Besides and together with a study of the social sciences and philosophy, this author’s intuitive
confidence in this hermeneutic design insights that underlies the arguments and discourse, is
inspired from ‘an intimate and spontaneous idiosyncratic philosophical exercise (praxis) in the
quest for the essence of meaning’, a ‘craft’ that has been nurtured continuously for nearly 25
years now (without conscious planning at the beginning nor at any time thereafter) since his
discovery of ‘philosophical questioning and discourse’ at high school. An exercise that mirrors
the intimate idiosyncratic exercise/praxis allowing an artist like a musician to grasp and develop
memes that latter down the years enable the artist to be more or less ‘consummate with respect
to the personal orientation they give to their arts’. Central to all such idiosyncratic processes is a
continuous idiosyncratic memetic refinement over time of rough-cuttings, internal coherences,
insights, inspirations, intuitive validations, constraining, sense-of-failing, sense-of-succeeding,
confidence, mental inflections and mental projections; of course as per ability and ultimate
pertinence with respect to intrinsic reality!
Abstract

This paper is rather a profound hermeneutic enunciation putting into question our present understanding of psychopathy. It further articulates, in complement, a novel theoretical and methodological conceptualisation for a hermeneutic psychological science. Methodology-wise, it puts into question a traditional more or less categorical and mechanical approach to the social and behavioural sciences as it strives to introduce a creative and insightful approach for the articulation of ideas. It rather seeks to construe the scientific method as being more about falsifiability and validation but driven by a sense of creative understanding and insight of notions laid out as open-ended conceptualisations. Theory-wise, it sees continuity between anthropology and psychology as anthropopsychology behind an entropic construct of human psychology based on a recurrent re-institutionalisation mechanism for intemporal-preservation-entropy-or-contiguity–or–ontological-preservation.

Introduction

Quite possibly everything about this paper whether the authoring, the approach and the substance sparks of novelty bordering on the outlandish. Further, why not take a traditional categorical approach and clearly present scientific ideas the traditional way? It is a personal insight developed more than 20 years ago, and just when the author began his B.Sc. in Sociology and Anthropology; that a study of the social and behavioural should carry the philosophical and insightful at its very core above anything else given the inherent ephemeral nature of its subject matter. When I came across the term hermeneutics (and others like phenomenology), this author felt as a personal persuasion that that was the chart for the future of the social sciences. My vision in this regard is one of a social science that delves directly into the core of things and avoids platitudes. To come back to the point of this abstract, this explains my apparently tattered approach. But tattered really? No, as the central insight of my articulation is that the scientific method is a validation and falsifiability method, and not necessarily the creative method. The creative method as a hermeneutics isn’t supposed to roll down and stifle its very expressiveness, and at the same time it should be articulated in such a way that an exercise of falsifiability, validation and open-ended questioning can be
undertaken over it. Such a hermeneutic science calls for a mutual sense of such a hermeneutics by both the author and would-be critic. I hopefully believe the way I have articulated ideas should be able to allow for such an examination. My hermeneutic inspiration in this regard can be analogised with musical creation and music theory. The latter is there to ensure the appropriate articulation of rules but is not really the drive of musical creation, as musical creation is rather the musician’s hermeneutic/reprojecting/supererogating/zeroing insight of how to go about creating music while adhering to music theory, such that any such music is analysable/critiqued by the way it credibly adheres to music theory, and actually in exceptional cases further develop music theory. A second point that makes this method ideal is that the apparent enunciation of this paper (an outright call for a reinvention of the state of the art regarding our understanding of psychopathy and the underlying psychology science); is that it is doubtful such an articulation can be credibly presented in simple categorical terms, without rather utilising an entropic hermeneutic-referential approach based on an open-endedness for falsifiability and validation in future elaboration and development of ideas. Further, I thought it more critical (wary of platitudinising the occasion) that the purity of ideas expressed herein shouldn’t be overly clouded particularly as the treatment of this paper is largely in substance virgin territory, as of the underlying conceptualisation referential drive (beyond just simplistic rhyming/speculative/interpreted categories of philosophical theories and concepts but rather as ‘a driven distinct comprehensively coherent/contiguous operant-level of insights articulation, and carrying implicative and applicative operant-level possibilities going forward’, more like a song is a coherent referential whole beyond just naïve categories of disjointing/disparateness/disentailing percussions-and-tunes more-or-less similar-to-those-of-the-song construed as constituting the song). As a matter of fact, I would rather I wrote another paper talking about influences for such an articulation for this paper going by my hermeneutic design insights. Moreover, going by the very nature of how humans develop new ideas; while
many, if not most, of my arguments may be more or less ‘plainly intelligible’, I equally thought it important to articulate ideas I hold in deep conviction and further as many such ideas come with their requisite precise convoluted qualifications even if such ideas might not be quite intelligible from a plain and simple reading, with the notion that such a requisite insight will be forthcoming in future critique as the very nature of the introduction of new ways of thinking often mean their unintelligibility at first (equally explains my repeating of many terms for ‘habituation’), but then it is not the pertinence of reality that compromises it is the impertinence of human certitudes that does! In the bigger scheme of things, it is herein contended that human social and institutional progress and development is not de-
mentatively/structurally/paradigmatically contiguous as to the very inherent nature of any given institutionalised framework as all such frameworks arrive at their apathetic threshold as these rather develop into denaturing wooden-language-(imbued—

(with media-driven imprimaturing increasingly usurping the role of genuine academic standard production and ultimate validity hanging on the mere imprimatur). As what becomes critical in such a context is no longer prospective knowledge-reification—gesturing—\(\text{prospective\_psychologismic\_apriorising/axiomatising/referencing-\{of\_attendant\_ontological-}\text{contiguity \_educed\_existentialising/contextualising/textualising-contiguity }\)}—

\(\text{conflatedness in \{preconverging-disentailment-by\}–postconverging-entailment}\) as supposed intellection is increasingly infused with obfuscations, falsehoods and subterfuges (as to the fact that misrepresentations and pretences to misunderstand are rather conveniently projected as of perceived social-stake-contention-or-confliction and hardly reflecting a discernment about the possibility for advancing human progress); in so-doing apparently render human-subpotency/mortality bigger than existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression as to immortality. But then human intellection across all ages and times come to an end not because of inherently right or inherently wrong ideas per se (as the very basic genuine striving for intellectual progress is what is critically decisive as that exercise ensures that down-the-line correct and reifying ideas will arise anyway), but critically when deliberate deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity becomes more important than an aspiration for genuine intellection as an open-ended activity providing the possibility for human knowledge and reflexive empowerment from that
knowledge. At which point, it is wrong for ‘genuine intellection’ not to recognise what is going on (as to wrongly imply that it is veridically in dialogical-equivalence-as-to-psychologistic-apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflatedness—in-{preconverging-disentailment—by—postconverging-entailment,—in-self-becoming/self—conflatedness /formative—supererogating>), as such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity (whether or not, beyond-the-consciousness-awareness—teleology—in-{preconverging-existential-extrication-as-of-existential-unthought}> only leads to a human destructuring-threshold—{uninstitutionalised-threshold/presublimating—desublimating-decisionality}—of-ontological-performance—<including-virtue-as-ontology> which habituates and enculturates/endemises such deception-and-induced-deception-as-of-ontological-bad-faith/inauthenticity; rendering the supposedly empowering activity of knowledge-reification—gesturing—<in—prospective_psychologistic-apriorising/axiomatising/referencing—{of-attendant-ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflatedness—in-{preconverging-disentailment—by—postconverging-entailment}> impotent as in many ways such denatured intellection effectively claims openly as of its disparateness-of-conceptualisation—<unforegrounding-disentailment,—failing-to-reflect—‘immanent-ontological-contiguity’> inclinations (poorly appreciative of existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression implications of transcendence-and—sublimity/sublimation/supererogatory—de-mentativity). In many ways this intellectual falsehood (so-construed herein as to ‘the implausibility of genuine lack of understanding as from a serious intellectual engagement’ but rather ‘strategic/calculated behaviour of mere institutional power even against genuine knowledge’ herein construed as a ‘decadent and dangerous conception of knowledge’ that is effectively destructive of prospective human knowledge reifying and

Actually the projection of values including intellectual values in such <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag are often prospectively deficient, given the fact that notions of value are only as pertinent as of their transvaluation implications in relative-ontological-completeness since the very same conception of value when construed on the basis of relative-ontological-incompleteness may actually be associated with vices-and-impediments, and so beyond-the-consciousness-awareness-teleology -<in-preconverging-existential-extrication-as-of-existential-unthought> ; given that virtue is rather as of the-Good/understanding/notional–knowledge-reification–gesturing-<in-prospective_psychologismic-apriorising/axiomatising/referencing- {of-attendant_ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }— conflatedness -in- {preconverging-disentailment-by}–postconverging-entailment>/ <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative-implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity conceptualisation as to transcendental-enabling/sublimating/supererogatory-de-mentativity and not the vagueness of impression-driven/good-naturedness/wishfulness <amplituding/formative> wooden-language-{imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the- reference-of-thought–categorical-imperatives/axioms/registry-teleology }

Likewise, it is herein contended that the future possibility for the natural sciences advancement is inseparable from the possibility of social and social-organisational advancement as of prospective human aporeticism overcoming/unovercoming as to the prospective deprocrypticism–or–preempting—disjointedness-as-of- reference-of-thought protensive-consciousness induced Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of– meaningfulness-and-teleology and so over our present procrypticism–or–disjointedness-as-of- reference-of-thought occlusive-consciousness; and in effect this conjoint-epistemic-relationship-and-fate in the conceptualisation of the material and social world is even confirmed today as with the social and social-organisational framework that underlied and was necessary for most of the scientific and technological advances after the second-world war. Basically, dimensionality-of-sublimating ⟨amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation⟩ as such reflects the successively induced originariness-parrhesia,–as–spontaneity-of-aestheticisation specific ‘constructiveness-by-destructuring cut-offs/thresholds of human ontological-performance’–<including-virtue-as-ontology>’ so-construed as of notional–protensive-consciousness (trepidatious-consciousness/warped-consciousness/preclusive-consciousness/occlusive-consciousness/protensive-consciousness) implications; and as eliciting any such prospective specific construction-of-the-Self and its

herein, what vindicates this idea of apriorising/axiomatic/referencing intellectual

After many years of formative contemplation this author is rather dedicated to writing
henceforth even if read/skimmed just by a handful or fortuitously or never-but-potentially,
whatever cometh, hopefully over the next half a century, and thinks any human who genuinely
feels strongly about the need for profound human thought should be able to do likewise, as
ultimate responsibility and choice notionally lies with the individual.

The very specific nature of the deprocryptic transcendence-and-sublimity/sublumity/sublimation/supererogatory~de-mentativity/institutionalisation is to recognise and articulate the veridicality of the fact of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—’notional—firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence>‘—existentialism-form-factor

Knowledge-notionalisation as such carries a transcendent-existentialism/in-full-existential-depth-of-notional—firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence>—implications which is more than just reactionary to the possibility of temporality/shortness (shortness-of-register—meaningfulness—and-teleology) but rather a transcendent-existentialism maturing of thought (intemporality as longness-of-register—meaningfulness-and-teleology) that takes abstract cognisance of temporality/shortness as an intransient potency (hitherto accounting for the circularity/recurrence/repetition/repeatability of human circular-uninstitutionalised-threshold) to be conceptually understood and superseded recurrently and perpetually

The conceptualisation of reference-of-thought—categorical-imperatives/axioms/registry-teleology refers to the same deconstructed/ontological-reconstituting—as-to-conflatedness notion

The reference-of-thought is the fundamental-dispositional mentation architecture for human referencing or construing of meaningfulness-and-teleology

preceding-and-defining reference for the hermeneutic-referencing of the ontological meaning of all other associated conceptualisations and notions

‘referentialism’ which makes reference to the supersedingness/precedingness of the ‘intemporal preservation institutionalisation/intemporalisation entropy/contiguity’ before articulating concepts and notions in referential and organic elucidation of the entropic construct. Human mental development across time validate the notion that we have consistently been in a state of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring

two dilemma with respect to the conceptualisation of virtue

intemporal-preservation is a memetically/psychoanalytically evasive construct at uninstitutionalised-threshold, the pursuit of which is veridically the human species eudaemonic contemplation

‘human progress/transcendence happens as a matter of fact, with no registry-worldview/dimension having any ontological and veridical claim/pretence to extricate itself from psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring—as-dialectical-stranding-backdrop-for-prospective-transcendence

Stranding (of-perverting-temporal-dispositions-of-reference-of-thought) should be construed at a registry-worldview’s/dimension’s uninstitutionalised-threshold (the threshold where the registry-worldview/dimension is failing/not-upholding-<as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity–or–ontological-preservation)

There is no reason for de-mentation ⟨supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics⟩ and recomposuring but for the fact that the internal coherence of a registry-worldview/dimension is failing/not-upholding-<as-of-apriorising/axiomatising/referencing> intemporal-preservation-entropy-or-contiguity–or–ontological-preservation at its uninstitutionalised-threshold

ontological construct ‘escalates’ specific/particular instances of phenomena (in this case psychopathy and social psychopathy phenomenon) into a universal conceptualisation which ‘knowledge principle conceptualisation’ then addresses (percolates into) the ‘infinity of related incidental phenomena and cases’

notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>-pedestals-disambiguation before logical processing/operation

it is critical to distinguish between a true philosophical development that arises by intemporal-disposition and an institutionalised development that is articulated to elicit ‘positive-opportunism—of-social-functioning-and-accordance’ in humans
the concepts of intemporality/longness and temporality/shortness is more scientific than the impression notions of good and bad

The use of ‘human mental-dispositions/individuations’ as of notional~firstnaturedness—temporal-to-intemporal-dispositions<-so-construed-as-from-perspective–ontological-normalcy/postconvergence> herein doesn’t mean ontologically that some individuals are inherently/exclusively solipsistically temporal and others are inherently/exclusively solipsistically intemporal

By pedestal is meant the ‘temporal-to-intemporal individuations dispositions of meaningfulness whether the intemporal-disposition individuation-pedestal or the temporal-dispositions individuations-pedestals

‘Unconscionability-drag’ (from an ontological/intemporal reference) refers to the comprehensive state of undisambiguation of temporal-dispositions individuation-pedestals which are wrongly associated to the intemporal-disposition as being ontologically-veridical as these conjugate/inflect/protract (in mimicking-protraction)

at ‘uninstitutionalised-threshold’ human learned behaviour is primarily geared towards what is ‘perceived as succeeding as of positive-opportunism—of-social-functioning-and-accordance’

‘unconscionability-drag’ carries the resolution for disambiguating reference-of-thought in the ontological social construction of meaning

Unconscionability-drag (enabling ontological reference), by which the perversion-of-reference-of-thought<as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation>/mental-perversions teleologies of meaning is accounted for

‘an ontological psychoanalytic/memetic-contiguity deconstruction across anthropology’ which the present treatment of psychology doesn’t recognise

the transcendental requirement for a ‘habituation’ to a so-called ‘prospective intemporal and more veridical mental-devising-registration-worldview’s/dimension’s reference-of-thought—categorical-imperatives/axioms/registry-teleology is rather ‘unfathomable’ for the prior <amplitudating/formative>wooden-language-(imbued—temporal—mere

Conventioning/social-temporal-thresholding thus refers to the fact that in a ‘social construction of meaning’, intrinsic-reality by itself and in of itself (as may be grasped ontologically from superseding/transcendental categorical-imperatives preserving intemporality) is not necessarily the deterministic basis for human social adherence to it

an exercise in institutionalisation/intemporalisation beyond just intemporal philosophical projection is needed for the social integration of any transcending veridicality postconverging—dementating/structuring/paradigmning

‘conventioning’ is not wholly antipodal to ‘ontologising/intrinsic-veridicality’ as the latter prospective integration in the social-construct is through the former

‘knowledge-notionalisation’ or knowledge construct not only based on intemporal idealisation but that also factors in how the temporalities will relate to meaning

‘institutionalisation devising and devices’ already speaks a lot about human potential and capacity (and are basically our virtue with no need for ‘false idealisation’

a ‘referential-as-natural’ conceptualisation of knowledge that consciously tautologically subsumes temporal-dispositions and intemporal-disposition

Suprastructuralism ultimately reflects the ontological-contiguity—of-the-human-institutionalisation-process by bringing to the ‘collective-human-psyche-and-consciousness as a transparent-pillar or social universal-transparency-

mobilising an ‘ontological-tautologisation/existential-reference conceptual-scheme’ (like a hermeneutics-derived psycho-ontological, bio-ontological, econo-ontological, mathematico-ontological, etc.) construed as of ontological-normalcy/postconvergence teleology thus postdicatory (as metaphysics-of-absence–{implicit-epistemic-veracity-of-nonpresencing-<perspective–ontological-normalcy/postconvergence>}) conceptualisation)

It is rather naïve to depart from a philosophical angle and try to imply causal effectiveness of a natural science nature (rather than effective validation techniques relevant to transversal nature of philosophical conceptualisation) just as the same holds true the other way round

a ‘postconverging-or-dialectical-thinking–psychology or psychology-of-mentation-dynamics or natural–psychological-dynamics’ rather captures the ontological undercurrents that constantly redefine human placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology

readjustment for intrinsic-reality/ontological-veridicality is actually a human ‘changing-of-the-psyche’/psychical-readjustment (psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) with its increasing-ontological-completeness or diminishing–human-epistemic-abnormale-or-preconvergence

a traditional approach of analysis of psychopathy (as so construed from this papers totalising-entailing/nested-congruence insight including psychopathy and social psychopathy) will tend to be just as palliative as a non-positivism/medievalism world’s postlogism associated with their social cognisance-and-integration of say notions-and-accusations-of-sorcery

humans actually come into existence which avows an ‘attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity—reifying-or-elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context’ of imbricated-becoming-transitioning within which they come to grasp rules and principles...

knowledge is not constructed as a ‘human mutual agreement exercise for its construal/conceptualisation/discovery/invention/development’ since solipsistically/emanantly/becomingly we are of temporal/shortness to intemporal/longness mental-dispositions and this cannot be averaged to get transcendental knowledge which is rather the outcome of an enabling process as to ‘intrinsic-reality/ontological-veridicality transcendental enabling’

ascetic intemporal-prioritising/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation Socrates will be passed by the ordinariness/earthliness of thought in that institutionalised-being-and-craft setup as vague while upholding its shallow notion of value

‘irrealism and corresponding virtualities’ that will undermine analytical pertinence, as man has to be understood exactly for what man is in effective reality, to then articulate effective knowledge constructs that are actually most efficient because of their realism

‘requisite specialness of the discipline of philosophy as a first-order ontology’ among all subject-matters (or-as-it-protrudes-into-subject-matters-or-second-order-ontologies), as the one that can least afford to be of normal trade

incompleteness—enframed-conceptualisation in corresponding conjugated-postlogism of temporal-dispositions

Existence/existential-reality is thus a teleological-contiguity/oneness-of-teleology ‘with teleological-discretion being defined only by epistemic choice/differentiation’

decentering is what divulges all the uninstitutionalised-threshold as recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and prospectively procrypticism by maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation

the idea of pivoting/decentering extends to the notion of the ‘self’s own pivoting/decentering for understanding

ontological-normalcy/postconvergence points out that paradoxically the transcendental mindset/reference-of-thought associated with a ‘knowledge construct of intrinsic-reality’ should priorly be established (‘centered’ over the prior meaningful-frame which is ‘decentered’) for the knowledge construct to take hold by the continuing ‘moulding’ of its proponents and corresponding social construct

for instance in the sense that mathematics is universal means mathematics is totalisingly-entailing (with this general sense applying with regards to any given registry-worldview/dimension as to its given ‘entailing-\langle\text{amplituding/formative–epistemicity}\rangle\text{totalising–}\langle\text{relative-ontological-completeness}\rangle\text{apriorising/axiomatising/referencing–rules}\rangle\text{and as further reflecting the implication that registry-worldviews/dimensions of relative-ontological-completeness\rangle\text{are of more profound ontologically totalising-entailment apriorising/axiomatising/referencing–rules as so implied as from ‘non-rules totalising-entailing, rulemaking-over-non-rules totalising-entailing, universalisation-directed-rulemaking-over-non-rules totalising-entailing, positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules totalising-entailing, and preempting—disjointedness-as-of-\langle\text{reference-of-thought, as to-}\langle\text{amplituding/formative–epistemicity}\rangle\text{growth-or-conflatedness}\rangle\text{/transvaluative-rationalising/transepistemicity/anamnestic-residuality/sprit-drivenness’—in-superseding-mere-formulaic-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules totalising-entailing’, and so-construed as of their respective ‘foregrounding–entailment\langle\text{postconverging–narrowing–down–sublimation-as-to–’existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation ‘–in-reflecting–’immanent-ontological-contiguity ‘;–as-operative-notional–deprocrypticism\rangle\rangle’), and in this regards we can appreciate how the very implications of say
universal human rights supererogatorily becomes more and more profound as from say the Socratic-philosophers (even as slavery, class-seclusion and female-seclusion was prevalent as to warped collateralisation), budding-positivists (even as in many ways the practices of serfdom/slavery, social-class discrimination and female-discrimination were equally prevalent as to preclusive collateralisation) and today’s supposedly universal conception of human rights (even as it is marked by occlusive collateralisation of other peoples, cultures and nations as well as gender and age occlusive collateralising biases); actually the specific sense and general sense are thus linked on the basis that both imply totalising-entailing with the specific sense speaking of totalising-entailing as to the specific universalisation registry-worldview/dimension ‘when mankind initially consciously cognised that the profoundness of meaningfulness-and-teleology should be totalising-entailing but without necessarily differentiating such a conception of totalising-entailing between mythological and positivistic/rational-empirist totalising-entailing with both construed as universal ‘meaningfulness-and-teleology’, while the general sense of universal implicitly captures and exactifies/precises the conception of totalising-entailing in terms of ‘entailing-formative-epistemicity-totalising-in-relative-ontological-completeness’ as reflecting the implication of human limited-mentation-capacity-deepening as to the ‘notionalisation/notional-conception/amplituding of totalising-entailing so-reflected by the ontological-contiguity—of-the-human-institutionalisation-process’ (along the same lines as
notional-deprocrypticism) thus amplificatorily rendering the conception of totalising-entailing (as to notionally-universal) as more ‘profoundly construed as from perspective relative-ontological-completeness’ as of the ontological-normalcy/postconvergence of existence/intrinsic-reality’ so-underlied by perspective ‘nondisjointing totalising-entailing’ or deprocrypticism

There is a common word that already exists that best describes what a psychopath is philosophically-speaking. It is a French word that doesn't exactly exist in English. The word is ‘cinglé’ and is better translated in English as ‘slanted mind’ (in contrast to the straightness/candor/organic-comprehension-thinking of a ‘conviction-as-to-profound-supererogation’ predisposed human mind’ so-reflected as prelogism -as-of-conviction,-in-profound-supererogation -<existentially-veridical–’attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> and so-construed as of human candidity/candour-capacity. It should equally be noted that sometimes the word cinglé is used intermittently with deranged (dérangé) which is a more general word that does not capture the socially-functional-and-accordant phenomenal specificity that is of relevance herein. In other words, ‘the cinglé’ perceives meaning as ‘a hollow mimicking form in-of-itself that determines others behaviour’ in contrast to the normal–as-of-candidity/candour-capacity human relation to meaning as of essence or supplanting–conviction-as-to-profound-supererogation —of–’attendant-intradimensional’-postconverging/dialectical-thinking –apriorising-psychologism or prelogism we abide by (and so, even in the case of ‘poor or bad supplanting–conviction-as-to-profound-supererogation —of–’attendant-intradimensional’-postconverging/dialectical-thinking –apriorising-psychologism’ or bad prelogism where the bad logic of the prelogism as-of-conviction,-in-profound-supererogation -<existentially-veridical–’attendant-intradimensional–apriorising/axiomatising/referencing’-logical-dueness-precedes-disontologising-logical-outcome-arrived-at> mind operates by an ad-hoc and circumspect exaggeration or omission). Further, the dynamics of such a graduated human consciousness as of notional-conflatedness of notional-deprocrypticism can be reinterpreted operantly as of ‘notional-referentialism’ as it points to the fact that categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments are actually ‘various levels of failing to achieve the notional-deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument that ensure

While in reality these are respectively of ‘categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments’, they still act as if of ‘notional-deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments’, and so ‘in their beyond-the-consciousness-awareness-teleology <in preconverging-existential-extrication-as-of-existential-unthought> preconverging-or-dementing –apriorising-psychologism’ thus generating as of their ‘pseudo-referentialism mental-dispositions/apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstruments levels’ their respective 59 neuterising construed as of ‘their prior relative-ontological-incompleteness-of-reference-of-thought of meaningfulness-and-teleology’. Neuterising thus refers to human attribution of meaningfulness-and-teleology as of human limited-mentation-capacity de-mentative/structural/paradigmatic misconstruing, with respect to existential social-stake-contention-or-confliction possibilities, such that its reference-of-thought-as-to-preconverging–de-mentating/structuring/paradigming—ontological-performance <including-virtue-as-ontology> is relatively ontologically-incomplete/of-ontologically-compromised-mediating,-as-of-its-specific-constitutedness, and so construed from the apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-
existentialising/contextualising/textualising-contiguity conflatedness in {preconverging-disentailment by} postconverging-entailment of notional-deprocrypticism; thus neuterising is specifically ‘a contextually developed perversion-or-derived-perversion-of-reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation’, that is secondnatured as of its prior relative-ontological-incompleteness-of-reference-of-thought with the consequent implications of relatively defective meaninglessness-and-teleology ontological-performance-including-virtue-as-ontology. For instance, as of their relative-ontological-incompleteness-of-reference-of-thought, an animist society might notice that going to a given forest leads to illness and ascribe evil to that forest but then a prospective relative-ontological-completeness-of-reference-of-thought positivism interpretation may be that at a certain time of the day and during a certain time of the year that forest attracts mosquitoes that cause malaria for instance which can be prevented by rubbing a certain leaf on ones cloths and body, together with the fact that a given root can be used to cure the malaria, and in addition to a whole web of nuanced understanding available to the positivism meaninglessness-and-teleology relative to the ‘utter and brute’ animistic interpretation as meaninglessness-and-teleology neuterising that it is an evil forest one should not trespass together with a whole cohort of ‘imaginary tales’ in shoring up that posture, speaking of its threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation-as-to-at attendant-intradimensional-prospectively-disontologising-preconverging/dementing apriorising-psychologism. This is a most elaborate articulation of neuterising as to Being-development/ontological-framework-expansion-as-to-depth-of-ontologising-development-as-infrastructure-of-meaninglessness-and-teleology implications but it equally applies where meaninglessness-and-teleology is ‘just about miscued’ say between positivism-procrypticism and prospective deprocrypticism with the latter underlying the disjointedness-as-of-reference-
of-thought of the former as to its neuterising, for instance in the case of psychopathy and corresponding conjugated-postlogism as social psychopathy as in the various illustrations highlighted herein and particularly as more obviously revealed with childhood psychopathy. In the bigger picture, ascriptivity-or-ascription-hardening/pseudo-referentialism arises as of notional-referentialism/notional-deprocrypticism; wherein recurrent-utter-uninstitutionalisation’s existential reference-of-thought deepest-level of neuterising is elicited by its ‘trepidatious-consciousness impulsive—ontologically-compromised-mediating,-as-of-its-specific-constitutedness’

Basically \textsuperscript{58}neuterising as so articulated is the conception of 'the ontological-performance\textsuperscript{7}<-including-virtue-as-ontology> of the various institutionalisations 'references-of-thought-devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ so-conceptualised from the notional\textsuperscript{-}conflatedness\textsuperscript{13} of notional\textsuperscript{-}deprocrypticism protensive-consciousness, and such an ontologically-veridical evaluation of \textsuperscript{58}neuterising is construed as a deneuterising\textsuperscript{12}—referentialism reflecting-ontologically-veridical-‘affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring-<as-to-postconverging-or-dialectical-thinking –apriorising-psychologism\textsuperscript{8}–and-ontologically-flawed–preconverging-or-dementing\textsuperscript{20}–apriorising-psychologism/deassertion’ as of the various institutionalisations ‘references-of-thought-devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’. The implication here being that ‘neuterising ‘can be disambiguated as of the fundamental human limited-mentation-capacity induced <amplituding/formative–
epistemicity>totalising/circumscribing/delineating context—meaningfulness-and-teleology
totalitative–implications-of-prospective- nonpresencing—for-explicating-ontological-contiguity” is one grounded as of de-mentation (supererogatory–ontological–de-mentation– or-dialectical–de-mentation—stranding-or-attributive-dialectics) on ‘decentering/pivoting around the uninstitutionalised-threshold rule’ as a remaking of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument involving the resetting of the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology’, pointing out that the prior apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument has been superseded as of its revealed perversion-and-derived- perversion-of-reference-of-thought as-preconvergingly-apriorising/axiomatising/referencing-in-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation and so as of the uninstitutionalised-threshold rule. This explains why at uninstitutionalised-threshold which are subject to meaningfulness-and-teleology neuterising, prospective institutionalisation can only be achieved as of secondnatured constraining social universal-transparency (transparency-of-totalising-entailing—as-to-entailing-amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness) that overcomes the given uninstitutionalised-threshold ‘meaningfulness-and-teleology neuterising’ thus enabling the ontological-normalcy/relative-ontological-completeness reference-of-thought of the prospective institutionalisation. It also explains why naively implying at an uninstitutionalised-threshold that ‘the social-universally-non-transparent-thus-non-constraining-element of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality’ is universally attributable as if humans had only the intemporal/longness-of-register-of–meaningfulness-and-teleology individuation without temporal/shortness-of-register-of–meaningfulness-and-teleology individuations will simply fail to recognise the generation-and-upholding of

Being and \textsuperscript{4} meaningfulness-and-teleology\textsuperscript{9}. As a further elucidation, a comparison can be
made between a construct of ‘notional–referentialism’ disambiguated as referentialism,
categorising \textsuperscript{5} neuterising, qualifying \textsuperscript{5} neuterising, tendentious \textsuperscript{8} neuterising and impulsive
\textsuperscript{8} neuterising, and in parallel a reflection of ‘data conceptualisation’ disambiguated as ratio-
contiguous referencing, intervalist pseudo-referencing, ordinal pseudo-referencing, nominal
pseudo-referencing and random pseudo-referencing. We can grasp that effectively data
conceptualisation as of intrinsic-reality/ontological-veridicality is inherently ratio-contiguous as
of ontological-normalcy/relative-ontological-completeness ‘of’ reference-of-thought but then we don’t always have the capacity to reference ratio-contiguous data and so the other types of data conceptualisations are available to us as well ‘as of the limitations of our measuring capacity’, and we grasp that the latter are actually in ‘constructed-deficiency of referentialism—implicit attended–ontological-contiguity’ as of their respective epistemic-abnormalcy/preconvergence /relative-ontological-incompleteness ‘of’ reference-of-thought.

