient-and-material/technical-sublimations—blind-to-their-relative-ontological-completeness — reference-of-thought-devolving—is necessarily of totalising-entailing as to the immediate-potency of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation thus relatively undermining such ‘beholdening as sovereignising—imbued-subontologisation/subpotentiation’ gesturing associated with social-and-institutional-frameworks-of—referencing/registering/decisioning as of ‘blurriness in existentialising—decisionality’ (that is, where the latter does not extensively intrude into the former as for instance in determining-and-demarcating the framework of natural sciences research). Hence in many ways prospective knowledge cannot elude the aporeticism overcoming/unovercoming of such ‘beholdening as sovereignising—imbued-subontologisation/subpotentiation’ gesturing and so relatively to the given domain-of-study/domain-of-interest blurriness, wherein blurriness is reflected with desublimating—existentialising—decisionality supposedly taking precedence over inherent prospective knowledge-reification rather than ‘unbeholdening sublimating—nascence ontologising-depth of the full-potency of existence (implied as to the very inherent knowledge-reification gesturing as determining sublimating—existentialising—decisionality)’; with this conflicting of ‘beholdening as sovereignising—imbued-subontologisation/subpotentiation’ and ‘unbeholdening sublimating—nascence ontologising-depth of the full-potency of existence’ so- reflected across the successive registry-worldviews/dimensions given human notional—firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as—from-perspective—ontological-normalcy/postconvergence as to prospective social-stake-contention—or-confliction (beyond-the-consciousness-awareness-teleology—in-existential-extrication-as-of-existential-unthought). Thus such an aporeticism overcoming/unovercoming necessarily imply the integration of the analysis of pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation{blurring/undermining-of-prospective-totalising-entailing},
as-to-entailing-<amplituding/formative–epistemicity>totalising-in-relative-ontological-completeness⟩ as part and parcel of prospective knowledge-reification as to knowledge-notionalisation, and especially as so-manifested increasingly with ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge frameworks’ that on the baiting of imprimatur then switch on to propound ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge constructs out-of and implicitly obviating the veracity of the universal-transparency-{transparency-of-totalising-entailing, as-to-entailing,<amplituding/formative–epistemicity>totalising-in-relative-ontological-completeness⟩ of knowledge-reification’ (and so as to self-serving social-vestedness/normativity-{discretely-implied-functionalism}) and this must effectively be contested. Such lousiness and as broadly reflected in poor media editorialising in many ways increasingly turns media accessibility into intellectual pre-eminence as ‘intellection is no longer about depth of contemplation and knowledge-reification for sublimation but rather about gimmicky-and-flashy threads of mere communication performance’ with many such interlocutors openly admitting-and-manifesting their critical lack of relevant intellectual thematic competence as popularity then supposedly becomes the driving force of thought; the fact though remains (however the seemingly trivialising concern about such media driven pop-intellectualism as rather unimportant in some milieus of more profound intellectual contemplation) that unfortunately in many ways directly or indirectly (as to the social-and-institutional-frameworks-of—referencing/registering/decisioning susceptibility to ‘blurriness’ in existentialising–decisionality’ and as encouraged by dominance/vested-interest actors) such pop-intellectualism end up being elevated as the summum of intellection in the social while overlooking the requisite depth of sublimating universal-transparency-{transparency-of-totalising-entailing, as-to-entailing,<amplituding/formative–epistemicity>totalising-in-relative-ontological-completeness⟩ of critical importance for effective social-and-institutional-
frameworks-of—referencing/registering/decisioning sublimating–existentialising–decisionality (and as the ‘mediatic framework of access and communication of sublimating thought’ is rather turned around into ‘a framework that supposedly inherently create sublimating thought by mere access and communication’ especially as to naive social feel-good banalities as supposedly sublimation actually of desublimating <preconverging–‘motif-and-apriorising/axiomatising/referencing’–imbuing>–existentialising—enframing/imprintedness–⟨as-to- historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition⟩ as of vague impression-driven/good-naturedness/wishfulness ‘beholdening as sovereignising–imbued-subontologisation/subpotentiation’). But then the idea of knowledge driven as of totalising-entailing as so-demonstrable with say the momentous development of quantum physics with the physics totalising-entailing implications of argumentations of sublimating–existentialising–decisionality at critical moments moving from one physicist to the other as of ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ (whether Bohr, Einstein, Dirac, Schrodinger, etc.) without any extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge notion like reputation having any incidence (as in epistemic re-originariness/re-origination projective/reprojective cross-subjection of knowledge-reification to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation as herein underlied with notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> implied formativeness<as-to-intersolipsism-of-preformulating/preframing/premeaningfulness-imbued-mediativity-and-deferentialism>-of-meaningfulness-and-teleology in nonpresencing-⟨perspective–ontological-normalcy/postconvergence⟩ epistemic-projection, and so similar to a Derridean ‘heterogeneous genesis’ epistemic conception), speaks to a more profound lack of constraining aporeticism overcoming/unovercoming as to institutional convenience that fails to articulate such a ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ and thus
renders in relative terms the social domain more intellectually impotent in inducing a similar level of sublimating–existentialising–decisionality as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation as is relatively the case in the natural sciences (and so notwithstanding the relative blurriness of the social which can effectively be brought to exactifying/precisioning–of-sublimation<as-to-entailing-theoretical,-conceptual-and-operant-implications> as to the requisite self-criticality overcoming as well as emotional-involvement overcoming rather than assuming a relatively false social and institutional pre-eminence driven relation to knowledge); with the further implication of such ‘totalising-entailing pertinence of thought upheld/elevated above anyone person’ being that the ‘knowledge-reification process becomes highly impersonal and complementary in a natural way’ without the artifice of ‘politically-driven accommodation of ideas not necessarily as of the pre-eminence of existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation’. In this regards, it is contended that the argumentation articulated herein are strictly striving towards aetiologisation/ontological-escalation in reflection of ‘abstract human intemporal individuative ontological-performane (as to the backdrop of the notionalisation/notional-conception/amplitudding of knowledge in reflection of human notional–firstnaturedness—temporal-to-intemporal-dispositions<so-construed-as-from-perspective–ontological-normalcy/postconvergence>) while striving for totalising-entailing pertinence of thought’ and so projecting beyond any implications of personalising/particularising import but rather turning towards ‘ontological elucidation import as it then reifyingly-and-empoweringly enables human sublimation as to prospective operationalising construals’ and so-reflected in the idea that the fundamental stakes of prospective knowledge-reification is about prospective social-stake-contention-or-confliction and not prior social-stake-contention-or-confliction (as for instance prospective positivistic meaningfulness-and-teleology is not developed to go about articulating/relating-to
meaningfulness-and-teleology as to the prior social-stake-contention-or-confliction of non-positivistic meaningfulness-and-teleology, and so by the mere implications of dimensionality-of-sublimating \(\langle\text{amplituding/formative}\rangle\) supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation \(\rangle\) (even as such prospective meaningfulness-and-teleology tend to be rather desublimatingly related to as of dimensionality-of-desublimating-lack-of \(\langle\text{amplituding/formative}\rangle\) supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation \(\rangle\) by the prior presencing—absolutising-identitive-constitutedness \(\langle\text{preconverging—‘motif-and-}
\text{apriorising/axiomatising/referencing’—imbuing—existentialising—enframing/imprintedness—
\text{as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition}\rangle\). But then as well the fact remains that the reality of human knowledge-reification especially (as speaking to prospective human destructuring-threshold \(\langle\text{uninstitutionalised-threshold}angle\) /presublimating–desublimating-decisionality \(\rangle\)-of-ontological-performance \(\langle\text{including-virtue-as-ontology} \rangle\) is inevitably infused with social-and-institutional-frameworks-of—referencing/registering/decisioning manifest politically-driven motives of desublimating–existentialising–decisionality beyond just ‘a purported baseline conception of neutral knowledge-reification’ with such frameworks projecting their \(\langle\text{preconverging—‘motif-and-}
\text{apriorising/axiomatising/referencing’—imbuing—existentialising—enframing/imprintedness—
\text{as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition} \rangle\) conception of the ‘overall possibility of human existentialising—decisionality as to catchmenting-by-rejection’. In this respect, it is important to grasp that knowledge-reification then desublimatingly becomes an issue of more than just rightness or wrongness but involves a
striving for interest/advantage/ascendancy/head-start with respect to existentialising—decisionality of prospective knowledge-reification\textsuperscript{96}, and this reality given human notional—firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence> is reflected by an inherent human ‘referencing/registering/decisioning of shallow-supererogation —to—profound-supererogation\textsuperscript{97} conception of social-stake-contention-or-confliction’ with respect to prospective knowledge-reification\textsuperscript{87}. In many ways recent history of human thought has shown that ‘social-and-institutional-frameworks-of—referencing/registering/decisioning manifest politically-driven motives of desublimating—existentialising—decisionality going beyond just neutral knowledge-reification\textsuperscript{97}’ that cannot be ignored as to intellectually decadent practices of scepticism and blurring underlied by cynical reframing of thought at later moments (which had been related to sceptically and in blurriness at previous moments), and so as to shallow-supererogation\textsuperscript{97} desublimating—existentialising—decisionality driven by mere institutional-ascendancy. In many ways thus the conceptualisation herein ‘is not caught-up/constrained to any such fooleries’ (as to the history of such ploy against postmodern thought) and is consciously articulated as to the profound-supererogation\textsuperscript{97} motive of human sublimation beyond/and-not-subjected-to the \textsuperscript{97}

