In the bigger scheme of things, this calls for a prospective registry-worldview/dimension institutionalisation articulation that supersedes/overrides such a temporal dynamism of \(^{7}\)perversion-of-\(^{84}\)reference-of-thought-\(^{<}\)as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation \(>\) dispositions at various social roles going from A’s condition, and the potential overlooking of the intemporal-preservation-entropy-or-contiguity—or—ontological-preservation dispositions by all the other characters (B, O, D, M and S). Underlying such an intemporal orientation is the idea that fundamentally the conjugation of such an \(^{15}\)de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) and subsequent conjugation as with B above to the temporal-dispositions of a registry-worldview/dimension speaks fundamentally of the uninstitutionalised-threshold\(^{103}\) of that registry-worldview/dimension, reflected/perspectivated by the marginal \(^{75}\)perversion-of-\(^{84}\)reference-of-thought-\(^{<}\)as-preconvergingly-apriorising/axiomatising/referencing-in-

dialectical–de-mentation–stranding-or-attributive-dialectics) doesn’t confuse appropriateness
of the prior reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-
intemporal-preservation-entropy-or-contiguity–or–ontological-preservation for the prior
institutionalisation as implying the prior mental-devising-representation is appropriate for
prospective institutionalisation as it needs to undergo its own requisite ‘postconverging-or-
dialectical-thinking’ psychology or psychology-of-mentation-dynamics or
natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-
recomposuring to enable and regenerate intemporal-preservation-entropy-or-contiguity–or–
ontological-preservation. This by itself explains why the different registry-
worldviews/dimensions are seemingly preconverging-or-dementing apriorising-psychologism
with respect to one another (from the prospective perspectives), and not that we are talking
about different species of humans, as transcendentalism for intemporal-preservation-entropy-or-
contiguity–or–ontological-preservation is the foundational concept retrospectively, presently
and prospectively; even though by the illusion-of-the-present/present-consciousness/epistemic-
totalising ~self-referencing-syncretising/mirage, all dimensions, and not only ours, tend to
think of themselves as definitely mentally straight/candored-and-dialectically-or-contendingly-
is not ontologically consistent and fundamentally undermines and overlook the idea of an insight about a prospective transcendence-and-sublimity/sublimation/supererogatory-dementativity with the present registry-worldview/dimension corresponding to the superseded perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation registry-worldview/dimension. Thus but for the inherent difficulty of living and experiencing the effective personhoods-and-socialhood-formation existentialism across all the registry-worldviews/dimensions, the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument ‘beyond any one registry-worldview/dimension meaningfulness’ like ours is perfectly possible in garnering a more profound and informed insight on human nature whether presently, retrospectively to prospectively. In the bigger scheme of things, just as logic can only be grounded on coherent and concrete reference-of-thought-categorical-imperatives/axioms/registry-teleology-based articulations for its ontological effectiveness and veridicality, human ontological transcendental possibilities arise from human individuations that correspond to the appropriate ‘intemporal-projecting existential becoming’ allowing for such ontological possibilities, and the latter is made possible by the ‘so-renewed apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument as to renewed logical-basis/logic,-as-derived-from—transversality-for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing’ going beyond the reference-of-thought—categorical-imperatives/axioms/registry-teleology within just a given registry-worldview/dimension as if it were the absolute mental-devising-representation with respect to intrinsic-reality, and instead hold that transdimensional/transcendental (unlike ordinary meaning which reasons only on intradimensional reference-of-thought—categorical—
(dialectically-in-phase) and is thus of ‘postconverging-or-dialectical-thinking—apriorising-psychologism mental-devising-representation’ as it is in (postconvergence) ontological-veridicality/ontological-contiguity while the prior transcended/superseded institutional-cumulation/institutional-recomposure of relatively shallow limited-mentation-capacity of relatively shalow limited-mentation-capacity—as of relative apriorising/axiomatising/referencing—of-attendant ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity—constitutedness—in—preconverging entailment is no longer the reference-of-thought (dialectically-out-of-phase or dialectically-primitive) and is thus of ‘preconverging-or-dementing—apriorising-psychologism mental-devising-representation’ as it is of notional-discontiguity/epistemic-discontiguity—of-shallow-supererogation —of-mentally-aestheticised—preconverging/dementing—qualia-schema>; thus transcendentally coming into grips with a shifting but more and more profound notion of reference-of-thought (in-phasing) and corresponding ontological-veridicality/ontological-contiguity as enabled by ontological-normalcy/postconvergence. The conceptual pertinence in this Arithmetic ontological-contiguity comparison can be rearticulated as follows for greater clarity. As previously highlighted the developmental psychology of the psychopath from childhood to adulthood, involves a child psychopath who is dysfunctional as its subknowledging—impulse/compulsive-dementing/postlogism in hollow-constituting—as-disjointed-misappropriation—of-meaningfulness-and-failing-intemporal-preservation is relatively transparent to interlocutors and it induces a ‘delirious effect’ given that it hasn’t yet maturated, is not yet indirect, is not yet spatialising, is not yet credulous and is not yet crafty in ‘its postlogism—as-of—compulsing—nonconviction/madeupness/bottomlining—in—of-attendant—intradimensional—apriorising/axiomatising/referencing—induced-disontologising’-of-the-

conditions which it increasingly attains from adolescence to adulthood with a corresponding inducing of the development of social psychopathy as its psychopathy conjugates/inflects/gets-mimicked with the temporal-dispositions of ignorance, unconsciously, and consciously with affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, in an absolving/fleeting/escaping-reflex–logic eliciting social psychopathy involving moving from various non-veridical/hollow sets-of-postlogic-in hollow-constituting—as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation> in postlogic-backtracking—<iterative-looping–set-of-dereifying-hollow-narratives-and-acts’> as absolving/fleeting/escaping-reflex–logic, to others and from different sets of interlocutors to others. It is obvious that A’s condition/subknowledging-impulse/compulsive-dementing disposition as an adult psychopath isn’t systematic with every interlocutor but rather it arises only in the face of perceived–social-stake-contention-or-confliction-and-confliction-targets and furthermore the profoundness of the postlogism-slantedness manifestation is directly related to the gravity of the perceived–social-stake-contention-or-confliction the situation and how the ‘evolving social psychopathy situation permits’. Hence the notion of A having an absolute condition wherein it increments additionality by 1 is rather an absolute ideal conceptualisation, as in reality it is a question of degree and highly circumscribed with the adult psychopath who needs to have a postlogic-equilibrium that can be socially-functional-and-accordant, unlike the dysfunctional child psychopath. This comparison equally articulates the nature of uninstitutionalised-threshold. Consider B (together with the other BODMAS characters) in
the instance where despite A’s conditions they were to stick to the registry-worldview’s/dimension’s institutionalisation categorical-imperatives/axioms/registry-teleology thus effectively producing the wrong result \( 7.5 \) for the particular equation which is not intemporal preservational (not ontologically ontological-normalcy/postconvergence) and likewise for all other equation where A’s condition applies, we’ll then be talking about an uninstitutionalised-threshold. The implication is that the registry-worldview/dimension then loses its qualification as being intemporally-preservational, and the psychological tool that is then elicited (from a prospective and new reference-of-thought categorical-imperatives/axioms/registry-teleology, for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as articulated with the arithmetic technique that corrected the equation result from \( 7.5 \) to by adjusting for A’s condition which is now the reference-of-thought or veridical-thinking-reference-over-preconverging-or-dementing reference/ontologically-veridical/ontological-contiguity registry-worldview/dimension) is known as de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics). Even though going by its illusion-of-the-present/present-consciousness, the superseded registry-worldview/dimension will still wrongfully strive for a mental-devising-representation at that uninstitutionalised-threshold of ‘ontological-thinking (not preconverging-or-dementing apriorising-psychologism-stranded-as-rightfully-oblongated(decandored-and-dialectically-or-contendingly-out-of-phase) which is ontologically wrong, just as all registries-worldviews/dimensions do at their uninstitutionalised-threshold. For instance, the recurrent-utter-uninstitutionalisation mindset reference-of-thought doesn’t think of itself that way but rather as a nondescript/ignorable–void (actually speaking of akrasiatic-drag-denatured-and-preconverging-or-dementing narratives) or a-registry-worldview’s-or-dimension’s-ignoring-
of-its-prior-relative-ontological-incompleteness\textsuperscript{31} of its reference-of-thought as an ontologically-flawed-neuterisation\textsuperscript{32} or-bracketing-or-epoché of \textit{amplituding/formative-epistemicity} totalising – conflated – meaningfulness-and-teleology\textsuperscript{0} as-of-notional–deprocrypticism-reflected– historiality/ontological-eventfulness\textsuperscript{0}/ontological-aesthetic-tracing–\textit{perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism} > with respect to its threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation \textit{as-to–attendant-intradimensional} – prospectively-disontologising–preconverging/dementing – apriorising-psychologism. and such a representation of its mentation is the invention/mental-devising-representation of the base-institutionalisation mindset by its better ontological-completeness-of-reference-of-thought, likewise with ununiversalisation and universalisation, non-positivism/medievalism and positivism, and prospectively with procrypticism and deprocrypticism, we will certainly be hardly pre-inclined to acquiesce to a preconverging-or-dementing – apriorising-psychologism mental-devising-representation of our perversion-of-reference-of-thought–as-preconvergingly-apriorising/axiomatising/referencing-in- nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > with respect to the denaturing of the reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{00}, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of positivistic meaningfulness. This insights perfectly highlight that our psychological nature is actually about mental-devising-representation which is meant to serve notionally the pertinence of supposed ontological articulations with respect to intrinsic reality, and it doesn’t has any end to itself but for such dialectical readjustments to ontological-veridicality as ‘postconverging-or-dialectical-thinking’–apriorising-psychologism’/soundness-or-ontological-good-faith/authenticity\textsuperscript{0}/of its reference-of-thought/candored-and-dialectically-or-contendingly-in-phase with regards to an intemporal-preservational registry-worldview/dimension
institutionalised/intemporalised-threshold-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, and with superseded/transcended registry-worldviews/dimensions which are not intemporal-preservational at their uninstitutionalised-threshold\textsuperscript{103} as preconverging-or-dementing\textsuperscript{20}–apriorising-psychologism/oblongated/decandored-and-dialectically-or-contendingly-out-of-phase explaining the nature of mental-devising-representation of all institutional-cumulation/institutional-recomposure\{as-to:\textsuperscript{20}historiality/ontological-eventfulness /ontological-aesthetic-tracing\<perspective–ontological–normality/postconvergence-reflected–epistemicity-relativism-determinism\>\}\{whether-from-the-perspective-of-a-retrospect, our present or prospective point-of-reference. Another aspect highlighted by the Arithmetic equation comparison is with respect to the appropriateness and defects of meaningful references with respect to ontological-veridicality/intrinsic-reality. The comparison highlights 3 transversality\<for-sublimating–existential–eventuating/denouement\>–of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing\prime pedestal of meaningfulness. Firstly, A’s condition with respect to additionality with the idea that it is bound to fail any arithmetic calculation involving additionality. Thus the subknowledging\textsuperscript{5}–impulse/compulsive-dementing\textsuperscript{20} pedestal is of notional-discontiguity/epistemic-discontiguity \<shallow-supererogation of-mentally-aestheticised–preconverging/dementing –qualia-schema\>/non-ontological-and-non-contending-referencing–\<thus-ontologically-or-contendingly-reflected-or-perspectivated-as-of-preconverging-or-dementing\>–apriorising-psychologism\> (not-veridical-thinking-reference-rather-preconverging-or-dementing –reference). This is effectively the pedestalled state of psychopathic postlogism\textsuperscript{78}–as-of- compelling–nonconviction/madeupness/bottomlining\{\textsuperscript{6}‘decontextualising/de-existentialising~of-attendant-intradimensional–apriorising/axiomatising/referencing\>–induced-disontologising–of-the–‘attendant–intradimensional–ontologising’–imbued\<contextualising/existentialising–attendant–}

This subknowledging-impulse/compulsive-dementing disposition points out that the actual and given meaningfulness being subknowledged/pervertedly-represented is ontologically-veridical both registry-wise (soundness-or-ontological-good-faith/authenticity-of-reference-of-thought-wise) and logic-wise (the normal arithmetic operation of the BODMAS equation) as it is intemporally preservational and thus ontologically-veridical/reference-of-
thought/ontological-contiguity⁸. It is this pedestal that is the organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of’–reference-of-thought’–as-conflatedness¹⁰-or-ontological-reprojecting/longness-of-register-of–meaningfulness-and-teleology¹⁰) pedestal, organic as it is both registry-wise (soundness-or-ontological-good-faith/authenticity¹⁰-of-reference-of-thought-wise) and logic-wise striving for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. It is the superseding and intemperal pedestal for articulating ontological meaningfulness (intrinsic-attribution). The third pedestal as demonstrated involves the integrating and <amplituding/formative–epistemicity> totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag¹⁴ by temporal-dispositions both unconsciously (ignorance) and consciously (affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) with A’s condition/subknowledging impulse as if it was ontologically veridical, and obviously leading to the wrong result thus failing/not-upholding-<as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. In the case with B it involved resolving the Arithmetic equation as if A’s condition was appropriate resulting in 2.5 which is ‘epistemically-decadent in notional-discontiguity/epistemic-discontiguity <shallow-supererogation> -of-mentally-aestheticised–preconverging/dementing –qualia-schema’ rather than which is ontologically veridical. This is the threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation <as-to–‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism> pedestal, as registry-wise it is not striving for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation and so fundamentally its logical-contention is voided (as apriorising–registry precedes and defines logical pertinence), such that such a disposition that integrates subknowledging¹⁰-or-mimicking-impulse/compulsive-dementing¹⁰ registry-
worldview-wise/dimensional-wise speaks of the registry-worldview/dimension as in \( \text{de-} \) mentation-(supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) at that uninstitutionalised-threshold. The fourth meaningful reference is actually a variance of the given organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of–\( \text{reference-of-thought} \)–as-confalatedness-or-ontological-reprojecting/longness-of-register-of–\( \text{meaningfulness-and-teleology} \)) pedestal which is registry-wise and logic-wise pertinent. It is about the intellectual and virtue driven aetiology/ontological-escalation (as per this paper aim and other studies) in grasping the human ontological implications and articulating the-Good/understanding/notional~knowledge-reification–gesturing-\( \langle \text{in-prospective psychologismic–apriorising/axiomatising/referencing-} \) of-attendant ontological-contiguity–\( \text{educed–existentialising/contextualising/textualising-contiguity} \)–confalatedness–\( \text{in-\{preconverging-disentailment-by\}–postconverging-entailment}\rangle/\langle \text{amplituding/formative–epistemicity} \rangle \text{causality} \)–as-to-projective-totalititative-implications-of-prospective- nonpresencing, for explicating-ontological-contiguity construct for the possibility of a conceptual insight and de-mentative/structural/paradigmatic resolution with regards to (at the registry-worldview/dimension or intradimensional level) procrypticism/the-reality-of-human-notional–firstnaturedness—temporal-to-intemporal-dispositions–\( \langle \text{so-construed-as-from-perspective–ontological-normalcy/postconvergence} \rangle \)-with-consequential-positivistic-meaningfulness-perversion preconverging-or-dementing \( \text{apriorising-psychologism}, \) resolved by deprocrypticism. Ontologically-speaking, a temporal naivety with regards to psychopath and its protraction as social psychopathy is that going by the dynamism of its faulty-mentation-procedure-deception-or-urge\textsuperscript{13} towards ‘extrinsic-attribution’ (the eliciting of the temporality\textsuperscript{9}/shortness of others is the sufficient basis for getting one’s way), is that the number of people ‘convinced’ by perverted extrinsic-attribution involving social-and-temporal-trading can have any bearing to the ontological-veridicality/intrinsic-reality in any way. While temporally-speaking, psychopathic situations often lead to a-country-of-the-blind-and-the-one-eye kind of scenario, wherein a thousand blinds may strive to convention out the one-eye, but then it wouldn’t still cut it, ontologically-speaking. (Certainly, it is equally and very possible that if such a one-eye isn’t beholden to a ‘sense of intemporality’ and it is rather temporally-inclined, it might equally take the easier route of reasoning in terms–as-of-axiomatic-construct of country-of-the-blind temporality\textsuperscript{9}/shortness whether with respect to temporally outdoing or undermining the phenomena by acting in a manner that is overall of a temporal/shortness-of-register-of–meaningfulness-and-teleology\textsuperscript{10} nature. But that will still be temporality\textsuperscript{9}/shortness and the notion of an aetiologisation/ontological-escalation as of intemporality\textsuperscript{5}/longness will no more be better advanced. Further beyond and more than just with respect to one case of psychopathy but as of intellectual-and-moral-inequivalence/non-correspondence construing the\textsuperscript{10} universal human social phenomena of psychopathic postlogism\textsuperscript{79} and conjugated-postlogism\textsuperscript{79} across space and time together with the bigger insight of grasping human nature and the overall possibilities thereof. Insightfully, as well it won’t be surprising that such a\textsuperscript{10} universal
projection will possibly meet with a more protracted-and-protracting psychopathy and social psychopathy manifestation going by overall human temporal-to-intemporal mental-disposition existential-form-factor as varied temporal-dispositions come into the frame and are elicted, just as an intemporal projection within a non-positivism/medievalism setup aspiring for a positivistic registry-worldview/dimension-level resolutive construal of their corresponding postlogism "as-of" compelling–nonconviction/madeupness/bottomlining-

{'<decontextualising/de-existentialising~of-attendant-intradimensional–apriorising/axiomatising/referencing>-induced-disontologising’-of-the-‘attendant-intradimensional–ontologising’–imbued<-contextualising/existentialising–attendant-ontological-contiguity >;in-shallow-supererogation -<as-to-disontologising-perverted-outcome-sought-precedes-existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness>} like notions-and-accusations-of-sorcery and which is not palliative to a given situation will equally elicit a social protractedness of the phenomenon as varied temporal-dispositions come into the frame and are equally elicted. But then that is an inevitability with respect to the more critical universal projection low-life purposefulness in both meaningful-frameworks). Rather this then points to the nature of postlogic perversion-of-reference-of-thought<-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > with temporal-dispositions; (unconsciously) ignorance and (consciously) other temporal-dispositions of affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation. Ontologically, it is then the subject of contention and aetiolisation/ontological-escalation of the organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of-reference-of-thought’–as-confatedness-or-ontological-reprojecting/longness-of-register-of–meaningfulness-and-teleology) pedestal, both in apriorising–registry and registry-
worldview terms as it is reflected/perspectivated as \[\text{de-mentation}\] (supererogatory–ontological–de-mention-or-dialectical–de-mention–stranding-or-attributive-dialectics). The critical reason for this is that the intemporal-disposition is rather inclined to be utter about intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as the complete and sufficient stand for knowledge and virtue with anything else being denaturing much in parallel as intrinsic-reality transcendental-enabling/sublimating/supererogatory–de-mentativity doesn’t accommodate human temporality, and so will not even entertain involving in anyway with social-and-temporal-trading exercise which is non-ontological (since it is fundamentally a perversion-and-derived-perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation, and has nothing to do with issues of defect-of-logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation of the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance). This can further be elucidated analysing perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation of a different nature in a superseded registry-worldview/dimension like non-positivism/medievalism registry-worldview/dimension which should provide an even greater insight analysing from our present perspective, and we can then comparatively project this with respect to notional–deprocrypticism and procrypticism. For instance, accusations of witchcraft in non-positivism/medievalism societies are ontologically about subknowledging/perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation as-of-unsoundness-or-ontological-bad-faith/inauthenticity-of-reference-of-thought/preconverging-or-
dementing\textsuperscript{20}–apriorising-psychologism based on the fact that such societies didn’t develop and integrate notions of empirical and rational cause-and-effect positivistic ideas as \textsuperscript{20}reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{00}, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (a mentation-capacity that further furthers the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as modern-day positivistic registry-worldview), as it\textsuperscript{104}universally informs the present positivistic worldview and thus the impossibility to sound intelligible in case such an accusation of witchcraft is made today. So structurally, the non-positivism/medievalism society is shaped-and-inclined to integrate and entertain phantasmagorical notions of someone being accused as a witch or sorcerer. We can garner a similar insight just as with the ‘disambiguation of notional–firstnaturedness—temporal-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence> as ontological-escalation/aetiologisation’ above, where supposed an intemporal mindset/\textsuperscript{95}reference-of-thought who is in a non-positivism/medievalism society was to be accused of witchcraft by someone inclined to accuse people of witchcraft (because of a pathological-condition/subknowledging\textsuperscript{95}-impulse/compulsive-dementing\textsuperscript{20}) and who obviously is wrong, as we know today that the notion of witchcraft is ontologically unsound and ridiculous as the ability to perform magic and the like by anyone cannot be demonstrated veridically. The disposition to accuse people of witchcraft will be the subknowledging\textsuperscript{104}-impulse/compulsive-dementing\textsuperscript{20} pedestal. The disposition to entertain and further exploit such situations (as anthropologists perfectly understand the abhorrent role of such notions as witchcraft in the social-stake-contention-or-confliction of non-positivism/medievalism societies) in conjugation of temporal-dispositions that are\textsuperscript{104}universally-recurrent or\textsuperscript{105}universal across all times (postlogism\textsuperscript{78}-slantedness, ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) is the threshold-

than the notion of just attaining only to the ‘one-locale’ accusation of witchcraft, for the

That is, the problem is now about the aetiologisation/ontological-escalation that can be made to address such lack of positivistic empirical and rational notions in all possible human societies qualified as non-positivism/medievalism. In other words, the graver ‘de-mentation’ (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) problem’ for the organic-comprehension-thinking (organicalism/’intemporal-prioritisation-of-’reference-of-thought’–as-conflatedness’–or-ontological-reprojecting/longness-of-register-of–meaningfulness-and-teleology)’intemporal-prioritisation-of-’reference-of-thought’–as-conflatedness’–or-ontological-reprojecting pedestal is ‘why is society non-positivism/medievalism, and it is not in ‘mentation equivalence’ with a subknowledging-impulse/compulsive-dementing mindset/reference-of-thought pedestal accusing it of witchcraft and the specific locale where such an accusation is made in threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation-as-to-‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing –apriorising-psychologism–temporal prioritisation pedestal that entertains notions of witchcraft (as the intemporal mindset/reference-of-thought

Rather it is about articulating a comprehensive de-mentative/structural/paradigmatic dialecticism reasoning-through/utterion (not reasoning-with incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation with temporal-dispositions mindsets) between non-positivism/medievalism and positivism for prospective ‘postconverging-or-dialectical-thinking—psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring away from the vices-and-impediments of a non-positivism/medievalism superstitious mental-disposition towards a prospective positivistic mental-disposition which is the virtue that is the de-mentative/structural/paradigmatic resolution to the superseded registry-worldview/dimension not only superstitious specific vices-and-impediments but equally critical the overall de-mentative/structural/paradigmatic causality as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity such superstition to the creative emancipation of human meaningfulness and action. That is, in the bigger scheme when it comes to deciding between ontological-veridicality/ontological-contiguity of reference-of-thought (as from ontological-normalcy/postconvergence epistemic-or-notional–projective-perspective) and the human temporal psyche, what gives-in is the human temporal psyche (and so for the betterment of the species); that is, from an animal that was emanantly/becomingly/solipsistically successively of a mental-devising-representation perspective preconverging-or-dementing--apriorising-psychologism—stranded-as-rightfully-oblongated/decandored-and-dialectically-or-contendingly-out-of-phase> at recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism, and from a prospective articulation, procrypticism–or–disjointedness-as-of reference-of-thought, and so respectively, for their successive institutionalisations mental-devising-representation perspectives as postconverging-or-dialectical-thinking—apriorising-psychologism—stranded-as-rightfully-straight/candored-and-

That is the singular construct that man cannot lose across all generations to enable the perpetual existential regeneration of civilisation beyond just being a seconndnatured construct as mere-institutionalised-being-and-craft (which can often actually turn out to be alien to the intemporal-disposition apriorising–registry, that we can all potentially cultivate, that created, creates, and needs to keep creating the conditions for institutionalisation perpetuation)! The implication is that soundness-or-ontological-good-faith/authenticity of reference-of-thought-of-meaningfulness is not given, as it is a devising mechanism (mental-devising-representation) for ontological-veridicality as dialectically upheld for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (ontological-normalcy/postconvergence). There is no doubt that if by some secret manner ‘some individuals from recurrent-utter-uninstitutionalisation registry-worldview/dimension’ were to appear and be able to live in our present positivistic social-setup (without us knowing beforehand that they are coming from the past to avoid inducing a confounding effect in our analysis), and intent on fully living based on the categorical-imperatives/axioms/registry-teleology, for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation of the recurrent-utter-uninstitutionalisation setup, our current psychology science most probably will treat them as pathological (preconverging-or-dementing—apriorising-psychologism). At which point, implying the conceptualisation of such an ontological-mental-pathology or de-mentation (in contrast to a physiological mental pathology) is much more a question of ‘ontology valour’ (ontology valour being defined as a registry-worldview’s/dimension’s ontology depth in relation to its conventioning limitations with respect to pure-intemporal-ontology as to ontological-normalcy/postconvergence). But then, crazy as it may seem, this extends ontological-mental-pathology or de-mentation conceptualisation, on those very same terms of ontology valour, not only retrospectively but equally prospectively, as from a prospective transcendence-and-supererogatory—de-mentativity (with a corresponding insight about how
we may be that preconverging-or-dementing apriorising-psychologism from such a prospective transcendence-and-sublimity/sublimation/supererogatory de-mentativity’s reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (of course, that is, when occluding our illusion-of-the-present/present-consciousness/epistemic-totalising~self-referencing-syncretising/mirage) herein construed as the prospective protensive-consciousness deprockrypticism–or–preempting—disjointedness-as-of- reference-of-thought registry-worldview/dimension. In the bigger picture, de-mentation (supererogatory ontological de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) effectively will seem to place human {cumulated/recomposured}-consciousness-awareness-teleology in the backseat with ontology-in-its-inherent-dialectical-abstraction taking the frontseat in the articulation of intrinsic reality and correspondingly human mental-devising-representation. Actually, registry-worldviews/dimensions are rather prospectively <amplituding/formative> wooden-language-{imbued—temporal—mere—form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the—reference-of-thought–categorical-imperatives/axioms/registry-teleology } of their own specific evolving successive existentialisms (with their full-depths-of-existential-implications specific evolving preconverging–dementating/structuring/paradigming), and with specific evolving percolation-channelling-indeferential-formalisation-transference for prospective ontologising and ontologising-transcendence-and-sublimity/sublimation/supererogatory de-mentativity. Fundamentally, without the possibility of de-mentativity-of-the-human-psyche-for-prospective-institutionalisation involving de-mentation (supererogatory ontological de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics), no registry-
worldview/dimension will be transcendable (hence de-mentable/as-to-a-threshold-of-lack-of-thinking) for prospective institutionalisation. As it is from de-mentation (literally ‘de-mentation’) that an unshackling/recomposuring/reordering/new-mentation of prospective intemporal-preservation-entropy-or-contiguity–or–ontological-preservation reference-of-thought–categorical-imperatives/axioms/registry-teleology is possible. This is because de-mentation–({supererogatory–ontological–de-mentation-or-dialectical–de-mentation—strandings-or-attributive-dialectics}) as such allows for a ‘human mentation capacity renewal’ by transcendence-and-sublimity/sublimation/supererogatory–de-mentativity (as it is by cumulation/reordering/recomposuring the prior institutionalisation mentation-capacity for a contiguous upholding of intemporal-preservation-entropy-or-contiguity–or–ontological-preservation that transcendence-and-sublimity/sublimation/supererogatory–de-mentativity occur) of the ‘veridical reference-of-thought of meaningfulness’ since it dements the mental-devising-representation of the old/retrospective/superseded/transcended registry-worldview/dimension ‘as not postconverging-or-dialectical-thinking—apriorising-psychologism/soundness-or-ontological-good-faith/authenticity—of—reference-of-thought but preconverging-or-dementing—apriorising-psychologism and dialectically-or-contendingly-out-of-phase at its uninstitutionalised-threshold and references the mental-devising-representation of the new/prospective/superseding/transcending registry-worldview/dimension as ‘effectively postconverging-or-dialectical-thinking—apriorising-psychologism/soundness-or-ontological-good-faith/authenticity—of—reference-of-thought as a new-and-greater-mentation-capacity and dialectically-or-contendingly-in-phase; on the grounds that the veridicality of the reference-of-thought is what upholds ontological-normalcy/postconvergence/prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. For instance, at its uninstitutionalised-threshold requiring a prospective positivistic registry-
worldview/dimension, the non-positivism/medievalism registry-worldview/dimension which is rather superstitious/alemic/aristocratic is rather ontologically-preconverging-or-dementing\(^1\)–apriorising-psychologism/dialectically-preconverging-or-dementing –apriorising-psychologism in a \(^{17}\) de-mentation\(^{18}\) (supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics) wherein its mental-devising-representation is preconverging-or-dementing\(^{20}\)–apriorising-psychologism as not thinking/unsoundness-or-ontological-bad-faith/inauthenticity –of– reference-of-thought and dialectically-or-contendingly-out-of-phase while the positivistic registry-worldview/dimension mental-devising-representation is postconverging-or-dialectical-thinking\(^{21}\)–apriorising-psychologism/soundness-or-ontological-good-faith/authenticity –of– reference-of-thought and dialectically-or-contendingly-in-phase, thus ‘granting the latter \(^5\) reference-of-thought (veridical-thinking-reference-over-preconverging-or-dementing -reference)’ over the former which is ‘no longer \(^6\) reference-of-thought’ in the sense that ‘we can’t think in medieval terms and be considered soundness-or-ontological-good-faith/authenticity –of– reference-of-thought today but rather ontologically-preconverging-or-dementing\(^3\)–apriorising-psychologism’. This dialectical conceptualisation equally applies regarding procrypticism and futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\(^{100}\) as of prospective notional–deprocrypticism registry-worldviews/dimensions. In fact, a deconstruction insight with regards to all the interchangeable deconstructing terms in reference to the notion of ‘failing/not-upholding-<of-apriorising/axiomatising/referencing> intradimensional reference-of-thought–categorical-imperatives/axioms/registry-teleology\(^{10}\),-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation’ (i.e. \(^{15}\) de-mentation\(^{16}\) (supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics), \(^{75}\) perversion-of–reference-of-thought-<as-preconvergingly-apriorising/axiomatising/referencing-in-

dimension (as straight/candored-and-dialectically-or-contendingly-in-phase) and a superseded/transcended registry/registry-worldview-or-dimension (as oblongated/decandored-and-dialectically-or-contendingly-out-of-phase); around which all other dynamic constructions fall in place (whether organic-comprehension-thinking or threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation & as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism, circumventive/distractive-temporal-prioritisation-of- reference-of-thought, subknowledging ‘-impulse, etc.). The other deconstructing terms while having specific analytical bearings do not carry this all-encompassing quality that liberates from ‘intradimensional-subknowledging -normalcy’ (epistemic-totalising ~self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage inclination) as de-mention-(supererogatory–ontological–de-mention-or-dialectical–de-mention—stranding-or-attributive-dialectics) does as it further induces ‘transdimensional or memetic thinking’ by its implied de-mention-(supererogatory–ontological–de-mention-or-dialectical–de-mention—stranding-or-attributive-dialectics) in meeting up with ‘ontological-normalcy/postconvergence’ (prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation). For instance, while the term registry-worldview’s/dimension’s-uninstitutionalised-threshold ⟨supererogatory–ontological–de-mention-or-dialectical–de-mention—stranding-or-attributive-dialectics⟩ brings to the mind a poor ontological disposition like the other BODMAS characters disposition to systematically operate additionality overlooking A’s condition, but it is a sense of de-mention-(supererogatory–ontological–de-mention-or-dialectical–de-mention—stranding-or-attributive-dialectics) that carries the intuition of an uninstitutionalised-threshold, and construes a superseding/transcending registry/registry-worldview-or-dimension and a superseded/transcended registry/registry-worldview-or-dimension, and all the implications thereof. Now analysing the registry-

A similar articulation can be made with regards to each of the other deconstructing terms where dementation – (supererogatory – ontological – de-mentation-or-dialectical – de-mentation – stranding-or-attributive-dialectics) provides the better overarching conceptualisation from an ‘intemporal-prioritisation-of’ reference-of-thought’–as-conflatedness-or-ontological-reprojecting reference-of-thought (veridical-thinking-reference-over-preconverging-or-dementing reference). Furthermore, by its dementation – (supererogatory – ontological – de-mentation-or-dialectical – de-mentation – stranding-or-attributive-dialectics), dementation – (supererogatory – ontological – de-mentation-or-dialectical – de-mentation – stranding-or-attributive-dialectics) is the only notional term that operantly and deterministically projects the requisite psychoanalytic-unshackling/memetic-reordering/recomposing/new-mentation with regards to the implied veridical existentialism/full-depth-of-existential-implications taking into account the veridicality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint–imbued-‘notional–firstnaturedness–temporal-to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’ – existentialism-form-factor hotchpotching wherein sound knowledge/virtue is pliable to temporal denaturing and corresponding conjugation/derivation thus the need for knowledge-notionalisation as a response to human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint–imbued-

Central to intemporal-preservation-entropy-or-contiguity–or-ontological-preservation is an ontological-normalcy/postconvergence that doesn’t recognise any uninstitutionalised-threshold to the projected wooden-language
categorical-imperatives/axioms/registry-teleology(\textsuperscript{10}) considered circumventive/distractive-temporal-prioritisation-of—reference-of-thought over inherent ‘intemporal-prioritisation-of-reference-of-thought’—as-conflectedness\textsuperscript{11}-or-ontological-reprojecting of intemporal-preservation-entropy-or-contiguity—or-ontological-preservation; at which point of uninstitutionalised-threshold\textsuperscript{13}, de-mentation\textsuperscript{15} (supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics) is implied (in organic-comprehension-thinking over mechanical comprehension or as a \textsuperscript{\textsuperscript{9}}} de-mentation\textsuperscript{15} (supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics) for a renewed/prospective mentation for intemporal-preservation-entropy-or-contiguity—or-ontological-preservation in ‘intemporal-prioritisation-of-reference-of-thought’—as-conflectedness\textsuperscript{11}-or-ontological-reprojecting that ‘supersedes deterministically and operantly, without any discretion allowed’, circumventive/distractive-temporal-prioritisation-of—reference-of-thought. That is \textsuperscript{\textsuperscript{9}}} de-mentation\textsuperscript{15} (supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics) is effectively the notion that, in recognition of the unchanging, preceding and inherent nature of intrinsic-reality with respect to the human psyche (and its mental-devising-representation of intrinsic reality) which is what ‘gives-in’/collapses ontologically/as-an-ontological-reference; enables, for the articulation of new mentations as transcendence-and-sublimity/sublimation/supererogatory—dementativity, the ‘giving-in’/collapsing of the mental-devising-representation of successive institutional-cumulation/institutional-recomposure-(as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective—ontological-normaley/postconvergence-reflected—epistemicity-relativism-determinism’>) mindsets, notwithstanding the fact that the \textsuperscript{\textsuperscript{9}}} de-mentation\textsuperscript{15} (supererogatory—ontological—de-mentation-or—
dialectical–de-mentation—stranding-or-attributive-dialectics) (of their reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) is unintelligible/existentially-suprastructural to these superseded/transcended registry-worldviews/dimensions mindsets due to their <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage disposition. Supposed we were to make a profound analysis of our contiguous human mental-devising-representation/consciousness-awareness-teleology (in-dialectical/recomposuring-moments) from the appearance of human beings on earth, the effective linkage as new-mentations between those successive recomposuring moments (whether recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism-or-medievalism, positivism–procrysticism and prospectively perpetuation-of-deprocrysticism) is as de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) in de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics); and this thus predicates or rather postdicates as well our own registry-worldview/dimension de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) over and as denaturing positivistic meaningfulness reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (procrysticism) and implying a prospective need for deprocrysticism. Postdication, when alluding to an de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) defining psychological science, will effectively hold that the conceptualisation of the social is very much a contiguous ontological disambiguation of a preconverging-or-dementing–apriorising-psychologism social of personhoods-and-
socialhood-formation in existentialism/full-depth-of-existential-implications of notional-firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective—ontological-normalcy/postconvergence>, from a prospective registry-worldview’s/dimension’s reference-of-thought in ontological-normalcy/postconvergence. Postdication means reasoning from a basis of ontological-normalcy/postconvergence wherein the prior/transcended/superseded registry-worldview/dimension is no longer referenced/registered/decisioned (as reference-of-thought) but ‘dialectically preconverging-or-dementing—apriorising-psychologism/unsoundness-or-ontological-bad-faith/inauthenticity—reference-of-thought’ while the prospective/transcending/superseding registry-worldview/dimension is referenced/registered/decisioned (as reference-of-thought) as ‘postconverging-or-dialectical-thinking—apriorising-psychologism/soundness-or-ontological-good-faith/authenticity—reference-of-thought’ in construing meaningfulness. The grander issue that always arises is in existentialism terms, whether with regards to an obvious human disposition for temporal-accommodation as circumventive/distractive-temporal-prioritisation-of-reference-of-thought of being-and-existence as conceptualised within the successions-of-existing-in-human-life-spans or rather an abstract eternal-projecting disposition of ‘intemporal-prioritisation-of-reference-of-thought’—as-conflatedness—or-ontological-reprojecting wherein the articulation of meaning, being and existence is in existentialism-terms intemporally-driven on the basis that that which is in need of transcendence-and-the-intemporal (the temporal) cannot be seen-as-or-made-a-reference-of-intemporal/ontological-thought, and that it is exactly for that reason that human progress has been and will remain dialectically possible. That is, the reference-of-thought (veridical-thinking-reference-over-preconverging-or-dementing-reference) can only be the pedestalling of an ‘intemporal-prioritisation-of-reference-of-thought’—as-conflatedness—or-ontological-reprojecting as ontology with regards to apriorising–registry, contrasted to a circumventive/distractive-temporal-prioritisation-of-
reference-of-thought-reference implying a perverted-registry reflected/perspectivated by its de-mentation–(supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics). Where the natural world is resolute with no compromise with the operation of such a notion as 1+1=2, the same cannot be resolutely affirmed in the human social-and-temporal-trading in the social world where on occasions 1+1 will add up to 5 where the effective constraining of institutionalisation is lacking. de-mentation–(supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics) (stranding) has the merits of articulating that for reference-of-thought (veridical-thinking-reference-over-preconverging-or-dementing–reference) to establish veridicality, no such social-and-temporal-trading is beyond ontological-entrapment 'by re-institutionalisation with new reference-of-thought–categorical-imperatives/axioms/registry-teleology,–for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation dialectically implying an de-mentation–(supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics) of transcended reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (in our present case, notional–deprocrypticism of procrypticism–or–disjointedness-as-of- reference-of-thought, for a de-mentative/structural/paradigmatic resolution of defective-issues or vices-and-impediments of our registry-worldview/dimension and just as critically the de-mentatively/structurally/paradigmatically inhibiting effect on the furtherance of human emancipative potential; just as positivism is the de-mentative/structural/paradigmatic resolution of defective-issues or vices-and-impediments of non-positivism/medievalism together with the de-mentatively/structurally/paradigmatically inhibiting effect on the furtherance of human emancipative potential, and the same applies with ununiversalisation and universalisation, and recurrent-utter-uninstitutionalisation and base-institutionalisation); thus the potential to
fully close the gap with regards to ontological-veridicality of the natural sciences in a ‘renewed maturation’ of the phenomenological ontological-performance conceptuation of the social. Though with the weakness we must be able to rise up to, that ‘the social’ is existentially ‘emotionally involved’. But this can be and is effectively overcome by ‘appropriately universalising and detached meaningfulness by percolation-channeelling-in-deferential-formalisation-transference’ as devised for all formalised and institutionalised settings capable of introducing, upholding and internalising the ascendancy of many a social outlying thoughts and meaningfulness which from a ‘purely mobbish social disposition’ as may arise in the extended-informality-(susceptible-to-effecting parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) would hardly be countenanced. The bigger picture here (and of relevance to a registry-worldview/dimension transcendence-and-sublimity/sublimation/supererogatory-de-mentativity from procrypticism to notional-deprocrypticism as the de-mentative/structural/paradigmatic and general resolution of the vices-and-impediments together with the de-mentatively/structurally/paradigmatically inhibiting effect on the furtherance of human emancipative potential of the perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation as to preconverging-or-dementing-apriorising-psychologism of positivistics meaningfulness-and-teleology, and specifically resolution of the implications of psychopathic subknowledging / perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation) may be to think, given our own illusion-of-the-present/present-consciousness as-amplituding/formative-epistemicity-totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, that such an analysis applies only to prior institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-perspective-
ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism'>}. But the fact is that such a profound conceptualisation will have to come to terms with the reality of the implied existentialism/full-depth-of-existential-implications beyond our present sense of personhoods-and-socialhood-formation if it were to avoid platitudinising, becoming circular with dead-ends and lose its intemporal purpose and hence ontological purpose, and so for the simple reason that it is the human psyche that ‘gives-in’ with respect to intrinsic-reality as renewed/prospective ontological-veridicality, starting with that of the intellectual analyst/analysts itself/themselves); as the human psyche gave-in from recurrent-utter-uninstitutionalisation to base-institutionalisation, ununiversalisation to universalisation, non-positivism/medievalism to positivism, and where renewed/prospective ontological-veridicality does establish a new registry-worldview/dimension transcendental postconverging–de-mentating/structuring/paradigming shift as procrypticism to deprocrypticism, then the human psyche will equally have to give-in, and by the way all transcendence-and-sublimity/sublimation/supererogatory–de-mentativity meet with some resistance or the other and thus a reason for transversality<for-sublimating–existential-eventuating/denouement>–of- affirmative-and-unaffirmative–disambiguated–motif-and- apriorising/axiomatising/referencing’ reflex to preserve the precedingness/supersedingness/ascendency of intrinsic-reality in adverting social-and-temporal-trading of meaningfulness. Part and parcel, of human intellectualism beyond mere-institutionalised-being-and-craft, as has historically been implied in the case with many a great human mind, is to recognise that the social-construct is ‘not an ontological absolute’ but rather a ‘conventioning construct at the limits of human ontological capacity’ and that that is ‘why it has got its defining issues and problems’ and further that ‘it progresses and transcends’, and the intellectual exercise goes beyond just reasoning within ambits of ‘temporally-and-socially-perceived-rightness-of-thinking’ to explore possibilities that might actually be ‘outright
unpalatable’ in the temporo-social sense but in the bigger picture as an intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming are indispensable. With the idea that an intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming that prolongs to intemporality/an-abstract-eternity while obviously of ‘less an immediate temporal existential sense of good to some humans’ is undoubtable of ‘an intemporal existential sense of good to all humans at all times’ by its percolation-channelling-<in-deferential-formalisation-transference> wherein for instance, the de-mentative/structural/paradigmatic effect of the law is allowing for civilisational living but its circumstantial construal and application may not be in tune with the temporal interests of many but for its institutionalising constraining. This contrast between humans appreciating intemporality/longness as potentially of universal import and at the same time disposed occasionally to advanced their temporality, is what warrants ‘a constraining institutionalisation’. In the same vain, one may ask what’s the temporal benefit to Rousseau or Galileo instead of striving for greater aristocratic privileges for themselves; for the one to rather carry the mantle from one royal court to the other of affirming the possibility of human emancipation (by which we are all percolatively benefiting from today) or the other the mantle of a principled engagement and possibility of science starting with an uncompromising supplanting–conviction-as-to-profound-supererogation—of–attendant-intradimensional—postconverging/dialectical-thinking—apriorising-psychologism from observation that the earth is not at the centre of the solar system, by which a culture of science came to be established. And finally, how coherent are temporal meaningful frames built from such intemporal grand principles but lived on temporal dispositions in extrication in contradiction to such
philosophies, and what is the very relevance of such temporal enculturation and endemisation to present-day social and institutional failures in society? And what’s the role of ‘intellectual irresponsibility’ in all of this? From an intemporal hence ontological depth-of-meaningfulness, precedingly/supersedingly, ‘limited-mentation-capacity’ (for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) is the reason for human registry-worldview/dimension perversion-of-reference-of-thought-as-preconvergingly- apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow- supererogation > defect at uninstitutionalised-threshold; implying that ‘ontological-normalcy/postconvergence’ is actually for prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation beyond the defective ‘intradimensional-subknowledging-normalcy or reflex-normalcy’ which is rather an <amplituding/formative–epistemicity>totalising–self-referencing- syncretising/circularity/interiorising/akrasiatic-drag (illusion-of-the-present/present-consciousness) inclination to overlook/aside the notion of prospective transcendence-and-sUBLIMITY/SUBLIMATION/SUPEREROGATORY–DE-MENTATIVITY at its own (limited-mentation-capacity-threshold) uninstitutionalised-threshold though it will obviously and paradoxically recognise the need of prior registry-worldviews/dimensions to transcend (just as by reflex from our perspective we will recognise such a need for base-institutionalisation over recurrent-utter-uninstitutionalisation, universalisation over ununiversalisation, positivism over non-positivism/medievalism but hardly prospectively the notion that our dimension has an uninstitutionalised-threshold like procrypticism–or–disjointedness-as-of-reference-of-thought with the need for prospective transcendence-and-sUBLIMITY/SUBLIMATION/SUPEREROGATORY–DE-MENTATIVITY as deprocrypticism). However, as previously indicated such an insight can only be garnered, beyond our illusion-of-the-present/present-consciousness/epistemic-totalising–self-referencing-syncretising/mirage as all
registry-worldviews/dimensions wrongfully imply, given that ‘doppler-thinking’ wherein our registry-worldview/dimension isn’t the absolute reference of meaningfulness (which is rather an intradimensional-subknowledging-normalcy in lieu of the ‘ontological-normalcy/postconvergence’ as that which allows for prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or–ontological-preservation). It is this ‘ontological-normalcy/postconvergence’ that reflects/perspectivates perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation-defect as defacement-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) as against the defective reflex-normalcy/intradimensional subknowledging-normalcy that wrongfully represent it as straightness/candored-and-dialectically-or-contendingly-in-phase. Thus the general notion of an intemporal/ontological resolution of perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation is more than just the instigating effect of the subknowledging-impulse/compulsive-dementing (psychopathic postlogism in hollow-constituting-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation) but harkens back to the notion of the intraregistry-worldview/dimension limited-mentation-capacity/uninstitutionalised-threshold in the very first place. As this is the preconverging–de-mentating/structuring/paradigming disposition for the possibility of perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation thus requiring ontological-normalcy/postconvergence epistemic-projection as prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or–ontological-preservation. Once this enters the collective-consciousness this leads to an inclination for a renewed

To further elucidate, let’s explore again the Arithmetic ontological-contiguity comparison highlighted previously wherein character A had a condition whereby its results of additionality were systematically incremented by 1, its’s subknowling-impulse/compulsive-dementing highlighting an uninstitutionalised-threshold where the other characters wrongly calculated the result (the ontological-veridicality) failing/not-upholding-as-of-apriorising/axiomatising/referencing> ontological-normalcy/postconvergence as intemporal-preservation-entropy-or-contiguity–or–ontological-preservation implied by ontological-faith-notion-or-ontological-fideism–imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality, as actually intemporal-preservation-entropy-or-contiguity–or–ontological-preservation supersedes the mere–categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation which are readily predisposed to such perversion-of-reference-of-thought–categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation which are readily predisposed to such.

In any case the de-mentative/structural/paradigmatic resolution is with regards to the implications of metaphorically-a-million-and-one-instances-and-locales of perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation in the given registry-worldview/dimension as an aetiologisation/ontological-escalation (as notional-firstnaturedness—temporal-to-intemporal-dispositions-so-construed-as-from-perspective-ontological-normalcy/postconvergence individuations predictable and determinable teleologies). That is, fundamentally the appropriate conceptualisation of reference-of-thought—categorical-imperatives/axioms/registry-teleology—for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation is structurally-speaking about perpetually ensuring intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as the superseding/preceding notion (i.e. ontological-normalcy/postconvergence as prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation). In this regard, we may easily construe the fundamental defects-of—categorical-imperatives/axioms/registry-teleology—for-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as these enable perversion-of-reference-of-thought—as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation with respect to

That is, while the condition/subknowledging–impulse/compulsive-dementing with A’s additionality results are wrongly incremented by 1, leading to the uninstitutionalised-threshold to be rightfully corrected with new reference-of-thought–categorical-imperatives/axioms/registry-teleology, for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation involving subtracting 1; the defect of a second registry-worldview/dimension may involve subtracting 1 from the result of S as a condition/subknowledging–impulse/compulsive-dementing of S, requiring similarly new reference-of-thought–categorical-imperatives/axioms/registry-teleology, for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation correction of the BODMAS characters as with the first registry-worldview/dimension to uphold the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. Likewise, a third and fourth registry-worldview/dimensions defects could involve respectively a subknowledging–impulse/compulsive-dementing/condition of M wherein the latter wrongly adds 1 to a multiplier before multiplying and a subknowledging–impulse/compulsive-dementing/condition of D wherein D wrongly subtract 1 to a divisor before dividing, with these two latter registry-worldviews/dimensions equally requiring similarly new reference-of-thought–categorical-imperatives/axioms/registry-teleology, for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation adjustment of the BODMAS characters as with the first and second registry-worldviews/dimensions to uphold the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. Ultimately, a notional–deprocrypticism construal of the institutionalisation/intemporalisation process aiming
to perpetually sync reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or-ontological-preservation with intemporal-preservation-entropy-or-contiguity–or-ontological-preservation in ontological-normalcy/postconvergence, is one that will bring to the mental-devising-representation, the BODMAS characters potential temporal-dispositions to perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-

The implications for the science of psychology can thus be drawn out. The articulated notion of de-mentation supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics brings up the central conceptual role of psychology as about understanding human mental-devising-representation and the implications thereof. Central to this de-mentation supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics process is a dialectical exercise of stranding; either as mentally oblongated/decandored-and-dialectically-or-contendingly-out-of-phase to imply a superseded/transcended/unsound registry-or-registry-worldview/dimension or as mentally straight/candored-and-dialectically-or-contendingly-in-phase to imply a superseding/transcending/sound registry-or-registry-worldview. De-mentation supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics further implies that instead of a ‘conventioning influenced and driven’ more or less notational study of human psychological phenomena as is the case today; we can ‘think’ of psychology in de-mentation supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics terms of de-mentation supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics.