Here as well it is important to understand that it is the ratio-contiguous referencing data conceptualisation that provides the ‘overriding framework as of apriorising/axiomatising/referencing—{of attended–ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflicatedness in {preconverging—disentailment—by}—postconverging—entailment’ for making-sense-of/construing the relatively deficient referencing data conceptualisations as of their ‘defined tolerable levels’ of neuterising. This elucidation is to point out that reference-of-thought constructs in epistemic-abnormalcy/preconvergence /relative-ontological-incompleteness ‘of’ reference-of-thought in the very first place cannot be the basis for articulating, as of their given apriorising/axiomatising/referencing—{of attended–ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity}—constitutedness in preconverging—entailment, by elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring—of-elucidation—outside—attendant–ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity ontologically-veridical meaningfulness-and-teleology ‘as if in referentialism as of referentialism—ontologically-uncompromised-mediating,—as—of-conflicatedness

apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’ but rather require ‘their ontologically-veridical meaningfulness-and-teleology restoration’ by an

Such a basic conception of comparative axiomatic-constructs in their reflection of the very same <amplituding/formative—epistemicity>totalising—devolved—purview—as-domain-of-construal—as-intrinsic-reality/ontological-veridicality highlights that ontologically-veridical meaningfulness is a construction or derived-construction as of inherent intrinsic-reality/ontological-veridicality or the closest axiomatic-construct approximation to it; the insight here being that ‘relative completeness/profoundness of axiomatic-construct/reference-of-thought with respect to intrinsic-reality/ontological-veridicality’ is what is ontologically preeminent/critical for the notional perspective of ontological construal/conceptualisation. This is equally relevant with regards to the ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—de-meaningfulness’ which refers to the transcendental-enabling/sublimating/superegregatory—de-mentativity conceptual framework that sets up the

For instance, all subsequent axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue of the recurrent-utter-uninstitutionalisation registry-worldview/dimension are possible only by its (trepidious-consciousness neuterising-induced)—reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness which is non-rules—apriorising/axiomatising/referencing—psychologism,-as-impulsive-or-accidented-or-random-mental-disposition as this basically defines the possibility of institutionalisation within
recurrent-utter-uninstitutionalisation as inherently non-existent. Likewise it is the habituated rulemaking-over-non-rules—apriorising/axiomatising/referencing—psychologism as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality for the prospective institutionalisation of base-institutionalisation that is the (warped-consciousness neuterising-induced)—reference-of-thought—devolving-teleological-dementating/structuring/paradigming—of-meaningfulness for enabling intradimensional existential-instantiations derived/devolved axiomatic-constructs of meaninglessness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue of base-institutionalisation. This insight extends to all cumulating/recomposing—attendant-ontological-contiguity-successive registry-worldviews/dimensions institutionalisations in construing their teleological-dementating/structuring/paradigming/teleological-possibilities. This equally explains the divergence of individuals and societies ontological-performance—<including-virtue-as-ontology> across registry-worldviews/dimensions even though all humans have the same basic intellectual potential; as within the institutionalisation limits of a registry-worldview′s/dimension′s reference-of-thought—devolving-teleological-dementating/structuring/paradigming—of-meaningfulness as its underlying reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument, individuals cannot all of a sudden start thinking in terms—as-of-axiomatic-construct enabled by a prospective registry-worldview′s/dimension′s institutionalisation reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness; given that there is a need for the requisite institutional-cumulation/institutional-recomposure—historiality/ontological-eventfulness /ontological-aesthetic-tracing—perspective—ontological-normalcy/postconvergence-reflected—epistemicity-relativism-determinism} as of successive

Such notional-conflatedness for ontological-performance\(\langle\text{ontological-performance}\rangle\)-<including-virtue-as-ontology> implication is easily understood as of metaphysics-of-absence\(\langle\text{implicated-epistemic-veracity-of-nonpresencing}\rangle\) when we grasp that a mindset as of a non-positivistic social-setup needs to ‘wean off organically beyond mere mechanical adjustments’ its non-positivism before the notion of ‘a credible logical engagement in terms–as-of-axiomatic-construct of positivism/rational-empiricism with a mindset as of a positivistic social-setup’ can be genuinely entertained. In this regard, the budding-positivists had to implied an utter break with medieval-scholasticism-pedants—ideal-type-or-individuation to avoid the circular problem of their positivism knowledge and science being interpreted in mystical and alchemic terms-as-axiomatic-construct of reference-of-thought–categorical-imperatives/axioms/registry-teleology\(\langle\text{categorical-imperatives/axioms/registry-teleology}\rangle\),-for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\(\langle\text{meaningfulness-and-teleology}\rangle\). Inherently, such ‘a psychoanalytic-unshackling commitment’ inevitably and fundamentally puts into question the axioms and underlying supposedly transcendental-enabling/sublimating/supererogatory-de-mentativity notion as of the (given consciousness’s neuterising-induced)-reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness of the prior registry-worldview’s/dimension’s reference-of-thought of ‘meaningfulness-and-teleology’ which establishes its ‘grounded knowledge construct’, and so because of its denaturing of the prior institutionalisation’s reference-of-thought—categorical-imperatives/axioms/registry-teleology by way of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring—of-elucidation-outside—attendant—ontological-contiguity—of—existentialising/contextualising/textualising-contiguity at the registry-worldview’s/dimension’s uninstitutionalised-threshold inducing prior relative-ontological-incompleteness of reference-of-thought in need for prospective relative-ontological-completeness of reference-of-thought, and so as a transitional construct that is in effect as of a psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring articulation by its crossgenerational transcendental implications projection. Such that such ‘a psychoanalytic-unshackling commitment’ cannot be construed in the same terms—as-of-axiomatic-construct as ordinary intradimensional knowledge as of the established prior institutionalisation teleological-de-mentating/structuring/paradigming/teleological-possibilities for its ‘grounded knowledge construct’ as prior relative-ontological-incompleteness of reference-of-thought, but rather construed as of prospective ontological-normalcy/relative-

apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument as of ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigm-ing—of-meaningfulness’ at its uninstitutionalised-threshold and just triggers ‘operant-or-incidenting-predicative-insights or logical-coherence’ on that basis for its intradimensional grounded ‘meaningfulness-and-teleology’, and this explains its ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’, and explaining why transcendence-and-sublimity/sublimation/supererogatory—de-mentativity fully occurs as of a crossgenerational habituation process. Remarkably, such a maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation behind the ontological-contiguity—of-the-human-institutionalisation-process enabling the human existential tale in successive institutional-cumulation/institutional-recomposure ⟨as-to-historiality/ontological-eventfulness/ontological-aesthetic-tracing-⟨perspective–ontological-normalcy/postconvergence-reflected–‘epistemicity-relativism-determinism’⟩⟩ is always rather perceived intradimensionally as an exceptional-askance and unordinary. For instance, the maximalising-recomposing-for-relative-ontological-completeness—unenframed-conceptualisation mental-disposition in their own times advocating the end of such perverse human institutions like serfdom and slavery were construed in their own times by their dominant societies as of exceptional-askance and unordinary such that in effect these actually engendered great conflict before such practices came to an end; and such metaphysics-of-absence—⟨implicit-epistemic-veracity-of-nonnepresencing–⟨perspective–ontological-normalcy/postconvergence⟩⟩ analysis does apply with respect to superstitions, universal human rights, free society, modern science, etc. but then as of our developed present institutionalisation the idea of not entertaining such practices is viewed as not an exceptional-askance and ordinarily to be expected. This explains human mental states respectively as of
their underlying intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity as validated by causality as-to-projective-totalitative–implications-of-prospective-nonpresencing—for-explicating-ontological-contiguity. At its worst, such an orientation construes of categorisation/taxonomisation of knowledge as inherently representative of intrinsic-reality/ontological-veridicality by that mere exercise. Such an apriorising/axiomatising/referencing–{of–attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }—constitutedness—in–preconverging– entailment ends up misconstruing the organical depth involved and renders all knowledge constructs so categorised/taxonomised on the same vague plane of mechanical equivalence undermining their transcendental-enabling/sublimating/supererogatory–de-mentativity, originality, organic nature and more often than not turning them into platitudes as rather concerned with perceived academic formulations and formats in of themselves rather than ontological-veracity as of intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory–de-mentativity. The underlying mental-reflex for this intellectual disposition associated with conceptual patterning is the assumption that by mere categorising/taxonomising ideas on the basis of their similarities and differences it should be able to attain a grander truth as of elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring–of–elucidation–outside—attendant–ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity. But then such an approach is naïve by its failure to reckon the reality of human limited-mentation-capacity which implies that human conceptualisation tends to develop from prior relative-ontological-incompleteness of reference-of-thought, as of the incompleteness of the preconverging–de-mentating/structuring/paradigming of human reference-of-thought. Such that a naïve categorisation/taxonomisation conceptual patterning perspective on that basis
study mainly involves intersubjective evaluation or evaluation among humans within the scope of their mortality on the naïve assumption that such categorising/taxonomising effectively covers analytically the entirety/potency of existence—as-the-absolute-a-priori-of-conceptualisation—and-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation—as-to-perspective—ontological-normalcy/postconvergence-implied—prospective-aporeticism-overcoming/unovercoming, whereas such is achieved rather by a conceptualising as implied by referentialism-as-of-ontological-normalcy/postconvergence that places attendant—ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity—reifying-or-elucidating-of-prospective-relative-ontological-completeness—reference-of-thought—devolving-as-of-instantiative-context above intersubjective evaluation or evaluation among humans in their mortality in determining intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory—dementativity as of intersolipsistic insight. Consider for instance that in the run up to the development of theory-of-relativity and quantum-mechanics in the early part of last century, the scientists involved weren’t in the exercise of evaluating their respective theories in a closed framework emphasising their respective ‘ownership-of-theories’ as mortals but rather an opened framework emphasising whosever theories contribute in disclosing intrinsic-reality/ontological-veridicality as the superior third party. This can equally be compared to naively articulating categories/taxonomies of sounds on the basis that their apriorising/axiomatising/referencing—{of—ontological—contiguity—educed—existentialising/contextualising/textualising—}—constitutedness—in—preconverging—entailment defines the entire existential possibility/potency of musical compositions that can arise but then the ‘depth/axiomatic-construct of existence for musical compositions’ doesn’t submit to such a naïve categorising/taxonomising apriorising/axiomatising/referencing—{of—ontological—contiguity—educed—existentialising/contextualising/textualising—}.

This extends to the way issues are raised, questions are posed, as well as their supposed resolutions; ultimately lacking in providing theoretical, conceptual and operant constructs of universal applicative pertinence, and explains a certain position of closure that holds that philosophy is just a vague thinking exercise. Furthermore, whereas an intrinsic-reality/ontological-veridicality transcendental-enabling/sublimating/supererogatory-de-mentativity construal highlights the
ontological-contiguity of all knowledge as of their reference-of-thought-as-to-preconverging/postconverging–de-mentating/structuring/paradigming dynamic relationship, conceptual patterning seem to naively imply a discreet relationship of knowledge constructs with little insight of their intrinsic-reality/ontological-veridicality transcendental enabling causality ~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity interconnectedness as this is often not the primary driving focus, as it is naively assumed that the conceptual patterning is a correspondence of intrinsic-reality/ontological-veridicality as of the mere de-mentative/structural/paradigmatic conceptualisation in apriorising/axiomatising/referencing- {of-attendant–ontological-contiguity–educed–existentialising/contextualising/textualising- contiguity }—constitutedness in–preconverging-entailment rather than striving to expand the transcendental-enabling/sublimating/supererogatory–de-mentativity causality ~as-to-projective-totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity existential-reality potential, and this easily leads to virtuality or ontologically-flawed construal. The defect of conceptual patterning is easily overlook mainly as philosophy is of first order knowledge, a level at which knowledge differentiation doesn’t easily manifest itself. Such errors of conceptual patterning will hardly arise in second-level knowledge where transcendental-enabling/sublimating/supererogatory–de-mentativity implications arise in a specular way. For instance, while hereditary is an underlying conceptual patterning idea in biology, it will be unthinkable to try to lump together and undermine the originality of subsequent hereditary notions of genetics on the basis that these are of the same conceptual patterning as earlier notions like Mendelian heredity as the transcendental-enabling/sublimating/supererogatory–de-mentativity differentiations are spectacular. Finally, one practical intellectual flaw arising out of such naïve categorising/taxonomising conceptual patterning has to do with a certain vague intellectual
practice based on perceived intellectual pertinence in terms of the authorial ‘precedence of mentioned terms’ irrespective of association whether simple formalistic identifying of terms and notions with little consideration of the divergence of implied organic-knowledge as of their intrinsic-reality/ontological-veridicality

nature and differences as well as their divergence in 'meaningfulness-and-teleology' implications. This again leads to lumping, artificial categorising and undermines originality and organic-knowledge, turning this into simplistic mechanical associations with the more serious consequence being that the more decisive notion for human knowledge renewal as of 'maximalising-recomposuring-for-relative-ontological-completeness'—unenframed-conceptualisation driven by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality, becomes seriously undermined; as it refers to a transcendental-enabling/sublimating/supererogatory-de-mentativity <amplituding/formative-epistemicity>causality ~as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity renewal of a same <amplituding/formative-epistemicity>totalising–devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality but with such effort for renewal often laden with a tradition that is naively of apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -duced–existentialising/contextualising/textualising-contiguity }—constitutedness—in-preconverging-entailment undermining requisite creativity as of apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -duced–existentialising/contextualising/textualising-contiguity }—conflatedness—in-{preconverging-disentailment-by}-postconverging-entailment, as it ‘critically presupposes beyond-the-

This can be expanded upon as follows, the reason why relative-ontological-incompleteness–of–reference-of-thought/epistemic-abnormalcy/preconvergence/destructuring can only be construed with certainty-as-to-their-real-ontological-deficiency ‘rather as a constructed-deficiency of prospective relative-ontological-completeness–of–reference-of-thought/ontological-normalcy/conflatedness’
lies in the fact that the construal/conceptualisation of an epistemic-totalising~devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality is ‘supposedly as of a perfect or near-perfect or relatively-perfect ontological correspondence between such human construed/conceptualised meaningfulness-and-teleology and the inherent ontological-veracity/intrinsicness of the totalising~devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology of human construal/conceptualisation of it’. The only human construal/conceptualisation that can guarantee or relatively guarantee such a perfect or near-perfect or relatively-perfect ontological correspondence is as of prospective relative-ontological-completeness-of-reference-of-thought/ontological-normalcy/conflatedness.

Since there is no direct correspondence between relative-ontological-incompleteness-of-reference-of-thought/epistemic-abnormalcy/preconvergence/destructuring with the inherent intrinsicness of the totalising~devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology of human construal/conceptualisation of it, it is thus only from a constructed-deficiency of prospective relative-ontological-completeness-of-reference-of-thought/ontological-normalcy/conflatedness which has such a direct correspondence that the certainty-as-to-their-real-ontological-deficiency of relative-ontological-incompleteness-of-reference-of-thought/epistemic-abnormalcy/preconvergence/destructuring can be established. Thus in effect the natural sciences are actually for-human-studies/for-human-constructs whose specific ambit of human-subpotency is about 'human consciousness as for material and physical effecting devolving teleologies as meaningfulness' while the social domains of study are actually for-human-studies/for-human-constructs whose specific ambit of human-subpotency is about 'human consciousness inherent effecting devolving teleologies as meaningfulness'. It is the ‘notion of limited-mentation-capacity’ that as of its deficiency is falsely-composited by ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’ into ontologically-flawed constructs of neuterising, historiality/ontological-eventfulness/ontological-aesthetic-tracing-perspective—ontological-normalcy/postconvergence-reflected—‘epistemicity-relativism-determinism’ as of the notional-conflatedness of notional-deprocrypticism highlights that humankind in its projected-or-anticipated relationship with ‘existence as-the-absolute-a-priori’ is rather in preconverging—existential-extrication-as-of-existential-unthought, and not the full potency of
categorical-imperatives/axioms/registry-teleology\(^{99}\)-relative-ontological-completeness\(^{87}\)-of-reference-of-thought-in-ontological-good-faith/authenticity\(^{90}\), thus literally expanding human access to existence-potency\(^{94}\)~sublimating–nascence,-disclosed-from-prospective-epistemic-digression as to the existential possibilities that arise with successive institutional-cumulation/institutional-recomposure\({\text{as-to-}}\text{historiality/ontological-eventfulness}/\text{ontological-aesthetic-tracing-}<\text{perspective–ontological-normalcy/postconvergence-reflected–}'\text{epistemicity-relativism-determinism}'\rangle\) associated with the ontological-contiguity\(^{67}\)—of-the-human-institutionalisation-process\(^{68}\). This thus divulges the essence of existence as ‘the full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency’~sublimating–nascence,-disclosed-from-prospective-epistemic-digression. In other words existence is already given rather as of its potency, and the real problem of existence is humankind’s access to existential possibilities as of humankind’s limited-mentation-capacity. That is, human transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is what achieves existence as a ‘potent construct’, as the notion of existence-as-a-grounded-construct doesn’t-make-sense/is-unavailable for any specific human registry-worldview’s/dimension’s\(^{83}\) reference-of-thought as an

<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{34}\) construct, including our positivism–procrypticism registry-worldview/dimension, as this will falsely imply that our reference-of-thought

<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{34}\) is ‘developed enough’ as of Being-and-contemplation to have achieved the full potency of existence to then know what’s existence whereas in reality such

<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\(^{34}\) highlights human-subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence. Thus our construal of
prospective notional-deprocrypticism reference-of-thought is circularly-unintelligible-but-for-a-totalising-self-referencing-syncretising-meniality-or-hyperbole-of-meaningfulness-and-teleology to positivism–procrypticism reference-of-thought but for the former transcendental instigation as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality; such that all that is left of permanence determination about existence is its transcendental construct as of human limited-mentation-capacity-deepening. Interestingly, from our vantage positivism/rational-empiricism perspective, we’ll certainly construe the supposed intradimensional resolution of existential issues of prior relative-ontological-incompleteness of reference-of-thought as of ontological-performance—including-virtue-as-ontology arising in recurrent-utter-uninstitutionalisation as intradimensional meniality-or-hyperbole and rather resolvable as of base-institutionalisation superseding projection/anticipation, and same with base-institutionalisation–ununiversalisation as intradimensional meniality-or-hyperbole and rather resolvable as of universalisation superseding projection/anticipation, and same with universalisation–non-positivism/medievalism as intradimensional meniality-or-hyperbole and rather resolvable as of positivism/rational-empiricism superseding projection/anticipation, but we won’t or hardly construe of the same as of our totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag about our positivism–procrypticism as it being of intradimensional meniality-or-hyperbole and rather resolvable as of notional–deprocrypticism as preempting—disjointedness-as-of-reference-of-thought superseding projection/anticipation! This points to the flaw of a Heideggerian Dasein conceptualisation as it wrongly implies ‘humankind has any developed mental state as of Being-and-contemplation in any past-to-present epoch’ to ‘fully register as of that epoch’s metaphysics-of-presence—(implicated–nondescript/ignorable–void ’-as-to-

Existence is rather a ‘potency construct of transcence-and-sublimity/sublimation/supererogatory—de-mentativity as of human existential potential’ and not ‘a grounded construct for construing existence’ as wrongly implied/attempted with the Heideggerian Dasein notion, as all what ‘grounding’ does is to wrongly elevate the registry-worldview’s/dimension’s reference-of-thought in which such a construct is articulatedly grounded thus contradictorily undermining the possibility for transcence-and-sublimity/sublimation/supererogatory—de-mentativity by wrongly implying that the said registry-worldview’s/dimension’s reference-of-thought is of absolute ontological-performance-<including-virtue-as-ontology>, whereas it is deepening of human limited-mentation-capacity as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality in inducing prospective

Anecdotally, the prophesying social scientists of their times who insist on the recurrence of the practices of the creed are ‘not stupid’ as they know very well that reference-of-thought-categorical-imperatives/axioms/registry-teleology\textsuperscript{99} for meaningfulness-and-teleology\textsuperscript{99} are just that with respect to an animal of limited-mentation-capacity beyond-the-consciousness-awareness-teleology\textsuperscript{87}<-in-preconverging-existential-extrication-as-of-existential-unthought> who is bound to circularly elicit shortness-of-register-of—meaningfulness-and-teleology\textsuperscript{99} on such renewed reference-of-thought-categorical-imperatives/axioms/registry-teleology\textsuperscript{99} for meaningfulness-and-teleology\textsuperscript{99} and further denaturing them as of the prospective institutionalisation uninstitutionalised-threshold\textsuperscript{16}. In this regard talking about the physics example again, such a Derridean freeplay différance is akin to the ‘putting in question exercise’ that surrounds the cooperation/mutual-complementing-ideas-among-various-physicists leading up to the critical breakthroughs; which then establish such physics centered–epistemic-totalisation schemes as Newtonian physics and later on Theory-of-relativity and Quantum-mechanics, and today with respect to various theoretical efforts with the potential of leading to a physics Theory of Everything. Insightfully again, this idea of infinite-possibilities/circularity implied as of a Derridean infinite-decentered-freplay of a given meaningful-frame/axiomatic-construct/model such as mathematical models/axiomatic-constructs circularity is familiar to physicists and other scientists who understand that there is no infinity in the real-world/existence and infinity showing up in mathematical models/axiomatic-constructs point to the fact that there is a circular or undefined or undecidable problem arising from poor human limited-mentation-capacity conceptualisation implying the given mathematical model/axiomatic-construct is in circular-existential-disjointedness-as-of-prior-relative-ontological-incompleteness⁸⁸ as of the axiomatic-construct relative notional-discontiguity/epistemic-discontiguity<shallow-

But then as of ‘ontology of logic’ and ‘ontology of mathematics’ as their very own respective conceptualised meta-axiomatic—constructs as ontologies in terms of reflecting their philosophical depth of contemplation as of ‘coherence/contiguity—of superseding—one ness—of ontology—implied—as of inherent existence—coherence/contiguity, and so construed as the enabler—of insight—or intuition—or foresight—as—of embodied—consciousness’, both logic and mathematics are construed practically as formalisations which are mainly as such constructs of faithful/reproducible syntaxisation on the supposed basis of ‘smarter and simpler articulations’ for the sake of succinctness, clarity and fungibility; however, without the implication of any other inherent transcendental—enabling/sublimating/supererogatory—de—mentativity of such formalisations besides their succinctness, clarity and fungibility usefulness ‘thus—limitedly construed as their inherent meta—conceptualised ontological—veracity/axiomatic—construct of logic and mathematics transcendental—enabling/sublimating/supererogatory—de—mentativity’. But then it is naïve to construe of mathematics, as logicists have tended to do, as essentially an exercise of mathematical formalisation. The fact is that mathematics have always been developed implicitly or explicitly in association with or inspired from the context as to attendant—ontological—contiguity—educed—existentialising/contextualising/textualising—contiguity of other applied and transcendental—enabling/sublimating/supererogatory—de—mentativity activities as of their axiomatic—constructs development and mathematics very own existential—reality of developed axiomatic—constructs applicative orientation, including developing together with heavily dependent mathematics domains like physics, engineering, other applied sciences and statistical studies. Thus naively taking cue from the formalisation of mathematics as if it will enable the inherent transcendental-enabling/sublimating/supererogatory-de-mentativity of any discipline is bound to lead to disappointment, as the inherent axiomatic-constructs as theories, concepts, notions and ideas of the existential domain in question have to be critically developed as knowledge-reification–gesturing—<in-

In this regards, the ‘truly mathematical proof’ (over and above any formal mathematical proof) is rather about sublimating-validation/desublimating-invalidation of any such mathematics as it can be so-demonstrable in the occurrence of existential phenomena/manifestations; even as such a mathematical demonstration is rather so ‘existentially nominal’ that such phenomenal/manifest veracity of mathematics is often for all practical purposes mostly overlooked by mathematicians when involved in their formalisation exercise including ‘formal proofs’ as to the fact that the existential sublimating-validation/desublimating-invalidation of mathematics is so nominally obvious that hardly any experimenting is warranted for confirmation and this existential nominalism can easily lead to a reductionist confusion that mathematics (as to its epistemic-conception phenomenal/manifest–subpotency–(in-transitive-

just go about constructing ‘mathematical patterns’ as of formalisation without striving to get insight and inspiration from existential-reality as transcendental-enabling/sublimating/superragory-de-mentativity; and we can appreciate in this regards how the human mathematical disposition adjust from a classical reflex with regards to existential phenomena/manifestations that assume a non-classical character like statistical-constructs, quantum phenomena, black holes, etc. as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-superragony. The naivety of logicism lies exactly in this respect of construing formalisation as most of what is supposed to be achieved, and failing to grasp that when it comes to social reality its own transcendental-enabling/sublimating/superragory-de-mentativity has to be ‘creatively construed’, and this in many ways explains the frustrated conclusion that will often then arise from such a naïve formalisation perspective that the philosophical exercise is not necessarily transcendental-enabling/sublimating/superragory-de-mentativity, contrary to the precept of all other knowledge! Thus the conceptualisation of logic implied by any given registry-worldview/dimension reference-of-thought-as-of-'reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming—of-meaningfulness’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,—as-to—‘human<amplituding/formative—epistemicity>totalising—purview—of—construal’ points to the fact that the various registry-worldviews/dimensions operate their own conception of logic as of their prospective relative-ontological-completeness-reference-of-thought; as we can appreciate inherently as of metaphysics-of-absence{implicated-epistemic-veracity-of- nonpresencing—<perspective—ontological-normalcy/postconvergence>} that however deficient, that each registry-worldview/dimension does have its own sense of logic as of its self-conscious construed meaninglessness-and-teleology. axiomatic-construct will shift to the right as of relative ontological-contiguity. The notion of
axiomatic-construct in ontological-contiguity arises out of its existential completeness and
profundness, for instance the axiomatic-construct in ontological-contiguity as concept of a
bicycle arises by the completeness and profundness of the bicycle in its existential wholeness
of functionality and contents as its ontological-contiguity. Ontological-contiguity rather
highlights relative perspectives as of ontological-normalcy/postconvergence depths of
axiomatic-construct/reference-of-thought of construal; which for instance renders the idea of

notion of ‘continuity of ontology’ as is implied by ‘ontological-continuity as of relative
ontological-continuity and relative notional-discontiguity/epistemic-discontiguity’ will seem to imply correlatedness by the very nature of the term continuity. Ultimately, the overall analysis above points out that this is not an inherent ontological-as-of-the-full-potency-of-existence’s–sublimating–nascence problem but rather a problem of human-subpotency as of its limited-mentation-capacity that is resolvable by the deepening of human limited-mentation-capacity as of de-mentation-{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics} with respect to reference-of-thought; as contrary to the ‘Derridean différance decentering’ freeplay that is entrapped in circularity of meaningfulness-and-teleology on the wrong implied assumption of the same perpetual horizon as registry-worldview/dimension reference-of-thought so-implied as of our positivism mental-disposition, a ‘futural différance’ recognises that human limited-mentation-capacity transcendence-and-sublimity/sublimation/supererogatory–de-mentativity brings about prospective relative-ontological-completeness of reference-of-thought, and thus it centers-as-postconverging-or-dialectical-thinking—apriorising-psychologism the prospective institutionalisation’s reference-of-thought-as-of reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ as of its prospective relative-ontological-completeness of reference-of-thought to override the circularity as notional-discontiguity/epistemic-discontiguity.–shallower–supererogation –of-mentally-

institutional and formal ‘meaningfulness-and-teleology’ as of the need for profoundness and
rigour that doesn’t avail in ordinary thought for transcendance-and-sublimity/sublimation/supererogatory–de-mentativity. Likewise, on occasion in the face of
prior institutionalisation established and perceived vested interest such intemporal-as-
onontological ‘meaningfulness-and-teleology’ could be ontologically undermined as of
institutionalised-being-and-craft. Consider in this regard Establishment efforts undermining the
Diderot-led Encyclopédistes project. Furthermore, every registry-worldview/dimension relates
to its value construct as of its prior relative-ontological-incompleteness-of-reference-of-thought apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -educated- existentialising/contextualising/textualising-contiguity }—constitutedness-in-preconverging-entailment as more or less absolute, and doesn’t factor in that its prior relative-ontological-incompleteness-of-reference-of-thought is a de-mentative/structural/paradigmatic deficiency inducing the <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of its value construct. But then prospective institutionalisation necessarily implies a notion of prospective value construct as of its prospective relative-ontological-completeness-of-reference-of-thought apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -educated- existentialising/contextualising/textualising-contiguity }—conflicatedness-in-{preconverging-disentailment-by}-postconverging-entailment which will be unintelligible to the prior value construct, such that it is only a sense of intemporal consummation that drives transcendental dispositions as it is paradoxical to expect that what is in need for transcendence-and-sublimity/sublimation/supererogatory-de-mentativity acts as transcended, as transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is inevitably and so across all registry-worldviews/dimensions a state of paradoxical conflictedness as more profoundly involving a crossgenerational meaningfulness-and-teleology psychoanalytic-unshackling than a grounding conceptualisation! Furthermore, both the prior institutionalisation value construct and the prospective institutionalisation value construct are their respectively given centered–epistemic-totalisation-facticity of meaningfulness-and-teleology, with transcendence-and-sublimity/sublimation/supererogatory-de-mentativity conflictedly implying overriding the prior institutionalisation’s centered–epistemic-totalisation-facticity for the prospective institutionalisation’s centered–epistemic-totalisation-facticity. But then ontological-contiguity—of-the-human-institutionalisation-process is an empirical fact, and thus the
resolution of this transcendence-and-sublimity/sublimation/supererogatory–de-mentativity paradox is rather reflected by the dynamics of human positive-opportunism—of-social-functioning-and-accordance as of human \( \langle \text{amplituding/formative–epistemicity}\rangle \) \( \text{totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag} \) as social \( \langle \text{universal-transparency}\rangle \) \( \langle \text{transparency-of-totalising-entailing,-as-to-entailing–}\langle \text{amplituding/formative–epistemicity}\rangle \text{totalising–in-relative-ontological-completeness} \rangle \) avails with respect to social-stake-contention-or-confliction, wherein while in the immediate-and-short-term human ‘self-referencing’ will seem to imply that it is almost impossible to transcend from a given social conventioning centered–epistemic-totalisation facticity but crossgenerationally human ‘re-conventioning whether driven by a sense of pure-ontology as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality or otherwise with say cultural-diffusion’, as ‘syncretising-effecting’ on meaningfulness-and-teleology with respect to social-stake-contention-or-confliction induces human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity. Consider in this regard historical transcendence-and-sublimity/sublimation/supererogatory–de-mentativity elicited by cultural diffusion whether with respect to trading or invasion or voyages of exploration. The fact is a social-setup is de-mentatively/structurally/paradigmatically a framework where individuals are naturally involved in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities, and thus individuals and social groups are not in an absolutely given/set self-referencing centered–epistemic-totalisation-facticity of meaningfulness-and-teleology within their social-setup and are predisposed on critical occasions as of syncretising-effecting to ‘reinvent’, circumvent or adapt as to what they perceive as optimum existential possibilities, such that a social-setup is already involved internally however restricted in its very own
reinvention/circumventing/adaptation as of its very own internal ‘self-referencing and syncretising-effecting construed as \text{<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag} of ‘meaningfulness-and-teleology’ with regards to perceived social-stake-contention-or-confliction; and it is this element that enables all human societies to have a minimal opening/overture/receptivity to each other, including at the very extreme between an industrial age society and a hunter-gatherer society. Without such a de-mentative/structural/paradigmatic ‘self-referencing and syncretising-effecting construed as \text{<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag} human nature’, both internal social transformation however lethargic and cultural diffusion will be basically impossible, and \text{<amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag} induced transformation arises because human perceived social-stake-contention-or-confliction drifts within-and-across social-setups whether with regards to basic trading, curiosity, social competition and generally as of a predisposition to achieve optimum existential possibilities. In this regard, the rapid transformation implications of cultural diffusion arise because it makes relatively immediately available to individuals and social groups a comprehensive set of options however limited the nature and speed of their adoption. This syncretising-effecting mechanism ultimately explains why crossgenerational transcendence-and-sublimity/sublimation/supererogatory–de-mentativity occurs notwithstanding a seemingly self-referencing centered–epistemic-totalisation-facticity of ‘meaningfulness-and-teleology’ within a given social-setup in the immediate-and-short-term. Transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as of prospective relative-ontological-completeness-of-reference-of-thought occurs because de-mentatively/structurally/paradigmatically it is social-dispositions and mental-dispositions of intemporal-as-ontological nature as of longness-of-register-of–meaningfulness-and-

However, such a conception of supposedly coherent ontological-commitment\textsuperscript{<implied—self-assuredness-of-

extrication—as-of-existential-unthought\textsuperscript{17} with regards to such transcendental implications! Despite the fact that all social-setups tend to be surreptitiously permeated with individuals temporal/shortness-of-register-of—meaningfulness-and-teleology\textsuperscript{9} social-dispositions and mental-dispositions of suboptimal ontological implications for social-functioning-and-accordance—as-of—social-stake-contention-or-confliction, every social-setup as a conventional-
construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic consciousness-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s reference-of-thought–categorical-imperatives/axioms/registry-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations. It may thus seem from within just one human generation perspective that the underlying human metaphoricity for transcendence-and-sublimity/sublimation/supererogatory–de-mentativity is rather marginal especially when not associated with any external cultural diffusion. However, human metaphoricity as of cultural transformation had tended historically, in the main, to ebb in peaks and lows, and so as of the relative universal-transparency–(transparency-of-totalling-entailing,–as-to-entailing–<amplituding/formative–epistemicity>totalling–in-relative-ontological-completeness) about such metaphoricity instigative reproducibility—mathesis/motif/thrownness-disposition,—as–reproducibility-of-aestheticisation direct, indirect and/or devolving implications. The fact that individuals in a social-setup are already involved internally however restricted in its very own reinvention/circumventing/adaptation in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities and is thus of a minimal opening/overture/receptivity to internal and external metaphoricity, also critically speaks to the fact that any social-setup is only able to hold together because of supposedly coherent ontological-commitment–<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality> that is subject to existence-potency~sublimating–nascence,–disclosed-from-prospective-epistemic-digression validatory <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective-nonpresencing.–for-explicating-ontological-contiguity. As of its circularity, the lack or

<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming ~as-being-as-of-existential-reality> threshold of a social-setup meaningfulness-and-teleology allows for the possibility for prospective metaphoricity to reconstrue-and-redefine the social-setup meaningfulness-and-teleology. Such prospective metaphoricity possibility cannot be preempted because even the social-setup conventioning in its functional operation of meaningfulness-and-teleology needs this supposedly coherent ontological-commitment

<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming ~as-being-as-of-existential-reality>. We can consider in this regard that an animistic non-positivistic or medieval non-positivistic social-setup will certainly imply a supposedly coherent ontological-commitment

<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming ~as-being-as-of-existential-reality> respectively as of superstitious spiritualism meaningfulness-and-teleology or scholasticism pedantic dogmatism meaningfulness-and-teleology, as of the given social-setup ‘self-assuredness-of-ontological-good-faith/authenticity ~postconverging—

It is exactly this ‘self-assuredness-of-ontological-good-faith/authenticity –postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality with respect to its social-stake-contention-or-confliction’ that equally makes available the possibility for prospective metaphoricity to demonstrably undermine the implied supposedly coherent ontological-commitment –implied—self-assuredness-of-ontological-good-faith/authenticity –postconverging–de-mentating/structuring/paradigming –as-being-as-of-existential-reality> of such prior social-setups registry-worldview/dimension of meaningfulness-and-teleology, and so as of the prospectively induced causality –as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity superseding meaningfulness-and-teleology as from existence-potency –sublimating–nascence, disclosed-from-prospective-epistemic-digression epistemic-or-notional–projective-perspective of relative-ontological-completeness–of–reference-of-thought by way of causality –as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity such as with prospective positivism/rational-empiricism meaningfulness-and-teleology. However, given the inherence of social-stake-contention-or-confliction, inevitably prospective metaphoricity undermines vested interests as of the direct, indirect and/or devolving implications of prospective metaphoricity and by that token elicit sophistic/pedantic inclinations to such prospective metaphoricity. Further any such prospective metaphoricity ultimately takes hold rather as of within the social deferential-formalisation-transference framework wherein it is driven by a sense of positive-opportunism—of-social-