identifying the relevant aporeticism overcoming/unovercoming in the very first place in order
to then effectively relate to what is of prospective profound sublimating intellectualism and so

This ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge paradox’ when it claims to co-opt/supersede prospective sublimating knowledge-reification can be further elucidated along the same lines (with regards to living-development–as-to-personality-development and institutional-development–as-to-social-function-development) wherein for instance the notion of say genius is supposed to imply the ‘supposed genius’ is exceptional/abnormal (by their ‘specifically given sublimating elucidation’ so-enabled as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation). knowledge as of historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition with the accompanying social disenfranchisement/swindling/corruption/dispossession. Such development as to ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge paradox’ is ultimately associated with scenarios of institutional-ascendency and other dominance/vested-interest (as associated with many a modern-day think-tank and secret institutions) overtly or covertly construed as inherently predicative-of and superseding knowledge as to networks of influence bent on intimating what can be thought or not as well as pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation of genuine knowledge, in ‘temporal beholdening as sovereignising—imbued-subontologisation/subpotentiation (implied pretense-of-sublimation as to desublimating—existentialising—decisionality supposedly taking precedence over inherent prospective knowledge-reification’)’. It is herein contended that in many ways as to human ontological-good-faith/authenticity—postconverging—de-mentating/structuring/paradigming, it is technically impossible to strategise against ontology (given existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation—as-to-perspective—ontological-normalcy/postconvergence—implied—‘prospective-aporeticism-overcoming/unovercoming’), as to the fact that ontology is absolutely bound to its course come-what-may ‘with such contrivances rather notionally integrated as herein into ontological-veracity as part-and-parcel of ontological-elucidation’ that allows no room for any pedantic ‘extra-knowledge/knowledge-outside-knowledge/knowledge-without-knowledge paradox’ and not even when it elicits amplituding/formative wooden-language—{imbued—temporal—mere-form/virtualities/dereification /akrasiatic-drag/denatured/preconverging-or-dementing—narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology} as of shortsighted social power play. Such ‘fraudulent conception of knowledge’ thrive not only as to punctual thematic issues like

adequate-and-healthy enlightening public-debate with such enlightening encumbering upon a

In this regards, it is critical to appreciate that the democratic process is a sovereignty-imbuing process and while this sovereignty-imbuing process is critical as the point-of-departure for socio-econo-political social-stake-contention-or-confliction aporeticism overcoming/unovercoming it is incomplete if it is merely construed/manipulated as to essentially sovereignty-giving without a cultured aspiration to grasp and operate as to prospective ontological-veridicality (as so-understood by the Socratic-philosophers) just as our sovereignty over say our house doesn’t necessarily imply our technical competence with requisite house enhancements like electricity, plumbing, etc. even as our sovereignty is the point-of-departure for our independent/sovereign contemplating to undertake such house enhancement chores. This reality underlies the contention herein of the ‘overrated pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation of meaningfulness-and-teleology’\textsuperscript{105} as to the fact that human discursivity is not a discursivity of absolute-mentation-capacity but rather a discursivity of limited-mentation-capacity, and thus it is a discursivity of subpotency as to human-subpotency which doesn’t necessarily subject/supersede existence as to existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation\textsuperscript{106} as warranted for prospective sublimation/emancipation (even as human social-and-institutional-frameworks-of—referencing/registering/decisioning of existentialising—decisionality by reflex tend to absolutise human discursivity as to presencing—absolutising-identitive-constitutedness social-vestedness/normativity\textsuperscript{61}<discretely-implied-functionalism>); thus requiring appropriate nonpresencing—<perspective—ontological-normalcy/postconvergence> epistemic-projection (as to requisite human limited-mentation-capacity-deepening towards absolute-mentation-capacity, in projective reflection of ontologisation/omnipotentiality as to ontological-normalcy/postconvergence, as sought-after by the genuine social intellectual—function/posture involving its specifically cultivated arts/skills and time investment and on the intimation that the implied deferential-formalisation-

Such a conception of <supererogatory~human-subpotency>—effecting is critically relevant in appraising that ‘technical/profound articulations are not made gratuitously’ (in contrast to a modern-day unnecessary ‘social-and-media reflex of facility/convenience’ shunning technicity/profundity which goes on it is herein argued to be at the ‘infrastructural/root source of the cultivation of public and institutional discursive mediocrity’ as to ‘enculturating a practice of public interestedness/profundity mediocrity and public awareness/accounting/decisioning mediocrity’ whereas the technicity/profundity of modern-day training and professions rather points to the fact of a public potentially capable to handle more creatively profound/technical public analysis and public debate rather than just ‘parsimonious/frugal ratings-driven defining conception of intellectual analysis prone to desublimating disorientation, misanalysis and irrelevance’) as to the requisite social notional~self-distantiative contemplative technicity/profundity that inherent existence sublimating–nascence warrants to make available appropriately sublimating
supererogatory–human-subpotency–effecting (whether as to direct knowledge acquisition or appropriate percolation-channelling–in-deferential-formalisation-transference enabling the sovereign–function/posture ontologising-aptness). This poor appreciation of technicity/profundity in the public arises as of a poor projection of existence’s sublimating-nascence to wrongly imply that the individual ‘is perfect as they are’ with supposed ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-or-institutional-or-social sovereign’s service’, and critically wrongly implying that knowledge as to organic-knowledge can be acquired without the requisite ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’/by-reification'/contemplative-distension’ of the individual as to their ‘appropriate notional–self-distantiation–imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>’, while at the same time ‘a pseudo-contrition as to awareness of such relatively shallow technicity/profundity cultivated in such social-and-media spaces’ doesn’t deter such spaces (consciously or unconsciously) from surreptitiously acting as of profound technicity/profundity at critical moments of public discourses with the consequence that ‘there is an opaque connection/continuity between public, media and institutional discursivity with social and institutional outcomes as if these are discrete and unrelated activities’ (whereas the supposed relevance of discursivity has to do with how it allows for comprehensible public ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’/by-reification'/contemplative-distension’ in effectively appreciating social and institutional outcomes processes rather than individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction). The concrete and natural human psychological disposition with respect to knowledge as to organic-knowledge is in appreciating that for critical thinking even for the novice it is imperative to truly engage with the substance
of the matter comprehensively-and-insightfully notwithstanding the level of exactifying comprehension (again whether as to direct knowledge acquisition or appropriate percolation-channelling-in-deferential-formalisation-transference> enabling the sovereign-function/posture ontologising-aptness). The abstraction-of-thought/principled-thought articulated with subject-matters content is not done gratuitously as it is often popularly advanced especially with ‘ontologically-flawed frameworks of blurriness’ and ratings/sales immediate interests’ susceptible to normalised/stereotyped/selfhelping/feel-good construal of knowledge. Subject-matter abstraction-of-thought/principled-thought content are not so-produced gratuitously in the sense that this effectively speaks to: the requisite sophistication/complexity for ‘full incipient supererogating breadth of human intelligibility transmutation’ (as ‘<supererogatory–human-subpotency>–effecting imbued epistemic-totalising preformulating/preframing/premeaningfulness of notional–originariness-parrhesia,–as–spontaneity-of-aestheticisation’ before the incipience of metaphoricity and then meaningfulness-and-teleology as to existentialising–frame) ‘that then permits hermeneutically/reprojectively/supererogatingly/zeroingly human sublimating-accessing/sublimating-relating-to’ existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation (noting here that what is key here is ‘the existence constrained educed sublimating’ however the technicity/profundity whereas an attitude of normalised/stereotyped/selfhelping/feel-good knowledge that ‘doesn’t align with the existence constrained educed sublimating’ is fundamentally besides the point however its ‘false convincing of the fellow human mortal approach’ so-reflected as to the deficient social outcomes it is bound to be associated with’). Critically when push comes to shove, such blatantly flawed conception of true knowledge but socially accommodated as to ‘a social-functioning-and-accordance—as-of–social-stake-contention-or-confliction conception associated with immediate public ratings and/or sales/merchandising’ (over the ‘epistemic-