In so doing, overriding and superseding the analyst illusion-of-the-present/epistemic-totalising~self-referencing-syncretising/present-consciousness/mirage referring to the instance where the personhood-and-socialhood-formation intradimensional conventioning induces an ‘analytical-complex’ with respect to an ontologically veridical psychological-representation or mental-devising-representation. This ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ is the foundation of a pure, emancipated and disinhibited psychology (both registry-and-registry-worldview-wise) as such a psychology is grounded exclusively on ontologically demonstrable references of the veridicality of registries and registry-worldviews/dimensions successive existentialisms/full-depths-of-existential-implications, and the corresponding ontological veracities implied. Such a
‘postconverging-or-dialectical-thinking’—psychology or psychology-of-mentation-dynamics or natural—psychological-dynamics’ contrasts with a ‘mented’ or ‘stigmatic’ psychology of weak memetism/transdimensional-meaningfulness/suprastructural-meaningfulness reference-of-thought for the simple reason that it is not founded on a pure dialecticism of ontological/dialectical-referencing but rather on intradimensional conventionalised referencing which wrongly hardly proxies the veridicality of ontological-normalcy/postconvergence or construe a dialectical-reference/ontological-reference for ‘de-mentation’ (supererogatory—ontological—de-mentation—or-dialectical—de-mentation—stranding—or-attributive-dialectics) of ‘reference-of-thought’ of psychological-representation/mental-devising-representation at uninstitutionalised-threshold. Such ontological-circularities are engrained in all registry-worldviews/dimensions wherein the naïve pretence for a quest for deeper ontological-veridicality is rather just syncretic/circular and hollow-constituting-as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation as fundamentally the reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of the said registry-worldview/dimension are at a dead-end with a de-mentative/structural/paradigmatic impossibility for a critical breakthrough just by the mere fact that the registry-worldview/dimension has attained its mentation-capacity-limitation or uninstitutionalised-threshold (as the nature of intrinsic-reality with respect to the human psyche is ontological-normalcy/postconvergence or inherently preceding or inherently superseding as it doesn’t change an iota, and it is the human psyche that gives-in in its mental-devising-representation to conform to intrinsic-reality). With such naïve efforts to keep up and develop profound meaningfulness based on the same registry-worldview’s/dimension’s institutionalisation reference-of-thought–categorical-imperatives/axioms/registry-teleology mostly a dead-
end. Such ontological-circularities will include for instance the dead-end of medieval alchemy preconverging–de-mentating/structuring/paradigming with respect to positivistic chemistry postconverging–de-mentating/structuring/paradigming, a flat-world preconverging–de-mentating/structuring/paradigming with respect to a round world postconverging–de-mentating/structuring/paradigming, a creationism preconverging–de-mentating/structuring/paradigming with respect to an evolution postconverging–de-mentating/structuring/paradigming, a universal humanity postconverging–de-mentating/structuring/paradigming with respect to aristocratic/racial/tribal preconverging–de-mentating/structuring/paradigming, a science postconverging–de-mentating/structuring/paradigming with respect to a superstition preconverging–de-mentating/structuring/paradigming, etc. Naivety will be to think that issues of ontological-circularity in our present positivistic meaningfulness (for transcending beyond our vices-and-impediments and overcoming inherent inhibitions to human emancipation) are not in veridicality about a need for a shift in prospective postconverging–de-mentating/structuring/paradigming. This brings forward fundamentally the limited-mentation-capacity/uninstitutionalised-threshold construct of our times (procrypticism) and the de-mentative/structural/paradigmatic implications specifically for such a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ (as highlighted) over a relatively mented-mental/psychology/stigmatic-psychology. What this reveals is that reality is ‘not a human mental-devising-representation processing exercise’; rather it is an intrinsic ontological-normalcy/postconvergence notion that doesn’t respond to human mental-devising-representation processing. The role of de-mentation–(supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) as a mental-devising-representation mechanism that syncing with evolving ontological insight (insight about
intrinsic reality) as ontological-normalcy/postconvergence is to reflect/perspectivate the
dialectically-or-contendingly-out-of-phase or dialectical-primitivity at the very limit of the
capability as its mental-devising-representation of a registry-worldview/dimension
(uninstitutionalised-threshold), which otherwise any
registry-worldview will overlook as it is a wooden-language
(imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of-
meaningfulness-and-teleology-as-of-'nondescript/ignorable–void'-with-regards-to-
prospective-apriorising-implications) that is exclusively operant and deterministic only to its
very own reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation and is not tied to
intrinsic-reality but rather pertinent only for when it proxies intrinsic-reality. It is only dementation—(supererogatory—ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) that can create the foundation for a new mentation (unshackle it
psychoanalytically/memetically/meaningfully reorder it/recomposure it) to in ontological-normalcy/postconvergence come into grips with a more profound ontological-veridicality as a new reference-of-thought (veridical-thinking-reference-over-preconverging-or-dementing-reference) for a new existentialism/full-depth-of-existential-implications meaningfulness and thought. This insight about the intrinsic-nature-of-reality/intrinsic-reality is critical and central to understanding how ‘knowledge-deadend—de-mentating/structuring/paradigming’ can be overcome/superseded. Supposed B was to stick to resolving the BODMAS equation overlooking A’s condition on the basis that the reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation are set and given, whether these uphold intemporal-preservation-entropy-or-contiguity—or-ontological-preservation or not (which is what ensures proxying to
intrinsic-reality), and further that the other BODMAS characters will do likewise anyway, this
doesn’t in any way transform the ontological-normalcy/postconvergence ontological-
veridicality/intrinsic-reality from to 72.5. Such a wrong disposition rather points aetiologically
for the need (in ontological-escalation) of an 15 de-mentation-(supererogatory-ontological-de-
mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) of the BODMAS
characters at that uninstitutionalised-threshold110. In the bigger picture, ‘knowledge-deadends—
preconverging–de-mentating/structuring/paradigming’ (to varying degrees of pertinence) are
often the explanation of underlying social issues and problems more than just about limited
human ability or insufficiently directed effort towards the resolution of such issues and
problems on the basis of present preconverging–de-mentating/structuring/paradigming. It is
inevitable that emancipation from such knowledge-deadends—preconverging–de-
mentating/structuring/paradigming will always require that the would-be intellectual-analyst or
intellectual-analysts ‘blunt it’ (just as intrinsic-reality is uncompromisingly blunt) to the
<amplituding/formative–epistemicity>totalising–self-referencing-syncrétising/illusion-of-the-

needed is a postconverging–de-mentating/structuring/paradigming–shift. Much like observation

To further elucidate the criticality as indicated of such a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ as indicated with respect to a ‘mented’ or ‘stigmatic’ psychology can be further reemphasised clearly as such; a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ is one that is being ontologically-driven or led by ontological-veridicality when it comes to mental-devising-representation by strictly adhering to the de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) of de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics). In other words, it overrides the mented/stigmatic intradimensional meaningfulness mental-devising-representation and enables a transdimensional-meaningfulness mental-devising-representation, wherein a mented/stigmatic mentation de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) in reflecting soundness-or-ontological-good-

For instance, we can project insightfully that a mented/stigmatic mental-disposition in a non-positivism/medievalism setup in an impression-driven/good-naturedness/wishfulness disposition but hollow-constituting as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation(failing/not-upholding–as-of-apriorising/axiomatising/referencing) reference-of-thought– categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy–or-contiguity–or–ontological-preservation) will raise an issue of say sorcery in terms–as-of-axiomatic-construct of who is the sorcerer or sorcerers among us, how should sorcery be stopped and
prevented in the community in its preconverging–de-mentating/structuring/paradigming, and not in a prospective positivistic postconverging–de-mentating/structuring/paradigming that is more ontologically-veridical, putting in question the veracity/ontological-pertinence of the non-positivism/medievalism conventioning notion of sorcery, however ‘good-natured’/impression-driven, while raising the positivistic the-Good/understanding/notional–knowledge-reification–gesturing<in-prospective_pyschologismic–apriorising/axiomatising/referencing–{of-attendant–ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity}–conflatedness—in–{preconverging-disentailment–by}–postconverging–entailment>/*<amplituding/formative–epistemicity>causality—as-to-projective-totalitative–implications-of-prospective–nonpresencing—for-explicating-ontological-contiguity> of a positivising/rational-empiricism ^\textsuperscript{8} reference-of-thought. Such an insight prospectively will involve putting into question naïve and ever evolving constructs in our modern-day mented/stigmatic psychology science like personality disorders on the fundamental argument regarding the relatively poor insight about the requisite ^\textsuperscript{8} reference-of-thought to be established in the first place before then qualifying personalities with respect to such a philosophically and insightfully soundly established ^\textsuperscript{8} reference-of-thought, and not just naïve assumptions whether on the basis of popular axioms, vagueness and personal however well-meaning; with the idea of meaningfulness that goes beyond just a conventioning ^\textsuperscript{8} reference-of-thought and is rather inherently upheld by ontologically-veridical insight and pertinence. Further, such a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ that is ontologically-driven will go beyond an exercise of mented/stigmatic phenotypes driven abstractly as inherent-personalities nature and in given settings-of-time, but grasp that human personality is critically involved in the ^\textsuperscript{15} de-mentation (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) hermeneutically/reprojectively/supererogatingly/zeroingly-educing-
human—meaningfulness-and-teleology—into-the-existentialism-becoming of personhoods- and-socialhood-formation as so-reflecting ontological-reconstituting—as-to-confatedness/deconstruction as the more profound ‘reference-of-thought and analysis, and with a more fundamental interdimensional/transdimensional/transcendental insight of the human existentialism form-factor. In this regard, it is the opinion of this author that many construed personality disorders that do not involve social deviances or not of physiological nature are actually adaptations at one time or the other in an ever-changing-and-challenging-construct that individuals make of a ‘wanting and developing social world with its stakes and confliction’, and it would rather be better to articulate personality as driven by a pertinence of being/ontological-extension-into-existentialism-or-full-depth-of-existential-implications with respect to such ‘a challenging and developing social world with its stakes and confictions’ in the first place, otherwise we are just affirming arbitrary social classification schemes and not really involved in the requisite postconverging–de-mentating/structuring/paradigming shifts; and such could further be grasped regarding specifically how many an experimental psychology schemes ‘desperately’ striving to draw social-world level conclusions can’t seem to supersede the modesty of schemes that it is just too farfetched and synoptically-limiting, thus trending more towards the defect of apriorising=axiomatising=referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—confatedness—in-preconverging-entailment in lieu of apriorising=axiomatising=referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—confatedness—in-{preconverging-disentailment by}–postconverging-entailment as articulated by this author. Foucault had qualified the current focus on abnormal psychology as tending more to an ‘economic’ practice. What about the notion of de-mentionation-(supererogatory–ontological–de-mentionation-or-dialectical–de-mentionation—stranding-or-attributive-dialectics) as the ‘surreptitious driving mechanism of human mental-devising-
representation or mentation’ that fully encapsulates and explains human psychological development across all the times and the successive institutional-cumulation/institutional-recomposure-{as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism’>)} of human existential emanance, and so as an articulation that is retrospectively, presently and prospectively coherent? Given the fact that \[\text{de-mentation}\] (supercerogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) very much explains human transcendence-and-sublimity/sublimation/supercerogatory-de-mentativity as the recurrent ‘postconverging-or-dialectical-thinking\[21\]—psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring of an animal of limited-mentation-capacity-deepening\[54\]. Such a ‘postconverging-or-dialectical-thinking}\[21\]–apriorising-psychologism’ psychology driven by ontology or rather ontological-normalcy/postconvergence will be postdicatory, with the implications that this will fully focus the ‘kernels of postmodernism’ to usher in Suprastructuralism as an Age where humankind comes to grasp that its-meaningfulness-withrespect-to-intrinsic-reality as reflected by the successive institutional-cumulation/institutional-recomposure-{as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism’>)} has been progressing (more and more realistically) by successive suprastructuring of prior/transcended/superseded registry-worldviews/dimensions ‘beyond their successive corresponding recomposured-consciousness-awareness-teleology\[100\]’, and introducing the veridical meaningful-frame/worldview of postmodernity with regards not only to the present but the \[<\text{amplituding/formative-epistemicity}>\text{totalising–renewing–realisation/re-perception/re-thought past and future, with the insight that our present}\]
recomposured-placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\(^{100}\) of the positivism–procrypticism registry-worldview will be subjected to this suprastructuring-meaningfulness nature of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–‘notional–firstnatures—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor as well. In fact the underlying difficulty of deconstruction when extended from its ‘textual basis’ to its ‘full meaningfulness basis’ as ‘ontological-reconstituting–as-to-conflatedness’, has to do with the fact that the full implications of ‘ontological-reconstituting–as-to-conflatedness’/deconstruction is that it prospectively calls for suprastructuring or construal beyond-the-consciousness-awareness-teleology\(^{100}\)<in-preconverging-existential-extrication-as-of-existential-unthought> of prior registry-worldview mindset/reference-of-thought (and so as a conception that enables opening-up/making-available the prospective registry-worldview), as implied by the veracity/ontological-pertinence of ‘de-mentation’\(^{84}\) (supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) of reference-of-thought as the underlying human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\(^{100}\) driving mechanism. Considering that deconstruction as ‘ontological-reconstituting–as-to-conflatedness’ necessarily implies not one but two dialectically opposed registries/meaningful-references/anchorings-of-meaning/ontological-references/contending-references/registry-worldviews/dimensions of meaningfulness; with the implication that the prospective/transcending/superseding is suprastructural to (beyond-the-consciousness-awareness-teleology\(^{100}\)<in-preconverging-existential-extrication-as-of-existential-unthought> of) the prior/transcended/superseded, and so as a deeper superseding–oneness-of-ontology construal/conceptualisation. The fact is that without the notion of suprastructuring, the exercise
de-mentation\{(supererogatory–ontological–de-mentation-or-dialectical–de-mentation–
stranding-or-attributive-dialectics\}\ will wrongly imply that the ‘postconverging-or-dialectical-
thinking’–apriorising-psychologism’ and the preconverging-or-dementing–apriorising-
psychologism are of the same \ref{meaningfulness} (which is obviously wrong), and is the effect of the illusion-of-the-present/present-consciousness/mirageas
\\<amplituding/formative–epistemicity\>totalising–self-referencing–
syneretising/circularity/interiorising/akrasiatic-drag as we recognise this fact from a vantage
perspective to the prior (utter-uninstitutionalisation, base-institutionalisation,
universalisation) but have ‘a complex’ recognising such a fact at a disadvantaged
positivistic/procrypticism perspective with respect to the prospective (deprocrypticism), just as
all institutionalisations tend to demonstrate when their own transcendence-and-
sublimity/sublimation/supererogatory–de-mentativity is implied, and certainly so the higher the
institutionalisation as the mindset\ref{reference-of-thought} reference-of-thought is increasingly set to ‘relate to its
institutionalised secondnatured construct as being our very own individuals essential

secondnatured construct’, and thus perceived as beyond or almost beyond analysis due to the
implied temporal alienating effect on us (but then it is the human psyche that gives-in to
intrinsic-reality/ontological-veridicality, as the foremost rule of humanity’s existential strive).
Suprastructuring allows for the necessary transcendental-insight-projection-capacities for
grasping the evasive Derridean conceptualisation of ‘metaphysics-of-absence\{implicited-
epistemic-veracity-of–nonpresencing\<perspective–ontological-normalcy/postconvergence>\}\’

Suprastructuring boldly answers the underlying issue involved with ‘communicating the true implications of deconstruction as ontological-reconstituting–as-to-conflatedness’ by highlighting the paradox that it is all about ‘articulating a conceptualisation which involves implying that the reference-of-thought and meaningfulness of the seemingly reference-of-thought is unsound and needs to be superseded’. It is rather about in the very first instance putting into question a given reference-of-thought and projecting the appropriate reference-of-thought, before even proceeding to articulate more specifically meaningfulness within the projected reference-of-thought. This is akin to the idea of a positivistic mindset/reference-of-thought articulating chemistry rules and principles to an alchemic mindset/reference-of-thought for the latter’s validation, requiring the latter to adopt a positivistic mindset/reference-of-thought in the very first place before issues of substantive pertinence about chemistry rule and principles are raised within their now mutually positivistic mindsets. Such an exercise requires a highly uninhibited/decomplexified human frame of mind. This may sound rather farfetched as a notion but it is important to remember that the positivistic mindset/reference-of-thought itself is the outcome of the décomplexing/uninhibiting of the human mind from earlier successive institutionalisations. Such an exercise is necessarily about psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring of the positivistic/procryptic reference-of-thought of meaningfulness-and-teleology in the middle to long run construed as of de-mentation/supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics with respect to futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective deprocrypticism; and with regards to Suprastructuralism as a notion, the implication is that this is a requisite idea that has to come to
the collective consciousness (not just unconsciously as with prior institutionalisations, for instance the fact that notions of superstition are false had to be consciously brought up to the attention/consciousness-awareness-teleology \(^{100}\) of a non-positivism/medievalism mindset\(^{101}\) reference-of-thought for it to effectively undergo the necessary ‘postconverging-or-dialectical-thinking\(^{21}\)–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring by acting as the conscious backdrop that engenders prospectively a positivistic mindset) for human emancipation into a notional–deprocrypticism mindset; as with all psychoanalytic exercise whether of an individual or social conceptualisation nature, the idea of recognising/referencing/registering/decisioning the ontological-deficiency with respect to ontological-normaley/postconvergence is central to superseding it. ‘Suprastructuring as such overcomes the ‘natural human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\(^{100}\) reflex’ (in any registry-worldview/dimension) of ‘striving to avert preconverging-or-dementing\(^{100}\)–apriorising-psychologism mental-devising-representation/mentation’ (whether such averting is ontologically-veridical or not) and so by a mistaken reflex to preserve a wooden-language-{imbued—averaging-of-thought<as-to-

In other words, in representing the veridically uninhibited/decomplexified nature of ‘de-mentation\((\text{supererogatory-ontological-de-mentation-or-dialectical-de-mentation-stranding-or-attributive-dialectics})\) of reference-of-thought’ that is not limited by the illusion-of-the-present/present-consciousness/mirage\(<\text{amplituding/formative–epistemicity>totalising–self-referencing-syncrtising/circularity/interiorising/akrasiatic-drag}\) of any registry-worldview/dimension and so at the deeper memetic/psychoanalytic level, suprastructuring as such reveals that ‘human psychology is very much an active construct associated with intemporal ontological-faith-notion-or-ontological-fideism–imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality instigated ontological-contiguity–of-the-human-institutionalisation-process\(^{10}\) as of difference-conflatedness–as-to-totalitative-reification-in-singularisation\(<\text{as-to-the-nondisjointedness/entailment-of-prospective- nonpresencing>–as-veridical-epistemicity-relativism-determinism}\) <\text{amplituding/formative–epistemicity>causality–as-to-projective-}

to/driven-by ontological-normalcy/postconvergence-construct'. Insightfully, just as highlighted

later that existence-defines/precedes-essence, ideally the construction of psychology needs to be

priorly subjected to ‘a becoming that defines psychology with its veracity/ontological-
pertinence arising in the ontological-reconstituting–as-to-conflatedness of that existential

becoming’. Is our understanding of psychology notionally complete when we can’t seem to

understand what happens in apparently mentally sound minds partaking in ‘socially degraded’
situations like murky human interest stories, mobs, genocides and even ‘the conventional
acceptance and numbness to mass casualty warfare’. In other words, in the first place what is

‘ontologically normal’ beyond the subjective conventioning of the psychology science (before

even worrying about the abnormal)? Further isn’t it possible to make the contribution of

modern-day psychology more complete in constructing a more thorough and dynamic

understanding of mentation/psyche in relation to individual-social-humanity aspiration, where

psychology evolves in a complete existentialism cadre. In other words, so placed in a

becoming/existential cadre, is psychology not meant rather than just encapsulating what the

human psyche/mentation is all about as if it is a set and determinate construct (strangely enough

inadvertently and often mirroring schemes of social classification, and hence of social power

relations) equally involve in articulating aspiratory models for human mentation/psyche? And

such a postconverging–de-mentating/structuring/paradigming shift with regards to modern-day

mented/stigmatic psychology can actually be implied by prospective ontological-
misappropriation) of slantedness/postlogic-effect, miscuing, disjointed-logic, logical-drag, unconscionability-drag, sub-par/formulaic-association/temporal/alibi conventioning-rationalising, and temporal-enculturation/temporal-endemisation-effect, and temporal-enculturation/temporal-endemisation effect. In the bigger picture, actually the fact is that the various institutionalisations/institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing-&lt;perspective-ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism'&gt; are actually the levels at which their specific quality (whether as base-institutionalisation, universalisation, positivism and prospectively deprocrypticism) actively and comprehensively define and characterise each of the institutionalisations while bringing the notion to the collective-consciousness/personhoods-and-socialhood-formation successive existentialisms/full-depths-of-existential-implications. But then, such notions which can be weakly sensed in all prior institutionalisations are actually inconspicuously, selectively and occasionally introduced in the prior institutionalisation in graduated/staggered stages starting with the proto-prospective-institutionalisation right up to the prospective-institutionalisation; whether as proto-base-institutionalisation in recurrent-utter-uninstitutionalisation up to the graduated/staggered attainment of base-institutionalisation, proto-universalisation in base-institutionalisation–ununiversalisation up to the graduated/staggered attainment of 104 universalisation, proto-positivism in 104 universalisation–non-positivism/medievalism up to the graduated/staggered attainment of positivism, and effectively by a prospective insight, proto-notional–deprocrypticism in positivism–procrypticism. For instance, many an alchemist in the medieval world were actually very thorough and methodical in their pursuit with skills that could be qualified as ‘rudimentary positivistic’. However, the fact that fundamentally their preconverging–de-mentating/structuring/paradigming was a dead-end like the pursuit of the philosopher’s stone and the implications of not having an outright positivistic outlook/ideology
is what mostly distinguishes them from the complexion of ‘true positivists’. Likewise, the ordinary practices in the positivistic world of deontological and jurisprudential nature, in disparate formal constructs and settings mostly, are mostly geared to carry abstract and coherent universal virtue implications with respect to all humans as the-Good/understanding-driven formal principles constructs, however approximate their applicative success (a principle is a notion that can coherently uphold itself, i.e. a principle is a notion that warrants that all persons covered by its ambit act the same way or are subjected to it in the same way, and not disparately, and it carries universal import; the opposite of ‘inductive limitation’ or ‘so-called principles’ that are actually fallacious since such arguments cannot truly be of entailing as they require that others do not act likewise or their implications should be limited to given target(s) and not be totalisingly-entailing, since their fundamental teleology is not intemporal/not-of-totalising-entailment but speak more of a temporal motive). But behind that pursuit is a covert admittance that without the deontology and jurisprudence and the corresponding induced culture as artifices (however approximate their applicative success) humans in their social dynamics do not have the inherent exclusiveness of intemporal-disposition quality to ecstatically/spontaneously/solipsistically/emanantly/becomingly adhere to intemporal/universal notions on the mere basis of ‘preaching’ the intemporal/universal notions and virtues (as the-Good/understanding/notional-knowledge-reification–gesturing-<in-prospective_psycho_Explicitise:apriorising/axiomatising/referencing- {of-attendant-ontological-contiguity-duced–existentialising/contextualising/textualising-contiguity } conflatedness -in-[preconverging-disentailment_by]–postconverging-entailment>/ <amplituding/formative-epistemicity>causality ~as-to-projective-totalitative-implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity ) without institutionalisation design or conceptualisation! This is an unspoken recognition of the inherent
reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-‘notional–firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective–ontological-normalcy/postconvergence’—existentialism-form-factor individuations nature, and the need to skew/design/institutionalise/intemporalise ‘the social’ for the primacy of the intemporal-disposition individuation, as secondnaturing. This is equally an unspoken insight not only to modern institutionalised/intemporalised-thresholds-for-intemporal-preservation-entropy-or-contiguity—or–ontological-preservation conceptualisation of the-Good (positivistic causalit<amplituding/formative–epistemicity> causality <as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity>). Such an insight is equally implied in prior institutionalisations of the-Good conceptualisations wherein for instance the prophetic philosopher using the prophecy tools of their times, as the summum of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring for the social criticism of their own times, won’t naively imply ‘I have preached to you thus you’ve attain the intemporal’, but rather construe insightfully of a practice (institutionalising practice) that cultivates a relative orientation towards the reinforcement of the intemporal, say like having the believers follow a whole routine from their expression of faith, praying in conscious reinforcement, to a way of living, however approximate in its applicative success in inducing an intemporal inclination. Positivistic secondnaturing of disparate frameworks of deontologies, constitutions and jurisprudence and the associated culture (as longness-of-register-of—meaningfulness-and-teleology) can be seen as proto-deprocrypticism, including their individual and social internalisation in the collective consciousness, and these unsurprisingly are the few elements in the sovereignty constructs of positivistic democracies with their constituent public or private organisations and associations as well as subject matters and specialisms, that are always ferociously, blindly and without further justification upheld by
regulation and law and/or newer legitimately made regulation and law even against popular whim given their ‘inherent assuredness to preserve the intemporal construct in a furtherance of intemporal-preservation percolation-channelling—<in-deferential-formalisation-transference>.

dialectically preconverging-or-dementing—apriorising-psychologism mental-devising-representation of the present procrypticism registry-worldview/dimension (which is prior) from the prospective registry-worldview/dimension (deprocrypticism) as the new ‘reference-of-thought, which will seem unintelligible to the prior even though it is actually more real suprastructurally and in ontological-normalcy/postconvergence, just as our representation of medievalism though more ontologically-veridical will seem unintelligible/existentially-suprastructural to a medieval mindset/ reference-of-thought in its closed mental-devising-representation of intrinsic-reality. Central to the notion of ‘deprocrypticism—or—preempting—disjointedness-as-of- ‘reference-of-thought as the ‘veridical reference-of-thought’ articulation of (ontological-normalcy/postconvergence) as ontological-veridicality/ontological-contiguity as of intemporal-preservation-entropy-or-contiguity—or—ontological-preservation over the positivism/rational-empiricism manifestation of procrypticism—or—disjointedness-as-of-reference-of-thought notional-discontiguity/epistemic-discontiguity—<shallow-supererogation—of-mentally-aestheticised—preconverging/dementing—qualia-schema> as of its perversion of reference-of-thought—categorical-imperatives/axioms/registry-teleology,—for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation, and so in a prospective de-mentation—(supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics) moment wherein ontological-normalcy/prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (ontology) supersedes intradimensional-subknowledging—normalcy (temporal conventioning compromise). This dichotomy between conventioning and ontology is critical to understand human mentation development along the successive institutionalisations, as transcendental knowledge is by definition prospective and hence recognises the ontological limits/thresholds of conventioning as knowledge and virtue reference because to start with all conventioning institutionalisations are de-
mentatively/structurally/paradigmatically in want of prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity whether as recurrent-utter-institutionalised, ununiversalisation, non-positivism/medievalism or procrypticism in a prospective insight. Conventioning as such could only prospectively reflect ‘sound reference-of-thought status’ when it prospectively coincides/proxies ontological-normalcy/prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation; the holy grail of the notional–deprocrypticism institutionalisation ideal. But actually a conventioning construct in contrast to attaining such a prospect of ‘utter-purism-of-ontology’ rather tends to operate on the basis of least-acceptable-meaningfulness-or-value-reference-denominator for that conventioning construct, and the latter is thus the ‘effective meaningfulness-or-value-reference’ of the said conventioning construct notwithstanding any grander ontological meaningfulness-or-value-reference striving for utter-purism-of-ontology. The implication here is effectively that grander ontological and philosophical meaningfulness-or-value-references are no more pertinent in a conventioning construct than its least acceptable meaningfulness-or-value-reference-denominator but for discrentional or prestige basis of discrentional and disparate recognition, out of discretionary formalisation in inducing the secondnaturing and internalisation for that recognition. This insight is pertinent in that in the construct of ontology driven meaningfulness-and-value-references of intellectual grounding (purism-of-ontology), it is important to grasp that the social integration of meaningfulness-and-value-references in a conventioning construct is effectively a least-acceptable-meaningfulness-or-value-reference-denominator-driven dynamism, and that it is by an effective utilisation of the institutionalisation percolation-channelling-<in-deferential-formalisation-transference> mechanism that such ‘purism-of-ontology’, by it’s the-Good, can stand out in bringing to bear its human and social emancipation potential. In the same token, thus it is equally important to grasp that primacy of meaningfulness-or-value-reference
orientations in conventioning constructs do not necessarily has to do with a primacy of ontological-veridicality pertinence especially where it is not driven by intrinsic-reality transcendental-enabling/sublimating/supererogatory-de-mentativity but by social-aggregation-enabling, notwithstanding that such a conventioning construct may be seen as the social reference of grander meaningfulness-and-value-references in its subject area, and so fundamentally because it is a least-acceptable-meaningfulness-or-value-reference play-out notion and not an-utter-purism-of-ontology-reference notion. Thus the perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation of meaningfulness in our positivistic registry-worldview/dimension should prospectively be subject to de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) with corresponding de-mentation-(supererogatory-ontological-de-mention-or-dialectical-de-mention—stranding-or-attributive-dialectics) even though it won’t be intelligible from our vantage superseded/transcended registry-worldview/dimension point just as with all transcended/superseded registry-worldviews/dimensions. The narrative/storying technique for a comprehensive postconverging-or-dialectical-thinking—apriorising-psychologism—by—preconverging-or-dementing—apriorising-psychologism dialectical representation involves articulating a comprehensive organic-comprehension-thinking narrative in ‘intemporal-prioritisation-of-reference-of-thought’—as-conflatedness—or-ontological-reprojecting by which varied induced threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation—as-to-‘attendant-intradimensional’—prospectively-disontologising—preconverging/dementing—apriorising-psychologism narratives in circumventing/distractive-temporal-prioritisation-of-reference-of-thought naively arise, and over which an organic-comprehension-thinking analysis dements the threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation—as-to-

Likewise, one can imagine the same type of enigmatic ontological-normalcy/postconvergence-or-postdicatory deconstruction/ontological-reconstituting–as-to–conflatedness as dialectical transformation storying reflecting-or-perspectivating a non-
positivism/medievalism registry-worldview/dimension as notional-discontiguity/epistemic-discontiguity (<shallow-supererogation>-of-mentally-aestheticised-preconverging/dementing-qualia-schema> (at its uninstitutionalised-threshold) with respect to positivism as (postconvergence) ontological-veridicality/ontological-contiguity, as the bigger grounding for the epiphenomenon/incidental-phenomenon of say a medieval phenomenon of perversion-of-reference-of-thought-as-preconvergently-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation like sorcery. As fundamentally, intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming resolution as against an extricatory/temporal/non-ontological preconverging–de-mentating/structuring/paradigming resolution fundamentally implies putting into question a registry-worldview’s/dimension’s reference-of-thought (to be transcended by a prospective transcending/superseding registry-worldview/dimension) that is structured to enable the endemisation and enculturation of a phenomenon of perversion-of-reference-of-thought-as-preconvergently-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation like sorcery in the non-positivism/medievalism world; implying that an ‘intemporal-disposition mindset’ of positivistic disposition finding themselves in a non-positivism/medievalism social-setup will not see the proffered accusation of sorcery against them or any other individual as simply requiring defending themselves or the accused of sorcery or ‘playing out’ in the social-and-temporal-trading of that social-setup to extricate themselves or the accused but rather project that the registry-worldview/dimension in endemising and enculturating the possibility of accusations and notions of sorcery is de-
mentatively/structurally/paradigmatically dialectically-primitive/dialectically-out-of-phase (thus in need of prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity), and the undermining of that registry-worldview/dimension is the intemporal/ontological/social/species/universal/transcendental/maximising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging-de-mentating/structuring/paradigming resolution of the epiphenomenon of sorcery across metaphorically-a-million-and-one-instances-and-locales/aetiologisation/ontological-escalation. It should be noted that an intemporal or ontological or longness-of-register-of—meaningfulness-and-teleology resolution to perversion-of- reference-of-thought-<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation ≥ in any registry-worldview/dimension is well beyond the notion of resolving just an underlying causative subknowledging-impulse/compulsive-dementing (condition from say a physiological cause), like psychopathy in the positivistic registry-worldview/dimension or a sorcerer accuser in a medieval registry-worldview/dimension. That may explain the initiation of a loss of intemporal social universal-transparency resolution to (transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative-epistemicity>totalising—in-relative-ontological-completeness) arising from postlogism in hollow-constituting<as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation> for instance which is then at the base of a registry-worldview’s/dimension’s uninstitutionalised-threshold (which is overall the dementative/structural/paradigmatic issue to be resolved), as temporal-dispositions are out of a ‘deferential-formalisation-transference’/skewed (‘intemporality-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity) institutionalisation setup, whether at
recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism or procrypticism from the insight of their respective prospective institutionalisation as the resolution in the form of base-institutionalisation, universalisation, positivism or deprocrypticism. The point is reality is as of ontological-normalcy/postconvergence and suprastructural and is not constraint to and have nothing to do inherently with human mental-devising-representation —incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and notional-disjointedness, as it is up to us to proxy to it and hence we can’t say we want to think-one-way or we’ve been thinking-a-certain-way (as reference-of-thought—categorical-imperatives/axioms/registry-teleology) to naively imply that reality will and should comply, as failing/not-upholding—<as-of-apriorising/axiomatising/referencing—reference-of-thought—categorical-imperatives/axioms/registry-teleology—speak of human mental-devising-representation dead-ends and the need for postconverging—de-mentating/structuring/paradigming shifts. Likewise, a suprastructural conceptualisation is one construed beyond and not limited to the {cumulated/recomposured}-consciousness-awareness-teleology or mental-devising-representation of a registry-worldview/dimension reference-of-thought—categorical-imperatives/axioms/registry-teleology, i.e. not limited to its temporal conventioning compromise. In that sense, the knowledge-notionalisation is about ‘a deterministic and operant construct preserving intemporality’/longness as ontology’. While this process had occurred priorly rather beyond-the-consciousness-awareness-teleology—in-preconverging-existential-extrication-as-of-existential-unthought from base-institutionalisation, universalisation and up to positivism, it will possibly be more driven as-of-consciousness-awareness-teleology when it comes to attaining notional-deprocrypticism as the latter registry-worldview/dimension is actually weaker than the preceding registry-worldviews/dimensions in eliciting a positive-opportunism—of-social-functioning-and-accordance and will more strongly depend on percolation-channelling—in-deferential-formalisation-transference of intemporality/longness to be realised. Preconverging-or-dementing—apriorising-psychologism as thus implied can be defined as reflecting/perspectivating/highlighting of the deficient mental-devising-representation (as so-referenced from ontological-normalcy/postconvergence so-construed as in prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as to suprastructural proxying of intrinsic-reality), beyond the deficient mental-devising-representation intradimensional representation of meaninglessness-and-teleology. It is the cause-and-effect-effective-predication by its grander grasp of intrinsic-reality that by way of untenability/internal-contradiction/internal-incoherence/institutional-constraining and social universal-transparency ⟨transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness ⟩ imposes crossgenerationally the dominant as transcending/superseding meaningfulness over the dominated as transcended/superseded meaningfulness (there is no social-and-temporal-trading in that regard); as the intrinsic-reality that the transcending/superseding meaningfulness carries is suprastructural and ontological-
normalcy/postconvergence and doesn’t adjust to the mortals, that we are, ‘social-and-temporal-trading’, otherwise the supposedly transcending/superseding compromises itself with respect to intrinsic-reality and losses its pertinence as a proxying ‘reference-of-thought to intrinsic-reality, to start with. Such an insight can be garnered as, for instance, in the natural sciences we can’t negotiate about gravity being 9.8 m/s², but with ‘the social’ which is rather ‘emotionally involved’, such negotiated social-and-temporal-trading idiocy is surprisingly quite recurrently articulated. It should be noted that the ‘de-mentation-(supererogatory-ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) of ‘reference-of-thought’ in upholding a mental-devising-representation of temporal-dispositions as preconverging-or-dementing”–apriorising-psychologism-<stranded-as-rightfully-oblongated/decandored-and-dialectically-or-contendingly-out-of-phase> is rather a comprehensive intemporality-preserving ontological-entrapment of the ‘notional-discontiguity/epistemic-discontiguity–<shallow-supererogation –of-mentally-aestheticised–preconverging/dementing –qualia-schema> of apriorising/axiomatising/referencing/intelligibility/setup/measuringinstrument’ (i.e. absolving/fleeting/escaping-reflex–logic–by-psychopathic-in hollow-constituting<as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation> in postlogic-backtracking–<iterative-looping–set-of-dereifying-hollow-narratives-and-acts> /other-temporal-dispositions-hollow-constituting<as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation> or conjoining-looping-set-of-narratives as-of-cohering-logic-reflex in wrongly implying and exploiting the supplanting–conviction-as-to-profound-supererogation of ‘attendant-intradimensional’-postconverging/dialectical-thinking–apriorising-psychologism reflex or prelogic-reflex-admittance-reflex or in-phase-reflex so as to wrongly align to the next looped narratives as straight/candored-and-dialectically-or-contendingly-in-phase whereas veridically these are also of notional-

The bigger point is that fundamentally it is impossible to conjugate/inflect/protract intemporality/longness out of demonstrated temporality/shortness (notional-discontiguity/epistemic-discontiguity) as then one is just in aestheticised–preconverging/dementing–qualia-schema as then one is just in

This latter idea is actually the reflex of all prior/transcended/superseded registry-worldviews/dimensions with respect to the suggestion of prospective/transcending/superseding registry-worldviews/dimensions, as we can appreciate from our vantage perspective at the backend of the institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism> process to be rather not true with prior transcendence-and–sublimity/sublimation/supererogatory–dementativity though we’ll in turn obviously act by
escalation/aetiologisation is unwarranted. More like the evocation of circumventive/distractive-temporal-prioritisation-of-reference-of-thought about a past war criminal or rapist based on conventioning constructs like their being in the past, their settled lives, etc. doesn’t dispense them from ‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting, the need for their judgment and/or in advocating unfailingly/infallibly the uncompromising notions against rape or war crimes, and so without conjugating/inflecting/deriving any excepting human temporal circumstances into it by circumventive/distractive-temporal-prioritisation-of-reference-of-thought. This further point to the dichotomy between temporal-compromising-conventioning and ontology, with a registry-worldview’s/dimension’s institutionalisation dialectics wherein ontology as reference-of-thought/ontological-normalcy/postconvergence/prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation perpetually elevates conventioning. This further translates in the conceptualisation of value-and-valor with the implication that while aspiring for temporal values and valor may be the standard wooden-language-{imbued—averaging-of-thought}{as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology-as-of—'nondescript/ignorable—void’-with-regards-to-prospective-apriorising-implications}> perception, however, grander value and valor effectively lies in the universalising and philosophising orientations (as ontological-profoundness-of-thought/ontological-normalcy/postconvergence in contrast to conventioning-profoundness-of-thought/intradimensional-subknowledging-normalcy) that enable the possibility, the construct and the upholding of human emancipation across <cumulating/recomposuring–attendant-ontological-contiguity>-successive registry-worldviews/dimensions in the very first place, that is, emancipation into base-institutionalisation, universalisation, positivism and prospectively deprocrypticism. Aristotle’s advocating of the ‘golden mean’ is more of a
for actually. Aristotle nor Socrates nor Plato nor the prophesiers (working rather more assertively on ‘supernatural postconverging–de-mentating/structuring/paradigming’ implications) nor latter thinkers like Descartes, Kant, Darwin, Leibniz, Rousseau strove for the golden mean in their overall endeavours. Rather from an ontologically verifiable reality as a the-Good/understanding/<amplituding/formative–epistemicity>causality ~as-to-projective-

thought’–as-conflatedness-or-ontological-reprojecting but with the latter rather superseding/overriding such a golden mean conception if construed as of presencing—absolutising-identitive-constitutedness since we can appreciate the ontological-impertinence of such a golden mean notion with regards to the fact that the <cumulating/recomposuring–
attendant-ontological-contiguity >-succession of registry-worldviews/dimensions as manifesting their very own prospective disontologising uninstitutionalised-threshold renders absolutising their successive supposedly golden mean ontologically ridiculous as to the need for their prospective ontologising-and-re-ontologising for prospective human transcendence-and-
sublimity/sublimation/supererogatory–de-mentativity). It is the establishment of such first-
order-ontology for-prospective-living as base-institutionalisation, universalisation, positivism and prospectively notional-deprocrypticism which are of transcendental nature as ‘shaping the human psyche’ (as to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology and providing the emancipating umbrella for second-order-ontology (as to derived institutional-development–as-to-social-function-development and living-development–as-to-personality-development) and their temporal yearnings which are rather non-transcendental prospectively and cannot de-mentatively/structurally/paradigmatically resolve fundamental issues, and of circular institutionalised-being-and-craft. A Rousseau may not be the ‘shrewdest aristocrat’ in terms–as-of-axiomatic-construct of the ordinary value of personal gain of the medieval world but the first-order-ontology resolution of issues of social emancipation passes by his and likeminded first-order-ontology philosophical projection. This certainly applies with regards to defining transformative impact of transcendental constructs across all registry-worldviews/dimensions that does not compare with ordinary being-and-craft second-order-ontology sense of value which is rather intradimensionally circular and is hardly of the intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming addressed from first-order-ontology constructs. Granted if humans had absolute mentation capacity then ‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting will be skewed (‘intemporal-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity) or rather supersede/encompass all such desirabilities implied by the golden mean. However, we don’t have absolute mentation capacity and the most intemporal of our dispositions should take pride of place in defining our achievement motives whether as
philosophies, causes, skillsets and talents in our value and valor aspirations, in line with the notion of a true principle, with the implication that such value and valor is capable of rationally upholding itself and its registry-worldview prospectively when implied\textsuperscript{10} universally (as to the fact that it is on this basis that human institutional-cumulation/institutional-recomposure\{as-to-history/ontological-eventfulness/ontological-aesthetic-tracing\langle\textsuperscript{perspective–ontological-normalcy/postconvergence-reflected-epistemicity-relativism-determinism}\rangle\} has been self-perpetuating in explicating the ontological-contiguity\textsuperscript{20}—of-the-human-institutionalisation-process\textsuperscript{20}). Such an insight can further be expanded thus, it is critical to note that the institutional-cumulation/institutional-recomposure\{as-to-history/ontological-eventfulness/ontological-aesthetic-tracing\langle\textsuperscript{perspective–ontological-normalcy/postconvergence-reflected-epistemicity-relativism-determinism}\rangle\} are developments of human mentation capacity in grasping its ‘internal ontological-reconstituting–as-to-conflatedness\textsuperscript{13}/deconstruction intermediating environment’ and the external environment. The former refers to the teleological devised representation of the relationship with the external environment like language, organisation, culture and other institutional construct by which it existentially accesses the external environment. In effect, though counterintuitive, human registry-worldview’s/dimension’s institutionalisation is actually an ‘intemporal-prioritisation-of-reference-of-thought–as-conflatedness\textsuperscript{13}/or-ontological-reprojecting/intemporal-preservation preemptive construct which paradoxically elicits devised mentation that goes on to build the ‘internal ontological-reconstituting–as-to-conflatedness\textsuperscript{13}/deconstruction) intermediating environment’. Thus in effect base-institutionalisation is the outcome of the ‘intemporal-prioritisation-of-reference-of-thought–as-conflatedness\textsuperscript{13}/or-ontological-reprojecting/intemporal-preservation preemption of recurrent-utter-uninstitutionalisation (recurrentas-amplituding/formative–epistemicity-totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{34} for preconverging-or-dementing\textsuperscript{20}–

Of course, this is more like a ‘notional template’ in a ‘dynamics of benign implications to grave existentialism/full-existential-depth-implications’ articulated over a functional social-construct which however ‘endemises psychopathy and social psychopathy rather at the uninstitutionalised-threshold\textsuperscript{103} of the positivistic meaningfulness reference-of-thought– categorical-imperatives/axioms/registry-teleology\textsuperscript{100},-for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation perversion-of-reference-of-thought\textsuperscript{8} as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\textsuperscript{7} known as procrypticism preconverging-or-dementing\textsuperscript{9}–apriorising-psychologism, requiring futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} as of prospective notional–deprocrypticism institutionalisation/intemporalisation (for the furtherance of the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation or ontological-contiguity\textsuperscript{9}/ontological-veridicality). Further, it is important to appreciate that just as with the profoundness of treatment of subject-matters and specialisms (and even more so with regards to ‘the social’ given its characteristic ‘emotional involvement’ aspect), corresponding subject-matter ‘focussing of analysis and jargon’ will seem rather unusual and unnatural to ‘ordinary thinking’. But then ‘ordinary thinking’ is responsible for mostly nothing,
if not thinking mostly in the extended-informality-(susceptible-to-effecting-parsimony-as-of-
shoddiness-and-incompleteness-to—meaningfulness-and-teleology), and cannot be made a
reference of formal thinking as issues requiring profound treatment invariably are construed
based mostly on unordinary formal constructs which, granted, should be able to ultimately by
their <amplituding/formative—epistemicity> causality—as-to-projective-totalitative—
implications-of-prospective—nonpresencing—for-explicating-ontological-contiguity
demonstrate that such formal constructs are the best ontological and virtue conceptualisation
with regards to the issue or domain of concern. That’s why the populace is not asked its opinion
about the law or astronomy or medicine, for instance, as the need for deferential-formalisation-
transference arises for the effective ontological/intemporal treatment of domains of reality but
for when the issues at stake require a sovereignty exercise requiring individuals informed
consent whether political or decisional or rather as social learning/inculcation exercise; but then
sovereignty exercises are not pure knowledge/ontological constructs but for the
construals/conceptualisations of inherently sovereign choices as knowledge/ontological
constructs of the sovereign choices. Thirdly, the conceptualisation of this paper is rather
unusual and unordinary as it is transcendental by its construct and the implied registry-
worldview/dimensions successive existentialisms/full-depths-of-existential-implications, and
even further unusual by its phenomenological and hermeneutics methodological approaches,
which frankly speaking is the only way to creatively garner such insights in broad strokes. Like
with all transcendental constructs, which by definition tend to put the usual/ordinary in
question, it is not surprising that it will sound highly alienating to ordinary ways of thought.
However, its ethos is that it is coming from a depth of conceptualisation that is more profound
than our ordinariness when it grasps that other institutionalisations whether as recurrent-utter-
uninstitutionalisation, base-institutionalisation—ununiversalisation, universalisation—non-
positivism/medievalism, positivism—procrypticism, and prospectively deprocrypticism, had
their own ‘ordinariness’ in totalising−self-referencing−
syncretising/circularity/interiorising/akrasiatic-drag no less than we do, and that the underlying ontological reasoning is beyond the illusion-of-the-present/present-consciousness/epistemic-totalising−self-referencing-syncretising/mirage as metaphysics-of-presence−(implicated−’nondescript/ignorable–void ’−as-to− presencing—absolutising−identitive-constitutedness⟩, of any registry-worldview/dimension including our positivistic meaningful frame, to arrive at a superseding and more profound ontological-veridicality or grasp of intrinsic-reality with corresponding illuminating implications. In that sense, an argument of the type our society is great as it is, will then be meted with a same argument that there were great things happening in medieval times as well and maybe we shouldn’t have transcended into positivism; speaking of a fundamental solipsistic ontological-bad-faith/inauthenticity. One could argue in the logic of those times, the serfs were doing great feeding themselves, as many did argue; and there was no need for science, as many did argue, etc. The fact is we are the outcrop of the possibility and potential for human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity before which doesn’t end with us but proceeds to undermine our own registry-worldview/dimension as well. Fourthly, it is obvious that if and where what is factored in is only the folksy ‘human lifespan extricatory punctuality/immediacy of depth-of-thought’ perspectives of individuals existentialism/full-depth-of-existential-implications of shallowness of scale and time, without the requisite philosophical depth requiring a profound appreciation, understanding and insights from ‘humanity existentialism/full-depth-of-existential-implications level scale and time’ which easily gets lost, and thus this bigger pursuit of this paper will be lost and misunderstood by such a shallowness of scale and time of thought, and non-contemplation and pseudologism as a mark of banality/folksy-logic. It is inevitable, as has been the case throughout the human past, that transcendental ideas are inevitably suprastructural/beyond-the-consciousness-awareness-
teleology of the registry-worldview/dimension in which such notions are being advanced in. Fifthly, it is more likely that a banal/folksy inclination may hardly appreciate the difference between the outcome of a mindset/ reference-of-thought as a secondnaturedness and internalisation construct across successive institutionalisations with their requisite psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring induced from intemporal-disposition individuation disposition, and correspondingly differentiate between being so-institutionalised with a secondnatured and internalisation mindset/ reference-of-thought and the intemporal–individuation disposition that will equally be responsible out of mere intemporal-solipsism as to ontological-faith-notion-or-ontological-fideism–imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality (and no secondnaturung and internalisation) for institutionalising/intemporalising with regards to the present registry-worldview/dimension at its uninstitutionalised-threshold that will be behind the secondnaturung and internalisation of prospective registry-worldview/dimension. This ‘existentialism/full-depth-of-existential-implications form-factor’ is the reflection of the contiguity of successive existentialisms/full-depths-of-existential-implications across varying meaningful frames, references and registry-worldviews/dimensions; and is abstractly determined by the ontological-normalcy/postconvergence nature of intrinsic-reality/ontology (ontological-normalcy) whatever the institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism>, and inherently implies ‘a universal existentialisms/full-depth-of-existential-implications form-factor across institutionalisations’ though of differing ‘snowballed recomposuring’ of meaningfulness and
reference-of-thought, defining their specificities and potentials. This is just a basic anthropopsychology/the-anthropological-continuity elucidation which while original and useful on its own right, is equally pertinent for an insight in the social manifestation of psychopathy. Besides, one can imagine that a thorough grasp and creative application of the \( \text{de-mentation} \) (supererogatory~ontological~de-mentation-or-dialectical~de-mentation—stranding-or-attributive-dialectics) as to ontological-normalcy/postconvergence drive, as this psychologically reflects/perspectivates postconverging-or-dialectical-thinking\(^1\)—apriorising-psychologism-<stranded-as-rightfully-straight/candored-and-dialectically-or-contendingly-in-phase> and preconverging-or-dementing\(^2\)—apriorising-psychologism-<stranded-as-rightfully-oblongated/decandored-and-dialectically-or-contendingly-out-of-phase> of mental-devising-representation by which human transcendence-and-sublimity/sublimation/supererogatory~de-mentativity occur can ultimately be the avenue for liberating the human mind to its full potential and directed transcending capacity. That is, transcendental capacity not only by way of a spontaneous and natural dialectical cycle of social-stake-contention-or-confliction behind the ‘postconverging-or-dialectical-thinking\(^2\)’—psychology or psychology-of-mentation-dynamics or natural~psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposing history but a ‘consciously directed’ abstract understanding, more like deprocrypticism-over-procrypticism could-be and would-need-to-be relatively highly consciously directed given the relatively lower immediate positive-opportunism—of-social-functioning-and-accordance\(^7\) (for survival-and-flourishing to the cross-section of human temporal interests) compared to the lower transcendence-and-sublimity/sublimation/supererogatory~de-mentativity like base-institutionalisation, universalisation and positivism, but for its abstract veridical pertinence and potentially grander possibilities in the institutionalisation/intemporalisation percolation-channelling-<in-deferential-formalisation-transference>. Such a veering to the creatively abstract, with respect
to the philosophical and the social sciences, but nonetheless ontologically veridical will be liberating/emancipating from the ‘spontaneously natural dialectical cycle of human progress’ and is increasingly certain to be the defining feature of human civilisation. It should be noted that Entropy as defined (‘intemporal-preservation-entropy-or-contiguity—or—ontological-preservation re-institutionalisation’) relates that the intemporal-preservation-institutionalisation entropy is the preceding-and-defining reference for the hermeneutic-referencing of the ontological meaning of all other associated conceptualisations and notions, and so as to nonpresencing—<perspective—ontological-normalcy/postconvergence> epistemicity. (By ontological meaning is implied intemporal/veridical/purism/operant-construct/predicative-effectivity—sublimation—{as-to-underlying,—ontological-commitment—<implied—self—assuredness-of-ontological-good-faith/authenticity ~postconverging—de—mentating/structuring/paradigming —as-being-as-of-existential-reality}> meaning or ontology/reality-centered-meaning as contrasted to temporal/non-veridical/compromised/non-operant-and-vagueas <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag meaning or metaphysical/speculative/banality/social-discomfiture/temporal-human-centered meaning). Central to the hermeneutics approach towards elucidating psychopathy and the underlying psychological science is a method herein qualified as ‘referentialism’ which makes reference to the supersedingness/precedingness of the ‘intemporal preservation institutionalisation/intemporalisation entropy/contiguity’ before articulating concepts and notions in referential and organic elucidation of the entropic construct. Referentialism as such is actually central to the spontaneity required in hermeneutics. It differs from the traditional scientific categorisation of concepts and notions, in that referentialism implies a highly contiguous, circumstantial and dynamic referencing elucidating of the superseding/preceding entropic notion while categorisation tends to be basically constitutive, definitive and ‘weakly
contiguous/relatively-fragmented overall’ in its elucidation of notions, concepts and ideas. Categorisation has been very efficient with the physical and biological sciences with its classification approach enabling a profoundness of analysis while enabling excellent subject matter organisation. However, this author is of the opinion that categorisation as an approach is actually less efficient in the social sciences (and notions of an ephemeral character) as it underemphasises the ‘organic dynamism’ of social concepts and often leads to relatively trite classification schemes that are often inoperant or poorly operant given the relative ephemerality of the social world (a weakness of many categorisation classification schemes in the social sciences). On the other hand, referentialism carries the promise of ‘point-referencing’ notions and concepts in a contiguously dynamic, evolving and ontological-reconstituting–as-to-conflatedness\(_1\)/deconstruction way, putting emphasis on the relative relation of concepts and notions towards the central notion in its dynamic entropic conceptualisation (herein underlied by conceptivity/epistemic-reflexivity/epistemicity-relativism-determinism as to human limited-mentation-capacity-deepening\(_5\)). This author is also of the opinion that referentialism is actually the natural human cognitive development approach to acquisition and classification of knowledge with emphasis on ‘the organic dynamics of understanding’ wherein a child for instance doesn’t necessarily grasp outright the fullness of concepts-of-meanings but rather the ‘relevant dynamic contextualisation of meanings’ ensuring a strongly operant and ‘wealthy’ relationship with meaning in the social context. ‘Intemporal-preservation-entropy-or-contiguity–or–ontological-preservation re-institutionalisation’ with respect to uninstitutionalised-threshold\(_{03}\) of registry-worldviews/dimensions, can be construed as follows: Supposed all humanity across space and time that ever existed was just ‘one human temporal-to-intemporal individuation’, the process of general-institutionalisation from recurrent-utter-uninstitutionalisation to base-institutionalisation–ununiversalisation to ununiversalisation–non-positivism/medievalism to positivism–procrypticism, and prospectively
to deprocrypticism, is actually one same process but for ‘lack of the human-mentation-capacity and need for time for the cumulation of the mentation-capacity’ (lack of ‘brain capacity’) to get it all right from the start (i.e. to fully grasp notional–deprocrypticism starting from recurrent-utter-un institutionalisation to base-institutionalisation–ununiversalisation to ununiversalisation–non-positivism/medievalism to positivism–procrypticism as convergent concepts towards notional–deprocrypticism (as ‘longness-of-register-of—meaningfulness-and-teleology over shortness-of-register-of—meaningfulness-and-teleology in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, as induced by maximal-as-intemporal-operating-modality-of-reference-of-thought-as-of—maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation-as-inducing-the-prospective-institutionalisation’ and involving more profound/richer ontological-levels over shallower/poorer ontological-levels; with notional–deprocrypticism thus implying a ‘full-cycle ontological-contiguity—of-the-human-institutionalisation-process undermining of subknowledging/mimicking/emanant-uninstitutionalisation-disposition’). Thus the successive institutionalisations are thus construed as ‘levels of compromise’ allowing for sufficient human limited-mentation-capacity-deepening to handle the requisite transcendence-and-sublimity/sublimation/supererogatory–de-mentativity even if from the very start the human doesn’t get a grasp of ‘higher institutionalisation/intemporalisation registry-worldviews/dimensions’ all-at-once/as-a-whole but achieves the ‘comprehensive institutionalisation/intemporalisation frame’ only at deprocrypticism; as it goes on to take on the successive challenges of base-institutionalising, then universalising, then positivising, and finally with notional–deprocrypticism absolute ontological-contiguity by undermining ‘disjointedness-as-of—reference-of-thought’—as-misappropriated—meaningfulness-and-teleology—in-arrogation’ (longness-of-register-of—meaningfulness-and-teleology over
shortness-of-register-of—meaningfulness-and-teleology). It should be noted that the issue of procrystalism had always been present at all times of human existence but the natural priority going by human shallow limited-mentation-capacity—(as of relative apriorising/axiomatising/referencing—of-attendant ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity)—constitutedness—in preconverging-entailment—to deeper limited-mentation-capacity—(as of relative apriorising/axiomatising/referencing—of-attendant ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity)—conflicatedness—in {preconverging-disentailment—by} postconverging-entailment was first to have a base-institutionalisation institutionalisation, universalisation institutionalisation, positivism institutionalisation before prospectively notional—deprocrystalism institutionalisation; more precisely, previous psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring are indirectly (skewing towards) addressing base-institutionalisation, universalisation, positivism and deprocrystalism, up to the point of the respective institutionalisation/intemporalisation-recomposure where the reference-of-thought-as-the-registry-worldview is directly addressed. This thus explains ontological-normalcy/postconvergence across human mental-devising-representation as changes to accommodate intrinsic reality by psychoanalytic-unshackling/memetic-reordering/institutional-recomposurings of successive illusions-of-the-present/present-consciousnesses/epistemic-totalising—self-referencing-syncretising/mirage at these successive institutionalisation/intemporalisation levels including the positivism—procrystalism institutionalisation/intemporalisation, towards intrinsic-reality/ontological-veridicality; that has and will never change, and by way of the-Good/understanding/notional—knowledge-reification—gesturing—in—prospective_psychologismic—apriorising/axiomatising/referencing—of-attendant–ontological—contiguity—educed—existentialising/contextualising/textualising-contiguity