In this regard, as of the temporal ‘mental and existential investment’ of recurrent-utter-uninstitutionalisation prospective base-institutionalisation antinihilism \(^3\) ‘meaningfulness-and-teleology’\(^9\) is basically nothing and worthless, likewise as of the temporal ‘mental and existential investment’ of base-institutionalisation–ununiversalisation prospective \(^{103}\) universalisation antinihilism \(^5\) ‘meaningfulness-and-teleology’\(^9\) is basically nothing and worthless, same with \(^{103}\) universalisation–non-positivism/medievalism and prospective positivism, and equally so for positivism–procrypticism and futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\(^{11}\) ‘meaningfulness-and-teleology’\(^9\) as of prospective deprocrypticism. Explaining in many ways why the elicitation of value as of prospective secondnatured institutionalisation rather occurs as of the superseding of <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag \(^1\) untransvaluated–temporal-intemporality\(^2\). Ultimately, prospective metaphoricity\(^5\) in a reflection of the individual-as-receptable-of-temporal-to-intemporal-individuation realistically implies that it is rather fundamentally a question of grasping the mechanism that tips the balance towards human intemporality\(^5\)/longness and subsequent prospective institutionalisation which is ontologically sufficient for prospective ontological-effectiveness, rather than a naïve engagement as if the human is all-essentially intemporal-disposition as to absolute ontological-commitment\(^6\) \(<\text{implied—self-assuredness-of-ontological-good-faith/authenticity } \sim\text{ postconverging-de-mentating/structuring/paradigming } –\text{as-being-as-of-existential-reality}>\). More critically, such a conception of prospective metaphoricity\(^5\) cognisant of the decisiveness of deferential-formalisation-transference for institutionalisation and thus subsequent social percolation-channelling-<in-deferential-formalisation-transference>, come to grasp that sophistic/pedantic
predispositions are the more salient entrenched interests beyond-the-consciousness-awareness-teleology\textsuperscript{29} - in-preconverging-existential-extrication-as-of-existing-unthought\textsuperscript{31} with respect to prospective metaphoricity\textsuperscript{37} as of the implications of such undermining of social deferential-formalisation-transference. In this regard, the sophistic/pedantic barriers to futural Being-development/ontological-framework-expansion-as-to-depth-of-ontologising-development-as-infrastructure-of-meaningfulness-and-teleology\textsuperscript{69} as of prospective notional-deprocrypticism metaphoricity\textsuperscript{57} implications are necessarily spurious and associated with our positivism-procrypticism institutional-being-and-craft as of the direct, indirect and/or devolving prospective metaphoricity\textsuperscript{37} implications. We can appreciate in this regard that for the medieval-scholasticism-pedants—ideal-type-or-individuation, it doesn’t matter that budding-positivism can be demonstrated as more ontologically pertinent as of <amplitudding/formative-epistemicity>causality-as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity\textsuperscript{67} so long as it is socially and institutionally credible to uphold non-positivism meaningfulness-and-teleology\textsuperscript{99} in effect by undermining its deferential-formalisation-transference. It is with regards to such sophistic/pedantic disinclination to prospective metaphoricity\textsuperscript{37} that the latter elicits contortioning gesturing, wherein for instance Socrates with respect to the sophists—ideal-type-or-individuation (as we can appreciate that however say a Protagoras engagement with Socrates may project coherence as of his contextual appreciation of Socrates predisposition for coherence, this doesn’t exclude the possibility of a ‘floating sophistic’ inclination that simply adjusts to its interlocutor thus undermining in the bigger picture the notion of knowledge as of universal coherence idealisation, or still maybe Protagoras is just at the lower end of the sophists—ideal-type-or-individuation) and budding-positivists with respect to medieval-scholasticism-pedants—ideal-type-or-individuation (as we can appreciate that the recognition and then censure and then banning of Copernicus’s heliocentric world work or engagement

But then at such a registry-worldview’s/dimension’s institutionalisation’s uninstitutionalised-threshold, there is a relative variance of ontological-completeness-of-reference-of-thought as of the prospective relative-ontological-completeness-reference-of-thought in intemporality/longness entailing the prospective institutionalisation and the prior relative-ontological-incompleteness-reference-of-thought in temporality/shortness entailing the uninstitutionalised-threshold; thus implying a relative variance in such intemporal and temporal teleological projection respectively as of elevated-devolving-as-of-prospective-institutionalisation and teleologically-degraded-devolving-as-of-uninstitutionalised-threshold in determining ontological-veracity. insight about such a deneuterising\textsuperscript{17} storied-construct/ontologically-valid-narration from the fact that a non-positivism/medievalism or animistic social-setup is ‘not committed in a \textit{amplituding/formative–epistemicity}>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{17} to positivistic/rational-empiricism meaningfulness-and-teleology\textsuperscript{99} with regards to occurrences and incidents best explained and dealt with by such positivistic meaningfulness as of the latter’s prospective relative-ontological-completeness -of- reference-of-thought. As such non-positivism/medievalism or animistic social-setup ‘will not be self-effacing as of its ontologically-flawed \textit{amplituding/formative–epistemicity}>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{17}-temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about its uninstitutionalised-threshold\textsuperscript{102} of non-positivism and the prospective institutionalisation of positivism’. This equally explains how our positivism–procrypticism mental-disposition is construed in deneuterising\textsuperscript{17} from futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99} as of prospective notional–deprocrypticism perspective ‘as not self-effacing as of its ontologically-flawed \textit{amplituding/formative–epistemicity}>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag\textsuperscript{17}-temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about the uninstitutionalised-threshold\textsuperscript{102} of its ‘procrypticism–or–disjointedness-as-of–reference-of-thought and the prospective institutionalisation of deprocrypticism’. This is actually the ontologically-veridical phenomenological transcendental framework for construing/conceptualising human temporal character and social formation mental-dispositions as of uninstitutionalised-threshold\textsuperscript{102} and prospective-institutionalisation based on the dynamics of limited-mentation-capacity, unlike a naïve neuterising mental-reflex that by its \textit{amplituding/formative–epistemicity}>totalising-self-referencing-

Central and critical to achieving such a deneuterising analysis in grasping the full and complete possibilities of ontologically-veridical construal of human meaningfulness-and-teleology given human temporal-to-intemporal mental-dispositions as of prospective institutionalisation and uninstitutionalised-threshold is the notion of beyond-the-consciousness-awareness-teleology-in-preconverging-existential-extrication-as-of-existential-unthought. It is exactly what renders a veridical ontological-escalation or aetiologisation of the human condition possible as the historiality/ontological-eventfulness/ontological-aesthetic-tracing<-perspective-ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism'> of apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity}-conflatedness-in-{preconverging-disentailment-by}-postconverging-entailment as of notional-deprocrypticism. It is most critical because at any registry-worldview/dimension, human self-consciousness is a <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-reflex as of being-only-in-institutionalisation-and-hence-only-of-a-meaningfulness-and-teleology-that-is-intemporal while defectively ignoring-and-undermining the veridicality of uninstitutionalised-threshold-and-its-assorted-and-conjugated-temporal-meaningfulness-and-teleology such that transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is always perceived as unnatural when <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, in the sense that ‘it-is-others,-as-of-the-

This operantly defines procrypticism—or-disjointedness-as-of-reference-of-thought as beyond just the construal of new supposedly intemporal reference-of-thought-categorical-imperatives/axioms/registry-teleology of the prospective institutionalisation to preempt the temporally denaturing reference-of-thought-categorical-imperatives/axioms/registry-teleology of the prior institutionalisation, but rather the deneuterising construal of the very ‘limited-mentation-capacity as of human-subpotency-aporia/undecidability/dilemma/ought-indeterminacy/deficiency limitation/constraint—imbued-'notional-firstnatures-temporal-to-intemporal-dispositions-so-construed-as-from-perspective-ontological-normalcy/postconvergence'-existentialism-form-factor as the beyond-the-consciousness-awareness-teleology-in-preconverging-existential-extrication-as-of-existential-unthought‘ constraining dynamism’ behind the denaturing of reference-of-thought-categorical-imperatives/axioms/registry-teleology in the very first place; conceptualised henceforth as the very reference-of-thought-categorical-imperatives/axioms/registry-teleology for intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as of the notional-deprocrypticism registry-worldview/dimension institutionalisation as of its implied notional-deprocrypticism. Overall, the fact is that given that what is most relevant to the individual is the practicality as of their ‘rationalising threads of part-conviction-as-to-profound-supererogation—or-part-nonconviction/madeupness/bottomlining-as-to-shallow-supererogation perception-and-relation to meaningfulness-and-teleology over just abstract universal propositions, when it comes to social-stake-contention-or-confliction social-functioning-and-accordance constraints such temporal part-conviction-as-to-profound-supererogation—or-part—
nonconviction/madeupness/bottomlining-as-to-shallow-supererogation mental-dispositions tend to be ultimately translated decisively onto issues of public repercussions like corruption, mismanagement, nepotism, etc. It is very much naïve to imagine that as of such uninstitutionalised-threshold as of Being/ontological-framework-expansion underdevelopment, individuals in positions of social-stake-contention-or-confliction with respect to upholding/failing probity will simply adhere, at the exclusion of engrained-habits-and-mental-dispositions, to mere propositions of probity rather than in the face of weak-institutional-constraints-and-penalties to perceive such universal propositions as mere linguistic appendages of relative practical insignificance. The notion of beyond-the-consciousness-awareness-teleology -<in-preconverging-existential-extrication-as-of-existential-unthought> is the effective and credible deneuterising enabling articulation that grasps such an ontologically flawed mental-reflex that recurrently permeates consciously and unconsciously human phenomenological mentation, as it ‘credibly’ grasps-and-accounts-for, without resorting to any ‘neuterising, the full and complete possibilities of human mental-dispositions as of the exclusive dynamics of human limited-mentation-capacity across all registry-worldviews/dimensions involving the conjugation of the intemporal/longness-of-register-of–meaningfulness-and-teleology individuation and temporal/shortness-of-register-of–meaningfulness-and-teleology individuations of postlogism slantedness/ ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of reference-of-thought-devolving ontological-performance -<including-virtue-as-ontology>. Ultimately, the notion of beyond-the-consciousness-awareness-teleology -<in-preconverging-existential-extrication-as-of-existential-unthought> given its psychoanalytic-unshackling as of prospective deprocrysticism transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, points to a self-consciousness that should
rather come to terms with the reality of human limited-mentation-capacity dynamics as of temporal-to-intemporal mental-dispositions resolved beyond just the notion of "reference-of-thought—categorical-imperatives/axioms/registry-teleology" but rather their protraction as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality

The issue of Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—'meaningfulness-and-teleology' or Being underdevelopment is associated with that of the construal of knowledge as organic-knowledge or mechanical-knowledge respectively; with the latter construed as of the 'mere effecting possibilities of knowledge’ without a coherence/contiguity with the ‘knowledge inventing’ mental-disposition as of ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality behind the given knowledge, as implied with organic-knowledge. It is such a mechanical-knowledge as of 'temporal/shortness-of-register-of—'meaningfulness-and-teleology' mental-dispositions towards the mere effecting possibilities of the knowledge’ that induces the forgetting of Being construed as ontology’s-directedness-as-Being, by undermining the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality upholding of intemporal-preservation-entropy-or-contiguity—or—ontological-preservation that is behind organic-knowledge. Human <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal mental-dispositions as of
beyond-the-consciousness-awareness-teleology\textsuperscript{9} - in preconverging existential-extrication-as-of-existential-unthought\textsuperscript{1} are all too ready to construe of the comprehensiveness of knowledge as mere effecting possibilities of knowledge at the given institutionalisation’s uninstitutionalised-threshold\textsuperscript{0} in temporal/shortness-of-register-of-‘meaningfulness-and-teleology\textsuperscript{9} terms-as-of-axiomatic-construal as of the plainly implied opportunism with little consideration of the projective intemporal value dispositions behind the ‘knowledge inventing’ and its organic preservation. Thus the ontological-contiguity\textsuperscript{7}—of-the-human-institutionalisation-process\textsuperscript{68} arises exactly to ensure deferential-formalisation-transference secondnaturing of knowledge as of organic-knowledge comprehensiveness. The following is enlightening in this regard. (For what it takes to get a medieval as non-positivistic mindset/reference-of-thought into a positivistic mindset/reference-of-thought, that is, suppose for instance where in a medieval social-setup an accusation of witchcraft is demonstrated by an outsider from a positivistic social-setup to be incorrect and unsound to the approval of all in that social-setup, that outsider understanding fundamentally that the medieval setup by its relative-ontological-incompleteness\textsuperscript{88} -induced,-‘threshold-of-nonconviction/madeupness/bottomlining-in-shallow-supererogation\textsuperscript{9} -as-to-‘attendant-intradimensional’-prospectively-disontologising-preconverging/dementing -apriorising-psychologism\textsuperscript{8} is in a state of <amplituding/formative-epistemicity> totalising-self-referencing-syncretising/circularity/interiorising/akrasiac-drag\textsuperscript{34} of a medieval worldview will grasp that that unique demonstration of medieval-postlogism\textsuperscript{7} /perversion-of-/reference-of-thought-as-preconvergingly-apriorising/axiomatising/referencing-in-
nonconviction/madeupness/bottomlining-as-to-shallow-supererogation\textsuperscript{9} (as accusation of witchcraft) is not to be construed naively as an adequate basis for a new ‘logical-processing-or-
logical-implicitation—supposedly-apriorising-in-conviction-as-to-profound-supererogation as ‘prelogic supplanting–conviction-as-to-profound-supererogation’ —of-’attendant-
the pertinence of any other supposed knowledge value reference, like a mystical knowledge construal, of the very same physics $\text{amplituding/formative-epistemicity} \text{totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality}$, such that their inherent contrast disambiguates what is of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology from what is of Being underdevelopment. But then this ‘immediate, cause-and-effect and non-blurry practical and scientific knowledge’ is just one aspect of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as its mere effecting possibilities of knowledge however effective do not exist in a vacuum but rather within the ‘detached, contemplative and blurry human social-construct of knowledge’ which is the complementary background for Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology; as we can appreciate that despite the positivistic inclinations of the Copernicus, the Galileos and the Newtons, the scientific advances that ultimately took hold arose because those budding scientists had a sense that the very ‘detached, contemplative and blurry human social-construct of knowledge’ background had to be superseded as of its scholasticism and mysticism underlying knowledge background for a positivism/rational-empiricism knowledge background to take hold as transcendental-enabling/sublimating/supererogatory–de-mentativity not only to science but transcendental-enabling/sublimating/supererogatory–de-mentativity as well to the open society equally required for the sound functioning of science. It is this dynamic relationship as of ‘immediate, cause-and-effect and non-blurry practical and scientific knowledge’ and ‘detached, contemplative and blurry human social-construct of knowledge’ that is behind Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology with respect to the
prospective registry-worldview/dimension as resolving the vices-and-impediments\textsuperscript{105} of the prior registry-worldview/dimension. But then no matter the succession of institutionalisations as successive Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99}, there is an ever present issue of Being underdevelopment as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-‘notional-firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor wherein institutionalising reference-of-thought–categorical-imperatives/axioms/registry-teleology\textsuperscript{83} are always subject at uninstitutionalised-threshold\textsuperscript{102} to their denaturing\textsuperscript{8} as of their wooden-language–{imbued—temporal–mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the-reference-of-thought–categorical-imperatives/axioms/registry-teleology}, as of temporal failing to uphold intemporal-preservation-entropy-or-contiguity–or–ontological-preservation. Hence Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99} given human limited-mentation-capacity is rather upheld by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality as of intemporal-preservation-entropy-or-contiguity–or–ontological-preservation wherein the abstract intemporal/longness-of-register-of–meaningfulness-and-teleology\textsuperscript{99} behind the prior registry-worldview institutionalisation should equally be reflected as of prospective registry-worldview institutionalisation, and involving the requisite deferential-formalisation-transference secondnaturning of knowledge as organic-knowledge. We can appreciate the latter point in the sense that with the development of various positivistic scientific and knowledge fields, the
knowledge agents weren’t naïve to imply that the ‘normal social temporal-to-intemporal mental-dispositions as of wooden-language- ⟨imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology -as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩⟩ are appropriate framework for engaging their subject-matter, as they rather promoted formal knowledge/scientific societies and adopted their specific jargons to ensure that the intemporal value reference mental-dispositions behind their respective ‘knowledge inventing’ was the institutional mental-disposition for engaging with the knowledge formally or as of seconndnatured education practically available to everyone interested, and so while alienating and considering general social wooden-language- ⟨imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology -as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩⟩ as improper and unqualified. This was to avoid a circularity of undermining of the intemporal-projection of their specific knowledge/science, as they contribute in overall Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology⁹⁹. The point here is that at uninstitutionalised-threshold¹⁰² the idea of ‘equal opinionatedness’ doesn’t apply by the mere fact that knowledge of intrinsic-reality itself doesn’t arise by wooden-language- ⟨imbued—averaging-of-thought-<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology -as-of–‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications⟩⟩ but rather ontological-pertinence, and the point in reflecting holographically-<conjugatively-and-
transfusively> the ontological-contiguity—of-the-human-institutionalisation-process as knowledge-led is to harness ontological-pertinence and not wooden-language—{imbued—averaging-of-thought—<as-to-leveling/resentment/closed-construct-of—meaningfulness-and-teleology— as-of—’nondescript/ignorable—void ’—with-regards-to—prospective-apriorising-implications}, thus explaining deferential-formalisation-transference as of institutional percolation-chanelling. This point is central and critical to the very notion of society-as-social-construct, as society is caught between the notion of sovereignty as allowing-basic-level-of-universal-individual-and-collective-self-affirmation-striving-for-social-equality and the notion of knowledge as-of-selective-construal-of-social-value-and-institutional-hierarchisation-as-of—<amplituding/formative—epistemicity>—causality—as-to—projective-totalitative—implications-of-prospective—nonpresencing.—for-explicating—ontological-contiguity—overriding-social-equality—for-the-sake-of-individual-and-social-emancipation—as-of—efficient-ontological-performance—<including-virtue—as-ontology>-implications. The implication of this dilemma is the reality that society is always subpar to a knowledge social determination as well as subpar to a sovereignty social determination. This dilemma is unavoidable by the very implications of a society: every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s reference-of-thought—categorical-imperatives/axioms/registry-teleology—,—for—aposteriorising/logicising/deriving/intelligising/measuring—meaningfulness-and-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations; such that the notions of knowledge and sovereignty can only be ‘socially effective’ within this articulated framework as enabled by ‘social universal-transparency’— {transparency-of-totalising-entailing,—as-to-entailing—<amplituding/formative—
epistemicity>totalising~in-relative-ontological-completeness⟩. This articulation can be elucidated more explicitly in cases of cultural diffusion between societies of differing institutionalisation level as such cultural diffusion isn’t by a simplistic institutionalisation knowledge-level transference, but involves a mutual sense of sovereign selectivity and recognition among the societies, however the drive for cultural diffusion; thus allowing for ‘acculturating-indigenising-pidginising transitioning settings and their social constructions as of

However, all along this ontological-contiguity of-the-human-institutionalisation-process a suboptimal relation between knowledge and sovereignty undermines Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology as of various pertinent social
manifestations: –wherein sovereignty is affirm over knowledge as ‘supposedly being knowledge’ by a culture of mere social-aggregation-enabling of temporal-to-intemporal hotchpotch opinionatedness, notwithstanding the underlying transcendental-enabling/sublimating/supererogatory-de-mentativity in formal institutional percolation-channelling-<in-deferential-formalisation-transference>, with the result that beyond the underlying implied institutionalisation-level such a social-aggregation-enabling hotchpotching opinionatedness culture tends to critically and decisively inform individual and collective thought and action in a manner that is suboptimal to intemporality-as-ontology as of the manifestation of such a temporal-to-intemporal hotchpotching culture in the extended-informality that permeates even formal institutions; –wherein by exploiting of temporal mental-dispositions as of individuals and the collective-social sovereignty, knowledge is undermined by wrongly implying the pertinence of social-aggregation-enabling construed as ‘exploitation of sovereignty’/mobbishness as of ‘intellectual institutional-being-and-craft self-serving’ in lieu of upholding institutionalisation, including the tendency to degrade knowledge conceptualisations into popular frameworks of knowledge appraisal thus subverting institutional deferential-formalisation-transference rigorous knowledge framework as of their transcendental-enabling/sublimating/supererogatory-de-mentativity as to existence-potency/sublimating–nascence,-disclosed-from-prospective-epistemic-digression; –the ontologically-flawed articulation of knowledge by an intellectual disposition akin to <amplituding/formative> wooden-language-{imbued—temporal—mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing – narratives—of-the- reference-of-thought—categorical-imperatives/axioms/registry-teleology },-for-aposteriorising/logicising/deriving/intelligising/measuring—“meaningfulness-and-teleology” undermining knowledge as of its organic true nature implied by ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and.
apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality behind prior
‘knowledge inventing’ and prospective ‘knowledge inventing’, and so as of intellectual
institutional-being-and-craft; –ultimately the very paradox of human <amplituding/formative–
epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag means that the human sovereign psyche is one that is geared to construe of ‘presence as all-
encompassing meaningfulness-and-teleology value construct’ such that the transcendental
implications of knowledge by mental-reflex are construed as of incrementalism-in-relative-
ontological-incompleteness—enframed-conceptualisation to presence, rather than as of
<amplituding/formative–epistemicity>totalising–renewing-realisation/re-perception/re-thought

<shallow-supererogation–of-mentally-aestheticised–preconverging/dementing–qualia-
schema>. However despite this knowledge and sovereignty dilemma associated with Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of–meaningfulness-and-teleology, the insight about human
social-functioning-and-accordance can crossgenerationally be induced for Being-
development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-
infrastructure-of–meaningfulness-and-teleology despite the inherent circular distractiveness
of temporality, and ultimately so as enabled by ‘social universal-transparency’
(transparency-of-totalising-entailing,-as-to-entailing–<amplituding/formative–
epistemicity>totalising–in-relative-ontological-completeness’}. The above analysis point out
that transcendental knowledge in particular involves more than just knowledge as a grounded construct but as well an understanding of how such knowledge is instigated in society as part and parcel of the knowledge construed as organic-knowledge; given that the social-construct-as-society is not necessarily of immediate receptivity and is of a suboptimal disposition to such transcendental-enabling/sublimating/superrrogatory—de-mentativity implications that are not priorly as of grounded constructs of knowledge. This will explain why the mere articulation of positivism/rational-empiricism meaningfulness-and-teleology constructs of knowledge wasn’t enough in undermining medieval mental-dispositions, and the persistent initiatives of the Copernicuses, Galileos, Rousseaux, Diderots, etc., were not vague actions but informed by an intuition about the nature of human society and how it develops given the inherently untransformable human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued—'notional—firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective—ontological-normalcy/postconvergence>—existentialism-form-factor as of human limited-mentation-capacity. Thus in reflecting holographically—<conjugatively—and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process, crucially the issue of ontological-veracity is only half the problem of knowledge, with the other half being the grasp of the underlying sovereignty and knowledge dynamics as of eliciting ‘social universal-transparency (transparency-of-totalising-entailing—as-to-entailing—amplituding/formative—epistemicity>totalising~in-relative-ontological-completeness’). As it is the latter that induces that social positive-opportunism—of-social-functioning-and-accordance for deferential-formalisation-transference and institutional percolation-channelling—<in-deferential-formalisation-transference>, as of social deferential attribution of power for the beneficial effect of knowledge as empowering various institutional domains. Further, as implying the superseding of entrenched grounded knowledge as of its psychoanalytic-unshackling
implications and in destabilising the underlying existential reference-of-thought, transcendental knowledge is of a circular but consistent exercise of amplituding/formative-epistemicity totalising-renewing-realisation/re-perception/re-thought, and so due to the ‘existential and emotive commitments’ it is involved in undoing with regards to the implied prior notional-discontiguity/epistemic-discontiguity reference-of-thought and introducing the prospective ontological-contiguity reference-of-thought as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘human amplituding/formative–epistemicity totalising–purview-of-construal’. Consider in this regard, that the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs as of prospective ontological-contiguity is more than just a reification gesturing of its very own axiomatic-construct affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring as-to-apriorising-psychologism but extends to encompass a de-assertion/preconverging-or-dementing apriorising-psychologism/unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring as-to-preconverging-or-dementing apriorising-psychologism of ‘traditional classical mechanics axiomatic-construct’, at the threshold where it supersedes ‘traditional classical mechanics axiomatic-construct’, as being of notional-discontiguity/epistemic-discontiguity reference-of-thought and analysed as of ‘traditional classical mechanics axiomatic-construct’, and so with regards to ‘the very same physics amplituding/formative–epistemicity totalising–devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. The ontological veridicality here is that such ‘double-gesture reification as the prospective axiomatic affirmation/projection/assertion/dueness-validating-logicising/suitable-

While the emotional involvement and sense of ‘existential ego undermining’ involved in such a transcending reification gesturing of axiomatic-constructs as of the very same <amplituding/formative-epistemicity> totalising—devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality is relatively trite as occurring within the same registry-worldview/dimension reference-of-thought as of the positivistic/rational-empiricism meaningfulness-and-teleology mindset as well as its distance rather with respect to physical reality, such a transcending reification gesturing as of the grandest axiomatic-constructs having to do with consciousness with regards to the ‘very reference-of-thought itself’ wherein the prospective ontological-contiguity reference-of-thought as deprocrypticism—or—preempting—disjointedness-as-of—reference-of-thought implies a transcending reification
gesturing that not only affirms notional–deprocrypticism prospective registry-worldview/dimension but in that affirmation/projection/assertion/dueness-validating-logicising/suitable-measuring-instrument-validating-measuring-as-to-postconverging-or-dialectical-thinking–apriorising-psychologism\> as of its ontological-completeness-of-reference-of-thought de-asserts/dements our positivism–procrypticism registry-worldview/dimension, this will elicit an existential and emotional involvement that will rather convert into a circular neuterisation\> of notional–deprocrypticism by a mental-complex avoiding such emotional discomfort and sense of existential ego undermining as is the case with all destructuring-threshold\{-uninstitutionalised-threshold\}/presublimating–desublimating-decisionality\>–of-ontological-performance\>–including-virtue-as-ontology\> with respect to their prospective institutionalisations. Such a temporal/shortness-of-register-of—meaningfulness-and-teleology ontologically-flawed predisposition in circularly striving to reassert the ‘prior-or-old-as-now-uninstitutionalised ordinary-nontranscendental-reasoning’ over the ‘transcendental-reasoning-of-event’-as-prospective-ontology-origination’ is fundamentally due to the de-mentative/structural/paradigmatic lifetime ‘mental and existential investment’ in the former, such that by and large it is mostly a crossgenerational transcendence-and-sublimity/sublimation/supererogatory de-mentativity that fully brings about the adaptation
of the induced ‘transcendental-reasoning-of-event’ as-prospective-ontology-origination’ as the ‘new-as-of-the-prospective-institutionalisation ordinary-nontranscendental-reasoning’. Such a temporal/shortness-of-register-of—meaningfulness-and-teleology—ontologically-flawed circular predisposition arises due to human temporal-dispositions as of Being underdevelopment that tends to lead to the beyond-the-consciousness-awareness-teleology—<in-preconverging-existential-extrication-as-of-existential-unthought>—denaturing of knowledge as mechanical-knowledge and undermining organic-knowledge; wherein knowledge is related to as of preconverging-existential-extrication-as-of-existential-unthought, that is, knowledge related to as of ‘the mere positive-opportunism—of-social-functioning-and-accordance’ it engenders at best’ with little or no cognisance that there is an attitude/mental-disposition/care–and–episteme as of intemporality/longness behind ‘knowledge invention’ that must be preserved and perpetuated as ‘the very core of knowledge’ and so to undermine knowledge denaturing, so-construed as organic-knowledge. Organic-knowledge requires the articulation of meaningfulness-and-teleology rather in postconverging-nonextricatory-existential-preempting-of-existential-unthought terms—as-of-axiomatic-construct as the profound-and-complete articulation of knowledge, and as the very attitude/mental-disposition/care–and–episteme behind knowledge that induces the appropriate psychoanalytic-unshackling for its reception. In other words, we can’t seriously contemplate a profound positivistic knowledge engagement with a non-positivistic as animistic or medieval mindset without the idea of priorly eliciting the appreciation-and-adoptions of a positivism apriorising/axiomatising/referencing/intelligibility/setup/measuring/instrument attitude/mental-disposition/care–and–episteme when contending about any salient positivistic articulations as otherwise all such positivism/rational-empiricism articulations and explaining will be reconstrued circularly in animistic or medieval terms—as-of-axiomatic-construct as of the latter teleologically-degraded prior relative-ontological-incompleteness—of—reference-of-thought

The point here is that the meaningfulness-and-teleology so-construed has to supersede the prior registry-worldview/dimension uninstitutionalised-threshold perspective/framing/reference/horizon/projection for its prospective transcendence-and-sublimity/sublimation/supererogatory—de-mentativity-enabling purpose, even if that implies being temporally unpalatable, given that the fundamental purpose for the underlying aetiologisation/ontological-escalation is of intemporal/ontological/social/species universal/transcendental maximalising—
For instance, with respect to coming across and living say in an early hunter-gather society with its interpretation of ill-health as of bad omen, we will still maintain an ‘assumed-and-unflinching transversality<for-sublimating–existential-eventuating/denouement>~of-affirmative-and-unaffirmative–disambiguated–‘motif-and-apriorising/axiomatising/referencing’ as of the attitude/mental-disposition/care–and–episteme of positivism’s/rational-empiricism’s perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation, at least as of our self-conscious awareness, even as this reflects mutual beyond-the-consciousness-awareness-teleology<in-preconverging–existential-extrication-as-of-existential-unthought> as when we publicly pretend to act otherwise by subscribing to the interpretation within such a social-setup. As construed within a given reference-of-thought, say in our positivism/rational-empiricism reference-of-thought we can further have the conception of the physics or biology or law or literature or even just entrepreneur or accountant or technician specific attitude/mental-disposition/care–and–episteme, and further at the individual level as of changing attitude/mental-disposition/care–and–episteme with living-as-of-human-personality-developing. Attitude/mental-disposition/care–and–episteme as so-construed is critical fundamentally because the notionally inherent human capacity for aetiologisation/ontological-escalation is directly associated with ‘attitude/mental-disposition/care–and–episteme as dispensing-with-immediacy-for-relative-ontological-completeness’–by-reification/contemplative-distension (as of human self-surpassing—existentialism-form-factor,–in-overcoming–‘notionally–collateralising-beholdening-protohumanity’–to–‘attain-sublimating-humanity’–as-to-existence-potency ~sublimating–nascence,–disclosed-from-prospective-epistemic-digression to supersede human temporality/shortness <amplituding/formative> wooden-language–(imbued—averaging-of-thought–<as-to-leveling/ressentiment/closed-construct-of– meaningfulness-and-teleology –as-of-

With regards to living-as-of-human-personality-developing, we can appreciate in the case of a child’s personality development as of its given attitude/mental-disposition/care–and–episteme that it has a poor dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus on instant-sensations-and-carefreeness requiring that the child is directed to end at successive stages infantile habits as it grows up with an increasing sense of dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus that ultimately involves major stages like schooling, greater social autonomy and responsibility, and developing into an adult with even greater dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus as for instance the notion of pleasure is increasingly substituted with that of work-and-pleasure, etc. Such living-development–as-to-personality-development as dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus is construed as the more profound attitude/mental-disposition/care–and–episteme for human optimum living, and so over say an animal-like immediacy attitude/mental-disposition/care–and–episteme of living. With regards to the second-level of social aetiologisation/ontological-escalation associated with ‘attitude/mental-disposition/care–and–episteme dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus’, for achieving transcendence-and-sublimity/sublimation/supererogatory-de-mentativity; humankind construes of existence as ‘more than just plain living as animals’ but as enabling for various domains of social projections dispensing-with-immediacy-for-relative-ontological-completeness-as-of-its-more-direct-focus so-implied across the various registry-worldviews/dimensions, whether in an animistic social-setup involving animistic practices or in

It is interesting to note here that such positivist scholars were ‘never beholden to a convincing exercise with scholasticism but rather with intrinsic-reality/ontological-veridicality’, and for which purpose rather opted to create internally-coherent positivist networks and societies for the perpetuation of positivistic

Rather the attitude/mental-disposition/care–and–episteme\textsuperscript{5} of genuine intellectual scepticism is encrusted within the very notion of prospective relative-ontological-completeness\textsuperscript{7} of human meaningfulness-and-teleolgy, given human limited-mentation-capacity-deepening\textsuperscript{7}. In this latter respect, and for the possibility of prospective social transcendence-and-sublimity/sublimation/supererogatory—de-mentativity and emancipation, social practices at any given period as ‘becoming constructs’ are not inherently ontologically sacrosanct by the fact that these are the outcome of preceding prospective relative-ontological-completeness as of preceding intemporal dispensing-with-immediacy-for-relative-ontological-completeness-reification/contemplative-distension, and by that very implication this is what carries the possibility of ‘inventing’ as-of-prospective-institutionalisation social practices as of prospective relative-ontological-completeness. ontological-bad-faith/inauthenticity ad-hoc pretences extolling social practices as of presencing—absolutising-identitive-constitutedness but of a poor conception outside the prospective relative-ontological-completeness behind such social practices ‘inventing’ as-of-

existential–epistemic-totalisation-scheme-of-meaningfulness-and-teleology’ speaks of more and more profound convergence-as-of-accumulation of human-subpotency grasp of the full-potency of existence coherence/contiguity. It should be noted as well that the afore is focused on the abstract reference-of-thought/epistemic-totalisation level of différance/internal-dialectics/difference-deferral, as it is actually reflecting ‘the backdrop construed as human sublimation-educing—textuality/hermeneutic/reprojecting/supererogating/zeroing—as-to-possibilities-of-self-becoming-as-of-‘existential-interpretation/epistemicity-in-apriorising/axiomatising/referencing-of-existence’ for the effectively devolving différance/internal-dialectics/difference-deferral teleological process of meaningfulness; given that the abstract reference-of-thought/epistemic-totalisation level so-established rather enframes teleologically-devolving-as-drifting meaningfulness with regards to ‘social-stake-contention-or-confliction as of existential-instantiations dynamics among individuals and the social-collective’ construed from notional~deprocrypticism deneuterising, to fully reflect the ontological-veridicality of mental-states as of affirmation/projection/assertion/dueness-validating-logicising/suitable-measuring-instrument-validating-measuring-as-to-postconverging-or-dialectical-thinking —apriorising-psychologism> and unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuring-instrument-invalidating-measuring-as-to-preconverging-or-dementing —apriorising-psychologism> stranding dialectics. For instance, reflecting in an early hunter-gatherer society the ‘candid existential expressiveness’ of how one is suffering from bad omen on the backdrop of its ‘recurrent-utter-uninstitutionalisation totalising/circumscribing/delineating —amplituding/formative–epistemicity> reference-of-

