The Assumption Of S. Virgin Mary -Written in Cairo – Egypt – 1st April 2019

Abstract

The Main Conclusion

The solar group can't be created by any random process.

i.e.

The Big Bang Concept is Unreal

The previous conclusion is produced easily and clearly through the solar planets data analysis..

That means...

The Big Bang Theory contradicts strongly and clearly with the solar planets data analysis and their geometrical meanings which supports the claim that, the big bang concept is Unreal one.

This paper tries to show and prove this contradiction and to show that the solar planets data analysis is the best way to understand the solar group origin and motion which necessitates to review many other theories concern the solar group origin an motion.

2- Introduction

This paper claims to prove that, there are contradictions between the big bang concept and the solar planets data analysis...

Claiming that, the solar planets diameters can't be found by any random process

In following pages we will discuss our proves for this claim...but here we need to discuss another point... It's the geometrical meanings behind these 2 concepts

The big bang concept tells the solar group is created by random process

And here

I provide proves this isn't correct... what does that mean?

i.e.

The solar group is created by a mentioned logical, physical and geometrical process.

That's my main fighting point concerning the solar group geomtry...

The solar group creation is a process similar to giving birth for a child... there's no random process here neither in the male and female bodies structure nor in the child growth process.

What we have here is a mentioned process geometrically and physically ...

This conclusion importance is beyond our capacity to express now... basically because this conclusion gives us a clear justification to find the geometrical and physical explanation for each piece of matter and space in the solar group- it tells us nothing is found by random process or pure coincidence, rather the whole structure is found based on geometrical reasons and effects. which create a real obligation to know these geometrical and physical reasons and to understand the solar group geometrical structure as clear as possible.

That may justify our previous question

What Geometrical Role Is Done By The Total Solar Eclipse?

This question which I have tried to answer in my previous papers

Does Earth Velocity Causes The Eclipse Phenomena? (T.S. Eclipse III)

<http://vixra.org/abs/1903.0489>

Why We See the Sun Disc = the Moon Disc? (T.S. Eclipse II)

<http://vixra.org/abs/1903.0322>

Total Solar Eclipse Analysis (Part I)

3-The Solar group can't be Created By Any Random Process (Proves)

3-1 The Solar Planets Diameters can't be Created By Any Random Process

I- Data

Table No.1	No Error More Than 1.5%	
The Relationship		The Rate
Earth Diameter / Venus Diameter	=	A
= Mars Diameter / Earth Radius	=	
Mars Diameter / Venus Radius	=	A ²
= Venus Diameter / Moon Circumference	=	
= Moon Radius * π/ Mercury Diameter	=	
= Pluto Circumference / Mars Diameter	=	
=Uranus Circumference / Jupiter Diameter	=	
= lunar apogee radius /lunar perigee radius	=	
Pluto Circumference / Earth Radius	=	A ³
= Mercury Circumference / Earth Diameter	=	
= Earth Diameter / Moon Circumference	=	
= Uranus Radius / Mars Circumference	=	
= Jupiter Diameter / Saturn Diameter	=	
= Saturn diameter / Uranus Diameter	=	
Venus Radius / Mercury Diameter	=	A ⁴
= Uranus Diameter / Earth Circumference	=	
Uranus Diameter / Venus Circumference	=	A ⁵
Jupiter Radius / Uranus Diameter	=	A ⁶
= Mercury Diameter / Moon Diameter	=	
= Mars Diameter / Mercury Diameter	=	

I- Discussion

How The Solar Planets Were Created?

The current theory tells us that, there was a big star followed the sun which later is exploded and from his matter the solar planets were created..!

So the solar planets were created by random process!

And when the planets diameters are created by random process... these diameters will be related to each other strongly and clearly as the previous table shows and proves...?! No logic here....!

Conclusion/

The Solar Planets Diameters Can't Be Created By Any Random Process.

3-2 The Sun Diameter can't be Created By Any Random Process

I-Data

I found the following.....