In the bigger scheme of things, it points to the fact that ontologically for the full potential of human science, this should be ‘rising from this fundamental philosophical depth/profoundness of thought’ to then transversally address the issues it raises while projecting prospectively. A further insight can be grasped regarding the relationship between psychopathy, anthropopsychology/the-anthropological-continuity, veridicality (intrinsic reality/ontological representation), non-veridical reality (illusion-of-the-present/present-consciousness/epistemic-totalising~self-referencing- syncretising/mirage as metaphysics-of-presence-{implicated-'nondescript/ignorable–void ’-as- to-presencing—absolutising-identitive-constitutedness }, human placeholder-setup/mental- devising-representation/mentation/consciousness-awareness-teleology100, and registry- worldviews/dimensions (of institutionalisation/intemporalisation, 104universalisation, positivism, and prospectively deprocrypticism). between the non-positivism/medievalism mindset/<reference-of-thought and the positivistic
mindset). A positivistic mind can’t explain the denaturing of the notion of witchcraft to a non-
positivism/medievalism mindset as the state of being of non-positivism/medievalism means we
make reference to non-positivism/medievalism that end up endemising/enculturating such superstitious notions. Logic as logical-congruence only arises where there is a mutual registry-worldview wherein the untenability/internal-contradiction/internal-incoherence/institutional-constraining generated by the positivist’s scientism (superseding) makes the medieval mind put in question its in the very first place. This ‘psychoanalytic-unshackling process’ equally applies prospectively (regarding the positivism–procrypticism and the notional–deprocrypticism registry-worldviews/dimensions). In the phenomena of social psychopathy, it is important to grasp that the reflex to mentally represent the narratives of the psychopath and the protraction of the narratives by temporal supplanting–conviction-as-to-profound-supererogation—of–‘attendant-intradimensional’–postconverging/dialectical-thinking—apriorising-psychologism or prelogism minds as ‘straightness/candor/organic-comprehension-thinking of mind’ is wrong, ‘overcoming the mental-slantedness/decandoring/distractive-alignment-to reference-of-thought–<of-apriorising/axiomatising/referencing> is thus called for, more like we perceive the ‘slantedness of a childhood cinglé’ (in terms–as-of-axiomatic-construct of the mental state of the psychopath as well as its protraction on the psychopath’s interlocutor). In other words, *the mind is actually a mental devising tool’ whose veracity/ontological-pertinence must be validated by an abstractly veridical intrinsic-reality/ontological-veridicality. In other words, the abstract grasp of intrinsic-reality/ontological-veridicality defines mental-devising-representation as the latter is not inherently given (it is a devising tool validated by abstract
intrinsic-reality/ontological-veridicality established by causality ~as-to-projective-totalitative–implications-of-prospective-nonpresencing,–for-explicating-ontological-contiguity. For instance, while the traditional reflex of the human mental-devising-representation is disposed to think otherwise, Einstein theory-of-relativity abstraction, and likewise with many conceptualisations of a doppler-thinking nature, is more real by its causality ~as-to-projective-totalitative–implications-of-prospective-nonpresencing,–for-explicating-ontological-contiguity, thus pointing to the error of the human reflex/impulse thinking. In another light, this explains the transformative evolution of our registry-worldviews/dimensions mental-devising-representations of reality from the recurrent-utter-uninstitutionalised earlymen to our current positivism–procrypticism registry-worldview, with the insight that our mental-devising-representation will evolve when prospective abstract reality shows that it is defective/perverted as procrypticism–or–disjointedness-as-of-reference-of-thought, from a deprocryptic mental-devising-representation. In the same vain, why we perceive the recurrent-utter-uninstitutionalised mind as that of ‘a savage’, the recurrent-utter-uninstitutionalised in its totalising~self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as metaphysics-of-presence{implicated-nondescript/ignorable–void ’as-to- presencing—absolutising-identitive-constitutedness } perceives its mind as straight/candored and as of organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting/longness-of-register-of-meaningfulness-and-teleology) and soundness-or-ontological-good-faith/authenticity -of- reference-of-thought. It is the prospective base-institutionalised mind that ‘invents’ the representation of mental-

It is a psychoanalytic-unshackling ordered construct (as-the-temporal-minds-pedestals-are-out-of-phase-dialectically-or-dialectically-primitive-by-a-bare-matter-of-fact) from the intemporal-solipsistic/emanant-registry-pedestal in transversality\textsuperscript{<for-sublminating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–"motif-and-apriorising/axiomatising/referencing”}. The bigger scheme of things being the de-mentative/structural/paradigmatic preemption of a defective/perverted registry-worldview, in this case \textsuperscript{8} procrypticism–or–disjointedness-as-of-reference-of-thought. Such an emanant insight can be garnered from the fact that, positivism was established by the ‘diktat’/ordered-construct of the Descartes, Comtes, Galileos, Rousseaux, Newtons, Darwins… of the world, and the rest of humanity complied to the formalisms that ensue, by virtue of their proxying-to-intrinsic-reality and the positive-opportunism—of-social-functioning-and-accordance that led to psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring (towards human formalisation and internalisation)! As registry-worldview/dimension defects or denaturing\textsuperscript{16} are responsible for the vices-and-impediments\textsuperscript{106} of the said registry-worldview/dimension; noting that the fundamental construction is a ‘the-Good/understanding/notional–knowledge-reification–gesturing<in-

The reason why virtue (knowledge is virtue) is treated scientifically as highlighted above is that virtue is a ‘the-Good/understanding/knowledge construct’ and not a ‘good-natured/impression construct’. For instance, no non-positivism/medieval mindset is ‘good-natured/vague by the registry-worldview/dimension impression’ enough with the fundamental defective/perverted non-positivism/medieval worldview to be able to address ‘the-Good/understanding’ of a positivistic mindset which will resolve or structurally-rendered-inoperant the problems of superstition and witchcraft as the former will always make reference to the defective/perverted ′reference-of-thought–categorical-imperatives/axioms/registry-teleology′ of non-positivism/medievalism no matter how ‘good-natured/impression-driven’ it is. The same applies with procrypticism and deprocrypticism. No procrypticism (preconverging-or-dementing –apriorising-psychologism) mindset as of impression-driven/good-naturedness/wishfulness has the requisite ‘the-Good/understanding/notional~knowledge-reification–gesturing-<in-prospective_psychologismic–apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }—conflatedness –in-{preconverging-disentailment–by}–postconverging-entailment⟩′ <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–

Thus de-mentatively/structurally/paradigmatically it is the prospective registry-worldview/dimension which is always the ‘prospective virtue potential’ for the prior/superseded registry-worldview/dimension. Basically, base-institutionalisation enabled the virtuous resolution of vices-and-impediments of the state of recurrent-utter-uninstitutionalisation, and likewise with universalisation and ununiversalisation, positivism and non-positivism/medievalism, and prospectively, notional–deprocrypticism and procrypticism–or–disjointedness-as-of- reference-of-thought. In the present world, we no longer do institutional slavery, we talk of universal rights and equality of all people, mob judgment and mob killing is hardly practised anymore, accusations of witchcraft are now viewed as ridiculous, etc.; it is the integration of a positivist registry-worldview/dimension, with corresponding psychoanalytic-unshackling/memetic-reordering/institutional-recomposing that enabled such human transformation from a non-positivism/medievalism registry-worldview/dimension; and not the inherent exceptionalism, as biological or otherwise, of humans living now over their forerunners. Basically, human ‘supplanting–conviction-as-to-profound-supererogation’—of–‘attendant-intradimensional’–postconverging/dialectical-thinking–apriorising-psychologism deductive reasoning’ as prelogism is effectively a sound construct for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation and hence virtue; that is, so long as it is adhered to properly. However, this is not the case on two grounds. It is critical to distinguish a defect in improper processing/operating of supplanting–conviction-as-to-profound-supererogation—of–‘attendant-intradimensional’–postconverging/dialectical-thinking–apriorising-psychologism or prelogism which is rather construed as a singular/ad-hoc ‘implicitation-of-act-execution defect’ and can be then qualified as a ‘poor or bad supplanting–conviction-as-to-profound-supererogation’—of–‘attendant-intradimensional’–postconverging/dialectical-thinking–apriorising-psychologism’; it being nonetheless a supplanting–conviction-as-to-profound-supererogation—of–‘attendant-intradimensional’–postconverging/dialectical-thinking–apriorising-psychologism.

Reality being blunt/incisive as it is rather preceding/superseding and ontological-normalcy/postconvergence with respect to us, is in essence of potent operant and deterministic phenomenality that doesn’t have any place for our thresholding discrete incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation notions but even for the cases where such discretion is artificially devised/implied, it is applied as operant and deterministic (consider quantum-mechanics). So

The second reason is that we can garner insight on prior/superseded institutionalisations and understand that the vices-and-impediments are actually cross-sectional to the registry-worldviews/dimensions as of beyond-the-consciousness-awareness-teleology-in-preconverging-existential-extrication-as-of-existential-unthought and it is intemporal philosophical development that goes on to liberate/enlighten/moult-out ‘actors of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity’ who in turn then

These fundamental human mental-devising-representation or apriorising–registry tools of candoring and decandoring points to the very nature of logic. Logic requires that all interlocutors share a same reference-of-thought with regards to reference-of-thought– categorical-imperatives/axioms/registry-teleology\textsuperscript{100}/registry-teleology\textsuperscript{100} for its sound operation, thus logic can only be operated at institutionalised/intemporalised thresholds, and not as of uninstitutionalised-threshold\textsuperscript{103} where there is divergence in reference-of-thought construed meaningfulness-and-teleology\textsuperscript{100} construed as transversality<for-sublimating–existential-eventuating/denouement>~of-\textsuperscript{affirmative-and-unaffirmative–disambiguated–motif-and-}
apriorising/axiomatising/referencing’. At uninstitutionalised-threshold\textsuperscript{103}, given the veridicality of human emanance as temporal-to-intemporal, logic is ridiculous because of the variance and unshared reference-of-thought– categorical-imperatives/axioms/registry-teleology\textsuperscript{100}/registry-teleology\textsuperscript{100} in terms–as-of-axiomatic-construct of implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, valuerference and teleology\textsuperscript{100} with respect to argumentation, ‘socially-perceived-value as of social-
stake-contention-or-confliction’. At which point no articulation is inherently more right, however, the intemporal-disposition being ontological has causality as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity veridicality and carries a positive-opportunism—of-social-functioning-and-accordance that can allow it to dominate human temporal-dispositions reflecting/perspectivating/highlighting (reasoning-through-and-not-reasoning-with) their registries/mental-representations perversion, and so, through social institutionalisation/intemporalisation percolation-channelling-in-deferential-formalisation-transference in the medium to long-run. It is only after such uninstitutionalised-threshold is superseded/dominated/preceded/overridden/uttered by the intemporal-disposition as an ordered construct institutionalisation/intemporalisation with corresponding human seconddnaturing as internalisation and formalisation that logic becomes pertinent as it now operates only on one axiomatic-construct/categorical-imperatives/registry-teleology that establishes the ‘substantive hermeneutically/reprojectively/supererogatingly/zeroingly cumulated/recomposured abstract-tissue-of–social-emanance as to attendant–ontological-contiguity educed–existentialising/contextualising/textualising-contiguity’ (not formulaic-projection/mimicry) and veracity/ontological-pertinence of interlocutors’ articulations. Thus the basis for Rational-Realism as the initial institutionalisation/intemporalisation recomposure orientation that goes beyond just articulating reference-of-thought–categorical-imperatives/axioms/registry-teleology,–for-intemporal-preservation but involves anticipating human notional–firstnaturedness—temporal-to-intemporal-dispositions<-so-construed-as-from-perspective–ontological-normalcy/postconvergence> in preempting the perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation of prior/superseded registry-worldview’s reference-of-thought–categorical-imperatives/axioms/registry-
This raises two dilemmas with respect to the conceptualisation of virtue as rational-realism implies that at the procrysticism–or–disjointedness-as-of-reference-of-thought uninstitutionalised-threshold, we have to register/acknowledge priorly our inclination to subknowledge-{preconverging-or-dementing-as-if-of-sound-knowledge} positivistic registry-worldview’s/dimension’s institutionalisation reference-of-thought–categorical-imperatives/axioms/registry-teleology to paradoxically then be able to anticipate and stifle this in the active construction of deprocrystic meaning, at which point the ontological-veridicality of meaning then involves not only logical operation/processing/contention on the basis of a sole intemporal-disposition, but equally registries-disambiguation to account for perversion-of-reference-of-thought-{as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation >mental-perversion/preconverging-or-dementing–apriorising-psychologism by temporal-dispositions: (i) <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag or Setting-aside (as being in denial of perversion-of-reference-of-thought<as-preconveringly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > defect) arises where a registry-worldview returns to its same reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation that have been shown to be subknowledge-{preconverging-or-dementing-as-if-of-sound-knowledge}/perversion-of-reference-of-thought<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation>/<mental-perversion at the uninstitutionalised-threshold, and hence remains candored/integratively-aligned; contrasted with the instance of the adoption of a new registry-worldview’s (superseding the

(ii) Conventioning metaphoricity \(^{(0)}\) involving in a continuum on one side ontologising rationalising though ontological-veridicality is not the sufficient reason for the social acceptance of rightness for rightness sake (as explained previously) and on the other side intemporality/ontology distractive sub-par/formulaic-association/temporal/alibi conventioning-rationalising. ‘Rational-realism of notional–deprocripticism as of ratiocination/ratiocontiguity as nondisjointing or institutionalisation/intemporalisation full-cycle’ can thus be construed as a contiguous cumulation of successive memetic-reordering (as institutional recomposuring) for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation; with such successiveness due to the limitation of human mentation-capacity to be able to mimetically (across suprastructural-meaningfulnes) come full-cycle in one transcendance-

Hence intemporal-preservation is a memetically/psychoanalytically evasive construct at uninstitutionalised-threshold, the pursuit of which is veridically the human species eudaemonic contemplation, construed as ‘postconvergence memetic recomposuring’; recomposure is defined as ‘ontological-representation/ontological-memetism of intrinsic-meaningfulness (whether implying, on the one hand, an integrative/candor/organic-comprehension-thinking alignment or on the other hand, a distractive/decandored alignment as threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation <as-to-
‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing-psychologism>) towards intemporal-preservation-entropy-or-contiguity–or–ontological-preservation’ (as validated by veridicality/<amplituding/formative-
epistemicity>causality <as-to-projective-totalitative–implications-of-prospective-

succession of the recomposuring of institutionalisations with the notion that where intemporal-preservation-entropy-or-contiguity–or–ontological-preservation is lost at a registry-worldview’s/dimension’s uninstitutionalised-threshold, a prospective registry-worldview/dimension is implied/recomposured that will ensure intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, and undermines notional-discontiguity/epistemic-discontiguity–<shallow-supererogation–of-mentally-aestheticised–preconverging/dementing–qualia-schema>/epistemic-totalising–self-referencing-syncretising/setting-aside by appropriate stranding/coring representation (of-perverting-temporal-dispositions) as the backdrop for the prospective registry-worldview’s/dimension’s institutionalisation–reference-of-thought–categorical-imperatives/axioms/registry-teleology. That is, ‘human progress/transcendence happens as a matter of fact, with no registry-worldview/dimension having any ontological and veridical claim/pretence to extricate itself from psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring—as-dialectical-stranding-backdrop-for-prospective-transcendence once it is shown that it subknowledges-or-mimics (as perversion-of-reference-of-thought–as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation>) its reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation at its uninstitutionalised-threshold, even though this from the temporal-dispositions mindset/reference-of-thought is always an unpalatable proposition. But then the state of being in a transcended registry-worldview/dimension (as in our present positivist registry-worldview/dimension) arises because other prior registry-worldviews/dimensions successively underwent their own psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring—as-dialectical-stranding-backdrop-for-prospective-transcendence for intemporal-preservation-entropy-or-contiguity–or–
ontological-preservation, at their uninstitutionalised-threshold; and so, going back to the recurrent-utter-institutionalised early men who left the caves and trees, thus any denial of prospective transcendence-and-sublimity/sublimation/supereogatory-de-mentativity as articulated above is an argument which incoherence emanantly imply ‘we should go back to the caves and trees’, as we’ll seem to validate that prior registry-worldviews/dimensions should never had transcended up to our very own registry-worldview/dimension, and beyond, prospectively. Stranding (of-perverting-temporal-dispositions-of-reference-of-thought) should be construed at a registry-worldview’s/dimension’s uninstitutionalised-threshold (the threshold where the registry-worldview/dimension is failing/not-upholding-as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity—or—ontological-preservation), as the ‘base de-mentative/structural/paradigmatic decandored/distractive-alignment-to—reference-of-thought—as-of-apriorising/axiomatising/referencing> persion-of—reference-of-thought—as-preconvergingly-apriorising/axiomatising/referencing—in—nonconviction/madeupness/bottomlining-as-to-shallow-supereogation> defect reflex’ (not a straightness/candor/organic-comprehension-thinking/prelogism reflex), and de-mentation (supereogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or—attributive-dialectics) rather points to ‘a (lack of) the-Good/understanding/notional—knowledge-reification—gesturing—in—prospective_psychologismic—apriorising/axiomatising/referencing—{of-attendant—ontological—contiguity—educed—existentialising/contextualising/textualising—contiguity}—conflatedness—in—{preconverging—dисentailment—by}—postconverging—entailment> <amplituding/formative—epistemicity>causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing.—for-explicating-ontological-contiguity—reflection/perspectivation’ (hence a veridical <amplituding/formative—epistemicity>causality—as-to-projective—totalitative—implications-of-prospective—

Stranding is thus articulated as slanting/miscuing/disjointed-logic/logical-drag/unconscionability-drag/subpar-conventioning-rationalising conjugated/inflected/derived/mimicked/in-protraction-to-psychopathic-preconverging-or-dementing apriorising-psychologism as of the registry-worldview’s/dimension’s-uninstitutionalised-threshold defect-as-Being-or-ontological-or-existential–defect (induced from temporal-dispositions threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism as to ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation). The memetic-reordering is in recomposuring, at the uninstitutionalised-threshold as the threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism of (registry-worldview) apriorising-registry elements as implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology (i.e. reference-of-thought–categorical-imperatives/axioms/registry-teleology) towards the transcending registry-worldview’s implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology (categorical-imperatives/axioms/registry-teleology) for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, in re-institutionalising the uninstitutionalised-threshold. There is no reason for de-mentation—(supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) and recomposuring but for the fact that the
internal coherence of a registry-worldview/dimension is failing/not-upholding-as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity–or-ontological-preservation at its uninstitutionalised-threshold \textsuperscript{103}, as its threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation\textsuperscript{97} \textsuperscript{68} <as-to-attendant-intradimensional\textsuperscript{9}-prospectively-disontologising–preconverging/dementing–apriorising-\textsuperscript{20}-psychologism\textsuperscript{92} provides the dynamic association for psychopathic/postlogic subknowledging \textsuperscript{95} /mimicking impulse leading to the vices-and-impediments\textsuperscript{99} of the registry-worldview/dimension from an intemporal/ontological perspective; and ontological-normalcy/postconvergence intemporal-preservation-entropy-or-contiguity–or–ontological-preservation veridicality (as \textsuperscript{46} <amplituding/formative–epistemicity> causality \textsuperscript{9} as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity\textsuperscript{68}) is the drive that resolves lack of human mentation-capacity for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (at uninstitutionalised-threshold\textsuperscript{103}) by stranding-backdrop-for-transcendence and then recomposuring prospective registry-worldview’s/dimension’s institutionalisation reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{100}. The example highlighted on page provides an excellent ‘logical insight’ on stranding-backdrop-for-transcendence and recomposuring of a registry-worldview/dimension that is failing/not-upholding-as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity–or–ontological-preservation at its uninstitutionalised-threshold\textsuperscript{103} \ldots To grasp this better say for instance the normal arithmetic we know $2+2=4$, $5+1=6$, $7-3=4$, etc. was to be undermine by a new human subknowledging\textsuperscript{95} caused by a disease wherein we tend to say $2+2=5$, $5+1=7$ and $7-3=3$, then the traditional categorical-imperatives of addition and subtraction will be modified to take account of our perversion/defect by saying that additionality will involve subtracting 1 from the result and subactivity will involve adding 1 to the result, so that arithmetic mirrors
intrinsic reality outcome (intemporal transversality<for-sublimating–existential-eventuating/denouement>–of- affirmativemand-unaffirmative–disambiguated–‘motif-and- apriorising/ axiomatising/referencing’ as from ontological-normalcy/postconvergence). Thus
conceptualisation which ‘knowledge principle conceptualisation’ then addresses (percolates into) the ‘infinity of related incidental phenomena and cases’, i.e. Newton articulates the science of mechanics metaphorically from ‘an initial apple that hits his head while under a tree’ not because the science of mechanics will revolve around an apple that hit his head but because he’ll grasp the insight to understand the myriad and infinity of instances requiring those laws of physics. So the intemporal-as-ontological pedestal (in its treatment) involves universal projection to grasp universal principles and is not meant to ‘equivocate and idle’ with perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation temporal manifestations which are dialectically-or-contendingly-out-of-phase, but rather then apply the knowledge principles so articulated to the theoretically infinite incidental instances (on the validation and untenability/internal-contradiction/internal-incoherence/institutional-constraining or internal-contradictions induced by the knowledge principles <amplituding/formative–epistemicity> causality as-to-projective-totalitative–implications-of-prospective–nonpresencing,–for-explicating-ontological-contiguity). Of course, no registry-worldview/dimension thinks of itself as prospectively dialectically-primitive/dialectically-or-contendingly-out-of-phase, and as such its ‘supposed contention’ will always by reflex strive to arrive at an equilibrium in the same registry-worldview’s/dimension’s institutionalisation reference-of-thought–categorical-imperatives/axioms/registry-teleology, but the template of human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity shows that the intemporal prospective/superseding registry-worldview reference-of-thought takes precedence with contention construed by its reference-of-thought–categorical-imperatives/axioms/registry-teleology,–for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation by the ontological-normalcy/postconvergence prioritisation of the relatively

perversion. For instance, men did not transcend from a medieval worldview to a positivistic
worldview by a ‘logical exercise’ (the logical conceptualisation we have of such a
transformation in today’s positive world is rather in effect an afterthought appraisal) but
because the grander grasp on reality of positivism constrained and made the medieval registry-
worldview untenable/internally-contradictory (the ships that set sail around the world for spices
elicit a positive commercial opportunism that is responsible for destroying the social myth of a
flat world; the bacteria theory that will ensure that one lives or die if we believe in it or not,
coerced the destruction of a superstitious medical worldview; the scientific tools and
knowledge that ensured that nation A or nation B will triumph if they believe in it or not,
coerces the need to adopt a scientific worldview, etc.). It is naïve to think that such progression
occurred because of cross-sectional human ‘dimensionality-of-sublimating’

It should be noted that at institutionalised/intemporalised-thresholds-of-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, temporal-dispositions potential inclination for preconverging-or-dementing–apriorising-psychologism is suppressed by formalism and internalisation involving intemporal meaningfulness social universal-transparency ⟨transparency-of-totalising-entailing,-as-to-entailing- ⟨amplituding/formative–epistemicity⟩totalising~in-relative-ontological-completeness ⟩, internal-contradiction, referencing/registering/decisioning or stranding as sound or unsound, and alienating of unsound meaningfulness to stifle any such threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation – ⟨as-to–‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing – apriorising-psychologism⟩. Basically, such a representation of organicalism and mechanicalism can be storied or narrated as follows: Supposed going by the case highlighted where a psychopath met a stranger talking about another stranger as molesting children; the so accused stranger was actually a guardian of the child assuming various responsibilities that come with it (this represents the organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of- reference-of-thought’–as-conflatedness or-ontological-reprojecting/longness-of-register-of–meaningfulness-and-teleology depth of meaning), the psychopath fully aware of this none the less proffered such hollow mimicking narratives to the other stranger who aligned in-prelogic supplanting-conviction-as-to-profound-supererogation of–‘attendant-intradimensional’ postconverging/dialectical-thinking –apriorising-psychologismly/prelogicly to the psychopath but is veridically now in effect the threshold-of–nonconviction/madeupness/bottomlining-in-

Further still, this miscuing comes to develop into disjointed-logic, logical-drag, unconscionability-drag, temporal-dispositions preservation, and sub-par/formulaic-association/temporal/alibi conventioning-rationalising wherein ‘a comprehensive depth of perverted narratives’ has now been cultivated in the social environment. In the bigger scheme of things, denaturing of apriorising–registry (as the apriorising–registry is the axiomatic-construct/categorical-imperatives on which logic operates/is processed pointing to a coherently systematic failure of logic at the uninstitutionalised-threshold\(^{103}\); consider that the non-positivism/medievalism apriorising–registry will coherently fail logical operation/processing/contention with regards to its uninstitutionalised-threshold\(^{103}\) requiring positivism, that’s the same emanant issue with procrypticism at its uninstitutionalised-

It should be noted that however ‘good-natured an individual’ in that worldview the basic knowledge defect of that worldview as non-empirical/superstitious defines the disposition of any such individual, as they adhere to the reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of that registry-worldview/dimension, to commit vices-and-impediments associated with non-positivism/medievalism, since virtue actually lies in the-Good/understanding/notional~knowledge-reification–gesturing–in–prospective_psychologismic–apriorising/axiomatising/referencing–of-attendant–ontological–

Directed-preconverging-or-dementing–apriorising-psychologism as such being a conscious and operant mental awareness of psychopathic/postlogic minds of the void of their narratives and teleology but understanding and acting by instrumentalisation on the basis that prelogic/conviction-as-to-profound-supererogation minds are disposed to elevate the hollow mimicking narratives (by ignorance and/or subsequently affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) to wrongly validate the apriorising–registry as veridical thus falsely implying an implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology. Just as we work with the reality that all humans are predisposed to have cancer and the virtue of curing is not denying but anticipating and preempting the possibility of having cancer with medicines, lifestyle, research, etc., i.e. ‘ontology is about working with what is/knowledge-driven, and not wishful-
or–ontological-preservation to explain how-man-can-be/the-nature-of-man at any registry-worldview level, retrospectively or prospectively. Whereas, man, if naively perceived as a whole rather only from the angle of a specific ‘institutionalisation/secondnaturing level’ which is in ‘existential immediacy’ this may seem to indicate that we are talking about ‘different species’ with ‘different ontological determinants’, which is naïve and false. The anthropopsychological approach to psychology is analogical to the development of physics which is not only on the basis of what is immediately at the consciously immediate human operational/functioning level of physicists but equally projecting into a physics conceptualisation of the macrocosm (astronomy and cosmology) as well as the microcosm (particle physics) in other to place the subject on a comprehensively sound footing. Central to such a sound footing in the ontological-normaley/postconvergence conceptualisation of the social domain is the idea of notional–firstnaturedness—temporal-to-intemporal-dispositions-
<so-construed-as-from-perspective–ontological-normaley/postconvergence> and institutional-cumulation/institutional-recomposure<as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing<perspective–ontological-
normaley/postconvergence-reflected–‘epistemicity-relativism-determinism’>). On another note, it is critical to distinguish between a true philosophical development that arises by intemporal-disposition and an institutionalised development that is articulated to elicit ‘positive-opportunism—of-social-functioning-and-accordance’ in humans, so that the intellectual exercise doesn’t naively project a philosophical idealism where this doesn’t exist and by so doing undermine its work by naively projecting universal intemporality /longness and failing/not-upholding<as-of-apriorising/axiomatising/referencing> to articulate a realism that takes account of temporal mental-dispositions (knowledge-notionalisation, i.e. apprehending not only intemporal implications of any knowledge construct, but preempting by transversality<for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–
to potential temporal undermining of that intemporal idealism construct; the reason we institutionalise/intemporali
de and formalise with subsequent internalisation/secondnaturing). It should be noted that the use of
the concepts of intemporality\(^\text{53}\)/longness and temporality\(^\text{99}\)/shortness is more scientific than the
impression notions of good and bad. Intemporality\(^\text{53}\)/longness points to ‘what generates the
greatest\(^\text{104}\) universal virtue as ontological which is\(^\text{104}\) universally-centered’ (and that this

corresponds to reality-referencing and the ontology pedestal) while temporality\(^\text{99}\)/shortness
points to ‘what generates the non-ontological as shallow interest that may be self-centered, at
various pedestals, (and that this corresponds to \(<\text{amplituding/formative–epistemicity}>\text{totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag}\)

and metaphysical pedestals’). Intemporality\(^\text{53}\)/longness and temporality\(^\text{99}\)/shortness as such are
operant knowledge concepts while good and bad are vague and non-operant impression
concepts. In fact, why good and bad are impression-driven, intemporality\(^\text{53}\)/longness and

temporality\(^\text{99}\)/shortness by their very definition above are made operant as an

\(<\text{amplituding/formative–epistemicity}>\text{causality as-to-projective-totalitative–implications-of–prospective–nonpresencing.–for-explicating-ontological-contiguity}\)

scientific principle (without making any reference to stigmatising impression of virtue) by the denotation as
longness-of-register-of meaningfulness-and-teleology\(^\text{100}\) (intemporality\(^\text{53}\) ) and shortness-of-

register-of meaningfulness-and-teleology\(^\text{100}\) (temporality\(^\text{99}\) ). That is, with respect to 'socially-

perceived-value as of social-stake-contention-or-confliction' (at uninstitutionalised-threshold\(^\text{103}\))
the intemporal mind conceptually asks what is the best disposition in\(^\text{104}\) universal-depth that
abstractly delivers the greatest good to all humans in similar 'socially-perceived-value as of

social-stake-contention-or-confliction' setup across space and time; while temporal minds under
the same notion (intemporality\(^\text{53}\) -temporality\(^\text{99}\) ) conceptually assume lower and lower shades
‘in mentation-capacity terms’ of such an intemporal\(^\text{104}\) universal-depth concept articulation

prospective- nonpresencing-for-explicating-ontological-contiguity conceptualisation will be qualified as ‘longness-of-thought’; and it strives to achieve a prospective de-mentative/structural/paradigmatic existential registry-worldview/dimension conceptualisation of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity wherein aetiolisation/ontological-escalation for prospective transcendental intemporal virtue is the underlying drive. The non-implication of an equivalence between (‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting pedestalling) with temporality/shortness in its various shades will imply a knowledge conceptualisation rather from the perspective of the comprehension of human species intemporal potential rather than mere extrication within a temporal inter-individuals-and-social-stake-contention-or-confliction context, wherein for instance the focus of a positivistic-inclined mindset/reference-of-thought is not to idly engage a medieval world in medieval terms to stigmatise as a final end but rather for the virtuous human species potentiality to transcend into positivism, and on the other hand equally not to shy away from articulating, however temporally unpalatable and unintelligible-or-existentially-suprastructural for the temporal present registry-worldview/dimension, an intemporal transcendental prospection on the validation that the present registry-worldview/dimension is the outcome of a same-kind intemporal transcendental prospection with a same-kind corresponding emanance unpalatability and unintelligibility for the preceding registry-worldview/dimension, be it in that case driven by a spontaneous and natural dialectical cycle of social constraints of stakes and confliction, in contrast now to a more ‘consciously directed’ abstract understanding regarding deprocrypticism-over-procrypticism (with intellectual responsibility itself being defined as the spirit for authentically upholding such construing/conceptualisation and/or facilitating it as enabling further self-development together with the furthering of social/specie development). herein doesn’t mean ontologically that some individuals are inherently/exclusively solipsistically temporal and others are inherently/exclusively solipsistically intemporal. The reason why the ‘study of the social’ had hitherto been EPHEMERAL is because of the lack of contiguity in referencing the two elements of ontological meaning (reference-of-thought and logic); with reference-of-thought being hitherto undisambiguated in the social construction of meaning, thus leading to a ‘lack of constraining social universal-transparency→(transparency-of-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness) of temporal-dispositions prior relative-ontological-incompleteness→-induced,→threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation→→as-to–‘attendant-intradimensional’-prospectively-

reference-of-thought in the ontological social construction of meaning as it is fully aligned or ‘in ratio alignment’ to ‘an emanant transdimensional (across registry-worldviews) point-referencing of intemporal-preservation-entropy’ while reflecting a social universal-transparency that shows the fallibility of temporal dimensions and as this further discomfitures in the social-construct of meaning, and hence the perversion-and-derived-perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument-for-operant-or-incidenting-predicative-insights-of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity-reifying-or-elucidating-of-prospective-relative-ontological-completeness-reference-of-thought-devolving-as-of-instantiative-context point-referencing and as this further discomfitures in the social-construct of meaning, and hence the perversion-and-derived-perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation, and elicits an ordered construct of meaning (in terms-as-of-axiomatic-construct of implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology) from the superseding perspective of intemporal-preservation-entropy-or-contiguity—or-ontological-preservation alienative-hierarchisation and ‘disambiguation of notional–firstnaturedness—temporal-to-intemporal-dispositions-as-so-construed-as-from-perspective–ontological-normalcy/postconvergence as ontological-escalation/aetiologisation’ (longness-of-register-of–meaningfulness-and-teleology). A ‘conjugated/inflected/derived/mimicked/in-protraction-to-psychopathic-preconverging-or-dementing–apriorising-psychologism opportunism-temporal-disposition defect’ will arise if a different interlocutor knowing truly that the accused is not a child molester but for a favour or sense-of-favour they owe to the psychopath articulates the following narrative: (c) this guy has been going around molesting young children for quite a while now. A
A ‘conjugated/inflected/derived/mimicked/in-protraction-to-psychopathic-preconverging-or-dementing–apriorising-psychologism exacerbation-temporal-disposition defect’ will arise where another interlocutor knowing the truth about the whole thing, thinks they can have an advantage by acting likewise as the psychopath and articulates the following narrative (d) they had actually witnessed the accused shoplifting. A ‘conjugated/inflected/derived/mimicked/in-protraction-to-psychopathic-preconverging-or-dementing–apriorising-psychologism social-discomfiture/(social-chainism/negative-social-aggregation)-temporal-disposition defect’ will arise where (e) such narratives are purposefully and consistently relayed in the social sphere based on ignorances/desublimation, affordabilities, opportunisms and exacerbations, and individuals come to make it a reference for their relation with the accused. And finally, a ‘conjugated/inflected/derived/mimicked/in-protraction-to-psychopathic-preconverging-or-dementing–apriorising-psychologism temporal-enculturation (temporal-endemisation)-temporal-disposition defect’ arises where (f) individuals come to learn that by having the appropriate social relations and social support network they can then initiate such narratives if they were to have competing 'socially-perceived-value as of social-stake-contention-or-confliction' situations with others, and not only that it also includes individuals passively accepting and giving up on the principle of the intemporality’/longness and intrinsicness of meaning. For instance, in the case mentioned before with regards to B (Brackets), where B was to stick with the same temporal-dispositions individuation disposition that delivered the wrong results with respect to subsequent equations of a similar context (uninstitutionalised-threshold) this will be epistemic-decadence, as conjugated/inflected/derived from A’s defective condition which is in epistemic-decadence, and the both A and B are of notional-discontiguity/epistemic-discontiguity<-shallow-supererogation-of-mentally-aestheticised–preconverging/dementing–qualia-schema> defining the registry-worldview/dimension apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument defect. This implies de-mentation{(supererogatory–ontological–de-mentation-or-dialectical–de-mentation–stranding–or–attributive–dialectics} of B to such persion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation (as prior intemporal reference-of-thought–categorical-imperatives/axioms/registry-teleology) is the effective backdrop for ‘postconverging-or-dialectical-thinking’–psychology or psychology-of-

The above analysis shows that soundness-or-ontological-good-faith/authenticity reference-of-thought-of-meaningfulness is not given, as it is a devising mechanism (mental-devising-representation) for ontological-veridicality as dialectically upheld for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (ontological-normalcy/postconvergence). Unconsciousability-drag (from an ontological/intemporal reference) ensures the disambiguation of registries so that the psychopath’s and temporal-dispositions are not elevated to the intemporal level which then allows for, by reflex, a simple operation/processing of logic (whereas the fundamental defect being in terms–as-of-axiomatic-construct of the apriorising–registry-elements, implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology of the registries, i.e. rather the unsoundness-or-ontological-bad-faith/inauthenticity reference-of-thought or the dialectically-or-contendingly-out-of-phase meaningful construct). Unconsciousability-drag (from an ontological/intemporal reference) is thus central to attending to the rational-realism of notional–deprocrypticism as of ratiocination/ratiocontiguity as nondisjointing ‘postconverging–dementating/structuring/paradigming as human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation ’ as it accounts for the defect of
temporal-dispositions teleologies of meaning (shortness-of-register-of—meaningfulness-and-teleology[30]) while projecting intemporally/ontologically. The notion of ‘unconscionability-drag’ also explain how and why banal temporal-dispositions are not readily ‘integrative of psychopathic postlogism[78]-slantedness as conjugated-postlogism[78]/preconverging-or-dementing[-integration’ (hence no distractive-alignment-to-reference-of-thought<-of-apriorising/axiomatising/referencing>) to the childhood and early adolescent psychopaths but come to develop a ‘mental-unconsciousness’ (unconscionability) to be ‘integrative of psychopathic postlogism’[-slantedness’ during the stage of late adolescence and adult psychopath. Antipodal to the idea of ‘unconscionability-drag’ is the idea of ‘conventioning’/social-temporal-thresholding. ‘Unconscionability-drag’ points to an abstract but more veridical ontological construct of the ‘social construction of meaning’ that is ontological-normalcy/postconvergence, based on intemporal-preservation-entropy-or-contiguity—or—ontological-preservation by using categorical-imperatives of the prospective superseding/transcendental registry-worldview/dimension whether such a representation is aligned or not with the society’s collective-social-psyche or present-consciousness. (For instance, we can generate an unconscionability-drag of a medieval society on the basis of a positivistic mental projection and categorical-imperatives; wherein we oblongate the solipsistic mental-dispositions of individuations in such a society. While such a representation, with its corresponding subknowledging /mimicking, is ontologically more accurate about such a society, however, the collective-social-psyche/present-consciousness of individuations in the said society will not recognise any such decandored/oblongated/logical-incongruence-or-transversality—<for-sublimating—existential-eventuating/denouement>/dialectically-or-contendingly-out-of-phase representation of themselves, rather the medieval society will represent itself as candored/straight/integratively-aligned/dialectically-or-contendingly-in-phase which is then the ‘conventioning/social-temporal-thresholding representation of the social
conventioning/social-temporal-thresholding thus refers to the fact that in a ‘social construction of meaning’, intrinsic-reality by itself and in of itself (as may be grasped ontologically from superseding/transcendental categorical-imperatives preserving intemporality/> is not necessarily the deterministic basis for human social adherence to it. Transcended and ontological meaningfulness of reality (contrary to conventioning/social-temporal-thresholding meaningfulness of reality which is rather towards <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/temporality - serving) requires a process of institutionalised/intemporalised social integration to induce untenability/internal-contradiction/internal-incoherence/institutional-constraining to ‘prior or circumstantial social integration gatekeeping construals or (institutionalisation/intemporalisation) percolation-channelling-<in-deferential-formalisation-transference>’ of ‘any social construction of meaning’ for there to be collective institutionalised social adherence (and by the relative positive-opportunism—of-social-functioning-and-accordance elicited). Institutionalisation/Intemporalisation percolation-channelling-<in-deferential-formalisation-transference> are the institutionalised relays for human survival-and-flourishing-teleology, whether diffusely from internalisation-and/or-formalism, and are increasingly vital with higher institutionalisations, and most vital for prospective perpetuation-of-deprocrypticism, such that abstractions that will normally hardly be socially integrated going just by averaging human temporal-to-intemporal nature, can actually come from re-originary-as-unenframed/unbeholdening/outlier-conceptualisation-(imbued-postconverging/dialectical-thinking -‘projective-insights’/’epistemic-projection-in-conflatedness ’-of-notional–deprocrypticism-prospective-sublimation) intemporal-disposition to inform social institutionalisation/intemporalisation, thus emphasising how vital percolation-channelling-<in-deferential-formalisation-transference> are for institutional-cumulation/institutional-recomposure-(as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-
Institutionalisation/Intemporalisation percolation-channelling-⟨in-deferential-formalisation-transference⟩ imply that the would-be intellectual analyst can perfectly uphold intrinsic reality over ‘social-and-temporal-trading’ and still impose veridicality (if truly veridical) over populist-inclined dispositions which are not veridical, just by the fact of the extendedly implied positive-opportunism—of-social-functioning-and-accordance for human survival-and-flourishing imbued in institutionalisation/intemporalisation percolation-channelling-⟨in-deferential-formalisation-transference⟩. This implies that an exercise in institutionalisation/intemporalisation beyond just intemporal philosophical projection is needed for the social integration of any transcending veridicality postconverging–dementating/structuring/paradigmging (the latter being any notion that put in question informal or formal conventioning/social-temporal-thresholding ways of perceiving and doing things for supposedly prospective better ways). Correspondingly, the social-construct cannot be and should not be related to as a philosophical construct since it is rather ‘conventionalised from institutionalisation/intemporalisation (secondnatured), and has not evolved as of dimensionality-of-sublimating ⟨amplituding/formative⟩supererogatory–dementativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ projection; as it may be inclined to make references to temporal categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation that are preconverging-or-dementing apriorising-psychologism/of-perverted-registry/subknowledging/mimicking–and–epistemic-totalising~self-referencing-syncretising-these. This brings forth the idea of ‘ordered construct’ between the intemporal firstnature/intemporal (organic-comprehension-thinking as to
postconverging–de-mentating/structuring/paradigming rather than a temporal extricatory preconverging–de-mentating/structuring/paradigming. ‘Prior or circumstantial social integration gatekeeping construals or institutionalisation/intemporalisation percolation-channelling–<in-deferential-formalisation-transference>’ that can enable the superseding of conventioning in the social integration of ontological veridicality include existing percolation-channelling–<in-deferential-formalisation-transference> of formalisms/officialdom which have naturally been instituted to allow for the supersedingness of intemporal/ontological constructs and intemporal-disposition s. For instance, formal institutions selectivity mechanisms; and where the latter fail or are fallacious, basic positive-opportunism—of-social-functioning-and-accordance wherein the ontologising construct elicits positive-opportunism—of-social-functioning-and-accordance for the undermining of defective conventioning/social-temporal-thresholding constructs/categorical-imperatives of meaning (for instance, a natural causes disease conception leading to more cures such that positive-opportunism—of-social-functioning-and-accordance then undermines a superstitious-driven disease theory which leads to more pain and deaths). The big idea here is that, it is naïve philosophically to operate mainly on the basis of ‘ontological rightness of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity’ with respect to a species whose construct is structured to be temporal (shortness-of-register-of—meaningfulness-and-teleology) to intemporal (longness-of-register-of—meaningfulness-and-teleology) requiring skewing (‘intemporality–asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity)/deferential-formalisation-transference to the latter. And any such ‘ontological transcendence-and-sublimity/sublimation/supererogatory–de-mentativity by mere rightness’ has never been acquiesced to for the sole reason of its intrinsic rightness. For instance, round world idea never took off even though it was ontologically right (as the medieval
conventioning/social-temporal-thresholding construct and strongly ingrained social dispositions). It is the generated untenability/internal-contradiction/internal-incoherence/institutional-constraining together with positive-opportunism—of-social-functioning-and-accordance™ coming from sailors sailing around the world on this idea to seek for spices and create wealth that constrained/institutionalised the medieval world into such an ontological transformation/transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. Part and parcel of ontological transformation/transcendence is the existential cynicism to grasp the human sense of internal contradictions and positive-opportunism—of-social-functioning-and-accordance™ to introduce and uphold these by the mechanism known as institutionalisation/intemporalisation. Regarding futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism undermining of procrypticism, it is doubtful that pertinent ontological constructs and generally the ‘perversion-of- reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-non conviction/madeupness/bottomlining-as-to-shallow-supererogation™ dynamics of procrypticism’ are by themselves a sufficient basis for the direct and immediate social integration of notional–deprocrypticism because of its ‘rightness’ over conventioning/social-temporal-thresholding. Part and parcel of the intellectual exercise is to understand how to manage the mechanism of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity wherein new and more profound ontological constructs are introduced and upheld, particularly by way of institutional percolation-channelling—in-deferential-formalisation-transference> for intemporal transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. However, it should be noted that the conceptualisation of ‘conventioning’ is not wholly antipodal to ‘ontologising/intrinsic-veridicality’ as the latter prospective integration in the social-construct is

For instance, the non-positivism/medievalism value references of aristocracy/class are contrarian to positivistic value references for the possibility of equal opportunities; and the intemporal projecting positivistic mind in medieval times has no business trying to appear ‘great and wonderful’ with respect to ‘conventioned’ value reference of aristocracy/class in the medieval world even though it is the dominant and encultured collective mental-disposition. Likewise, such logic will apply regarding notional—deprocrypticism and procrypticism requiring a reasoning that goes beyond the ‘amplituding/formative—epistemicity’—totalising—self-referencing—syncretising/illusion-of-the-present’ mindset/ reference-of-thought of our current procryptic mental-disposition, i.e. ‘the limit of ontological thought is not the banal amplituding/formative’ wooden-language ⟨imbued—averaging-of-thought—as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—nondescript/ignorable—void ’—with-regards-to—prospective-apriorising-implications⟩ of a registry-worldview/dimension’. This thus requires ‘deconventioning-for-ontologising involving the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation exercise of undermining conventioning at uninstitutionalised-threshold⁸⁰ (due to the inescapable veridicality of human individuation temporal/shortness-to-intemporal/longness which inevitably induces ⁷⁵ pversion-of-

An essential element underlying the psychopathic and other postlogic relationship with meaning has to do with the nature of attachment to meaning. A postlogic mind doesn’t view meaning articulations as ‘inherently sanctuous’ and thus is inclined to produce mechanically whatever deductions that may engage an interlocutor in-prelogic supplanting–conviction-as-to-profound-
supererogation — of-‘attendant-intradimensional’-postconverging/dialectical-thinking — apriorising-psychologismly/prelogicly even if these are hollow mimicking non-veridical narratives, i.e. vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging (meaning-by-the-mere-illogical-possibility-of-it-being-formulaically-narrated). On the other hand, prelogism -as-of-conviction,-in-profound-supererogation — <existentially-veridical—‘attendant-intradimensional—apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> imply more of an organic alignment view of meaningful articulations as ‘inherently sanctuous’, i.e. ‘attendant ontological-contiguity’-duced—existentialising/contextualising/textualising-contiguity /meaningful-projection-of-intrinsicness’. Going by these two facts, the postlogic and psychopathic mindset/reference-of-thought is readily inclined to call upon a broad base of vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging narratives (meaning-by-the-mere-illogical-possibility-of-it-being-formulaically-narrated) whereas the prelogic/conviction-as-to-profound-supererogation mindset/reference-of-thought is inclined to call upon just the narratives it sincerely thinks are relevant/due and intrinsically real. So it is critical not to confuse the over-articulation of postlogic narratives (vague mechanical stylising-of-locution) with an organic depth-of-thought or profoundness, given that these involve postlogism -slantedness, disjointed-logic, miscuing, inventions and platitudes from the postlogic mindset, requiring decandoring/oblongating/distractive-alignment-to-reference-of-thought—<of-apriorising/axiomatising/referencing> . Ontologically speaking, meaning is an essential construct of human mental-devising-representation meant to allow for human intemporal teleology . A postlogic-formulaic slanting threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation — <as-to—‘attendant—

Ontology being the intemporal-disposition, the exercise of ‘directing convincing’ to temporal-dispositions is inherently unwarranted and is rather <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, with pertinence being about ‘articulating and directing’ intemporal/ontologically-contiguous meaningfulness towards the
‘institutionalisation/intemporalisation percolation-channelling-in-deferential-formalisation-transference’; the latter being utterly impersonal (law, officialdoms and subject matter formalisms) which allows for an abstraction of the virtue of ontological contiguity that personalised social-and-temporal-trading doesn’t allow reflexively. By ‘uninstitutionalised-threshold’ (where there is no ‘intemporal social universal-transparency’ (transparency-of-totalising-entailing-as-to-entailing-amplituding/formative-epistemicity-totalising-in-relative-ontological-completeness) as well as no notional-firstnaredness—temporal-to-intemporal-dispositions-so-construed-as-from-perspective-ontological-normalcy/postconvergence disambiguation/unequivalences/alienative-hierarchisation’) is meant, the possibilities of human dispositions and acts beyond frameworks that have not been institutionalised; manifesting as (uninstitutionalisation) ‘temporal-threshold logic’ or ‘discomfiture’. So the uninstitutionalised-threshold of the positive registry-worldview will refer to procrypticism (requiring deprocrypticism), to the non-positivism/medievalism registry-worldview it will refer to non-positivism/medievalism (requiring positivism), to the ununiversalised registry-worldview it will refer to ununiversalisation (requiring universalisation), and to the recurrent-utter-uninstitutionalised apriorising-registry worldview it will refer to recurrent-utter-uninstitutionalisation (requiring base-institutionalisation).

Institutionalisation and formalisation are based exactly on the fact that we don’t have a universal intemporality/longness or the-good disposition, but rather according to the mediocrity principle of science we are solipsistically temporal-to-intemporal in our mental-disposition with respect to ‘socially-perceived-value as of social-stake-contention-or-confliction’. Hence we tend to build artifices (institutions with their formal rules) by the skewing (‘intemporality-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-dementativity)/deferential-formalisation-transference of our collective thought process in the
medium to long perspective towards intemporal-preservation-entropy, to dominate and preempt temporal dispositions. This explains why modern man (positivistic registry-worldview) is apparently more evolved/developed than he/she should normally be compared to previous generations (recurrent-utter-uninstitutionalised men, ununiversalised men, non-positivism/medievalism men, and prospectively, how he/she will be superseded by the deprocryptic man). It doesn't mean that modern man has a genetic makeup or hardware that is different from the others. The difference is the cumulated ‘software’ or institutionalisations and formalisations that have been internalised into modern man. Anthropologists know that if you were to take a newly born child from a society like those that do not have contact with the modern world, and raise the child in a modern family, there is no different outcome on average as with any other child bred in the modern world. So our faith in virtue is not in our inherent excellence/exceptionalism but the excellence/exceptionalism of the software/institutionalisation that has cumulated, and insightfully, which creative template we will prospectively develop! Incidentally institutionalisation and formalisation ensures that we take the best form of human individuation thinking/capacity potential and constrain society and individuals to that individuation thinking/capacity potential, and inherently so, by the overall positive-opportunism—of-social-functioning-and-accordance to the cross-section of the species since it better grasp intrinsic reality and its virtues! Solipsism means I exist alone (as to the epistemic perspective with respect to intrinsic reality/ontological-veridicality), and this author notionally interpret solipsism as the deepest sense of existence and meaning available to an individual in its spontaneous emanance or becoming, and as it projects itself ‘purely and universally’. It is a firstnature/intemporal construct beyond and ‘inventing the possibility’ of secondnatured institutionalisation, and places all humans at all times at the same pedestal of virtuous and ontological appraisal, as it is about our ‘transcendental valour’ irrespective of the level of institutional-cumulation/institutional-recomposition-{as-to- historiality/ontological-
eventfulness /ontological-aesthetic-tracing-<perspective-ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’> at which we are.