It is herein contended however counterintuitive that the idea of understanding 100\% of knowledge content at one go (as commonly assumed and cultivated with such content driven by public ratings and/or sales/merchandising as to excessive simplification, distortion, superficiality, ephemerality and attention-grabbing undermining organic knowledge) is very much detrimental for a profoundly engaging and sublimating practice of public exposition to knowledge as so-inducing the degradation/banalisation of content in order to supposedly capture the most number of people at one go, and so it is herein argued very much contrary to
the natural human potential for profound knowledge assimilation which is rather of hermeneutic/reprojecting/supererogating/zeroing potential. A lot of true learning, understanding and engagement (beyond attention-grabbing and simplification convenience) comes and expands hermeneutically/reprojectively/supererogatingly/zeroingly as to re-exposition to same and similar content for eliciting an active thought/contemplative engagement that is sufficiently challenging to people's true intellectual growth possibility as to creatively eliciting and developing true contemplative interest and not just passivity (however the habituation of a plainness that turns out to seem to be ‘the popular choice’ to which in reality all individuals can succumb to but which is as of their self-reflection actually subpotentiating with regards to the ‘broad existential panoply of human epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{88}-by-reification\textsuperscript{87}/contemplative-distension\textsuperscript{26}’ necessary for prospective ontologisation/re-ontologisation as to epistemic-totalising\textsuperscript{32}~resubjecting of existential-contextualising-contiguity\textsuperscript{39}-in-reification\textsuperscript{87}). Such an attitude of ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-or-institutional-or-social sovereign’s service lacking in the underlying conception of epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{88}-by-reification\textsuperscript{87}/contemplative-distension\textsuperscript{26}’ to the education of children and young people can be particularly detrimental to critical thinking (while cultivating ‘an elicited conformity/trending/voguing/fashionability/resonance relation to \textsuperscript{5}meaningfulness-and-teleology\textsuperscript{100}’) due to the overly denatured and insufficiently challenging–and–independence-eliciting existentialising–frame of \textsuperscript{5}meaningfulness-and-teleology\textsuperscript{100} (as to veridical hermeneutic/reprojecting/supererogating/zeroing re-exposition for eliciting active thought/contemplative engagement as of prospective epistemic-totalising\textsuperscript{32}~resubjecting of existential-contextualising-contiguity\textsuperscript{39}-in-reification\textsuperscript{87} of knowledge content and generation of
varying interests); and so in reflection of the fact that a lot of childhood and human developmental learning is rather ‘passive integration of schema of thinking/contemplation and engagement’ as more decisive than really ‘knowing and recalling knowledge content’ (notwithstanding the inherently basic interrelatedness) with ‘passive integration of schema of thinking/contemplation and engagement’ critical for elaborating/framing meaning starting with the very incipient and appropriate jargon/language-conceptualisation for producing meaning (that is bound to align with constraining existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\(^{13}\)) and so rather than ‘an elicited conformity/trending/voguing/fashionability/resonance relation to meaningfulness-and-teleology\(^{16}\) with a poor sense of the prospective existential-contextualising-contiguity\(^{19}\)-in-reification\(^{8}\) of knowledge content as to epistemic-totalising\(^{12}\)-resubjecting). Where the cultivated ‘passive integration of schema of thinking/contemplation and engagement’ is rather as of ‘an elicited conformity/trending/voguing/fashionability/resonance relation to meaningfulness-and-teleology\(^{16}\)’ over eliciting an active thought/contemplative engagement that is sufficiently challenging to the true human intellectual growth potential (as to veridical hermeneutic/reprojecting/supererogating/zeroing re-exposition for eliciting active thought/contemplative engagement as of prospective existential-contextualising-contiguity\(^{19}\)-in-reification\(^{8}\) of knowledge content as to epistemic-totalising\(^{12}\)-resubjecting) enabling appropriate social ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’-by-reification\(^{7}\)/contemplative-distension\(^{26}\), then the supposed outcome of a seeming public disinterest and disengagement with technicity/profundity is rather an issue induced as to our pro crypticism/disjointedness-of-reference-of-thought social <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag in its presencing—absolutising-identitive-constitutedness <preconverging-'motif-and-

constraining existential implications) or with the relative blurriness of social-and-institutional-
frameworks-of—referencing/registering/decisioning existentialising–decisionality, and
critically in many ways the cultivation of shallow technicity/profundity (as to poor ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness by-reification /contemplative-distension’ requiring appropriate notional~self-distantiatiion~<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>) in public spaces is not detached from ‘public interestedness/profundity mediocrity’ and ‘public awareness/accounting/decisioning mediocrity’. But then technicity/profundity as to the public discourse is all about cultivating the possibility for ‘a public formulative appraisal and habituation for an enlightened sovereign engagement with public decision-making policies and technicalities’; and in this regards it is herein contended that unlike it can naively be construed about human capacity for understanding, a lot of ‘human understanding is actually passive exposition to understanding of appropriately articulated/formulated knowledge-reification so-underlying <supererogatory—human-subpotency>—effecting as to the formative-and-enabling formulative backdrop for sovereignly appraising ‘meaningfulness-and-teleology technicity/profundity’ whether with regards to public education or even childhood-development education and/or formative institutional/professional education, as to the fact that formulative understanding (as of <supererogatory—human-subpotency>—effecting) is the sovereignty/independence giving possibility for human ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness -by-reification /contemplative-distension’ relation with knowledge (as to conscious awareness existentialising—decisionality implications even if complete understanding as of complete meaningfulness-and-teleology technicity/profundity is not achieved and thus rendering the public resilient to desublimating pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation with regards to the competing discourse in public spaces by such a direct or deferential capacity for notional~self-distantiatiion~<imbued—re-motif-and-re-