Thus this will disambiguate, specifically ‘with regards to the ill-health meaningfulness-and-teleology, as it construes any ill-health issue as of the idea of bad omen given its ‘non-rules—apriorising/axiomatising/referencing—psychologism, as-impulsive-or-accidented-or-random-mental-disposition’. The uninstitutionalised-threshold as such, as of the reference-of-thought beyond-the-consciousness-awareness-teleology, is the basis for determining both intemporal as well as temporal ontological-performance specifically as of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of reference-of-thought—devolving ontological-performance—<including-virtue-as-ontology>. break/epistemic-resetting; with the latter arising as a result of lack of ‘axiomatic commonness-

immanent-existence/intrinsic-reality/ontological-veridicality,-as-to-
‘humaniances/formative-epistemicity’ totalising-purview-of-construal’ as of the
variance of uninstitutionalised-threshold prior relative-ontological-incompleteness
reference-of-thought and prospective institutionalisation relative-ontological-completeness
reference-of-thought. For instance, such epistemic-break/epistemic-resetting associated
with the overall ontological-contiguity —of-the-human-institutionalisation-process
necessarily explains the ‘mutually transversality-apriorising/apomatizing/referencing’ unintelligibility’ of the Galileos, Newtons, Diderots
episteme articulating prospective positivising/rational-empiricism meaningfulness-and-
teleology and the Establishment scholasticism medieval dogmatic episteme. The implication
here is that the articulation of transcendence-and-sublimity/sublimation/supererogatory-de-
mentativity as of reference-of-thought is by itself tied up to a prospective epistemic
disruption, construed as of soundness-or-ontological-good-faith/authenticity reference-
of-thought, beyond just grounded knowledge as of the prior episteme which is rather construed
as of unsoundness-or-ontological-bad-faith/inauthenticity reference-of-thought. Such
transcendental epistemic-breaks/epistemic-resetting arise because humankind is subpotent as of
its knowledge-constructs/theories/inter-solipsistic-intercessory-notions/notional-referential-notions/articulations/virtue to the full-potency of existence, and in the human
construal/conceptualisation of intrinsic-reality/ontological-veridicality, the ‘superseding party’
is not any involved humans as knowledge agents but inherent existential-reality itself, with any
such humans as knowledge agents only ‘pertinent in delegation’ as of their ‘kowtowing to
existential-reality’, with such delegation inherently revoked as of their failed ‘kowtowing to
muddlement. It should be noted that such a notional construct of episteme interpreted herein is implied as of ‘dynamic social <amplituding/formative–epistemicity> totalising–self-referencing-syncretising’ across the entire social spectrum as of notional–episteme dynamically covering both informal institutional settings and formal institutional settings. In the bigger scheme of things, such transcendental epistemic-breaks/epistemic-resetting in transition associated with the ontological-contiguity\textsuperscript{67}—of-the-human-institutionalisation-process\textsuperscript{58} as of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–‘notional–firstnaturedness—temporal-to-intemporal-dispositions-<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor arise wherein ‘the prior shaman is being contested by a new shaman in a hunter-gatherer society’ with possible accusations of witchcraft as of institutionalised-being-and-craft, wherein ‘two or more traditional priesthoods of an early civilisation foment against one another’, wherein ‘sophistry and philosophy vie for what passes as valuable and true knowledge’, wherein ‘medieval scholasticism dogmatic knowledge and positivism/rational-empiricism knowledge vie for the interpretation of human and physical nature’, and in our case wherein ‘knowledge traditions including philosophical traditions are put into question as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology\textsuperscript{99}, antinihilism and transcendental-enabling/sublimating/supererogatory–de-mentativity knowledge perspectives’. Ultimately, this point out that epistemic-breaks/epistemic-resetting become inevitable wherein the prior knowledge episteme de-mentatively/structurally/paradigmatically loses its way as of its initial justification as safeguarding the prospective possibility of enlightening human knowledge as of ontology’s-directedness-as-Being, but then by its institutional-being-and-craft uninstitutionalised-threshold \textsuperscript{02} actually de-mentatively/structurally/paradigmatically beyond-the-consciousness-
undermines the prospective possibility of prospective enlightening human knowledge; and so, as increasingly the prior epistemic disposition is one that overlooks prospective inherent transcendental-enabling/sublimating/supererogatory de-mentativity of meaningfulness-and-teleology ontological-performance -><including-virtue-as-ontology> turning rather towards social-aggregation-enabling implications as meaningfulness-and-teleology ontological-performance -><including-virtue-as-ontology>, undermining the very notion of the intellectual exercise as about developing/institutionalising the social and not kowtowing-to-it construed as charlatanism! Further in all such transcendental contexts despite the fact that the-new is derived from the-old as for instance the Descartes, the Galileos, the Leibnizes and the Newtons as budding-positivists are the outcrop of Scholasticism itself, the-new epistemic-break/epistemic-resetting is justified in that even the-old is predicated on upholding Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of ontology’s-directedness-as-Being going by the human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation postconverging–de-mentating/structuring/paradigmning. Insightfully, that exercise is actually reflected as of temporal-to-intemporal individuations wherein the individual is rather a receptacle of temporal-to-intemporal individuations with variance of mental-dispositions among individuals an issue of variance as of skewness towards temporality/shortness or intemporality; such that even the budding-positivists carried elements of scholasticism but were more definitely of a positivistic outlook, and many scholastics articulated notions which could more fruitfully be developed in a positivistic outlook but were stifled by their scholasticism dogmatic intellectual commitments. Ultimately, such a profound phenomenological totalising~conflated-meaningfulness-and-teleology-as-of-notional~deprocriptism-reflected-historiality/ontological-eventfulness/ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism'> ontological-performance<including-virtue-as-ontology> construal faced with the inherent dogmatic and psychological biases of human <amplituding/formative–epistemicity>totalising~thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory~de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance<including-virtue-as-ontology>) in many ways necessarily has to project out of ‘ordinariness of thought’ for pretence of arriving at a sound construct capable of a most profound reflection of social ontological-veridicality. Consider with respect to a most profound emotional-involvement the issue of human imperilment as a test for the capacity for such requisite depth of transcendental contemplation. Consider for instance that tens of millions including soldiers killed in both the first and second
world wars pass for mere victims of the wars in a bizarre twist of mutual
<amplituding/formative–epistemicity>totalising~self-referencing-
synergising/circularity/interiorising/akrasiatic-drag that shuts-off-the-mind to the odious
reality of mutual genocide, to say the least. Consider that in Russia a dictator responsible for
killing about 25 millions of his own citizens is still considered a national hero by the majority.
Consider that the first president of the United States in position of power was a slave-owner
thus encouraging the Atlantic slave trade that led to genocidal proportions of deaths but he is
venerated by a majority as the greatest U.S. President. Consider in a different sense though non-
exculpatory that Heidegger a leading intellectual joined the Nazi party leaving 2 years later with
hardly any critical influence on the party and is universally condemned today. Consider as
well that many an intellectual or public figure today actively or passively voiced for the recent
wars killing millions whether in the Middle-East or elsewhere with a corresponding social
indifference and mental shut-off. These profound considerations highlight the contemplative
depth to which the social thinker needs to get to in order to truly be engaged in a

hyperbole-of-temporal-to-intemporal-ontological-performance ~<including-virtue-as-

constrains on the natural sciences. Effectively, such transcendental insight points out that
existence/existential-possibilities is inherently a radical ontology beyond our
in existence/existential-possibilities as ‘hyperbolic pretences of ontology’. This author thinks that there can effectively be an engaging and constructive approach for arriving at such a depth of radical ontology warranted by existence/existential-possibilities that is transcendental-enabling/sublimating/supererogatory-de-mentativity for the social avoiding the platitudes of our times such that many an intellectual have even given up to ‘this all-powerful emotional-involvement element of the social’. Human <amplituding/formative–epistemicity>totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance-<including-virtue-as-ontology>) implies the need for a sound perpetuating construct of universal projection as intemporality-or-longness-of-register-of–meaningfulness-and-teleology as the opportunity for prospective transcendental-enabling/sublimating/supererogatory–de-mentativity. Such a construct is a ‘response construal’ that inherently enables transformative universal implications as beyond presence issues and complexes as it sublates presence out of its failure. This is unlike the all too frequent construct of ‘reactionary construal’ caught up in presence as it is presence-serving and so whether as of positive or negative reaction; as even as a positive act a reactionary construal is hardly of entailing-<amplituding/formative–epistemicity>totalising–in-relative-ontological-completeness thus hardly as of aetiolagisation/ontological-escalation. A hero as of a positive ‘reactionary construal’ may perfectly prevent a crime from happening and save the day but then such action is not dependable and the outcomes are unreliable as well together with the possibility on occasion of wrong judgement and/or wrong action or usurpation; thus the social construction of crime prevention needs an intellectualised social ‘response construal’ mechanism of universal
implication that ensures dependability of crime prevention as of the foresight of law and policing management construed as of an intemporal-as-ontological intellectual projection exercise. This same depth-of-thought is warranted across the dynamic scope of the social including the political for true transcendental-enabling/sublimating/supererogatory-de-mentativity beyond normative conventioned constructs bound to hold-up the possibility of prospective ‘visions of humankind emancipation’. Such a depth of contemplation will fathom for instance that humankind appeared on earth about 100000 years ago but the pervasive de-mentative/structural/paradigmatic determinism of the nation-state which became common just about 500 years ago has been a source of much of humankind’s problems as of ‘reactionary construal’ and humankind’s apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }— constitutedness—in–preconverging-entailment to the notion of nation-state seems to create an impasse for human Being-and-contemplative development. Consider again the possibility capable of arising as of a ‘response construal’ as effectively articulated by Derrida in his analysis of spirit. Derrida grasps that Heidegger strove to produce universal human meaningfulness-and-teleology but was caught up in the <amplituding/formative–epistemicity>totalising–thrownness-in-existence (I exist therefore existence is of transcendental-enabling/sublimating/supererogatory–de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance>-<including-virtue-as-ontology>) as spirit failed to universalise and so Heidegger couldn’t carry the effective implications of his work to its true universal conclusion as he was caught up in the ‘reactionary construal’ of them-and-us, as his commitment to the ‘us’ overlooked/didn’t-come-into-grips with what the ‘us’ was doing, not to mention the possibility of him actually acting as transcendental over the them-and-us as a position of making a universal ‘response construal’. This problem isn’t particular to Heidegger but for the fact that the underlying regime of ‘us’
were the Nazis, as the them-and-us logic is intellectually rampant such that even Derrida was being condemned by many for not adopting it. The question can be asked whether any genuine intellectualism as providing a ‘response construal’ for humankind overall can construe of emancipation “meaningfulness-and-teleology” in them-and-us basis and whether this isn’t a recipe for potential disaster as all them-and-us rationale are just variances of the same insanity!

We can imagine that a true understanding and universal application of Derrida’s spirit insight as a ‘response construal’ could have educated thought-and-intellectualism and prevent say the subsequent Rwanda and Burundi genocides in Africa from occurring with many supposedly normal and educated persons caught up in the overall mobbishness; but such a lesson can hardly come out from the prevalent them-and-us lazy intellectualism ‘reactionary construal’ which simply provides <amplituding/formative–epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag comfort to protagonists by its lack-of or pseudo universal projection. Basically, a phenomenological extended metaphysics-of-absence-⟨implicit-epistemic-veracity-of- nonpresencing-⟨perspective–ontological-normalcy/postconvergence⟩⟩ as of notional–deprocrypticism perspective points out that humankind does have the possibilities of adopting an uninhibited/decomplexified posture for ‘inventing’ a whole new renewal/re-perceiving/re-thinking beyond our apparently constricted metaphysics-of-presence-⟨implicated-‘nondescript/ignorable–void ’-as-to-presencing—absolutising-identitive–constitutedness ⟩ framework which in reality is just presence ‘hyperbolic dazing effect’ utterly distinct from the radical ontology possibilities of existence/existential-possibilities. Transcendence-and-sublimity/sublimation/supererogatory–de-mentativity as implied here is with regards to reference-of-thought/epistemic-totalisation level ‘reference-of-thought—devolving-teleological-de-mentating/structuring/paradigming–of-meaningfulness’ which is the ‘ontologically veridical enabling notion of transcendence-and-
sublimity/sublimation/supererogatory-de-mentativity’ as of the-very-same-immanent-existence/intrinsic-reality/ontological-veridicality-as-to-'human-amplituding/formative-epistemicity'>totalising-purview-of-construal’ in epistemic-conflatedness as of underlying relative-ontological-incompleteness and relative-ontological-completeness reference-of-thought. Such a conceptualisation of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is actually what a Kantian transcendental imagination and other subsequent philosophies of transcendence-and-sublimity/sublimation/supererogatory-de-mentativity it inspired would have strove to arrive at, but according to this author wrongly understood transcendence-and-sublimity/sublimation/supererogatory-de-mentativity rather as of ‘phenomenal-abstractiveness’ as the basis/grounding to then construe/conceptualise meaningfulness-and-teleology failing to factor in that ‘existential phenomenal-abstractiveness conflates-in-effecting-wholeness-as-of-profoundness-and-completeness-to—meaningfulness-and-teleology all the way to consciousness as apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument for the possibility of meaningfulness-and-teleology to then arise on the basis of such a given apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument’; given that it is consciousness that teleologically-registers/recognises phenomenal-abstractiveness as of meaningfulness-and-teleology in addition to the implications thereof with regards to the varying-as-transcending nature of consciousness with human limited-mentation-capacity-deepening arising in further apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-educed-existentialising/contextualising/textualising-contiguity—in-preconverging-disentailment-by-postconverging-entailment as of human maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation in an exercise of <amplituding/formative-epistemicity>totalising-renewing-realisation/re-perception/re-thought that re-projects-or-re-anticipates the-very-same-immanent-

self-referencing meaningfulness-and-teleology is always susceptible to the further deepening of human limited-mentation-capacity as of meaningfulness-and-teleology arises out of the adjunction to this ‘underlying meaningfulness-and-teleology’ and is adjoined to it as metaphoricity, with metaphoricity construed as the signification implied as of syncretising-effecting meaningfulness-and-teleology. Thus language effectively reflects the meaningfulness-and-teleology reality of human meaningfulness-and-teleology, as language is always a blending of the ‘underlying meaningfulness-and-teleology’ with the apriorising/axiomatising/referencing-of-attendant-ontological-contiguity—confused—existentialising/contextualising/textualising-contiguity—in—preconverging-disentailment—by—postconverging-entailment adjunction of its metaphoricity. But then an adjunctive-metaphoricty\(^57\)-signification so produced as reflected by ‘a transcendental syncretising-effecting \(^56\) meaningfulness-and-teleology’ like the construal of budding-positivism/rational-empiricism in medieval society, may turn out in-due-course/crossgenerationally to be of an even greater ‘meaningfulness-and-teleology’ <amplituding/formative–epistemicity>totalising/circumscribing/delineating effect over the prior

Existence itself as the absolute a priori underscores such a conception given the human species sublimation-educing—textuality/hermeneutic/reprojecting/supererogating/zeroing~as-to-possibilities-of-self-becoming-as-of-‘existential-interpretation/epistemicity-in-apriorising/axiomatising/referencing-of-existence as of existential-stakes migration; since the existential dispositions of human subjects relative to social-stake-contention-or-confliction arises as of ‘their living existential-instantiations’, and where they construe meaningfulness-and-teleology as not self-referentially covered by the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’, they will inevitably articulate adjunctive-metaphoricity-significations to that prior ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’. In another respect with regards to language acquisition as mirroring a child’s existential integration into the dynamics of social-construct existential situations/instances, stakes, institutions and processes, a new born child existential integration into society, from its perspective, develops as of a dynamics of adjunctive-metaphoricity\textsuperscript{57} -significations in ‘significations accreting-substitutive-subsumption-as-futural-différance-freeplay’ construed here as the phenomenology of human language acquisition différance’ that fundamentally mirror the child’s developing existential social relationships as an ordered process of social existential overtures constraining-and-cohering the child’s adoption-of/integration-with the supposedly ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as of a peculiar, intuitive and dynamic developing metaphoricity\textsuperscript{57} where ‘both the child and members of the overall social-construct existentially adjust to each other as of spurious meaningful utterances like mutual babbling and baby-talk’ while implicitly converging towards the child’s adoption/integration at various stages of its existential development of the ‘underlying <amplituding/formative–epistemicity>totalising/circumscribing/delineating signifying-construct of language’ as it is reflected by the dynamics of social-construct existential situations/instances, stakes, institutions and processes. But then as might be phenomenologically appreciated the notion of language as of its existential import is thus utterly dynamic as an overall signification construct that is never ‘absolutely present’ but rather ‘immensely existentially present’ with an ‘absolute language signification construct imagery rather implied as of projection/anticipation but not phenomenologically real’ explaining the
concrete variation of individuals linguistic performance, as the phenomenality of language is rather held together by ‘the given social-setup underlying supposedly coherent ontological-commitment’<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality> for its evolving-and-devolving construct of ‘meaningfulness-and-teleology’! Thus phenomenologically, ‘language arises, ebbs and flows as of a continuously-elusive individual and collective-social consciousness steering that reflects the <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag⁴ dynamics of individual and collective-social ‘meaningfulness-and-teleology’, and this equally explains why language evolves and transforms over time. In effect, ‘language is never phenomenologically the complete possibilities of language as an absolute present conception but is rather a becoming as of an immensely-existentially-present signification reflected by individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. The above insight further points out the pertinence of construing-of and analysing language more completely as of human existentialism/thrownness/facticity, giving that language is more phenomenologically-and-pragmatically a signification accompaniment of ‘individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. This highlights the ‘knowledge implications as of accreting-substitutive-subsumption-as-futural-différance-freeplay^ with regards to such a phenomenological conception of language as a lockstep veridical reflection of human personality development all along the various existential stages as of a notion of the dynamics of social-construct existential situations/instances, stakes, institutions and processes from childhood to adulthood’, notwithstanding the fact that the privileged social
superseding of human self-referencing signifying-constructs as of the need to supersede the limited certitude as of human limited-mentation-capacity, inherently implies that the possibility for ‘absolute certitude as of its theoretical possibility’ lies with such an adjunctive-metaphoricity\textsuperscript{2}-significations apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity } – conflatedness \textsuperscript{3} – in \{preconverging-disentailment by\}–postconverging entailment as of syncretising-effecting as ultimately converging towards a \textsuperscript{1} deprocrypticism–or–preempting—disjointedness-as-of-\textsuperscript{1} reference-of-thought and so as of the prospect of an ontologically-veridical Theory of Everything, and insightfully with regards to elucidating the pervasiveness of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay\textsuperscript{2}’ construed as différance in apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity } – conflatedness \textsuperscript{3} – in \{preconverging-disentailment by\}–postconverging entailment’ associated with human existential grasp of knowledge as of the implications of its limited-mentation-capacity. The notion of accreting-substitutive-subsumption-as-futural-différance-freeplay\textsuperscript{2} as underlying human limited-mentation-capacity induced différance highlights the phenomenological reality all along humanity’s existence of ‘the privileging of ontological-construction’ as from the perspective/framing/reference/horizon/projection of the end-purpose of the various relevant dominant social agencies and social institutions, and so as reflected as of humanity’s existence \textsuperscript{1} historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>. While such a privileging as of immediate/instant existential implications like say parents and society privileging the conception of what is language in terms–as-of-axiomatic-construct of its end-purpose as of the perspective of the child’s integration in various social structures and institutions; however, in the bigger picture the fact that social structures and social institutions
construed as the historicality/ontological-eventfulness /ontological-aesthetic-tracing-perspective–ontological-normalcy/postconvergence-reflecte-epistemicity-relativism-determinism of the différance. The implication here resonates with the idea that knowledge is much more than the construal of conceptual sublimation knowledge outcome, but rather its construal as notional-knowledge involving the dynamic understanding of both its temporality/misconstrual/desublimation and intemporal-as-ontological-construal as of accreting-substitutive-subsumption-as-futural-différance-freeplay involving specifically disambiguation as of human limited-mentation-capacity dynamics as of deneuterising referentialism and thus beyond neuterising’ reflecting the difference-in-nature/difference-in-apriorising-or-axiomatising-or-referencing of the uninstitutionalised-threshold and the prospective institutionalisation; as the ‘effecting implications of knowledge’ are more than just about its conceptualised intemporal—as-ontology but involves grasping this together with the implications of temporality, and so because of the circular existential implications of human limited-mentation-capacity. Hence language can be more pertinently construed ontologically as of the social dynamics of existential meaningfulness-and-teleology signification than just as of just an outcome privileged institutional end-purpose perspective/framing/reference/horizon/projection that is in many ways ad-hoc and phenomenologically uninsightful as of the many existential implications behind comprehending language. Thus human privileged social and institutional end-purpose perspective/framing/reference/horizon/projection tend to be in apriorising/axiomatising/referencing-of-attendant–ontological-contiguity—constitutedness—in–preconverging-entailment. Further such accreting-substitutive-subsumption-as-futural-différance-freeplay is the existentially veridical and effective basis for reflecting historiality/ontological-eventfulness /ontological-aesthetic-tracing-perspective–ontological-normalcy/postconvergence-reflecte-epistemicity-relativism-determinism
outcome as can be implied in a storied-construct/ontologically-valid-narration as of existentially insightful ‘meaningfulness-and-teleology’\(^{[96]}\). Such a perspective should possibly usher in a ‘suprastructural postmodernism in everything’ including such nascent contemplations for breaking out of currently perceived subject-matter doldrums as implied with postmodern social sciences, postmodern humanities, postmodern art, postmodern science, postmodern mathematics and postmodern physics, and so notwithstanding a history of post-structuralism critiques of ontological-bad-faith/inauthenticity\(^{[15]}\) ‘with moronic incantations that fail the mark of even bad intellectual arguments as social-aggregation-enabling invocations’, granted as of their beyond-the-consciousness-awareness-teleology\(^{[96]}\)-\(\geq\) preconverging existential-extrication-as-of-existential-unthought\(^{[5]}\); as such a statement is not gratuitous given the mere fact that where knowledge-as-of-organic-knowledge as of human intemporality /longness doesn’t take its due place, it is occupied by ignorance as of human temporality\(^{[10]}\)/shortness with consequent nefarious ramifications for Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\(\geq\) meaningfulness-and-teleology\(^{[99]}\). Basically, just as the adjunctive-metaphoricity\(^{[57]}\)-signification instigation of positivistic rationality as a potent construct took the form of a centered–epistemic-totalisation permeating all aspects and subject-matter domains of human existence and so for the better with regards to Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\(\geq\) meaningfulness-and-teleology\(^{[99]}\), postmodern-thought and as of its underlying phenomenological depth transcendentally carries prospective Being adjunctive-metaphoricity\(^{[1]}\)-signification as of a potent construct for a centered–epistemic-totalisation permeation and sublimation of all aspects and subject-matter domains of human existence, and so for the better of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\(\geq\) meaningfulness-and-teleology\(^{[99]}\).
Such phenomenology as the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional–conflatedness of notional–deprocrypticism deneuterising—referentialism’ is operantly enabled by accreting-substitutive-subsumption-as-futural-différance-freeplay and is the maximal ontologically veridical articulation of apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity—educted—existentialising/contextualising/textualising-contiguity }—confoundedness in {preconverging—disentailment—by—postconverging-entailment that ‘undermines the privileging of <amplituding/formative—epistemicity>totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag as of its ubiquitous-protractedness as to de-mentative/structural/paradigmatic ‘ontological-contiguity or difference-of-kind’ disposition, and so beyond just reflecting such ‘presencing—absolutising-identitive-constitutedness privilege undermining as of transcendental outcomes implied by ‘historiality/ontological-eventfulness/ontological-aesthetic-tracing/<perspective–ontological-normalcy/postconvergence-reflected—‘epistemicity-relativism-determinism’>. While the ‘Derridean quasi-transcendental-freeplay différance’ by its rather quasi-transcendental-freeplay orientation doesn’t quite get to such a phenomenological depth of apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity—educted—existentialising/contextualising/textualising-contiguity }—confoundedness in {preconverging—disentailment—by—postconverging-entailment, it does effectively elicit such an underlying conception of phenomenological profoundness. As such a ‘Derridean quasi-transcendental-freeplay différance’ is what is meant to be understood as a relatively more pertinent ontologically depth for such a more evolved and ‘experimental’ articulation of différance in the strive to maximally undermine <amplituding/formative—epistemicity>totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag implied in the Glas experimental project which goal is well beyond the two texts but more fundamentally a
demonstration of ‘sublimation-educing—

given perspective/framing/reference/horizon/projection, such that as of a
\(<\text{amplituding/formative–epistemicity}>\)totalising—self-referencing-

Thus, this author holds that such a ‘Derridean quasi-transcendental-freeplay différance’ is fundamentally incomplete as of comparison with the implied apriorising/axiomatising/referencing—{of-attendant—ontological—contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflatedness in [preconverging disentailment by] postconverging entailment of accreting-substitutive-subsumption-as-futural-différance-freeplay which is truly transcendental. The former fails to factor in that human limited-mentation-capacity has to establish the appropriate ‘perspective/framing/reference/horizon/projection implications’ with regards to meaningfulness-and-teleology, and so as disambiguating presencing—absolutising-identitive-constitutedness from nonpresencing—<perspective–ontological-normalcy/postconvergence> by their respective supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness—of—apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for—conceptualisation, such that unsuspectingly the ‘Derridean quasi-transcendental-freeplay

reconstrual of reference-of-thought and devolving-axiomatic-constructs implications, and so as of maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation. This insight about ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality further reveals that prospective nonpresencing-perspective-ontological-normalcy/postconvergence implies prospective renewal of attitude/mental-disposition/care-and-episteme, as of de-mentation-supererogatory-ontological-de-mentation-or-dialectical-de-mentation—stranding-or-attributive-dialectics) which at once draws out the renewed implications of what qualifies as affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring-as-to-postconverging-or-dialectical-thinking-apriorising-psychologism and unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring-as-to-preconverging-or-dementing-apriorising-psychologism respectively as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought and prior relative-ontological-incompleteness. In this regard we can imagine as of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, the strange feeling upon physicists wedded to ‘traditional classical mechanics axiomatic-construct’ with respect the prospective theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs maximalising-recomposuring-for-relative-ontological-completeness—unenframed-conceptualisation articulation of such ideas as space-time, considering the ether as unreal, considering that the laws of physics are different at atomic scale, etc. as the fundamental basis for understanding the new physics as of its prospective relative-ontological-completeness-of-reference-of-thought. Such a construal as a shift in axiomatic-construct is more-or-less within the same positivism/rational-empiricism registry-worldview, though it
might pretty much be argued that the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs marks the beginning of a proto-postmodern science as of the fundamental human-subject-emancipating-relativism-driven-recomposing-constructivism-towards-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing-developments in physics since then, even though its meaningfulness-and-teleology remains intelligible, more or less, to the positive science essentially by the modern conception of observational and experimental validation. However, the idea of requisite shift in attitude/mental-disposition/care–and–episteme from that simplistic ‘modern conception’ cannot be contested. Such an attitude/mental-disposition/care–and–episteme implied shift as articulated above, construed as of an overall registry-worldview/dimension reference-of-thought transcendence-and-sublimity/sublimation/supererogatory-de-mentativity is rather ‘massively distressing’ when implied ‘as of an instant of transitioning’ since the reality of such attitude/mental-disposition/care–and–episteme transitioning have tended to take place rather crossgenerationally as of human beyond-the-consciousness-awareness-teleology-in-preconverging-existential-extrication-as-of-existential-unthought. As we can now imagine the transitioning of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme from earlier crude conceptualisations of positivism/rational-empiricism as presently reflecting a more universal valid notion of positivism/rational-empiricism as of its spread worldwide and profoundness in today’s societies. Interestingly, this transitioning nature of human attitude/mental-disposition/care–and–episteme renewal manifestation as of the social collective evolution, and is equally reflected in the individual as-receptacle-of-temporal-to-intemporal-individuation-ontological-performance-including-virtue-as-ontology; as at any given moment individuals and society are rather inclined to adopt an attitude/mental-disposition/care–and–episteme of dual-language/split-mentality as of amplituding/formative-epistemicity totalising–thrownness-in-existence (I exist therefore existence is of
transcendental-enabling/sublimating/supererogatory-de-mentativity to my human-subpotency / hyperbole-of-temporal-to-intemporal-ontological-performance<including-virtue-as-ontology>). The implied notion of human emancipation is always being articulated in an existentially dual-language/split-mentality that on the one hand fails the implied emancipation and on the other hand implies a strife for such emancipation. Consider in this regard, the attitude/mental-disposition/care–and–episteme of warring nations in the early 20th century all too ready to arm themselves massively in preparation for the world wars and equally very much aware of the need for international peace, or in the 18th and 19th centuries the dual-language/split-mentality of universal human rights and ending slavery in the new world and the slave trade on the one hand and on the other still practicing it up to the point of wars like the American civil war to bring an end to it. In a more prosaic note, the dual-language/split-mentality associated with the evasiveness of emancipating social and political dispositions as of relevant settings and contexts. In fact, this author will surmise that in many ways we already carry inklings of postmodern deprocripticism—or—preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme as of the dual-language/split-mentality at appropriate contexts and settings extolling our liberality with progressive stakes while in other secluded settings and contexts espouse a damning language regarding such progressive stakes. The idea of requisite attitude/mental-disposition/care–and–episteme renewal as implied for notional ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing—as-so-being-as-of-existential-reality induced transcendence-and-sublimity/sublimation/supererogatory-de-mentativity speaks of a ‘reality as of underlying human beyond-the-consciousness-awareness-teleology<in-preconverging-existential-extrication-as-of-existential-unthought>’, that reflects a human tacit awareness that
the grounding of its "meaningfulness-and-teleology" is not-certain-as-absolute at any given moment, and that it should be prepared to shift its attitude/mental-disposition/care–and–episteme for more profound-and-complete "meaningfulness-and-teleology". While such an inclination is more forthcoming as of less profound-and-perceived personal existential implications with regards to the axiomatic-constructs within a \( ^8 \) reference-of-thought as articulated priorly with a shift for the theory-of-relativity-together-with-quantum-mechanics–axiomatic-constructs within the positivism/rational-empiricism \( ^8 \) reference-of-thought, however, as of more profound-and-perceived personal existential implications as drastically implied at the phenomenological depth of \( ^8 \) reference-of-thought transcendental conceptualisation this turns out to be much more difficult to countenance given individuals ‘mental and existential investment’ into "meaningfulness-and-teleology" as grounded on a given ‘registry-worldview’s/dimension’s reference-of-thought <amplituding/formative–epistemicity>totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag established existential–epistemic-totalisation-of–meaningfulness-and-teleology as well as the ‘psychological comfort’ habituated at the given \( ^5 \) neuterising. But then every registry-worldview/dimension has its own specific hurdle to clamber-over and that of futural Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology as of prospective notional–deprocrypticism is exactly the capacity to construe ‘meaningfulness-and-teleology’ as of full/complete human consciousness implications as implied by its protensive-consciousness which ultimately doesn’t allow for "meaningfulness-and-teleology beyond-the-consciousness-awareness-teleology–<in-preconverging-existential-extrication-as-of-existential-unthought> arising as of human prior relative-ontological-incompleteness–of–reference-of-thought. The fact is the ontological-faith-notion-or-ontological-fideism—imbued-underdetermination-of-motif-and-apriorising/axiomatising/referencing–as-so-being-as-of-existential-reality
apriorising/axiomatising/referencing-{of-attendant-ontological-contiguity-}\-[educed-existentialising/contextualising/textualising-contiguity]-conflatedness\-[in-{preconverging-disentailment-by-}]\-postconverging-entailment implication with respect to existence-potency\-[sublimating-nascence,-disclosed-from-prospective-epistemic-digression is such that in reality we are always tacitly aware of the evasiveness of absolute certainty but often rather inclined as of practicality to hang on to a delusion of the results of prior \-nonpresencing-<perspective-ontological-normalcy/postconvergence> as if of absolute certainty, so-construed as reasoning-from-results/afterthought. But then veridical absolute certainty is ever a promise always held in prospective existence-potency\-[sublimating-nascence,-disclosed-from-prospective-epistemic-digression relative-ontological-completeness\-[of apriorising/axiomatising/referencing, and so as of the certainty of human limited-mentation-capacity prospective relative-ontological-completeness\[-of-axiomatic-construct-or-\-reference-of-thought \-[amplituding/formative-epistemicity>causality as-to-projective-totalitative-implications-of-prospective- nonpresencing,-for-explicating-ontological-contiguity for transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, implied as of intemporal-preservation-entropy-or-contiguity-or-ontological-preservation. This explains why ontology’s-directedness-as-Being is the direction of ‘meaningfulness-and-teleology’\-grounding as always prospective as of prospective relative-ontological-completeness\[-of- reference-of-thought; and so, as of the successive base-institutionalisation, universalisation, positivism and notional-deprocrypticism registry-worldviews/dimensions \-nonpresencing-<perspective-ontological-normalcy/postconvergence> respectively as successive ‘meaningfulness-and-teleology’\-grounding for recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, and positivism–procrypticism \-presencing—absolutising-identitive-constitutedness’. Interestingly we can appreciate that the attitude/mental-disposition/care—and–episteme\-as of relevant
to evaluate the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs from a posture of ‘traditional classical mechanics axiomatic-construct’. Here is what fundamentally underlies the naïve misunderstanding of ‘human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing’. For instance, the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs actually reflects that priorly conceptualised-notions like ‘space’, ‘time’, ‘ether’ and ‘the laws of physics at atomic scale had to be the same as at the macroscale’, were all wrong. Thus ‘speaking of the reality of human limited-mentation-capacity as of its existential analytic capacity’ in a state of prior relative-ontological-incompleteness—of-reference-of-thought. It is human limited-mentation-capacity-deepening as of prospective relative-ontological-completeness—of-reference-of-thought as subsequently assuming as more real the notion of ‘space-time’, ‘considering the ether as unreal’, ‘considering that the laws of physics are different at atomic scale from the macroscale’, etc. that as of the human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-nonpresencing exercise brought about the more profound insight enabling the conception of the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs ultimately validated as of amplituding/formative-epistemicity—causality—as-to-projective-totalitative—implications-of-prospective-nonpresencing—for-explicating-ontological-contiguity by existence-potency—sublimating-nascence-disclosed-from-prospective-epistemic-digression; as all along humankind existence as of human-subpotency, the new reality so-espoused ‘is never about existence in itself as-existence-is-given-whatever-it-is-that-is GIVEN’, but about human limited-mentation-capacity-deepening for human emancipation. Thus implying existence-potency—sublimating-nascence-disclosed-from-prospective-epistemic-digression is ‘not really about any variation as
of the **human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation** directed directly to inherent-existence-as-of-existential-reality/existence-potency—sublimating—nascence—disclosed-from-prospective-epistemic-digression as to intrinsic-reality/ontological-veridicality whatever’, as it rather comes down to the **human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation** as of human limited-mentation-capacity-deepening bringing about a more profound and complete grounding for human construing of the full-potency of existence, which remains-whatever-it-is-ultimately. The postmodern insight here is rather that what is relevant to humankind is human-subpotency development towards the abstract full-potency of existence-whatever-it-is-ultimately. So the notion of **human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation** has nothing to do with the inherent nature of existence/intrinsic-reality/ontological-veridicality. Rather it has to do with ‘enlightening **human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation** of human limited-mentation-capacity which needs to be deepened before humankind embarks on the task of ‘conceptualising ‘meaningfulness-and-teleology’ that increasingly reflects existence/intrinsic-reality/ontological-veridical’. Thus this actually lead to ‘more and more objective ‘meaningfulness-and-teleology’ as we cannot argue that the theory-of-relativity-together-with-quantum-mechanics—axiomatic-constructs is less objective than classical-mechanics—axiomatic-constructs since it involved the **human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation** that led to human limited-