It contrasts with institutionalisation/intemporalisation which is ‘a negotiated and secondnatured or nurtured construct with respect to existence and meaning around social-stake-contention-or-confliction’. Institutionalisation/intemporalisation as such, by way of positive-opportunum—of-social-functioning-and-accordance\(^6\) and inducing untenability/internal-contradiction/internal-incoherence/institutional-constraining of temporal-dispositions, has at least the merit of allowing for the possibility for human temporal-dispositions to be skewed (‘intemporality\(^5\)-asymmetric-subsumption-of-temporality\(^7\)’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—dementativity)/deferential-formalisation-transference towards the intemporal-disposition, and thus enabling social transcendence-and-sublimity/sublimation/supererogatory—dementativity which is upheld by formalisation and internalisation. By ontological-normalcy/postconvergence is meant that ‘intrinsic reality’ is one and given (ontology), and that the flaws and corrections in how we go about representing ‘intrinsic reality’ (metaphysics or the human-centered temporal-perspective) has no influence on reality’s intrinsic nature. Our mental-devising-representation of the world in 5000 BC, 2000 AD and possibly 3000 AD might be worlds apart, but the intrinsic nature of reality never changed and will never change an iota. So our knowledge construct is more of a proxying to intrinsic reality to grasp the possibilities of the-Good/understanding/notional—knowledge-reification—gesturing-＜in-

That idea that intrinsic reality is preceding/superseding is known as ontological-normalcy/postconvergence (we are converging to reality and not adding or taking away anything from it, it is us being illuminated as reality is already given). This latter point is important as by reflex an epistemic-totalising~self-referencing-syncretising/temporal-human-centered dimension in its flaws will strive to preserve itself by its registry-worldview/categorical-imperatives (setting-aside of perversion-and-derived-perversion-reference-of-thought) rather than psychoanalytically-unshackling/memetic-reordering (coring and superseding the perversion-and-derived-perversion-reference-of-thought) for prospective/transcending/superseding reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality due to their
‘emotional involvement’ is immediately obvious with the natural sciences whereby the
physicists nor chemists nor biologists worries about convincing anyone but is rather in the business of ‘the convincing from natural truths’ which then do not ask for human temporal validation but impose themselves because natural truths inherently supersede human egotistic or \(\text{amplituding/formative–epistemicity}\) totalising–self-referencing–syneretising/circularity/interiorising/akrasiatic-drag opinionatedness! Postconvergence, in the bigger scheme of things, implies that knowledge has to do with the development of our ‘mentation capacity’ (an entropic-referential memetic-reordering/psychoanalytic-unshackling exercise), across ‘retrospective-and-prospective history’, in grasping ‘intrinsic reality/veridicality’ which ‘has always and will always be ontologically same’. So the concern is about ‘us’; in the appropriateness of the registries we make of intrinsic-reality across retrospective-and-prospective history or rather shifting dialectical moments of relative-ontological-completeness! The articulation of reality, registry-worldviews/dimensions, mental strands (perverted or not), and other constructs of \(\text{amplituding/formative–epistemicity}\) causality \(\text{as-to-projective-totalitative–implications-of-prospective–nonpresencing,-for-explicating-ontological-contiguity}\) is ‘at-a-superseding-pedestal and incisive/blunt’ by the very nature of ontological-normalcy/postconvergence reality. For instance, supposed a society with a non-positivism/medievalism belief system attributes the cause of a disease to say witchcraft, that doesn’t stop the reality of bacteria causing the disease even if such a representation of reality isn’t in the present-consciousness/illusion-of-the-present of that society. Such an ontological conceptualisation of reality equally applies in our times where it can be demonstrated prospectively that our mental-devising-representation of meaning regarding a phenomenon is out of kilter, and reality won’t stop to accommodate us or our banality of thought. Thus the conceptualisation of reality is rather articulated at this depth-of-thought whether it accommodates our present-consciousness/illusion-of-the-present or not (reality personality), and operates by an ordered construct based on \(\text{amplituding/formative–}\)
epistemicity > causality ~ as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity and not a disposition of averageness/banality/popularity/extrinsic-attribution-of-thought recurrent in uninstitutionalised-threshold \(^3\) in the extended-informality-\{susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology \}, allowing for the possibility of transcendental meaning, institutionalisation/intemporalisation (skewing (‘intemporality\(^3\)-asymmetric-subsumption-of-temporality \(^6\)), for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity) for intemporal domination) and human progress; given human temporal/shortness-to-intemporal/longness dispositions. Such an articulation of reality introduces the concept of ‘reasoning-through/utterion’ over \(^{15}\)incrementalism-in-relative-ontological-incompleteness — enframed-conceptualisation and notional–disjointedness’. Reasoning-through/utterion refers to the uncompromising and non-negotiable nature of reality with respect to the meaningful frames of mortal creatures that we are as reality doesn’t adjust to our beliefs, desires, wishes, whims or miscues. Reasoning-through/utterion then implies that meaning is articulated exclusively in terms–as-of-axiomatic-construct of \(^{46}\)amplituding/formative–epistemicity > causality ~ as-to-projective-totalitative-implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity and anything else is defined, whether to be candored or to be decandored, at that ordered construct point-of-reference or point-referencing. Reason is thus ontologically a ‘reasoning-through’ as allowed through in a ‘pure, organic and intemporally uncompromising state’ by reality \(^{46}\)amplituding/formative–epistemicity > causality ~ as-to-projective-totalitative-implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity ‘at-a-superseding-pedestal and incisively/bluntly’. \(^{52}\)incrementalism-in-relative-ontological-incompleteness — enframed-conceptualisation and notional–disjointedness-as-of- \(^{14}\)reference-of-thought refer to the human reflex to average minds
or make reference to extrinsic elements rather than meaning by its inherence as can be predicated effectively, and involves ‘reasoning with’, as it introduces ‘temporal and social trading’ elements over or clouding or compromising inherent intemporal veridicality. Incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and notional-disjointedness-as-of-reference-of-thought as such is patently wrong; as can be perceived from point-referencing superseding registry-worldviews/dimensions such that the ontological representation of the veridicality is different from the different perspectives of a recurrent-utter-institutionalised registry-worldview and the superseding institutionalised registry-worldview, and likewise with the ununiversalised and superseding universalised registry-worldviews, the non-positivism/medievalism and superseding positivistic registry-worldviews, and prospectively the procryptic and superseding deprocryptic registry-worldviews. It implies that ‘it isn’t veridically weird’ to articulate depths-of-meaning that may apparently seem idiosyncratic in our present illusion-of-the-present/present-consciousness registry-worldview, as the issue is not with such an articulation per se but rather ‘our defective apriorising–registry point-referencing threshold’, and implying rather the need for our psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring by distractive-alignment-to-reference-of-thought—of-apriorising/axiomatising/referencing. Fundamentally, incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and notional-disjointedness-as-of-reference-of-thought in human thinking as indicated above with the various institutional-cumulation/institutional-recomposure—{as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing—<perspective–ontological-normalcy/postconvergence-reflected—‘epistemicity–relativism–determinism’>} is superseded by reasoning-through/utterion; in transversality—<for-sublimating–existential-eventuating/denouement>—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-apriorising/axiomatising/referencing’ at-a-superseding-pedestal, and represented as of

More precisely, how can meaningfulness-and-teleology be represented in ‘a prospective apriorising–registry state’ which is ontologically more real contrasted to ‘a present retrospective apriorising–registry’, as meaningfulness-and-teleology ‘temporally seems’ to vary depending on the uninstitutionalised-threshold point-of-reference to imply at one moment it is intemporal and at another it is temporal? This fundamentally has to do with our dimensionality-of-sublimating projection irrespective of the uninstitutionalised-threshold, and calls for PEDESTALLED CONSTRUAL or PEDESTALLED DISAMBIGUATION to skew/deferential-formalisation-transference meaning towards the intemporal/longness disposition for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, as institutionalisation/intemporalisation. Pedestalled disambiguation thus involves at a given uninstitutionalised-threshold translating the ‘apparently prelogism-as-of-conviction,-in-profound-supererogation’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at or prelogic teleological finality of a temporal-disposition into its veridical preconverging-or-dementing–apriorising-psychologism as postlogic perversion-of-reference-of-thought-as-preconvergently-apriorising/axiomatising/referencing-in-

Technically, pedestalled disambiguation should involve reflecting/perspectivating/highlighting from the intemporal-disposition pedestal teleology finality/questioning mental-profoundness (deep candor) the relative longness/shortness-of-teleology of temporal-dispositions teleologies finalities/questioning mental-triteness (light candor), starting with slantedness pedestal finality/questioning (which is the psychopath’s insane/slantedness-fitment-roaming/drifting-cycle), and as it conjugates/inflects across other temporal pedestals teleology finalities/questioning (ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation). institutionalisation’s/intemporalisation’s intemporal-preservation-entropy-or-contiguity–or–ontological-preservation). For instance, a state of nature (recurrent-utter-uninstitutionalisation) application of the law variably making reference to circumstantial social power relations and spontaneously articulated notions of vices and virtues but no or poor universal rules (mob situations as well as social psychopathic situations will fall under such an interpretation as well). (2) Pedestalling (‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting pedestalling) articulates the relative grandor and virtuous consequence of the pedestalled supersedingness of the intemporal-disposition by its intemporal-preservation-entropy-or-contiguity–or–ontological-preservation that then leads to society’s temporal-to-intemporal cross-sectional ‘dimensionality-of-sublimating’ projection induced deference’; whether deference with regards to a superstition/belief system/religion, essences/universal-notions, positivist idealism/principles-rationalism (and prospectively rational-realism as of deprocripticism), involving a posture (institutionalised disposition) of the sort ‘the-say-that or it-is-said-that’ as ‘dimensionality-of-sublimating projection induced deference’ to the intemporal/longness disposition, for instance, ‘scientists say that’, ‘the Bible says that’, ‘it is said that one should not set foot in that forest as it will bring bad luck’, etc. This ‘the-say-that/it-is-said-that’ ‘dimensionality-of-sublimating projection induced deference’ explains why institutionalisation/intemporalisation has been happening across human history; whether
deference from personalised/animists beliefs to philosophical, religious and other social belief systems, deference from haphazard application of social rules to universal notions, laws and principles, deference from spirit-and-mystical-driven notions of nature and various alchemies to a modern scientific construct system. Hence the very place of the averageness/banality-of-human-thought-and-meaning in history has been for it to defer to superseding intemporal-disposition construal by ‘intemporal-prioritisation-of-reference-of-thought’–as-conflatedness -or-ontological-reprojecting pedestalling. There is no such thing as allowing thought-and-meaning to the whims of masses thinking but rather deference to ‘reality/veridicality predicating constructs’; as enabled abstractly and existentially by the human individuation intemporal-emanant-registry in superseding human individuations temporal-dispositions. ‘Intemporal-prioritisation-of-reference-of-thought’–as-conflatedness-or-ontological-reprojecting pedestalling carries the implication that reference-of-thought and meaningfulness is fundamentally/ontologically structured for ontological-normalcy/postconvergence intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, and hence the precedence of higher intemporal teleologies over low temporal teleologies of reference-of-thought and meaningfulness; and that subpar preconverging–dementating/structuring/paradigming of reference-of-thought and meaningfulness not for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation but rather as perversion-of-reference-of-thought-as-preconvergingly.

Supererogation of subpar reference-of-thought–categorical-imperatives/axioms/registry-teleology, of-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as uninstitutionalised-threshold is ‘perverted reference-of-thought and meaningfulness’ (<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag), and is ontologically-preconverging-or-

In the same vain, the outcrop of an organic-comprehension-thinking ‘intemporal-prioritisation-of\textsuperscript{14} reference-of-thought’–as-conflatedness\textsuperscript{13}–or-ontological-reprojecting conceptualisation of notional–deprocrepticism over procrypticism can only be construed within a formal institutionalised articulation not opened to ‘temporal/ordinary disposition contention’ as is the case with subject-matter constructs, but rather an institutionalised percolation-channelling\textsuperscript{<in-deferential-formalisation-transference>} exercise, so as to avoid temporal-dispositions denaturing\textsuperscript{15} as is the case with all formal constructs, which rather strive to uphold the

The establishment of institutionalisation/intemporalisation involves necessarily ‘delegated gatekeeping and institutionalisation/intemporalisation percolation-channelling<in-deferential-formalisation-transference> processes’ to uphold it thereafter with formalisms and officialdom surrounding it with respect to temporal-dispositions perversion-of- reference-of-thought<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation> and corruption dispositions. For instance, the institutionalisation/intemporalisation of ‘scientific chemistry’ comes with a ‘chemistry lingua’ accessible to those sharing and/or educated to uphold the meaningful frame, on the justification that they explain and account more about the material world than any other alternative. This justification goes on to make them formalism and officialdom percolation-channelling<in-deferential-formalisation-transference> to the extended-informality{susceptible-to-effecting-parsimony-as-of-shoddiness-and-

A failure to grasp the intellectual-analyst posture rather as a proxying-of-intrinsic-reality-as-

validation and that there-is-no-discretionary-construal-of-ontology/ontological-reality since
intrinsic reality is superseding of all mortals including the intellectual-analyst. Basically the
issue of the intellectual-analyst exercise in grasping such an intrinsic-reality is a proxying one
superseded by the causality as-to-projective-totallitative-implications-of-prospective- nonpresencing.-for-explicating-ontological-contiguity of reality ‘which in no way depends on any notion of the intellectual-analyst’s choice/luxury’ (as the intellectual-analyst might actually have by another individuation chose not an intemporal/ontological projection but a temporal posture ‘in moral/intellectual equivalence with temporal mental projections’ with nefarious temporal consequences). Basically, there is nothing like an intemporal temporality/shortness whereby there is any intemporality/longness in accommodating human temporality. Likewise, supposedly the intellectual-analyst was to come short in its intemporal projection or other universal values by temporal manipulation, it is very naïve to ‘reason and projecting temporally’ that eliciting such ‘an inductive-limitation (the-paradox-of-a-universal-rule-that-doesn’t-apply-universally-but-to-a-specific-circumstance-to-satisfy-a-temporal-urging)/gotcha-logic/suggestibility’ should undermine the essence of ontological/intemporal meaning which is ‘above a human intellectual proxying exercise to it’ and doesn’t depend on it to exist inherently, is nothing but temporal naivety. The reality of a round world doesn’t depend on its recognition of a medieval mindset/reference-of-thought for it to exist likewise with any veridicality/intrinsic-reality regarding psychopathy and a social manifestation whether it is palatable or not. Finally, temporal-dispositions as eliciting temporal vices-and-impediments are in no way qualified to contend about intemporal articulation/projection. In effect, such temporal pretence are nothing but totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-dispositions meant to satisfy the ‘mortals temporal preservation’ on the basis of ‘locale context logic’ and not ‘intemporal preservation as ontological veridicality with the potential for a grander human good’ on the basis of ‘universal implications’; as inevitably, ontologically, the resolution of

overlooking such ontological implications to the level of lowly temporal minds, lowly because
not universal-projecting, it won’t mean that the ontological reality will evaporate. It will
simply mean that the intellectual-analyst has failed in its intemporal/ontological projection,
more like Darwin doesn’t have the choice/luxury of deciding from his insight that evolution
doesn’t exist in placating any temporal mortals or Galileo doesn’t have the choice/luxury of
deciding from his insight that the world is not round in placating any temporal mortals, and if
they were to make that choice they affirm nothing more than their ‘aggrandised mortality’. The
blunt/incisive reality is that they being in that position to affirm intemporality/ontology/intrinsic-reality-as-providing-future universal-possibilities-for-the-

moral/intellectual posture is to ‘bluntly look down’ to the ‘little mortal creatures of
temporality’ and ‘shepherd the sheepishness-of-the-species’ to grander civilisational grounds. It is an ontological ‘moral and intellectual responsibility and privilege’, actually, to be in any such position, going by the eudaemonic-contemplation which is what ‘effectively grants existential moral and intellectual superiority’ and not naïve temporality/shortness accommodating conventioning constructs about any such pretence which is nothing more than temporal/the-mortal’s perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation as to preconverging-or-dementing–apriorising-psychologism; as any such is not the intemporal-disposition that started base-institutionalisation (to thwart recurrent-utter-uninstitutionalisation) through universalisation (to thwart ununiversalisation), positivism (to thwart non-positivism/medievalism), and prospectively its intemporal-disposition that will enable notional–deprocrypticism (to thwart procrypticism–or–disjointedness-as-of-reference-of-thought) and thereafter; the intemporal individuation as such projects in an ‘abstract eternity’ which is what allows for the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. Temporal-dispositions may not need to understand as of totalising–self-referencing-syncretising/present-consciousness/illusion-of-the-present for the pertinence of intrinsic reality to be established as it is preceding in ontological-normalcy/postconvergence, anyway, that is why it is ‘a registry-worldview’s/dimension’s prospective institutionalisation/intemporalisation secondnaturing exercise’, and ‘not human temporal-dispositions transformation exercise’ into intemporality! More like we don’t have issues of sorcery and so in the positivistic society as de-mentatively/structurally/paradigmatically the positivistic registry-worldview’s/dimension’s institutionalisation of categorical-imperatives/axioms/registry-teleology do not endemise/enculturate the notion and the social vices-and-impediments arising from it thereof. that the all too common ‘fixated traditional categorisation conceptualisation of reality’ doesn’t allow, as ontological-normalcy/postconvergence referentialism has the strength of overcoming the fundamental difficult issue of ephemerality (as priorly explained with the concept of unconscionability-drag) as ‘it enables mental-devising-representation contiguity in recomposuring’ across all institutional-cumulation/institutional-recomposure-{as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>}. The reason this is possible is that such a referential ontological-normalcy/postconvergence representation is not shaped to prioritise any registry-worldview/dimension as being inherently the absolute reference of thought, such as we unwittingly do with our representation of reality due to the illusion-of-the-present/present-consciousness (a massive drawback in grasping veridical ontological reality especially in the ephemeral social world). With ontological-normalcy/postconvergence referentialism we place reality as an abstract construct of oneness that is preceding-and-supersedes our-and-all temporal representations of meaning, and the exercise of articulating ontological/intemporal meaning then becomes ‘one of recomposuring how our temporal-and-all-temporal representations of meaning are recomposured to be internally coherent with the abstract ontological-normalcy/postconvergence referentialism ‘sense of oneness of preceding-and-superseding intemporal/ontological meaning’ as implied by the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation’. The insight we can thus garner is that in absolute terms veridical meaning as represented in ontological-normalcy/postconvergence is ‘a hypothetical abstraction’ of intemporal-preservation-entropy-or-contiguity–or–ontological-preservation (more like attaining the abstract but veridical purity in a field of study like mathematics) in ‘unwinding’ applicative ‘colour/emotion/temporal-frame/aesthetics/memetics/psychical-representation’ of manifest teleologic-articulations as ‘subexistence-in-existence/existence-as-of-its-mimetic-echoness/existence-in-
reverberation/existence-potency\textsuperscript{16}–sublimating–nascence, disclosed-from-prospective-epistemic-digression (deconstruction/ontological-reconstituting–as-to-conflatedness\textsuperscript{14} possibilities) –subexistence-in-existence being that which holds existential possibilities or existential potency for existential reality or ontological veridicality, as allowed by referential-depth or (‘allant’ or ‘fugue’ in French) or ‘natural emanant dynamic creative vitality/drive’, i.e. ontological-normalcy/postconvergence ‘unwinding’ as deconstruction/ontological-reconstituting–as-to-conflatedness\textsuperscript{14} (more like the subconscious is that which holds existential possibilities/existential potency for ontologically-veridical ontological-normalcy/postconvergence\textsuperscript{15} maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation consciousness reality/veridicality, or more like quantum-mechanics is actually an ontologically-veridical ontological-normalcy/postconvergence\textsuperscript{16} maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{16}—unenframed-conceptualisation about evasive atomic-level physical reality, more like musical and/or artistic creativity hermeneutics is the subexistence-in-existence possibilities or existence-as-of-its-mimetic-echoness/existence-in-reverberation or existence-potency\textsuperscript{16}–sublimating–nascence, disclosed-from-prospective-epistemic-digression for ontologically-veridical ontological-normalcy/postconvergence ‘unwinding’ concrete music and/or art production). Thereafter, the ontological exercise is about having ontological-normalcy/postconvergence (intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) as ‘an ontologically-veridical abstract and infallible referencing/correction-tool’ enabling dynamic recomposuring projecting-and-reflecting: on the one hand, candoring/prelogism /organic-comprehension-thinking ontologising, or on the other hand, decandoring/distractive-alignment-to-reference-of-thought<of-apriorising/axiomatising/referencing> /threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation <as-to–‘attendant-intradimensional’–prospectively>
alchemic-like-reasoning, circumventive/distractive-temporal-prioritisation-of-reference-of-thought, shortness-of-register-of-meaningfulness-and-teleology; which allows the human mind to project beyond just its illusion-of-the-present/present-consciousness/epistemic-totalising~self-referencing-syncetising/mirage, and truly have a fulsome picture of universals. Postdication (as an abstract and infallible referencing/correction-tool) allows for the ‘ontological liberation of human mental-devising-representation (of meaning) from any present {cumulated/recomposured}-consciousness-awareness-teleology’ (whether in the bigger scheme of reference of specific consciousness-awareness-teleologies like recurrent-utter-uninstitutionalisation–base-institutionalisation, ununiversalisation-universalisation, non-positivism/medievalism-positivism, and prospectively procrypticism-deprocrypticism) as ‘postdication doesn’t tie the mental-devising-representation process to any of the above registry-worldview/dimension habituated {cumulated/recomposured}-consciousness-awareness-teleology’ (given that these consciousness-awareness-teleologies are the recomposured outcome of ‘incomplete/incremental/temporal-accommodation human brain limited-mentation-capacity-deepening’) but ‘rather ties the mental-devising-representation process to the abstract and infallible ontological-normalcy/postconvergence ontological-veridicality referencing/correction-tool’ (given that this allows for complete/utter understanding by the very nature of the ontological-normalcy/postconvergence notion, of course in an ‘abstract and evasive caricature’), hence overcoming the illusion-of-the-present/present-consciousness inherent in any {cumulated/recomposured}-consciousness-awareness-teleology representing the mentally devised state of any registry-worldview/dimension. Postdication is all about an ontological-normalcy/postconvergence institutionalisation/intemporalisation-constraining for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as de-mentation—supererogatory—ontological—de-mentation—or-dialectical—de-mentation—stranding-or-attributive-dialectics
hermeneutically/reprojectively/supererogatingly/zeroingly-educing-human–meaningfulness-and-teleology\textsuperscript{100}–into-the-existentialism-becoming of personhoods-and-socialhood-formation (existential-storying-in-contiguity). An analogical case in point will be ontological theory-of-relativity or quantum-mechanics wherein the abstractions go beyond our habitual mental-devising-representation of meaning as in the positivist registry-worldview’s/dimension’s \{cumulated/recomposured\}-consciousness-awareness-teleology\textsuperscript{100}. However, the bigger picture is that if prior/superseded institutional-cumulation/institutional-recomposure\textsuperscript{〈as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing–〈perspective–ontological-normalcy/postconvergence-reflected–‘epistemicity-relativism-determinism’〉〉} have effectively occurred and so, counterintuitively to their natural \{cumulated/recomposured\}-consciousness-awareness-teleologies, as anticipated by postdication right up to our present positivistic institutionalisation/intemporalisation owns \{cumulated/recomposured\}-consciousness-awareness-teleology\textsuperscript{100}; there isn’t any particular ontological reason for intemporal/ontological meaning not to be construed in ontological-normalcy/postconvergence (postdication) as more veridically/ontologically real, beyond and counterintuitively to the positivistic mind’s temporal \{cumulated/recomposured\}-consciousness-awareness-teleology\textsuperscript{100} (even if it is unintelligible/existentially-suprastructural to it). Such counter-intuitiveness arises because a prospective transcendent transcendental psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring implied by postdication places the prior psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring (in this case positivistic institutionalisation/intemporalisation) existentialism/full-existential-depth-implications personhoods-and-socialhood-formation in question/jeopardy. But then it is not reality that caves in, it is ‘the mortal’ with a renewed psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring at its uninstitutionalised-threshold\textsuperscript{103} involving organic-comprehension-thinking (organicalism/‘intemporal-prioritisation-of-reference-of-thought’–as-
meaningfulness-and-teleology-ontologising from the prospective registry-worldview/dimension’. For instance, where a positivist mind might see a forest as a subject of scientific inquiry/understanding, a non-positivist/medieval mindset/ reference-of-thought might rather see a mentally unconscious man going into the ‘evil forest’. Such ‘existential parochial perspectives’ will arise anyway from procrysticism viewed from deprocrysticism, though of a different nature than the example expressed above. In that sense, the deprocrystic mind might actually seem ridiculous in the procrystic registry-worldview/dimension but ‘there should be no temptation to want to appear great or adjust in such a perversion-of reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation perspective but rather to make it irrelevant’ otherwise the deprocrystic mind compromises the essence of its purpose, just as a positivistic mind going by the ‘evil forest’ comparison ‘cannot afford to compromise its positivist stance’ by trying ‘to be wonderful’ in a non-positivism/medievalism perspective that is rather ‘in want of transcendence-and-sublimity/sublimation/supererogatory—de-mentativity’; as it is exactly because the temporal non-positivism/medievalism reference is defective that it is being transcended. This speaks to the specificity of the would-be intellectualism involved in a transcendental construct, as different from just intellectualism as mere-institutionalised-being-and-craft; it carries the element of knowledge not only as an abstract intradimensional conceptual construct but in its fullness with existential implications and insights of the dialecticism and psychoanalytic-reorientations involved in all transcendence-and-sublimity/sublimation/supererogatory—de-mentativity, requiring that such an intellectual analyst be of presencing—absolutising-identitive-constitutedness consummated/forfeiting posture’ in transversality-for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing’ with temporal meaningful frames which do not define
and are not a point-of-reference to intemporal/ontological meaningfulness’ with the registry-worldview/dimension in need of transcendence-and-sublimity/sublimation/supererogatory-demmentativity (procrypticism) to avoid dividing its meaningful-referencing instead of taking it prospectively (deprocrypticism), for instance, medieval intellectuals like Galileo and Rousseau have to be of ‘presencing—absolutising-identitive-constitutedness\textsuperscript{14} consummated/forfeiting posture’ in transversality\textsuperscript{<for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing’} with temporal meaningful frames which do not define and are not a point-of-reference to intemporal/ontological meaningfulness’ with the medieval registry-worldview to generate prospective positivistic registry-worldview which at their time is not intelligible to a medieval take (categorical-imperatives/axioms/registry-teleology\textsuperscript{100}, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) on meaningfulness! This can be further expanded on as follows. The intradimensional meaningful frame is ‘an abstraction to the de-mentative/structural/paradigmatic conceptual limits (uninstitutionalised-threshold\textsuperscript{11}) of the reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{100}, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of that registry-worldview/dimension, which do not supersede/precede/override/undermine intrinsic-reality/ontology; and the issue that then arises is that it doesn’t carries the meaningfulness sought for transcendentally. On the other hand, transdimensional/transcendental meaningfulness-and-teleology\textsuperscript{100} is precedingness/supersedingness/ascendency accruing as ‘existential psychoanalytic ontological form (in full blossoming of the transcending dimension)’ beyond the superseded intradimensional preconverging–de-mentating/structuring/paradigming conception limits (uninstitutionalised-threshold\textsuperscript{11}) of the reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{100}, for-intemporal-preservation-entropy-or-contiguity–
or-ontological-preservation of that registry-worldview/dimension (which itself had been the outcome of a preceding existential psychoanalytic ontological form). Memetism as to suprastructural meaningfulness-and-teleology will refer to the projective conceptualisation of meaningfulness-and-teleology beyond and superseding an intradimensional registry-worldview abstraction scope to the scope of transdimensional/transcendental existential psychoanalytic ontological form (in full blossoming of the transcending dimension with its existentialism/full-existential-depth-implications personhoods-and-socialhood-formation); highlighting as ontologically wrong any relation to intradimensional meaningfulness as (intemporally/ontologically)-sanctuous-by-reflex (as this wrongly undermines the de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) of temporal-dispositions-postlogic-backtracking-<iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’>-subknowledging /mimicking-set-of-narratives, and wrongly leads to their <amplituding/formative-epistemicity>totalising-self-referencing-syncretising-as-straight/candored) at that registry-worldview’s/dimension’s uninstitutionalised-threshold requiring prospective memetic-reordering. (As a side note, this will explain while ‘referentialism’ in contrast to ‘categorisation’ is the appropriate knowledge-cadre for such a more or less deconstructive articulation in ontological-normalcy/postconvergence and suprastructural, as is the case with this paper, by the fact of the need for a requisite ‘habitation-into and repeatability-from-different-textual-meaningfulness-perspectives’ that is necessary to get-to-and-grasp not only an explanation but critically as well the requisite psychoanalytic-state of a construed existential psychoanalytic ontological form, in full blossoming of the transcending dimension, as ontological meaningfulness.) Finally, it is just a matter of fact going by the institutional-cumulation/institutional-recomposure-(as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>) process that
coming from an intemporal-disposition/ontological skewed (‘intemporality\(^{53}\)-asymmetric-subsumption-of-temporality\(^{10}\)’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity) point-of-referencing. It further holds a promise that goes beyond our notions of \(^{8}\)reference-of-thought and meaningfulness (as rather intradimensional or a registry-worldview constructs), and arrives at the grander notion of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument which grasp should enable greater human transcendental possibilities. Of course, ontologically (i.e. ‘the-Good/understanding’ contrasted with ‘good-natured/impression-driven’) the bigger issue is how do our development and institutionalisation/intemporalisation of true knowledge ‘save us from potent-temporality\(^{20}\) and its vices-and-impediments\(^{106}\) with respect to ‘socially-perceived-value as of social-stake-contention-or-confliction’, rather than how do we over-idealise ourselves and thus fail to be preemptive (as the ‘human cross-sectional mental equilibrium disposition’, at any successive transcendence-and-sublimity/sublimation/supererogatory-de-mentativity/institutionalisation in the ‘human essential notional—firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence> equilibrium nature which is ontologically true’, under-accounts for ‘temporal-nature which is not ontologically true’, and over-accounts for ‘intemporality /longness nature which is equally not ontologically true’ –the insight for this is that institutionalisation/intemporalisation is a psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring tool, it doesn’t transform temporal-dispositions which is the exclusive purview of individual sense of dimensionality-of-sublimating \(^{11}\) (<amplituding/formative>supererogatory-de-mentativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation) and by its very nature is ‘beyond a philosophical transformation
exercise’ as the latter exercise is mainly to ‘construct articulations for secondnaturing’ at best (articulate new institutionalisation/intemporalisation deterministic-and-operant possibilities for skewing (‘intemporality\textsuperscript{-asymmetric-subsumption-of-temporality}’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity)/deferential-formalisation-transference towards intemporal-preservation-entropy-or-contiguity–or–ontological-preservation), hence the need to refer analytically to human notional-firstnatures—temporal-to-intemporal-dispositions—so-construed-as-from-perspective–ontological-normalcy/postconvergence—

By extension this explains how the notion of ‘knowledge problem’ is to be apprehended transcendentally/transdimensionally/interdimensionally (as a contiguous intemporal ontological construct). Commonly, intradimensionally, the knowledge problem as ‘social problem/questioning’ is an ‘intradimensional focus’ around logical operation/processing/contention based on the reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of the registry-worldview/dimension ‘towards resolution’, with the temporal defect of possible denaturing of such reference-of-thought–categorical-

or—ontological-preservation undermining the intemporal-preservation-entropy-or-contiguity—

(preceding/superseding intrinsic reality) insight points to a depth-of-focus of the knowledge
problem as ‘social problem/questioning’ on the ‘intemporal-preservation-entropy’ itself and—

Thus the ontological veridicality of the registry-worldview’s/dimension’s perversion-of-reference-of-thought<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation at it uninstitutionalised-threshold is articulated, with contention then being about reflecting/perspectivating/highlighting and aetiologising/ontologising this, even if it is intradimensionally unintelligible/existentially-suprastructural and unpalatable (consider in this regard, the development of positivism from non-positivism/medievalism). It should be noted then that the postconverging–de-mentating/structuring/paradigming is an intemporal/ontological projection referencing beyond-and-non-implicative of an equivalence between ('intemporal-prioritisation-of-reference-of-thought’–as-conflatedness’–or-ontological-reprojecting pedestalling) with the intradimensional ‘consciousness-awareness frame-of–social-stake-contention-or-confliction’ of the temporal/preconverging-ordementing’–apriorising-psychologism dimension, more like the positivist ontological biology and medicine postconverging–de-mentating/structuring/paradigming is beyond/supersedes-and-is-a-non-implication of an equivalence with the ‘consciousness-awareness frame-of–social-stake-contention-or-confliction’ of say non-positivism/medievalism temporal value dispositions with respect to the notion of disease, that is, it’s point is to define an altogether different and superseding meaningful frame or postconverging–de-mentating/structuring/paradigming and is not involved in an idle exercise of elevating and articulating its meaning in terms–as-of-axiomatic-construct of and implying an equivalence with non-positivism/medievalism meaningfulness. That is equally the relation between a transcending notional–deprocrypticism

rather as tending to accrue towards a specific-individuation-aetiology/characteral-disposition
whether of low or higher teleology; hence any such ‘storied/articulated’ absolutely specific-individuation-aetiologies are caricatural of the realistic nature of individuals as ‘receptacles of individuation aetiologies’, though all such storied/narrated specific individuation aetiologies represent the full possibilities of any and all individuals ‘as receptacles of individuation aetiologies’). By ‘higher teleologies’ is meant ‘existential disposition’ which is ‘in essence intemporally preserving solipsistically/emanantly/becomingly’ (and so, by a profound-supererogation disposition that is beyond just one institutionalised/intemporalised registry-worldview/dimension but abstractly and supererogatorily across all transcendental retrospective-and-prospective institutionalisation/intemporalisation registry-worldviews/dimensions as so-reflected by dimensionality-of-sublimating supererogatory–demmentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation); with the implication that the highest teleologies of Base-institutionalisation (as percolation-channelling-<in-deferential-formalisation-transference> undermining of recurrent-utter-uninstitutionalisation and its vices-and-impediments) –equivocates as of profound-supererogation to the highest teleologies of universalisation (as percolation-channelling-<in-deferential-formalisation-transference> undermining of ununiversalisation and its vices-and-impediments) –equivocates as of profound-supererogation to the highest teleologies of Positivism (as percolation-channelling-<in-deferential-formalisation-transference> undermining of non-positivism/medievalism and its vices-and-impediments) –and prospectively, equivocates as of profound-supererogation to the highest teleologies of notional–deprocrypticism (as percolation-channelling-<in-deferential-formalisation-transference> undermining of procrypticism–or–disjointedness-as-of- reference-of-thought and its vices-and-impediments). It should thus be noted as such that ‘higher teleologies’ are
‘equivalences of existential’ (in terms–as-of-axiomatic-construct of notional–firstnaturedness—
temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-
normalcy/postconvergence—), and not equivalences of institutionalisation/intemporalisation
levels. That is, being in a transcended institutionalised/intemporalised registry-worldview/dimension (internalisation and formalisation induced as a secondnature) doesn’t
equivocate as highest teleologies to the existential projection that ‘had the vision’ in the
prior/superseded subknowledging /mimicking/untranscended registry-worldview/dimension
(‘with-no-elicited-positive-opportunism—of-social-functioning-and-accordance /much-more-

unintelligible/existentially-suprastructural to the prior/superseded untranscended/preconverging-or-dementing —apriorising-psychologism registry-worldview/dimension. So in terms–as-of-axiomatic-construct of ‘higher teleologies’
(emphasising the existential intemporal-disposition as a seed-of-virtue over
institutionalisation/intemporalisation outcome, which the former enables) being in an
institutionalised/intemporalised positivistic world doesn’t necessarily equivocate us to the
Galileos, Descarteses, Newtons, Leibnizes, Rousseaux, Darwins … behind the articulation-and-
upholding-for-percolation-channelling—<in-deferential-formalisation-transference> of a
positivistic registry-worldview/dimension (even though together with them we all may
recognise and operate within a positivistic world). That is, the ‘existential profound-
supererogating that enables the articulation-and-upholding-for-percolation-channelling—<in-
deferential-formalisation-transference> of a transcending registry-worldview/dimension as to
dimensionality-of-sublimating —<amplituding/formative> supererogatory—de-
mentativeness/epistemic-growth-or-conflatedness/transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation’ is the higher teleology\(^{100}\) ‘over the mere-institutionalised-being-and-craft’ in such a transcended registry-worldview/dimension. And why is this distinction critical? Because prospective (intemporality\(^{53}\) ) need for prospective institutionalisation/intemporalisation/transcendence for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation necessarily calls upon the (intemporal)-kind that articulated-and-upheld-for-percolation-channelling-\(<\text{in-deferential-formalisation-transference}>\) the superseding institutionalisation/intemporalisation/transcendence; and the condition of mere-institutionalised-being-and-craft in the untranscended registry-worldview/dimension doesn’t speak of a disposition to prospectively articulate-and-uphold-for-percolation-channelling-\(<\text{in-deferential-formalisation-transference}>\) an intemporally requisite prospective registry-worldview/dimension institutionalisation/intemporalisation that is intemporally preserving (in ontological-normalcy/postconvergence), highlighting the veridicality and need for ‘human registries-disambiguation at uninstitutionalised-threshold\(^{103}\)’, and as being notional-firstnaturedness—temporal-to-intemporal-dispositions-\(<\text{so-construed-as-from-perspective–ontological-normalcy/postconvergence}>\). The notion of higher teleologies as such is specific to the human species in holding that beyond just ‘a physical animal passing of specie generational succession’ for survival and optimising-specie-flourishing, with higher teleologies there is ‘an even more critical passing of generational succession’ as memetic-skewing-or-reordering/philo-cultural optimising of possibilities of the species towards intemporal virtue as civilisational over temporal vices-and-impediments\(^{106}\) (philo-cultural and not cultural, because philosophy notionally supersedes and defines cultural possibilities); and so, by virtue of the exceptional possibility, in time and space, of human transformation/transcendence by philo-cultural skewing (‘intemporality\(^{53}\)-asymmetric-subsumption-of-temporality\(^{99}\)’, for relative
transcendence-and-sublimity/sublimation/supererogatory—de-mentativity to take us from an uninstitutionalised animal to now a positivistic one and prospectively a deprocryptic one; it is difficult to contemplate ‘existential success/idealism’ from a knowledge/ontological perspective (in contrast to a temporal <amplituding/formative> wooden-language ⟨imbued—averaging-of-thought<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable—void ’-with-regards-to-prospective-apriorising-implications⟩ perspective) without identifying that intemporal-disposition in contrast to temporal mental-dispositions is what is ‘truly existential success’ as the intemporal-disposition is very much what allows for human transcendence-and-sublimity/sublimation/supererogatory—de-mentativity and subsequent institutionalisation/intemporalisation, much as the distilling process allows for the lightness of hydrocarbons, ‘where lightness is virtue’. Basically, it can be said that without the human quality of the ‘aetiologisation/ontological-escalation individuation of the intemporal’ we’ll still be probably in caves. Of course, such a depth-and-projecting-scale-of-thought requires an appreciation of the ‘percolative impact’ of the ‘firstnature/intemporal’ (which is not readily available to the immediacy/shortness-of-register-of—meaningfulness-and-teleology of minds of temporal-dispositions). For instance, men did not ‘by magic’ develop the possibilities of civilisations whether the stone, bronze, copper, iron ages, the antiquities, the medieval and today modern positivism; without a corresponding ‘psychoanalytic liberation’ that allowed for such a development induced by philosophical revolution, however, prosaic the philosophy. For instance, it is not by magic that science and vaccines were not developed in antiquities but were developed in early industrial Europe, as the ‘psychoanalytic liberation’ of the ideas expressed by the Descartes and Galileos ‘shaped subsequent common minds’ to be inclined to rationalise profoundly their grasp of physical phenomena like Pasteur and others. Likewise, the philosophical development in antiquities not being ‘profoundly applicative enough’ and more or less cultic (available more or less to a
priestly class and poorly universalising in many such slaving-and-class society), such a psychoanalytic liberation percolation-channelling\(<\text{in-deferential-formalisation-transference}\) effect could hardly be obtained from say Aristotle's writings (granted, it percolated into the medieval Arabic and European worlds), and in addition the 'intellectualism' was more like contained in a 'culic class', and hardly the bread and butter of commoners (and even then, Athens was outlying without scale and time and the sufficient lack of chaos and war). The reason for a registry-worldview’s/dimension’s institutionalisation/intemporalisation transcendence-and-
sublimity/sublimation/supererogatory~de-mentativity from the superstitious/religion, universal-notions/essences, principles-rationalism/positivist-idealism and then the rational-realism of notional–deprocrypticism as of ratiocination/ratiocontiguity as nondisjointing is that psychoanalytically/memetically/meaningfully the human psyche is inclined/shaped/desires to find an all-in-all-encompassing-response (magic wand) to explain its world, but then realises across institutional-cumulation/institutional-recomposure-{as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-{perspective–ontological-normalcy/postconvergence-reflected-epistemicity-relativism-determinism}>) that successive introduction of more and more ‘realistic’ conceptualisations enable a grander \[\text{amplituding/formative–epistemicity>causality as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity} \] and grasp of its world. Further, what differentiates principles-rationalism/positivist-idealism and the rational-realism of notional–deprocrypticism as of ratiocination/ratiocontiguity as nondisjointing is that the ‘institutionalising threshold for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation’ of the latter introduces the disambiguation of dispositions in meaning construal and subsequent logical operation/processing/contention at \[\text{reference-of-thought} \] (on the basis that human dispositions are temporal-to-intemporal/shortness-to-longness; with human registers/registry-teleologies involving subknowledging\[]–impulse/compulsive-dementing\[] /slantedness/psychopath, ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation). It should be noted that while the prior/superseded transcendence-and-sublimity/sublimation/supererogatory—de-mentativity to positivistic institutionalisations have been rather incremental-to-utter, it is likely that procryptic to deprocryptic transcendence-and-sublimity/sublimation/supererogatory—de-mentativity is most probably an outrightly blunt/incisive utter construct, and why, because higher
notional-disjointedness-as-of-reference-of-thought even though such incrementalism-in-relative-ontological-incompleteness—enframed-conceptualisation and notional-disjointedness-as-of-reference-of-thought might later arise in social integration from institutionalisation/intemporalisation percolation-channelling<-in-deferential-formalisation-transference> following an intellectually utter and decisive articulation, or possibly with successive other such intellectual articulations, of the perpetuation-of-notional-deprocrypticism transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. Methodologically, it should draw on phenomenological-and-hermeneutic-insights, as with this research paper, and extending into a ‘creative existentialism (full-existential-depth-implications) storying construal’ as the ‘ontologically effective, applicative and operant articulation insight’ to this background phenomenological-and-hermeneutic-insights. Its highlighting of such a transcendence-and-sublimity/sublimation/supererogatory-de-mentativity should be similar to say a literary work like Things Fall Apart by Chinua Achebe even though the latter is rather more about cultural-diffusion-from-Western-philosophical-transcendence which positivistic transcendence-and-sublimity/sublimation/supererogatory-de-mentativity integration into the society’s institutionalisation/intemporalisation percolation-channelling<-in-deferential-formalisation-transference> undermines-psychoanalytically/psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring the society’s existentialism (full-existential-depth-implications) personhoods-and-socialhood-formation allowing for positivistic transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. But then unlike Things Fall Apart, such a perpetuation-of-notional-deprocrypticism transcendence-and-sublimity/sublimation/supererogatory-de-mentativity being not a cultural-diffusion-from-another-society’s-philosophical-transcendence but rather a universal-human-intradimensional-philosophical-transcendence can be creatively devised as being in substitution to an ‘abstract cultural-diffusion-from-another-society’s-philosophical-transcendence

However, the latter storying will have to be more deterministic, operant and of aesthetic applicability, unlike just a simple literary work, with strong existentialism/full-existential-depth-implications insights with respect to percolation-channelling-in-deferential-<in-deferential-formalisation-transference> effects as predication/deferred-predication and application/deferred-application to human and social issues based on notional—firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective—ontological-normalcy/postconvergence—conceptual articulation as

the bigger scheme of things, such a ‘creative existentialism (full-existential-depth-implications) storying construal’ on perpetuation-of-notional-deprocrypticism re-elaborated to a ‘creative existentialism (full-existential-depth-implications) storying construal’ of all the transcendence-and-sublimity/sublimation/supererogatory–de-mentativity provides an even more profound and emanant-insight understanding of the anthropological continuity/anthropopsychology and the proper place of the present positivistic mind in the bigger scheme, and what is prospectively implied, as a perpetuation-of-notional-deprocrypticism transcendence-and-sublimity/sublimation/supererogatory–de-mentativity). Another ontological element of the perpetuation-of-notional-deprocrypticism transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is that it is ‘weakly positive opportunistic’ to the cross-section of the social construct. Prior/superseded transcendence-and-sublimity/sublimation/supererogatory–de-mentativity are relatively ‘strongly positive opportunistic’ with base-institutionalisation transcendence-and-sublimity/sublimation/supererogatory–de-mentativity from recurrent-utter-uninstitutionalisation being the strongest in its positive-opportunism—of-social-functioning-and-accordance as the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of: ‘organising rules/principles’/base-institutionalisation are opportunistically critical for temporal direct/immediate survival itself, i.e. such an uninstitutionalised state with uncertainty, lack-of-knowledge about the environment and relative lawlessness ‘focuses the individual’s mind’ to adhere to any dependable organised rules/principles/laws, even where such organising rules/principles/laws are bad so long as they are predictable, be it circumstantially (and effectively, base-institutionalisation is a state where such organising/rules/principles/laws are constantly being remade competitively with respect to survival-possibilities and power-relations, but on the other hand base-institutionalisation tends

sublimity/sublimation/supererogatory—de-mentativity in the long run due to ‘holding-on-to-the-

more likely than not, in such human society in ‘clanic turbulence’ base-psychoanalytic-
unshackling/memetic-reordering/institutional-recomposuring is a highly-diffusionary-juggling-

social intemporal-philosophical transcending, but also involving on the rare occasion a lopsided
diffusion from an altogether different and dominant cultural grouping); those of ‘projecting
rules/principles’ or 10 universalisation are less opportunistically critical for temporal
direct/immediate survival but are relatively vital and extend the ambits of the former; while
those of ‘empirical rules/principles’/positivism are even less positive-opportunistically critical
for temporal direct/immediate for immediate/direct survival but relatively critical for
flourishing (science, human rights, democracy, etc.). So these institutionalisations

statistically to individuals on the cross-section of the social-construct. An intemporal
disposition as ontological projecting that may elicit a sense of positive-opportunism—of-social-
functioning-and-accordance for survival itself with base-institutionalisation will not
necessarily have the same adherence effect on the cross-section of the social-construct when it
comes to a transcendence-and-sublimity/sublimation/supererogatory–de-mentativity which
temporal directness/immediacy for ‘individuals sense of survival-and-flourishing’ is not so
obvious but for its abstract ontological veridicality and abstract intemporal transformation
implications as is the case with deprocrypticism; but is rendered possible because of the
relatively ‘strong preset institutionalisation/intemporalisation percolation-channelling-<in-
deferential-formalisation-transference> for transcendence-and-
sublimity/sublimation/supererogatory–de-mentativity’ (on the basis of its untenability/internal-
contradiction/internal-incoherence/institutional-constraining generation capacity); more like it
would be fair to say that many an abstract and boring scientific efforts do not necessarily appeal
temporarily but for the strongly preset institutionalisation/intemporalisation percolation-
channelling-<in-deferential-formalisation-transference> for their social integration. Basically,
with transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as temporal
directness/immediacy weaken on the one hand, the element of untenability/internal-
contradiction/internal-incoherence/institutional-constraining (with institutional percolation-channelling-in-deferential-formalisation-transference> for transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity) in assuring prospective transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity strengthens. To sum up, this highlights the ‘temporal existentialism/full-existential-depth-implications practicality aspect’ involved in all human transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity. That is, transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity is more of a human-mentation-capacity driven construct and its mundane recognition is not inherently by its supposed virtue (given that survival-and-flourishing, and not veracity/ontological-pertinence, are the more immediate/direct basis for the human temporal drive). To the extent that transcendence-and-sublimity/sublimation/suprerogatory-de-mentativity highlights critically that it is what is the best enabler for survival-and-flourishing then it is a force of social transformation. Equally, an ontologically-veridical but not immediately/directly survival-and-flourishing will not, with regards to human temporal practicality, by mere ontological-veridicality be a basis for its social integration, if the insight that it provides a grander survival-and-flourishing scheme isn’t immediately palpable. As in this case human temporal practicality disposition is perfectly inclined to threshold at its registry-worldview/dimension uninstitutionalised-threshold. But then with an increasing cerebral grasp of our nature and our surrounding world rather than just passive endurers of nature-in-action, we can fairly anticipate and supersede intellectually our human temporal practicality dispositions, in this case with regards to deprocrypticism, and attain prospective knowledge-and-virtue generally. Meaning (defined previously as what defines/predicates value, thought and action) is actually a referential memetic construct in the referential exercise of the entropic preservation of preceding-intemporality/intrinsic-reality as validated by amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective-

suprastructural-meaningfulness implying that meaning is in fact a ‘human mental devising

validation/veridicality by its

ontological-contiguity in showing it is proxying to ‘abstract and inherent ontology/intrinsic-
reality/veridicality’ which is a preceding/superseding notion (postconvergence) to our mental
devising of meaning; explaining why we adjust our meaning model/memetic-

demonstrated to be flawed at successive uninstitutionalised-threshold whether from
recurrent-utter-institutionalised to base-institutionalised, ununiversalised to