In this regards, the sovereign–function/posture ontologising-aptness is truly realised as to a dynamic deferential-formalisation-transference relation with the genuine social intellectual–function/posture that is much more than a conception of ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-or-institutional-or-social sovereign’s service lacking in the underlying conception of epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness-by-reification’/contemplative-distension’ as such a flawed conception is very much prone to disenfranchising public, media and institutionalised pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation bound to ultimately induce individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction (and as such disenfranchising framework render the truly relevant public issues secondary/indirect to their punctual/immediate purpose of ratings/popularity than genuine thought). But rather the sovereign–function/posture ontologising-aptness in many ways is in a protracted continuum with the genuine social intellectual–function/posture, so-implied as to ‘a totalitative construal of the genuine social intellectual–function/posture parallel intellectual contestation of aptitudinal-substantive-pertinence educating layers of deferential-formalisation-transference as of percolation-channelling<in-deferential-formalisation-transference> enabling the sovereign–function/posture ontologising-aptness (as so-undergirded by ‘the overall underlying social-construct ontological-commitment’<implied—self-assuredness-of-ontological-good-faith/authenticity —postconverging–de-mentating/structuring/paradigmign —as-being-as-of—existential-reality> so-reflected as of social notional–self-distantiation<-imbued—re-motif-and-

The sovereign–function/posture ontologising-aptness warrants that it doesn’t fall prey to falsehoods of ‘contrastive equivalence’ implied as of distractive-alignment-to—reference-of-thought—of-apriorising/axiomatising/referencing manifested with ontologically-flawed process/processive bothsidesism formulations and recipes along the lines of decades-long politically manipulative narratives like deficits, public spending, social engineering, socialism, tribalism, fairness, libertarian, middle-of-the-ground, identity politics, etc.), and further requires that effective public and institutional intellectual contestation of aptitudinal-substantive-pertinence are not be subverted by monopolising/quasi-monopolising/networking existentialising–frame of public and institutional discursivity as of mere entitlement-and-access and ratings-drivenness. Likewise, the ‘genuine social intellectual–function/posture involves striving for a protracted continuum with the sovereign–function/posture for its ontologising-aptness’ but not in wrongly validating the existentialising–frame of discursivity as to a conception of ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-or-institutional-or-social sovereign’s service lacking in the underlying conception of epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension’ (that ultimately undermines technicity/profundity which is inescapable for achieving sublimating–nascence whether as more readily appreciated with nascent-particular/incipient-and-material/technical-sublimations—blinded-to-their-relative-ontological-completeness—reference-of-thought–devolving existentialising–decisionality or with the relative blurriness of social-and-institutional-frameworks—referencing/registering/decisioning existentialising–decisionality); and so to fundamentally bring to the consciousness-awareness-teleology that ‘sovereignty doesn’t equate with technicity/profundity’ (even as in reality it is herein contended this disconnect in the appraisal of the veridical relationship between sovereignty and technicity/profundity is mostly enabled

This eventually means that the genuine social intellectual–function/posture (adduced knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications) should be able to saliently articulate/impress-upon the ‘overall social intellection-aptitude body’ (within the framework of a natural and truly original, autonomous and non-contrived intellectual culture) ‘appropriately sublimating technicity/profundity capable of veridically responding to social and institutional aporeticism overcoming/unovercoming’ as to social dynamics of percolation-channelling-\textsuperscript{<in-deferential-formalisation-transference>} (rather than the manifested mediatic silliness wherein ‘re-processive technicity/profundity’ is widely scorned upon ‘in favour of vague normalised/stereotyped/selfhelping/feel-good narratives’ as to
mere entitlement-and-access and ratings-drivenness eliciting pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation in a ‘framework of preconvergingly–de-mentated/structured/paradigmed institutional and media contrivance’ and so-inducing ‘individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction’, and as so-cynically-and-surreptitiously cajoled by dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity-<discretely-implied-functionalism> rendering the ‘overall social intellection-aptitude body’ relatively irrelevant towards upholding the sovereign–function/posture). Thus, the sovereign–function/posture is effectively disempowered as to its relevance to public outcomes of social-stake-contention-or-confliction when the ‘overall social intellection-aptitude body’ assessment capacity is fundamentally undermined as to monopolising/quasi-monopolising/networking existentialising–frame of public and institutional discursivity as of mere entitlement-and-access and ratings-drivenness bent on side-lining salient and relevant narratives as to technicity/profundity (such that in effect through the decades such dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity-<discretely-implied-functionalism> has paradoxically effectively-and-preemptively succeeded in ‘qualifying in the public psyche’ the ‘specific overall social intellection-aptitude body that is the public university as to its underlying social-construct ontological-commitment-<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality> so-reflected as of social notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> with regards to socio-econo-political social-stake-contention-or-confliction aporeticism overcoming/unovercoming’ in falsehoods terms of ‘contrastive equivalence’ implied distractive-alignment-to-reference-of-thought-<of-apriorising/axiomatising/referencing> and so-undermining its ‘neutral sovereign–
function/posture upholding’, and with a failed public consciousness about the sovereign importance of the public university practically subjecting them to increasing private funding deeply eroding-and/or-corrupting their capacity for ‘neutral sovereign–function/posture upholding’ and most critically-so not necessarily in quashing ideas but inducing social apprehension and contestive inactivity). In many ways, the ‘overall social intellection-aptitude body’ (as to its capacity for ‘neutral sovereign–function/posture upholding’ whether as so-reflected by the public university or the press body or the ‘overall backdrop of the professional class intellectualism’) in recent decades with regards to socio-econo-political subontologisation/ideology-over-ontology has often failed to appreciate the implications of the fact that given human <amplituding/formative–epistemicity>totalising–thrownness-in-existence<amplituding/formative–epistemicity>, ‘human meaningfulness-and-teleology’ is effectively of epistemic-totalising consequence reflecting epistemic-totalising growth/conflatedness /postconverging as to existential-contextualising-contiguity<amplituding/formative–epistemicity> knowledge/interpretative veracity implications of concurrent limited-mentation-capacity-deepening (thus implying human meaningfulness-and-teleology profoundness/ontologising-depth is of notional–nondisjointedness/contiguity/coherence as of ‘<amplituding/formative>disposedness<amplituding/formative–epistemicity> (as-to-orientation/value-construct/valuation–and–derived-parameterising) and <amplituding/formative>entailment<amplituding/formative–epistemicity>(as-to-totalising-contiguous/coherent–factuality-of-variability)’ underlined as to its given prospective foregrounding—entailment<amplituding/formative–epistemicity>(postconverging–narrowing-down–sublimation-as-to–‘existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation ‘–in-reflecting–‘immanent-ontological-contiguity ‘; as-operative-notional–deprocrypticism)); with the implication here that ‘institutional process/processiveness as of mere-formulaicity-as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> (while clearly inducing disontologising socio-econo-political outcomes)’ cannot be construed as the all-be-all of human
institutions but rather ‘process/processiveness has to be associated with sublimating–existentialising–decisionality institutional socio-econo-political outcomes and purpose reappraisal reflected with the epistemic-totalising\(\textsuperscript{1}\)–resubjecting of existential-contextualising-contiguity\(\textsuperscript{2}\)-in-reification\(\textsuperscript{3}\)’ as to profound supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness ontologising/re-ontologising conception of social-stake-contention-or-confliction to avoid their pedantising skewing into numbing-traction–of-desublimating–meaningfulness-and-teleology\(\textsuperscript{4}\)–(as-perspective-lost-of-‘supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness-as-to-the-imbued-postconverging/dialectical-thinking–of–notional–deprocrypticism–(in-dimensionality-of-sublimating — <amplituding/formative–epistemicity>growth-or-conflatedness /scalarisation-as-to-rescalarisation-as–re-ontologisation))\). Thus the veracity/efficiency of social intellection is rather in terms of ‘the consequent sovereign–function/posture contemplative capacity/deferential-capacity in epistemic-totalising\(\textsuperscript{5}\) growth/conflatedness /postconverging as to existential-contextualising-contiguity\(\textsuperscript{6}\)-in-reification\(\textsuperscript{7}\) knowledge/interpretative veracity implications of concurrent limited-mentation-capacity-deepening\(\textsuperscript{8}\)’, allowing for appropriate coherence between concrete–social-reality–<as-to-manifest-sublimation/desublimation> and overall public perception of concrete–social-reality–<as-to-manifest-sublimation/desublimation> with respect to public outcomes of social-stake-contention-or-confliction’ and so rather than the naive counterintuition of mere ‘shallow process/processive conception as so-often reflected with a process/processive bothsidesism mental-reflex in-constitutedness/preconvergence in an atmosphere of incoherence between concrete–social-reality–<as-to-manifest-sublimation/desublimation> and overall public perception of concrete–social-reality–<as-to-manifest-sublimation/desublimation>’ (and so as to the fact that ‘existence as to ontological-veracity consequence of the social reality’ so-underlined by manifest social-stake-contention-or-confliction issues should as to human
epistemic-growth/confoundedness/postconvergence instigatively drive public debates rather than ‘the naivety that the balancing of human-subpotencies as of vague process/processive bothsidesism mental-reflex in apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness/preconvergence will then reflect sublimating social ontological-veracity’ so-underlined by issues of relatively little relevance to general social-stake-contention-or-confliction with the latter just making room for desublimating pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation induced distinctive-alignment-to-reference-of-thought-(of-apriorising/axiomatising/referencing) and wherein issues of minor or irrelevant social-stake-contention-or-confliction are used to disorientate and estrange the sovereign–function/posture while trivialising-and-enframing issues of central public interests). The consequence being that a ‘shallow process/processive conception as so-often reflected with a process/processive bothsidesism mental-reflex inconstitutedness/preconvergence in an atmosphere of incoherence between concrete–social-reality—as-to-manifest-sublimation/desublimation> and overall public perception of concrete–social-reality-as-to-manifest-sublimation/desublimation>’ is critically inadequate for ‘neutral sovereign–function/posture upholding’ as so particularly elicited with distinctive-alignment-to-reference-of-thought-(of-apriorising/axiomatising/referencing) issues. The fundamental point here is that existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,eliciting-of-prospective-supererogation-as-to-perspective–ontological-normalcy/postconvergence-implied~‘prospective-aporeticism-overcoming/unovercoming’ makes nonsense of any such vague notion as ‘neutrality by the balancing of human-subpotencies’ so-reflective of ‘vested interests driven conception of balance as to discrete interests’ (rather than common/mutualising interest conception of balance rather requiring the cultivation of a veridical social exercise of notional~self-distantiation—imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> as to implied social