That naivety in failing to grasp this lies in the ontologically-flawed mental-reflex of temporal <amplituding/formative-epistemicity>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, wherein mental-dispositions operate by default without a double-gesturing, on the ‘wrong assumption that they already have the most ontologically-developed perspective/framing/reference/horizon/projection for grasping prospective meaningfulness-and-teleology; and failing to project/anticipate prospectively the implications of their very own shallow limited-mentation-capacity implications from a deeper prospectively-construed perspective/framing/reference/horizon/projection. Such a ‘modern take’ is susceptible to construe of the presence as of metaphysics-of-presence⟨implicated-nondescript/ignorable-void-as-to-presencing—absolutising-identitive-constitutedness⟩/illusion-of-the-present/present-consciousness/mirage, with hardly any contemplation of the retrospective and prospective projective-insights for construing ontologically-veridical meaningfulness-and-teleology. This paradox for human knowledge, as implied with the postmodern double-gesture reification, highlights that the human preconverging/postconverging-de-mentating/structuring/paradigming for construing knowledge is similar to H.G. Well’s country of the blind narrative, with the more critical issue being about ‘human blindness which needs to be resolved first before proceeding to see’, as what is to be seen as of the world is already given-whatever-it-is, and our true issue-as-of-knowledge is to develop the necessary human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation-as-to-the-nondisjointedness/entailment-of-prospective-
Rather the ontologically-veridical articulation of the postmodern argument as of its actual prospective relative-ontological-completeness\textsuperscript{27}-of-\textsuperscript{23} reference-of-thought which has to be prospectively centered-as-postconverging-or-dialectical-thinking\textsuperscript{1}–apriorising-psychologism over the modern take as prospectively decentered-as-preconverging-or-dementing\textsuperscript{20}–apriorising-psychologism, should be affirmatory in articulating that postmodern-thought is about: the appraisal and supplanting of ontologically-flawed-metanarratives/ideologies including socio-econo-political ideologies and ontologically-flawed professed ideologies like demarcating ontological-flawed-ideology-of-science-and-its-distortive-implications from ontologically-veridical-science-in-practice, and its pursuit for the most profound-and-complete objectivity of meaning as of prospective relative-ontological-completeness \textsuperscript{87}-of-\textsuperscript{83} reference-of-thought by renewing appraisal of intrinsic-reality/ontological-veridicality by ‘human-subject-emancipating-relativism-driven-recomposuring-constructivism-towards-singularisation-\textsuperscript{48}as-to-the-nondisjointedness/entailment-of-prospective-\textsuperscript{61}nonpresencing\textsuperscript{92} as of human-subpotency apriorising/axiomatising/referencing-\{of-attendant ontological-contiguity -educed- existentialising/contextualising/textualising-contiguity \}–conflatedness \textsuperscript{13}in \{preconverging-disentailment–by}–postconverging-entailment’, and it is much more than just a naïve notion of a multiplicity of narratives as wrongly implied from the modern take of <preconverging~’motif-and-apriorising/axiomatising/referencing’–imbuing\textsuperscript{64}>existentialising—enframing/imprintedness-(as-to- historicity-tracing—in-presencing– hyperrealisation/hyperreal-transposition) necessarily subject to ontological-bad-faith/inauthenticity\textsuperscript{64} as of the modern’s take prospective uninstitutionalised-threshold\textsuperscript{102} of procrypticism or disjointedness—as-of-\textsuperscript{17}reference-of-thought in many ways explaining the difficulties of Derrida and Foucault in effectively qualifying their thought postures (when each was asked whether they were poststructuralist) underlied/organised respectively by messianicity and parrhesia but rather postmodern-thought is of a prospective ‘relative-ontological-

The implication here is that hitherto postmodern-thought had been naively and falsely conceptualised within the ‘modern take attitude/mental-disposition/care–and–episteme’ as of its \(^{(3)}\text{procrypticism–or–disjointedness-as-of-}\) reference-of-thought, instead of implying the ontologically-veridical ‘subverting of the modern take’ by its very own ‘postmodern \(^{(1)}\text{deprocrypticism–or–preempting—disjointedness-as-of-}\) reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ which prospectively represents the modern as preconverging-or-dementing –apriorising-psychologism while the postmodern is postconverging-or-dialectical-thinking\(^{(5)}\)–apriorising-psychologism; as the point of assertion of postmodern-thought as \(^{(1)}\text{deprocrypticism–or–preempting—disjointedness-as-of-}\) reference-of-thought is actually a point of prospective \(^{(5)}\text{de-mentation}\(\langle\text{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics}\rangle\). Of critical insight here is the fact that many postmodern authors like Foucault, Lyotard and Derrida adopted stances as of constructivism, relativism and deconstruction are rather ontologically-veridical
observations/remarks/‘constatations’ about the conception of social reality from their authentic analysis ‘without going further out-of-the-scope-of-ontological-veracity to ideologise constructivism, relativism and deconstruction beyond their implied ontologically-veridical observations/remarks/constatations’ as many of their critiques poorly misinterpret them; with the implications that their stances are open-ended and receptive to the elucidative justifications for their non-ideologised ontologically-veridical observations/remarks/‘constatations’ about the constructivism, relativism and deconstruction manifestation/conception of social reality. Thus the ontologically affirmatory position adopted herein as of the prospective ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of—reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ is not contradictory but rather complementing their positions as it rather reinterprets their observations/remarks/‘constations’ as of human limited-mentation-capacity prospective relative-ontological-completeness reference-of-thought causality as-to-projective-totalitative–implications–of-prospective–nonpresencing—for-explicating-ontological-contiguity; wherein for instance, for the recurrent-utter-uninstitutionalisation reference-of-thought ill-health is as of a attendant–ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity–lowest-level-reification perceptivity-as-of-bad-omen while for the positivism reference-of-thought ill-health is as of a perceptivity-as-of-full-disease-and-scientific-theory-construct-the-exclusive-cause-and-effect-conceptualisation. Basically, the ‘hitherto ontologically-flawed postmodern deprocrypticism–or–preempting—disjointedness-as-of—reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ in its relation with modernity wrongfully implied that it seeks the validation of modernity, and so as ridiculously as implying that budding-positivism/rational-empiricism should have sought for its validation from medieval-

Just as it was perceived as a fool’s errand by the Descartes, Galileos, Diderots, etc., to contemplate of genuine intellectual engagement between their budding-positivism/rational-empiricism ventures with traditional medieval scholasticism, especially with

of-thought-devolving’. However, at its uninstitutionalised-threshold the prospective ‘concurrent causality as-to-projective-totalitative-implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity’ as of the prospective institutionalisation’s basis of validation of knowledge grounded on the reference-of-thought-categorical-imperatives/axioms/registry-teleology, for-aposteriorising/logicising/deriving/intelligising/measuring-meaningfulness-and-teleology of the prospective institutionalisation’s totalising/circumscribing/delineating reference-of-thought-devolving’ will not necessarily meet with the approbation of the prior institutionalisation now construed as the uninstitutionalised-threshold, and so as of mutually beyond-the-consciousness-awareness-teleology <in-preconverging-existential-extrication-as-of-existential-unthought>. This has to do with the fact that the full-potency of existence that divulges relative ontological-vericality supersedes human-subpotency epistemising orientation towards its, and thus epistemic constructs as of human-subpotency construal are inevitably ad-hoc to ontological-veracity as of the full-potency of existence; as existence doesn’t adjust to human-subpotency with the reverse being true, equally it is human epistemic constructs that ad-hocly adjust to ontological-veracity as of prospective relative-ontological-completeness. Thus while the idea of ‘concurrent causality as-to-projective-totalitative-implications-of-prospective-nonpresencing-for-explicating-ontological-contiguity’ as the basis for the validation of knowledge is inherently ontologically veridical as of a given institutionalisation’s internal reference-of-thought-categorical-imperatives/axioms/registry-teleology, for-aposteriorising/logicising/deriving/intelligising/measuring-meaningfulness-and-teleology of its totalising/circumscribing/delineating reference-of-thought-devolving’, however, this is an overrated notion with regards to human social-stake-contention-or-confliction framework at its uninstitutionalised-threshold as

developing’, which should and cannot be ignored by any proponent of prospective de-mentative/structural/paradigmatic transcendental knowledge. Rather human social-stake-contention-or-confliction framework fundamentally subscribes to knowledge, given this paradox, as of ‘detour to social goodwill deferral-formalisation-transference to perceived overwhelming-relative-effectiveness’ induced as of a de-mentative/structural/paradigmatic transcendental knowledge ‘concurrent <amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective–nonpresencing,-for-explicating–ontological-contiguity’ establishing and upholding it. The idea here is that the inherent and direct notions of positivism/rational-empiricism expounded by the Galileos, Descartes, Diderots, Copernicuses, etc. were not the fundamental basis for the ultimate human social-stake-contention-or-confliction framework validation but rather their derived positive-opportunism—of-social-functioning-and-accordance75 that brought about the ‘detour to social goodwill deferral-formalisation-transference to perceived overwhelming-relative-effectiveness’ implied-by-and-deriving-from their notions of universal human rights and open society, technical advances, better social organisation, etc., then leading to a reasoning-from-results/afterthought institutionalisation and enculturation of such (re-originary–as-unenframed/unbeholdening/outlier-conceptualisation–⟨imbued-postconverging/dialectical-thinking –‘projective-insights’/epistemic-projection-in-conflatedness ‘of-notional–deprocrypticism-prospective-sublimation⟩) originary/event2 of-prospective-ontology-origination positivism/rational-empiricism thought. In other words, human dimensionality-of-sublimating –⟨<amplituding/formative>supererogatory–de-

We can appreciate this for instance in the case of cultural diffusion with respect to many a non-modern traditional social-setting where modern-day medicine however its overall ‘concurent <amplituding/formative–epistemicity>causality’ ~as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating–ontological-contiguity’ over other types of premodern medicine, will often be suspected and avoided as of its poorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, and it is only after it has been ‘socially habituated-as-institutionalised’ that it has the requisite ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This equally manifests as of prospective de-mentative/structural/paradigmatic transcendental knowledge construal, as implied for instance by postmodern-thought and particularly so as postmodern-thought has still been undergoing its full construction. The implication here is that all prospective transcendental 55 ‘meaningfulness-and-teleology’ superseding uninstitutionalised-threshold 102 do not come about as of simplistic continuity but rather as of epistemic-breaks/epistemic-resetting, involving successive ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’.
ontologically-flawed knowledge can be legitimately overlooked where such knowledge is implied as of priorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This latter cases arise with many a bogus social or natural science study and methodology grounded on the ‘mystifying imprimatur’ of positivistic science, as ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, but then on closer examination turns out to be poorly designed as well as the prevalence of institutional-be ing-and-craft suboptimal dispositions with regards to truly upholding the science ethos in many situations with regards to the ideal operation and promotion of scientific research; and so, as of human temporal-to-intemporal ontological-performance\(^{1}\)-<including-virtue-as-ontology> of any ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology\(\)\(\)-for-aposteriorising/logicising/deriving/intelligising/measuring–meaningfulness-and-teleology\(\)\(\)\(\).\(^{1}

Already, postmodern interpretations have increasingly been much more relevant practically to many subject-matter domains and activities, with even greater potential for transformative implications if fully acted upon. Furthermore, the ‘prospective/new postmodern depcrypticism–or–preempting—disjointedness-as-of- reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ warrants that postmodern-thought hitherto articulated beyond-the-consciousness-awareness-teleology\(\)\(\)-<in-preconverging-existential-extrication-as-of-existential-unthought>\(\)\(\) in terms–as-of-axiomatic-construct of the ‘modern take attitude/mental-disposition/care–and–episteme’, need to be translated-as-reconceptualised into its very own ‘postmodern depcrypticism–or–preempting—disjointedness-as-of- reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-

The fact is that organic-knowledge is fundamentally driven as of attitude/mental-disposition/care–and–episteme, wherein for instance Newtonian Physics as of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme’s organic-knowledge makes little sense and is of little potential if construed as of a medieval or animistic social-setup alchemic or mystical attitude/mental-disposition/care–and–episteme’s. In this regard, attitude/mental-disposition/care–and–episteme is fundamentally the apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument notional~confatedness as implied by its ‘assumed-and-unflinching transversality<for

apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ crossgenerational development, which is its very own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme, as of deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought is rather a notional~conflatedness as of deneuterising protensive-consciousness. The practical implications as well should be that meaningfulness and definitions often articulated about postmodern-thought that do not capture the postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme should be rejected; as the tendency for postmodern-thought to be misconstrued or perverted is not accidental, given the very fact that at its very core postmodern-thought is implying a prospective/new prospective relative-ontological-completeness -of-reference-of-thought requiring its own apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument. In this regard, central to translating-as-reconceptualising prior and new postmodern-thought as of its very own ‘postmodern deprocrypticism–or–preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ organic-knowledge is the requirement for an affirmative mental-reflex with postmodern-thought construed ‘as the appraisal and supplanting of ontologically flawed metanarratives and its pursuit for the most profound-and-complete objectivity of meaning, by renewing appraisal of intrinsic-reality/ontological-veridicality.

apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme is ‘relevant as the attitude/mental-disposition/care–and–episteme’ of wholly immersed-and-engrossed meaningfulness-and-teleology. The point being made here is that our natural inclination is never meant to truly-and-comprehensively reflect any prior/old/superseded or prospective/new/superseding attitude/mental-disposition/care–and–episteme by itself but rather in any such exercise always apriorises the ‘present attitude/mental-disposition/care–and–episteme’ and then reflect the other attitude/mental-disposition/care–and–episteme referred to posteriorly, and hence the latter is adhocly-and-scantily identified. We can grasp this insight about this natural inclination to uphold-as-apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument the ‘present attitude/mental-disposition/care–and–episteme’ from the fact that ‘originary contacts’ between two cultures of prospective relative-ontological-completeness-and-incompleteness-of-reference-of-thought doesn’t mean a wholly immersed-and-engrossed meaningfulness-and-teleology between the cultures, since their natural inclination is to both apriorise ‘their own present attitude/mental-disposition/care–and–episteme’ and respectively posteriorise the other culture attitude/mental-disposition/care–and–episteme as of their respectively apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument present
attitude/mental-disposition/care–and–episteme; and so, as the framework of any subsequent cultural diffusion metaphorically. Thus to fully grasp what is implied here ontologically by attitude/mental-disposition/care–and–episteme, beyond the natural inclination, is to understand that attitude/mental-disposition/care–and–episteme as ‘assumed-and-unflinching transversality<for-sublimating–existential-eventuating/denouement>–of-affirmative-and-unaffirmative–disambiguated–motif-and-apriorising/axiomatising/referencing’ implies a mental-projection exercise ‘reflecting-and-contemplating a wholly immersed-and-engrossed meaningfulness-and-teleology’ as of their given neuterising-as-of-prior-relative-ontologic-incompleteness-of–reference-of-thought if a ‘prior/old/superseded attitude/mental-disposition/care–and–episteme’ or deneuterising-as-of-prospective-relative-ontological-completeness–reference-of-thought if a ‘prospective/new/superseding attitude/mental-disposition/care–and–episteme’, whilst the ‘present attitude/mental-disposition/care–and–episteme’ is then rather ad hocly-and-scantily identified now as either deneuterising if it in relation to the prior/old/superseded or neuterising if it is in relation to the prospective/new/superseding. In other words, when it comes to registry-worldview/dimension implications, ontologically-veridical representation of attitude/mental-disposition/care–and–episteme means ‘to be or exist as of the given registry-worldview/dimension reference-of-thought’ rather than ‘to refer to it’; as the ‘referring to’ natural inclination is ontologically-flawed as it registers into the ‘present attitude/mental-disposition/care–and–episteme’ unlike the ‘to be or exist as’ approach which is ontologically-veridical but is not the natural inclination of representation as it overrides the ‘present attitude/mental-disposition/care–and–episteme’. ‘Postmodern deprocrypticism–or–preempting—disjointedness-as-of–reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care–and–episteme’ construed as of deprocrypticism–or–preempting—disjointedness-as-of–reference-of-thought is thus in its potentiation the very summum for the

which then implies its failure to apriorise the notion of a human temporal-to-intemporal nature at its
ontologically-veridical uninstitutionalised-threshold. Consequently, by assuming such a positivism/rational-empiricism transcendental outcome reasoning-from-results/afterthought predisposition as the complete basis for construing humankind existential emancipation, ‘the modern take attitude/mental-disposition/care–and–episteme’ adopts an ontologically-flawed ‘conception of human-subpotency existential scope’ that is construed essentially as-of untransvaluated–temporal-intemporality at its ontologically-veridical uninstitutionalised-threshold, as it doesn’t even and fails to recognise any such uninstitutionalised-threshold pointing to its prior relative-ontological-incompleteness reference-of-thought. Thus, the manifestations of temporality/shortness at its unrecognised ontologically-veridical uninstitutionalised-threshold are construed as aberrations/oddities going from this wrongly implied intemporal/longness-of-register-of–meaningfulness-and-teleology posture in <amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, rather than a recognition of it prior relative-ontological-incompleteness reference-of-thought, implying recognising its uninstitutionalised-threshold with the temporal-to-intemporal implications as of knowledge-notionalisation; thus providing the potency/empowering-consciousness for prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity, as knowledge-
notionalisation not only factors in conceptual sublimation knowledge dynamics but equally the
dynamics of the conceptual ignorances/desublimation to better skew meaningfulness-and-
teleology towards intemporal/longness as of organic-knowledge. The paradox here is that
by its ‘most realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of

and ad-hoc palliative resolution of a ‘modern take attitude/mental-disposition/care—and—
episteme’ very much inclined to aberrational/oddities conceptioning of such
temporality/shortness manifestations thus leading to their endemisation/enculturation from
‘ontologically-flawed and inevitability analyses’ conception. Thus a ‘modern take
attitude/mental-disposition/care—and—episteme’ is de-mentatively/structurally/paradigmatically
disempowered to address issues of its temporality/shortness as of the vices-and-
impediments at its uninstitutionalised-threshold. So because its amplituding/formative-

is ‘existentially invested’ in modern social-stake-contention-or-confliction framework of
meaningfulness-and-teleology as of procrypticism—or—disjointedness-as-of-reference-of-thought from where it derives its value-construct and value-reference, as it hardly countenances that prospective transcendental knowledge implied value-construct and value-reference is not meant to be of ‘idle’ relevance to the modern social-stake-contention-or-confliction framework but rather redeploy an altogether empowering perspective of prospective relative-ontological-completeness of reference-of-thought postmodern social-stake-contention-or-confliction framework of meaningfulness-and-teleology of value-construct and value-reference at the procrypticism uninstitutionalisation. Such prospective change as of de-mentation of (supererogatory—ontological—de-mentation-or—dialectical—de-mentation—stranding—or-attributive-dialectics) of attitude/mental-disposition/care—and—episteme can be appreciated retrospectively with respect to non-positivism/medievalism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme which from our modern take attitude/mental-disposition/care—and—episteme we rather construe as vague scholastic pedantic dogmatism with regards to budding-positivism/rational-empiricism, but then such a conclusion as of their non-positivism/medievalism habits and traditions is not necessarily obvious to the non-positivism/medievalism apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme. Ultimately, a notional—deprocrypticism coherent ‘postmodern deprocrypticism—or—preempting—disjointedness-as-of-reference-of-thought apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument attitude/mental-disposition/care—and—episteme’ is one that comes into terms—as-of-axiomatic-construct in conceiving of the implied prospective need for deneuterising—referentialism. But then with respect to the possibility of prospective human transcendence-and-

We can equally appreciate here that such a conception of transcendence-and-sublimity/sublimation/supernatural–de-mentativity is rather as of organic-knowledge and not mechanical knowledge, in the sense that what is critical is the induced apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity for prospective institutionalisation as of prospective causality–as-to-projective-totalitative–implications-of-prospective-nonpresencing–for-explicating-ontological-contiguity and not simply a mechanical
knowledge conception possibly tolerated as of a stale a posteriori adjunctiveness as with the Copernican heliocentric idea initially, needing a latter apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument metaphoricity\textsuperscript{57} reinvigoration as of the overall renewal of ‘the very same physics\textsuperscript{57} of totalising~devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. It should be noted that such metaphoricity\textsuperscript{57} rather points to psychoanalytic-unshackling/prospective-grounding/prospective-reification organic-knowledge nature of such prospective institutionalisation transcendental \textsuperscript{56}meaningfulness-and-teleology\textsuperscript{60}, which in its prospective relative-ontological-completeness\textsuperscript{83}-of- reference-of-thought is ‘the dimensionality-of-sublimating\textsuperscript{25} ⟨amplituding/formative–epistemicity⟩inventing’ of the prospective notion of ‘thinking/postconverging-or-dialectical-thinking\textsuperscript{57}–apriorising-psychologism’ as positivism/rational-empiricism thinking or notional–deprocryticism thinking respectively, and so as their successive prospective reasoning-from-results/afterthought. In both cases, such metaphoricity\textsuperscript{57} as of its reasoning-through/messianic-reasoning cannot be construed as grounded-as-intelligible on the superseded/transcended registry-worldview’s/dimension’s attitude/mental-disposition/care–and–episteme of medievalism–non-positivism or positivism/rational-empiricism manifestation of \textsuperscript{80}procrypticism–or–disjointedness-as-of-\textsuperscript{83} reference-of-thought, but rather as of its very own transcendental-enabling/sublimating/supererogatory–de-mentativity prospective institutionalisation attitude/mental-disposition/care–and–episteme of positivism or deprocryticism respectively. Thus such metaphoricity\textsuperscript{57} is rather induced as of the framework of prospective concurrent \langleamplituding/formative–epistemicity\ranglecausality–as-to-projective-totalititative–implications-of-prospective–nonpresencing–for-explicating-ontological–

Reasoning-through/messianic-reasoning metaphoricity\textsuperscript{77} brings about the prospectively renewed reasoning-from-results/afterthought instigating the secondnaturing of prospective institutionalisation, and so as of implied reference-of-thought/axiomatic-constructs reflection of the pre-eminence of the full-potency of existence as of prospective \textlt{amplituding/formative–epistemicity}\textsuperscript{causality}~as-to-projective-totalitative–implications-of-prospective–nonpresencing.–for-explicating-ontological-contiguity over human-subpotency with the latter adjusting to existence as-of-de-mentation\textlt{supererogatory–ontological–de-mentation-or-dialectical–de-mentation—stranding-or-attributive-dialectics} enabling its prospective relative-ontological-completeness\textsuperscript{82}.

is herein rather construed as wooden-language- or ontological-bad-faith/inauthenticity with respect to ‘mechanical practice’ of prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation.

In this regards, we can appreciate that all human ‘meaningfulness-and-teleology’ arises as of aestheticisation before converging towards ontologisation, just as rightfully implied by Nietzsche’s genealogy of morals, but this doesn’t imply valuelessness (as is often naively implied with Nietzschean thought) since aestheticisation convergence towards ontologisation leads to grander ontological-performance—including-virtue-as-ontology. In this regards, we can appreciate that while from our vantage modern perspective the ontological-veracity of the Egyptian cultural system aestheticisation behind the construction of the pyramids will seem inherently impertinent, but that specific human aestheticisation induced technical, scientific and mathematical innovations were of lateral civilisational ontological-pertinence; likewise we can appreciate that while for the atheist the ontological-veracity of religion is unproven, however various specific religions human aestheticisation in many ways relayed laterally the ontological-veracity of universalising-idealisation thinkers as of the relatively conducive social conditions allowing for the arrival of medieval thinkers who then instigated the possibility for modern-day science ontologisation; and besides, it can equally perfectly be claimed that even our modern-day positivistic civilisation is not beyond a critique of ‘deficient ontologisation’ as we can appreciate the reality of the human aestheticisation of many modern activities (even those associated with technological development) held as of higher
interest/worth which ontologisation value is questionable with respect to other possible activities of grander ontologisation but not necessarily held as of higher interest/worth (with the very worst case being media-driven merchandising associated with a generalised dumbing-down and de-intellectualisation increasingly and surreptitiously substituting for reifying intellectualism, increasingly undermining the citizenry capacity for democratic sovereign judgement). This analysis points to the convoluted relationship between human aestheticisation and ultimate ontologisation value. Rather than naïve and simplistic analysis, it is such an insight that better informs Heideggerian and Nietzschean thought with regards to ressentiment and leveling (as to wooden-language—{imbued—averaging-of-thought—\<as-to-leveling/ressentiment/closed-construct-of— meaningfulness-and-teleology— as-of—'nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications}>); pointing to the centrality of originariness-parrhesia,—as—spontaneity-of-aestheticisation as more critically about inducing the necessary human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation transformation towards prospective ontologisation rather than the mere critique of any given human aestheticisation as of its inherence, as the fact is all human aestheticisations including religion (which is often a target in modern times, however rightly so on many an occasion) are sub-ontological—<as-to-the-limitation-of-human-subpotency-in-its-reifying-and-empowering-reflexivity-of-the-full-potency-of-existence’s—sublimating—nascence> and the more salient point is in instigating their more profound ontologisation/ontological-veracity/aestheticisation-towards-ontology as of relative-ontological-incompleteness /relative-ontological-completeness’—{sublimating—referencing/registering/decisioning,—as-self-becoming/self-conflatedness /formative—supererogating—s/projective/reprojective—aestheticising-re-motif—and—re-apriorising/re-axiomatising/re-referencing,—in-perspective—ontological—

It is thus not odd that as of human emotional-involvement implications, Socratic-philosophers' universalising-idealisation and budding-positivists projected ‘meaningfulness-and-teleology’ infrastructure rather met initially with the antipathy of their underpinning-suprasocial-construct and ‘wooden-language’ (imbued—averaging-of-thought-as-to-leveling/ressentiment/closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable–void ’-with-regards-to-prospective-apriorising-implications) and specifically had to face up respectively with the value-construct conception of their temporal/sycophantic-sophistic presencing—absolutising-identitive-constitutedness ontologically-flawed disparateness-of-conceptualisation (unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity ’) whether with the Ancient-sophists or medieval-scholasticism pedants. We can further appreciate the critical impact of the universalising-idealisation ‘meaningfulness-and-teleology’ infrastructure of the Socratic-philosophers and their successors as providing the appropriate ‘meaningfulness-and-teleology’ infrastructure for the Roman Empire and subsequent religio-political developments unlike the case with say Ancient Egypt and Persia whose non-universalising sectarian cults perpetual ideological conflicts ultimately sapped their stability despite their technical advancement, and likewise Western enlightenment effectively arose as of the induced ‘meaningfulness-and-teleology’ infrastructure of budding-positivists, with perverted consequences like annihilation of Native Indians in the New World and the Transatlantic slavery rather arising as of their far-flung societies opportunistic activities distortive of budding-positivism ‘meaningfulness-and-teleology’ infrastructure as so-

In this respect, the reality in reflecting holographically-<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-institutionalisation-process points to changing ‘de-mentative/structural/paradigmatic marginal equity of social–value-construction’, so-construed as ‘expected equity of all individuals for social–value-construction’ and so rather as from the de-mentative/structural/paradigmatic reference basis of ‘priorly implied-and-justified inequity’ whether the latter is implied-and-justified as of talent, royalty, class, productivity, mere traditional and cultural practice justification, etc.; thus effectively reflecting the overall consequence of social–value-construction as the ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon/projection’. In this regards, social–value-construction arises from two levels; as of the inherent de-mentative/structural/paradigmatic implication of ‘outcome of privileged institutional end-purpose perspective/framing/reference/horizon/projection’ as of ‘priorly implied-and-justified inequity’ and this in conjugation then with the individual inherently appraisable social–value-construction as of ‘expected equity of all individuals for social–value-construction’. In this respect, we can appreciate that an autocrat is more capable of ‘displaying greater social–value-construction’ than an ordinary denizen by the former’s mere social–value-construction ‘priorly implied-and-justified inequity’ as of its status in the autocracy (however an autocrat’s apparent magnanimity on the basis of the prior perspective of the autocratic society will rather be
construed as of deficient value-construction as from a prospective perspective of causality as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity comparison to the overall social and virtue progress implications of a better accountable political system, while on the other hand individuals effectively advocating for such a prospective political system may be construed as of deficient value-construction in the prior autocracy), while modern-day social–value-construction ‘priorly implied-and-justified inequity’ arises as of politico-bureaucratic, talent, entrepreneurial, socio-historical, traditional and cultural practice justification, etc. implications (but is just as well subject to transvaluation analysis as of causality as-to-projective-totalitative-implications-of-prospective-nonpresencing,-for-explicating-ontological-contiguity, as it can perfectly be argued that the apparent magnanimity of plutocrats as of a capitalistic economic value-distributive system ‘excessively skewed towards final product/service/financial delivery as-of-first-come-near-monopoly and institutionally-skewed-possibility-for recurring wealth accumulation’ while excessively overlooking/devaluing the return to massive public externalities/external-resources contributions to economic production such as public education, human and social development, infrastructure, basic research, technological research, etc. rather speaks of deficient social–value-construction, especially as such a system ‘priorly implied-and-justified inequity’ as of its occlusive presencing—absolutising-identitive-constitutedness is geared towards propping special interests, warfare spending, anti-taxation, anti-immigration, trivial interest in global human development, co-opted media narrative, etc. as of a suboptimal social–value-construction). But this doesn’t cancel the fact that individuals throughout sublimating historiality/ontological-eventfulness/ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism'> notwithstanding any disadvantaged ‘priorly implied-and-justified inequity’ for social–value-construction,
intuitively cognisant of the pertinence of human transvaluation have elicited the underlying ontological-veracity/ontological-impertinence of their social-construct value-construction as of its supposedly coherent ontological-commitment to induce the transformation of the social-setup value-construction; such that at various critical times the more salient ‘priorly implied-and-justified inequity’ for social-value-construction had thus been basically intellectual-pertinence-as-of-ontological-veracity such that all other ‘priorly implied-and-justified inequity’ for social-value-construction have tended critically to ultimately be grounded on intellectual-pertinence-as-of-ontological-veracity whether of genuine or surreptitious justification. The more salient issue then for the knowledge-reification–gesturing of social–value-construction thus lies with its ‘priorly implied-and-justified inequity’ narrative(s) with respect to underlying knowledge-reifying transvaluation implications projection as being of most profound intellectual-pertinence-as-of-ontological-veracity. can be analysed-and-construed as imbued with occlusive collateral aspects of rather
nondescript/ignorable–void falsely implying 'the appropriate exhaustiveness of our rational-

aptly reflected upon by postmodern-thought. Such occlusive-collateral aspects take the form of
economic dysfunction and inequities as occlusively-collateral to economic ideologism, social
dysfunction and discriminations as occlusively-collateral to domineering and secluding social

global framework of competing politico-cultural values with individuals and societies rather
construed occlusively as collateral damages. Transvaluation analysis thus ensues from the

This then speaks to the fact that ‘human sovereignty and free-will is deflated going by the ontological-veracity of human <amplituding/formative–epistemicity>totalising~thrownness-in-existence’ as of ‘the specific human-subpotency implications as to overall reifying-and-empowering-reflexivity-of-ecstatic-existence-as-panintelligence —{imbued-and-{hermeneutically/reprojectively/supererogatingly/zeroingly}educing—’herein-specifically-relevant_human-subpotency’—epistemic-perspective-of-projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-referencing~conceptualisation}’; and so, as it applies to human knowledge-reification–gesturing—<in—prospective.psychologismic—apriorising/axiomatising/referencing—{of–attendant–ontological—contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflatedness—in—{preconverging—disentailment—by}—postconverging—entailment> and empowerment from such knowledge-reification–gesturing—<in—prospective.psychologismic—apriorising/axiomatising/referencing—{of–attendant–ontological—contiguity—educed—existentialising/contextualising/textualising-contiguity}—conflatedness—in—{preconverging—disentailment—by}—postconverging—entailment> within existence as this defines human ontological-performance—<including-virtue-as-ontology>
reflected as of constructiveness-of-ontological-performance and destructuring-threshold-{uninstitutionalised-threshold / presublimating–desublimating-decisionality}~of-ontological-performance~<including-virtue-as-ontology>. In this regards, the broader and more profound conception of human sovereignty and free-will as reflected by human <amplituding/formative–epistemicity>totalising~thrownness-in-existence is rather grounded in the reality that all humans come into existence as of an overall framework of Being-development/ontological-framework-expansion~as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology, institutional-development~as-to-social-function-development and living-development~as-to-personality-development within which the notion of human sovereignty and free-will then arises in the very first place; such that in many ways human sovereignty and free-will is collectively predicated to the social-setup social-functioning-and-accordance as of its implied supposedly coherent ontological-commitment~<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality>. Insightfully, the very essence of ‘overall existence phenomenal appraisal of meaningfulness-and-teleology’ as associated with philosophical aspects (beyond the our artificial subject-matter divisions referring to aspect where virtue, value, ontological principles and epistemic issues are of central concern) is one of interpretation given that the ordinary human-framework-of-experiential-existence is ‘a directly comprehensive and fulsome framework amenable to interpretation’ whereas ‘specific epiphenomenon–{in-the-overall-ecstatic-existence-supervening-conflicatedness } appraisal of meaningfulness-and-teleology’, especially as of their unordinary human-framework-of-experiential-existence like natural sciences while informed by ordinary human-framework-of-experiential-existence background/sense-of-things further require and accentuate their epiphenomenal manifestations (which are beyond ordinary human-framework-of-experiential-existence) with the devising of experimentations (as providing the prolongation for human interpretation capacity with respect to such epiphenomenal manifestations, as in reality even the natural sciences are fundamentally interpretative as ‘specifically aphoristic/cogent/pointed extensions of the underlying human philosophical interpretative disposition for knowledge-reification–gesturing-<in-
It is important to grasp here that mere experimentations, as often practised in many domains, that do not arise because of the veridical need to effectively accentuate epiphenomenal manifestations as of unordinary human-framework-of-experiential-existence but rather ‘on the vagueness and naivety that experimentations by themselves demonstrate profundness’ are ontologically-impertinent (in the sense that the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’ is the more critical basis for a profound knowledge-reification–gesturing-in-prospective_psychologismic~apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }—conflatedness -in-{preconverging-disentailment–by}–postconverging-entailment> interpretation than any such ad-hoc and simplistic experimentation vagueness and naivety); and in many ways this explains experimental delusions in many domains associated with poor reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation as to the misunderstanding that experimentation should focus on the very critical epiphenomenal manifestations that are not amenable to the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’. However, as of underlying human-subpotency sovereignty and free-will, what is definitely central to knowledge-reification–gesturing-in-prospective_psychologismic~apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }—conflatedness -in-{preconverging-disentailment–by}–postconverging-entailment> is that it is grounded on human empowering reflexivity from prospective knowledge as of ‘ecstatic-