More than just an exercise of grasping the possibilities of human transcendence-and-
sublimity/sublimation/supererogatory—de-mentativity, it is critical that for future transcendence-and-sublimity/sublimation/supererogatory—de-mentativity we don’t confuse the development of a ‘banal/temporal/averaging-of-temporal-thoughts’ notion in ‘our shortness of the lives of mortals’ (80 or 100 years or so) as defining what is ‘existential idealism/success’ on the basis of such ‘mental shortness’ (which isn’t even solipsistically/emanantly/becomingly the intemporal responsibility for the transcendence-and-sublimity/sublimation/supererogatory—de-mentativity that enabled its world, the positive worldview from non-positivism/medievalism, but has been rather ‘institutionalised and secondnatured there’, and so is ‘philosophically irresponsible’ prospectively with respect to the bigger scheme of things regarding transcendence-and-sublimity/sublimation/supererogatory—de-mentativity/prospective-institutionalisation, necessarily so when inclined to an extricatory temporal-disposition that is not solipsistically intemporally responsible). Intellectually and knowledge-wise, the articulation of ‘existential idealism/success’ must be the exclusive purview of the aetiological individuation of the intemporal-disposition whose organic-comprehension-thinking (organicalism/intemporal-prioritisation-of-‘reference-of-thought’–as-conflatedness—or-ontological-reprojecting/longness-of-register-of—meaningfulness-and-teleology’s universal projection/intemporality keeps alive the notion of existential idealism/success as long as from its intemporal-disposition that started base-institutionalisation (to thwart recurrent-utter-uninstitutionalisation) through universalisation (to thwart ununiversalisation), positivism (to thwart non-positivism/medievalism), and prospectively its intemporal-disposition that will enable notional–deprocripticism (to thwart procripticism–or–disjointedness-as-of-reference-of-thought) and thereafter; the intemporal mind as such projects in an ‘abstract eternality’ that is what allows for the intemporal-preservation-entropy-or-contiguity—or-ontological-preservation. In the bigger scheme of things, all the vices-and-impediments of the successive registry-

implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity construct with corresponding virtuous consequences of knowledge or lack-of-knowledge thereof). It is critical for the sake of the temporal mortal that we are, not to be allowed to be our own God; that is exactly what creates transcendental possibilities, otherwise we syncretise and preserve and articulate our temporality/shortness as being intemporal! (ii) ‘Intellectual solipsistic/emanant irresponsibility’ referring to ‘intellectual idealism’ success in conceiving intemporal meaning but failure in preserving intemporal meaning from ‘temporal mimicking, denaturing’ and subknowledging’ with corresponding poor temporal-dispositions orientations/registry-worldview over that intemporal meaningfulness in relation to the bigger picture of human/social progress postconverging–de-mentating/structuring/paradigming. While intellectual ontological/intemporal meaningfulness may strive to articulate a universal idealism/intemporal projection, it is rather naïve to operate on the ‘romantic’ basis that universal idealism/intemporal projection is the sole disposition of humans as temporal dispositions like postlogism-slantedness (the psychopath), ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation are endemically part and parcel of the reality of human dispositions; and so, as a matter of fact on a simple ‘scientific basis of determining first principles’ and not necessarily to stigmatise, as reality works on the basis that ‘what is, is what is!’ That then being the case, what then is the relevant question is how do we ensure by institutionalisation/intemporalisation (based on the-Good/understanding/notional-knowledge-reification-gesturing-in-prospective.psychologismic-apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}-conflatedness-in-{preconverging-disentailment-by}-postconverging-entailment/<amplituding-formative-epistemicity>causality-as-to-projective-totalitative-
implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity and not impression/good-naturedness/wishfulness vagueness) the supersedingness of the intemporal-disposition-worldview (as ontological and upholding virtue in the medium to long perspective) over the cross-section of human mental notional-firstnaturesdness—temporal-to-intemporal-dispositions—so-constructed-as-from-perspective—ontological-normalcy/postconvergence s, i.e. secondnaturings as formalisation and internalisation. For instance, if men were of an intemporal-disposition we will only need ‘moral philosophy’ and ‘no law’ as the institutionalising principle of the law is a tacit recognition that realistically we need ‘dominating superseding artifices’ or ‘institutions and their rules and narratives’ whether the human subjects have a grasp of the ‘philosophical’ universal end purpose or not). This is the attitude that preserves the virtue inherent in the intemporal conceptualisation of meaning and ‘not any temporal romantic idealism’ which only leads to perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-suppererogation that goes on to undermine directly or by sub-par-or-formulaic-association-or-temporal-or-alibi conventioning-rationalising conjugations the virtue in knowledge, and so in particular in the ‘extended-informality—susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to—meaningfulness-and-teleology’ (informal settings) where the constraining social universal-transparency—transparency-of-totalising-entailing-as-to-entailing—amplituding/formative—epistemicity totalising—in-relative-ontological-completeness (usually introduced in formal settings) is not available. Hence intellectual responsibility warrants that the intellectual exercise (as intemporal-preservation-entropy-or-contiguity—or—ontological-preservation) involves both a construction of the intemporal ideal and equally a stifling of the possibilities of perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-suppererogation as to preconverging-
or-dementing apriorising-psychologism. This involves avoiding the naivety of articulating meaning only in the sense of the intemporal ideal but including a constraining and notional–firstnaturedness—temporal-to-intemporal-dispositions—disambiguating realism that upholds/preserves intemporality /longness and stifles temporal-dispositions perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-innonconviction/madeupness/bottomlining-as-to-shallow-supererogation inclinations. Such an approach is known as the ‘knowledge-notionalisation’ or knowledge as a continuum from ‘the ignorances/desublimation’/temporal-dispositions to knowledge/intemporality which then allows for scrutinising and preempting ‘the ignorances/desublimation’/temporal-dispositions, i.e. apprehending not only intemporal implications of any knowledge construct, but being transversally/logically-incongruent preemptive to potential temporal undermining of that intemporal idealism construct). ‘Intemporal and temporal disjuncture’ basically refers to the fact that in the elaboration of conventioning with respect to ontological-veridicality with regards to social-stake-contention-or-confliction both the intemporal and temporal-dispositions are preservational in their finalities, i.e. temporal-dispositions do not transcend philosophically but by untenability/internal-contradiction/internal-incoherence/institutional-constraining, and it is vague and naïve to intemporally/ontologically engage at the philosophical level to wrongly imply such a solipsistic transcendental process as this should not be confused with the formalisation effect of seconddnaturalising and internalisation. ‘Intemporal and temporal disjuncture’ can equally be analysed as ‘transcendental-or-transdimensional prospective/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument and intradimensional-meaningfulness disjuncture’ given there is mutual unintelligibility between prospective apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument and intradimensional meaningfulness for instance respectively as notional–deprocrypticism and as
procrypticism (perversion-of-reference-of-thought—as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation of positivistic meaningfulness), just as there is mutual unintelligibility between positivism and non-positivism/medievalism meaningfulness. This mutual unintelligibility should not be ‘addressed logically’ actually by the intemporal-disposition or prospective-memetism or prospective/transcending registry-worldview/dimension as this naively implies both registry-worldviews/dimensions share the same reference-of-thought—categorical-imperatives/axioms/registry-teleology—for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (going from the insight of a common vantage perspective of mutually unintelligible/existentially-suprastructural positivism and non-positivism/medievalism reference-of-thought—categorical-imperatives/axioms/registry-teleology—for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation); wherein it is transversality—for-sublimating—existential-eventuating/denouement—of-affirmative-and-unaffirmative—disambiguated—‘motif-and-
apriorising/axiomatising/referencing’ that plays out to enable the utter superseding/transcendence of the intemporal-disposition or prospective memetism or prospective/transcendental/superseding registry-worldview/dimension over the prior/transcended/superseded intradimensional meaningfulness. For the simple reason that intrinsic-reality being preceding as ontological-normalcy/postconvergence it won’t let the positivistic mindset/reference-of-thought (as intrinsic-reality/ontology is inherently suprastructural or beyond-the-consciousness-awareness-teleology—in-preconverging—existential-extrication-as-of-existential-unthought of the mortals that we are, in the sense that a cholera epidemic that was to occur say in 100 B.C. Will not stop from occurring because human beings did not know of notions-of-bacteria-as-causing-diseases-and-instead-believed-in-bad-omen-for-not-making-the-right-sacrifices-or-so-so-and-so; thus naivety will be to strive to
syncretise in temporal-and-social-trading our discomfort/unpalatability in construing intrinsic-reality/ontology) to be involved in social-and-temporal-trading with the non-positivism/medievalism mindset/ reference-of-thought as inherently all the greater possibilities of grasping a more profound intrinsic-reality/ontology lies with ‘reasoning-through/utterion’ with the prospective memetism of positivism which actual mental-devising-representation of non-positivism/medievalism is as preconverging-or-dementing –apriorising-psychologism (where the non-positivism/medievalism registry-worldview/dimension is the prior/transcended/superseded intradimensional meaningfulness perspective). The validation arises from the untenability/internal-contradiction/internal-incoherence/institutional-constraining in the long-run of non-positivism/medievalism, as the more profound positivistic meaningfulness takes hold in the-Good/understanding/ causality ~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity institutionalisation percolation-channelling-<in-deferential-formalisation-transference> mechanism. This ontological insight (transversality, <for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing~ that plays out to enable the utter prospective/superseding/transcending of the intemporal-disposition or prospective memetism or prospective/transcendental/superseding registry-worldview/dimension) also informs, as with all transcendence-and-sublimity/sublimation/supererogatory–de-mentativity, the relation between the prospective meaningfulness/memetism or transcending/superseding registry-worldview/dimension as notional–deprocrypticism and prior/transcended/superseded intradimensional meaningfulness/memetism as our procrypticism, with the latter superseded/transcended as of ‘reasoning-through/utterion’ and represented as preconverging-or-dementing –apriorising-psychologism in line with the preceding ontological-normalcy/postconvergence nature of
prospective transcendence-and-sublimity/sublimation/supererogation—de-mentativity. Thus technically, preconverging-or-dementing\(^{20}\)—apriorising-psychologism arises simply by a shift of \(^{8}\)reference-of-thought (in the strive for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation wherein the latter \(^{4}\)reference-of-thought as a registry-worldview/dimension is shown to be more intemporally-preservational); with the preconverging-or-dementing\(^{20}\)—apriorising-psychologism reflected/perspectivated in the mental-devising-representation fully implied by the new transcending/superseding \(^{9}\)reference-of-thought (of postconverging/dialectical-thinking\(^{4}\)—apriorising-psychologism) about the prior transcended/superseded \(^{8}\)reference-of-thought (and so, beyond the latter’s registry-worldview/dimension wrongful reflex to set-aside/ignore the implications of its demonstrated ontological-impertinence as of notional-discontiguity/epistemic-discontiguity—shallow-supererogation—of-mentally-aestheticised—preconverging/dementing\(^{1}\)—qualia-schema> and go on to be of \(<\text{amplituding/}^{3}\text{formative—epistemicity}>\text{totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag}>\) this now shown-to-be-wrong \(^{7}\)reference-of-thought). Preconverging-or-dementing\(^{1}\)—apriorising-psychologism as such is easily and spontaneously reflected of a prior/superseded/transcended registry-worldview/dimension like for instance a positivistic registry-worldview/dimension mental-devising-representation reflecting the preconverging-or-dementing\(^{20}\)—apriorising-psychologism of a medieval registry-worldview/dimension. But then this is because the positivistic registry-worldview/dimension doesn’t have to deal with any existential illusion-of-the-present/present-consciousness/epistemic-totalising—self-referencing-syncretising/mirage that the non-positivism/medievalism registry-worldview/dimension personhoods-and-socialhood-formation has to deal with. However, implying similarly the preconverging-or-dementing\(^{20}\)—apriorising-psychologism of the positivistic registry-worldview/dimension from its intradimensional perspective where its own \(^{8}\)reference-of-thought is superseded/transcended by a prospective
reference-of-thought as notional-deprocrypticism will, this time around by the positivistic registry-worldview/dimension existential illusion-of-the-present/present-consciousness/epistemic-totalising self-referencing-syncretising/mirage that its personhoods-and-socialhood-formation has to deal with, lead to the positivistic registry-worldview/dimension by reflex setting-aside/ignoring the prospective and veridical reference-of-thought and corresponding (postconvergence) ontological-veridicality/ontological-contiguity, and go on to self-reference-syncretise its transcended/superseded reference-of-thought. In concrete terms for instance, whereas a positivistic mindset/reference-of-thought will likely shift the reference-of-thought with regards to say a non-positivism/medievalism context of notions-and-accusations-of-sorcery where A were to accuse B for being a sorcerer who caused A’s illness, the mental-devising-representation of the positivistic mindset/reference-of-thought will be that A is preconverging-or-dementing –apriorising-psychologism and that a germ and biological functioning theory of the human body is the reference-of-thought for A’s disease. But then intradimensionally, A and B and their society of personhoods-and-socialhood-formation and existentialism/full-depth-of-existential-implications that are non-positivism/medievalism will tend to harken back to reference-of-thought–categorical-imperatives/axioms/registry-teleology, -for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation that uphold the prior/transcended/superseded reference-of-thought that admits to notions-and-accusations-of-sorcery. The effective anthropological and dialectical evidence (mostly from diffusional transcendence-and-sublimity/sublimation/supererogatory–de-mentativity given the relative abruptness of cultural diffusions compared to an intra-society philosophical transcendence-and-sublimity/sublimation/supererogatory–de-mentativity which is rather slow in the making) shows that it is the crossgenerational habituation by amplituding/formative-epistemicity totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag.
or-ontological-preservation that will ultimately lead to a shift in reference-of-thought and the correspondingly more profound and grander notional-deprocrypticism ontological-veridicality/ontological-contiguity thereof. mental-devising-representation of a retrospective/transcended/superseded impression-driven/good-naturedness/wishfulness construct is always a preconverging-or-dementing apriorising-psychologism construct, and so across all institutionalisations indicating that the ontological-normalcy/postconvergence and suprastructural nature of intrinsic-reality/ontology/ontological-veridicality as ontological-normalcy/postconvergence or prospective-transcendence-in-
perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation effectively construes impression-driven/good-naturedness/wishfulness constructs as rather of notional-discontiguity/epistemic-discontiguity —<shallow-supererogation —of—mentally-aestheticised—preconverging/dementing —qualia-schema> and hence its preconverging-or-dementing —apriorising-psychologism. This equally implies that our very own ‘good-naturedness constructs’ in the positivism/procrypticism registry-worldview/dimension are of preconverging-or-dementing —apriorising-psychologism mental—devising—representation from futural Being-development/ontological-framework-expansion—as—to-depth—of—ontologising-development—as—infrastructure—of—meaningfulness—and—teleology as of prospective notional—deprocrypticism registry-worldview/dimension the—Good/understanding/notional—knowledge—reification—gesturing—in—prospective—psychologismic—apriorising/axiomatising/referencing—{of—attendant—ontological—contiguity —educed—existentialising/contextualising/textualising-contiguity } — conflatedness —in—{preconverging—disentailment—by—}—postconverging—entailment/>”<amplituding/formative—epistemicity>causality —as—to—projective—totalitative—implications—of—prospective— nonpresencing—for—explicating—ontological—contiguity conceptualisation. The reason why ontological-normalcy/postconvergence indicates that ‘good—naturedness constructs’ are defective is quite simple as it is based on adhering to a registry—worldview’s/dimension’s institutionalisation temporal—mere—form/virtualities/dereification/akrasiatic—drag/denatured/preconverging—or—dementing —narratives—of—the—reference—of—thought—categorical—imperatives/axioms/registry—teleology, which along the institutional—cumulation/institutional—recomposure—{as—to—historiality/ontological—eventfulness }/ontological—aesthetic—tracing—<perspective—ontological—normalcy/postconvergence—reflected—epistemicity—relativism—determinism}> are successively shown to be defective—as—always—being—sub—par—to—intrinsic—reality and defining the

Thus the basic reason for this counter-intuition about the veridical nature of good-naturedness construct is that it is intradimensionally totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag with the wrong implications of inherently representing the reference-of-thought-categorical-imperatives/axioms/registry-teleology\(^\text{(10)}\)-for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation of the registry-worldview/dimension as absolute intrinsic-reality/ontology without any factoring of intrinsic-reality/ontology ontological-normalcy/postconvergence and suprastructural nature as the-Good/understanding/notional-knowledge-reification-gesturing\(<\text{in-prospective\_psychologismic\_apriorising/axiomatising/referencing-}\{\text{of-attendant-ontological-}\>

Intradimensionally within a registry-worldview like positivism, this could be construed as there is no basis for a mindset/reference-of-thought advocating for scientific medicine as practised in hospitals to ‘logically convince’ another mindset/reference-of-thought advocating rather for traditional medicine (involving a mix of herbalism, incantations, spirits, etc.) that the former is more ontologically-veridical on purely logical terms (as the traditional medicine interlocutor operates logic according to the apriorising–registry or reference-of-thought–categorical-imperatives/axioms/registry-teleology behind its traditional medicine meaningful-frame while the scientific medicine interlocutor operates logic according to the apriorising–registry or reference-of-thought–categorical-imperatives/axioms/registry-teleology of a positivistic meaningful-frame), and it is purely the <amplituding/formative–epistemicity>causality <as-to-projective-totalitative–implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity>.

Without this institutionalisation/intemporalisation ‘constraining’, there isn’t really any temporal
necessarily imply a dialectical situation between two ontological-references with the one being prior/transcended/superseded and the other prospective/transcending/superseding. It is important to grasp that going by human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—'notional—firstnatures—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence'>—existentialism-form-factor, the ontological-contiguity—of-the-human-institutionalisation-process where this is skewed (‘intemporality’-asymmetric-subsumption-of-temporality”, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity) by deferential-formalisation-transference towards the intemporal (intemporalisation) is actually an artifice (artificial conceptualisation) that is habituated for its relative positive-opportunism—of-social-functioning-and-accordance with regards to the cross-section of human interest in the middle to long run construed as of ‘de-mentation—supererogatory—ontological—de-mentativity—or-dialectical—de-mentation—stranding-or-attributive-dialectics'). However, no institutionalisation construct, going by its implied transcendence-and-sublimity/sublimation/supererogatory—de-mentativity alienating ‘present as prior/transcended/superseded ontological-reference conceptualisation’ for ‘future as prospective/transcending/superseding ontological-reference conceptualisation’, has ever been acquiesced to socially without resistance even in instance induced by diffusion involving the power dominance of one cultural entity over another, with such resistance being at least in the short-term of a covert nature and of a <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiac-drag nature as well. Resistance is even stronger where transcendental institutionalisation is implied within a same cultural entity. Thus it might just be the case that the more or less itinerating clanic or tribal groups of early humans were the
perfect model for a sort of complementary diffusion of transcendentalism that quickly enabled a hominid to achieve the core assets for its perpetuation of civilisation as complex meaningfulness enabled by language and culture. Insightfully as well the possibility of positivism/rational-realism arising in Western Europe was greater by this same mechanism of complementary diffusion of transcendentalism given the mutually feeding diffusionary dynamics across the constitutive feudal entities of Medieval Europe sharing a common referent Judaeo-Christian worldview of a ‘relatively weak dogmatism’; and this can be contrasted during or just before the same period with the hegemonic or near-hegemonic governance of China and of the Islamic world ultimately stifling their nascent positivistic inclinations involving the stifling of a potential Chinese age of voyage and trading as it turned inward or the stifling of Islamic learning and science respectively. Equally, anthropological examination of various cultural groups shows that human progress is not a given and that if the appropriate conditions are not satisfied there is nothing that says a given society will fulfil its potential for prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, and this author thinks that applies to us as of the positivism–procrypticism registry-worldview as we are not beyond ontological-veridicality/intrinsic-reality by mere vague egotistic/self-referential complex but rather as of a lucid contemplation and subjection to insight about prospective ontological-veridicality/intrinsic-reality axiomatic-construal, in much the same way positivism institutionalisation transcendence-and-sublimity/sublimation/supererogatory-de-mentativity came about. The bigger point here is that while within ‘institutionalised constructs’, there is more or less summative perception of social-functioning-and-accordance—as-of–social-stake-contention-or-confliction on the basis of common/same/shared registry-worldview reference-of-thought priorly institutionalised by prospective-institutionalisation/intemporalisation-as-transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, however, at uninstitutionalised-threshold, we should be expecting nothing less than the ‘normal’ human-
subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-'notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor, and so at the threshold between recurrent-utter-uninstitutionalisation and base-institutionalisation, universalisation and ununiversalisation, non-positivism/medievalism and positivism, and prospectively procrypticism and deprocrypticism. The implication is that naturally all prospective institutionalisations by their implied transcendence-and-sublimity/sublimation/supererogatory–de-mentativity are ‘antagonistic by inducing contrariety in the temporal sense’ even though we’ll appreciate that their intemporal valor is inestimable (at least when we are looking retrospectively in appreciating that a positivistic outlook should supersede a non-positivism/medievalism outlook, and in the case where we are not uninhibited/decomplexified to equally construe that prospectively as a notional–deprocrypticism outlook should supersede a procrypticism outlook). This insight equally highlights that institutionalisation/intemporalisation is implied with regards to human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-'notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor, and is critical for would-be emancipation-inducing intemporal individuations in grasping the whys and hows of social reaction to transcendental conceptualisation going by human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-‘notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor, how temporal ‘resistance’ is superseded, the mechanism of percolation-channelling-<in-deferential-
formalisation-transference> and how transcendental ideas are taken up over time and induce untenability/internal-contradiction/internal-incoherence/institutional-constraining and positive-opportunism—of-social-functioning-and-accordance in the short run and secondnaturizing in the middle to long run construed as of de-mentation-{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics}. The fact is that while the social-construct is by and large a conceptualisation that determines individuals possibilities, the reality is equally that the social-construct does has ‘powerful channels’ that enable individuals to drastically redefined what is the social. The individual, it is often ignored, is an abstract-atomic-social-construct, as in the individual is priorly implied in the social, beyond just in terms—as-of-axiomatic-construct of social aggregation in implying a meaningfulness and value-reference construct relationship to the abstract summative social. Such insight on the nature of human transcendence-and-sublimity/sublimation/supererogatory~de-mentativity will certainly highlight why the Encyclopédistes coordinated by Diderot played a relevant role in inducing a domino effect contributing in transforming medieval European societies mindsets into a positive worldview by cynically putting together all the positive knowledge they could muster and disseminating it throughout Europe, and so over the forces of obscurity of the days who understood the implications of such a venture. The fact here as well as with all issues of perversion-of-reference-of-thought-<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation> (by the prior relative-ontological-incompleteness-induced,-‘threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation-as-to-‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing–apriorising-psychologism’, as-it-is-thus-‘in-wait’-for-perversion-of-reference-of-thought-<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-
supererogation—or-temporal-preservation-as-pseudointemporality—preservation, say of a medieval mindset—reference-of-thought with respect to a prospective positivistic mindset, as implied by ontological-normalcy), is that there was obviously no mutually common/same reference-of-thought between the Encyclopédistes as positivists and many in the medieval establishment as non-positivists for any mutually intelligible logical exercise. But rather it was a case of transversality—of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing wherein the <amplituding/formative—epistemicity> causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing—for-explicating-ontological-contiguity of positivistic meaningfulness over non-positivism/medievalism ontologically imposed the positivistic reference-of-thought, as the former elicits untenability/internal-contradiction/internal-incoherence/institutional-constraining in the latter as well as its relative positive-opportunism—of-social-functioning-and-accordance from its relative ontological effectiveness such that it ends up being secondnatured further by percolation-channelling—in-deferential-formalisation-transference. Insightfully, in an intellectual conceptualisation exercise which, though conceptually contiguous, and while not necessarily implying similar dramatisation, in addition to its relatively diffuse implications in the sense of the contention being rather about human-mentation-capacity-furtherance and the fact that as a latter institutionalisation it is apparently less dramatic, at least as of its apparent negative social consequence given it is so focussed on human individuations as atomic-level point-of-departure of transformation but rather finding its radicalness more in the boldly implied décomplexing/uninhibitedness (suprastructuring/metaphysics-of-absence—implicit-epistemic-veracity-of—nonpresencing—perspective—ontological-normalcy/postconvergence) emancipation of the positive/procryptic human, and as with all other institutionalisations, it is thus not an issue that notional—deprocrypticism meets in the short-term and temporary with

discontiguity/epistemic-discontiguity speaking of epistemic-decadence (postlogism). Insightfully again, going by the first example, it might (wrongly) be argued, by human ‘temporal extricatory preconverging–de-mentating/structuring/paradigming’, that notions-and-accusations-of-sorcery in a non-positivism/medievalism setup should imply that any such accused should equally ‘make-up’ accusations in their own defence to neutralise and possibly defend their own interests. But such a stance is a temporal extricatory preconverging–de-mentating/structuring/paradigming that faces human temporality/shortness with human temporality. Intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming will garner the insight that humanity-at-large at all such non-positivism/medievalism setups is rather in need (as the resolution) of a renewed institutionalisation prospectively as the positivistic registry-worldview based on rational-empiricism as the postconverging–de-mentating/structuring/paradigming for superseding the vices-and-impediments that the enculturation/endemisation of the notions-and-accusations-of-sorcery speak of inherently, together with the social-structural implications and derivations arising, with regards to the non-positivism/medievalism registry-worldview. The vocation of the intemporal-disposition (intemporality/ontological-construct/longness-of-register-of–meaningfulness-and-teleology) is not-to-come-to-and-construe meaningfulness-and-teleology at a same pedestal as a temporal-dispositions extricatory preconverging–de-mentating/structuring/paradigming, and this invariably means that its on-occasion/incidental insight about temporal-dispositions defects (temporality) is ‘necessarily escalated ontologically at a humanity-at-large scale of causality as-to-projective-totalitative–implications-of-prospective-nonpresencing–for-explicating-ontological-contiguity’. depth-of-existential-implications just as institutionalisations, to fully appreciate the very nature of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity as the most important thing/purposefulness of humanity-at-large. But then, our human intemporal-disposition responsible for the institutionalisation/intemporalisation process is equally inclined to focus-the-mind-more-thoroughly when dealing with phenomena that undermine ontological-veridicality and so specifically with the undermining of soundness of reference-of-thought, and so across the various institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing–perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism). It is more likely that in this regard, more likely than not perversion-of-reference-of-thought–as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation phenomena as postlogic effect including psychopathic may actually have been a boost for more rapid human registry-worldview’s/dimension’s institutionalisation/intemporalisation as our intemporal-disposition going by its own intemporal preservational individuation disposition (in intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) is rather prone to apprehend and deal with perversion-of-reference-of-thought–as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation issue at the humanity-at-large scale for the need of human registry-worldview’s/dimension’s institutionalisation as secondnaturing given that with human limited-mentation-capacity-deepening it is naïve to operate on the basis of a ‘human transformation on the wrong dependence of our intemporal-disposition as firstnatureness’, thus the reason why we institutionalise as secondnaturing taking cognisance of the reality of our temporal-to-intemporal individuations dispositions. Just as implied elsewhere in this paper, the skewing (‘intemporality-asymmetric-subsumption-of-temporality’), for relative intrinsic-
reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory de-mentativity) (from shortness-of-register-of—meaningfulness-and-teleology to longness-of-register-of—meaningfulness-and-teleology of capacity as shallow-limited-mentation-capacity to deeper-limited-mentation-capacity, is the transcendent construct of human virtue, and so as a contiguity notion, and not of abstract analogy. This notion of contiguity is what explains the capacity for humankind to accumulate/recompose/reorder its institutionalisation/intemporalisation capacity. This can be explained as follows. Considering the instance where for instance the target of accusations of sorcery was to equally adopt a temporal stance by making a vague accusation of sorcery as well. Seemingly, such a temporal approach will more or less be more effective in preempting the ‘incidental resolution of temporal-preservation-as-pseudointemporality-preservation’ (with respect to themselves in their specific locale) associated with the ‘dynamic-cumulative-aftereffect of subontologisation’ (slantedness/postlogic-effect, miscuing, disjointed-logic, logical-drag, unconscionability-drag, sub-par/formulaic-association/temporal/alibi conventioning-rationalising, and temporal-enculturation/temporal-endemisation-effect) rather as an extricatory/temporal preconverging–de-mentating/structuring/paradigming in serving their purpose of a temporal mortal. In so doing incidentally it doesn’t actually preempt but fails the ‘universal resolution of temporal-preservation-as-pseudointemporality-preservation’ (at humanity-at-large scale) as it advances an argument that still enculturates/endemises the upkeep of notions of superstition and sorcery. This approach of temporal-dispositions of dealing with temporality/shortness with respect to perversion-of—reference-of-thought—as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation in all the registry-worldviews/dimensions (institutional-cumulation/institutional-recomposure—as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing—perspective—ontological—
institutionalisations this human intemporal-disposition individuation disposition has always been an indispensable re-originary-as-unenframed/unbeholdening/outlier-conceptualisation (imbued-postconverging/dialectical-thinking -‘projective-insights’/‘epistemic-projection-in-conflatedness ’-of-notional-deprocrypticism-prospective-sublimation) \(^{(11)}\) (as longness-of-register-of—meaningfulness-and-teleology\(^{(10)}\) with respect to human social-stake-contention-or-confliction-and-confliction and the reason for its conceptualisations to be construed as institutionalisation-as-virtue even though going by temporal-dispositions inclinations, ‘such abstract projection basically would hardly make sense’. The fact is that this intemporal inclination, while often not downright articulated for what it is but rather implied, is actually behind all formal constructs with an adoption of a ‘maximalist approach’ in the construal of social phenomenal possibilities. Likewise, the hermeneutic/reprojecting/supererogating/zeroing orientation of this paper takes up such a maximalist approach in understanding phenomena of perversion-of-\(^{(7)}\) reference-of-thought<-as-preconvergingly-apriorising=axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation \(\geq\) and more precisely psychopathy and social psychopathy in the social-construct even though from a simplistic temporal perception it may seem at times overblown (very much like in a core medieval setup a positivistic \(^{56}\) maximalising-recomposing-for-relative-ontological-completeness\(^{88}\)—unenframed-conceptualisation disposition such as Galileo’s or Darwin’s or Rousseau’s or Descartes’s assertions will seem overblown to the ‘core non-positivism/medievalism mindset’ going by its customary perception), since it doesn’t accommodate temporal/incremental/’disjointedness-as-of-\(^{(1)}\) reference-of-thought’ ways of thinking and instead strives for a \(^{(10)}\) universal implications depth-of-thought. Basically, on the same token the \(^{56}\) maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation of formal constructs is all about construing human transcendental potential as a ‘virtue tipping exercise’ wherein for instance the seemingly
overblown representation of humans as susceptible to malfeasance/offence by the construct of the Law doesn’t necessarily imply that everything about humans is how they are likely to commit malfeasance/offence but rather that the transcendent potential of the construct of Law caters for and is a virtue tipping exercise for maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation the possibility of limited committing of malfeasance/offence, just as likewise the maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation construct of medicine of humans as likely to be diseased doesn’t necessarily mean that everything about humans is how they will get an ailment but is a human transcendent potential as a virtue tipping exercise for maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation the possibility of human health. The reason for this deferential-formalisation-transference disposition is simple, as formal constructs ‘reason’ on the basis of intemporality/utter-ontological-veridicality in the quest for reifying abstract universal projection very much unlike everyday informal conceptualisations that are rather driven by vague impressions and good-naturedness and tend to construe meaningfulness by reflex without factoring in relative-ontological-incompleteness-induced,-‘threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation’<as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism> of ordinary day to day thinking (common sense), and tend to be unsure, poorly methodical, poorly universalising, poorly insightful, and with elevated subjectivity (not only with regards to facts but with the purported reference-of-thought as well as the apriorising–reference-of-thought-elements/apriorising–registry-elements which are implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology), and so beforehand/as-of-a-priori even without the instigating effect of any perversion-of-reference-of-thought<as-preconvergingly-

the solipsistic argument as it frames the question in the right manner, that is, inversely (contrary to the traditional philosophical framing of the solipsism question, which by so doing naively and wrongly implies that ‘individuals precede and/or are in supposedly in existence in existence’ upon an affirmative solipsistic response, rather than the idea of becoming solipsistically in existence which subsumes their individuality and projecting of the same about others in an intersolipsistic recognition arising from individuals’ own solipsistic insights of predication-and-projection as so-reflected as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligibility

nonpresencing,-for-explicating-ontological-contiguity about a superseding–oneness-of-ontology as the intercessory basis for mutual-solipsism/intersolipsism. This author equally conceptualise of a difference between solipsism and subjectivity in that solipsism is rather purely ontological as it implies notionally the individual’s perspective in existential becoming as of existence/intrinsic-reality/ontology-as-of-its-mimetic-echoness or existence-in-reverberation or existence-potency~sublimating–nascence,–disclosed-from-prospective-epistemic-digression (however effective-as-solipsistically-intemporal or ineffective-as-solipsistically-temporal such perspectival performance), whereas subjectivity refers to our animate-existential-referencing-as-subjectification which is not necessarily oriented to the ontological appropriateness/veridicality of that reference but rather is a notional construal of the reality of ‘human condition of perceived ontological appropriateness/veridicality’ irrespective of whether it can be said of such perception as being objectively right or wrong going by

inherent ontological-veridicality. So solipsism speaks of the human projection in notionally construing ontological veridicality/appropriateness notwithstanding the perspectival effectiveness or ineffectiveness of such a construal as of solipsistic-temporality and as such solipsism as of solipsistic-intemporality is the drive behind ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality. Whereas subjectivity speaks notionally of a human condition orientation with respect to perceived ontological veridicality/appropriateness no matter whether right or wrong. This possibility of distinguishing an inherently ontological foundation of existential meaning different from an ontological as human epistemic-conception reflexivity of perceived existential meaning is central to a notional–deprocrypticism mindset in enabling the most elaborate transcendentally-enabling-level-of-ontological-good-faith-or-authenticity/objectification/desubjectification-as-objectification-as-to-ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as antinihilism construal since necessarily intrinsic-reality/ontological-veridicality is inherently tautologuous, and ‘human capacity to grasp the possibilities of referential relations to inherent existential tautology as of human animate-existential-referencing/subjectification’ in conjunction with ‘human construal of the inherent existential tautology’ is exactly the definition of notional–knowledge. Supposed for instance a child comes to learn the rules of addition for all types of number additions such that the child understands the addition principle, but then there is a deliberate ploy by the teacher and other ‘supposed learners’ all along to constantly calculate 2+2 as equals to 5. Sooner or later the child’s solipsistic sense of meaning (as becoming into existence alone in an intersolipsistic relationship with others interceded with causality—as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological—
contiguity inducing projective-insights and predicative-insights) will become a self-made revolutionary and question the teacher indicating the correct answer to 2+2 as being 4; depending equally on its notional sense of intemporal-projection/longness-of-register-of-meaningfulness-and-teleology relative to temporality/shortness-of-register-of-meaningfulness-and-teleology as to the child’s underlying ‘conception of the ontological-good-faith/authenticity—postconverging–de-mentating/structuring/paradigming’, further explaining in the bigger picture why ‘maximising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation pursuits, apparently unnecessary from a temporal interest point of view, are intemporal-solipsistically undertaken. Insightfully despite the constant ‘social affirming’ that the correct answer is 5, unlike it might be erroneously be thought, the child’s insistence now that the answer is 4 is ‘not truly’ out of the ordinary as with respect to its construal of all other meaning including other additions, the child’s knowledge and learning has always been about confirming any such meaning by its notional sense-of-solipsism as of superseding–oneness-of-ontology; but this particular solution for the addition rather becomes outlying for the child because despite the ‘social affirming’ of 2+2 as being 5, such a confirmation by a notional intemporal sense-of-solipsism as of superseding–oneness-of-ontology is not forthcoming, and in lieu rather gets the solipsistic confirmation as 2+2=4! Thus this points out that our interrelationship to meaningfulness is most authentically and fundamentally by pointing out a notional intemporal ‘sense of solipsism’ in each of us to access intrinsic meaning. Such ‘intersolipsistic-pointing exercise’ is only possible because of: our common underlying ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity, and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment —implied—self-assuredness-of-ontological-good-faith/authenticity—postconverging–de-mentating/structuring/paradigming—as-being-as-of-

This will equally explain why in the rare cases reported in the media of infants abandoned and adopted by animals like dogs and monkeys, such infants often tend to adopt behaviours of the animals as of ‘mutual solipsism or intersolipsism of reference to underlying ‘coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment-implied—self-assuredness-of-ontological-good-faith/authenticity=postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality as of amplituding/formative—epistemicity—causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing,—for-explicating—ontological-contiguity and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as human), as the capacity for the infant to act and behave like a human effectively requires its personality development in a mutual solipsism or intersolipsism of underlying ‘coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment-implied—self-assuredness-of-ontological-good-faith/authenticity—postconverging—de-mentating/structuring/paradigming—as-being-as-

Supposed again in a non-positivism social-setup a case of accusation-of-sorcery was to be brought up, wherein as of the relative-ontological-incompleteness reference-of-thought implied beyond-the-consciousness-awareness-teleology-of-existential-unthought> of the registry-worldview/dimension, it is a generalised certainty that sorcery and sorcerers/sorceresses do exist (as of the non-positivism social-setup own threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation). This conception speaks of that registry-worldview/dimension subjectivity and intersubjectivity as of ‘a wooden-language-⟨imbued—averaging-of-thought-⟨as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology⟩-as-of—nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩ human condition of construal of intrinsic-reality/ontological-veridicality as knowledge’ which is the ‘indubitable reality’ as far as they are concerned. Such a subjectivity and intersubjectivity conceptualisation/construal can be implied as well as of ‘<amplituding/formative> wooden-language-⟨imbued—averaging-of-thought-⟨as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology⟩-as-of—nondescript/ignorable–void ’-with-regards-to—

However, without a solipsistic notion of construal of intrinsic-reality/ontological-veridicality as of inherent intrinsic-reality/ontological-veridicality, and so beyond subjectivity and intersubjectivity, arising as of purely ‘solipsistic-and-intersolipsistic insights in referencing underlying ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying supposedly coherent ontological-commitment as of implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality> as of <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as human) as a potential capacity in all individuals, then the construal of intrinsic-reality/ontological-veridicality will tend to actually be defined whether beyond-the-consciousness-awareness-teleology ~in-preconverging–existential-extrication-as-of-existential-unthought> as implied by subjectivity and intersubjectivity as a ‘construct of human condition of construal of intrinsic-reality/ontological-veridicality as supposedly knowledge’, with the consequence that humankind construal of intrinsic-reality/ontological-veridicality is naively-and-wrongly interpreted as superseding ‘inherent intrinsic-reality/ontological-veridicality’ at registry-worldviews/dimensions uninstitutionalised-threshold (which is
totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity and not any notion of vague innateness besides existentially inherent human-subpotency potential to manifest as human), will largely be jeopardised since the ‘putting-into-question’ as a solipsistic exercise with the possibility of getting at the very core of what is ‘further divulge-able’ by intrinsic-reality/ontological-veridicality, is largely compromised by a subjectivity and intersubjectivity averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology -as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications> mental-disposition. This distinction between subjectivity and intersubjectivity as referencing human condition of construal of intrinsic-reality/ontological-veridicality from solipsism and intersolipsism as referencing human effective/ineffective construal of intrinsic-reality/ontological-veridicality as to ontological-performance -<including-virtue-as-ontology>, is actually important because (while less critical to elucidate this in the natural sciences given the immediacy of constraint from intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity hence implicited), the implications for its comprehensive and conscious understanding in the social world (for conceptualising knowledge while superseding human temporality'/shortness as ignorances/desublimation, so-construed as ‘knowledge-notionalisation’) is decisive as it requires both an understanding of ‘the human condition in its construal/relation to intrinsic-reality/ontological-veridicality’ and ‘understanding of inherent intrinsic-reality/ontological-veridicality’; and so, as a prerequisite for the organic-knowledge necessary for futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of– meaningfulness-and-teleology as of prospective notional–deprocripticism registry-worldview institutionalisation. For instance, the concepts of apriorising/axiomatising/referencing- {of-attendant ontological-contiguity -educed–existentialising/contextualising/textualising-

This is fundamentally so because ‘inherent existential-reality/intrinsic-reality/ontological-veridicality is already what it is as given whether humankind knows about it or not’ but rather the point of human knowledge is an sublimating/emancipating exercise involving the need to decenter/pivot and supersede our animate-existential-referencing/subjectification as of the <amplituding/formative—epistemicity> totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag>

Solipsism as such is truly the foundational notion of all phenomenological conceptualisations and derivation of value and meaningfulness as intersolipsistic teleological constructs from a transversal-and/or-common perceived existential-reference/existential-tautologisation and derived-representations of existential-reference/existential-tautologisation. It is what allows for the possibility of human construal of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity to supersede social-aggregation-enabling as a knowledge and virtue construct. The implication being that there is a contiguity in solipsistic insight as simplistically elucidative in the relatively more simpler experimental framework of natural phenomenon studied by the natural sciences (which practice is categorisation-driven, more like elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—attendant-ontological-contiguity~educed—existentialising/contextualising/textualising-contiguity) but then with a high risk of inducing virtualities thus explaining the continually reshaping/re-categorisation/re-optimising of experimental content when the virtualities come to be seen as unreal or deficient or suboptimal, and so more critically with the practitioner’s experience tend to be driven heuristically actually as of ’presencing—absolutising-identitive-constitutedness’ or apriorising/axiomatising/referencing—of-attendant—ontological-contiguity~educed—existentialising/contextualising/textualising-contiguity—conflatedness—in—preconverging—disentailment—by—postconverging—entailment) but such solipsistic insight extends to the more convoluted social phenomenon studied by the social sciences, as well as the phenomenal convoluted equally inherent in scientific domains like quantum-mechanics, as herein
contemplated should ideally be understood as of referentialism implied ontological-normalcy/postconvergence epistemic-projection perspective, more like maximalising-recomposuring-for-relative-ontological-completeness — unenframed-conceptualisation from the most profound of conceptualisation which is intemporality/longness or intemporal-preservation-entropy-or-contiguity—or—ontological-preservation, as of inherent superseding-oneness-of-ontology, and so on the basis of the absolute a priori, ‘attendant—ontological-contiguity—educated—existentialising/contextualising/textualising-contiguity — reifying-or-elucidating-of-prospective-relative-ontological-completeness — of— reference-of-thought-devolving-as-of-instantiative-context as to existence-potency/sublimating—nascence—disclosed-from-prospective-epistemic-digression—rules—apriorising/axiomatising/referencing—that—further—epistemically—unconceal—the—very—ontologically—same—existential-reality, construed as of increasing human limited-mentation-capacity-deepening in the apriorising/axiomatising/referencing of meaningfulness-and-teleology construal, in the staggered elucidation of less and less profound but critical conceptualisations as undertaken in this hermeneutic/reprojecting/supererogating/zeroing design. Furthermore, solipsism will equally explain why human meaningfulness-and-teleology is developed rather by maximalising-recomposuring-for-relative-ontological-completeness — unenframed-conceptualisation of the same superseding—oneness-of-ontology as of our limited-mentation-capacity-deepening (whereby successive generations take a shot at the superseding—oneness-of-ontology that is existence like Ancient Civilisations like Greece establishing that matter is made up of water, fire, air, earth and ether critically establishing the psyche of matter as composed of basic elements and successive recomposurings right up to our modern-day quantum-mechanics recomposuring as of historicality/ontological-eventfulness /ontological-aesthetic-tracing/<perspective—ontological-normalcy/postconvergence-reflected—’epistemicity—relativism—determinism’ >), rather than it
erroneously being construed as an incremental exercise; as it is only incremental in the literal sense but in the ‘operant sense’ it is an exercise of maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation as of transversality—of-affirmative-and-unaffirmative-disambiguated-motif-and-apriorising/axiomatising/referencing’ overall reconstruing/reconceptualising rather than just incrementing. This insight is important for critical thought and analysis as oftentimes it is naively assumed that prospective knowledge is to be simply obtained by ‘additioning’ or ‘cumulating’ to prior works rather than the more pertinent insight of <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought as of a same superseding–oneness-of-ontology that is existence. On the same token, this tautological insight about the precedingness of existence can be extended to the notion of nothingness with nothingness rather existing in existence as there is no nothingness or for that matter anything out of existence which is ‘conceptually’ emanation-as-to-the-all-defining-<amplituding/formative–epistemicity>causality–as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity–intercession, with nothingness rather the ‘conceptual devising of the metaphysics-of-absence–(implicated-epistemic-veracity-of–nonpresencing–<perspective–ontological-normalcy/postconvergence>) of existence’ with existence conceptually construed in metaphysics-of-presence–(implicated–non descriptor/ignorable–void ‘-as-to– presencing–absolutising–identitive–constitutedness '); but then with existence being its very own metaphysics-of-presence–(implicated–'nondescript/ignorable–void '–as-to– presencing–absolutising–identitive–constitutedness ), the mutual equivalence of both metaphysics-of-presence–(implicated–'nondescript/ignorable–void '–as-to– presencing–absolutising–identitive–constitutedness ) and metaphysics-of-absence–(implicated-epistemic-veracity-of–nonpresencing–<perspective–ontological-normalcy/postconvergence>) implying that

Technically, the implication is that existence/being cannot be thought outside of human thought/limited-mentation-capacity); as a conclusion driven by the insight that human thought/limited-mentation-capacity in construing existence/being implies human meaningfulness-and-teleology is necessarily of amplituding/formative-epistemicity causality as-to-projective-totalitative–implications-of-prospective-nonpresencing, for-explicating-ontological-contiguity or attendant. However the disavowal rather than renewal/deconstruction/ontological-reconstituting–as-to-conflatedness of human thought/limited-mentation-capacity will imply its dissolving into a ‘nihilism of meaningfulness-and-teleology’ as the alternate logical outcome, but then with this latter construal/conceptualisation being rather ‘an unequal measure alternative’ since it has the drawback of ‘putting an end to contemplation itself’, of ‘misunderstanding that contemplation is a human growth activity and not an absolutely achieved activity’, besides abandoning the notion of human existentialism/thrownness/facticity behind human strife itself thus contradictorily undermining again the assumption of such an alternate logical outcome as itself a ‘contemplated strife’ construed as arising only by the implication of such existentialism/thrownness/facticity, and further failing to factor in that deepening human thought/limited-mentation-capacity increasingly narrows the framework of human existential contingency...amplituding/formative-epistemicity causality as-to-projective-totalitative–implications-of-prospective-nonpresencing, for-explicating-ontological-contiguity ‘enabling

Even when it comes to the social integration of maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigming, it is often the case that such meaningfulness-and-teleology is bound to the denaturing in many ways as of human ordinariness ⟨amplituding/formative⟩ wooden-language⟨imbued—averaging-of-thought⟩⟨as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology⟩ as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩ temporal extricatory preconverging–de-mentating/structuring/paradigming concatenation to it, if the requisite percolation-channelling⟨in-deferential-formalisation-transference⟩institutionalisation and formalisation constructs are not priorly attended to. Even such that notions like exceptional, genius, prophesying, etc. associated with maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation mental-dispositions, as recognised by the Niezschean imagination are more often than not construed beyond-the-consciousness-awareness-teleology—⟨in-preconverging-existential-extrication-as-of-existential-unthought⟩ as ‘derogation to the fact that such maximalising-recomposuring-

Actually the paradox is that, no transcendentally implied construct is effectively a ‘grounded knowledge-construct commitment’ inherently as it inevitably and fundamentally puts into question the underlying intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—de-mentativity <amplituding/formative— epistemicity> causality -as-to-projective-totalitative—implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity notion, which is the prior <amplituding/formative—epistemicity> totalising/circumscribing/delineating reference-of-thought—devolving-as-of-instantiative-context—\(^7\) meaningfullness-and-teleology\(^100\) as of its (given consciousness’s \(^5\) neuterising-induced)- reference-of-thought—devolving-teleological- de-mentating/structuring/paradigming—of-meaningfulness. Such transcendental implications arise as a transitional construct that is in effect as of a psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring articulation by its crossgenerational transcendental implications. On the basis of such hollow-constituting-as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation circularity, one may perfectly argue that any of the institutionalisations are just as good so long as people are relatively satisfied but such an argument is never made of lower/prior institutionalisations with the implications that its elicitation within a registry-worldview as present is nothing more but an act of ‘ontological-bad-faith/inauthenticity’, but then a maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation approach is one that doesn’t reason in temporal-accommodation but provides the opportunity for prospective institutional possibilities. maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation was what was in the minds of the Copernicuses, Galileos, Rousseaux, Darwins and the enlightenment Encyclopédistes led by Denis Diderot in cynically vouching for the possibilities of the future of positivism over a non-positivism/medievalism worldview. Such that vague arguments of the type we’ve been living well without such ideas are nothing but avowals of temporal-dispositions poor grasp of how their present institutionalisation came about and future institutionalisation possibilities; since we can project that all humans in recurrent-utter-uninstitutionalisation were recurrent-utter-institutionalised, all humans in ununiversalisation were ununiversalised, all humans in medieval non-positivism were non-positivistic, and by extention (but for the complexes arising from our metaphysics-of-presence-(implicated-‘nondescript/ignorable–void’)-as-to-

(including and priorly, the transcendental emancipator own’s mentation) for the prospective/transcending/superseding ‘reference-of-thought; and so, with the notion that the prior/transcended/superseded is preconverging-or-dementing ‘apriorising-psychologism as dialectically-out-of-phase/dialectically-primitive, with no place for its ‘<amplituding/formative–epistemicity>totalising~self-referencing-syncretising’ which is no more than its ‘internal myth/metaphysics’ that has nothing to do with ontological-veridicality/ontological-contiguity. As such, solipsism enables the requisite ‘moulting’ of human limited-mentation-capacity-deepening of notional–firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-normalcy/postconvergence> to allow for successive transcendence-and-sublimity/sublimation/supererogatory—de-mentativity; and as a social conceptualisation operates as ‘a relation of intersolipsistic mindsets in transversality—<for-sublimating–existential-eventuating/denouement>—of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing’ led by the preceding/superseding intercession of intrinsic-reality/ontological-veridicality as validated by <amplituding/formative–epistemicity>causality—as-to-projective-totalitative–implications-of-prospective–nonpresencing,—for-explicating-ontological-contiguity’. (Noting that beyond this point of solipsistic contemplation is the end of ontology, as of <amplituding/formative–epistemicity>causality—as-to-projective-totalitative–implications-of-prospective–nonpresencing,—for-explicating-ontological-contiguity/attendant-projective-and-predicative-validation, and metaphysics arises though metaphysical constructs tend to harken back towards ontology in trying to explain the metaphysical-as-of-existential thus explaining the blurring that often arises between metaphysics and ontology as there is hardly any metaphysical construct that doesn’t strive to be existentially relevant as of the present, thus carrying ontological implications of conceptualisation whether it is demonstrably ontologically-veridical or not; and
this latter point answers the fundamental philosophical quest to escape metaphysics for ontology as of the very ontological-contiguity\(^6\) —of-the-human-institutionalisation-process\(^7\) which is rather about ‘successions of metaphysics-of-absence\(^{8\text{ }}\) (implicated-epistemic-veracity-of-nonpresencing\(^{9\text{ }}\) <perspective-ontological-normalcy/postconvergence\(^{10\text{ }}\)) insights as the successive transcendental-enabling/sublimating/supererogatory-de-mentativity rules in reflecting holographically\(^{11\text{ }}\) <conjugatively-and-transfusively> the ontological-contiguity\(^{6\text{ }}\) —of-the-human-institutionalisation-process\(^7\) yielding in-lockstep the successively more ontologically profound metaphysics-of-presence\(^{12\text{ }}\) (implicated-‘nondescript/ignorable–void’-as-to-presencing—absolutising-identitive—constitutedness \(\text{\textbraceleft}\)) construed as the successive institutionalisations as implied by ontological-normalcy/postconvergence’ towards the notional-deprocrypticism registry-worldview/dimension which is what then achieves ontology as ‘attained ontological-normalcy/postconvergence’. Likewise, since in effect there is hardly any ‘present pure-ontology’ as one that is beyond existential implications contentions about the purity/absoluteness/unassailability of its veracity, this rather validates a novel and positive construal of metaphysics as that which is subject to present existential implications contentions such that all supposed present ontologies are metaphysical constructs as of their non-elucidations. Hence even science itself despite its positive perspective is a metaphysical construct.) Hence, from a \(^5\) maximalising-recomposuring-for-relative-ontological-completeness —unenframed-conceptualisation insight, the \(^4\) amplituding/formative-epistemicity totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^3\) of ‘incrementalism-in-relative-ontological-incompleteness’—enframed-conceptualisation \(<\text{amplituding/formative}\) wooden-language\(\{\text{imbued—averaging-of-thought—<as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology-as-of—\text{\textbraceleft\textbraceright}nondescript/ignorable–void’-with-regards-to-prospective-apriorising-implications\}\}\) disposition is rather the prior/transcended/superseded \(\text{\textbraceleft}\) reference-of-thought to be construed as
reference-of-thought reflecting the registry-worldview—devolving-apriorising/axiomatising/referring or contending-reference or ontological-reference or meaningful-reference or anchoring-of-meaning or registry) arising due to human temporal-compromises/temporal-accommodation —incrementalism-in-relative-ontological-incompleteness —enframed-conceptualisation disjointedness-as-of reference-of-thought to ‘socially-perceived-value as of social-stake-contention-or-confliction’ (whether consciously, expeditiously or unconsciously) and particularly so at thresholds where there is no deferential-formalisation-transference as institutionalisation (uninstitutionalised-threshold), and this fundamentally undermines the ‘ontological validity and veracity’ of such a placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as purportedly of prelogism-as-of-conviction,-in-profound-supererogation <existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referring’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> reflex (or ‘conviction-as-to-profound-supererogation’-reflex’ or intemporal-disposition-reflex-admittance-reflex/in-phase-reflex).