implications), with such ‘vested interests driven conception of balance as to discrete interests’
rather an exercise consciously or unconsciously of manifest ontological-bad-
faith/inauthenticity<sup>4</sup> in existential-extrication-as-of-existential-unthought. Thus ontological-
veracity (as to the pertinence of ‘overall social intellecction-aptitude body’ as to its capacity for
‘neutral sovereign–function/posture upholding’) rather arises as of a ‘human knowledge-
reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications detour to existence-potency<sup>~</sup>sublimating–
nascence,-disclosed-from-prospective-epistemic-digression’ in pointing out the prospect of
sublimating/desublimating–existentialising–decisionality socio-econo-political outcomes and
implications rather than the ‘passive deification of institutional process/processiveness as of
mere-formulaicity-<as-to-mere-formulaic—
methodologising/mutualising/organising/institutionalising>’ (underlying why such a deficient
social intellecction posture will tend to be one step behind cumulating desublimating socio-
econo-poliotical outcomes as if it is most critically about reflecting upon such cumulating
desublimating–existentialising–decisionality socio-econo-political outcomes rather than truly a
posture of anticipative analysis and preemption). This mere process/processiveness induced
deficiency is often critically reflected in a ‘barest and passive/unreflexive conception of
sovereignty in the democratic process’ that is poorly cognisant of the appropriate overall social
enlightenment/knowledge imbuing oversight of the ‘overall social intellecction-aptitude body’
(as to its capacity for ‘neutral sovereign–function/posture upholding’ whether as so-reflected by

overcoming/unovercoming as so-fraudulently directed against the prospective
sublimating–existentialising–decisionality of many a postmodern thought and other critical

subontologisation/subpotentiation is one that ‘increasingly runs away from and thrive outside
the very central notion defining intellectualism’ (herein implied as ‘knowledge-reifying-and-
empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant

sovereignty equates with technicity/profundity’ (as the ‘critical cancer’ of our modern-day
democratic process as it shuts-off requisite sovereign ‘epistemic-growth/disquiet/discomfort as

demonstrates ignorance go on to ‘supposedly articulate sublimating knowledge’ with such
normalised/stereotyped/selfhelping/feel-good conception of knowledge ‘mediatically and
socially popularised’ inducing (given direct-and-indirect epistemic-totalising\(^\text{32}\) consequence of
human ‘meaningfulness-and-teleology\(^\text{100}\)’ ‘incoherence between concrete–social-reality-<as-
to-manifest-sublimation/desublimation> and overall public perception of concrete–social-
reality-<as-to-manifest-sublimation/desublimation>’. The implications of such dereification\(^\text{87}\)
gesturing (as to its reflection of human self-referencing-syncretising relation with ‘knowledge-
reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant
implications’) speaks to a degenerate conception of human self-
referencing-syncretising that seem to imply surreptitiously that no relative-ontological-
completeness is pertinent (which it rather cynically qualifies as relativism) as to a cynical self-presence/self-constitutedness<in-perspective–epistemic-abnormalcy/preconvergence> of presencing—absolutising-identitive-constitutedness<preconverging–‘motif-and-apriorising/axiomatising/referencing’–imbuing>—existentialising—enframing/imprintedness—(as-to- historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition)’ and very much explains why it fails to appreciate that without ‘relativism’ there is no progress since progress is relative to lack-of-progress with regards to human limited-mentation-capacity-deepening. Critically in this regards, human civilisation is only possible as to the genuine social intellectual–function/posture rather eliciting and fulfilling human ontological-commitment<implied—self-assuredness-of-ontological-good-faith/authenticity>—postconverging–de-mentating/structuring/paradigming—as-being-as-of-existential-reality> and so in a cogent percolation-channelling<in-deferential-formalisation-transference> existentialising–frame allowing for human and humanity’s ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification /contemplative-distension’ (and not flawed normalised/stereotyped/selfhelping/feel-good conception of knowledge). We can appreciate in this regards that the specialist whether astronomer, technician, electronician, etc. is more critically sublimating/emancipating as to a ‘knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’ acting upon the breadth of socially cogent percolation-channelling<in-deferential-formalisation-transference> existentialising–frame of intellectualism involving genuine social intellectual–function/posture projection of prospective human transcendence-and-sublimity/sublimation/supercerogatory–de-mentativity as first-level technicity/profundity elucidation (as to existence-potency—sublimating–nascence, disclosed-from-prospective-epistemic-digression) with fellow specialists and then of derived-knowledge implications.
percolating to the appraisal of ‘overall social intellecction-aptitude body’, and not a directly normalised/stereotyped/selfhelping/feel-good conception of knowledge relation with the general public in distractive-alignment-to-reference-of-thought-of-apriorising/axiomatising/referencing> (undermining such a sublimating/emancipating cogent percolation-channelling-in-deferential-formalisation-transference> existentialising–frame imbued notional-self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing> conception which is exactly what best defines and upholds human sovereign–function/posture as to appropriate coherence between concrete-social-reality-as-to-manifest-sublimation/desublimation> and overall public perception of concrete-social-reality-as-to-manifest-sublimation/desublimation> with respect to public outcomes of social-stake-contention-or-confliction). In this regards, a prevailing and counterintuitive naivety as to human social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising–decisionality is that the mere communication of knowledge (without appropriate eliciting of ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension’, as an exercise that is behind knowledge-production in-the-very-first-place and is required for effective prospective existential-contextualising-contiguity—in-reification> of knowledge content as to epistemic-totalising—resubjecting) suffices without factoring that this is exactly what allows for pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation desublimation; as knowledge effectively requires a sound grasp-of and referencing-to its sublimating/emancipating cogent percolation-channelling-in-deferential-formalisation-transference> existentialising–frame given human limited-mentation-capacity (as to the fact that the ordinary citizen doesn’t need to be a physicists or astronomer or engineer or a public policy expert as more directly relevant in the democratic process but rather needs to have the appropriate fundamentals-and-distance as of capacity/deferential-capacity to