We can garner for instance that there is and has never been any truly ‘\textit{presencing—absolutising-identitive-constitutedness} of the sciences as often wrongly implied by science ideologues, but that scientists across-the-times have allowed existence-potency\textsuperscript{13}\textsuperscript{,}\textsuperscript{39}\textsuperscript{,}\textsuperscript{79}\textsuperscript{,}\textsuperscript{14}\textsuperscript{,}\textsuperscript{92}\textsuperscript{,}\textsuperscript{115}\textsuperscript{,}\textsuperscript{99}—sublimating–nascence,-disclosed-from-prospective-epistemic-digression to manifest itself in determining \textit{<amplituding/formative–epistemicity>causality –as-to-projective- totalitative–implications-of-prospective- nonpresencing,-for-explicating-ontological- contiguity }; and so, as from the budding science of the days of Galileos and Copernicus, to Newtonian science, to Lavoisier laboratory science, to Einsteinian science to modern-day institutional practices of science, with all fundamentally driven not by any ‘purported science-
ideology’ but rather the practicality of results as of the constraint of the subject-domains of scientific study together with human limited-mentation-capacity-deepening implications in transforming the conceptualisation within any such specific subject-domains of scientific study as of their knowledge-reification–gesturing—prospective_psychologismic-apriorising/axiomatising/referencing—of-attendant_ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity—conflatedness—<in—preconverging-disentailment—by—postconverging-entailment>—rather than ‘any implied notion that naively supersede existence—as-the-absolute-a-priori-of-conceptualisation—and—existence—as-sublimating-withdrawal,—eliciting-of-prospective-supererogation—<as—to—perspective—ontological-normalcy/postconvergence-implied—prospective-aporeticism-overcoming/unovercoming’>. A further twist to such a poor conception of human sovereignty and free-will in the social arises as of an improper appraisal of the ‘implications of deferential-formalisation-transference as being dementatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’. The fact is human sovereignty and free-will is more critically about its ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’ rather than ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’. For instance, a plumber who draws up the costing for a plumbing job explaining to the customer what is advantageously entailed in a convincing manner (as of ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) as they fail to ensure that their professional assessment will truly resolve the technical issue (as they are just looking to contract the job) is not really advancing the sovereign choice of the customer compared to another plumber who undertakes a candid professional assessment that may not sound advantageous with the customer (as they are more critically interested in the ‘fulfilment as of
sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) but does solve the technical issue; as any such customer in a deferential-formalisation-transference situation will most likely agree. Such operation of human sovereignty and free-will, beyond more or less simplistic social situations as the case highlighted above, is supposedly implied in the operation of all human institutions as of their inherent deferential-formalisation-transference proxy nature; but in many ways such a notion of ‘implications of deferential-formalisation-transference as being de-mentatively/structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’ gets sunk with the increasing complexity and size of human institutions as to what such implications really are, and so especially as the idea of human sovereignty and free-will increasingly becomes abstracted and diffused in the overall social-construct and its institutions as so-associated with ‘the protraction of political and institutional performance, evaluation and accountability’ as reflective of human sovereignty and free-will. However, with regards to the latter as of social protraction of political and institutional action, the possibility of protracted human sovereignty and free-will while indirect comes to be increasingly associated with the sense of ‘equanimity/balance of institutions’ as to their expected ‘equanimity/balance of contending frameworks and policy frameworks as reflexive of socially-perceived commendation and disapprobation’, whether as garnered ‘politically from the equanimity/balance of competing policies and politics as from polling and/or polls trends’ and ‘professionally with the equanimity/balance of mainstream/conventional complementary professional policy-recommendations and professional practices’. The question about the effectiveness of such implied equanimity/balance as reflecting of human sovereignty and free-will is often raised critically with regards to political and institutional performance particularly during crises. In many ways, the systemic interrelatedness of large institutions as to their complementary end purposes and practices, renders such an assessment of implied equanimity/balance rather de-
mentative/structural/paradigmatic to the overall politico-institutional system itself; and particularly so as in many ways the possibility of readjustment is much more practically instigated politically especially as with public institutions the individual manifestation of sovereign choice is much more rigidly tied to political action unlike the relative ability for direct disengagement from private entities. However, the fundamental fact that human sovereignty and free-will is ever always a question of the ‘transverse relation of all humans sovereignty and free-will in society’ inherently implies the underlying possibility for the undermining of human sovereign choice as of inherent social differentiation. Beyond transvaluation implications as of the broader overall ‘expected equity of all individuals for social–value-construction’ in relative-ontological-incompleteness }/relative-ontological-completeness }{(sublimating–referencing/registering/decisioning,–as-self-becoming/self-conflatedness /formative–supererogating–<projective/reprojective—aestheticising-re-motif– and–re-apriorising/re-axiomatising/re-referencing,–in-perspective–ontological-normalcy/postconvergence) }<amplituding/formative–epistemicity>causality ~as-to-projective-totalitative–implications-of-prospective–nonpresencing,-for-explicating-ontological-contiguity in reflecting holographically–<conjugatively-and-transfusively> the ontological-contiguity”—of-the-human-institutionalisation-process}; going by the phronesis/practicality as of our positivism–procripticism occlusivity, the assessment of institutionally implied ’equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’, as advancing human sovereignty and free-will as of deferential-formalisation-transference implications, can be rather straightforward with regards to relatively compact/self-contained institutional functions and roles usually involved in direct public service delivery but it is much more difficult with spurious/supporting institutional functions and roles. We can appreciate in this regards that public scandals generally tend to arise out of public services and private services delivery
institutional frameworks as of their relatively compact/self-contained institutional functions and roles, and that issues of transparency rendering such assessment difficult generally arise with regards to underlying spurious/supporting/supervisory/regulatory institutional functions and roles. In another respect concerning the modern-day media, the need for relevant and balanced/equanimous communication and information delivery to the general public has increasingly been taking a backseat, and so fundamentally as the media becomes more of a business-making institution and rather plays a weaker and ancillary/perfunctory role in public policies and politics accountability. This is paradoxically reflected in the reality that despite the huge choice of media today, strangely enough this has rather been associated with greater public muddlement with regards to political stakes and public policies; undermining the political process as increasingly public policies are preconvergingly–dementated/structured/paradigmed to default/revert into the interests of powerful groups and corporations with the support of increasingly astute, surreptitious and media-savvy political and economic think-tanks, as their media underhandedness in many ways foil the possibility for credible and effective public interest debate as of the distractedness of media reflexive anchoring on a stale, traditional, simplistic and increasingly irrelevant age-old left and right political narrative (and its derived politics and policies narratives) poorly reflecting the sophistication of the electorate that ‘doesn’t live in left and right worlds but a realistic world in want for solutions’! Strangely enough, such a media environment is now laden with public gurus holding outlandish views increasingly given the forum for their opinions (presented as reified-knowledge) not only in marginal media but mainstream media as well out of all proportion with the social and/or relevant expertising academic/professional resonance of such ideas, and so as of the underlying pretence of freedom-of-speech; as the notion of freedom-of-speech is increasingly being portrayed rather as the rationalising foundation for all sorts of discreetly, whimsically/fancifully and strategically prejudiced influences on media orientation.
In this regards, the notion of freedom-of-speech as of such consequentially biased and disproportionate representation undermining ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’ (as thusly failing to advance human sovereignty and free-will as of deferential-formalisation-transference implications), is increasingly becoming the unbecoming/undoing of the modern-day democratic political process. Direct media surreptitious drumming-up of specific policy stances and political movements have often interfered with political governance as with the tea-party movement for instance; when considering how political orientations are ‘strategically advanced/framed’ in the media at critical moments for upholding favourable political policies or foiling unfavourable political policies while undermining sound analytic public debate. It is no small wonder that a public opinion increasingly exposed to such media-driven ‘subterfuges’, overlooking the age-old party politics narrative entrapment, has been turning to protest voting as an expression of political disdain. Furthermore, the idea of human sovereignty and free-will across all times is intimately tied down to human limited-mentation-capacity-deepening as to the ‘relative-ontological-incompleteness /relative-ontological-completeness as to human-and-social–expectations/anticipations—metaphoricity as-rede-mentating/restructuring/reparadigming—psychologism for knowledge-reification—gesturing—prospectivepsychologismic–apriorising/axiomatising/referencing—of–attendant–ontological–contiguity —educed–existentialising/contextualising/textualising-contiguity—conflatedness—in—{preconverging-disentailment—by}—postconverging-entailment> underlying sublimating “historiality/ontological-eventfulness”/ontological-aesthetic-tracing—perspective—

The reason why such a ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ supposedly pertinent argumentation about human sovereignty and free-will cannot hold is that all meaningfulness-and-teleology (as implied with the logical operation of any such projected ‘human social-vestedness/normativity implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’) operate on priorly established apriorising/axiomatising/referencing and inherently all apriorising/axiomatising/referencing purport to be as of attendant-ontological-contiguity -educed existentialising/contextualising/textualising-contiguity thus subject to analysis as of ‘relative-ontological-incompleteness/relative-ontological-completeness’ (sublimating-referencing/registering/decisioning—as-self-becoming/self-conflatedness /formative–supererogating-<projective/reprojective—aestheticising-re-motif—and–re-apriorising/re-axiomatising/re-referencing,—in-perspective—ontological-normalcy/postconvergence> as to human-and-social—expectations/anticipations—

Consider in this regards for instance as of the ‘presencing—absolutising-identitive-constitutedness notion of ‘human social-vestedness/normativity—discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social—value-construction’ underlying slavery, such an implied ‘human social-vestedness/normativity—discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social—value-construction’ is inherently making a claim on existential-reality which rather more aptly reflect a manifestation of power-grabbing/appropriating/usurpatory/arrogating implications as of its apriorising/axiomatising/referencing that one human being has the right to own another human being (as actually not even the logical-dueness of such a ‘human social-vestedness/normativity—discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social—value-construction’ argumentation can arise from the perspective of relative-ontological-completeness as what is then implied from the relative-ontological-completeness perspective is the supererogatory—acuity/perspicacity/astuteness/edginess/incisiveness—of-apriorising/axiomatising/referencing/intelligibility/setup/measuringinstrument—for—conceptualisation in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitable-measuringinstrument-invalidating-measuring—as-to-preconverging-or—dementing—apriorising-psychologism> of any such implied slavery ‘human social—

this is priorly ‘a power-grabbing/appropriating/usurpatory/arrogating implications of

for instance the Haitian slave revolters wouldn’t countenance the logical-dueness of any such

not truly escape the ontological prism as of existence being the absolute a priori, and rather

‘human-subpotency potential to epistemically converge to the full-potency of existence’; and
this underlying structure of reflexivity is the very structure in reflecting holographically-
<conjugatively-and-transfusively> the ontological-contiguity—of-the-human-

infrastructure-of–meaningfulness-and-teleology , institutional-development–as-to-social-
function-development and living-development–as-to-personality-development. The implication
here is that all human knowledge is necessarily for-human-studies/for-human-constructs
whether with regards to the social or the natural sciences; as to the fact that all such knowledge
is ever only referenced/registered/decisioned in the human consciousness (individual consciousness and collective consciousness respectively as to direct knowledge and indirect knowledge as of deferential-formalisation-transference implications) and functions to broaden-the-latitude-of-human-collective-consciousness with regards to human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in existence. The very possibility for prospective human knowledge generation thus calls for human dimensionality-of-sublimating ~ {<amplituding/formative> supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation} given the reality of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued–‘notional–firstnaturedness—temporal-to-intemporal-dispositions—<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’–existentialism-form-factor, with such human dimensionality-of-sublimating ~ {<amplituding/formative> supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation} speaking of true humanity projection for prospective secondnaturing institutionalisation (that goes on to broaden-the-latitude-of-human-collective-consciousness), and so over the wrongfully elicited self-satisfaction of sophistic/pedantic presencing—absolutising-identitive-constitutedness in preconverging existential-extrication-as-of-existential-unthought failing to address the universal implications of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint. This underlying human knowledge-notionalisation is what speaks of the distinction between the physician and quack-doctor, the technician/engineer and the scammer, the intellectual and the sophist, etc. Critically, the former as involved in prospective originariness/reifying/intellectualising—idealising/transcending/sublimating–meaningfulness–

In the bigger picture, this speaks to a human socially expanded framework of deferential-formalisation-transference as to various cultivated skills/arts and time investment with their knowledge deferential-formalisation-transference validation as of the supposedly coherent ontological-commitment \( ^{5} \langle \text{implied—self-assuredness-of-ontological-good-faith/authenticity \sim postconverging—dementating/structuring/paradigming —as-being-as-of-existential-reality} \rangle \); and implying a greatly expanded human collective consciousness as of differing for-human-studies/for-human-constructs of originariness/reifying/intellectualising—idealising/transcending/sublimating—meaningfulness-and-its-institutionalisation. On the other hand, what is typical about quack-doctors, scammers, sophists, etc. with regards to prospective human-subpotency—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint is a predilection for eliciting the idea that ‘human temporality’/shortness \( \langle \text{amplituding/formative} \rangle \) wooden-language-\( \langle \text{imbued—averaging-of-thought—leveling/ressentiment/closed-construct-of—meaningfulness-and-teleology} \rangle \) as-of-\( \langle \text{'nondescript/ignorable—void '—with-regards-to-prospective-apriorising-implications} \rangle \) is basically of competent judgment (notwithstanding the latter’s underlying banal framework as to
causality of-underlying-phenomena'. This very fact is defining as without the latter there wouldn’t be any human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in the very first place; and this very much explains the defining relevance of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued ‘notional–firstnatures—temporal-to-intemporal-dispositions’<so-construed-as-from-perspective–ontological-normalcy/postconvergence>’—existentialism-form-factor, as to the possibility for genuine human reification and emancipation to broaden-the-latitude-of-human-collective-consciousness or disenfranchising falsehoods. The taxingness-of-originariness (as to the direct relation between human-subpotency and existence-potency ~sublimating–nascence,-disclosed-from-prospective-epistemic-digression) is effectively what underlies human institutional paralysis and social-vestedness/normativity<-discretely-implied-functionalism> as well as the possibility for prospective human construction-of-the-Self in the face of increasingly technically aloof/remote and racing technological, organisational and social transformation; such that the requisite human thoughtfulness that can correspondingly broaden-the-latitude-of-human-collective-consciousness is increasingly out of the loop as humankind in the modern positivism age has increasingly become rather a self-subjugating agent to such transformations as to their lopsided material/equipment/accoutrement sublimation implications with the notion of human consciousness sublimation increasingly passivised and blanked to vested social-and-institutional-frameworks-of—referencing/registering/decisioning actions. But then humankind faces the challenge of contemplatively articulating meaningfulness-and-teleology capable of reinventing/recreating and keeping the human at the driver seat rather than an object of unformulated/unthought-of driven existential emergence/becoming as of lopsided
material/equipment/accoutrement sublimation over a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by that lopsided material/equipment/accoutrement sublimation) as human consciousness is in want of its very own corresponding sublimation as to redefining the possibilities/potential for prospective humanity that can further broaden-the-latitude-of-human-collective-consciousness. Such ‘dreary blankness of consciousness’ (beyond-the-consciousness-awareness-teleology<in-preconverging-existential-extrication-as-of-existential-unthought>) is predicated upon and drags along the shiftiness-of-the-Self as from prior human stake-contention-or-confliction conceptualisation in a psychological entrapment of defining naiveties and complexes (so-construed in presencing—absolutising-identitive-constitutedness as historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition), and so towards humankind’s supposed future (as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology, institutional-development—as-to-social-function-development and living-development—as-to-personality-development); and in many ways this historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition has already been stifling/stalling the huma prospective potential as from the ontological-normalcy/postconvergence perspective conception of future historiciality/ontological-eventfulness/ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected—epistemicity-relativism-determinism> relevant to deprocrypticism—or—preempting—disjointedness—as-of—reference-of-thought. Such historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition is fundamentally defined by a certain enduring reproducibility passivity and blankness of human social processes, wary of the implications of prospective renewal possibilities as the psychological entrapment constraints of historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition override prospective originaliness-parrhesia,–as—spontaneity-of-aestheticisation
institutional social-vestedness/normativity for instance like in many ways the practice in modern-day scholarship (especially when poorly constrained to existence-potency ~sublimating–nascence,-disclosed-from-prospective-epistemic-digression) is bound to ‘make its own weather’ rather as from human-subpotency temporality~/shortness; wherein ‘invested’ institutional and theoretical/conceptual postures take on an essence all of their own, and so independently and overlooking the precedence of existential-reality for the possibility for prospective sublimation and knowledge-reification–gesturing-<in-prospective_psychologismic~apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }—conflatedness -in-{preconverging-disentailment–by}–postconverging-entailment> and failing to ‘effectively re-stake/put-back-at-stake in re-originariness/re-origination the capacity of human ontological-performance -<including-virtue-as-ontology> in a renewing originariness-parrhesia,–as–spontaneity-of-aestheticisation’ over already set/established/determining prior reproducibility—mathesis/motif/thrownness-disposition,–as–reproducibility-of-aestheticisation, and so failing to be responsive to the fact that human limited-mentation-capacity-deepening rather invokes prospective dimensionality-of-sublimating →{<amplituding/formative>supererogatory–de-mentativeness/epistemic-growth-or-conflatedness /transvaluative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation} for re-originariness/re-origination (and as ever always such destructuring-threshold-{uninstitutionalised-threshold /presublimating–desublimating-decisionality}–of-ontological-performance -<including-virtue-as-ontology> across the <cumulating/recomposuring–attendant-ontological-contiguity >–successive registry-worldviews/dimensions abuse of the idea of being at the backend of human institutional-cumulation/institutional-recomposure-{as-to– historiality/ontological-eventfulness /ontological-aesthetic-tracing–<perspective–ontological-
expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology, institutional-development–as-to-social-function-development and living-development–as-to-personality-development) as to the relation with human lopsided material/equipment/accoutrement sublimation, as such a consciousness increasingly adopts a desublimation/gimmickiness rather than its very own sublimation in tandem with material/equipment/accoutrement sublimation. This is reflected with the increasing remoteness/alooﬁness and alienation of the generalised human subject from such material/equipment/accoutrement sublimation captured under abstract institutional frameworks of stewardship expecting a ‘dreary blankness of consciousness’ (rather functioning to be attended-to and accommodated/unaccommodated by the lopsided material/equipment/accoutrement sublimation) in order to maximise passive enculturation and merchandising as of ‘presencing—absolutising-identitive-constitutedness—of—meaningfulness-and-teleology’ given ‘historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition’. Thus, the possibility for the generalised human subject capacity for consciousness sublimation is seized up and constrained in such socially and institutionally bureaucratising and deterministic frameworks that now de-mentatively/structurally/paradigmatically determine the possibilities of human consciousness sublimation as to their abstracted deﬁning conception of human stake-contention-or-conﬂiction (as of Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology, institutional-development–as-to-social-function-development and living-development–as-to-personality-development) such that the generalised human subject re-originariness/re-origination sublimation imaginary possibilities are already truncated as from prospective ontological-normalcy/postconvergence epistemic-or-notional—projective-perspective of re-originariness/re-origination as implied with prospective deprocrypticism—or—preempting—disjointedness—as-of—reference-of-thought.
Today, many agile initiatives allowing more or less for the expression of the human subject imaginary and so specifically with start-up entrepreneurship increasingly highlight that in many ways traditional social-and-institutional-frameworks-of—referencing/registering/decisioning are suboptimal conceptualisations of human consciousness sublimation possibilities as to their thoroughgoing beholdenness to \(^7\)presencing—absolutising-identitive-constitutedness \(-of-\) \(^{25}\)meaningfulness-and-teleology\(^{10}\) given \(^4\)historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition’ bounded to prospective thresholds of passivity and blanking of human consciousness sublimation possibilities. In many ways because of poor appreciation of the ‘direct bilateral relationship of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness \(^{56}\)meaningfulness-and-teleology\(^{19}\)’ the modern mindset has tended to construe of its lopsided material/equipment/accoutrement sublimation implications naively as implying the comprehensive fulfilment of human potential with poor appreciation/sense that effectively as reflected with prior registry-worldviews/dimensions, the proximity of technology then never implied as today a generalised human consciousness passivity and blankness to the point of relative desublimation/gimmickiness over sublimation (beyond-the-consciousness-awareness-teleology \(-<in-preconverging-existential-extrication-as-of-existential-unthought>\) ); and so as potently contended by Baudrillard simulacrum conception wherein gimmicky formulaic representations of overall aestheticisation—and—aestheticisation-towards-ontology increasingly substitute for more profound possibilities of human aestheticisation—and—aestheticisation-towards-ontology as \(^{39}\)meaningfulness-and-teleology\(^{19}\) with respect to the potential for prospective human consciousness sublimation as of a totalising-entailing projection of dispensing-with-immediacy-for-relative-ontological-completeness\(^{25}\)-by-reification/contemplative-distension\(^{27}\). Whereas historically the technological accessibility and proximity to the generalised human consciousness of such events \(^8\) like the invention of metal
implements, the plough, writing, the printing press, etc. provided more profound possibilities for human consciousness sublimation in re-orginariness/re-origination, beyond mere lopsided technological as of lopsided material/equipment/accoutrement sublimation in the framework of ‘a 79 presencing—absolutising-identitive-constitutedness 14—of—meaningfulness-and-teleology 99 given historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition’ that passivises and blanks thus undermining/stifling the possibility for prospective 1 historiality/ontological-eventfulness /ontological-aesthetic-tracing—perspective—ontological-normalcy/postconvergence-reflected—epistemicity-relativism-determinism’. While a traditional conception of human sublimating-over-desublimating social-and-institutional-constructs—of—meaningfulness-and-teleology—in-cumulation/recomposuring is often articulated as resting on ‘human social-vestedness/normativity—discursively-implied-functionalism’ implied contract/political-arrangement-or-political-coercion/given-discrete-social—value-construction’ 79 presencing—absolutising-identitive-constitutedness 14 apriorising/axiomatising/referencing—conceptualisation perspective thus supposedly rendering irrelevant their analysis as of inherent ontological-veracity (as to supposedly coherent ontological-commitment—self-assuredness-of-ontological-good-faith/authenticity ~postconverging—de-mentating/structuring/paradigming—as-being-as-of-existential-reality) with regards to the ‘full-conflatedness 13 of apriorising/axiomatising/referencing—conceptualisation as to existence-potency ~sublimating—nascence,—disclosed—from-prospective-epistemic-digression), but rather tending to a construal as of ‘inherent prior aestheticisation—and—aestheticisation-towards-ontology as of human social-vestedness/normativity—discursively-implied-functionalism’; such a traditional conception from the relative-ontological-completeness perspective is actually unfounded and rather speaks to prior relative-ontological-incompleteness manifestation of human 7 presencing—absolutising-identitive-constitutedness 14 (as to historicity-tracing—in-presencing—

Its defining question is whether and how can the human reconstrue meaningfulness-and-teleology in re-originariness/re-origination beyond its trailing/dragging foregone aestheticised meaningfulness-and-teleology construal? This limitativeness of historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition is fundamentally an issue of human psychological entrapment ‘defining naiveties and complexes’ as to human shiftiness-of-the-Self as of its presencing—absolutising-identitive-constitutedness (construable abstractly as fundamentally subpar to human effectuation potential but for the fact that the psychological entrapment is a paradoxical circular constituent of the human as to its ‘notionally—collateralising-beholdening-protohumanity by sublimating-humanity existentialism-form-factor’). Human presencing—absolutising-identitive-constitutedness as the very seeding disposition for historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition is ever always characterised by its immediacy-reactive-criticality (over panoramic-sublimating-criticality) as to its constraining aestheticisation—and—aestheticisation-towards-ontology framework; such that the propensity for human meaningfulness-and-teleology to be instigated (as to human limited-mentation-capacity-deepening before any construable human panoramic-sublimating-criticality outcome of meaningfulness-and-teleology) has ever always been bound to take ‘a notionally-collateralising inclination detour of aestheticisation—

hyperrealisation/hyperreal-transposition with regards to the prospect of positivism/rational-empiricism aestheticisation—and—aestheticisation-towards-ontology as meaningfulness-and-teleology. Likewise, this insight can be extended in reflecting the historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition of ‘an engrained traditional non-universalising conceptualisation of the world’ incapable/could-not-bring-itself to mentally process the implications of the nascent universalising-idealisation attitude/mental-disposition/care—and—episteme implied by the Socratic-philosophers as to its apriorising/axiomatising/referencing—psychologism (as of psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring) induced crossgenerational transformation. In both instances it speaks to an underlying apriorising/axiomatising/referencing—psychologism ‘wanting of human consciousness sublimation’ to effectively come to terms with ‘manifest existence-potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression in epistemic apriorising/axiomatising/referencing—{of-attendant—ontological-contiguity—educed—existentialising/contextualising/textualising-contiguity—}—conflatedness—in—{preconverging—disentailment—by)—postconverging—entailment’, thus inducing its notional-discontiguity/epistemic-discontiguity—{shallow—supererogation—of—mentally—aestheticised—preconverging/dementing—{qualia-schema} as to the fact that notional-contiguity/epistemic-contiguity—{profound—supererogation—of—mentally—aestheticised—postconverging/dialectical-thinking—{qualia-schema} is now implied prospectively as of prospective relative-ontological-completeness as from the ontological-normalcy/postconvergence epistemic-or-notional—projective-perspective. Thus in the bigger picture, Baudrillard’s conception of hyperreality (as implied with respect to our present lopsided technological as of lopsided material/equipment/accoutrement sublimation) speaks to the underlying apriorising/axiomatising/referencing—psychologism ‘wanting of human

In this regards, ‘human instigated ‘meaningfulness-and-teleology ontological-performance’—<including-virtue-as-ontology—capacity’ (so-construed as from the ontological-normalcy/postconvergence epistemic projective-perspective) is rather practically ‘a <amplituding/formative—epistemicity>totalising/circumscribing/delineating signposting exercise’ operating on the overall basis of the ‘social-construct <amplituding/formative—epistemicity>totalising/circumscribing/delineating given prior-institutionalisation-threshold—by—prospective-uninstitutionalised-threshold imbued secondnatured reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation’ when it comes to social-stake-contention-or-confliction, and so overriding all presencing—absolutising-

This reflects the reality that the transcendental ‘meaningfulness-and-teleology of prospective base-institutionalisation, universalisation, positivism/rational-empiricism and depocrypticism—or—preempting—disjointedness-as-of—reference-of-thought respectively are effectively only marginally integratable respectively to prior recurrent-utter-

But then the giveaway of such a flawed conception of science/ontology lies in the fact that such approaches do not project any ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ as all pretences of science/ontology must demonstrate and aspire to (consider in this regards the ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ of physics, chemistry, biological, genetic theories as to the ontological-contiguity imbued foregrounding entailment of their respective inherent sublimating phenomenal/manifest–subpotencies wherein for instance with the physics frame–of–ontological-contiguity succession of theories are developed aspiring cogently for ontological-contiguity of the whole physics epistemic-conception phenomenal/manifest–subpotency (as from say Galilean/Cartesian/Newtonian/Leibnizian physics to modern-day string-theory/loop-quantum-gravity/etc. which all profess ontological-contiguity). In other words, such biological/neurological and evolutionary substitutive/reductionist interpretations of the social and socio-psychological shouldn’t epistemically be selective in totalisingly-
disentailing—discretion/whim-of-thought (if truly of science/ontology as to ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity ’) but should rather go on to effectively explain away the entire social and socio-psychological phenomenal/manifest-subpotencies—{in-transitive-conflatedness —reflexivity,—in-the-full-potency-of-existence’s—sublimating—nascence} (as to human Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of— meaningfulness-and-teleology , institutional-development—as-to-social-function-development and living-development—as-to-personality-development), and so comprehensively articulating human organisational and institutional driven/potent sociocultural, economic, political, legal, etc. manifestations on such biological/neurological and evolutionary substitutive/reductionist basis of supposed sublimation as to their ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating attendant—ontological-contiguity ’—educed—existentialising/contextualising/textualising-contiguity”

The reality of such biological/neurological and evolutionary substitutive/reductionist interpretations of the social and socio-psychological is rather one that points out that the ‘traditional nature versus nurture debate itself is fundamentally an axiomatically bankrupt conception’ since ‘not even such proponents implicitly point to an underlying human drivenness and functioning of the social and socio-psychological framework on the basis of any such supposed ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ of biological/neurological and evolutionary

Such flawed and surreptitious representation that biological/neurological and evolutionary substitutive/reductionist interpretations are the ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity\textsuperscript{\textdegree}’ of the social and socio-psychological (rather than the truly inherent social and socio-psychological epistemic-conception phenomenal/manifest–subpotencies\textsuperscript{\textdegree}(in-transitive-conflatedness –reflexivity,–in-the-full-potency-of-existence’s–sublimating–nascence\textsuperscript{\textdegree}) as of their ‘<amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity\textsuperscript{\textdegree}>’ in effect wrongly implies a dialogical-equivalence\textsuperscript{\textdegree}<as-to-psychologismic–apriorising/axiomatising/referencing–{of-attendant–ontological-contiguity –reduced–existentialising/contextualising/textualising-contiguity }—conflatedness–in–{preconverging-disentailment–by}–postconverging-entailment,–in-self-becoming/self-conflatedness /formative–supererogating\textsuperscript{\textdegree} ‘nature versus nurture debate’ between these two

Such claims often project/imply that analysing the social qua social is just about irrelevant (or paradoxically ‘make their very own subterfuge social interpretations’ as from the psychological trick/gimmick of the projected hollow impressiveness of the natural sciences so-derived from the clout of a natural science without demonstrating the epistemic-veracity for such a bypassing/dodgery as to arrive at the social ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ sublimating implications and consequences). Besides, such claims are often so-associated with vague non-metaphysical as non-ontological conceptualisations of the social in vague disparateness-of-conceptualisation-unforegrounding-disentailment,-failing-to-reflect-'immanent-ontological-contiguity' as to elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside—attendant–ontological-contiguity–educed–existentialising/contextualising/textualising-contiguity", and thus in many ways further undermine/distract-from the social ‘amplituding/formative–epistemicity>totalising/circumscribing/delineating necessitation frame–of–ontological-contiguity’ conception of human-subpotency–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint in dealing with direct social and institutional

A ‘purist science/ontology epistemic-conception of veracity/truth’ equally differs from the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity’ implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ with the former construing of ‘knowledge as to existential knowledge-reification–gesturing–in-prospective.psychologismic–apriorising axiomatising referencing–{of-attendant–ontological–contiguity –educed–existentialising/contextualising/textualising-contiguity }— conflatedness—in-[preconverging-disentailment-by]–postconverging-entailment> privileging manifest sublimating outcome in existence’ in contrast to the latter construing of ‘knowledge as to collective acquiescence as to the privileging of human commendation-or-agreementing/convincing-among-mortals (rather than a detour to existence-potency—the-sublimating–nascence,-disclosed-from-prospective-epistemic-digression) even over manifest sublimating outcome in existence’. Such a ‘purist science/ontology epistemic-conception of veracity/truth’ construes of knowledge as a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ (as involved in the reconceptualisation of the physics state-of-the-art from Einsteinian physics, Bohrian physics, Feynmanian physics, etc., emphasising rather ‘the constancy of the intemporal individuation as from the ontological-normalcy/postconvergence perspective’ and ‘not about the constancy of any notion of intemporal individual’). Such a ‘perpetual off-balance act associated with human limited-mentation-capacity-deepening’ speak to the more profound reality that the ordinariness of human thought across the succession of human registry-worldviews/dimensions points to their ‘epistemic-abnormalcy/preconvergence’ despite the delusion of all registry-worldviews/dimensions in their presencing—absolutising-identitive-constitutedness as being of ‘absolute epistemic-normalcy’; and it is because of this latter fact (as from the ontological-
latter insight is critical for all prospective human sublimation as ‘a false sense of a categorically/absolutely sublimated social-construct ordinariness/commensicality and social-vestedness/normativity-<discretely-implied-functionalism>’ effectively renders any prospective human emancipation and construction-of-the-Self pointless-and-contradictory; as to the fact that even such advocates turn out to be incoherently muted-and-muddled with regards to such an argument about ‘a false sense of a categorically/absolutely sublimated social-construct ordinariness/commensicality and social-vestedness/normativity-<discretely-implied-functionalism>’, revealing their true motives rather as status quo preserving with regards to social-stake-contention-or-confliction (beyond-the-consciousness-awareness-teleology/<in-preconverging-existential-extrication-as-of-existential-unthought>). The ‘purist science/ontology epistemic-conception of veracity/truth’ is ever always about the ‘prospective upholding of existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression and de-mentatively/structurally/paradigmatically so-explains the very possibility for human progress. In contrast the conception of veracity/truth as from the latitude of ‘human social-vestedness/normativity-<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social-value-construction’ is rather more bent upon emphasising human-subpotency methodologising/mutualising/organising/institutionalising grounds for veracity/truth rather than eliciting prospective sublimating existence’s necessitating implications and consequences. Such notions of veracity/truth without articulating existence-potency~sublimating–nascence,-disclosed-from-prospective-epistemic-digression are vague disparateness-of-conceptualisation<unforegrounding-disentailment,-failing-to-reflect-‘immanent-ontological-contiguity ’>, and worse still when accompanied by claims of humility as to inherent institutionalised prescience are more often than not mere manifestations of intellectual entitlement; (as to imply the society is inherently beholden to the mere institutionalised imprimatur of intellecction even as to when it