The Sun Radius * Planet Eccentricity = Another Planet Diameter

Let's see that in the following table

Table No.2			
Constant	* Eccentricity	Diameter	Error
696000 km The Sun Radius	The Sun Radius * Mercury Eccentricity = 696000 * 0.205 = 142680 km	= Jupiter Diameter	-
	* Venus Eccentricity = 4872 km	= Mercury diameter	-
	* Earth Eccentricity = 11852 km	= Venus diameter	2.2%
	* Moon Eccentricity = 38280	= Venus Circumference	-
	* Mars Eccentricity = 65424 km	= Mars diameter * π^2	2.5 %
	* Jupiter Eccentricity = 34104 km	= Moon diameter * π^2	-
	* Saturn Eccentricity = 39672 km	= Earth Circumference	1%
	* Uranus Eccentricity = 32016	= Mercury Radius * $\pi (\pi+1)$	-
	* Neptune Eccentricity = 7656	= Pluto circumference	1.9%
	* Pluto eccentricity = 169824	= Moon radius * π^4	-

II-Discussion

Spite I can't explain the previous table geometrically, but we can easily see that, all used data are real solar planets data

Simply, we may conclude that, the sun diameter is created to be qualified for such table

Why or what the geometrical importance of this table... I still can't answer that, but because all data is a real data we can't consider this table is found by pure coincidences... of course there's a geometrical necessary behind it

But to explain this geometrical necessary we need to understand clearly why the planet motion has eccentricity...? Or much better why the planet motion trajectory is an ellipse

Please read my argument

Why The Solar Planet Motion Trajectory is An Ellipse?(revised)

<http://vixra.org/abs/1902.0291>

Conclusion/

The Sun Diameter Can't Be Created By Any Random Process.

3-3 Venus Diameter can't be Created By Any Random Process

Research Paper

(Gerges Francis Equation)

$$D = A R_v^2 \Pi^n$$

Where

D = The planet distance to the sun or to another planet

A = constant

R_v = Venus diameter

Let's see that in following

Table No. 3

Constant	* Π^n	The distance	Error
(Venus diameter) ²	* Π^0	149.6 mkm Earth orbital distance	2%
	* Π	455.8 m km Mars Orbital diameter	-
	* Π^2	1433.5 mkm Saturn Orbital distance	-
	* Π^2 /2	720.3 mkm Mercury Jupiter distance	-
	* Π^2 *2	Uranus orbital distance	-
	* Π^2 *4	Pluto orbital distance	1.4%
	* Π^3	Neptune orbital distance	1.1%
	* Π^{-1} *2	Earth Mercury distance	2%
	* Π^{-2} *4	Mercury orbital distance	2.5%
	* Π^{-2} *8	Venus Mars distance	-

Note please (-) means the error less than 1%

Conclusion/

Venus Diameter Can't Be Created By Any Random Process.

3-4 Earth Diameter can't be Created By Any Random Process

I- Data

Table No.4

"The Solar Planets Diameters Total Relationship With The Moon Orbit"

If Earth diameter = 12756 km, is considered to be = 1

i.e. The Earth Circumference which = 40080 km, will be just = Π

So The Following Is Correct	Error
❖ Earth Circumference = Π	-
❖ Solar Inner Planets diameter total = Π	-
❖ Moon motion free space (from perigee to apogee) (the free space without the moon diameter) = Π	1.3%
❖ Moon Perigee orbit radius = 9Π	-
❖ Solar outer planets diameters total = 9Π	-
❖ Moon orbit apogee radius = 10Π	1.2
❖ All solar planets diameters total = 10Π	1
❖ 2 Jupiter diameter + Saturn diameter = 10Π	-
❖ Saturn Circumference = 9.5Π = Moon orbit radius at total solar eclipse	-
❖ Jupiter Circumference = 11Π	1.9
❖ The Sun diameter = $11 \Pi^2$	1.2

II- Discussion

This table we have discussed frequently before...please review it clearly. The Earth Circumference should be considered the cornerstone in the solar planets diameters total...

The planet diameter has another importance because I claim that the planet orbital distance is defined relating to the planet diameter – this argument I have discussed in my previous paper

The Sun Gravity Concept is Unreal (Proves)

Conclusion/

Earth Diameter Can't Be Created By Any Random Process.

4- A Suggested Description For The Solar Group Origin And Creation

The Description Hypothesis:

The research provides 5 hypothesis as following

1st Hypothesis

The Solar Group Is Created From One Energy

1st Hypothesis Explanation:

- 1- Planet matter is created of Energy, ($E=mc^2$) supports that
- 2- Planet Orbital Distance (Space) is Energy also
- 3- Planet matter and orbital distance both are created from the same energy (will be explained with 3rd hypothesis)
- 4- The Solar Group Is Created Of One Energy Only (the original energy)
- 5- The solar group original energy is found before any Planet matter birth
- 6- The solar group is similar to one trajectory of Energy and each planet is a point on it.
- 7- The solar group also is similar to a great river has many canals and these canals created soils on their banks..., so the river with canals and soils are of them are created from the same water (the same energy)
- 8- The solar group is similar also to a creature body has different members, where the same blood moves through these members to provide the needs.