by the ‘supererogating/willing side’ and the ‘existence sublimating-validation/desublimating-validation side’ for sound human intelligibility to arise (and critically the reality of a truly social scientific insight is one that necessarily has to take a considerable distance from the immediate/punctual high emotional-involvement as inherently manifested in the direct socio-econo-political processes of social-stake-contention-or-confliction and its associated directed ideologies with such a truly scientific endeavour not about pedantising/muddling/formulaic-hollowing-out—-in-subontologisation/subpotentiation but ‘rather most thoroughly involved in social-stake-contention-or-confliction aporeticism overcoming/unovercoming’ along the lines of a more profound human and social sublimation arising as from human ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness\(^{88}\)-by-reification\(^{77}/\)contemplative-distension\(^{26}\)’). This should not be construed as a weakness as often wrongly implied of the anti-ideological stance of postmodern thought but rather speaks of a strength in the sense that it is naïve to think the pedantising/muddling/formulaic-hollowing-out—-in-subontologisation/subpotentiation \(\text{of presencing—absolutising-identitive-constitutedness}^{13} \quad \text{social-vestedness/normativity}^{13} \quad \text{<discretely-implied-functionalism>}\) can be veridically undermined/superseded by a ‘corresponding antipodal/diametrical compensatory subontologisation’ (as manifested between the conflicting capitalistic and communistic ideologies), rather than a true aspiration for a most profound prospective ontologisation/re-ontologisation in-of-itself so-implied as of supererogatory-progressivity as to human aporeticism overcoming/unovercoming in enabling prospective sublimating–nascence for human social-and-institutional-frameworks-of—referencing/registering/decisioning sublimating–existentialising–decisionality (even as the practicalities of the political environment inevitably will elicit thresholds of disontologising as to non-ontologising/subontologising conceptualisations); but then just as the natural scientist’s basic research is to ‘open-up’/’throw-up’/’reveal’ sublimating avenues for ‘more and more

rendering nonsensical, nombrilistic and self-important pretenses/claims that are rather of manifest in-effect absolution as to their given "presencing—absolutising-identitive-constitutedness" as so-fraudulently implied by our positivism–procrypticism anti-relativism stance (and eliciting herein the counterclaim that a rational-and-coherent defense of such a posture warrants a further claim recommending that humanity should rather go back to the state of ‘recurrent-utter-uninstitutionalisation as to its given manifest in-effect absolution ‘presencing—absolutising-identitive-constitutedness” as a more coherent anti-relativism stance as so-explicitly the idea that human progress doesn’t/shouldn’t occur, even as paradoxically many such anti-relativism proponents seem to project progressive views without truly grasping the contradictory implications of progressivism and anti-relativism explaining their inclination to ‘disjointing totalisingly-disentailing—discretion/whim-of-thought’ whereas ‘true knowledge has to carry its sublimation within itself as to its notional–nondisjointing totalising-entailing’ for it to be socially potent and effective). We can appreciate in this regards that the ‘sublimating~existential-decisionality potency of a scientist thought is not in-and-about themselves’ as so-manifested in a ‘normalised/stereotyped/selfhelping/feel-good conception of knowledge’ but rather ‘their inherent coherent knowledge formulation technicity/profundity and elucidating elaboration’ which then has to avoid explicited or implicated contradictions with regards to the knowledge technicity/profundity ‘enhancement of the overall social-setup self-reflexivity as of the breadth of socially cogent percolation-channelling-<in-deferential-formalisation-transference> existentialising–frame of intellectualism’; as so-involving the illuminating genuine social intellectual–function/posture, the appraisal of the ‘overall social intellection-aptitude body’ as well as generalised social advocacy in contemplating about prospective ‘re-ontologising/potentiating/optimisable sublimating–nascence ontologising-depth perspective as of the full-potency of existence’. In other words, ‘existence imposes its sublimating rules to the human mortal subpotency’ as the very ‘fundamental meaning of
science’ (notwithstanding vague human-subpotency self-important ‘methodologising/mutualising/organising/institutionalising’ anti-intellectual fooling-about and complotment); in a continual prospective relativistic process of human limited-mentation-capacity-deepening\(^3\). In this respect, it is herein contended as of a most intimate appreciation that such anti-relativism stances which will imply no human progress occurs are ‘so moronic’ it is doubtful these are held out of true conviction (bad or good), but rather are ‘cynical and strategic anti-intellectualism stances hanging upon mere institutional imprimaturing (as overplaying the card of ‘minimum-and-balancing expectations/anticipations of social-functioning-and-accordance—as-of–social-stake-contention-or-confliction’ as to the protection offered by sensibility/decorum of institutional imprimatur’) in undermining the implications of prospective profound-supererogation\(^7\) entailing-\(^7\) <amplituding/formative-epistemicity>totalising–in-relative-ontological-completeness as associated with social equality and anti-bigotry movements as to class, race, gender, etc. (and so-reflected by the fact that their proponents have ‘hardly been able to meet the academic standards of the arguments implied and projected by proponents of relativism’ and rather turning to surreptitious and media-driven strategies avoiding intellectual engagement in inducing social and institutional numbing-traction—of-desublimating—meaningfulness-and-teleology\(^9\) (as-perspective-lost-of-supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness-as-to-the-imbued-postconverging/dialectical-thinking—of–notional–deprocrypticism-(in-dimensionality-of-sublimating—<amplituding/formative-epistemicity>growth-or-conflatedness /scalarisation-as-to-rescalarisation-as–re-ontologisation)). Such ‘strategic and cynical institutionalised pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation’ it is herein contended is much more potently effective in preconvergingly–de-mentating/structuring/paradigming social and institutional in-effect bigotedness (consciously or unconsciously) than the overt and superficial name-calling social

Basically, we can garner that ‘the very epistemic condition inherent to human limited-mentation-capacity in contrastive relation to the ‘nonpresencing-<perspective-ontological-normalcy/postconvergence> of inherent existence sublimating–nascence’, induces (as of human ‘amplituding/formative–epistemicity-totalising–thrownness-in-existence’) a ‘human prospective regressive-shift in ontological-normalcy/postconvergence conceptualisation’ (so-reflected in the mere-formulaicity-<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> implied prior secondnatured reproducibility—mathesis/motif/thrownness-disposition,—as–reproducibility-of-aestheticisation) as of human dimensionality-of-desublimating-lack-of”

That said the reality as well points to the fact that the more circumscribed/bounded nature of human nascent-particular/incipient-and-material/technical-sublimations—blinded-to-their-relative-ontological-completeness — reference-of-thought—devolving render them premonitory as to preceding and empowering the possibility for prospective social-and-institutional-frameworks-of—referencing/registering/decisioning sublimating—existentialising–decisionality; as we can appreciate that a Galileo heliocentric budding-positivistic contention with his new telescope demonstration is more naturally-and-potently unsettling/unarguable/disarming by its sublimating rational-empiricism/positivising implications than say an abstractly contemplated contention in that period on the basis that a ‘rational-empiricism/positivising knowledge-reification’ gesturing as to ‘reference-of-thought—devolving’ and ‘reference-of-thought—devolving’ is the appropriate ‘social-and-institutional-

The totalising-entailing epistemic and ontological implications of veridical the-