Interestingly, the ‘purist science/ontology epistemic-conception of veracity/truth’ projects
prospective sublimating existence’s necessitating implications and consequences to implicitly
underscore ‘interlocutory humility’ induced as to existence-potency—sublimating–nascence,—
disclosed-from-prospective-epistemic-digression; as to the fact that humility was rather imbued

Ultimately, there is a ‘social underlying sublimating intellection proficiency’ to which all specific domains of study need to account for their sublimating pertinence; and the possibility of putting into question all ‘Establishment intellection as of their given presencing—absolutising-identitive-constitutedness’ (from across the most ancient civilisations to modern times and so as instigated by the Socrates, Galileos, Descartes, Diderots, etc.) has always arisen within-or-without such epochal Establishment intellection by the prompting of their ‘social underlying sublimating intellection proficiency’ which contemplative consciousness is not to be underestimated as to a ‘decadence posturing of intellectual entitlement’. Critically, the possibility of prospective value-construction and pretence of projecting more profound value is indissociable from the capacity of producing the relative-ontological-completeness knowledge that broaden-the-latitude-of-human-collective-consciousness as to the fact that just as prior recurrent-utter-uninstitutionalisation, unununiversalisation, non-positivism/medievalism and procrypticism–or–disjointedness-as-of reference-of-thought respectively are intellectually-and-morally wanting with respect to prospective base-institutionalisation, universalisation, positivism/rational-empiricism and deprocrypticism–or–preempting—disjointedness-as-of reference-of-thought value-construction respectively; pretences of profound intellection as to the former are nothing but sophistic/pedantic exploitations of human limited-mentation-capacity as to ‘a delusion of
generating knowledge and value from thin air’, and of vital importance in that regards is the fact that that which is in relative-ontological-completeness has to occupy the intellectual-and-moral ground imbued by such relative-ontological-completeness. Vague notions of arrogance and wretchedness are nothing but the ontological-veracity of the state of relative-ontological-incompleteness arrogation and wretchedness of thought (as from the ontological-normalcy/postconvergence epistemic-or-notional-projective-perspective) as to an epistemically-decadent wooden-language-imbued—temporal–mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing narratives—of-the—reference-of-thought—categorical-imperatives/axioms/registry-teleology}; and so as to the fact that the magnanimity of dispensing-with-immediacy-for-relative-ontological-completeness by-reification/contemplative-distension out of concern about huma prospective Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology ‘is the most important human and humanity-producing enterprise’ notwithstanding the paradox that the prior recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism—or—disjointedness-as-of—reference-of-thought respectively are intellectually-and-morally undeveloped to be the framework for appraising value-construction as of prospective base-institutionalisation, universalisation, positivism/rational-empiricism and deprocrypticism—or—preempting—disjointedness-as-of—reference-of-thought respectively in many ways explaining the underlying implications of human registry-worldview’s/dimension’s institutionalisation as involving crossgenerational psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring. This affirmation is not articulated idly as to the fact that part and parcel of human knowledge-reification—gesturing—in—prospective_psychoanalytic—apriorising/axiomatising/referencing—{of-attendant—ontological-contiguity—educated—existentialising/contextualising/textualising-contiguity}

There is simply no knowledge without the effective demonstrated knowledge-reification–gesturing-\in\text{prospective\_psychologismic\-apriorising/axiomatising/referencing-\{of\-attendant\-ontological\-contiguity\-educed\-existentialising/contextualising/textualising-contiguity\}}\text{--} conflatedness -in-[preconverging-disentailment-by]-postconverging-entailment> implications and pretending otherwise as to ‘virtual wisdoms’ is nothing more than \text{amplituding/formative-epistemicity}>totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’. Hence basically the overall differentiation between ‘purist science/ontology epistemic-conception of veracity/truth’ and ‘social-vestedness/normativity-\text{discretely-implied-functionalism}> epistemic-conception of veracity/truth’ lies with their constraining whether towards inherent existence projected implications or towards human-subpotency projected
implications respectively. This underlying point has de-mentative/structural/paradigmatic implications with regards to human meaningfulness-and-teleology (as to human Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology, institutional-development–as-to-social-function-development and living-development–as-to-personality-development). This differentiation can be rearticulated in aestheticisation terms to imply that existence (as to existence-potency ~sublimating–nascent, disclosed-from-prospective-epistemic-digression) is ‘the scalar conception that enables prospective human sublimation as of aestheticisation-towards-ontology’ while on the other hand human-subpotency (as to human presencing—absolutising-identitive-constitutedness <amplituding/formative–epistemicity> totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag) is ‘a non-scalar conception that induces prospective human desublimation aestheticisation’. The ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ as such is reflected with regards to prospectively implied ontological-normalcy/postconvergence construed as of maximalising-recomposuring-for-relative-ontological-completeness —unenframed-conceptualisation epistemic-projection perspective while ‘human-subpotency non-scalarity/beholdening-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ is reflected with regards to its prospectively implied epistemic-abnormalcy/preconvergence construed as of incrementalism-in-relative-ontological-incompleteness —enframed-conceptualisation epistemic-projection perspective. Basically, ‘scalarity/immanency of existence’s ontological-normalcy/postconvergence’ and ‘human-subpotency non-scalarity/beholdening-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ thus speak to the fact that huma prospective transcendence-and-sublimity/sublimation/supererogatory-de-mentativity implied limited-mentation-capacity-

This insightful grasp of the implications of human limited-mentation-capacity-deepening\textsuperscript{53} (construed as from ontological-normalcy/postconvergence epistemic-projection perspective): ‘as rather occurring as from an ontologically deficient grounding’ of relative human limited-mentation-capacity (however ‘the better relative ontological-deficiency’ implied as of relative-ontological-completeness ), emphasises the necessity for the bifurcation of the construal of prospective human ontological-performance\textsuperscript{72}-<including-virtue-as-ontology> (associated with prospective human sublimation) into: ‘a scalarity/immanency perspective (as to a scalarity/immanency that will arise if the human had absolute-mentation-capacity so-construed as ontological-normalcy/postconvergence) of “historiality/ontological-eventfulness /ontological-aesthetic-tracing<-perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’>’ and ‘a non-scalarity/beholdening-as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation>

That said, human sublimation increasingly implies a ‘generalised background cultural,-organisation-and-institutional framework’ that itself needs to be sublimating, and it is here as well that even the propensity for sublimation of ‘purist science/ontology epistemic-conception of veracity/truth’ can be desublimated by an ontologically-impertinent ‘generalised background cultural,-organisation-and-institutional framework’ adopting ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’. In many ways with regards to the overall social framework, the usurpation of the intellectual–function/posture arising as of ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’ is often associated with vague-and-surreptitious conceptualisations of business success and media-and-social influence (in desublimating ‘historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition) as superseding social intellection itself as an inherent exercise for the social domain’s ‘purist science/ontology epistemic-conception of veracity/truth’ (as to the latter’s prospective sublimating ‘historiality/ontological-eventfulness’/ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-’epistemicity-relativism-determinism’>). Critically such a ‘purist science/ontology epistemic-conception of veracity/truth’ analysis very much point out that the social-construct is riddled with narratives of ‘supposedly veridical ontological justifications/grounds’ but which on closer examination as of ‘purist science/ontology epistemic-conception of veracity/truth’ turn out to be at the least sub-ontological-<as-to-the-limitation-of-human-subpotency-in-its-reifying-and-empowering-reflexivity-of-the-full-potency-of-existence’s~sublimating–nascence>; and so as to the relative impertinence of the ‘social-vestedness/normativity-<discretely-implied-functionalism> epistemic-conception of veracity/truth’ (so-construed as from the ontological-normalcy/postconvergence epistemic-projection perspective). poorly grasped with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology. In this respect with regards to human institutional-development–as-to-social-function-development and living-development–as-to-personality-development as of our positivism/rational-empiricism registry-worldview/dimension we can appreciate for instance that in a professional–client relationship like between a physician and a patient or a plumber and a customer, the two parties do not normally engage one another in equivocating as of the ordinary desublimation which wouldn’t achieve the sublimation of medical care meaningfulness-and-technology or plumbing technician technical meaningfulness-and-teleology (as to the fact that the client doesn’t go on pretending to engage the professional at its more profound level of technical knowledge contemplation) with the relation thus involving the requisite ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming existential-condescension<of-apriorising/axiomatising/referencing–psychologism> of the professional with a corresponding deferential apriorising/axiomatising/referencing–psychologism of the client’ and so as reflecting the sublimating knowledge ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming beyond-and-above the desublimating ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming of ordinary meaningfulness-and-teleology. However, this sublimating knowledge ‘ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming existential-condescension<of-apriorising/axiomatising/referencing–psychologism>’ across all registry-worldviews/dimensions is ever always poorly appreciated with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–meaningfulness-and-teleology (even though from a retrospective perspective we can grasp the preconverging/dementing–qualia-schema of ‘the God-of-plane’

This poor appreciation arises for the simple reason that the uninstitutionalised-threshold speaks of the registry-worldview/dimension notional-discontiguity/epistemic-discontiguity<shallow-supererogation -of-mentally-aestheticised~preconverging/dementing ~qualia-schema>, and thus it is disinclined to recognise the prospective ‘relative-ontological-completeness’—apriorising/axiomatising/referencing–psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity–sublimation{(as-to-underlying,-ontological-commitment ~implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming ~as-being-as-of-existential-reality}> imbued foregrounding__entailment{(postconverging–narrowing-down~sublimation-as-to ‘existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation ’-in-reflecting~‘immanent-ontological-contiguity ’;as-operative-notional~deprocrypticism) that can instill such a prospective sublimating knowledge ‘ontological-good-faith/authenticity’~postconverging–de-mentating/structuring/paradigming existential-
condescension-<of-apriorising/axiomatising/referencing–psychologism>’ as to prospective institutional-development–as-to-social-function-development and living-development–as-to-personality-development. In this regards, it can be appreciated with respect to budding-positivism and universalising-idealisation respectively that where the epistemic-veracity of looking through a telescope and drawing positivistic ontological implications do not avail as in the medieval-scholasticism underpinning–suprasocial-construct or where construing meaningfulness in coherent universalising terms do not avail as in the non-universalising sophistry underpinning–suprasocial-construct, then there is a fundamental reality of desublimating ontological-bad-faith/inauthenticity over which prospective sublimating ontological-good-faith/authenticity knowledge respectively as of budding-positivism and universalising-idealisation can only be established as of their respectively requisite ‘ontological-good-faith/authenticity’ and existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ and naïve modern-day presencing—absolutising-identitive-constitutedness interpretations in terms of the supposed arrogance of the Socrates, Galileos, Descartes, Diderots, etc. is nothing more but a manifestation of dimensionality-of-desublimating-lack-of –{<amplituding/formative>supererogatory–dem- mentativeness/epistemic-growth-or-conflatedness /transvalutative-rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness–equalisation} (as to the failure to appreciate that the surpassing of human-subpotency aporeticism is all about originariness-parrhesia,—as–spontaneity-of-aestheticisation— supererogatory–acuity/perspicacity/astuteness/edginess/incisiveness–of apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument –for–conceptualisation that only arises as of ‘sublimation affirmation/projection/assertion/dueness-validating-logicising/suitable-measuringinstrument-validating-measuring–as-to–postconverging-or-dialectical-thinking –apriorising-psychologism’ over ‘desublation

The blunt fact is that as explained above and clearly obvious with human institutional-development–as-to-social-function-development and living-development–as-to-personality-development the ordinariness of meaningfulness-and-teleology is not to be exploited as if it is a credible state of profound ontological-veracity given the lack of dispensing-with-immediacy-for-relative-ontological-completeness–by-reification/contemplative-distension (as to a disparateness-of-conceptualisation which notional~pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation—{blurring/undermining-of-prospective-totalising-entailing—as-to-entailing—{amplituding/formative–epistemicity}totalising~in-relative-ontological-completeness} thrives on this lack of universal-transparency—{transparency-of-totalising-entailing—as-to-entailing—{amplituding/formative–epistemicity}totalising~in-relative-ontological-completeness} with regards to prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructure-of—meaningfulness-and-teleology underlying the genuine social intellectual–function/posture. Intellectualism as such is much more than just about presencing—absolutising-identitive-constitutedness methodologising/mutualising/organising/institutionalising enterprise as to the fact that all given registry-worldviews/dimensions as presencing—absolutising-identitive-constitutedness underpinning–suprasocial-construct relate to their given meaningfulness-and-teleology in absolute terms whereas in reality there are veridically relative subontologisation/subpotentiation of ontology as metaphysics-of-presence—{implicated—nondescript/ignorable–void—as-to—presencing—absolutising-identitive-constitutedness}’; and it is here that the genuine social intellectual–function/posture comes in to veridically reflect the reality that a social-construct is not of absolute scalarisation of human ontological-
performance for the possibility for its prospective scalarisation-as-to-rescalarisation-as-re-ontologisation/supererogatory—involuting-or-guilding-or-amplifying–scalarisation-as-to-existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation, and the genuine social intellectual–function/posture as such is not about a naivist social-vestedness/normativity-as-discretely-implied-functionalism as otherwise the possibility for the succession of registry-worldviews/dimensions transcendence-and-sublimity/sublimation/supererogatory–de-mentativity right up to our present wouldn’t have availed speaking to our very own intellectual-and-moral responsibility for prospective Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastrucure-of—meaningfulness-and-teleology. The genuine social intellectual–function/posture means that human thought can project beyond, overlook and override presencing—absolutising-identitive-constitutedness-presencing—absolutising-identitive-constitutedness—preconverging—‘motif-and-apriorising/axiomatising/referencing’–imbuing—existentialising—enframing/imprintedness—{as-to-historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition} conception of sublaming value and ontological-veracity disposition; and so as to the fact that tend to be skewed towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology—positive-opportunism—of-social-functioning-and-accordance of institutional-development—as-to-social-function-development and living-development—as-to-personality-development) over ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ (with regards to its

expansion–as-to-depth-of-ontologising-development-as-infrastructure-of–\textsuperscript{26}meaningfulness-
and-teleology\textsuperscript{27}, and in fact in many ways individuals intersolipsistic actions in society implicitly recognise this reality even as the overall underpinning–suprasocial-construct tends to be abstractly preconvergingly–de-mentated/structured/paradigmed to skew towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as for instance professional choices and callings made well beyond just a question of their remunerative or supposed incidental social prestige worth). Part and parcel of the genuine social intellectual–function/posture is to undermine this skewing towards ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ (as to the beyond-the-consciousness-awareness-teleology\textsuperscript{99}–in-preconverging–existential-extrication-as-of-existential-unthought\textsuperscript{99} positive-opportunism—of-social-functioning-and-accordance\textsuperscript{13} of institutional-development–as-to-social-function-development and living-development–as-to-personality-development) and reconstrue human-subpotency aporeticism in terms of ‘non-immediacy prospective sublimating value and ontological-veracity disposition’. In this regards historically, without individuals making choices not to optimally pursue ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ as to their given \textsuperscript{7} presencing—absolutising-identitive-
constitutedness\textsuperscript{14} ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ but instead optimising their effort for ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ then the possibility will not arise for the very backbone of human value and ontological-veracity sublimation (reflecting the ‘non-immediacy prospective sublimating value and ontological-veracity disposition’) upon which ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ is grounded. History
knows that the ‘contorted human presencing—absolutising-identitive-constitutedness’ mentality of registry-worldviews/dimensions’ as of ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ do not truly pay their dues to the Socrates, Copernicus, Galileos, Descartes, Kants, Newtons, Leibniz, Rousseaux, Diderots, Pasteurs, Lavoisiers, Teslas, Einsteins, etc. upon whose ‘meaningfulness-and-teleology’ infrastructure building ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ arise and outlandishly skew human ‘meaningfulness-and-teleology’ (and so not only with human Being-development/ontological-framework-expansion—as-to-depth-of-ontologising-development-as-infrastructure-of—‘meaningfulness-and-teleology’ but is equally reflected in a poor-spirited bland conception of human institutional-development—as-to-social-function-development and living-development—as-to-personality-development). This insight is critically important not as an idle exercise of merely stating the appropriateness of sublimating value and ontological-veracity disposition but in reflecting that the skewed underpinning—suprasocial-construct projected and preconvergingly—de-mentated/structured/paradigmed ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ cannot be construed as absolute as in effect it will ultimately prospectively stultifying the requisite ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ that acts as the backbone for human value and ontological-veracity sublimation (as has always been the manifest case for surpassing the uninstitutionalised-threshold of registry-worldviews/dimensions). The fact is ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ as underlying ‘presencing—absolutising-identitive-constitutedness’ end up as the registry-worldviews/dimensions Establishments underpinning—suprasocial-construct as to dominance/vested-interest—drivenness—as-to-its-direct/indirect-eliciting-by-or-exploiting-of-prospectively-descalarising/subontologising-sycophantic-sophistic-interests,—as-inducing-prospective-threshold-of-institutional-and-social-desublimation> of ‘presencing—absolutising—

It is the ‘non-immediacy prospective sublimating value and ontological-veracity disposition’ (so-reflected in human historicity/ontological-eventfulness/ontological-aesthetic-tracing<perspective–ontological-normalcy/postconvergence-reflected–epistemicity-relativism-determinism‘>) that goes beyond presencing—absolutising-identitive-constitutedness and generate the requisite de-mentative/structural/paradigmatic sublimation-over-desublimation as reflected with the ontological-contiguity—of-the-human-institutionalisation-process while superseding ‘human-subpotency non-scalarity/beholdening<as-to-what-has-gone-before-aesthetically-de-mentates/structures/paradigms-distortedly-the-possibility-for-the-later-ontologisation’ disposition of ‘immediacy supposed absolute sublimating value and ontological-veracity disposition’ as the latter at best construes of social reformation (and so across all the registry-worldviews/dimensions) in presencing—absolutising-identitive-constitutedness<preconverging~‘motif-and-apriorising/axiomatising/referencing’–imbuing>existentialising—enframing/imprintedness{(as-to historicity-tracing—in-presencing–hyperrealisation/hyperreal-transposition) subontologising palliative terms that as to their specifically defined ‘human social-vestedness/normativity<discretely-implied-functionalism> implied contract/political-arrangement-or-political-coercion/given-discrete-social–value-construction’ are very much integrative of collateral aspects as imponderable/inscrutable/unavoidable/inevitable/inescapable/unpreventable/unchangeable/in surmountable/unovercomable with regards to social-stake-contention-or-confliction and thus by dulling the social-construct’s conscience in this way rather distracts from the realisation and contemplation of the full possibilities for profound de-mentative/structural/paradigmatic

issue is how to adjust to existence and is not about how existence adjusts to the human who is rather of a subpotent epistemic relation to the full-potency of existence’. The implication here is that the ‘ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming’ existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ is thus merely reflecting the veridicality of the possibility of prospective human transcendence-and-sublimity/sublimation/supererogatory–de-mentativity which is only possible as to existence—as-the-absolute-a-priori-of-conceptualisation~and~existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation<as-to-perspective–ontological-normalcy/postconvergence-implied–‘prospective-aporeticism-overcoming/unovercoming’> with regards to human formativeness<as-to-intersolipsism-of-preformulating/preframing/premeaningfulness-imbued-mediativity-and-deferentialism>-of–meaningfulness-and-teleology>. Thus it is only the possibility of ‘ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming’ existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ that can thus allow human existential-discursivity—implicated-sublimation-over-desublimation beyond naïve presencing—absolutising-identitive-constitutedness<amplituding/formative–epistemicity>totalising~self-referencing-syncretising/circularity/interiorising/akrasiatic-drag<amplituding/formative–epistemicity>totalising~thrownness-in-existence and the reflexive temporal-to-intemporal ontological implications on human ontological-performance<including-virtue-as-ontology> cannot be neutrally be separated from human<amplituding/formative–epistemicity>totalising~thrownness-in-existence and the reflexive temporal-to-intemporal ontological implications on human ontological-performance<including-virtue-as-ontology>). This insight can be illustrated as follows: supposed say in 5000 BC an asteroid or virus could bring about a human cataclysm, such a ‘potential manifestation of existence is not beholding to human appreciation of the existential implications of the notion and science behind the
asteroid or virus’ and in this regard suppose extraterrestrials living in a ‘supposedly habitable Mars’ had achieved our modern-day civilisational and technological level, it is inevitable that they will effectively adopt ‘ontological-good-faith/authenticity ~postconverging–dementating/structuring/paradigming" existential-condescension-<of-apriorising/axiomatising/referencing–psychologism>’ with regards to the human species on Earth and strive to preempt such a cataclysm as to their technical capacity. We can appreciate that the human species on Earth as to its relative-ontological-incompleteness doesn’t have a pretence to being of a ‘neutrally/objectively sound human ontological-performance ~<including-virtue-as-ontology> state failing to factor in human specific apriorising/axiomatising/referencing-{of-attendant–ontological-contiguity -educed– existentialising/contextualising/textualising-contiguity }—ontological-deficiency arising from its specifically given <amplituding/formative–epistemicity>totalising~thrownness-in existence’ but together with the extraterrestrials is rather dementatively/structurally/paradigmatically in existential-discursivity—implicated-sublimation-over-desublimation relation as to the primacy of the full-potency of existence over any subpotency (speaking fundamentally to prior human ontological-commitment ~<implied—self-assuredness-of-ontological-good-faith/authenticity ~postconverging–dementating/structuring/paradigming ~as-being-as-of-existing-reality>) with regards to the fact that the ontological-veracity of all humans as human-subpotency is priorily of existential-discursivity—implicated-sublimation-over-desublimation superseding pretenses of mere-formulaic methodologising/mutualising/organising/institutionalising presciences as to entitlements of seven-presencing—absolutising-identitive-constitutedness articulated induced elaboration-as-to-mere-extrapolating/constituting/abstracting/deducing/inferring-of-elucidationoutside—attendant ontological-contiguity -educed– existentialising/contextualising/textualising-contiguity. It is this pre-eminence of existential-discursivity—implicated-sUBLIMATION-over-desublimation that explains why the educing—and—availing—and—re-availing of relative-ontological-completeness⁷ as to dimensionality-of-sUBLAMING—langle-amplituding/formative—supererogatory—de—mentativeness/epistemic-growth-or-conflatedness /transvaluative—rationalising/transepistemicity/anamnestic-residuality/spirit-drivenness—equalisation⟩ takes precedence in defining human intellectual-and-moral ontological-performance—⟨including—virtue-as-ontology⟩ and so as to existence—as-sUBLAMING-withdrawal,—ELICITING-of—prospective-supererogation⁴. This <amplituding/formative—epistemicity>totalising—thrownness-in-existence⁵ implied existential-discursivity—implicated-sUBLIMATION-over-desublimation as to ‘ontological-good-faith/authenticity’—postconverging—de-mentating/structuring/paradigming⁰ existential-condescension—langle-apriorising/axiomatising/referencing—psychologism⟩’ effectively underlies the ‘Derridean underdetermination-imbued force/violence conception’ and ‘Foucauldian knowledge/power conception construed as knowledge-empowerment/ignorance-disempowerment’, as the preformulating/preframing/premeaningfulness—langle-metaphoricity⟩—disposition—as-to-psyche-induced-psychologism-of-existential-stake> from which human meaningfulness-and-teleology⁹ veridically arises. Thus existential-discursivity—implicated-sUBLIMATION-over—sublimation implies that the human is already ‘de-mentatively/structurally/paradigmatically intellectually-and-morally existentially engaged as to its limited-mentation-capacity’ without
any ‘neutrally/objectively sound human ontological-performance’ state failing to factor in human specific apriorising/axiomatising/referencing-{of-attendant ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }—ontological-deficiency arising from its specifically given <amplituding/formative–epistemicity>totalising–thrownness-in-existence’. This insight puts into perspective our presencing—absolutising-identitive-constitutedness conception of intellectual-and-moral responsibility wherein supposedly failed/unsucessful/ineffective initiatives undertaken as to relative-ontological-completeness (for instance with regards to some public engagement aspiratory dispositions of such intellectuals like Sartre, Foucault, etc. and in the scientific domain for instance controversies associated with Louis Pasteur breakthroughs in microbial science) seem to be wrongly analysed from the posture of a supposedly neutral/objective social-setup conception of intellectual-and-moral responsibility (that ducks/ignores such relative-ontological-completeness aetiologisation/ontological-escalation posturing) without factoring in that ‘the social-setup’s relative-ontological-incompleteness’ specific apriorising/axiomatising/referencing- {of-attendant ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }—ontological-deficiency arising from its specifically given <amplituding/formative–epistemicity>totalising–thrownness-in-existence’ is not of neutrally/objectively sound ontological-performance; as to the fact that for instance the incidence of modern-day wars and their man-made catastrophies do not speak of neutral/objective individuals and social intellectual-and-moral responsibility as to their existence within the meaningful sovereign frameworks that de-mentatively/structurally/paradigmatically directly/indirectly validate such calamities. In other words, our intellectual-and-moral responsibility is already engaged as to our <amplituding/formative–epistemicity>totalising–thrownness-in-existence and the idea that
any attitude of unconcern/indifference is intellectually-and-morally neutral/objective is bogus; and human intellectual-and-moral responsibility starts at the very least with an orientation to relative-ontological-completeness as to overall existential dimensionality-of-sublimating

In this regards, and in the bigger scheme of things existential-discursivity—implicated-sublimation-over-desublimation as to ‘ontological-good-faith/authenticity’\textsuperscript{35}–postconverging–de-mentating/structuring/paradigming\textsuperscript{70} existential-condescension-<of-apriorising/axiomatising/referencing–psychologism’ implies that as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation\textsuperscript{96}, the respective state of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism cannot be construed as of ‘neutrally/objectively sound human ontological-performance’ \textit{<including-virtue-as-ontology> state failing to factor in human specific \textit{apriorising/axiomatising/referencing–{of-attendant–ontological-contiguity –educed–existentialising/contextualising/textualising-contiguity }—ontological-deficiency arising from its specifically given \textit{amplituding/formative–epistemicity>totalising–thrownness-in-existence\textsuperscript{13}’} with respect to prospective base-institutionalisation, universalisation,
positivism/rational-empiricism and notional-deprocripticism respectively; and as relative-ontological-completeness avails intellectual-and-moral responsibility is rather reflected as of dimensionality-of-sublimating. Unlike it is often assumed from a sloppy conception of human sublimation in existence (caught up in any given presencing—absolutising-identitive-constitutedness self-justification of uncertainty of prospective human sublimation), the comprehensive coherence of human sublimation in existence as to existence—as-sublimating-withdrawal, eliciting-of-prospective-supererogation is effectively highly regular and consistent (and this can only be fully appreciated from an ontologically sound conception of ‘existence as of its immanently tautologous coherence speaking to its ontological-contiguity’ as to the possibility for intelligibility to arise as so-reflected with the overall ontological-contiguity—of-the-human-institutionalisation-process so-associated with human limited-mentation-capacity-deepening). This confliction in the perception and relation to human sublimation in existence between metaphysics-of-presence {implicated ‘nondescript/ignorable–void’ as to presencing—absolutising-identitive-constitutedness} and syncretising/circularity/interiorising/akrasiatic-drag on the one hand and on the other hand difference-conflatedness—as-to-totalitative-reification-in-singularisation—as-to-the-nondisjointedness/entailment-of-prospective nonpresencing—as-veridical-epistemicity—relativism-determinism as to relative-ontological-completeness <amplituding/formative–epistemicity> causality as-to-projective-totalitative–implications-of-prospective nonpresencing, for-explicating-ontological-contiguity is aptly reflected in the entangled/enmeshed nature of human sublimation in existence as reflected with the ontological-contiguity—of-the-human-institutionalisation-process. This is so fundamentally because of
human teleology speaking of ‘human phenomenal/manifest conceptivity/epistemic-

incompleteness\textsuperscript{9} de-mentatively/structurally/paradigmatically impacts reflexively on human appraisal of its prospective relative-ontological-completeness sublimation implications, and so across the \textit{cumulating/recomposing–attendant-ontological-contiguity \textgreater\textless-successive registry-worldviews/dimensions right up to the originariness/origination–(so-construed-as-to-ontological-normalcy/postconvergence-perspective-scalarising-construal-of-existence)\textless\textgreater-perspective of \textit{deprocrypticism–or–preempting—disjointedness-as-of-} reference-of-thought which purportedly escapes any such reflexive\textsuperscript{7} presencing—absolutising-identitive-constitutedness\textsuperscript{14} \textit{amplituding/formative-epistemicity\textgreater totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of its apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument–for–conceptualisation. The so-implicated notional–deprocrypticism as such points out that the ontological-contiguity\textsuperscript{9}—of-the-human-institutionalisation-process\textsuperscript{8} is rather associated with a ‘directly relevant trace of prospective human effectively-purist-sublimation\textsuperscript{7}(reflecting-

associated with tools, equipment, technical knowhow and natural science as to their immediately amenable positive-opportunism—of-social-functioning-and-accordance social implications ultimately leading to subsequent human methodologising/mutualising/organising/institutionalising sublimating overall meaningfulness-and-teleology. But the overall postconverging—de-mentating/structuring/paradigming of human sublimation in existence as such is not always coherent as to the discrepancy in the occurrence of specific sublimations and desublimations say material and technical sublimation pointing to relative-ontological-completeness and ‘immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology’ instigating the referencing/registering/decisioning desublimation of the nascent-particular/incipient-and-material/technical-sublimations against their relative-ontological-completeness—presublimation-construct—of—meaningfulness-and-teleology. In this regards, we can appreciate how the subsequent immaterial/social sublimation required for prospective positivism/rational-empiricism came to be appreciated by such thinkers like the Rousseaux, Diderots, etc. as to the fact that the material possibilities of their epoch associated with the printing press and increasing technical knowhow rendered the immaterial/social overall relative-ontological-incompleteness—presublimation-construct—of—meaningfulness-and-teleology of their epoch wanting, explaining for instance Rousseau’s appreciation of the noble-savage and nature as speaking to a prospective human aporeticism overcoming/unovercoming that recognised that mankind needed a more mature conception of interhuman relationship and human relation with nature as to when mankind/some-of-mankind began manifesting a more developed relationship with nature beyond just as of the immediacy of subsistence/survival relationship with nature (say for instance having technically more efficient guns with gunpowder didn’t imply just killing animals at whim or along the same lines explaining his anti-Slavery stance); thus speaking of the prospectively requisite
immaterial/social sublimation as to prospective positivism/rational-empiricism postconverging-or-dialectical-thinking\textsuperscript{\textcircled{1}}—apriorising-psychologism. In this regards even budding-positivists like Galileo, Descartes, etc. just as well implicitly recognised this discrepancy of prospective material and technical sublimation positivistic science in relative-ontological-completeness\textsuperscript{\textcircled{2}} and the immaterial/social overall relative-ontological-incompleteness\textsuperscript{\textcircled{3}}—presublimation-construct—of—\textsuperscript{\textcircled{4}}meaningfulness-and-teleology\textsuperscript{\textcircled{5}} of medieval-scholasticism associated with alchemic/magical thinking, to the point that in many ways their actions were directed towards articulating at the very least an underlying 'scientific—apriorising/axiomatising/referencing—psychologism enculturated/constructed social-pragmatics-framing-of—predicative-effectivity—sublimation—\{as-to-underlying, ontological-commitment \textsuperscript{\textcircled{6}}<implied—self-assuredness-of—ontological-good-faith/authenticity \textsuperscript{\textcircled{7}}—postconverging—de-mentating/structuring/paradigming \textsuperscript{\textcircled{8}}as-being-as-of-existential-reality\}\}' as the requisite immaterial/social sublimation for enabling positivistic science as we know it today to arise. This very insight explains 'the enlightenment struggle against feudalism and slavery as advocated say with such a thinker like Rousseau' as to the fact that the technical and scientific progress as to relative-ontological-completeness\textsuperscript{\textcircled{9}} weren’t the occasion to put such technical and scientific progress like shipbuilding and other ocean voyage technologies at the service of the prior medievally clouded immaterial/social overall relative-ontological-incompleteness\textsuperscript{\textcircled{10}}—presublimation-construct—of—\textsuperscript{\textcircled{11}}meaningfulness-and-teleology\textsuperscript{\textcircled{12}} value-construct and shallow-supererogating methodologising/mutualising/organising/institutionalising \textsuperscript{\textcircled{13}}<preconverging—'motif-and—apriorising/axiomatising/referencing’—imbuing—existentialising—enframing/imprintedness—\textsuperscript{\textcircled{14}}(as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition), but rather called for a renewed conceptualisation of humanity beyond a mentality of immediate subsistence/survival. Thus it is always the case that the positive-opportunism—of-social-functioning-and-accordance\textsuperscript{\textcircled{15}} driving the secondnatured institutionalisation of human
sublimation induces discrepancy as to immediate material and technical possibilities of sublimation and the requisite dispensing-with-immediacy-for-relative-ontological-completeness -by-reification/contemplative-distension immaterial/social sublimation considerations that rise to the aporeticism overcoming/unovercoming challenge of the immediate material and technical possibilities of sublimation. In many ways this discrepancy of material and technical sublimation and immediate distortive immaterial/social desublimation is reflected in the ‘historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition gimmickiness/desublimation relation with ‘meaningfulness-and-teleology’ of our positivism–procrypticism, for instance as associated with an ‘underlying dumbing-down public intellection and media industry’; as media-access and its commercialisation function in many ways rather adhocly substitutes-for/undermines a profound genuine social intellectual–function/posture as to social-stake-contention-or-confliction implications. The further implication of this discrepancy is in highlighting that the supposed equanimity/balance of the overall politico-institutional system as to sublimating notions of sovereignty, democracy, free-will, etc. is only veridically effective as to the originariness/origination—{(so-construed-as-to-ontological-normalcy/postconvergence-perspective-scalarising-construal-of-existence) perspective of notional–deprocrypticism given the perpetual challenge of material sublimation upon human immaterial/social overall relative-ontological-incompleteness—presublimation-construct–of—meaningfulness-and-teleology; as prospective material/technical sublimation is associated with a discrepant ‘immaterial/social overall relative-ontological-incompleteness—presublimation-construct–of—meaningfulness-and-teleology instigating the referencing/registering/decisioning desublimation of the nascent-particular/incipient-and-material/technical-sublimations—<blinded-to-their-relative-ontological-completeness—reference-of-thought—devolving’ that goes on as of—presencing—absolutising-identitive-constitutedness to render the supposed equanimity/balance of the overall politico-institutional

Even in the purely intellectual sense, modern-day scientific advancements and achievements have correspondingly given rise to a distorted manifestation of science-ideology as a usurpatory mouthpiece of veridical science-in-practice that effectively rides the wave of natural sciences accomplishments and in so doing projects of a naïve 79-presencing—absolutising-identitive-constitutedness 14 epistemic conception of science that in many cases poorly reflects upon effective scientific practices and craft as it poorly appreciates the dynamics of the overall human knowledge and scientific enterprise as to the aestheticisation—and—aestheticisation-towards-ontology underlying the overall ontological-contiguity 67—of-the-human-institutionalisation-process 58, so-reflected from such science-ideology poor appreciation of the implications of the historiality/ontological-eventfulness /ontological-aesthetic-tracing-<perspective–ontological-normalcy/postconvergence-reflected-‘epistemicity-relativism-determinism’> rendering the

Critically thus the veracity of human sublimation is rather as to the originariness/origination perspective of notional~deprocrypticism as effectively reflecting existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation, and so as to the fact that the notional~deprocrypticism given ‘directly relevant trace of prospective human effectively-purist-sublimation’ reflecting-prospective-historiality/ontological-eventfulness /ontological-aesthetic-tracing <perspective–ontological-normalcy/postconvergence-reflected-'epistemicity-relativism-determinism’> as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation is not ‘beholdening wrongly upon the overall relative-ontological-incompleteness’ —presublation-construct–of–meaningfulness-and-teleology’.