Beyond our illusion-of-the-present/present-consciousness/mirageas <amplituding/formative–epistemicity> totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag positivistic registry-worldview perspective, we can grasp that the lower registry-worldviews/dimensions ‘mentally projected prelogism-as-of-conviction,-in-profound-supererogation’ <existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referring’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> reflex (or ‘conviction-as-to-profound-supererogation’-reflex’ or intemporal-disposition-reflex-admittance-reflex/in-phase-reflex’) are flawed at their uninstitutionalised-threshold, and the same applies to us in ontological-normalcy/postconvergence. The nature of this ‘conviction-as-to-profound-supererogation’-reflex flaw’ is that it actually defines ‘a threshold of
meaningfulness’ of the intemporal-disposition), as the basis of the institutionalisation/intemporalisation process at registry-worldview/dimension or intradimensional level, and ultimately explaining the transcendental/transdimensional/interdimensional/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation level successiveness of institutionalisations (as recurrent-utter-uninstitutionalisation, base-institutionalisation/ununiversalisation, universalisation/non-positivism-or-mediavalism, positivism/procrypticism, and perpetuation-of-deprocrypticism); and so, by ‘a human limited-mentation-capacity-deepening’ recurrence of intemporal projection over the alterity/alteration, in circularity/recurrence/repetition/repeatability by temporality’, and such iterability/iteration (of ontologically-veridical-meaningfulness-and-ontological-reference) being driven by intemporal-preservation-in circularity/recurrence/repetition/repeatability (as longness-of-register-of—meaningfulness-and-teleology) with the latter ‘distracted/circumvented’ by temporal-preservation-as-pseudointemporality—preservation alterity/alteration-in circularity/recurrence/repetition/repeatability as shortness-of-register-of—meaningfulness-and-teleology, requiring the further realterity/realteration-of-such temporal-preservation-alterity/alteration-in circularity/recurrence/repetition/repeatability as ‘ontological-reconstituting—as-to-conflatedness/deconstruction’ by intemporal-preservation-entropy-or-contiguity—or—ontological-preservation in iterability/iteration (for the preservation of ontologically-veridical-meaningfulness-and-appropriateness-of-reference-of-thought-as-of-conflatedness). In the bigger picture and as with all natural iterations, this ‘alterations-iterability dynamism’ at the-individuation-level takes the form of an existential-flux (‘dynamic-cumulative-aftereffect of subontologisation’) of recursive/recurrent alterity/alterations which tend to be perpetuating (like the pathological psychopath’s disposition out of a faulty-mentation-procedure-deception/‘urge’/entitlement-folie of postlogism-slantedness effect) or
progressive alterity/alterations which could be regular (like an exacerbation or opportunism interlocutors in conjugated-postlogism) or regressive alterity/alterations which could be momentary (like an ignorance or affordability interlocutors in conjugated-postlogism). The notion of iterability as ‘the induced effect of alterity/alterations (by the temporal-dispositions hollow-constituting-as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation and the intemporal-disposition compensation-alterity/alteration by ‘ontological-reconstituting–as-to-conflatedness’/deconstruction) in the repeatability/recurrence of same-terms-of-expressions or same-implied-meaningfulness’, implies that temporal-dispositions being just as preservational as the intemporal-disposition thus inducing the circular recurrence of iterability (as prospective successive institutionalisations and uninstitutionalised-threshold), the exercise of institutionalisation/intemporalisation is not about transforming temporal-dispositions as of dimensionality-of-sublimating-<(amplituding/formative)supererogatory-dementativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation exercise but rather institutionalisation/intemporalisation or secondnaturing, which is about ‘skewing (‘intemporality’-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–dementativity)/constraining towards’ the intemporal-disposition for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation to enable the given prospective institutionalisation. Thus the fact is that this iterability (of meaningfulness and ontological-reference) is not a property of ‘intrinsic-reality as existence-emanance’ but actually the result/effect of human limited-mentation-capacity-deepening coming-into-grips with intrinsic-reality as existence-emanance, and so in the succession of institutionalisations. The implication of this iterability (due to temporality-preservational-alterity/alterations in
distraction/circumvention of intemporality\textsuperscript{53}-preservation-iteration for construct of intemporal/ontologically-veridical meaningfulness) is that all issues of perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > (as opposed to issues of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation \rangle), can only be construed as implying ‘a perpetual construct for upholding intemporality\textsuperscript{53}-in-preservational-compensation-ality/alteration over temporality\textsuperscript{53}-in-preservational-distorting-ality/alterations’ hence validating the notion of intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as ontological-normalcy/postconvergence; and that the ‘illusion-of-definitiveness-of-ontological-construal-on-the-basis-of-an-intemporal/ontological-definitive-construct-as-a-common-ontological-reference-of-the-meaningfulness-of-the-various-notional—firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective—ontological-normalcy/postconvergence>’ is wrong, as this simply allows for temporality\textsuperscript{53}-in-preservational-ality/alterations to ‘hollow-constitute’ at that supposed ‘intemporal/ontological-definitive-construct-as-a-common-ontological-reference-of-the-meaningfulness-of-the-various-notional—firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective—ontological-normalcy/postconvergence>’. And just as we grasp this notion of ‘the-upholding-of-intemporal/ontologically-veridical-meaningfulness’ at the-interdimension level where the registry-worldviews/dimensions are intemporally ‘ontologically-reconstituted’/deconstructed, only to be temporally ‘hollow-constituted’ requiring prospective intemporal ‘ontological-reconstituting—as-to-conflatedness\textsuperscript{13}/deconstruction explaining the successive institutional-cumulation/institutional-recomposure-{as-to—historiality/ontological-eventfulness \langle ontological-aesthetic-tracing—\langle perspective—ontological-normalcy/postconvergence-reflected—‘epistemicity-relativism—\rangle}

The implication being that the intemporal-disposition ontological-reference of meaningfulness is suprastructural (beyond-the-consciousness-awareness-teleology\rangle<in-preconverging-existential-extrication-as-of-existential-unthought\rangle) of the postlogism\rangle-and-conjugated-postlogism\rangle which is in preconverging-or-dementing\rangle-integration-of-temporal-dispositions (which explains the latter subontologisation/subpotentiation (in-a-social-dynamism-of-meaningfulness-misappropriation)
by slantedness/postlogic-effect, miscuing, disjointed-logic, logical-drag, unconscionability-drag, sub-par/formulaic-association/temporal/alibi conventioning-rationalising, and temporal-enculturation/temporal-endemisation-effect). Ultimately the philosophical pessimism of many a philosopher stems from this confusion about the achievement of human emancipation and virtue, in naively construing that such an achievement is a definitiveness-construct-of-meaningfulness rather than an ‘iterability-construct-of-meaningfulness for the upholding of the intemporal construct of ontologically-veridical-meaningfulness’ as implied by the intemporal-preservation-entropy-or-contiguity–or–ontological-preservation as of ontological-normalcy/postconvergence. Strangely enough, this idea can be derived from the contrastive implications of metaphysics-of-presence-{implicated-'nondescript/ignorable–void ’-as-to-presencing—absolutising-identitive-constitutedness } (with its illusion-of-the-present/present-consciousness/mirage/epistemic-totalising’–self-referencing-syncretising) and metaphysics-of-absence-{implicated-epistemic-veracity-of- nonpresencing-<perspective-ontological-normalcy/postconvergence>} as postdication (suprastructuring transcendental-insight-projection-capacities). Ontologically speaking, the institutional-cumulation/institutional-recomposure-{as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective-ontological-normalcy/postconvergence-reflected-’epistemicity-relativism-determinism’>} in their evolving de-mentation-{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics} registry/registry-worldview/ontological-reference dialecticisms as at one moment ‘postconverging-or-dialectical-thinking’–apriorising-psychologism’ and at another preconverging-or-dementing–apriorising-psychologism are effectively a reflection of the reality of a dynamic dialectics of ‘metaphysics-of-presence" (implicated-'nondescript/ignorable–void ’-as-to-presencing—absolutising-identitive-constitutedness’) and ‘metaphysics-of-absence-{implicated-epistemic-veracity-of-

A human secondnaturing institutionalising construct is a requisite because, at best even the intemporal-disposition individuation in individuals purporting prospective emancipation comes from and are from the stock of the prior ⁸reference-of-thought uninstitutionalised-threshold¹ registry-worldview/dimension, and such prospective emancipation involves such individuals own ‘moulting’, as actually intemporality¹/longness is a ‘potential construct of orientation’ as implied by ontological-normalcy/postconvergence (prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) and it is only a devised institutionalisation construct as secondnaturaing that achieves that potential-construct-of-orientation and not any naïve inherently intemporal-disposition in individuals. By
that token there is no base-institutionalised individual in recurrent-utter-uninstitutionalisation, no universalised individual in ununiversalisation, no positivistic individual in non-positivism/medievalism, and prospectively no notional–deprocrypticism individual in procrypticism, as at best such emancipating intemporal individuals are ‘moulting’ their intemporal individuations and implying-of-the-same of their registry-worldview in prospective institutionalisation design/conceptualisation, as the effective institutionalisation is what is really and effectively attained. - As the notion of ‘dynamic-cumulative-aftereffect of ontology and subontologisation/subpotentiation (slantedness/postlogic-effect, miscuing, disjointed-logic, logical-drag, unconscionability-drag, sub-par/formulaic-association/temporal/alibi conventioning-rationalising, and temporal-enculturation/temporal-endemisation-effect),’ is rather an operant conceptualisation that highlights the need for an operant conceptualisation of psychology in grasping human dynamics. But then psychological science as we know today in many ways mainly takes the form of an adjunct construct in grasping the social as is equally the case with social psychology; as the focus of can mostly be resumed to ‘identity’ of individual dispositions such that psychology tends more to have a subjective intercessory practice nature involving intersubjective valuation). Thus, as with all such approaches it is hardly surprising that we haven’t got an academic ‘postconverging-or-dialectical-thinking –psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ (as an ontology-driven
instantiative-context> conceptualisation); but rather a ‘psychology of qualifications’ as is equally the case with social psychology. The author as previously implied with the notion of a ‘postconverging-or-dialectical-thinking’ – psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ perceives the need for defining human psychology from a transcendentally-enabling-level-of-ontological-good-faith-or-authenticity^9^/objectification/desubjectification-as-objectification-<as-to-ontological-faith-

With ontology-driven implying that our placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology is just a ‘placeholder-setup’ that doesn’t have any inherent ontological validity, but is rather as valid as its representation/schedule of ontology/ontologically-veridical-meaningfulness/intemporality, such that with the insight of more profound ontology/ontologically-veridical-meaningfulness/intemporality, the ‘placeholder-setup’ as placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology is accordingly rescheduled psychoanalytically ('postconverging-or-dialectical-thinking—psychology or psychology-mentation-dynamics or natural—psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring), validating and explaining why our placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology has been developing all along from the mindset/reference-of-thought of a recurrent-utter-institutionalised, base-institutionalised, universalised and positivised, with the implication that the latter’s mindset/reference-of-thought is not beyond prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity where such prospectively more profound ontology is demonstrated to imply a renewal of human reference-of-thought of meaningfulness (as deprocrypticism), and with the further implication that all along it is essentially about a same species of a same underlying human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional—firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective—ontological-normalcy/postconvergence’—existentialism-form-factor induced dynamism of shallow limited-mentation-capacity—of relative apriorising/axiomatising/referencing—of-attendant—ontological-contiguity—educed.

In fact, psychoanalysis is actually a natural existential human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology process with the difference that such comprehensively conceptually-directed constructs as is implied with notional~deprocrypticism with respect to the present positivism/procrypticism are relatively more focussed and thus potent where “ontologically-pertinent and so-demonstrated to be ontologically-pertinent”; and by and large form part and parcel of the human psychoanalytic experience with regards to passive to conceptually-directed constructs of human teleological projection. Transcendence-and-sublimity/sublimation/supererogatory—de-mentativity (prospective) as a placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology effectuation, is not technically achieved as may naively/counterintuitively be implied by construing directly of a prospective placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology (from the present) but rather, on the basis of ‘prospective reference-of-thought transcendental insights’, it correspondingly implies ‘construing the present as metaphysics-of-present as the transcended/superseded/prior placeholder-setup/mental-devising-representation/mentation’ to be represented as ‘preconverging-or-dementing apriorising-psychologism reference-of-thought’, and so implied by the ‘prospective reference-of-thought transcendental insights’, such that the prospective (transcending/superseding) placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology defect as ‘postconverging-or-dialectical-thinking apriorising-psychologism reference-of-thought’ is naturally implied as
being the new and prospective suprastructuring, (beyond-the-consciousness-awareness-teleology\(^{100}\)<in-preconverging-existential-extrication-as-of-existential-unthought>\(^6\)) of the ‘old present’/retrospective as prior. That is it is critical to grasp that \(^{15}\) ‘de-mentation\(\)\(_{\text{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics}}\)’ of ‘postconverging-or-dialectical-thinking\(^{21}\)–apriorising-psychologism’ and preconverging-or-dementing\(^{20}\)–apriorising-psychologism is never about generating a prospective ‘postconverging-or-dialectical-thinking \(\)–apriorising-psychologism’ (with respect to the present as ‘postconverging-or-dialectical-thinking \(\)–apriorising-psychologism’), but such ‘de-mentation\(\)\(_{\text{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics}}\)’ is rather about decentering and preconverging-or-dementing\(^{20}\)–apriorising-psychologism/oblongating the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\(^{100}\) of the present as preconverging-or-dementing\(^{20}\)–apriorising-psychologism which becomes ‘old-present’/retrospective as prior’ and dialectically ushering contrastively from that backdrop a new and prospective ‘postconverging-or-dialectical-thinking \(\)–apriorising-psychologism’. This is actually about \(^{56}\) ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation of the implied prospective meaningful-reference/anchoring-of-meaning/ontological-reference/contending-reference, rather than attempting its elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—attendant-ontological-contiguity\(^{40}\)—educed—existentialising/contextualising/textualising-contiguity\(^{40}\) which will ‘wrongly make reference to and wrongly elevate’, and so by mix-up, the prior \(^{84}\) reference-of-thought as veridical. \(^{56}\) ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation being about optimally rescheduling the ‘placeholder-setup’ (as placeholder-setup/mental-devising-representation/mentation) with regards to ontologically-veridical-meaningfulness, on the ontological backdrop of a more

Further the notion of deeper superseding–oneness-of-ontology conceptualisation and shallow superseding–oneness-of-ontology conceptualisation, central to a maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation, can be demonstrated as follows: supposed A has the (existentially veridical) mental projection with respect to say a housing project and undertook the initiative of bringing together and obtaining advanced payments from prospective buyers for the project, and B was to by non-veridical/vacuous hollow-constituting mental-disposition spread stories of the scheme being a scam (not to the buyers who have all the documentations validating the genuineness of A’s housing project) but rather other interlocutors mainly to undermine A’s business credibility, and so whether B is pathological/psychopathic or postlogicly-enculturated, and supposed some other interlocutors, not only by ignorance but affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative–

‘preconverging-or-dementing’—apriorising-psychologism and not-contending’? ‘Anchoring-of-

{implicated-epistemic-veracity-of- nonpresencing—<perspective–ontological-

{implicated-’nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive-

'Possibly' this won’t imply ‘doing away’ with concepts and conceptualisations of the current ‘psychology of qualifications and qualification schemes’, but will however be uncompromising with respect to being ontology-driven, and thus ‘possibly’ enable the reconstrual of such psychology concepts as the self, ego, id, etc. in their metaphysics-of-absence-(implicit-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>-postdication (as the existential social) articulation. Insightfully, a ‘postconverging-or-dialectical-thinking –psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ rather mobilises ‘maximising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation as is necessarily the case with all metaphysics-of-absence-(implicit-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>-postdication conceptualisations (which must avert the mix-up induced by the illusion-of-the-present/present-consciousness/mirageas<amplituding/formative–epistemicity>totalising–self-referencing- syncretising/circularity/interiorising/akrasiatic-drag as metaphysics-of-presence-(implicit- 'nondescript/ignorable–void '–as-to- presencing—absolutising-identitive-constitutedness') in ontologising/ontological-conceptualising. This thus validates and operates on the fundamental assumption that the individual-as-of-its-temporal-to-intemporal-individuation-potency is an abstract-atomic-social-construct capable-of-and-as-the-basis-for-both-social-effectuation-and-institutionalisation/intemporalisation. institutionalisation/intemporalisation that is effectively institutionalisation-as-virtue given that in the succession of human institutional-cumulation/institutional-recomposition→\{as-to-historiality/ontological-eventfulness /ontological-aesthetic-tracing←perspective–ontological-normalcy/postconvergence-reflected←epistemicity-relativism-determinism\}, no institutionalisation effectively transforms human notional-firstnaturedness—temporal-to-intemporal-dispositions←so-construed-as-from-perspective–ontological-normalcy/postconvergence nature into an absolutely intemporal-disposition nature, but rather reduces human epistemic-abnormalcy/preconvergence towards ontological-normalcy/postconvergence as deeper and deeper superseding—oneeness-of-ontology construal/conceptualisations. The bigger point being that it is by effectively grasping that any human intemporal-disposition individuations that can ‘spontaneously’ arise in whatever concern there is should be directed/skewed (‘intemporality’-asymmetric-subsumption-of-temporality\^\^), for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity) (as deferential-formalisation-transference of meaningfulness) for institutionalisation/intemporalisation-as-virtue for secondnaturing, and not a wrong implication of functionally grounding virtue on human ‘temporal disposition’ which will inevitably bring about temporal-and-social-trading with respect to ‘socially-perceived-value as of social-stake-contention-or-confliction’. The fact is that our institutional and organisational constructs at their very core, unspokenly do imply this notion of institutionalisation-as-virtue (in tacit recognition of our notional-firstnaturedness—temporal-to-intemporal-dispositions←so-construed-as-from-perspective–ontological-normalcy/postconvergence>, however, the notion of ‘consciously-spoken’ as herein highlighted is that it enables the necessary uninhibitedness/decomplexification that allows the requisite ‘postconverging-or-dialectical-thinking—psychology or psychology-of-mentation-dynamics or natural-psychoanalytic-psychological-dynamics’ psychoanalytic-unshackling/memetic-
reordering/institutional-recomposuring required in fully assuming the reference-of-thought of any prospective registry-worldview/dimension. Actually, it could be argued that the more critical element of medieval emancipators/enlighteners had to do often not with their specific discoveries, which were more or less debated issues as well in their societies, but critically the idea that they were ready to imply ‘a new psychological orientation as positivistic’ that in itself structured the possibilities of a new worldview and many other positivistic discoveries once it became mainstream. Insistence of making mainstream such ideas as a heliocentric solar system by Galileo a century after Copernicus based on observations, the evolution of living things by Darwin based on research analysis, ‘amplituding/formative–epistemicity’ totalising rationalism’ by Descartes based on methodical thinking, universal human rights by Rousseau based on thorough analysis of the human condition, principles explaining physical phenomena by Newton and Leibniz based on physical observation, etc. all speak of a new mindset/reference-of-thought as a postconverging–de-mentating/structuring/paradigming shift that has no complexes and is uninhibited with respect to notions of the old notions of dogmas, alchemies, essences and myths. The fact is that (unlike we may naively reason by reflex from our relatively vantage position at the backend of the institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism> process) this is not spontaneously given, when we consider that many of such emancipators were equally relatively enmeshed with the old psychology like Newton’s involvement with alchemy, for instance. This point to the critical importance of the psychological state of the mind for the very possibility of prospective ontologically-veridical transcendence-and-sublimity/sublimation/supercerogatory–de-mentativity to occur; as ontology is already given as a oneness and it is up to the human psyche to ‘moult itself’ (psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) towards a more profound
construal/conceptualisation as of that superseding–oneness-of-ontology, however strongly we might naively believe in our ideas in any given epoch as of its metaphysics-of-presence

(implicated-‘nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive-constitutedness’). Thus metaphysics-of-absence(implicated-epistemic-veracity-of

Ultimately the purpose of maximalising-recomposuring-for-relative-ontological-completeness—in-unenframed-conceptualisation as an intemporal conceptualisation of transcendental implication should be of ‘presencing—absolutising-identitive-constitutedness consummated/forfeiting posture’ and is not for the sake of ‘immediate intelligibility’ within a given uninstitutionalised registry-worldview/dimension in want for a prospective corresponding institutionalisation registry-worldview/dimension, as such a purpose will wrongly and paradoxically imply that the logical-dueness/logical-pertinence of the uninstitutionalised-threshold is sound as its reference-of-thought is prospectively defective (for instance a positivistic implied
transcendence-and-sublimity/sublimation/supererogatory-de-mentativity cannot be logically intelligible to a medieval setup that harkens back to medieval reference-of-thought–categorical-imperatives/axioms/registry-teleology for its logic, i.e. ‘Issue of articulating chemistry rules and principles for the evaluation of an alchemist not logically cognisant of chemistry rules and principles, in the very first place’), but rather it is a middle to long run construed as of de-mentation–supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics instigation of prospective registry-worldview/dimension institutionalisation reference-of-thought as of a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring (though we can mostly grasp such an insight not from instances of ‘natural intra-society transcendence-and-sublimity/sublimation/supererogatory-de-mentativity’ since this takes a longer time to occur and is relatively obscure, but transcendence-and-sublimity/sublimation/supererogatory-de-mentativity by cultural diffusion associated with conquests where the dominant is at a more advanced stage of institutionalisation or in the rare cases where it is the reverse like Ancient Egypt or Ancient Greece, with the dominated actually relatively dominating or in parity with the dominant culturally as of divergent aspects). The implication here is that transcendental maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation is rather grounded on a relatively intemporal-and-deeper existential-reference-of-meaningfulness with the positive-opportunism—of-social-functioning-and-accordance of the prospective institutionalisation amplituding/formative–epistemicity>causality—as-to-projective-totalitative–implications-of-prospective-nonpresencings,-for-explicating-ontological-contiguity over its corresponding uninstitutionalised-threshold to put in question the latter’s reference-of-thought–categorical-imperatives/axioms/registry-teleology for the ones of the prospective
institutionalisation, and it is only after that the notion of mutual logical intelligibility arises (it is only after the alchemist ‘psychoanalytically-unshackle’ into a positivistic-inclined mindset/ reference-of-thought with respect to appreciating notion of natural cause-and-effect and experimentation as well that the notion of mutual intelligibility of chemistry rules and principles makes sense, until then there cannot be much of intelligibility without such a ‘postconverging-or-dialectical-thinking’—psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring exercise from the perspective of the prospective chemist). That explain why “maximalising-recomposuring-for-relative-ontological-completeness”—unenframed-conceptualisation construct are meant to be detached and totalisingly-entailing so as to act as a backdrop for prospective institutionalisation, and not to necessarily make sense in terms—as-of-axiomatic-construct of ‘the now temporal mental-disposition reference-of-thought’ which, it is contended, is in want of prospective institutionalisation with its corresponding psychologism. In the bigger scheme of things, it is inevitable that suprastructuring (the conceptualisation that renders de-mentation—{supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics} relative-mutual-construal of the prospective/superseding/transcending registry-worldview/dimension as deeper superseding–oneness-of-ontology construal/conceptualisation over the prior/superseded/transcended registry-worldview/dimension as shallow superseding–oneness-of-ontology construal/conceptualisation by (suprastructurally) reflecting/perspectivating, beyond-the-consciousness-awareness-teleology of the prior/superseded/transcended, respectively the ‘postconverging-or-dialectical-thinking’—apriorising-psychologism as dialectically-in-phase’ and the ‘preconverging—or-dementing’—apriorising-psychologism as dialectically-out-of-phase’), is rendered operant by the notion of ‘existential-decontextualising-transposition (threshold-of–

It is critical to grasp that the notion of threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation is rather of conceptual metaphysics-of-absence{(implicated-epistemic-veracity-of- nonpresencing-{perspective–ontological-normalcy/postconvergence}) (meant to ensure a

Insightfully, ontological-normalcy/postconvergence establishes beyond human limited-
mentation-capacity-deepening\textsuperscript{53} that there is a potent and overall oneness/contiguity of
ontologically-veridical meaningfulness which transverses and supersedes all other
conceptualisations of \textsuperscript{84}reference-of-thought and meaningfulness (which are therefore
approximates) by mere ‘ontological-consistency’ whether with regards to virtue
conceptualisation (as highlighted with the intemporal-preservation-entropy-or-contiguity—or—
ontological-preservation) or second-level ontological constructs as is the case with subject
matters conceptualisations. Ultimately, the capacity for philosophy to further clarify such an
‘ontological-consistency’ will be a further critical foundation for broadening the efficacy of all
second-level ontologies (as the veritable job of philosophy). Inherently, ‘ontological-
consistency’ as superseding—oneness-of-ontology is by itself the complete rationale for
explaining human possibilities with regards to knowledge and virtue as so
reflected/perspectivated by the very potency of ontological-normalcy/postconvergence, as the
latter is ‘the potency for all the text-of-ontologically-veridical-meaningfulness that can exist’.
Ontological-consistency in the inherent intemporalisation/institutionalisation orientation of
ontological-normalcy/postconvergence validates virtue conceptualisation not as a discreet
notion of choice, but rather a necessary disposition as ‘intemporal projection’ (or longness-of-register-of—meaningfulness-and-teleology\(^{10}\)) for human-mastery-of-reality or knowledge, as inherently implied by ontological-normalcy/postconvergence (prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity—or–ontological-preservation). The reason is simple. It is impossible, for instance, for an utter-ununiversalisation setup ‘to access’ the emancipating ontological possibilities available to a prospective base-institutionalisation setup without the ‘requisite solipsistic insight’ of intemporal-disposition individuation within the recurrent-utter-uninstitutionalisation registry-worldview that ‘projects’ that rulemaking-over-non-rules—apriorising/axiomatising/referencing—psychologism,\(\langle\)as ‘first-level presencing—absolutising-identitive—constitutedness of reference-of-thought’ apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument\(\rangle\) as a postconverging–de-mentating/structuring/paradigming for superseding the vices-and-impediments\(^{10}\) inherent to recurrent-utter-uninstitutionalisation is a necessity-for-its-own-and-by-extension-the-registry-worldview’s/dimension’s ‘moulding’ in the middle to long run construed as of de-mentation\(\langle\)superserogatory—ontological—de-mentation—dialectical—de-

Such solipsistic insight is the effective ‘transcendental virtue conceptualisation’ that drives ontological-normalcy/postconvergence across all the successive institutionalisations and by that token coincides with ontology as a necessary ontological development driver in an animal of shallow limited-mentation-capacity—\(\langle\)as of relative apriorising/axiomatising/referencing—\{of—attendant—ontological ordinance—educed—

construct of human limited-mentation-capacity-deepening of shortness-to-longness-of-
register-of–meaningfulness-and-teleology in the intransience of ontological-normalcy/postconvergence (from shallow superseding–oneness-of-ontology to deeper superseding–oneness-of-ontology). This ontology-driving nature of virtue characteristic of human-subpotency–aporia/undecidability/dilemma/ought-
indeterminacy/deficiency/limitation/constraint—imbued–‘notional–firstnatures—temporal-
to-intemporal-dispositions–<so-construed-as-from-perspective–ontological-

historiality/ontological-eventfulness /ontological-aesthetic-tracing–<perspective–ontological-
ormalcy/postconvergence-reflected–‘epistemicity-relativism-determinism’>). In other words, it is the necessary ‘transcendental virtue projection’ for a prospective registry-worldview superseding the vices-and-impediments of the prior registry-worldview that enables the
ontological possibilities for such prospective registry-worldview to even arise existentially; as
the temporally-inclined recurrent-utter-institutionalised individuation is non-cognisant of any
such thing as base-institutionalisation and the ontological possibilities availing to it, likewise
with the temporally-inclined ununiversalised individuation with respect to universalisation
and its ontological possibilities, the temporally-inclined non-positivism/medievalism
individuation with respect to the positivistic and its ontological possibilities, and prospectively
the temporally-inclined procrypticism individuation with respect to notional–deprocrypticism
and its ontological possibilities, and all such possibilities as allowed by ontological-
normalcy/postconvergence. A question that arises will be how can a society deliver an Einstein
or a Bohr respectively that will articulate the theory-of-relativity or quantum-mechanics without
it having the necessary institutional-recomposure (orientation and capacities) and memetic-
reordering (of the individual mindset/reference-of-thought and associated other contributing
mindsets) that allows for the possibility of such discoveries? In other words what was the
possibility for the theory-of-relativity or quantum-mechanics to be delivered in the Middle
Ages, for instance? Rather improbable. As a side note, such an insight equally attends to such a
debate we currently entertain with respect to coming into contact with an advanced alien
civilisation. A transcendental virtue conceptualisation will hold that in the very first place such
a civilisation won’t be able to exist without the necessary virtue construct (as successions of
metaphysics-of-absence\{(implicited-epistemic-veracity-of- nonpresencing←perspective-
ontological-normalcy/postconvergence\}) insights yielding in-lockstep the successively more
ontologically profound metaphysics-of-presence\{(implicited←nondescript/ignorable–void ←as-
to- presencing—absolutising-identitive-constitutedness\}) as implied by ontological-
normalcy/postconvergence\) that enables it to come into being; as necessarily they will be base-
institutionalising, universalising, positivising and probably deprocrypticising, such that it will
be untenable and inconsistent to have cosmic travellers that are savage-inclined or of a
medieval age, for instance, going by the mere human-subpotency–aperia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-

‘notional–firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor. Insightfully thus, while ontological-normalcy/postconvergence expands human ontological possibilities (comprehensively), it also leads to a growth in human institutionalised virtue disposition in equivalence which sustains such ontological development. However wary we should be with the possibility of nuclear annihilation, we equally can recognise that the ‘better’ registry-worldview/dimension-level, in terms–as-of-axiomatic-construct of its relative transcendental virtue conceptualisation, to handle such weapons is the present one (positivistic) with regards to the possibility of averting a global annihilation compared to say feuding tribal or medieval setups (that is, if by some imaginary circumstances they could have access to and utilise such weapons). This points out that virtue is rather an inherent and necessary construct of ontology, existentially speaking; as the transcendental construct that enables the expanding of the ontological possibilities of an animal of shallow limited-mentation-capacity–{as of relative apriorising/axiomatising/referencing–{of-attendant-ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity }—constitutedness—in-preconverging-entailment} to deeper limited-mentation-capacity–{as of relative apriorising/axiomatising/referencing–{of-attendant-ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity }—conflatedness—in-{preconverging-disentailment-by}–postconverging-entailment} by enabling ‘solipsistic moulting’ (as ‘intemporal-disposition individuation as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality’ at uninstitutionalised-threshold states, with a human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-

It is mainly a ‘Différance-disambiguation-of-ontologically-veridical–meaningfulness-and-teleology’ that can establish the ontological-veridicality-of-meaningfulness precisely by disambiguating the effective ontological-references of the various notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence> individuations, and so not only at an instant or act or specific circumstance or context (which is rather an act construal and not a being/ontological construal) but projectively in their retrospective-to-present-to-prospective existentialism-deambulation/meandering which provides the full insight of notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence> individuations mental-dispositions/meaningful-references/ontological-references/contending-references as ontological-entrapment. Such a

Going respectively by the Sartrean and Derridean principles for establishing ontologically-veridical-meaningfulness, that is, ‘existence precedes/defines essence’ or ‘there is nothing outside the text’ in evaluating ‘same-terms-of-expressions (seemingly-same-implied-meaningfulness)’ with respect to their veridical-ontological \textsuperscript{51}reference-of-thought—\textsuperscript{2}categorical-imperatives/axioms/registry-teleology\textsuperscript{[10]},-for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation in various instances as of the circularity/recurrence/repetition/repeatability \textsuperscript{0}delineating existential-transitioning-or-iterability-trace-of-narratives-as-dots_or_attendant_ontological-contiguity—\textsuperscript{educed— existentialising/contextualising/textualising-contiguity—reification_or_intrinsic-reality—ontological-coherence_or_superseding—oneness-of-ontology\textsuperscript{[1]} by \textsuperscript{56}maximalising-recomposuring-for-relative-ontological-completeness\textsuperscript{[58]}—unenframed-conceptualisation. requires their subjection to ‘ontological-reconstituting—as-to-conflatedness’/deconstruction to establish the existential context of reality thus establishing ontologically-veridical-meaningfulness. On the other hand, the postlogic/psychopathic disposition (and by extension temporal-dispositions conjugated-postlogism /preconverging-or-dementing—integration dispositions) adhere to an elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—attendant—ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity basis of meaningfulness on the ground that plausibly construing a false-premising to an existential-context-of-reference-narrative ‘provides licence’ to then (‘recursively’ in concurrence—in the case of the postlogic/psychopathic character, progressively—in the case of a conjugated-exacerbatory and conjugated-opportunism characters, and regressively—in the case of a conjugated-ignorance and conjugated-affordability characters) comprehensively articulate any possible existentially-unreal-and-abstract-narratives (on the basis of a conceptualisation of mere hollow-constituting—as-disjointed-misappropriation-of-meaningfulness-and-failing-

So the latter disposition, and so particularly with the postlogic/psychopathic mindset, is to induce or generate or exploit any plausible existential-context-of-reference-narrative to then unleash slanted-and-formulaic
hollow existentially-unreal-and-abstract narratives by concurrently-false-premising on the plausible existential-context-of-reference-narrative. In other words, the postlogic/psychopathic individuation character gets that there is a human mental-reflex to grasp ontologically-veridical-meaningfulness on ‘static-or-abstract non-veridical/vacuous-state (abstract \( \text{reference-of-thought– categorical-imperatives/axioms/registry-teleology}^{(0)} \)) of essence-of-meaningfulness terms, so long as their existential basis is established, including and critically for its purpose, where it is so deceptively implied’, to artificially or opportunistically construe a plausible existential-context-of-reference-narrative which then ‘provides licence’ to articulate existentially-unreal-and-abstract-narratives in hollow-constituting-as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation concurrently-false-premising on the initial plausible existential-context-of-reference-narrative, with the idea that that human mental-reflex will by reflex naively-and-wrongly imply the existential/contextualisation ontological-veridicality of its generated slanted-and-formulaic hollow existentially-unreal-and-abstract-narratives; and so, in terms–as-of-axiomatic-construct of the ‘apriorising–reference-of-thought-elements/apriorising–registry-elements (out of attendant–ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity–<reifying-or-elucidating-of-prospective-relative-ontological-completeness–of-reference-of-thought–devolving-as-of-instantiative-context>)’ as implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology \( \text{(0)} \) as highlighted priorly. This preconverging-or-dementing–apriorising-psychologism is in contrast with a postconverging-or-dialectical-thinking–apriorising-psychologism (when the latter is of inappropriate/bad or appropriate/good supplanting–conviction-as-to-profound-supererogation—of–‘attendant-intradimensional’–postconverging/dialectical-thinking–apriorising-psychologism) which is always inclined to ensure that the succession-of-narratives it propounds are tied to successive-instances as of the

gapersion-of- reference-of-thought<as-preconvergingly-apriorising axiomatising referencing-in-nonconviction/madeupness/bottomlining-as-to-shallowsupererogation phenomena), there is bound to be more or less a dumb-and-dumb effect of summative social acquiescence to a superstitious mindset/reference-of-thought in a non-positivism/medievalism setup, that will in the short term temporal perspective be a drawback to such a transcendental projection of positivistic mental-disposition, and likewise there will inevitably be more or less be a dumb-and-dumb effect of summative social discontentment where a transcendental notional-deprocrypticism mental-disposition is implied in a procrypticism setup. This shows that going by human-subpotency-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-notional-firstnaturallyness—temporal-to-intemporal-dispositions<so-construed-as-from-perspective-ontological-normalcy/postconvergence—existentialism-form-factor, in all registry-worldviews/dimensions the more or less summative mindset/reference-of-thought is bound to be incremental/disjointedness-as-of-reference-of-thought’ and not transcending such that would-be emancipating individuation’s projection (that is, if ontologically pertinent) is necessarily the middle to long run construed as of de-mentation ⟨supererogatory—ontological—de-mentation-or-dialectical—de-mentation—stranding-or-attributive-dialectics⟩ percolation-channelling<in-deferential-formalisation-transference> for the necessary ‘postconverging—or-dialectical-thinking’ psychology or psychology-of-mentation-dynamics or natural—psychological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring accompanying such prospective transcendental institutionalisation. That is, by transcendence-and-sublimity/sublimation/supererogatory—de-mentativity is meant dispose to construe the ontological resolution of an intradimensional ontological/being-construal-defect transcendentally/transdimensionally/interdimensionally; for
instance, capable of putting in question non-positivism/medievalism intradimensional superstition as of the registry-worldview defect in the first place supersedingly/transcendentally rather than a usual attendant/incidental reciprocity of superstitious contentions or capable of putting into question procrypticism/perversion-of-positivistic-meaningfulness with its corresponding postlogism -and-conjugated-postlogism\(^1\) of psychopathy and social psychopathy as of the registry-worldview in the very first place supersedingly/transcendentally rather than a temporally reciprocal equivalence. Basically, such an intemporal-disposition/ontologically-veridical transcendental disposition storied-construct/ontologically-valid-narration will be of imbricatedness/threadedness/recomposuring as existential-tracing of ontologically-veridical-meaningfulness reflecting temporal-dispositions rather in ‘virtuality-or-Being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-existential-reference’. The fact being that, in the short term, the temporally-minded recurrent-utter-institutionalised individuation has no place for the ‘transcendental rulemaking-over-non-rules—apriorising/axiomatising/referencing–psychologism,\(\langle\)as first-level presencing—absolutising-identitive-constitutedness\(\rangle\) of reference-of-thought’ apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument notion’ (for base-institutionalisation) of the intemporal-minded individuation; the temporally-minded ununiversalised individuation (in base-institutionalisation) has no place for the ‘transcendental rules universalising notion’ of the intemporal-minded individuation; the temporally-minded non-positivism/medievalism individuation has no place for the ‘transcendental positivising/rational-empiricism notion’ of the intemporal-minded individuation; and likewise, prospectively, the temporally-minded procrypticism individuation has no place for the ‘transcendental deprocrypticism/rational-realism notion’ of the intemporal-minded individuation; rather as the subontologisation/subpotentiation moves from slantedness-effect, miscuing towards sub-par/formulaic-association/temporal/alibi conventioning-rationalising in
all the different registry-worldviews/dimensions, ‘for intradimensional functionality sake a transcendental articulation is beyond the intradimensional summative mental-disposition of value-referencing’, as the summative mental projection of individuals is more of an earthily life-span conceptualisation rather than transcendental or poorly appreciative of the transcendentalism that is de-mentatively/structurally/paradigmatically responsible for present reference-of-thought to project to the postconverging-de-mentating/structuring/paradigming need of prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. This further points out that with regards to ‘metaphysics-of-absence-{implicated-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>⟩ projection (in overcoming the illusion-of-the-present/present-consciousness/mirage/epistemic-totalising~self-referencing-syncretising), across all registry-worldviews/dimensions from prior to prospective there are basically two ways by which the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology works with respect to the same intrinsic-reality/ontologically-veridical-meaningfulness; for the ‘intradimensional reflex’ sake of having a coherent functioning by sharing a common/same reference-of-thought as it is obvious that if one was to drop in a thoroughly non-positivism/medievalism setup and insisted absolutely to articulate meaningfulness in positivistic terms, there will be no mutual understanding, at least at the (positivistic) uninstitutionalised-threshold of that medieval setup, whether at one moment or another it fails intrinsic-reality/ontologically-veridical-meaningfulness/intemporal-preservation-entropy-or-contiguity–or–ontological-preservation, any registry-worldview/dimension as prior wrongly represents that such its registry-worldview’s/dimension’s-uninstitutionalised-threshold–defect–<as-Being-or-ontological-or-existential–defect> is non-transcendable/unsupersedable by its <amplituding/formative– epistemicity>totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as ‘metaphysics-of-presence-{implicated-‘nondescript/ignorable–void ’}.
as-to-presencing—absolutising-identitive-constitutedness thus upholding its soundness-or-ontological-good-faith/authenticity reference-of-thought by ignoring the registry-worldview’s/dimension’s-uninstitutionalised-threshold–defect while the prospective registry-worldview/dimension implying a new reference-of-thought that de-mentatively/structurally/paradigmatically resolves the prior’s registry-worldview’s/dimension’s-uninstitutionalised-threshold–defect represents the prior as prior/transcended/superseded and hence unsoundness-or-ontological-bad-faith/inauthenticity reference-of-thought/preconverging-or-dementing–apriorising-psychologism/suprastructurable (at that uninstitutionalised-threshold). The bigger point here is that just as we will represent the non-positivism/medievalism placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology allusions to superstition in its <amplituding/formative-epistemicity>totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as utterly preconverging-or-dementing–apriorising-psychologism and unintelligible/existentially-suprastructured, a notional–deprocrypticism placeholder-setup/mental-devising-representation/mentation/{cumulated/recomposured}–consciousness-awareness-teleology of procrypticism–or–disjointedness-as-of-reference-of-thought mindset/reference-of-thought will rather be construed as decentered and preconverging-or-dementing–apriorising-psychologism, unintelligible/existentially-suprastructured with respect to ‘our positivism–procrypticism terms of meaningfulness’ that is, at the (deprocrypticism) uninstitutionalised-threshold in order to effectively and adequately reflect the requisite metaphysics-of-absence–{implicated-epistemic-veracity-of- nonpresencing-<perspective–ontological-normalcy/postconvergence>} necessary to act as the referenced/registered/decisioned–psychical-backdrop for futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of meaningfulness-and-teleology as of prospective deprocrypticism, as implied by de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation-stranding-or-attributive-dialectics) as-uninstitutionalised-threshold-suprastructuring de-mentation-(supererogatory-ontological-de-mentation-or-dialectical-de-mentation-stranding-or-attributive-dialectics) that is the mechanism of a ‘postconverging-or-dialectical-thinking’-psychology or psychology-of-mentation-dynamics or natural-ontological-dynamics’ psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring for prospective institutionalisation. This latter notion is important as with all psychoanalysis whether of an individual or social conceptualisation nature, the idea of recognising/referencing/registering/decisioning the registry-worldview’s/dimension’s-uninstitutionalised-threshold-defect-as-Being-or-ontological-or-existential–defect is central to superseding it, and so the idea of implying preconverging-or-dementing-apriorising-psychologism/out-of-phase/dialectically-primitive is ‘beyond the notion of an idle denotative exercise’, be it validly so, and the meaningfulness of such conceptualisations certainly do not carry the poorer connotations of temporal/banal mental-dispositions, but rather it is technically a necessary and useful ontological conceptualisation in the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring from our shallow limited-mentation-capacity-as of relative apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—constitutedness-in–preconverging-entailment to deeper limited-mentation-capacity-as of relative apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—conflatedness-in-{preconverging-disentailment–by}–postconverging-entailment. Thus psychoanalysis is actually in effect an existentialism process of human skewing towards intemporal-disposition as we construe meaningfulness and value-referencing, and so beyond the Foucauldian referenced critique of a
relatively ‘economic/traded/exchange/battered’ conceptualisation of psychology we know of when we talk of psychoanalysis in the subject matter of psychology, but rather construed as a natural ontologically-driven ‘postconverging-or-dialectical-thinking’—psychology or psychology-of-mentation-dynamics or natural~psychological-dynamics’ behind human secondnaturings across the successive institutional-cumulation/institutional-recomposure-{as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>)] in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity”—of-the-human-institutionalisation-process”. As a side note though, it is important to grasp that the registry-worldviews/dimensions as the institutional-cumulation/institutional-recomposure-{as-to- historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>)] are actually broad categorisations and that actually human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology(10) of intrinsic-reality/ontologically-veridical-meaningfulness varies (though not varying in terms–as-of-axiomatic-construct of the central defining conceptualisation of each registry-worldview/dimension) within each registry-worldview/dimension from its early to later spectrum, given human more or less passive continuous psychoanalytic readjustment to ‘ontological experience’. For instance, there is certainly a marked difference in scope and depth between the positivistic construct in the th century with its nature in the late 20th and early 21st century. Further to the two elucidations made of postlogism /psychopathic and conjugated-postlogism /preconverging-or-dementing-integration distortion/perversion of essence-of-meaningfulness that go on to endemise psychopathy and social psychopath with reference to with the ‘Différance-disambiguation-of-ontologically-veridical—meaningfulness-and-teleology(10)’ and its ‘Différance-existential-transitory-articulation-of-the-protruction-of-

This ‘existentialist-shortfall’ has to do with the fact that it will be ‘a waste of too much mental energy’ to be verifying in detail the ‘apriorising–reference-of-thought-elements/apriorising–registry-elements (out of attendant-ontological-contiguity–edeuced–existentialising/contextualising/textualising-contiguity –<reifying-or-elucidating-of-prospective-relative-ontological-completeness -of- reference-of-thought- devolving-as-of-instantiative-context>)’ of implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology –of every interlocutor, and so mentally the human mind has developed ‘a referencing scheme of trusting that involves closeness, familiarity, reputation and appearance’; but such a scheme is strictly speaking ontologically incomplete and can be undermined and usurped, but it is standard as it ‘saves mental energy and time’. In other words meaningfulness and reference-of-thought is only veridical as an ‘ontologically-veridical construct’ validated in the construal of the circularity/recurrence/repetition/repeatability delineating existential-transitioning-or-iterability-trace-of-narratives-as-dots_or_attendant-ontological-contiguity edued-existentialising/contextualising/textualising-contiguity reification_or_intrinsic-reality–ontological-coherence_or_superseding–oneness-of-ontology by maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation that establishes ontologically-veridical-meaningfulness. The centrality of ‘concurrently-false-premising-of-meaning thread/tracing’ in the entire process of postlogism and conjugated-postlogism /preconverging-or-dementing -integration lies in the fact that it provides the ‘as

<as-Being-or-ontological-or-existential–defect> (with regards to both postlogism and conjugated-postlogism); with the implication that there can’t be mutual contention but rather transversality--<for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–‘motif-and-apriorising/axiomatising/referencing’ wherein the superseding (and sound) reference-of-thought can only construe of the superseded (and non-veridical) as preconverging-or-dementing–apriorising-psychologism/unsoundness-or-ontological-bad-faith/inauthenticity –of– reference-of-thought/oblongated requiring psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring to transcend into the superseding reference-of-thought in the very first instance before any ontologically-veridical pretence to mutual contention. The nature of how ‘concurrently-false-premising-of-meaning thread/tracing’ arises can equally conspicuously be understood at childhood psychopathy situation wherein the childhood psychopathy blatantly attempts to initiate a dereifying narrative like in the case of spilling water on a chair highlighted before to which if concurred to by the interlocutor will be the basis for the child to assume apparently normal logical contentions but fundamentally based on this distorted deceptive high-point of concurrently-false-premising as of reference-of-thought–categorical-imperatives/axioms/registry-teleology–for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology.

It is basically the same process with an adult psychopath but for the fact of the highly opaque nature of adult psychopath mental-disposition unlike a child psychopath, and as previously explained is ‘maturated’ in its theme on issues that are rather of serious import, ‘spatialising’ (to confound by not acting postlogically/disontologising-perverted-outcome-sought-precedes-existentially-veridical–‘attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness within the same spatialisation of relevant social interlocutors, which may raise the hollow nature of its narratives from cross-examination), being ‘indirect’ (by increasingly

Such a ‘Différance-disambiguation-of-ontologically-veridical—meaningfulness-and-teleology’ is rather about the ontological-veridicality of reference-of-thought. It should not be confused with the more familiar issue involving existentially veridical logical-dueness and from thence enabling the construing of relevant soundness or unsoundness of logical-processing-or-logical-implication—supposedly-apriorising-in-conviction-as-to-profound-supererogation, and this doesn’t put-into-question the soundness/appropriateness or unsoundness/inappropriateness of reference-of-thought. Thus unlike in the instance of defect—of—logical-processing-or-logical-implication—supposedly-apriorising-in-conviction-as-to-profound-supererogation of the registry-worldview’s/dimension’s—reference-of-thought-for-social-functioning-and-accordance the idea of falling-back to the same exercise to correctly do the exercise (logical-processing-or-logical-implication—supposedly-apriorising-in-conviction-as-to-profound-supererogation) in a same or different circumstance, is invalidated when dealing with perversion-of—reference-of-thought—as-preconvergingly—apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation as registry-worldview’s/dimension’s-uninstitutionalised-threshold—defect—<as-Being-or-ontological-or-existential—defect> (with regards to both postlogism and conjugated-postlogism); with the implication that there can’t be mutual contention but rather transversality—<for-sublimating—existential-eventuating/denouement>—of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing wherein the superseding (and sound) reference-of-thought can only construe of the superseded (and unsound) as preconverging-or-dementing—apriorising-psychologism/unsoundness-or—

Critically, the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\(^4\) implications are utterly different between such a familiar \(^5\) logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation and a ‘Différance-disambiguation-of-ontologically-veridical—meaningfulness-and-teleology\(^6\)’ as the latter calls upon \(^7\) de-mentation-(supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics) in setting up two dialectical \(^8\) reference-of-thought, wherein the one as prior/present/transcended/superseded is preconverging-or-dementing\(^9\)—apriorising-psychologism and the other as prospective/transcending/superseding is postconverging-or-dialectical-thinking\(^1\)—apriorising-psychologism. This is the only basis for establishing the relative ascendancy of divergent reference-of-thought (not to be confused with logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation convincing’ as this by definition will instead make circular references to a prior reference-of-thought that is already established and uncontested in the very first place; thus highlighting the notion that it is the veridicality of the prospective reference-of-thought that precedes and defines the pertinence of an exercise of logical-processing-or-logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation convincing’ whereby interlocutors already share this common reference-of-thought, and not the other way around). Such a postconverging-or-dialectical-thinking–apriorising-psychologism over preconverging-or-dementing–apriorising-psychologism
meaningfulness-and-teleology\textsuperscript{100} highlights that the prior preconverging-or-dementing\textsuperscript{20} apriorising-psychologism\textsuperscript{57} reference-of-thought faces a ‘Heideggerian (engaged)-destruktion’, as it is not about substituting our species but enabling the further development of our same species as institutionalisation/intemporalisation, articulated as a Derridean deconstruction involving ‘ontological-reconstituting–as-to-conflatedness’ of the prospective postconverging-or-dialectical-thinking\textsuperscript{21} apriorising-psychologism\textsuperscript{84} reference-of-thought over the hollow-constituting\textsuperscript{<as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation>} of the prior preconverging-or-dementing\textsuperscript{10} apriorising-psychologism meaningful-reference/anchoring-of-meaning/ontological-reference. The underlying idea here being that faced with incidental issues arising in various effective social contexts, the ‘ontological/intemporal postconverging–de-mentating/structuring/paradigming approach’ is to have at hand a ‘universal cadre’ that conceptualises and is geared towards attending-to/resolving all such and other incidental issues as it is suprastructural to all such incidentals. It also points out that the exercise of institutionalisation/intemporalisation is not an exercise of human emanance transformation from temporal-dispositions to intemporal-disposition (as we wrongly imply by intuition) but a registry-worldview’s/dimension’s institutionalisation or secondnaturating exercise, explaining why we are continually the same species from utterly-institutionalisation to prospectively deprocrypticism. Going by our mirage/illusion-of-the-present/present-consciousness we will possibly think otherwise, but this rather points to how our forerunners felt psychologically when their worlds built of deities and later essences were being put into question by ‘an increasing realism insight’ of an intrinsic-reality that is ontologically given and