Good/understanding/knowledge-reification &/ontological-primemovers-totalitative-framework as so-underlied by angling-of-imaginary are rather altogether clear and straightforward as hereafter articulated. It is an existential impossibility as to ontological-inveracity/ontological-impertinence for intelligible discursivity between relative-ontological-incompleteness and relative-ontological-completeness knowledge-reification gesturings as of differing apriorising/axiomatising/referencing-(of-existing-contextualising-contiguity )—relation-to-

implications wherein prospective knowledge-reification\textsuperscript{7} gesturing as of sublimating \textsuperscript{8} historiality/ontological-eventfulness\textsuperscript{7}/ontological-aesthetic-tracing\textsuperscript{<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism>}`` is actually only possible/educible and accompanied with a more profound but implicated notion of epistemicity (as prospective sublimation actually invents prospective epistemicity as to the associated existential-contextualising-contiguity\textsuperscript{9} induced \textsuperscript{10} ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’-by-reification /contemplative-distension\textsuperscript{11}`` that enables the sublimation to arise). This insight contrasts with a naïve science ideology conception of epistemicity as to ‘a lack of nonpresencing-<perspective–ontological-normalcy/postconvergence> perspicacity in an ineffect absolution exercise of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—existential-contextualising-contiguity\textsuperscript{12} as of a desublimating historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition’ that fails to factor in prospective human limited-mentation-capacity-deepening postconverging–de-mentating/structuring/paradigming implications (and go on to behold epistemicity as to a certain ‘supposedly imagined moment of past science’ rather than the fact that prospective scientific sublimations come-with/are-not-divorced-from prospective epistemicity insights hermeneutically/reprojectively/supererogatingly/zeroingly as so-rather driven by human supererogatory acuity/perspicacity/astuteness/edginess/incisiveness inducing sublimation-over-desublimation beyond ‘mere-formulaicity-<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> of conception of prior epistemicity secondnatured reproducibility—mathesis/motif/thrownness-disposition,—as–reproducibility-of-aestheticisation’). Critically, in this respect there was no prior inherent mere-formulaicity-<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> basis for