The psychologistic and apriorising implications here is that with regards to say a God-of-plane proposition in an animistic social-setup, an engagement striving to elucidate the notion of plane involving any existential-instantiation aposteriorising/logicising/deriving/intelligising/measuring in terms of the animistic social-setup non-positivistic apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for–conceptualisation, is de-mentatively/structurally/paradigmatically already validating the animistic social-setup non-positivistic apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for–conceptualisation as paradoxically valid for all instances of aposteriorising/logicising/deriving/intelligising/measuring warranting positivistic apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument—for–

Furthermore, it is such ontologically-deficient incrementalism-in-relative-ontological-incompleteness —enframed-conceptualisation (as to its cognisant-and-integrative blending/incorporating of prospective ‘nascent-particular/incipient-and-material/technical-sublimations—blinded-to-their-relative-ontological-completeness —reference-of-thought—devolving> as if of relative-ontological-incompleteness—presublimating reference-of-thought/grandest-axiomatic-construct—as-to-referencing/registering/decisioning in circularly beholding ‘meaningfulness-and-teleology’ to human-subpotency’) that is behind the development of all the cumulating/recomposuring—
worldviews/dimensions in relative-ontological-completeness (base-institutionalisation, universalisation, positivism and deprocrypticism respectively) are projected in disavowal of their respective prior registry-worldviews/dimensions in relative-ontological-incompleteness (recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism respectively) destructuring-threshold-(uninstitutionalised-threshold /presublimating–desublimating-decisionality)-of-ontological-performance-<including-virtue-as-ontology> of ontological-performance-<including-virtue-as-ontology> as reflected by their disposedness/psychologismic-construct-(as-to-orientation/value-construct/valuation–and–derived-parameterising), implying the latter are effectively non-aposteriorising/non-logicising/non-deriving/non-intelligising/non-measuring (as from the holding-forth of their respective apriorising/axiomatising/referencing/intelligibilitysetup/measuringinstrument–for–conceptualisation). Thus, as to their respective presencing—absolutising-identitive-constitutedness, all relative-ontological-incompleteness registry-worldviews/dimensions as of their preconverging-or-dementing—apriorising-psychologism pretend to articulate what ca prospectively be possible and impossible (in such a way that ‘conveniently’ imply that theirs is the registry-worldview/dimension that ‘thinks right’ while ignoring projective-insights as of the overall ontological-contiguity—of-the-human-institutionalisation-process implications as to existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation) with respect to all corresponding prospective relative-ontological-completeness projective-insights implications of transcendence-and-sublimity/sublimation/supererogatory–de-mentativity; failing to factor in that their paradoxical contemplation in relative-ontological-incompleteness is exactly what renders their supposed determination of what ca prospectively be possible and impossible structurally/paradigmatic

conflatedness—in-{preconverging-disentailment-by}—postconverging-entailment>. In many ways recent history of human thought has shown that ‘social-and-institutional-frameworks-of—referencing/registering/decisioning manifest politically-driven motives of desublimating–existentialising–decisionality going beyond just neutral knowledge-reification–gesturing—<in-prospective_psychologismic–apriorising/axiomatising/referencing–{of-attendant—ontological-contiguity—educed–existentialising/contextualising/textualising-contiguity}—conflatedness—in-{preconverging-disentailment-by}–postconverging-entailment>’ that cannot be ignored as to intellectually decadent practices of scepticism and blurrying underlied by cynical reframing of thought at later moments (which had been related to sceptically and in blurriness7 at previous moments), and so as to shallow-supererogation desublimating–existentialising–decisionality driven by mere institutional-ascendency. In many ways thus the conceptualisation herein ‘is not caught-up/constrained to any such fooleries’ (as to the history of such ploy against postmodern thought) and is consciously articulated as to the profound-supererogation motive of human sublimation beyond/and-not-subjected-to the <preconverging–‘motif-and-apriorising/axiomatising/referencing—imbuing’—existentialising—enframing/imprintedness{as-to—historicity-tracing—in-presencing—hyperrealisation/hyperreal-transposition} of any shallow-supererogation social-and-institutional-frameworks-of—referencing/registering/decisioning as to the 8.5 billion humans on planet Earth and as any party of interest of profound-supererogation76 may find useful or not! In this respect, it is critical to understand what defines humanity as to the ‘firstnatureness and derived secondnaturedness positive-opportunism—of-social-functioning-and-accordance’75 required for human self-surpassing—existentialism-form-factor—in-overcoming—‘notionally—collateralising-beholdening-protohumanity’-to—‘attain-sublimating-humanity’-as-to-existence—potency—sublimating—nascence,—disclosed-from-prospective-epistemic-digression; as to the fact that all human sublimation is instigated as of re-originary—as—

In our modern-day context, the very essential ‘public-sovereignty–giving function/posture as associated with the centrality of elections, voting and party politics’ of the modern democratic process is now paradoxically surreptitiously re-construed as the very cornerstone for dominion/statal–logic (preconverging/shallow-supererogating–'human-and-social–expectations/anticipations—dementating/structuring/paradigming–psychologism’–as-to-its-specific–collateralising–beholdening<whether–trepidatious-or-warped-or-preclusive-or-occlusive>–and–its–consociated-dominance/vested-interest-subontologising-skewed-influence-as-to-social-vestedness/normativity–<discretely-implied-functionalism>}

subverting the sublimating–existentialising–decisionality of the genuine social intellectual–function/posture; and so as to the fact that the democratic process ‘public-sovereignty–giving function/posture as associated with the centrality of elections, voting and party politics’ is incomplete without an adequate-and-healthy enlightening public-debate with such enlightening encumbering upon a genuine social intellectual–function/posture. In many ways the very idea of the ‘democratic
The public-debate’ itself is skewed from its very inception as to dominance/vested-interest natural ascendency over ‘the supposedly democratic platforming and stakeholding in defining the very issues of society’s social-stake-contention-or-confliction’ (as so-associated with thematically skewed media debates and socio-econo-political thought-makers/thought-making overtly associated with ‘skewed think-tanks’ or covert surreptitious underhanded institutional and media influence). Critically, in this context such skewed platforming and stakeholding ends up alienating supposed sovereign electors as to a platforming and stakeholding process that mediatically and politically take a self-contained course (as to dominance/vested-interest defaulting issues that can be debated as to the underpinning–suprasocial-construct ‹preconverging~‘motif-and-apriorising/axiomatising/referencing’–imbuing›–existentialising—enframing/imprintedness‹as-to-history-tracing—ina-presencing–hyperrealisation/hyperreal-transposition⟩ socio-econo-political social-stake-contention-or-confliction) with the consequence that the so-politically-alienated sovereign electors are increasingly turning to protest votes (reflecting rather a psychological-outleting rather than true policy solution) or decreasing participation in the democratic process, in many ways speaking to the very natural defaulting of the political process to dominance/vested-interest ‘tolerable locked-in socio-econo-political outcomes’ however the underlying sovereign electors mood as to the fact that even protest votes can’t escape the institutional hold of such dominance/vested-interest. In many ways, it is the critical and genuine social intellectual–function/posture as to such aporeticism overcoming/unovercoming that can reifyingly-and-empoweringly effectively reflect upon the pertinence of such a dominance/vested-interest democratic process confiscation/lock-in (as equally manifested by the fact that even newly elected ambitious representatives come to be surreptitiously given their marching orders as to what is politically possible or not). ⟨supererogatory—human-subpotency⟩—effecting is critically relevant in appraising that
‘technical/profound articulations are not made gratuitously’ (in contrast to a modern-day
unnecessary ‘social-and-media reflex of facility/convenience’ shunning technicity/profundity which goes on it is herein argued to be at the ‘infrastructural/root source of the cultivation of public and institutional discursive mediocrity’ as to ‘enculturating a practice of public interestedness/profundity mediocrity and public awareness/accounting/decisioning mediocrity’ whereas the technicity/profundity of modern-day training and professions rather points to the fact of a public potentially capable to handle more creatively profound/technical public analysis and public debate rather than just ‘parsimonious/frugal ratings-driven defining conception of intellectual analysis prone to desublimating disorientation, misanalysis and irrelevance’) as to the requisite social notional–self-distantiative contemplative technicity/profundity that inherent existence sublimating–nascence warrants to make available appropriately sublimating <supererogatory–human-subpotency>–effecting (whether as to direct knowledge acquisition or appropriate percolation-channelling-<in-deferential-formalisation-transference> enabling the sovereign–function/posture ontologising-aptness). This poor appreciation of technicity/profundity in the public arises as of a poor projection of existence’s sublimating–nascence to wrongly imply that the individual ‘is perfect as they are’ with supposed ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-by-institutional-by-social sovereign’s service’, and critically wrongly implying that knowledge as to organic-knowledge can be acquired without the requisite ‘epistemic-growth/disquiet/discomfort-\{induced-sublimation,-as-from-existence’s—effusing/ecstatic–inlining-as-historiality-\{science/authenticity/nonextrication\}-beyond-mere-formulaicity-as-historicity-tracing-\{science-ideology/fashionability/distraction\}\} as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’–by-reification/contemplative-distension’ of the individual as to their ‘appropriate notional–self-distantiation-<imbued—re-motif-and-re-apriorising/re-axiomatising/re-referencing>’, while at the same time ‘a pseudo-contrition as to awareness of such relatively shallow
technicity/profundity cultivated in such social-and-media spaces’ doesn’t deter such spaces (consciously or unconsciously) from surreptitiously acting as of profound technicity/profundity at critical moments of public discourses with the consequence that ‘there is an opaque connection/continuity between public, media and institutional discursivity with social and institutional outcomes as if these are discrete and unrelated activities’ (whereas the supposed relevance of discursivity has to do with how it allows for comprehensible public ‘epistemic-growth/disquiet/discomfort—induced-sublimation,—as-from-existence’—effusing/ecstatic—inlining-as-historiality—{science/authenticity/nonextrication}-beyond-mere-formulaicity-as-historicity-tracing—{science-ideology/fashionability/distraction}) as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness’—by-reification/contemplative-distension’ in effectively appreciating social and institutional outcomes processes rather than individuals reflective estrangement and disinterest with regards to public outcomes of social-stake-contention-or-confliction). The concrete and natural human psychological disposition with respect to knowledge as to organic-knowledge is in appreciating that for critical thinking even for the novice it is imperative to truly engage with the substance of the matter comprehensively-and-insightfully notwithstanding the level of exactifying comprehension (again whether as to direct knowledge acquisition or appropriate percolation-channelling—<in-deferential-formalisation-transference> enabling the sovereign—function/posture ontologising-aptness). The abstraction-of-thought/principled-thought articulated with subject-matters content is not done gratuitously as it is often popularly advanced especially with ‘ontologically-flawed frameworks of blurriness’ and ratings/sales immediate interests’ susceptible to normalised/stereotyped/selfhelping/feel-good construal of knowledge. Subject-matter abstraction-of-thought/principled-thought content are not so-produced gratuitously in the sense that this effectively speaks to: the requisite sophistication/complexity for ‘full incipient supererogating breadth of human intelligibility
transmutation’ (as ‘supererogatory-human-subpotency’-effecting imbued epistemic-totalising” preformulating/preframing/premeaningfulness of notional-originariness-parrhesia,—as—spontaneity-of-aestheticisation’ before the incipience of metaphoricity and then meaningfulness-and-teleology as to existentialising-frame) ‘that then permits hermeneutically/reprojectively/supererogatingly/zeroingly human sublimating-accessing/sublimating-relating-to’ existence—as-sublimating-withdrawal,-eliciting-of-prospective-supererogation (noting here that what is key here is ‘the existence constrained educed sublimating’ however the technicity/profundity whereas an attitude of normalised/stereotyped/selfhelping/feel-good knowledge that ‘doesn’t align with the existence constrained educed sublimating’ is fundamentally besides the point however its ‘false convincing of the fellow human mortal approach’ so-reflected as to the deficient social outcomes it is bound to be associated with’). Critically when push comes to shove, such blatantly flawed conception of true knowledge but socially accommodated as to ‘a social-functioning-and-accordance—as-of—social-stake-contention-or-confliction conception associated with immediate public ratings and/or sales/merchandising’ (over the ‘epistemic-growth/disquiet/discomfort-{induced-sublimation,-as-from-existence’s—effusing/ecstatic—

subject-matter content as abstraction-of-thought/principled-thought (notwithstanding supposedly professional/technical/scientific auxiliary/substitutive practices of ‘normalised/stereotyped/selfhelping/feel-good knowledge being brought at the individual-by-institutional-by-social sovereign’s service lacking in the underlying conception of epistemic-growth/disquiet/discomfort→{induced-sublimation,-as-from-existence’s—effusing/ecstatic→inlining-as-historiality→{science/authenticity/nonextrication}-beyond-mere-formulaicity-as-historicity-tracing→{science-ideology/fashionability/distraction}} as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness→by-reification/contemplative-distension→→that are closely attached-and-driven directly or indirectly by public ratings and/or sales/merchandising with little consideration for veridical/optimal existential sublimating/desublimating implications, even as it is herein argued professional/technical/scientific abstraction-of-thought/principled-thought content mustn’t necessarily generate less public interest but should primarily be motivated with inherent knowledge-reification–gesturing→in-prospectivepsychologismic→apriorising/axiomatising/referencing→{of-attendant–ontological-contiguity→educed–existentialising/contextualising/textualising-contiguity}→confatedness→in→{preconverging-disentailment–by}→postconverging-entailment> sublimating–existentialising–decisionality implications). It is herein contended however counterintuitive that the idea of understanding 100% of knowledge content at one go (as commonly assumed and cultivated with such content driven by public ratings and/or sales/merchandising as to excessive simplification, distortion, superficiality, ephemerality and attention-grabbing undermining organic knowledge) is very much detrimental for a profoundly engaging and sublimating practice of public exposition to knowledge as so-inducing the degradation/banalisation of content in order to supposedly capture the most number of people at one go, and so it is herein argued very much contrary to the natural human potential for
profound knowledge assimilation which is rather of hermeneutic/reprojecting/supererogating/zeroing potential. A lot of true learning, understanding and engagement (beyond attention-grabbing and simplification convenience) comes and expands hermeneutically/reprojectively/supererogatingly/zeroingly as to re-exposition to same and similar content for eliciting an active thought/contemplative engagement that is sufficiently challenging to people's true intellectual growth possibility as to creatively eliciting and developing true contemplative interest and not just passivity (however the habituation of a plainness that turns out to seem to be ‘the popular choice’ to which in reality all individuals can succumb to but which is as of their self-reflection actually subpotentiating with regards to the ‘broad existential panoply of human epistemic-growth/disquiet/discomfort\(\{\text{induced-sublimation, as-from-existence’s—effusing/ecstatic—inlining-as-historiality—science/authenticity/nonextrication}\}\)-beyond-merely-formulaicity-as-historicity-tracing\(\{\text{science-ideology/fashionability/distraction}\}\) as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness—by-reification/contemplative-distension’ necessary for prospective ontologisation/re-ontologisation as to epistemic-totalising—resubjecting or totalising-entailing-reconstrual of attendant—ontological-contiguity—effused—in-existentialising/contextualising/textualising-contiguity—in-elucidation-or-reification). We can appreciate in this regards the role of constraining existence in the ‘nonpresencing-<perspective–ontological-normalcy/postconvergence> anarchic-growth/anarchisation for re-ontologisation’ driving the natural sciences as to the ‘transversal and cross-subjecting sublimating-selectivity-and-desublimating-deselectivity as to manifest sublimation of scientific ideas’ effectively building up the various fields in perpetuative re-ontologisation (and so-construed as to a ‘science supererogating exactifying/precisioning–of-sublimation-<as-to-entailing-theoretical,-conceptual-and-operant-implications> conception’ that is not undermined by a false conception of science reflected by ‘a science ideology desublimation in <preconverging~motif-and-apriorising/axiomatising/referencing’–imbuing>–existentialising—enframing/imprintedness—{as-to- historicity-tracing— invert-presencing–hyperrealisation/hyperreal-transposition}).

However, because of the high emotional-involvement in the social, the default posturing one way or the other is ever always to adopt a <self-reflexive>-willed–will ideological stance (integrating <amplituding/formative> wooden-language-{imbued—temporal–mere-form/virtualities/dereification/akrasiatic-drag/denatured/preconverging-or-dementing}—

This should not be construed as a weakness as often wrongly implied of the anti-ideological stance of postmodern thought but rather speaks of a strength in the sense that it is naïve to think the notional–pedantising/muddling/formulaic-hollowing-out—{blurring/undermining-of-prospective-totalising-entailing,-as-to-entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness } of presencing—absolutising-identitive-constitutedness

social-vestedness/normativity-<discretely-implied-functionalism> can be veridically undermined/superseded by a ‘corresponding antipodal/diametrical compensatory subontologisation’ (as manifested between the conflicting capitalistic and communistic ideologies), rather than a true aspiration for a most profound prospective ontologisation/re-ontologisation in-of-itself so-implied as of supererogatory-progressivity as to human aporeticism overcoming/unovercoming in enabling prospective sublimating–nascence for human social-and-institutional-frameworks-of—referencing/registering/decisioning sublimating–existentialising–decisionality (even as the practicalities of the political environment inevitably will elicit thresholds of disontologising as to non-ontologising/subontologising conceptualisations); but then just as the natural scientist’s basic research is to ‘open-up’/’throw-up’/’reveal’ sublimating avenues for ‘more and more profound ontologising possibilities for engineering/technical practices’ likewise the genuine social intellectual–function/posture has to be able to ‘open-up’/’throw-up’/’reveal’ ‘more and more

ontological-contiguity —of-the-human-institutionalisation-process, ‘such a deprocrypticism imaginary is claiming to be the very rule of human civilisation’ as to the fact that ‘there is no recurrent-utter-uninstitutionalisation basis for advancing prospective base-institutionalisation’, and ‘no base-institutionalisation basis for advancing prospective universalisation’, ‘no universalisation basis for advancing prospective positivism/rational-empiricism’ and prospectively ‘no positivism–procrypticism basis for advancing prospective deprocrypticism/nondisjointing’ but for ‘the inherent nonpresencing—ontological-normalcy/postconvergence’ nature of existence’ instantiated hermeneutically/reprojectively/supererogatingly/zeroingly as to prospective human limited-mentation-capacity-deepening (in resolving the prior ‘dullness’ of the human mind); rendering nonsensical, nombrilistic and self-important pretenses/claims that are rather of manifest in-effect absolution—ontological-contiguity —educed—existentialising/contextualising/textualising-contiguity —constitutedness —in—preconverging-entailment> as to their given presencing—absolutising—identitive-constitutedness as so-fraudulently implied by our positivism–procrypticism anti-relativism stance (and eliciting herein the counterclaim that a rational-and-coherent defense of such a posture warrants a further claim recommending that humanity should rather go back to the state of ‘recurrent-utter-uninstitutionalisation as to its given manifest in-effect absolution—ontological-contiguity —educed—existentialising/contextualising/textualising-contiguity —constitutedness —in—preconverging-entailment> as a more coherent anti-relativism stance as so-expliciting the idea that human progress doesn’t/shouldn’t occur, even as paradoxically many such anti-relativism proponents seem to project progressive views without truly grasping the contradictory implications of progressivism and anti-relativism explaining their inclination to ‘disjointing totalisingly-disentailing—discretion/whim-of—
thought’ whereas ‘true knowledge has to carry its sublimation within itself as to its notional-nondisjointing totalising-entailing’ for it to be socially potent and effective). We can appreciate in this regards that the ‘sublimating-existential-decisionality potency of a scientist thought is not in-and-about themselves’ as so-manifested in a ‘normalised/stereotyped/selfhelping/feel-good conception of knowledge’ but rather ‘their inherent coherent knowledge formulation technicity/profundity and elucidating elaboration’ which then has to avoid explicited or implicitated contradictions with regards to the knowledge technicity/profundity ‘enhancement of the overall social-setup self-reflexivity as of the breadth of socially cogent percolation-channelling-<in-deferential-formalisation-transference> existentialising–frame of intellectualism’; as so-involving the illuminating genuine social intellectual–function/posture, the appraisal of the ‘overall social intellection-aptitude body’ as well as generalised social advocacy in contemplating about prospective ‘re-ontologising/potentiating/optimisable sublimating–nascence ontologising-depth perspective as of the full-potency of existence’. In other words, ‘existence imposes its sublimating rules to the human mortal subpotency’ as the very ‘fundamental meaning of science’ (notwithstanding vague human-subpotency self-important ‘methodologising/mutualising/organising/institutionalising’ anti-intellectual fooling-about and complotment); in a continual prospective relativistic process of human limited-mentation-capacity-deepening\(^5\). In this respect, it is herein contended as of a most intimate appreciation that such anti-relativism stances which will imply no human progress occurs are ‘so moronic’ it is doubtful these are held out of true conviction (bad or good), but rather are ‘cynical and strategic anti-intellectualism stances hanging upon mere institutional imprimaturting (as overplaying the card of ‘minimum-and-balancing expectations/anticipations of social-functioning-and-accordance—as-of–social-stake-contention-or-confliction’ as to the protection offered by sensibility/decorum of institutional imprimatur)’ in undermining the implications of
prospective profound-supererogation**\textsuperscript{95}** entailing \textit{amplituding/formative–epistemicity\textsuperscript{96}} totalising in-relative-ontological-completeness\textsuperscript{97} as associated with social equality and anti-bigotry movements as to class, race, gender, etc. (and so-reflected by the fact that their proponents have ‘hardly been able to meet the academic standards of the arguments implied and projected by proponents of relativism’ and rather turning to surreptitious and media-driven strategies avoiding intellectual engagement in inducing social and institutional numb-\textit{tracting}—of-desublimating— of-meaningfulness-and-teleology\textsuperscript{98} (as-perspective-lost-of- supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness-as-to-the-imbued-postconverging/dialectical-thinking-of-notional-deprocrypticism—in-dimensionality-of- \textit{sublimating} — \textit{amplituding/formative–epistemicity} growth-or-conflatedness /scalarisation-as-to-rescalarisation-as–re-ontologisation\textsuperscript{99}). Such ‘strategic and cynical institutionalised notional-pedantising/muddling/formulaic-hollowing-out—in-subontologisation/subpotentiation’ it is herein contended is much more potently effective in preconvergingly-de-mentating/structuring/paradigming social and institutional in-effect bigotedness (consciously or unconsciously) than the overt and superficial name-calling social manifestations conception of bigotry/prejudice/narrow-mindednes as to emotional distress; and so, as the deferential social and institutional interpretation of such in-effect bigotedness stances surreptitiously/underhandedly undermine the requisite social and institutional prospective human aporeticism overcoming/unovercoming as to profound supererogatory-acuity/perspicacity/astuteness/edginess/incisiveness eliciting of human ‘epistemic-growth/disquiet/discomfort\textsuperscript{100} (induced-sublimation, as-from-existence’s— effusing/ecstatic–inlining-as-historiality–[science/authenticity/nonextrication]-beyond-mere-formulaicity-as-historicity-tracing–[science-ideology/fashionability/distraction]} as to construction-of-the-Self in dispensing-with-immediacy-for-relative-ontological-completeness\textsuperscript{101} by-reification/contemplative-distension\textsuperscript{102}'. Basically, we can garner that ‘the very epistemic

It is herein contended that ‘the veridical prospect of human intelligibility for ontologisation’ is of necessity (given human limited-mentation-capacity) ‘epistemic-totalisingly\textsuperscript{33} educing as from human profound-supererogation\textsuperscript{96}; so-reflected as to the very incipient ‘<supererogatory–human-subpotency>–effecting (as to ontological-good-faith/authenticity\textsuperscript{97} or ontological-bad-faith/inauthenticity\textsuperscript{98}) imbued epistemic-totalising\textsuperscript{33} preformulating/preframing/premeaningfulness of notional~originariness-parrhesia,—as–spontaneity-of-aestheticisation’ as of undergirding human ‘self-reflexive–instigative-eventuating\textsuperscript{99} (as-to-teleological-instigative/incipient--willing/arbitrariness/waywardness/faithdrivenness/supererogating-for-human-intelligibility,-preceding-existence’s-eventuating-sublimating-validation/desublimating-invalidation) of human embodied-consciousness motif-and-apriorising/axiomatising/referencing-{of-attendant--ontological-contiguity -educed–existentialising/contextualising/textualising-contiguity }—elicited-incipience-of-existentialising–decisionality’. The implication here is that a human mental-reflex of ‘mere-formulaicity-<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> of ruling and rule-making as to apriorising/axiomatising/referencing’ is ever always of wanting ontological-veracity in need for ‘corrective human profound-supererogation\textsuperscript{96} imbuing human limited-mentation-capacity-deepening\textsuperscript{53}. In other words human ‘potential of profound-supererogation\textsuperscript{96}’ (as the corrective
potentiating of human limited-mentation-capacity for human limited-mentation-capacity-deepening\textsuperscript{(5)} is veridically what carries an abstract equivalence association/relation with existence’s inherent ontological-normalcy/postconvergence (and so rather than any human limited-mentation-capacity educing mere-formulaicity-\textless as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising\textgreater which rather induces ‘huma prospective regressive-shift in ontological-normalcy/postconvergence conceptualisation’). But then, all social-setups ‘as specifically instantiated social-constructs of human intelligibility’, are wedded whether as of relatively shallow-supererogation\textsuperscript{(6)} or relatively profound-supererogation\textsuperscript{(6)} (as to Being-development/ontological-framework-expansion–as-to-depth-of-ontologising-development-as-infrastructural-of—meaningfulness-and-teleology, institutional-development–as-to-social-function-development and living-development–as-to-personality-development) to ‘their given mere-formulaicity-\textless as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising\textgreater implied prior secondnaturesd reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation’ for their ‘social-functioning-and-accordance—as-of—social-stake-contention-or-confliction imbuing existentialising—frame of disontologising/ontologising-and-re-ontologising’ so-reflected in their \textless preconverging—‘motif-and-apriorising/axiomatising/referencing’—imbuing\textgreater existentialising—enframing/imprintedness—\textless as-tohistoricity-tracing—in-presencing—hyperrealisation/hyperreal-transposition\textgreater with their ontological-performance—\textless including-virtue-as-ontology\textgreater so-thresholding between their given ‘second-level as to human-subpotency ascendance driven self-referencing-syncretising human-existential-tautology as to desublimating derivation of intelligibility’ and their given ‘first-level as to existence-potency\textsuperscript{(7)}—sublimating—nascence ascendance driven self-referencing-syncretising human-existential-tautology as to sublimating derivation of intelligibility’. Hence registry-worldviews/dimensions imbued prior-institutionalisation-threshold–by–prospective-

In this regards, human ‘fundamental ontologising/disontologising confliction’ (with regards to ‘social-functioning-and-accordance—as-of-social-stake-contention-or-confliction imbuing existentialising—frame of disontologising/ontologising—and-re-ontologising’) undermines the notion that human social-setups are in ‘an absolute ontologising predisposition of sublimating—existentialising—decisionality relation with inherent existence’s sublimating—nascence’ (as is wrongly projected by ‘presencing—absolutising-identitive-constitutedness').
social-vestedness/normativity <discretely-implied-functionalism> even as this ‘may seem intuitively’ truer with domains of relatively less blurriness or low emotional-involvement as to ‘social-functioning-and-accordance—as-of—social-stake-contention-or-confliction imbuing existentialising–frame of disontologising/ontologising-and-re-ontologising’ like say the natural sciences and mathematics but this is not exactly the case from a bird’s-eye view reflecting holographically- <conjugatively-and-transfusively> the ontological-contiguity <of-the-human-institutionalisation-process as such a possibility is undermined by the very interactiveness of nascent-particular/incipient-and-material/technical-sublimations <blinded-to-their-relative-ontological-completeness—reference-of-thought–devolving> existentialising–decisionality and social-and-institutional-frameworks-of—referencing/registering/decisioning existentialising–decisionality) and manifest a disontologising disposition at prospective uninstitutionalised-threshold 02, and so even as ‘counterintuitively we may think as from our positivism/rational-empiricism registry-worldview/dimension that we are naturally predisposed to relate to the postconverging–de-mentating/structuring/paradigming implications of prospective true knowledge in terms of their veridical entailing-<amplituding/formative–epistemicity>totalising~in-relative-ontological-completeness 87’ without a disontologising disposition. Such a ‘nonpresencing—<perspective—ontological-normalcy/postconvergence> conception of epistemicity it is herein contended is of most profound social and overall knowledge aporeticism overcoming/unovercoming relevance. Human angling—of-imaginary (unlike the predisposition to mere-formulaicity—<as-to-mere-formulaic—methodologising/mutualising/organising/institutionalising> of human psychical-nascency) construes of knowledge as of emergent social conception and instigation for knowledge formation/creation (and so beyond and unfazed by its supposed manifest institutional capture/catchmenting) with regards to the veridical existential veracity of knowledge for prospective ontologising/re-ontologising sublimating/emancipating expansion of human ‘social-functioning-and-accordance—as-of—social-stake-contention-or-confliction imbuing existentialising—frame of disontologising/ontologising-and-re-ontologising’. Such an incipient social conception and instigation of prospective genuine-knowledge as to its veridical existential veracity underscored the Socratic-philosophers and their successors development of philosophical schools propounding universalising-idealisation in sublimating self-assuredness-of-ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming–as-being-as-of-existential-reality subverting the Ancient-sophists ‘non-universalising sophistry ontological-bad-faith/inauthenticity~preconverging–de-mentating/structuring/paradigming’, likewise budding-positivism movements with their correspondences and initiatives in sublimating self-assuredness-of-ontological-good-faith/authenticity~postconverging–de-mentating/structuring/paradigming–as-being-as-of-existential-reality ultimately led to the
subversion of medieval-scholasticism ‘non-positivising scholasticism ontological-bad-faith/inauthenticity’~preconverging–de-mentating/structuring/paradigming”, and today in many ways the postmodern movement is more potent as to its social dynamics of ‘liberation and emancipation’ (however incipiently crude as to its sublimating self-assuredness-of-ontological-good-faith/authenticity ~postconverging–de-mentating/structuring/paradigming – as-being-as-of-existential-reality) in the face of surreptitious and spurious strategies of anti-intellectual misanalysis, misinformation and complotment as to our modern-day ‘pedantic totalisingly-disentailing—discretion/whim-of-thought ontological-bad-faith/inauthenticity’~preconverging–de-mentating/structuring/paradigming”. Thus the more centrally defining element of human angling-of-imaginary speaks to human capacity for contemplation of metaphysics-of-absence-⟨ implicit-epistemic-veracity-of-nonpresencing-⟨ perspective–ontological-normalcy/postconvergence ⟩ ⟩ epistemic-projection which is in many ways elusive to psychical-nascency disposition. But then this is no more different for the implicit projective-insights approach to thinking pervading the natural sciences; as to a fundamental aptitudinal capacity to think in terms of perspectives (implicitly speaking to such notions like projections and fields of conceptualisation that do not absolutise our present conceptualising framework and actually factor in the limited-mentation-capacity as to apriorising/axiomatising/referencing to then project of the implications of human limited-mentation-capacity-deepening of apriorising/axiomatising/referencing). In this regards, (and as priorly indicated herein just as conceptualising ‘the actuality-⟨as-to-history⟩ of physical manifestations of the cosmos as astronomy’ with physics rather construed as the ‘archaeological/deconstructive–conceptualisation-⟨as-to-its-ahistorical-emancipation⟩ of such an actuality conception that is astronomy’ with the implication that the ‘beholdening astronomical manifestations of planetary phenomena, planets, stars, galaxies, etc. as to a given shape of the universe and its becoming’ are conceptualised from the ahistorical-emancipation of