Thus, such a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ ‘psycho-ontological-tautologisation/psycho-existential-reference conceptual-scheme’ involves, mobilising an ‘ontological-tautologisation/existential-reference conceptual-scheme’ (like a hermeneutics-derived psycho-ontological, bio-ontological,
econo-ontological, mathematically-ontological, etc.) construed as of ontological-normalcy/postconvergence teleology thus postdictory (as metaphysics-of-absence (implicated-epistemic-veracity-of- nonpresencing) conceptualisation), is of ‘subpotent-mimetic-echoness-derivation-within-the-full-potency of ontology/intrinsic-reality/of-referential-nature/of-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency ‘~sublimating–nascence,-disclosed-from-prospective-epistemic-digression, as the given subject-matter in a full-blossoming unison of second-order ontology with first-order ontology. Insightfully, superseding–oneness-of-ontology points out that human ascription of knowledge into various categories as science, humanities, arts, etc. is actually an unnatural differentiation that has to do with arbitrary human categorisation out of practicalities of division of labour and organisation, while equally leading to confusions. Actually knowledge as a whole imply the two basic elements: its conceptualisation and the causal effectiveness thereof of the conceptualisation. Knowledge conceptualisation and causal effectiveness can successively be construed in three respects; specific, intermediary and general, with all aspects of conceptualisations being notionally philosophical as providing meaningful insights while all aspects of causal effectiveness provide confirmatory and predicative-insights to meaningful insights. (Interesting it is important to note that empiricism speaks of the possibility of knowledge revelation by the inherent nature of the subject-matter and not an abstract approach as often naively construed; with the implication that empiricism can be construed as deriving from a confirmatory analysis of a mere insight, observation or experiment depending on the inherent nature of the said subject-matter, so long as this then allows for ~amplituding-formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity.) Thus notionally speaking all human knowledge is philosophical knowledge as
being about meaningful insights. For practicalities, the general basis for establishing conceptual pertinence as of the more general abstract notions of knowledge is attributed to the philosophical disciplines (involving philosophy and the philosophies of subject-matters including sciences, and its extension in the humanities and social sciences) even though in further practical terms such construal will be punctually undertaken as well when relevant to specific disciplines of immediate cause-and-effect construals/conceptualisations. This equally practically partakes in the denotative and connotative disambiguation of subject-matters. The practical basis for intermediate conceptual pertinence has to do with the inter-relation and delineating of subject-matters with a lesser direct implication of the philosophy, and even less so when it comes to the practical basis for specific conceptual pertinence as practised within subject-matters/specialisms themselves. Thus in human practical terms, knowledge can be construed as a wheel made up of three parts with the central part viewed as the hub of the wheel (philosophical) that provides control (as asking the most basic notional questions of meaningfulness and logic), the outer part of subject-matter (tyre) that connects with the ground (as causal effectiveness asking the more immediate questions of specific domains of nature and reality) and the middle part as the rim and spoke of the wheel holding the other two parts together (providing logical coherence, construed both within subject-matters/specialisms and philosophical disciplines). For practical purposes though, any of these conceptualisation – logical-coherence –causal-effectiveness dispositions can be overemphasised or underemphasised, but it is critical to grasp that any such underemphasising or overemphasising doesn’t speak of a change of ontological-veridicality/intrinsic-reality but a human practicality purpose (conventioning) which pertinence lies in not losing sight of and ultimately recovering the superseding ontological-veridicality/intrinsic-reality. This basic conception of knowledge fundamentally explains what to expect of the philosophical as first-order ontology or the sciences including all other applied studies of second-order ontology. Often times, issues are
raised which underlying presumption/presupposition/premise should actually be wholly or partially of fundamental philosophical conceptualisation of meaningfulness-and-teleology but naively purported to be answered wholly as of a second-order ontology terms. Broadly speaking philosophy as the first-order ontology (acting as a cog) has been more about providing the overall scope for meaningful insights and the broader conceptual background for other subject-matters while science and other second-order ontology disciplines (as the wheel that meets the ground) draws on a sound and broad philosophical conceptual background to articulate causal effectiveness (as of the inherent nature of their subject-matters). It is rather naïve to depart from a philosophical angle and try to imply causal effectiveness of a natural science nature (rather than effective validation techniques relevant to transversal nature of philosophical conceptualisation) just as the same holds true the other way round. The reality is that if science was the best method to answer philosophical questions as of its subject-matter, then it would have already taken over from philosophy as practised and the reverse holds true as well, as in reality it is all about human practical organisation in construing a superseding-oneness-of-ontology while dealing with our given limited-mentation-capacity-deepening. The fact is science is de-mentatively/structurally/paradigmatically bound to construe causal effectiveness as of the inherent nature of its domains of reality and philosophy is fundamentally conceptualising by its very nature and providing the broad conceptual background for all human knowledge with the implication that without such conceptualisation the historical insight for the need and upholding of the sciences and scientific method wouldn’t have come about while equally defining the limits of what science can achieve. Insightfully and beyond their practical differentiations, with all knowledge actually being conceptually philosophical, a lot of science is actually a sort of impromptu and punctual heuristic philosophy at sciences subject-matter level. So it is rather critical here to distinguish between a human denotative and segmenting exercise (as not determining inherent reality) which is conventioned knowledge and
the inherent connotation of the reality of knowledge as the superseding knowledge ontology inherent structure. In that sense, one often misconstrued notion with respect to notional philosophy is that it is not as successful as the sciences, which is a naïve conceptualisation as the very idea of such notional philosophy is its conceptualising irrigation of second-order ontology with the more immediate and amplituding/formative–epistemicity–causality–as-to-projective-totalitative–implications–of–prospective-nonpresencing–for–explicating-ontological-contiguity success being not only a success of the second-order ontology but a percolated success of notional philosophy as of its historical development of human conceptualisation in inducing the second-order-ontologies and irrigating them with meaningful-insights, whether we talk about the sciences, jurisprudence and law, ethics, engineering, aesthetics, etc. (This insight means that the classical conception we have of philosophy as mainly about great philosophical thinkers is incomplete as we equally need to understand the ‘organic-knowledge’ as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality of other thinkers as they were developing second-order ontologies, and analyse such thoughts in philosophical terms and make these part and parcel of philosophy without necessarily going deeply in their concrete ‘operant mechanical-knowledge’ except where this clarifies their ‘organic-knowledge’. That’s why the work of such transcendental thinkers like Newton, Galileo, Einstein, Bohr, Pasteur, etc. are ‘more than just technicalities’ as these involve a certain commitment as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality which needs to be properly relayed not only in the further development of the ‘mechanical-knowledge’ they advanced but equally about elucidating the profundity of knowledge itself. This insight is equally valid with respect to great artists like Michelangelo, among others. While critically, highlighting how human emancipation has been associated with
such ‘organic-knowledge’ brought by scientists, artists and philosophers as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality across various epochs, such that the history of philosophy is much more than just biographical and analytical accounts of past masters but further involves the active relation of these in construing the ‘becoming-and-emancipating human psyche as of individual and social implications then and now’.) ‘Notional philosophy’ as articulated above is the very profundity behind the human (‘social framework of intersolipsistic deambulation’) imagination, projection, development, articulation and conceptualisation-resourcing possibilities for all second-order ontologies; not so as an instant present development (of philosophers and philosophy-impacting scientists and artists) but rather as of its historical development, accrual and drive into today’s second-order ontologies, as inventing the overall knowledge psyche and their perspectives in the very first place. A notion that is often hardly grasped because of the poor imagination of the notional philosophical work across epochs inducing human epistemicity-totalising~renewing-realisation/re-perception/re-thought, and psychically and institutionally bringing about our present conventioned knowledge being naively related to as if our present mentation-capacity and insights are simply a given, lacking a full appreciation of prior notional philosophical transformations of mindsets/"references-of-thought/psychologisms and human developments of knowledge construal/conceptualisation, and correspondingly lacking a full appreciation of prospective overall human knowledge development possibilities of future philosophical epistemicity-totalising~renewing-realisation/re-perception/re-thought as of a prospective mindset/reference-of-thought/psychologism for the construal/conceptualisation of all human knowledge. It should be noted that this articulation about the role of notional philosophy speaks of the ontologically philosophical beyond just conventioning/classical sense of conceptual philosophy. That is, a
A scientist that develops insights about issues of philosophical import is ontologically contributing to philosophy even though qualified as a scientist by conventioning (as the natural ontological construct of knowledge as intrinsic-reality/ontological-veridicality doesn’t recognise our artificial delimitations of knowledge organisation), just as the reverse equally holds true as well. Consider that Aristotle set out as a philosopher but in many ways has turned out to be the true father of science. Notional philosophy in the bigger framework construed of organic-knowledge itself as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as the superseding drive behind the ‘inventing/creating’ of all human technicalities/mechanical-knowledge refers to the mental-disposition to break from ‘ordinary apathy and constraining framework of secondnatured institutionalisation’ to rearticulate dimensionality-of-sublimating—\langle \text{amplituding/formative} \text{supererogatory-de-mentativeness/epistemic-growth-or-conflatedness} /\text{transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation} \rangle projection underlying the ‘inventing/creating’ of prospective secondnatured institutionalisation possibilities as prospective knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue. Ultimately and beyond shallow technicalities/professions of presences as has been variously and decisively the case throughout humankind history, the most important philosophical work is the preservation of the human existential tale in prolongation as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality by ‘maintaining a contemplative distance/detachment from ordinary human blithe’ susceptible to render meaningfulness-and-teleology a closed-structure (as merely-exploiting-Being-as-of-its-presence-state-with-poor-regards-for-Being-underdevelopment-and-development-potential-construed-as-nihilism as of \langle \text{amplituding/formative} \text{wooden-language} \rangle

We can’t be certain about the ontological-veridicality of ‘separate dots as separate narratives’ themselves as the 3 different interlocutors can all express ‘the same-terms-of-expressions/seemingly-same-implied-meaningfulness’ going by their mental-dispositions with

The reason why ‘separate dots as separate narratives’ lead to postlogic and conjugated-postlogic faulty-mentation-procedure-deception-or-urge is that their extrapolation is actually an extrapolation of perversion-of-reference-of-thought—as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > of ‘same-terms-of-expressions/seemingly-same-implied-meaningfulness as if supplanting—conviction-as-to-profound-supererogation —of-‘attendant-intradimensional’-postconverging/dialectical-thinking —apriorising-psychologism’ whereas retracing of the mental-disposition foregoes elaboration-as-to—mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation—outside—attendant-ontological-contiguity —educed—existentialising/contextualising/textualising-contiguity of separate dots as separate narratives, and thus is existentially involved in construing the reality to the point of revealing ‘disjointedness-as-of-reference-of-thought’ misappropriated meaningfulness-and-teleology in arrogation in the trace-of-successive-dots-as-{hollow}-narratives that shines the light on the fundamental driver/—amplituding/formative—epistemicity—causality—as-to—projective-totalitative—implications-of-prospective—nonpresencing,—for-explicating—ontological-contiguity of the postlogic and/or conjugated-postlogic interlocutor as well as the

failing-intemporal-preservation/extrapolating/inferring to derive essence-of-meaningfulness is not a credible notion with respect to a human animal of notional-firstnatures—temporal-to-intemporal-dispositions—so-construed-as-from-perspective—ontological-normalcy/postconvergence wherein ‘same-terms-of-expressions/seemingly-same-implied-meaningfulness’ is bound to be perverted by temporal-dispositions, though within institutionalised/intemporalised-thresholds-of-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation secondnaturings, for instance, with respect to the fact that a medieval postlogic phenomenon like witchcraft cannot be credibly implied both in terms—as-of-axiomatic-construct of eliciting abstract/extrapolating/inferring hollow-constituting—as-disjointed-misappropriation-of-meaningfulness-and-failing-intemporal-preservation nor existential-transitioning/iterability-tracing-of-dots-as-hollow-narratives in our present institutionalised positivistic registry-worldview. Vitally, with regards to postlogism and conjugated-postlogism, it is always about ‘falsely and parasitically/co-optingly’ staking a claim to the reference-of-thought in order to wrongly elicit its implied—logical-dueness-or-scapes, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology to a prospective interlocutor, and so recursively (psychopathic/postlogic-character), progressively (conjugated-exacerbation and conjugated-opportunism characters) and regressively (conjugated-ignorance and conjugated-affordability characters). Generally, this insight harkens back to the previous elucidation with regards to the BODMAS characters where the pure arithmetic operation as a deductive/inferring/extrapolation exercise is no longer valid when the fundamental axiom is breached due to a pathological condition, and with the ‘lack of constraining social universal-transparency’—{(transparency-of-totalising-entailing—as-to-entailing—<amplituding/formative—epistemicity>totalising—in-relative-ontological-completeness} resulting in other temporal characters, beyond-the-consciousness-awareness-teleology—in-preconverging-existential-extrication-as-of-existential-unthought, operating
arithmetic as if the condition never existed; and thus there is a need for a retracing to establish
the existential reality of the breaching or non-breaching of axiomatic rules, before determining
the ontological-veridicality of the results of the arithmetic operations. In a further elucidation of
psychological/psychoanalytical basis of meaningfulness representation, this further confirms
the fact that temporality /shortness (shortness-of-register-of—meaningfulness-and-teleology) and intemporality/longness (longness-of-register-of—meaningfulness-and-teleology) are both basically the same notion of intemporality, but with temporal-dispositions (ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfitter-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) being rather in various grades of poor execution of intemporality/longness (longness-of-register-of—meaningfulness-and-teleology) but that in so doing such temporal-dispositions of individuation ‘falsely retaining their teleology/purposefulness’ as if of intemporal-disposition leading to their ‘pseudointemporality’ (and so with respect to their apriorising-registry-elements as implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology), inducing preconverging—dementating/structuring/paradigmig registry-worldview’s/dimension’s-uninstitutionalised-threshold—defect—<as-Being-or-ontological-or-existential—defect> where such false-retention construed as temporal-preservation-as-pseudointemporality—preservation is rather in conjugated-postlogism ; with the idea that this ‘false-retention’ by temporal-dispositions individuations results in ‘disjointedness-as-of—reference-of-thought’ misappropriated meaninglessness-and-teleology in arrogation with respect to ontologically-veridical-meaningfulness as meaningfulness become ‘an exercise in threshold-of—nonconviction/madeupness/bottomlining-in-shallow-supererogation—as-to—attendant—intradimensional—prospectively-disontologising—preconverging—dementing—apriorising—psychologism’ (whether-consciously-or-unconsciously), as can be so established as of the

Such a ‘postconverging-or-dialectical-thinking\textit{\rangle}—psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ ‘psycho-ontological-tautologisation/psycho-existential-reference conceptual-scheme’ will further highlight in contrast to the present ‘psychology of qualification/qualification-schemes’ that human psychology is actually much more of a becoming dynamic construct, rather than static, which wholly readjusts to human deepening grasp of ontologically-veridical-meaningfulness/intrinsic-reality/existence as a retrospective, present and prospective development; that collectively-and-inclusively-individuals-and-their-social-constructs do have latitude for the choices they make in existence more than and beyond the limits of personality traits and social character, and further that the human mind is ‘not irresponsible’ with respect to given personalities dispositions (whether with respect to abnormal
psychology or functional psychology) with the idea that such stances taken by a ‘psychology of qualifications/qualification-schemes’ induces a confounding-effect with respect to individual personalities themselves in assuming their self-emancipation possibilities and what they can aspire for together with their interveners/relators, whether social or clinical. Such insight do arise when we factor in that all along in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, human seconndaturing is actually the very central ontologically-led developmental element as the critical tool of human psychological renewal that enabled ‘an animal in many ways’ to emancipate itself developmentally across epochs such that the ‘insightful depth’ of such a developmental understanding of human psychology is necessarily much more than ‘a cultural universe of several decades of modernity’, as it conceives that human psychology is an ongoing active construct such that a ‘postconverging-or-dialectical-thinking—psychology or psychology-of-mentation-dynamics or natural~psychological-dynamics’ rather captures the ontological undercurrents that constantly redefine human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as it recognises that (and explains why) the mental-disposition/consciousness-awareness-teleology of a recurrent-utter-institutionalised mindset/ reference-of-thought varies from that of a based-institutionalised/ununiversalised mindset, the latter from that of a universalised/non-positivistic-or-medieval mindset, the latter from that of a positivistic/procrypticism mindset/ reference-of-thought (our own mental-disposition), and the latter from that of futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of prospective notional~deprocrypticism mindset, while not ignoring as well the intradimensional spectrum of variation within each mindset; and wherein de-mentation—(supererogatory—ontological—de-mentation—or-dialectical—de-mentation—or-attributive-dialectics) is the central
concept for such a succession of human ‘postconverging-or-dialectical-thinking’–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ renewal retrospectively, presently and prospectively, with ontological-normalcy/postconvergence teleology being the central determinant driving and defining human psychology construed by its metaphysics-of-absence as diminishing–human-epistemic-abnormalcy-or-preconvergence. Interestingly, psycho-ontological-tautologisation/psycho-existential-reference as a human disposition for correspondence/equalisation/squaring-off with existence/intrinsic-reality/ontology, as of subpotency-to-full-potency as qualified by recomposuring from shallow limited-mentation-capacity to deeper limited-mentation-capacity, speaks of the mind as an abstract ‘teleologically imbricated tautologisation/existential-reference’ (‘teleologically imbricated tautologisation/existential-reference’ implying: striving for ontological-normalcy/postconvergence, in-lockstep/intertwining of success-and-pseudosuccess/failure as institutionalisation-and-pseudo-institutionalisation/uninstitutionalised-threshold), as the teleological driving-seat of the body validating dualism as ‘imbricated dualism’; the human mind being rather ‘an abstract imbricated transcendable/maximalisable placeholder-setup-of-tautologisation/placeholder-setup-of-existential-reference for prospective ontological-normalcy/postconvergence superseding the human body, as entailing human existence’. This points out that the potency for ontological-normalcy/postconvergence is tautologically inherent.

It is thus not a coincidence that a Deleuzian approach and string phenomenology approaches intuitively develop the same insight about the need for ‘creative-spaces-of-expression/metaphors’ to be able to conceptualise by projective-insights on topics that critically highlight this more fundamental nature of
existential reality as a contextualising-contiguity of existence-potency—sublimating-nascence, disclosed from prospective-epistemic-digression—rules-of-apriorising/axiomatising/referencing that further epistemically unconceal the very-ontologically-same-existential-reality so construed from the perspective of our limited-mentation-capacity-deepening as of our relative-ontological-incompleteness—induced, ‘threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation’ <as-to-‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing—apriorising-psychologism’>, in order to avoid elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/infering of elucidation outside—attendant-ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity inducing ‘virtuality-or-Being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-existential-reference’. It is important to grasp here that elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/infering of elucidation outside—attendant-ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity are not ontologically wrong concepts in themselves as of abstract-construal but are ontologically wrong when implied in lieu of being-construal/existential-reference/existential-tautologisation as this leads to ‘virtuality-or-Being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-existential-reference’. Philosophically, this critically brings up the reality of how the ontological-veridicality of an ‘abstract-construal’ and a ‘being-construal’ can be established; going by human limited-mentation-capacity-deepening as of our relative-ontological-incompleteness—induced, ‘threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation’ <as-to-‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing—apriorising-psychologism’>. An abstract-construal is of vague-reference/vague-tautologisation, and is of existential import only as of a being-construal, and is effectively conceptualised by elaboration-as-to-mere-

ontologically deepest being-construal/existential-reference/existential-tautologisation, and
thus will be the universal nested-congruence of the comprehension of intrinsic-reality,

Critically important to grasp is that the notion of reference-of-thought-as-being-contrual/existential-reference/existential-tautologisation that implies ‘projective-insights of imbricatedness/threadedness/recomposuring as of attendant-ontological-contiguity<sup>68</sup>-educed-existentialising/contextualising/textualising-contiguity<sup>40</sup>-<reifying-or-elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context> as to existence-potency<sup>84</sup>-sublimating-nascence,-disclosed-from-prospective-epistemic-digression—rules-of-apriorising/axiomatising/referencing-that-further-epistemically-unconceal-the-very-ontologically-same-existential-reality/dynamic-cumulative-afereffect/aftereffect’, and should not mistakenly be confued with the notion of an abstract-construal since this is ontologically non-veridical as it will lead to virtuality-or-ontologically-flawed-construal/being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-existential-reference; as reference-of-thought as being-construal/existential-reference/existential-tautologisation makes reference to the comprehensive implications existentially with respect to mental-dispositions along the apriorising-registry-elements/anchoring-of-meaning-elements of implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology<sup>100</sup>, and involving the potency of both consciousness-awareness-teleology<sup>100</sup> representations and implications, for instance, the difference of the reference-of-
thought as an alchemist and a chemist is much more than just an on-occasion/incidental difference (difference in abstract-construal) with respect to elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidation-outside—attendant-ontological-contiguity—educated-existentialising/contextualising/textualising-contiguity of meaning but carries derived being-construal/existential-reference/existential-tautologisation differences with respect to their consciousness-awareness-teleologies and registry-worldviews/dimensions. In fact, ontological-reconstituting—as-to-conflatedness/deconstruction which always refers rather to the issue of reference-of-thought is actually of ‘projective-insights of imbricatedness/threadedness/recomposuring as of attendant-ontological-contiguity—educated-existentialising/contextualising/textualising-contiguity—reifying-or-elucidating-of-prospective-relative-ontological-completeness—of-reference-of-thought—devolving-as-of-instantiative-context as to existence-potency—sublimating—nascence—disclosed-from—prospective-epistemic-digression—rules-of-apriorising/axiomatising/referencing—that-further—epistemically-unconceal—the-very-ontologically-same-existential-reality/dynamic-cumulative—afereffect/aftereffect’ nature and it is about implying a prospective reference-of-thought, rather than just a différance (differentiation) as within the same prior/given reference-of-thought as of a basic abstract-construal. This is one of the reasons for its misapprehension as it implies an overall change in the reference-of-thought of appreciation which ends up putting everything ‘of old/of prior’ into question, contrary to the traditional analytical expectation of selective-or-limited critique/contestation usually of a non-transcendental nature. Insightfully, the overall relation of deconstruction as ontological-reconstituting—as-to-conflatedness to the existential framework of ontological-veridicality should further allay the confusion. Deconstruction is actually tautological with respect to intrinsic reality/ontological-veridicality.
because it is always about the same existential reality being dealt with by improving human limited-mentation-capacity-deepening\textsuperscript{24} as shallow-limited-mentation-capacity to deeper-limited-mentation-capacity ontological-reconstituting–as-to-conflicatedness\textsuperscript{1}; generating differing consciousness-awareness-teleology\textsuperscript{100} outcomes of the same existential reality whether talking of deconstruction at the registry-worldview/dimension or intradimensional level or individuation-level. Since it is always about the same existential reality, in effect the readjustment for intrinsic-reality/ontological-veridicality is actually a human ‘changing-of-the-psyche’/psychical-readjustment (psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) with its increasing-ontological-completeness or diminishing–human-epistemic-abnormalcy-or-preconvergence\textsuperscript{31} as implied by an ontology-driven ‘postconverging-or-dialectical-thinking’\textsuperscript{21}–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’, wherein placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\textsuperscript{100} scheduling ‘is not inherently sanctimonious’ (the naïve way every registry-worldview tends to relate to its mental-disposition) but is determined and shaped (by way of ‘de-mentation\textsuperscript{9} \langle supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics \rangle \textsuperscript{84} of reference-of-thought’) by construed ontological-veridicality. (It is important in this regard to distinguish what is implied by ‘incidenting’ not to be confused with ‘instantiation’, as incidenting implies an ‘abstract construction’ of the implication of logic or any ‘knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue’ that may or may not be of existential-instantiation, whereas instantiation refers actually to ‘actual existential instance’. It is critical to uphold this distinction with respect to the existentially attendant nature, as of imbricatedness/threadedness/recomposuring, of human limited-mentation-capacity grasp of all ‘intersolipsistic-intercessory-notions/notional–referential-notions’/knowledge including our grasp of logic or mathematics. As ‘abstractly-speaking’ there is no absolute certitude that in say a million years from now ‘a given as of yet unelucidated notion’, as a further imbricatedness/threadedness/recomposuring, will invalidate in a million years from now the ‘existential-instantiations’ validity of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue including logic and mathematics as we know of them today. Such distinction as of more immediate concern is to point out the subsuming precedence of existence as of its inherent intrinsicness beyond-and-
over human construal/conceptualisation of meaningfulness-and-teleology about it as at best the latter can only achieve as of its upper limit ‘a correspondence of construal/conceptualisation of existence’; noting here as well for coherence sake that such a statement cannot be made about existence itself as the absolute a priori, simply because any arising existential-instantiations no matter the strangeness or abnormality to what is traditionally thought or expected however imbricated/threaded/recomposured or unimbricated/unthreaded/unrecomposured is of the inherently valid scope of existence itself as of its superseding–oneness-of-ontology and precedence, thus meaningful.) Logic and mathematics (and any such knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue) are only as meaningful as when reflecting a reference-of-thought–categorical-imperatives/axioms/registry-teleology, for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology of a given <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality whether as of a science, a social science or social study, or even abstract logic ontology or abstract mathematics ontology; otherwise the naïve use of logic or mathematics (and/or any such knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional–referential-notions/articulations/virtue) become a relatively sub-ontological–as-to-the-limitation-of-human-subpotency-in-its-reifying-and-empowering-reflexivity-of-the-full-potency-of-existence’s–sublimating–nascence> exercise qualified more pertinently as ‘conceptual patterning’ as of apriorising/axiomatising/referencing–{of-attendant–ontological-contiguity –edued–existentialising/contextualising/textualising-contiguity }–constitutedness–in–preconverging-entailment in any such <amplituding/formative–epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality rather than actually conceptualising a reference-of-thought–
as-domain-of-construal-as-intrinsic-reality/ontological-veridicality as DNA-based genetics that explains genes and genetic principles is ontologically preceding and defining of how the knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional~referential-notions/articulations/virtue of mathematics, logic, information processing, etc. can further contribute in elaborating DNA-based genetics but it is rather naïve to think mathematics, logic, information processing or for that matter any other knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional~referential-notions/articulations/virtue like ‘mere research methodologies lacking critically the requisite ontological cogency’ can by themselves develop a reference-of-thought~categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/logicising/deriving/intelligising/measuring~meaningfulness-and-teleology of a given <amplituding/formative-epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality by such vague methodological mimicry. The latter at best induces a vague and blurred ‘conceptual patterning’ particularly in such domains-of-study where the positive or negative sanctioning by <amplituding/formative-epistemicity>causality~as-to-projective-totalitative–implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity is not immediately perceptible but rather remote like in the human sciences and to some extent as well with some studies in the natural sciences (where for instance the overall cogency of the whole experimental framework relative to the conclusions advanced of many a research study is dubious as not pertinently unconfounded). Supposedly a mathematical and/or statistical methodological analysis was to be introduced with regards to the underlying articulation herein and based say on an ‘arbitrary historiality/ontological-eventfulness/ontological-aesthetic-tracing,<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-
determinism’. grounded methodology on the basis of just vague impression’ it will rather be conceptual patterning. What is required is an underlying ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology’, for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology (as implied by this author herein, of ‘human limited-mentation-capacity construed as of ontological-normalcy/postconvergence metaphysics-of-absence-{implicated-epistemic-veracity-of- nonpresencing–⟨perspective–ontological-normalcy/postconvergence⟩}/Doppler-thinking as it elicits human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–notional–firstnatures—temporal-to-intemporal-dispositions–⟨so-construed-as-from-perspective–ontological-normalcy/postconvergence⟩–existentialism-form-factor <amplituding/formative–epistemicity> causality as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity’). The contention being that studies and research that do not develop their conceptual formulations validly and succinctly as the underlying framework of the <amplituding/formative–epistemicity> totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality but simply expect to dangle/associate methodologies including statistical and mathematical analyses are rather involved in vague conceptual patterning as of reference-of-though apriorising/axiomatising/referencing–{of-attendant ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity}—constitutedness in–preconverging–entailment. This insight is critical with respect to the validity of interpretations and conclusions in many experimental and study frameworks in the social sciences often ‘under-elaborating the ontological {reference-of-thought or axiomatic-construct of their study’ to which the implications of statistical and mathematical methodologies and analyses are naively brought to bear. This further speaks in the bigger scheme of things, of the need for the articulation of what

logical-dueness doesn’t even arise, no more than the logical-dueness of a non-
thought. This further explains ‘the socially conflicted nature of all implied transcendental constructs’ whether with prophesying metaphysico-theological constructs of early times reflected in non-universal and universal creeds up to our metaphysico-ontological worldviews implied transcendence-and-sublimity/sublimation/supererogatory—de-mentativity, and so as of human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional—firstnatures—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence>’—existentialism-form-factor; but then humankind has always been called upon to show itself capable of surpassing/surpassément for prospective possibilities to avail. This is exactly what underlies the notion of de-mentation—(supererogatory—ontological—de-mentation—onto-dialectical—de-mentation—limitation—imposed—structurally—paradigmatic—implied—vice-and-impediments)—in that relative-ontological-incompleteness—of—reference-of-thought ‘is not a logical issue/problem’ but ‘a Being/existential/ontological/axiomatic-construct problem’ with its de-mentative/structural/paradigmatic implied vices-and-impediments, as it is rather an issue of uninstitutionalised-threshold as of recurrent-utter-uninstitutionalisation uninstitutionalisation requiring base-institutionalisation institutionalisation, ununiversalisation uninstitutionalisation requiring universalisation institutionalisation, non-positivism/medievalism uninstitutionalisation requiring positivism institutionalisation, and our procrypticism—or—disjointedness—as-of—reference-of-thought uninstitutionalisation requiring prospective notional—depurposelessness institutionalisation as preempting—disjointedness—as-of—reference-of-thought institutionalisation, and so rather as of a transcendental habituation exercise construed as ‘ontological-resetting’ of placeholder-setup/mentation/consciousness-awareness—teleology of relative epistemic—abnormalcy/preconvergence for relative ontological-normalcy/postconvergence as of de-mentation—(supererogatory—ontological—de-mentation—onto-dialectical—de-mentation—limitation—imposed—structurally—paradigmatic—implied—vice-and-impediments).

Thus this further explains the very thorny difficulty of dealing with psychopathy and social psychopathy, because more than just an individuation phenotype and incidental/on-occasion phenomenon, it speaks of a registry-worldview’s/dimension’s our dimension, relative-ontological-incompleteness\(^{89}\)-induced,-‘threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation ≤as-to-attendant-intradimensional’-prospectively-disontologising–preconverging/dementing \(\langle\)apriorising-psychologism\(\rangle\) as \[^{8}\]procrypticism–or–disjointedness-as-of-reference-of-thought in endemising/enculturating it, thus in need of notional–deprocrypticism as preempting—disjointedness-as-of-reference-of-thought as an overall de-mentative/structural/paradigmatic resolution to the vices-and-impediments\(^{106}\) of our positivism–procrypticism registry-worldview/dimension. That is, with acts of perversion-and-derived-perversion-of-reference-of-thought-\(<\)as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation > ‘it is vague to consider just arriving at ontological-veridicality/intrinsic-reality construal of such acts as of the paradox of their universally implied prior relative-ontological-incompleteness–of-reference-of-thought’ with the latter by itself becoming the grander problematic, more like the
relative non-positivism/medievalism relative-ontological-incompleteness of reference-of-thought itself is the grander problematic with respect to the endemisation/enculturation of notions-and-accusations-of-sorcery acts/occurrences, and so more than just an act or acts of notions-and-accusations-of-sorcery construed as perversion-and-derived perversion-of-reference-of-thought as preconvergingly-apriorising axiomatising referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation, as revealing of the grander framework of vices-and-impediments inherent to the relative non-positivism/medievalism relative-ontological-incompleteness of reference-of-thought. Rather it is about articulating the ontological-completeness-of-reference-of-thought as ‘Being correction’ as of base-institutionalisation institutionalisation over recurrent-utter-uninstitutionalisation uninstitutionalisation, universalisation institutionalisation over ununiversalisation uninstitutionalisation, positivism institutionalisation over non-positivism/medievalism uninstitutionalisation, and prospectively notional–deprocrypticism institutionalisation over our procrypticism uninstitutionalisation. Obviously a traditional approach of analysis of psychopathy (as so construed from this papers totalising-entailing/nested-congruence insight including psychopathy and social psychopathy) will tend to be just as palliative as a non-positivism/medievalism world’s postlogism associated with their social cognisance-and-integration of say notions-and-accusations-of-sorcery were individuals will equally be wary of non-positivism/medievalism perversion-of-reference-of-thought as preconvergingly-apriorising axiomatising referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation and will equally be inclined to palliation regarding notions-and-accusations-of-sorcery depending on circumstances; though obviously the ontologically de-mentative/structural/paradigmatic resolution in both instances is with respect to the necessary ontological-completeness-of-reference-of-thought in overcoming amplituding/formative–epistemicity totalising self-

So perversion-of reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation has always been recurrent in reflecting holographically-conjugatively-and-transfusively the ontological-contiguity—of-the-human-institutionalisation-process because institutionalisation is not emanance transformation of temporal-dispositions as shortness-of-register-of–meaningfulness-and-teleology into the intemporal-disposition as longness-of-register-of–meaningfulness-and-teleology but designed to skew (‘intemporality-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity) towards the intemporal-disposition, such that where institutionalisation reaches its design limits given human limited-mentation-capacity-deepening, the possibility for perversion-of reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation arises with its corresponding enculturation/endemisation as uninstitutionalised-threshold in want for prospective institutionalisation as the ontologically-veridical de-mentative/structural/paradigmatic resolution. This is de-mentatively/structurally/paradigmatically the most elevated construct for the production of human knowledge as transcendental knowledge and as implied in its dissemination along formal constructs based on a postconverging-de-mentating/structuring/paradigming for skewing (‘intemporality-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity) towards intemporality, and not wrongly averaging of human thought in equivalence as logical-congruence of temporality/shortness and intempolity/longness-of-meaningfulness, such that knowledge is not constructed as a ‘human mutual agreement exercise for its construal/conceptualisation/discovery/invention/development’ since solipsistically/emanantly/becomingly we are of temporal/shortness to intemporal/longness mental-dispositions and this cannot be averaged to get transcendental knowledge which is rather the outcome of an enabling process as to ‘intrinsic-reality/ontological-veridicality transcendental enabling’ that allows what is intemporal as of mental-disposition to be effective by causality-as-to-projective-totalitative-implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity as of ontological and virtue constructs, and be imposed as knowledge. certainly because emanantly/becomingly/solipsistically temporal-dispositions do not appreciate

Thus it is generally not surprising that the transcendental first-order-ontology/ontological-construal by an ascetic intemporal-prioritising/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation Socrates will be passed by the ordinariness/earthliness of thought in that institutionalised-being-and-craft setup as vague while upholding its shallow notion of value with the true worth and value of such implied transcendence-and-sublimity/sublimation/supererogatory—de-mentativity grasped, at least expediently, mostly in the prospective institutionalised-being-and-craft setup it ushers, the same could be said of an intemporal-prioritising/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation Copernicus, an intemporal-prioritising/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation Rousseau, an intemporal-prioritising/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation Galilei or an intemporal-prioritising/maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation Darwin, and so as a fact of human-subpotency--

possibly as of retrospective appreciation and expediency, speaks of the social-construct as more
of a secondnatured institutionalised-construct rather than an intemporal-disposition construal,

fundamental issue that will then arise in that instance is one of ‘irrealism and corresponding virtualities’ that will undermine analytical pertinence, as man has to be understood exactly for what man is in effective reality, to then articulate effective knowledge constructs that are actually most efficient because of their realism, and that is paradoxically our virtue, not a wrong or false idealism (which metaphorically ends up hiding things under the table beyond the analysis required for their understanding and resolution)! It equally speaks of the ‘requisite specialness of the discipline of philosophy as a first-order ontology’ among all subject-matters (or-as-it-protrudes-into-subject-matters-or-second-order-ontologies), as the one that can least afford to be of normal trade, as it starts with a commitment of the mind (rather like modern-day religion) rather than just a normal craft, and further requiring the central quality of transcendentally-enabling-level-of-ontological-good-faith-or-authenticity /objectification/desubjectification-as-objectification-as-to-ontological-faith/ notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as antinihilism of thought, postures and teleology above anything else (not even the value of institutional recognition as Socrates, Rousseau, Sartre and others intuitively understood, necessarily so, since it is what is of a priori definition and can’t be compromised in institutional-constructs-and-setups)! We would possibly appreciate this argument from a retrospective insight of how the retrospective institutionalisations came about to the present, but it will certainly be alienating to think the same of our present in those transcended terms from a prospective transcending reference, even though the ontological insight points in that direction. This ‘subtransversality-<in-desublimating–existential-eventuating/denouement>-by-supratransversality-<in-sublimating–existential-eventuating/denouement> technique of transversality-<for-sublimating–existential-eventuating/denouement>-of-affirmative-and-unaffirmative-disambiguated-‘motif-and-apriorising/axiomatising/referencing’\textsuperscript{\textdagger} is further rendered operant as the teleological structure of the storied-construct/ontologically-valid-narration aetiolgisation/ontological-escalation based on the underlying principle involved in the example of the visiting stranger (as-of-pseudointemporality\textsuperscript{\textdagger}) or generally the BODMAS characters. The conceptual background for this tone-as-temperament and thematic teleological conceptualisation (for the storied-construct/ontologically-valid-narration aetiologisation/ontological-escalation) lies in the notion that human construal of
meaningfulness/memetism defines and structures its teleology\(^{19}\)/teleological-differentiation with respect to ‘socially-perceived-value as of social-stake-contention-or-confliction’ situations whether in ‘notional-firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective—ontological-normalcy/postconvergence> individuation terms’ and as this in dynamic-cumulative-aftereffect defines individuals actions intradimensionally or transcendentally/transdimensionally/interdimensionally/maximally. For instance, in the latter case a meaningfulness/memetism fundamentally based on spirits as causes-and-effects will fundamentally be predisposed to a defining teleology\(^{10}\)/teleological-differentiation of animism practices, and the corresponding ways of thoughts and live patterns; likewise a meaningfulness/memetism fundamentally based on a grand religion will fundamentally be structured on the basis of such religious practices, and the corresponding ways of thoughts and live pattern (depending on the degree of religious absolutism) as its defining teleology\(^{10}\)/teleological-differentiation, and likewise a meaningfulness/memetism that is mostly secular-inclined will be predisposed to the defining teleology\(^{10}\)/teleological-differentiation of down-to-earth interests including utilitarianism and practical knowledge/scientism, and the corresponding ways of thoughts and live patterns. Going by the defining notional-firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective—ontological-normalcy/postconvergence> of individuals action intradimensionally (and as recurrently affirmed by the ontological-contiguity\(^{6}\)—of-the-human-institutionalisation-process\(^{6}\) across all the registry-worldviews/dimensions, giving rise to prospective institutionalisations and uninstitutionalised-threshold\(^{1}\)), this establishes that there is a deterministic existential-tautologisation/existential-reference of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional-firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective—ontological-normalcy/postconvergence>’—existentialism-form-factor mental-

Thus, decentering is what divulges all the uninstitutionalised-threshold as recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and prospectively procrypticism by maximalising-recomposing-for-relative-ontological-completeness — unenframed-conceptualisation, while ‘centering’ divulges all the institutionalisations as base-institutionalisation, universalisation, positivism and prospectively dep rocrypticism; and so with their ontological possibilities and limits as well as corresponding ‘postconverging-or-dialectical-thinking’—psychology or psychology-of-mentation-dynamics or natural—psychological-dynamics’ or registry-worldview/dimension orienting/pivoting/decentering psyches (by psychoanalytic-unshackling/memetic-reordering/institutional-recomposing), reference-of-thought and teleologies/teleological-differentiations. impediments106 associated with a positivism–procrypticism mental frame, even though we’ll
possibly carry-complexes/complexé about the blunt fact, as all registry-worldviews/dimensions
prior to ours had equally done. Decentering thus fundamentally speaks of human shallow-

pivoting/decentering as fundamentally psychoanalytic actually extends to the construal of
understanding itself with regards to the underlying rescheduling of the placeholder-
setup/mental-devising-representation/mentation/consciousness-awareness-teleology100, as the
idea of pivoting/decentering extends to the notion of the ‘self’s own pivoting/decentering for

absolutising-identitive-constitutedness } convenionting/traditional-ways of understanding as superseding but rather superseded, and having to cave in’. In other words the aporeticism overcoming/unovercoming nature of a Derridean deconstruction text doesn’t speak of the poor writing of Derrida, it speaks of the reader’s ‘complex of understanding’ that fails to recognise its need to psychoanalytically-unshackle, construed in interdimensional transcendence-and-sublimity/sublimation/supererogatory—de-mentativity terms as akin to a positivistic laden text articulated in a non-positivism/medievalism setup implying a necessary psychoanalytic-unshackling as requiring the pivoting/decentering of the reader for its understanding as it is more than an explanation in the terms of the old as non-positivism/medievalism meaninglessness-and-teleology\(^\text{10}\) but more critically an invitation into the new as of a positivising/rational-empirical mindset/ reference-of-thought meaninglessness-and-teleology\(^\text{10}\); having to do fundamentally with the human mind complex and reflex of failing/not-upholding-as-of-apriorising/axiomatising/referencing> to acquiesce to prospective transcendence-and-sublimity/sublimation/supererogatory—de-mentativity and so all across the various institutional-cumulation/institutional-recomposure-as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing-<perspective-ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’/> in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process\(^\text{10}\), even though it will readily acquiesce from a standpoint of retrospectively implied construal of transcendence-and-sublimity/sublimation/supererogatory—de-mentativity. Such a pivoting/decentering of understanding itself is what is implied by ‘projective-insights’/postdication/metaphysics-of-absence-{implicated-epistemic-veracity-of- nonpresencing-<perspective-ontological-normalcy/postconvergence>}; further explaining the underlying notion of suprastructuralism as
the ability to construe/conceptualise meaningfulness across different ontological-completeness-of-reference-of-thought perspective whether recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, our present positivism–procrypticism or futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{100} as of prospective deprocrypticism, with the necessary\textsuperscript{15} de-mentation\textsuperscript{\langle\textsuperscript{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics}\rangle} involved in such a pivoting/decentering as psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring. Suprastructuralism as such will also explain the underlying logic of Bruno Latour’s famous criticism of the notion that scientists reported discovery of TB as being the cause of Pharaoh Ramses II death together with the organisation of an official ceremony in full honours in celebration of Ramses II corpse and the discovery, as being an entanglement of\textsuperscript{84} references-of-thought between the modern frame-of-reference/collective-consciousness-awareness-teleology\textsuperscript{100} and the Ancient Egypt pharaonic era frame-of-reference/collective-consciousness-awareness-teleology\textsuperscript{100} (a mix-up that must not occur for history itself to conceptually exist ‘since history wouldn’t deny its object of study its very own frame-of-reference, as being oblivious here to the notion of TB’, for an exercise of understanding the past and projecting to the future); as if it were ‘possible and desired’ that the modern frame-of-reference equally carry modern weapons back in time in Ancient Egypt and fight pharaoh Ramses II wars (which is obviously ridiculous). Suprastructuralism as such highlights the ‘mental complex of all present mindsets as metaphysics-of-presence\textsuperscript{\langle implicated-‘nondescript/ignorable–void ’-as-to- presencing—absolutising-identitive—constitutedness \rangle}’, and going by ‘projective-insights’/postdication/metaphysics-of-absence\textsuperscript{\langle implicated-epistemic-veracity-of-nonpresencing–\langle perspective–ontological-normalcy/postconvergence\rangle\rangle} is equally what can enable our own prospective transcendence-and-
sublimity/sublimation/supererogatory–de-mentativity in grasping a more profound intrinsic-reality/ontological-veridicality as notional–deprocrypticism which is deeper than our present positivism–procrypticism registry-worldview reference-of-thought. As implied in this paper, the implication of pivoting/decentering for understanding itself is that our metaphysics-of-presence–(implicit–nondescript/ignorable–void–as-to-presencing–absolutising–identitive–constitutedness) traditional/conventioning reference-of-thought–categorical-imperatives/axioms/registry-teleology is put into question, and the notion of understanding itself is pivoted/decentered such as implied by the referentialism approach of this hermeneutic/reprojecting/supererogating/zeroing design (as opposed to a categorisation constituting elaboration basis for understanding). As the referential harkens to the most profound concept (intemporal-preservation-entropy-or-contiguity–or–ontological-preservation also construed as ontological-normalcy/postconvergence) and ontologically-reconstitutes/deconstructs lesser and lesser profound concepts in relation to the most profound concept by a referencing understanding. The implication is that the entirety of the text is a unity in contiguity perceptible from the subtexts fusion with the unity. Hence the organisation of the text can only be cross-referencing (and not, wrongly, an organisation based on categorisation constituting elaboration) to retain its cross-referencing coherence of prospective meaningfulness. The recognition for the need to disambiguate human mental-dispositions as of temporal-to-intemporal is not an exception here as all our formalisations implicitly operate on this basis as deferential-formalisation-transference, tacitly confirming its veracity/ontological-pertinence. It should be noted that the representation of registry-worldview’s/dimension’s uninstitutionalised-threshold as of ‘threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation–as-to–attendant-intradimensional’–prospectively-disontologising–preconverging/dementing–apriorising-psychologism’ based on their respective relative-ontological-incompleteness–induced,–‘threshold-of–

expediency/unconsciously. This is the intemporal-disposition individuation decentering mechanism with respect to ontology/ontologically-veridical-meaningfulness in a dynamic-cumulative-afetereffect at the registry-worldview/dimension or intradimensional level that brings about prospective institutionalisations by rescheduling the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology\textsuperscript{100} with respect to construed prospective ontology/ontological-veridicality (as psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) explaining why we are able and do transcend; or else as in all prior registry-worldviews, the pseudointemporality\textsuperscript{53} logic will tend to become one of conscious or unconscious ontological-bad-faith/inauthenticity\textsuperscript{65} that construes of the present (by its reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{100}, for-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation whether being usurped/disjointed/impostored/parasitized/co-opted) as of absolute reference-value regardless, failing/not-upholding-<as-of-apriorising/axiomatising/referencing> to register that the grandest value as ontologically-coherent (as a principle sustaining its perpetuation) is the transcendental/maximising-recomposuring-for-relative-ontological-completeness\textsuperscript{54}—unenframed-conceptualisation as longness-of-register-of-meaningfulness/intemporality\textsuperscript{53} that accounts for the becoming from all the priors to the present to the prospective registry-worldviews/dimensions institutionalisations, thus not wrongly implying an equivalence between such a meaningful construct of universal import with temporal extricatory preconverging–de-mentating/structuring/paradigming contentions (more like metaphorically an apple falling on Newton’s head and his projection of this in grasping the universal implications of the laws of motion being wrongly equivocated in the terms of say an apple merchant and other interests in extricatory/temporal fear of the idea that understanding the laws of motions will be ‘temporally’ undermining in one way or the other). Critically, it isn’t idle idealism but rather a realistic insight, as just as articulations of notions of positivism like
evolution, universal human emancipation, rationalism, empiricism and science cannot be sustainably intelligible in a mindset/psyche that is non-positivism/medievalism and has not been pivoted (psychoanalytically-unshackled/mimeticly-reordered/institutionally-recomposured) to a positivistic mindset/psyche thus explaining why their proponents actively undermined the overall ordinary meaningful-frame of non-positivism/medievalism including such effort as the Encyclopédistes, likewise it is naïve to think that notional–deprocrypticism (by its deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought imbricatedness/threadedness/recomposuring as of attendant ontological-contiguity—educeed—existentialising/contextualising/textualising-contiguity—<reifying-or-elucidating-of-prospective-relative-ontological-completeness—of—reference-of-thought—devolving-as—of—instantiative-context> as to existence-potency—sublimating—nascence,—disclosed-from—prospective-epistemic-digression—rules-of-apriorising/axiomatising/referencing—that-further—epistemically-unconceal—the-very-ontologically-same-existential-reality) is an inherent meaningfulness that is perfectly construable within just a positivism–procrypticism mental-disposition and the latter’s many compromised assumptions as articulated in this paper, as notional–procrypticism is priorly implying futural Being-development/ontological-framework-expansion—as—to—depth—of—ontologising-development—as—infrastructure—of—meaningfulness—teleology as of prospective notional–procrypticism psyche/mindset. This equally raises the fundamental issue with post-structuralism, does it fully make sense in a ‘modern mindset’ of reference or reference-of-thought or rather it is implying priorly a prospective ‘postmodern mindset’ of prospective reference or reference-of-thought as its existential-reference/existential-tautologisation wherein human ‘deeper limited-mentation-capacity—{as of relative apriorising/axiomatising/referencing—{of—attendant—ontological—contiguity —educeed—existentialising/contextualising/textualising-contiguity }—conflatedness—in—{preconverging—dissentailment—by}—postconverging—entailment}’
should priorly be established (‘centered’ over the prior meaningful-frame which is ‘decentered’) for the knowledge construct to take hold by the continuing ‘moulting’ of its proponents and corresponding social construct, as intrinsic-reality doesn’t adjust its inherent meaningfulness to us but rather humans need to achieve a given psychical development to have-access-to or be-able-to-register the knowledge construct of the more profound existential-reference/existential-tautologisation to intrinsic-reality/ontological-veridicality that that psychical development allows for, in meaningfulness-and-teleological terms. This is rather a difficult task as it implies ‘15 de-mentation-{supererogatory-ontological–de-mentation-or-dialectical–de-mentation–stranding-or-attributive-dialectics} of ‘reference-of-thought’ behind the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring, and no registry-worldview/dimension sees itself as de-mentable prospectively, as being decentered for a prospective centering, even where it acquiesces to the notion retrospectively up to its own institutionalisation; pointing that ontological-normalcy/postconvergence is the genuine perspective for construing the dynamism of knowledge-and-virtue or ‘meaningfulness-and-teleology’. The fundamental point of a knowledge construct (which is necessarily tautological as intrinsic-reality/ontology is already given) is rather an exercise of ‘human "amplituding/formative–epistemicity\rangle totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling\langle by-a-renewing-of-apriorising/axiomatising/referencing–psychologism-as-the-new-referencing-basis-of-prospective– meaningfullness-and-teleology } as subpotent-mimetic-echoness-derivation-within-the-full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency\langle sublimating–nascence,-disclosed-from-prospective-epistemic-digression wherein we pivot/decenter (psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) for redefined ‘meaningfulness-and-teleology’. Thus for a storied-construct/ontologically-valid-narration aetiologisation/ontological-escalation in
‘grasping the uninstitutionalised-threshold\textsuperscript{103} reflecting procrypticism involving postlogism\textsuperscript{78} and conjugated-postlogism\textsuperscript{78}, the knowledge construct will assume this same fundamental goal of ‘human <amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling>{by-a-renewing-of-apriorising/axiomatising/referencing–psychologism-as-the-new-referencing-basis-of-prospective–meaningfulness-and-teleology } as subpotent-mimetic-echoness-derivation-within-the-full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency\textsuperscript{100}–sublimating–nascence, disclosed from prospective-epistemic-digression. Pivoting/decentering as such for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity at the individuation-level speaks of intemporal-disposition\textsuperscript{56} maximalising-recomposuring-for-relative-ontological-completeness —unenframed-conceptualisation value and disposition re-ontologising terms even though for temporal-dispositions value and disposition conventioning terms this may sound unintelligible. Thus insightfully, the same notion as uninstitutionalised-threshold, threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation
can also be construed as a disposition for temporal-finitude on the basis of referencing ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity’ by the temporal-dispositions references-of-thought (whether consciously, expediently or unconsciously) in order to undermine the referencing of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity as intemporal reference-of-thought (thus implying a mental-representation-devising/mentation/placeholder-setup of the ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity’ as ontologically preconverging-or-dementing–apriorising-psychologism from the perspective of the transcendental-enabling/sublimating/supererogatory–de-mentativity as ontologically thinking). Insightfully, for a storied-construct/ontologically-valid-narration aetiologisation/ontological-escalation, such a ‘dynamic-cumulative-aftereffect of individuation/intradimensional/transcendental-or-transdimensional-or-interdimensional levels of conceptualisation’ ontologically validates ‘a deterministically teleological-differentiated storied-construct/ontologically-valid-narration’ of projectable/predictable-relative-existential-implications of the various ‘incrementalism-inrelative-ontological-incompleteness’—enframed-conceptualisation temporal-dispositions incremental/shortness-disposition-relative-finitudes and ‘maximalising-recomposuring-for-relative-ontological-completeness’—unenframed-conceptualisation intemporal-disposition superseding/longness-disposition-to-finitude’; finitude being the full-depth-of-existential-implications/existentialism arising when acting (as-being/as-existing) with regards to one’s prior relative-ontological-incompleteness/relative-ontological-completeness

As a side note, such a notion of mentarchy in its dynamic-cumulative-aftereffect should be able to highlight the peculiarity of reference-of-thought associated with human languages from ancient ones to modern ones (as of the registry-worldview/dimension-levels of the corresponding societies), facilitating the deciphering and understanding of ancient languages, as well as the reconceptualisation of meaningfulness-and-teleology across history, which conceptual exercise tends to be rather biased towards a modern perspective metaphysics-of-presence{implied-nondescript/ignorable–void ’as-to- presencing–absolutising-identitive–constitutedness }.