Hence the most coherent and unfailing epistemicity basis of science speaks to ‘inherent sublimation-over-desublimation’ as to nonpresencing—<perspective—ontological-normalcy/postconvergence> establishing/re-establishing of sublimating historiality/ontological-eventfulness—ontological-aesthetic-tracing—established—re-established—ontological-normalcy/postconvergence—reflected—epistemicity-relativism> associated with requisite existential-contextualising-contiguity—induced ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification—contemplative-distension’. Such a conception of epistemicity is rather all-englobing with regards to all human knowledge as to the reality of hermeneutic/reprojecting/supererogating/zeroing supererogatory acuity/perspicacity/astuteness/edginess/incisiveness for human <amplituding/formative—epistemicity>totalising—renewing-realisation/re-perception/re-thought in apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness—as-to-living-development—as-to-personality-development, institutional:
development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology); with the extensive development of many a formalised and elaborate domains-of-study like natural sciences unique experiential inordinary existentialising–frames (inordinary because the human has to invest an unusual/inordinary amount of mental resource in an unusual/inordinary existentialising–frame of contemplation associated with their thought-experiments, material equipment conception for their experiments, institutional frameworks of experimentation, etc. but so while utilising more succinctly the very same overall ‘human hermeneutic/reprojecting/supererogating/zeroing supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness drivenness of epistemicity’ as experiential contrivance/arrangement of ordinary/usual life though in a different capacity/potentialisation such that in reality scientific experiments/observations are just circumstantial/contextualised elaborateness of natural human supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness as so-construed as actually ‘implicated-or-explicated–philosophically’ in driving the exactifying/precisioning–of-sublimation—<as-to-entailing-theoretical,-conceptual-and-operant-implications> insight for such scientific experiments/observations) and not overriding the very same human hermeneutic/reprojecting/supererogating/zeroing supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness drivenness of epistemicity (reflecting the fact that the notions of scientific experiments and observations are just extensions of a human hermeneutic/reprojecting/supererogating/zeroing supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness contemplation of ordinary existential experience and observations). Such a nonpresencing—<perspective–ontological-normalcy/postconvergence> conception of epistemicity it is herein contended is of most profound social and overall knowledge aporeticism overcoming/unovercoming relevance.
Human angling-of-imaginary (unlike the predisposition to mere-formulaicity—<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> of human psychical-nascency) construes of knowledge as of emergent social conception and instigation for knowledge formation/creation (and so beyond and unfazed by its supposed manifest institutional capture/catchmenting) with regards to the veridical existential veracity of knowledge for prospective ontologising/re-ontologising sublimating/emancipating expansion of human ‘social-functioning-and-accordance—as-of—social-stake-contention-or-confliction imbuing existentialising–frame of disontologising/ontologising-and-re-ontologising’. In this regards, desublimating attitudes of mere institutional imprimaturing do not necessarily constrain the possibility for divergent social interests for prospective existential ontologising/re-ontologising conception for sublimating knowledge-reification gesturing (and critically veridical intellectualism rather perceives institutional stature as the opportunity to further demonstrate and invest in demonstrating its effective intellectual relevance whereas an institutionalised pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation tend to construe of institutional stature as a defensive fall-back as to mere-formulaic institutional-imprimaturing and institutional-legalism poorly upholding/perpetuating the veridical knowledge sublimating contemplation behind the institutional formation/creation in-the-very-first-place as so-inceptively instigated as of ‘prior originariness-parrhesia,—as—spontaneity-of-aestheticisation in want for prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation with human limited-mentation-capacity-deepening’, and as so-failing to prospectively relay genuine-knowledge production as rather undergirded as of dimensionality-of-sublimating (\textlangle supererogatory—de-mentativeness/epistemic-growth-or-confatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation\rangle). Such an incipient social conception and instigation of prospective
genuine-knowledge as to its veridical existential veracity underscored the Socratic-philosophers and their successors development of philosophical schools propounding \(\theta\) universalising-idealisation in sublimating self-assuredness-of-ontological-good-faith/authenticity \(^{\theta}\) postconverging–de-mentating/structuring/paradigming \(^{\theta}\) as-being-as-of-existential-reality subverting the Ancient-sophists ‘non-universalising sophistry ontological-bad-faith/inauthenticity’ \(^{\theta}\) preconverging–de-mentating/structuring/paradigming ‘\(^{\theta}\)’, likewise budding-positivism movements with their correspondences and initiatives in sublimating self-assuredness-of-ontological-good-faith/authenticity \(^{\theta}\) postconverging–de-mentating/structuring/paradigming \(^{\theta}\) as-being-as-of-existential-reality ultimately led to the subversion of medieval-scholasticism ‘non-positivising scholasticism ontological-bad-faith/inauthenticity’ \(^{\theta}\) preconverging–de-mentating/structuring/paradigming ‘\(^{\theta}\)’, and today in many ways the postmodern movement is more potent as to its social dynamics of ‘liberation and emancipation’ (however incipiently crude as to its sublimating self-assuredness-of-ontological-good-faith/authenticity \(^{\theta}\) postconverging–de-mentating/structuring/paradigming \(^{\theta}\) as-being-as-of-existent-reality) in the face of surreptitious and spurious strategies of anti-intellectual misanalysis, misinformation and complotment as to our modern-day ‘pedantic totalisingly-disentailing—discretion/whim-of-thought ontological-bad-faith/inauthenticity’ \(^{\theta}\) preconverging–de-mentating/structuring/paradigming ‘\(^{\theta}\)’. Thus the more centrally defining element of human angling-of-imaginary speaks to human capacity for contemplation of metaphysics-of-absence-\(\langle\text{implicated-epistemic-veracity-of-}\_\text{nonpresencing-}\langle\text{perspective–ontological-normalcy/postconvergence}\_\rangle\text{epistemic-projection}\) which is in many ways elusive to psychical-nascency disposition. But then this is no more different for the implicit projective-insights approach to thinking pervading the natural sciences; as to a fundamental aptitudinal capacity to think in terms of perspectives (implicitly speaking to such notions like projections and fields of conceptualisation that do not absolutise our present
conceptualising framework and actually factor in the limited-mentation-capacity as to apriorising/axiomatising/referencing to then project of the implications of human limited-mentation-capacity-deepening of apriorising/axiomatising/referencing). In this regards, (and as priorly indicated herein just as conceptualising ‘the actuality-<as-to-history> of physical manifestations of the cosmos as astronomy’ with physics rather construed as the ‘archaeological/deconstructive–conceptualisation-<as-to-ahistorical-emancipation> of such an actuality conception that is astronomy’ with the implication that the ‘beholdening astronomical manifestations of planetary phenomena, planets, stars, galaxies, etc. as to a given shape of the universe and its becoming’ are conceptualised from the ahistorical-emancipation of physics as of an underlying physics archaeological/deconstructive–conceptualisation that allows for the momentous sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism’> of astronomy to be construed and so unlike a naïve desublimating historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition approach that fails to factor in that the varied ‘beholdening astronomical manifestations of planetary phenomena, planets, stars, galaxies, etc. as to a given shape of the universe and its becoming’ are rather undergirded by an ahistorical-emancipation of conceptualisation of congruent physics principles as to their underlying ontological-contiguity), in many ways the implicit notions of Foucauldian genealogy/archaeology and Derridean différence deconstruction as well as explicited herein as of the ontological-contiguity—of-the-human-institutionalisation-process (implied de-mentation-(supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) so-underlying human fundamental ontology-driven ‘postconverging-or-dialectical-thinking—psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’) are tantamount to ‘an ahistorical-emancipation projection and grasp of the fundamental human psyche and potential’ undergirding the actualities of
societies and individuals reflected as human aestheticisation–and–aestheticisation-towards-ontology (as to social-setups imbued ‘supposed reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation of meaningfulness-and-teleology\(^{(100)}\) underlied by language, culture, social institutions, technical knowhow, etc., and so as to human living-development–as-to-personality-development, institutional-development–as-to-social-function-development and Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of meaningfulness-and-teleology\(^{(100)}\)’); as so-reflecting the ‘substantive existential-contextualising-contiguity\(^{(10)}\) hermeneutically/reprojectively/supererogatingly/zeroingly cumulated/recomposured abstract-tissue-of–social-emanance’ (as herein underscored by the ahistorical nature of human institutionalisation-threshold-and-uninstitutionalised-threshold\(^{(10)}\), and as so-reflecting underlying human ‘social-functioning-and-accordance—as-of–social-stake-contention-or-confliction imbuing existentialising–frame of disontologising/ontologising-and-re-ontologising’) upon which such ‘a projection of ahistorical-emancipation knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’ is so-bound to ‘elicit the veridical manifestation of prior/present/prospective human sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing\(^{(2)}\) of ontological-contiguity\(^{(11)}\)’ over ‘naïve accidented/disparate’ conceptualisation as to presencing—absolutising-identitive-constitutedness\(^{(13)}\) social-vestedness/normativity\(^{(80)}\) discretely-implied-functionalism\(^{(47)}\) bound to fall into ‘beholdening historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition lacking in the capacity for nonpresencing\(<\text{perspective–ontological-normalcy/postconvergence}\) epistemic-projection of ontological-contiguity\(^{(11)}\)’ (as to a fundamental lack of knowledge-notionalisation that explains everything as to both manifest knowledge and ignorance explanations). Basically, given that
such ‘a projection of ahistorical-emancipation knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued theoretical/conceptual/operant implications’ is even more unsettling (as to ‘the psychologismic–apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness implications on human reference-of-thought as grandest-axiomatic-contruct of meaningfulness-and-teleology existentialising–decisionality’ of prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity), in many ways the ‘communicable contemplative veracity of such transcendence-and-sublimity/sublimation/supererogatory–de-mentativity thought’ can only be ‘glimpsed of, countenance/appreciated in the margins and communicated rather as of prospective metaphoricity’ (just as it can fairly be argued that even budding-positivists never really grasped the full veracity of their prospective transcendence-and-sublimity/sublimation/supererogatory–de-mentativity rational-empiricism thought associated ‘psychologismic–apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—conflatedness implications on human reference-of-thought as grandest-axiomatic-contruct of meaningfulness-and-teleology existentialising–decisionality’ and so let alone the anti-positivistic stances of their medieval-scholasticism distractors imbued prior psychologismic–apriorising/axiomatising/referencing-(of-existential-contextualising-contiguity)—constitutedness); and so speaking to the veracity/reality of the ‘intellectual ineptness’ of the ‘self-presence/self-constitutedness—<in-perspective–epistemic-abnormalcy/preconvergence> in prospective relative-ontological-incompleteness’ exposed to such contemplation as it highlights the given institutionalisation prospective uninstitutionalised-threshold (inducing an intellectual paradox of disontologising wherein a state of relative-ontological-incompleteness ‘as to its flawed in-effect absolution appropriating/presumptive ontological-veracity’ is supposedly supersedingly/arrogatingly analysing the veracity of prospective relative-ontological-completeness projection). The
critical point here is about enunciating that veridical ontological-performance of human meaningfulness-and-teleology is rather manifested in existential-contextualising-contiguity induced ‘epistemic-growth/disquiet/discomfort as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness -by-reification /contemplative-distension’ (and so more than just mere-formulaicity-as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> of reproducibility—mathesis/motif/thrownness-disposition,–as—reproducibility-of-aestheticisation that fails to account for the ‘existential-contextualising-contiguity station of relative-ontological-incompleteness’ as it affects contemplation’ and hence falsely implies that there is ‘a neutral state of in-effect absolution’ from whence sound human contemplation projectively arises rather than the reality of existential-contextualising-contiguity with human limited-mentation-capacity-deepening as to ‘relative-ontological-incompleteness /relative-ontological-completeness ⟨sublimating—referencing/registering/decisioning,—as—self—becoming/self-conflatedness /formative—supererogating—<projective/reprojective—

Critically, we can grasp a glimpse of this fundamental psychologismic—apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness difficulty with such a question as what is the meaning (as of projected mere-formulaicity—<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation) of the ‘successive apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)
conceptualisation as to prior/present/prospective epistemic-projection’ contrasts with flawed ‘theoretical conceptualisations of the social as to 'absolutising-identitive-constitutedness' epistemic-projection devoid of ontological-contiguity’ conceptualisation as to prior/present/prospective epistemic-projection’ (as the latter puts into question the veracity of this very same notion of ontologising as in the natural sciences with regards to prospective aporeticism overcoming/unovercoming) and is herein construed as manifesting ‘beholding historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition lacking in the capacity for nonpresencing-<perspective–ontological-normalcy/postconvergence> epistemic-projection of ontological-contiguity’. Critically, it can be appreciated that the fundamental dimensionality-of-sublimating—\{<amplituding/formative>supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation\} (undergirding the ‘psychologismic-apriorising/axiomatising/referencing—(of-existential-contextualising-contiguity)—conflatedness implications on human reference-of-thought as grandest-axiomatic-construct of meaningfulness-and-teleology existentialising—decisionality’ of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity inducing the given registry-worldview/dimension contextualising/existentialising—attendant-ontological-contiguity with regards to its living-development—as-to-personality-development, institutional-development—as-to-social-function-development and Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology), is existentialisingly ‘downgraded/demoted along beholdening—existentialising-echelons of human presencing—absolutising-identitive-constitutedness social-vestedness/normativity—<discretely-implied-functionalism’ (in ‘in-effect absolution’ adherence to the given registry-worldview/dimension knowledge-reifying-and-empowering conceptivity/epistemic-reflexivity imbued