Finally, a storied-construct/ontologically-valid-narration aetiologisation/ontological-escalation will need to take cognisance of the very peculiar nature of the social world (in contrast to the natural world) that makes the social ‘susceptible to incorrect understanding and analysis’ particularly at a practical and operant level by the fact that it is highly emotionally-involved/politically-driven especially so with disturbing issues, and this is further compounded by the ‘blurriness and distance of <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity /intrinsic-reality/ontological-veridicality transcendent-enabling/sublimating/supererogatory–de-mentativity’, and finally from a transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation perspective human mental-disposition with regards to the social can be poorly ontological with unconscious, expedient or conscious emphasis on significant others basis of logic as well as <amplituding/formative> wooden-language-(imbued—averaging-of-thought<as-to-leveling/ressentiment/closed-construct-of–meaningfulness-and-teleology -as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-
mental-dispositions (social-aggregation-enablers) undermining the solipsistic relationship with intrinsic-reality required for veracity/ontological-pertinence (transcendental-enabling/sublimating/supererogatory–de-mentativity). In this regard, it will actually be naïve to assume that an articulation of veracity/ontological-pertinence as with the natural sciences is all that is necessary in achieving effectiveness. With the weaknesses highlighted above with regards to grasping the social, it is important that such veracity/ontological-pertinence is effectively emphasised within the ‘realistic social contexts of mental-dispositions and actions’ driven by social-aggregation-enabling, wherein for instance the transcendental-enabling/sublimating/supererogatory–de-mentativity that is intrinsic-reality/ontology grounded on intrinsic-attrition can easily take a backseat over social-aggregation-enabler grounded on extrinsic-attrition driven by such ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity’ as perverted use of notions of differentness, infamy, status, significant-others basis of logic, repute, social authorities and influencers naively involved in fallacies of authority, disparagement, contrivance, duplicity, imposturing, ontological-bad-faith/inauthenticity, implying an equivalence between universal/intemporal sense of purpose with extricatory/temporal/mundane sense of purposes, underhandedness, inductive-limitation (so-called principle that is not articulated as a universal construct but targeted, avowing its reality as fake), etc., and so, including intellectual milieus as well. The implications for a truly ontologically effective social science can be construed as follows; say for instance an accused miscreant was to articulate a credibly demonstrable notion in physics or chemistry, the ‘promptness of <amplituding/formative–epistemicity>causality as-to-projective-totalitative-implications-of-prospective- nonpresencing–for-explicating-ontological-contiguity/intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity’ will easily allow for such veracity/ontological-pertinence to establish itself without
undermining of the transcendental-enabling/sublimating/supererogatory–de-mentativity that is intrinsic-reality/ontology by any social-aggregation-enabler (perverted use of notions of differentness, infamy, status, significant-others basis of logic, repute, social authorities and influencers naively involved in fallacies of authority, disparagement, contrivance, duplicity, imposturing, ontological-bad-faith/inauthenticity, implying an equivalence between universal/intemporal sense of purpose with extricatory/temporal/mundane sense of purposes, underhandedness, inductive-limitation or so-called principle that is not articulated as a universal construct but targeted, avowing its reality as fake, etc.). The ‘blurriness’ and distance of causality as-to-projective-totalitative–implications-of-prospective- nonpresencing-, for-explicating-ontological-contiguity/intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity’ makes this altogether a more difficult proposition in the social sciences particularly with issues that are highly emotionally-involved/‘interested’/politically-driven wherein even in intellectual circles arguments of differentness/subtle-infamy-implications/status/significant-others-basis-of-logic/repute are often easily advanced in undermining inherent veracity/ontological-pertinence. One such notorious argument with regards to poststructuralists involved the notion that French post-structuralism was developed by peripheral intellectuals of French society but then failing to equally say that a lot of the good science and social science in many Western countries have generally had the same personalities attributes. Of course, such a narrative will not be countenanceable in the promptness of effectiveness driven natural science of causality as-to-projective-totalitative–implications-of-prospective- nonpresencing-, for-explicating-ontological-contiguity, for instance, holding that Einstein’s theory-of-relativity is flawed with the non-substantive argument he was a peripheral intellectual to German or Swiss or American society. The bigger point here with respect to a storied-construct/ontologically-valid-narration aetiologisation/ontological-
escalation, is that veracity/ontological-pertinence by mere articulation of sound ontological conceptualisations as transcendental-enabling/sublimating/supererogatory~de-mentativity-of-intrinsic-social-reality in the social contextualisation especially where blurry is often not sufficient purely by itself but that it needs to be creatively construed in facing off ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity’ with the transcendental-enabling/sublimating/supererogatory~de-mentativity-of-intrinsic-social-reality

This weakness actually takes a turn for the worst when it comes to the phenomenon of psychopathy and social psychopathy as this phenomenon is actually the quintessence of active extrinsic-attribution ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory~de-mentativity’ as driven by postlogism\textsuperscript{8}—construed-as-of-disontologising-perverted-outcome-sought-precedes-existentially-veridical—‘attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness backtracking-\textless iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’\textgreater postlogism\textsuperscript{7} and corresponding conjugated-postlogism\textsuperscript{8} conjoining-looping-set-of-narratives of such postlogic-backtracking-\textless iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’\textgreater \textsuperscript{7}, respectively in recursiveness (psychopathic), progressiveness (opportunistic and exacerbatory) and regressiveness (ignorance and affordability). So a storied-construct/ontologically-valid-narration aetiologisation/ontological-escalation will need to demonstrate veracity/ontological-pertinence of the conceptualisations highlighted in this paper not purely by themselves as transcendental-enabling/sublimating/supererogatory~de-mentativity-of-intrinsic-social-reality but rather such conceptualisation in a supratransversality-\textless in-sublimating–existential-eventuating/denouement\textgreater of-motif-and-apriorising/axiomatising/referencing should be over-
and-face-off a subtransversality\textsuperscript{a} of temporal undermining by ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supernatural\textsuperscript{d} de-mentativity’ such as perverted use of notions of differentness, infamy, status, significant-others basis of logic, repute, social authorities and influencers naively involved in fallacies of authority, disparagement, contrivance, duplicity, imposturing, ontological-bad-faith/inauthenticity\textsuperscript{b}, implying an equivalence between universal/intemporal sense of purpose with extricatory/temporal/mundane sense of purposes, underhandedness, inductive-limitation (so-called principle that is not articulated as a universal construct but targeted, avowing its reality as fake), etc., and this is the realistic developing social contextualisation within which psychopathy and social psychopathy manifests itself. Further the social-aggregation-enabler mechanism is what brings about social-chainism/social-discomfiture/negative-social-aggregation as well as the temporal-endemisation/temporal-enculturation of psychopathy and social psychopathy by eliciting of differentness, infamy, status, significant-others basis of logic, repute, social authorities and influencers naively involved in fallacies of authority, disparagement, contrivance, duplicity, imposturing, ontological-bad-faith/inauthenticity\textsuperscript{c}, implying an equivalence between universal/intemporal sense of purpose with extricatory/temporal/mundane sense of purposes, underhandedness, inductive-limitation, etc., to induce subontologisation/subpotentiation or existential-decontextualised-transposition. Ontologically, thus the construal/conceptualisation of the Social postconverging–de-mentating/structuring/paradigming is necessarily a construct that harkens to the intemporal-projection enabling the thoughtfulness as the imbued intemporal-preservation consciousness-awareness-teleology\textsuperscript{g} with corresponding \textsuperscript{1}meaningfulness-and-teleology\textsuperscript{h} (so-reflected as to the <cumulating/recomposuring–attendant-ontological-contiguity >-succession of registry-worldviews/dimensions of the ontological-contiguity\textsuperscript{c—}}

The implication being that the Social is much more than aggregativity (social-aggregation) wherein a mental-disposition of ‘overt aggregative social disposition’ that conceives that a social-setup reference-of-thought—categorical-imperatives/axioms/registry-teleology\textsuperscript{100}, for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation are simply ‘perceptively-and-formulaically deterministic’ for ‘its purpose of temporal extricatory preconverging–dementating/structuring/paradigming relating with the reference-of-thought—categorical-imperatives/axioms/registry-teleology\textsuperscript{100} (as perversion-and-derived–perversion-of-reference-of-thought—<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-suprerogation \textsuperscript{>})’ that undermines the imbued intemporal-preservation-entropy-or-contiguity—or—ontological-preservation of the
social-setup ‘is not ontologically social’ (as aggregativity construals and mental-dispositions about social relations of extricatory temporal-dispositions are perfectly construable as of varying covert to overt ‘reference-of-thought—degraded-devolving—as-of-uninstitutionalised-threshold’). Likewise a mental-disposition of ‘overt non-aggregative social disposition’ conceiving the social-setup ‘reference-of-thought—categorical-imperatives/axioms/registry-teleology’, for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation ‘as of inherent essence and to be upheld and maximalisingly recomposured’ (as appropriateness-of-reference-of-thought-as-of-conflatedness’ ‘is ontologically social’. The Social as such is an abstract construct not about the ‘equability in mutuality of the mortals that we are’ but rather the opportunity for transcendental construal of our potential for intemporality. Paradoxically and across all registry-worldviews/dimensions this has always imply sociologically that uninstitutionalised-threshold are in a transversality-of-affirmative-and-unaffirmative—disambiguated—motif-and-apriorising/axiomatising/referencing’ of these two divergent mental-dispositions with respect to meaningfulness-and-teleology whether conceptualisation of the transcendental as defining prospective social ontology in a sense of intellectual solipsistic fulfilment driven by relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supernegatory—de-mentativity or conceptualisation in aggregativity/social-aggregation as of wooden-language—{imbued—averaging-of-thought—<as-to-leveling/resentiment/closed-construct-of—meaningfulness-and-teleology—as-of—‘nondescript/ignorable—void ’—with-regards-to-prospective-apriorising-implications}>} driven by social-aggregation-enabling, explaining the underlying confliction implied by any prospective institutionalisation as transcendental. This insight can be grasped from ontological-normalcy/postconvergence epistemic-or-notional—projective-perspective, when we garner that the ‘equability in mutuality of temporally-disposed minds as shortness-of-
register-of—meaningfulness-and-teleology in a non-positivism/medievalism social-setup doesn’t supersede the ontological-veridicality of a social ontology insight providing anchoring for prospective positivistic institutionalisation construed ‘reference-of-thought. Plausibly most likely the ‘developing consciousness-awareness-teleology mindset’ of such a ‘social ontology insight about prospective positivism’ (as maximalising-recomposing—for-relative-ontological-completeness—unenframed-conceptualisation for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation) may lead to its very own circumspection with the registry-worldview’s/dimension’s ‘meaningfulness-and-teleology and possibly non-aggregativity. Consider the instance of such characters as Galileo and Newton, at the crossroad of ‘what is to be considered as valued ‘meaningfulness-and-teleology’ with respect to the prospective as the positivistic registry-worldview/dimension and the prior as the non-positivism/medievalism world, as consciously-or-unconsciously they register that the prior needs to be ‘decentered’ and the prospective ‘centered’, even though by reflex the prior will construe of itself as undecenterable center of ‘meaningfulness-and-teleology. This may go a long way in explaining such biographic accounts about Isaac Newton as unsocial wherein a naïve conceptualisation of impression-driven/good-naturedness/wishfulness construal as virtue (in lieu of the-Good/understanding/notional–knowledge-reification–gesturing— prospective-psychologismic—apriorising/axiomatising/referencing—of-attendant—ontological-contiguity —educed–existentialising/contextualising/textualising-contiguity —conflicatedness—in—{preconverging–entailment—by}—postconverging— entailment{/amicluding/formative–epistemicity}—causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing—for-explicating-ontological-contiguity in its —amicluding/formative–epistemicity—totalising—‘ratiocontiguity/ratiocination-as-referentialism—implicated_attendant—ontological-contiguity—‘phenomenal-abstractiveness-of-presencing-in—‘protensive-consciousness’—enabling—

human flourishing, with the underlying fact being that inherently such a personality type rather
as of a solipsistic-intemporality individuation disposition, by its contemplative reappraisal, is
exactly what can provide the opportunity for such transcendental possibilities (when we come
to grasp that the true profoundness of knowledge is more than just ‘mechanical as something
construed soullessly’ without a more complete appreciation of knowledge as ‘organic as
something construed with a profound sense of intemporal projection philosophy as to profound-
supерerogation’), with the idea that the type of knowledge construed as of first order
transcendental-enabling/sublimating/supererogatory-de-mentativity is not based on an ordinary notion of ‘intelligence as we’ll normally think of as simply technical’ but rather on such a sense of intemporal philosophical projection and more than just a ‘product’ for a materiality purpose but a driven sense of human emancipation). In fact, this equally points to a major flaw of the inherently implied value judgement in a lot of what passes for social sciences today explaining the vagueness, platitude and emptiness of little or no relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity implication as an circular exercise, wherein the unabated recourse to naïve feel good averaging of thought mental-dispositions are equated with ontological-veridicality uncritically, rather than construing that the animal that we are is in want of knowledge as a construct that enable it to supersede/transcend itself rather than a vain exercise of nombrilism, in which case one may argue that each registry-worldview/dimension wooden-language-⟨imbued—averaging-of-thought-⟨as-to-leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology-as-of—‘nondescript/ignorable—void ’-with-regards-to-prospective-apriorising-implications⟩⟩ ideas should be the basis for construing its social science! In fact, technically Newton might be the most inclined person for social engagement but then will he as of intemporal projection be inclined to ‘go along as social’ where he construed beyond-the-consciousness-awareness-teleology-⟨in-preconverging-existential-extrication-as-of-existential-unthought⟩ ‘the medieval social’ as in want of its further development (this highlights a contrast between a stigmatic/mented psychology of the present, as of any ‘present registry-worldview/dimension’, with value references related to as absolute without or poorly factoring in that the animal that is the human is rather a becoming animal in constant psychological development of its limited-mentation-capacity with respect to social universal-transparency-⟨transparency-of-

makes many such so-called ‘social science approaches’ ‘poorly grounded on a social relative
intrinsic-reality/ontological-veridicality transcendent-enabling/sublimating/supererogatory-de-mentativity’ more or less sciences of methodological
mimicry, as we know that much of the ‘true sciences’ (including the natural sciences and many

as of social, institutional, cultural, moral or historical reality of the human condition); though
much more easier for the natural sciences as hardly any or nobody feels impinged today with
scientific discoveries and inventions given that their transcendent-

Whereas a lot of modern-day social science is relatively pulled back in many an unsuspecting manner, by elicited emotional involvement and underlying constraints of their institutional setups. Such can equally be implied with regards to procrypticism from futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology⁵⁰ as of prospective notional~deprocrypticism insight, wherein positivism–procrypticism is decentered and notional–deprocrypticism is centered, and so in comprehensive psychologism terms; with the idea that the possibly unsavoriness is not of this author’s or anyone’s chosen but rather that the test for futural Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology⁵⁰ as of prospective notional~deprocrypticism transcendence-and-sublimity/sublimation/supererogatory—de-mentativity set by intrinsic-reality/ontological-veridicality requires us coming to terms with it, no lesser than the test set by positivistic transcendence-and-sublimity/sublimation/supererogatory—de-mentativity in the non-positivism/medievalism epoch intrinsic-reality required them to come to terms with this, however unpalatable to many then, and this underlying vitality across all epochs as of attendant ontological-contiguity—reduced—existentialising/contextualising/textualising-contiguity—<reifying-or-elucidating-of-prospective-relative-ontological-completeness—of—reference-of-thought—devolving-as-of-instantiative-context>, induced by prospective relative-ontological-completeness⁸⁸—of—reference-of-thought is what counts as true knowledge beyond the blurriness⁸⁷—in-reflecting-and/or-coming-to-terms-with-implied-transcendence that often tends to arise with all institutionalisations institutionalised-being-and-craft erudition! Concretely, the fact is that psychopathic postlogic-backtracking-<iterative-looping-'set-of-dereifying-hollow-narratives-and-acts'>\(^\text{27}\) and conjugated-postlogism^ as ‘conjoining looping narratives of flawed-existential-elevation-of-‘reference-of-thought’ of postlogic-backtracking-<iterative-looping-'set-of-dereifying-hollow-narratives-and-acts'>\(^\text{27}\) are ‘denaturing devoided-of-conviction-as-to-profound-supererogation’-or-prelogism^-basis’ towards the given institutionalisation’s sanctified-conventioning-social-aggregation-enablers in order to override, undermine and escape from the intrinsic-reality/veracity/ontological-pertinence transcendental-enabling/sublimating/supererogatory-de-mentativity. As in the case previously highlighted where a psychopath spoke to an interlocutor that it is a bad thing for a said individual to be molesting children, with its logic being sound from an abstract/virtuality appreciation but with the existential-reality of its ‘apriorising–reference-of-thought-elements/apriorising–registry-elements (out of attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity<-reifying-or-elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context>)’ of implied—logical-dueness-or-scape, profile-or-stature, presumptuousness-or-arrogation, assumptions, value-reference and teleology\(^\text{100}\) being utterly unfounded as a first-order faulty-mentation-procedure-deception-or-urge\(^\text{15}\) potentially enabling an infinite possibility of second-order level deception if re-engaged as of \(^\text{15}\) logical-processing-

For instance, by saying (in a different social spatial location where the interlocutor cannot verify the underlying contextual reality) it is critical that the stranger should not be taking young children in his house as it suspiciously points to a molester (which is certainly a sound statement but rather being parasitised for a perverse purpose of ‘denaturing postlogic-backtracking devoided-of-conviction-as-to-profound-supererogation 79-or-prelogism 79-basis’ towards sanctified-conventioning-social-aggregation-enablers, as the statement, not to take young children into his house, is sanctifying/as-not-requiring-any-further-contemplation to many a supplanting–conviction-as-to-profound-supererogation 79—of–‘attendant-intradimensional’-postconverging/dialectical-thinking–apriorising-psychologism mind). Even if this latter narrative is proven to be false (as it is another 75-perversion-of- reference-of-thought-as- preconvergingly-apriorising/axiomatising/referencing-in- nonconviction/madeupness/bottomlining-as-to-shallow-supererogation or mental-perversion demonstrable as above with it faulty-mentation-procedure-deception-or-urge 13 not being the logic itself, but in wrongly implying as existentially real the ‘apriorising—reference-of-thought-elements/apriorising–registry-elements (out of attendant-ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity 14<reifying-or-elucidating-of- prospective-relative-ontological-completeness -of- reference-of-thought- devolving-as-of-

As with all prospective institutionalisations, a human secondnaturing institutionalising construct is a requisite because, at best even the intemporal-disposition individuation individuals, purporting (by °maximalising-recomposuring-for-relative-ontological-completeness–unenframed-conceptualisation) prospective emancipation come from and are of the stock of the prior °reference-of-thought uninstitutionalised-threshold ° registry-worldview/dimension, and such prospective emancipation involves such individuals own ‘moulting’, as actually intemporality°/longness is a ‘potential construct of orientation’ as implied by ontological-normalcy/postconvergence (prospective-transcendence-in-perpetually-upholding-intemporal-preservation-entropy-or-contiguity–or–ontological-preservation) and it is only a devised institutionalisation construct that achieves that potential-construct-of-orientation and not any implied inherent emanance intrinsicness (though the meaningfulness as articulated as such, and as the meaningfulness in this entire paper, is rather
of an intemporal register validation and not of any temporal register validation, since an authentic psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring is what underlies transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as a ‘deeper limited-mentation-capacity-\{as of relative apriorising/axiomatising/referencing-\{of-attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }\}–confatedness\{in–{preconverging-disentailment by}–postconverging-entailment\}’ existential-tautologisation/existential-reference pivot/decenter to reconstrue/reconceptualise meaningfulness-and-teleology\{\}; more like a jurisprudential ‘maximalising-recomposuring-for-relative-ontological-completeness\}'–unenframed-conceptualisation contention for rehabilitation is not of the same meaningful-framework as a temporal mental-disposition of illicitness for shifty expectation of rehabilitation which it should necessarily anticipate and preempt). By that token there is no base-institutionalised individuation in recurrent-utter-uninstitutionalisation, no universalised individuation in ununiversalisation, no positivistic individuation in non-positivism/medievalism, and prospectively no notional–deprocrypticism individuation in procrypticism; as at best such emancipating intemporal individuation are ‘mouling’ and implying-of-the-same of their registry-worldview in prospective institutionalisation design/conceptualisation, as the effective institutionalisation is what is really and effectively attained. However apparently logical this idea, it is an altogether different to mentally register the idea of such a threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation <as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism> construct and perception about our own registry-worldview uninstitutionalised-threshold as procrypticism just as it would be by reflex difficult in all the successive registry-worldviews, often requiring a generation or more for transcendental implications to sink in. This threshold-of–nonconviction/madeupness/bottomlining-in-shallow-supererogation <as-to-‘attendant-intradimensional’-prospectively-disontologising–preconverging/dementing –apriorising-psychologism> conceptualisation of ‘the social as at its uninstitutionalised-

Thus the apparent issues today raised with post-structuralism have as much to do with the psychical orientation (as underdeveloped) of its critiques as well as the requisite effort required to further develop, elucidate and focus it; and in this regard why there have been many serious and constructive criticisms of post-structuralism as required for any subject-matter, most of the ‘popular criticisms’ levied against post-structuralism fail to past the test of intellectual criticism and have mostly been populist and media-driven attacks, gaining traction by social trending than genuine intellectual validity. The most popular being an initiative on an unrecognised social science journal which by that mere
Token disqualifies the so-called criticism but has turned out to be the most populist ploy by all accounts for condemning post-structuralism. Furthermore and critically, the intellectual exercise as with all institutional processes operate fundamentally on a basis of mutual trust. However the methodologies, theories and concepts, what can be articulated as new knowledge is not necessarily assessed on the basis that any peer review mechanism is absolutely full-proof particularly as the new knowledge is often at the margin of what is understood, and thus much of peer reviewing is not really an approval of the knowledge but rather an admission into the body of institutionally or formally acknowledgeable perspectives for further elucidation. Even then many a study not approved with peer reviewed journals have later on down the years ended up becoming dominant theory. So there isn’t any inherent sanctity in peer reviewing but for its practicality in formal knowledge organisation (and not even so with approval). Technically the majority of all new knowledge down the years will be found wanting in many ways, and the objective of the overall peer review process is to channel potentially admissible and debatable knowledge towards further elucidation in the overall scheme of establishing overall human knowledge as of veracity/ontological-pertinence. Review of new knowledge doesn’t end with a journal’s peer review though that point tends to be a ‘highly political point nowadays’ as of the increasing bean-counting institutional reflex of funding implications and sometimes at the detriment of novel approaches to knowledge. The abstract notion of reviewing goes well beyond journals approval and extends with the continual critiquing of knowledge whether dominant or outlying. Ultimately, the more fundamental test in such a negotiated process is a strive for consistency and validatory clues with no guarantees of effectiveness but for the overall consistency, as of the very cutting edge of peer reviewed knowledge. Just for the sake of perspective here, it might equally be argued that peer-reviewing and by extension all epistemological and their corresponding methodological activities are not natural knowledge activities as of inherent pure-ontology in of itself but derived activities as of human norms,
practices and policies for establishing thresholds that then enable articulated qualifications as of pure-ontology; in other words, any such epistemological and methodological activity is irrelevant if pure-ontology can be arrived at without it. Consider for instance that mathematicians hardly make use of experimental designs or that many secret research by corporations and government aren’t peer reviewed, at least not publicly. Besides at a more fundamental level the question can be asked what are the metaphysics-of-absence of implications of knowledge epistemology, methodologies and peering as to the weightier construal of the successive human ontological developments involving increasing prospective relative-ontological-completeness of reference-of-thought associated with the overall institutional-cumulation/institutional-recomposure of eventfulness /ontological-aesthetic-tracing of epistemicity-relativism-determinism in reflecting holographically of the ontological-contiguity of-the-human-institutionalisation-process, beyond just an intra-positivism registry-worldview/dimension illusion-of-the-present/present-consciousness/epistemic-totalising self-referencing-syncretising/mirage conceptualisation of knowledge epistemology, methodologies and peering naively articulated-and-implied-as ‘universally applicable’, à la Kantian positivism registry-worldview/dimension of epistemicity totalising ‘intervalist-as-categorising—implicited_attendant—ontological-contiguity—phenomenal-abstractiveness-of-presence however remarkable, to all registry-worldviews/dimensions particularly since such a conceptualisation doesn’t factor in ‘transcendental implications’ as de-mentatively/structurally/paradigmatically overthrowing/fazing-out/collapsing the uninstitutionalised-threshold of meaningfulness-and-teleology of the prior/old registry-worldview’s/dimension’s reference-of-thought as a
decentering subsumption; along the same line as the medieval ‘dogmatic scholastics’ insisting that the now established positivism registry-worldview/dimension knowledge constructs, which were then transcendental, should conform to their ‘institutionalised dogmatic scholasticism methods and processes of reviewing’. By extension the question can be asked whether beyond our

It should be noted here that the more pertinent quality for such implied transcendentalism as of its implied organic-

and-teleology explaining their discordance, construed as the paradox of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity. In other words, if the former had a grasp of its state ‘as to its prior relative-ontological-incompleteness-of-reference-of-thought’ with the transcendental de-mentative/structural/paradigmatic <amplituding/formative-epistemicity>causality as-to-projective-totalitative-implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity arising thereof it would have paradoxically transcended, thus explaining the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring nature of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity as of a crossgenerational exercise and why such implied transcendental 'meaningfulness-and-teleology might seem arbitrary when meaningfulness-and-teleology is rather interpreted in terms of the prior registry-worldview’s/dimension’s reference-of-thought not factoring its prior relative-ontological-incompleteness-of-reference-of-thought. But this is simply valid on the fact that a more profound axiomatic-construct on a given domain of reality as of prospective relative-ontological-completeness-of-reference-of-thought is of intemporal-or-ontological prioritisation as of its apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—conflatedness-in-{preconverging-disentailment–by}–postconverging-entailment relative to a less profound axiomatic-construct on that same given domain of reality as of prior relative-ontological-incompleteness-of-reference-of-thought as of its apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}—constitutedness—.in-preconverging-entailment, as the latter is rather in shortness-of-register–meaningfulness-and-teleology/distractiveness to the former as of reference-of-thought-as-to-preconverging/postconverging-de-mentating/structuring/paradigming—ontological-

reference-of-thought is the relatively complete ‘ontological-resetting’ in an ‘organic effecting-wholeness-as-of-profoundness-and-completeness-to—meaningfulness-and-teleology’ over the prior ‘reference-of-thought ‘effecting-parsimony-as-of-shoddiness-and-incompleteness-to—meaningfulness-and-teleology’; just as the introduction of chemistry science carries an organic effecting-wholeness-as-of-profoundness-and-completeness-to—meaningfulness-and-teleology over a non-positivism/medievalism alchemic material construal. This further explains ‘the socially conflicted nature of all implied transcendental constructs’ whether with prophesying metaphysico-theological constructs of early times reflected in non-universal and universal creeds up to our metaphysico-ontological worldviews implied transcendence-and-sublimity/sublimation/supercerogatory—de-mentativity, and so as of human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional—firstnaturedness—temporal-to-intemporal-dispositions—so-construed-as-from-perspective—ontological-normalcy/postconvergence’—existentialism-form-factor; but then humankind has always been called upon to show itself capable of superseding/surpassément for prospective possibilities to avail. A second weakness of many critiques is by naively misrepresenting post-structural meaningfulness, and going on to criticise this. For instance, such arguments about post-structuralism as a theory that has no worldview are not made by poststructuralists who in their transcendentally-enabling-level-of-ontological-good-faith-or-authenticity/objectification/desubjectification-as-objectification—as-to-ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as antinihilism have been rather questioning openly what the reality of the meaningfulness they construct implies, as a basis for further intellectual development. This explains the convoluted responses of say Derrida because that is the intrinsic-reality insight at hand, and the issue is rather how to further develop. This will be tantamount to criticising early quantum physics for contending
that the fundamental particles are rather like waves and evasive without yet establishing an advanced basis of the science. Knowledge is not an exercise of one set of individuals arguing against another nor is it a popularity contest but rather it is all about finding out what constitutes intrinsic-reality as it reflects causality as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-

ontological-contiguity: intrinsic-reality being the superseding transcendental enabler, and not any humans no matter their statuses. A third weakness has been by relating to poststructuralists as if they have got to get all their ideas right on by the instant, as if the theoretical framework isn’t in development like all theoretical frameworks (by the same token imagine all the unanswered questions that underlie quantum physics for over half a century that are still being elucidated, for instance, string theory which is so highly speculative but is still credibly a basis for research and analysis). The purpose of a theoretical framework is not to provide an immediate answer for everything but rather to provide a framework for constant critical development of ideas. Otherwise, it will be best to develop a correlational construct that may statistically be coherent with many arguments at any given point in time but is of little predicative or projective value because it hasn’t got a profundity as a genuine theoretical construct which may actually be mostly incoherent with many arguments at its earlier stage but provides a wealthy framework for the continuous articulation of ideas and resolutions, and this is actually the point of a theory in the very first place. It is thus no accident that many other disciplines have found post-structuralism as a relatively ideal tool for invoking much needed insight. A fourth criticism has to do with the ‘political nature’ of human affairs obviously, and even the intellectual is not beyond this especially with ideas of ‘socially-perceived disturbing implications’ (as has been the case throughout human history) and further so in a social domain that is not immediately amenable to predicative-effectivity–sublimation–(as-to-underlying,-ontological-commitment)}<implied—self-assuredness-of-ontological-good-
as the natural domain even though the latter equally faces similar issues but to a lesser extent. When we come to reflect that the leading poststructuralist of his time had an entire school, rather than focusing on developing research criticisms of his work and other poststructuralists (which would have been the more impressive thing to do) instead taking a ‘political stance’ for the denial of his recognition with an institution of higher learning. Thus it is obviously, naïve for anyone to think that intellectualism and ideas occur in an absolute neutral environment particularly when of socially-perceived disturbing implications. While it is generally recognised that knowledge is determined on its own merits as an interest-free principle, the fact is in the real world of ‘socially-perceived-value as of social-stake-contention-or-confliction’ situations, human mental-disposition is not that intemporal and principled, whether wittingly or unwittingly, and extra-intellectual meaningfulness becomes fair game. Fifthly, the argument of unintelligibility of post-structural meaning is outright ridiculous with respect to the exegetical aims of its authors, and no less so as expecting advanced chemistry, biology and physics writing to be popularly intelligible. Jargon is rather a mechanism of deferential-formalisation-transference permeating all subject-matters and disciplines, which speaks to the idea that the ‘ordinariness of thought’ is not the sound basis for construing issues raised in terms—as-of-axiomatic-construct of profoundness of contemplation. The ontological-contiguity —of-the-human-institutionalisation-process by its deferential-formalisation-transference is an exercise of shrinking the melee of common sense wherein spheres previously opened for common opinionatedness are shoved away as ‘deferred to’ specialisms whether institutional or subject-matters by the mere effectiveness, with ‘informed common and individual opinions’ being the panache for the expression of sovereignty whether about the polity or individual choices, but not to be confused as a sign of inherent knowledge as of popularity. The idea that there is a common sense social science is a falsehood no more than
there is no common sense natural science, and intellectuals are irresponsible when peddling the
notion that readers shouldn’t acquire the requisite ‘intellectual elevation’ to grasp the
profundity of meaningfulness and rather expect that they should be able to satisfactorily engage
at the same intellectual level (“reference-of-thought”) involving advanced studies and research
on the basis of ordinariness of thought. This should not be confused with a popularising
exercise meant to stir popular interest like popular science, though in fact there is no truly
popular science for that matter but serious/candid science. Such a confusion can hardly arise in
the natural sciences because of the ‘promptness of

studies, discoveries and inventions wherein a flaw thought proposition will be proven wrong by
its ontological ineffectiveness with relatively little concern for third-party convincing over the

transcendental-enabling/sublimating/supererogatory–de-mentativity’ in the social sciences allows for propositions to crop up that are hardly constrained
by immediate effectiveness of studies, discoveries and inventions, such that such propositions
will often border on popular thinking or the political (technically) or a concern priorly driven
with garnering support and agreement, rather than of genuine intellectual strife for

prospective– nonpresencing, for explicating-ontological-contiguity/intrinsic-
reality/ontological-veridicality transcendentally-enabling/sublimating/supererogatory–dementativity. In this regard, the central tenet of poststructuralists with respect to their pursuit has been transcendentally-enabling-level-of-ontological-good-faith-or-authenticity/objectification/desubjectification-as-objectification-as-to-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality as antinihilism with respect to their reflections, studies and research at all cost, even at the cost of many poststructuralists not recognising explicitly that they are poststructuralists or not recognising similarities in their works with other poststructuralists, so because fundamentally they can only vouch for their authentic reflections and analyses without a ‘surreptitious pretence’ for such amalgamation which will undermine their ontological-good-faith/authenticity with regards to conceptualising intrinsic-reality/ontological-veridicality, with the idea that the notion of a commonness of their ideas and as a movement will take care of itself if they are truly articulating an intrinsic-reality/ontological-veridicality that reflects that commonness; more like the Indian story of blind men who came across an elephant and each one sincerely/authentically said what their capacity enabled them to say, no more no less, with the idea that if what they say is of-the-reality of an elephant, that notion will take care of itself but their first posture is to say authentically what is in front of them. This speaks of the essential nature of all sciences wherein the researcher considers the most determinant element to be not itself or other humans (who are together mortals; mortal because they/humans don’t really invent any rules of existence-or-intrinsic-reality-or-ontological-veridicality but rather at best discover them or utilise them as ‘supposed inventions’ –and the scientist is all about a validation by intrinsic-reality/ontological-veridicality-as-the-transcendental-enabling/sublimating/supererogatory–dementativity in contrast to a mental-disposition of social-aggregation-enabler where the emphasis is naively about convincing the other mortal or mortals over a validation by intrinsic-
reality/ontological-veridicality transcendental enabler thus leading to subontologisation/subpotentiation in-a-social-dynamism-of-meaningfulness-misappropriation, rather than the supersedingness/precedingness of intrinsic-reality/ontological-veridicality transcendental enabler) but the superseding transcendental-enabling/sublimating/supererogatory–de-mentativity which is intrinsic-reality/existential-reality/ontological-veridicality as reflected by effectiveness of <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective–nonpresencing–for-explicating-ontological-contiguity and projection; with the latter wholly the focus of intellectual contention. The medical researcher involved in seeking a cure by reflex is concerned about what the transcendental-enabling/sublimating/supererogatory–de-mentativity that is intrinsic-reality/ontological-veridicality/existence ‘naturally and best construed/conceptualised’ in the crafted jargon of biomedical sciences will make available as cure as the ‘superior party’ over whatever they themselves or for that matter any other humans no matter their statuses may ‘sovereignly’ want to think or imagine. This same notion applies in the construct of knowledge in the social sciences, the pursuit of the social scientist as the study of social reality is ‘not about convincing people or making sense to people’ (that can be accessory) but rather about grasping/conceptualising the intrinsic-reality/ontological-veridicality of the social as the transcendental-enabling/sublimating/supererogatory–de-mentativity whatever the jargon required for that purpose; the social education/enlightening exercise that arise thereafter just as a popular science exercise is an altogether different exercise of education and not first-level scientific engagement, and even then such education exercise will still call for a degree of intellectual elevation of the general public. It is critical that in the natural competition of intellectual ideas, intellectuals do not fall in the pattern of using debased or social feel good basis of non-intellectual logic in eliciting ‘mass thinking’ in order to advance their postures but rather fairly and squarely engage at the transcendental-
enabling/sublimating/supererogatory—de-mentativity of intrinsic-reality/ontological-veridicality
level in proving or disproving those they agree or disagree with as of

Sixth, thus the idea of deferential-formalisation-transference behind formal predicates of institutions and subject-matter specialisms is all about construing meaningfulness in a depth-of-
thought (intemporality\textsuperscript{53}) that is not available to ordinariness of thought, wherein there is a

(‘intemporality’-asymmetric-subsumption-of-temporality, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity) in the ontological-contiguity —of-the-human-institutionalisation-process of shrinking the melee of common sense involves developing institutional and subject-matter specialisms as supratransversality<-in-sublimating–existential-eventuating/denouement>-of-motif-and-apriorising/axiomatising/referencing narratives (for instance, the developing sciences and institutional specialisms) that induce corresponding untenability/internal-contradiction/internal-incoherence/institutional-constraining by effectiveness on the subtransversality<-in-desublimating–existential-eventuating/denouement>-of-motif-and-apriorising/axiomatising/referencing as the melee of common sense inducing the latter’s ‘deference’, for instance, such deference as such postures as the law says that…, physicists say that…, etc. and not a common sense posture of the sort I think that…, thus relegating the melee of common sense out of the construal and conceptualisation of institutional or domain specialisms which hitherto had been free-for-all opinionatedness. Such an exercise is not just retrospective but prospective as well in the expansion of human formalised constructs and including in this case the relatively profound insights of such social science as post-structuralism which sadly get undermined paradoxically by some critiques not by a same-level supratransversality<-in-sublimating–existential-eventuating/denouement>-of-motif-and-apriorising/axiomatising/referencing intellectual criticism but raising subtransversality<-in-desublimating–existential-eventuating/denouement>-of-motif-and-apriorising/axiomatising/referencing narrative to wrongly imply that post-structuralism should be as intelligible as common sense thinking, which is paradoxically never the case with say the jargon of law, natural sciences, etc. exactly for the reason highlighted above. The fact is the melee of common sense as subtransversality<-in-desublimating–existential-eventuating/denouement>-of-motif-and-apriorising/axiomatising/referencing hasn’t got the
requisite intemporality/longness in terms-as-of-axiomatic-construct of universal projection of reference-of-thought and the logical-dueness/profile/presumption/assumptions/value-reference/teleology that arises from such a formal reference-of-thought (for instance, as the universal/intemporal proposition underlying this paper’s purported construct for aetiologisation/ontological-escalation in grasping the phenomenon of postlogism in general and the general background human science conceptualisation; together with its exposure for falsifiability/validation from subsequent critical analyses). Such that there will tend to be ‘confusion of reference-of-thought’ where such subtransversality-of-motif-and-apriorising/axiomatising/referencing melee of common sense was apparently to act assumingly/presumptuously rather than ‘to defer’, or otherwise the instance where individuals assume the requisite intellectual elevation (whether by corresponding education and reflection) for a first-level engagement with such specialisms. As our melee of common sense defers when it comes to the natural sciences, it defers when it comes to the legal science, it shouldn’t expect otherwise but to defer when it comes to rigorous post-structural and other social science constructions however their approximations, and so as the best construction potential of human meaningfulness and teleological possibilities. On that same token the notion of validation of supratransversality-of-motif-and-apriorising/axiomatising/referencing with respect to subtransversality-of-motif-and-apriorising/axiomatising/referencing is not one of contending/argumentative validation at a same contending pedestal but rather as a validation of the supratransversality-of-motif-and-apriorising/axiomatising/referencing reference-of-thought as intellectually-and-morally institutionalising and not implying its equivalence with subtransversality-of-motif-and-apriorising/axiomatising/referencing melee of common
sense of reference-of-thought, wherein for instance a consistent demonstration of a chemistry science (as supratransversality-of-motif-and-apriorising/axiomatising/referencing) effectiveness earns chemistry science the deferential-formalisation-transference of no longer being engaged at a same contending pedestal as the melee of common sense with respect to human social contention about material constitution in order to avoid the circular drawback of constantly making arguments in wooden-language-imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-meaningfulness-and-teleology-as-of-nondescript/ignorable—void'-with-regards-to-prospective-apriorising-implications-terms—as-of-axiomatic-construct, such that social deference is now institutionalised as ‘chemists say that/it is said in chemistry that’ rather than a social melee of common sense equivalence of ‘chemists think that but I also think that going by my common sense’. This argumentation is not idle as the social sciences as ‘being closest to human conscious sense of sovereignty’ tend to be most affected by such fallacies as highlighted that should be superseded by all knowledge whether natural or social-construct, and while such notion are often intuitively grasped with other formalisms whether institutional, legal or in the natural sciences subject-matter specialisms, for the social sciences there is a need to actively bring this notion to the consciousness-awareness-teleology in order to circumvent such nature of knowledge fallacies with regards to an emotionally charged domain that is the social. This equally explain why the studies of the social are easiest prone to ontological-bad-faith/inauthenticity, whether beyond-the-consciousness-awareness-teleology-<-in-preconverging-existential-extrication-as-of-existential-unthought>, as even where contending intellectual postures are of relative elevated formal knowledge, it is quite easy for a notional~pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation-(blurring/undermining-of-prospective-totalising-entailing—as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative

Even then the practical application and conceptualisation of post-structural meaningfulness has always been one that has tended to restore a sense of re-equilibrium with respect to perceived vested interest and skewed power relations whether with regards to its articulation in feminist studies, postcolonial studies, power relations in social settings with regards to appropriate deliverance and more responsive public services, etc. as post-structuralism has often been a framework giving weaker and subjected meaningful frames public voice. Thus the so-called ‘\(\text{human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation}\)\(<\text{as-to-the-nondisjointedness/entailment-of-prospective- nonpresencing}\>\) of post-structuralism’ has been
in real and practical world terms more a question of abstract reconstructive thinking since such practical applications have tended to be effective further highlighting the need rather for more decentering contemplations. Besides, post-structuralism practical emphasis has mostly been methodical rather than dogmatic. In the bigger scheme of things, this author further highlights that post-structuralism by implying ‘decentering’ is implying transcendence-and-sublimity/sublimation/supererogatory-de-mentativity or an ‘existential-reference/existential-tautologisation pivoting/decentering’ such that ‘the center’ as the new basis of analysis/knowledge-construct has moved to the prospective/transcendental/superseding reference-of-thought putting into question the now-and-present way of thinking as prior/transcended/superseded reference-of-thought. What has been misconstrued is exactly the idea of ‘existential-conversion’ that is actually central to all subject-matters wherein the abstract articulation of principles is of existential-tautologisation/existential-reference neutrally. For instance, physics principles can be used for either aggressive and warring applications or peaceful and life-enhancing applications, and to say that physics principles are wrong because these can be construed as applicable for non-peaceful purposes is to misunderstand the fundamental nature of theoretic knowledge as fundamentally construing the possibility of existential-reality. Hence human application of knowledge as ‘human existential-conversion’ implies human self-preservation disposition in redefining meaningfulness-and-teleology from existential-tautologisation/existential-reference as of human subpotent existential-teleology within the full potency of existence-as-of-its-mimetic-echoness or existence-in-reverberation or existence-potency~sublimating-nascence-disclosed-from-prospective-epistemic-digression. In other words, abstract post-structural construct as any other theoretical constructs have no commitments to upholding any value-disposition and teleology but rather construe the ontological possibility conflated as of existential reality. The idea of discretely eliciting value-disposition and teleology choices/options is a secondary exercise of human
disentailment–by–postconverging-entailment) development’ effectively heralds post-ideology as ideas and notions are validated/invalidated by their demonstrated ontological-veracity/ontological-pertinence. In order words the supposed ontological-terms of notions and ideas are the basis for their analysis as ontologically-pertinent or impertinent, and so more than just perfunctory analyses constrained by the limiting framework of institutionalised-being-and-craft constructs and setups but at an existentialism/full-depth-of-existential-implications level highlighting the precedingness/supersedingness/ascendency of ontologically-driven analysis over ‘habits’, ‘conventions’ and rights-of-precedence/entitlement fallacies. Post-structuralism as such should posit to remedy and supersede the inherent ‘conceptual hyperbole’ imbued in the often ‘poorly-ontological, non-ontological or metaphysical constructions permeating ideologies’ and projected as worldviews, to ‘restore existential veracity/ontological-pertinence as the central notion behind worldview construction and representation’, and so beyond just ‘present-driven conceptualisations’ of ideologies, but of an insight derived from a historical and anthropological depth with respect to human mentation, meaningfulness and institutional-development–as-to-social-function-development as implied by a suprastructuralism highlighting of metaphysics-of-absence⟨implicated-epistemic-veracity-of- nonpresencing⟨perspective–ontological-normalcy/postconvergence⟩⟩ or postdication. Such a grounding of post-structuralism provides the underlying ontological outlet of analysis with regards to issues and conundrums of veracity/ontological-pertinence faced by earlier poststructuralists like Sartre (not often recognised as a poststructuralist but whose work interpretively does fit the mould, just as the works of many ‘seriously engaged’ critiques of post-structuralism like Gadamer and Habermas have been highly beneficial to post-structuralism), Foucault and Derrida when it came to draw out veracity/ontological-pertinence from such hyperbolic traditional ideologies including Marxism as constructs highly laden with metaphysics/non-ontology, on the one hand, while addressing, on the other hand, the imbued liberal and neoliberal dogmas of their times
wrongly upholding that its ‘dogmatic practices and conventions’ are beyond ontological-reconstituting—as-to-conflatedness/1/deconstruction, and pertinently so by highlighting their underlying ontological failures with recurrent just about decadal institutional crises and social malaises, speaking of the ontological-wobbliness of a liberal thought that has become highly contradictory as marked by its very own perpetual second-guessing. Eighthly, it is this author’s ‘suprastructural contention’ that human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—‘notional—firstnatures—temporal—to-intemporal-dispositions—<so-construed-as-from-perspective—ontologica-normalcy/postconvergence>’—existentialism-form-factor and a social world is inherently hampered by a blurriness and distance of <amplituding/formative—epistemicity—causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing,—for-explicating-ontological-contiguity/intrinsic-reality/ontological-veridicality—transcendental-enabling/sublimating/supererogatory—de-mentativity’. Thus approaching a scientific study of the Social on the same operational basis as that of the natural world is necessarily deficient as the latter’s immediacy of concurrent <amplituding/formative—epistemicity—causality—as-to-projective-totalitative—implications-of-prospective—nonpresencing,—for-explicating-ontological-contiguity/intrinsic-reality/ontological-veridicality—transcendental-enabling/sublimating/supererogatory—de-mentativity as well as the fundamental pivoting/decentering of understanding involving the psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring that took place starting over 500 years ago in establishing the positivising/rational-empirical mindset/reference-of-thought by the Galileos, Newtons, Leibnizes, Darwins, etc. of the world, such that an Einstein could perfectly articulate the idea of the-theory-of-relativity that would normally make no sense even to the majority of the scientific community at the time but for the ‘very strength’ of the established positivistic/rational-empiricism psyche (operating on the basis
that what predicates on rational-empirical basis takes precedence) already established which ensured its transcendental enabling. The positivistic/rational-empirical psyche today, it is herein contended, is not ‘ontologically performant’ enough (of sufficient ontological-completeness-of-reference-of-thought in construing-ontological-veridicality as determined-by its attendant-ontological-contiguity-<reifying-or-elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought- devolving-as-of-instantiative-context> for the further development today of the study of the Social as of its fleeting/blurred nature (on such terms of ‘what predicates should take precedence’). It must be said that the notion of transcendental enabler with regards to the Social today is rather of relative ontological weakness such that critically a lot of the basis for the social sciences today is influenced rather by practice, authority, and is more or less intellectual-politics driven beyond-the-consciousness-awareness-teleology-<in-preconverging-existential-extrication-as-of-existential-unthought>, rather than truly ontological-primemovers-totalitative-framework deterministic ontological ‘projected constructs’. Consequently despite the projected candour, the study of the social is inevitably permeated with ‘intellectual-ontological-bad-faith/inauthenticity’ (unconsciously or consciously), and by this is meant it will be naïve to think that all issues of intellectual disagreements with respect to the study of the social are necessarily in purely logical terms without factoring the possibility of ‘intellectual perfidy’. What the blatant constraining of the natural world can do to thinking by mere ontological-primemovers-totalitative-framework under the rational-empiricism postconverging-de-mentating/structuring/paradigming is often weakly possible with the Social particularly where there is perceived interest to act otherwise. This is particularly the case with regards to the undermining of social criticism and especially post-structuralism with the intellectual standards of such criticisms strangely enough falling incredibly so low (and mostly finding credibility by ‘pride of place’ of intellectual engagement often beyond-the-consciousness-
abused as objective bases of intellectual criticism get discarded easily for highly subjective ones); and this author equally holds that a ‘fully emancipated social science’ will only prevail with the requisite pivoting/decentering of understanding as 'deprocrypticism—preempting—disjointedness-as-of-reference-of-thought' psychoanalytic-unshackling/memetic-reordering/institutional-recomposing, which should enable the attainment of a suprastructural/beyond-the-consciousness-awareness-teleology level of social thought involving notional–deprocrypticism as preempting—disjointedness-as-of-reference-of-thought. More like in many ways the level of thought in the natural sciences is wholly divorced from our consciousness awareness teleology and is fully transcendental-enabling/sublimating/supererogatory—de-mentativity by confirmatory existence/intrinsic-reality/ontological-veridicality with little or no social-aggregation-enabling but say for human organisational issues and wrong preconceptions induced by social-aggregation-enabling. This arises because it is inevitable to have conscious or unconscious ontological-bad-faith/inauthenticity just going by human temporal-to-intemporal nature without an inherently strong transcendental-enabling/sublimating/supererogatory—de-mentativity. While in the natural and mathematical sciences the subject-matter by itself is highly transcendental-enabling/sublimating/supererogatory—de-mentativity this is not the case with the subject-matter of the social due to its high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/epistemic-totalising—self-referencing-syncretising-as-of-perceived–social-stake-contention-or-confliction requiring rather a further strengthening of ontologising rules as of knowledge-notionalisation and utter-ontologising-recomposing (notional–deprocrypticism as preempting-procrypticism or preempting—disjointedness-as-of-reference-of-thought) beyond the present just positivistic/rational-empiricism striving social
science bringing together profound insight with causal effectiveness. This doesn’t necessarily imply a naïve mimicry of the experimental approach as is often the case it can be argued as prevalent in the psychological sciences, and even in the natural sciences there is need for thorough insight when experimenting like say much of quantum physics is often based on elaborate abstractness of thought that is merely validated by critical confirmatory experiments.

In fact, this author will contend that the overall ‘insightful empirical’ conceptualisation of this paper is actually more profound than catches the eye in a naïve empirical sense that cannot see beyond our positivistic registry-worldview to recognise human successive transcendental states like recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, positivism–procrypticism and deprocrypticism; as even empirical conceptualisations requires insight and it is more than just a matter of obtaining results because an experiment has been made which is certainly simplistic as the very existential state of things when disambiguated is actually a more profound notion of experiment. It is interesting to note that this argument on the specific basis of (conscious or unconscious) ontological-bad-faith/inauthenticity for the requisite condition of a ‘fully emancipated social science’ is more than just of circumstantial and idle implication but is rather construed as a de-mentative/structural/paradigmatic notion much like saying it is impossible to have a fully emancipated science in a transitory non-positivism/medievalism to positivistic social-setup still emphasising essences and supranatural causations over a transcendental-enabling/sublimating/supererogatory–de-mentativity of rational-empiricism/positivising based knowledge of intrinsic-reality, as transcendent-enabling/sublimating/supererogatory–de-mentativity positivistic contentions will still be undermined with such a discrepancy of notional-discontiguity/epistemic-discontiguity in the apriorising/axiomatising/referencing/intelligence/setup/measuring/instrument of reference-of-

aestheticised–preconverging/dementing –qualia-schema>
thought/axiomatic-construct. Likewise, the positivism–procrypticism meaningful-frame is not sufficiently beyond-the-consciousness-awareness-teleology of social-aggregation-enabling with respect to its social reality subject-matter as of its spurious/remote nature, for a more profound transcendental-enabling/sublimating/supererogatory–de-mentativity (unlike the relative case with the physical reality subject-matter as immediate) as required for futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of meaningfulness and-teleology as of prospective notional–deprocrypticism intrinsic-reality/ontological-veridical transcendental enabling. Thus, the only credible logic this author can think of is that post-structuralism as one of the major critical theories given its potential ontological vigour has been seen as a threat with a deliberate covert non-intellectual effort to stifle it and limit its influence often having to do with misrepresenting the ideas and implications of the ideas of its main proponents (as in fact, one of the central issue with regards to post-structural thinking with respect to other intellectual postures has had to do with the unusually high level of accusations of its proponents of misrepresentation of their ideas by many of their critiques whether with respect to such accusations of nihilism or untruth, with a central characteristics of many of such critiques being a failure of recognising exactly the central point of post-structural thinking as rather ‘a putting-into-question/shuffling-of-the-cards for a more profound perspective for ontological analysis’. Consider in this case one media-driven and popularised argument that Karl Rove ‘we make our own reality’ quote during the Bush mandate, is due to post-structuralism. Such arguments are revealing of the ‘non-intellectual spirit’ of many such critics, and in this instance wrongly intimating that Karl Rove considered himself a poststructuralist whereas a sincere take will garner that this is nothing other than a Machiavellian, opportunistic and unprincipled statement than ‘truly post-structural theory inspired’ as with or without post-structuralism it is no less likely that the same statement.
would have been uttered. And the pseudointellectual exercise of linking the two is revealing not only of such out-of-the-way criticism but equally the ‘wayward mindset’ that is often brought into supposedly rigorous social science on the basis of such anything-goes rhyming-logic! Post-structuralism generally occupy a relatively sound position when it comes to all the practical applications of post-structural thought which, to say the least, have always highlighted a sense of re-equilibrium rather than the bogus and insincere criticisms of nihilism or untruth which this author construes as ‘in-effect ontological-bad-faith/inauthenticity’ of ‘parodying’ of poststructuralists positions and analysing the ‘parody’ in usurpation as against a genuinely candid critical intellectualism of their true postures in ontological-good-faith/authenticity.

Post-structural exposition of the realities of the social are not value judgements in themselves just as natural sciences exposition of natural and physical reality doesn’t carry any value judgements. For instance, discovering that bacteria cause disease is a simple objective truth then giving rise to human animate-existential-referencing/subjectification inducing the teleological meaningfulness to pivot/decenter that knowledge into avoiding disease and finding cure for diseases. This is no more different with post-structural thought which is not a metaphysical/ideological advocacy but telling the social reality for what it is, with human pivoting/decentering to apply that knowledge for its defined teleological meaningfulness. One of the serious consequence of such a weakened social criticism driven by such a targeted and induced atmosphere of quasi-anti-intellectualism is the result that the domain of the political economy and corresponding economic interests have been spared from the critical analysis of such powerful ontological tools; specifically going by the issues of misallocation and inequality we face today based on axioms of models that remain critically beyond analysis, as effectively an anti-intellectualism with respect to social criticism including post-structuralism is cultivated in favour of a default socially uncritical political economy practice (with the cover-up of an ‘intellectually platitudinal’ media) to protect them. Notwithstanding the impressive theoretical
conceptualisations of an ever second-guessing economics science, the ‘underlying liberal
department axiomatic constructs’ on which it rests are massively arbitrary, flawed and
degenerate; and this is one area in which developed social criticism including post-structuralism
could do an excellent job in debunking the ‘underlying mysticism’, as the domain of the
political economy beyond competition of ideas at such a fundamental level is the very
foundation of the uncritical preservation of such axioms. Such issues as political choices for
bailouts, reallocations and remuneration practices are strictly speaking not economic science
issues but political economy issues that require a criticism with respect to social choice about
the political economy, but this has been usurped uncritically as if of a natural economic
allocation mechanism (a falsehood). This author makes this latter point on the belief that
knowledge is an existential exercise and that the intellectual should sincerely put their ‘hand in
fire’ at the risk of being proven wrong, as the intellectual exercise is not one of self-veneration
but discovering the truth (even at the risk of sounding/looking ridiculous). If there is one area of
speculative thinking allowed to this author in this paper, it is such a proposition together with
the idea that it is incredible to think that a lot of the criticisms directed to post-structuralism
since the 1980s arises out of such (it is herein contended) ‘intellectual triteness’ by such critics
particularly going by the ‘frivolous arguments’ advanced compared to the high intellectual
standards they have been able to show elsewhere, together with the notion that these have
tended to be unusually media driven in inducing a populist effect. Imagination will point to the
idea that something much more ‘cynical and non-intellectual’ must be at work but passing for
legitimate intellectualism; or is it, more like the medieval scholasticism erudition establishment
more or less grasping the true implications of a non-medieval positivistic thinking on the whole
intellectual, belief system and social-construct, and cynically upholding notions they knew
better to be wrong but for their overall sense of preservation of their present and their present
interests. This impression can be extended as well with respect to the idea of the social
implications of postlogism\textsuperscript{78} as of compulsion–nonconviction/madeupness/bottomlining:

Such an articulation equally extends to the idea that notions overlooking vices and-impediments associated with psychopathy and equally wrongly implying its associated virtue in the procrypticism registry-worldview are just as of ‘temporal threshold-of—nonconviction/madeupness/bottomlining-in-shallow-supererogation’ —as-to—attendant-intradimensional—prospectively-disontologising—preconverging/dementing —apriorising-psychologism like the disposition to overlook vices and-impediments associated with notions and-accusations of-sorcery and equally implying the associated virtue in a non-positivism/medievalism setup; and so, as of human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—

Now the criticism of populism-driven critiques of post-structuralism is not raised idly, as an exercise that purports to articulate such breadth and depth of novel ideas as herein necessarily requires that the authorship effectively assume the profile and presumption that the implied knowledge construct warrants (which obviously every truly intellectual spirit will appreciate for what it is, if not agree with the arguments). Such an articulation is driven by the idea that knowledge as a transcendence-enabling construct is more than just about its craftiness/technique but part and parcel of the intellectual exercise is to articulate meaningfulness by its existentialism/full-depth-of-existential-implications. And just as faced with the evasive nature of quantum theory the physicists never said reality is wrong since it is difficult to understand, likewise it is naïve to imply that the reality reflected by post-structuralism is wrong because it doesn’t quite fit into
our ordinary everyday way of thinking (that is exactly the point, our ordinary everyday way of thinking is in want of its further development, just as all prior ordinary everyday ways of thinking had to be psychoanalytically-unshackled)!