This Hypothesis is discussed in following papers

Solar Group Geometrical Structure

<http://vixra.org/abs/1805.0081>

and

Definition of Space (Revised)

<http://vixra.org/abs/1810.0307>

2nd Hypothesis

The Solar Group Is One Geometrical Structure

2nd Hypothesis explanation:

- 1- The solar group original energy depends on geometrical rules (will be explained with 4th hypothesis)
- 2- These geometrical rules form together one geometrical structure
- 3- The solar planets form together one geometrical structure. Each planet is a part of this same geometrical structure and performs a specific job or contribution for this same geometrical structure. So all solar planets cooperate and integrate together to produce this one geometrical structure.
- 4- The geometrical structure which is produced by the solar planets cooperation and integration is the same geometrical structure which is produced by the original energy geometrical rules. The original energy motion can be similar to a painting drawn by a pencil, then the planets matters are created to move in the same trajectory which can be similar to colours for this same painting but the picture is the same (the motion trajectory is the same).
- 5- Each planet data is created to be suitable for this planet role or contribution in the general geometrical structure.
- 6- There's no absent planet, that means the general geometrical structure is a complete by the found 10 planets (because the original energy created planets enough for the general geometrical structure)
- 7- Based on that, Solar Planets Data is in harmony with each other (and complementary to each other)
- 8- The planet motion depends on the planet data and not on the gravity
- 9- Based on the solar planets data general harmony, the planets motions general harmony is produced. And based on the planets motions general harmony, Kepler 3rd law is produced.
- 10- The general geometrical structure aims to pass the energy through the solar group (the energy passing through the solar group is similar to the blood passing through the creature body to provide the required energy)

This Hypothesis is discussed in following papers

Kepler 3rd Law Explanation (a Claim Against Nobel Prize Board Decision in Physics 2018)

<http://vixra.org/abs/1810.0053>

Kepler 3rd Law Explanation (Part No.2) (To Support my Claim Against Nobel Prize Board Decision in Physics 2018)

<http://vixra.org/abs/1810.0485>

3rd Hypothesis

The Planet mass and orbital distance is created from the same energy (Theory of Matter Creation)

3rd Hypothesis explanation:

- 1- In Young Experiment (Double Slit Experiment), the light coherence produces bright fringes and dark fringes
- 2- We see the bright fringes as matters (masses)
- 3- We see the dark fringes as distances (Space)
- 4- This explains the planet diameter and orbital distance relationships.

Why we see the bright fringes as matters? This will be answered in the following hypothesis..

This Hypothesis is discussed in following papers

Why The Light Is The Universe Highest Velocity?

<http://vixra.org/abs/1801.0369>

and

Special Relativity Hypothesis Reason (Matter Creation Theory)

<http://vixra.org/abs/1801.0343>

4th Hypothesis

The solar group moves based on a physical law and not in chaos because of the human mind effect on the universe (the planet motion and human knowledge relationship)

4th Hypothesis explanation:

- 1- The human mind contains electromagnetic waves (may travel by c velocity)
- 2- I suppose the realization process in human mind works by c velocity
- 3- Special Theory of Relativity tells us that, if there's a difference in velocity =c between 2 observers each one will see the other as light beam... but if both observers moves by c velocity there's no difference in velocity so both of them will see the other as a matter
- 4- That's why we see the bright fringes as matters because our minds works by this same velocity..
- 5- That answers why the planet moves by a physical law and no in chaos... because the matter in the universe is created as an effect of the human mind on the universe.

Note Please: the electric pulses moves slowly in the human body liquids because the light moves slowly in the liquids, but the light will restore his velocity in vacuum... which proves there's a motion with c velocity inside the human mind.. (Note also, the realization process is the responsible for vision, that tells the effect on vision in fact is effect on realization process!)

This Hypothesis is discussed in following papers

The Observer Effect On The Observation Results (Space = Energy=mc²)

<http://vixra.org/abs/1810.0343>

5th Hypothesis

Earth Moon is The Solar Group Energy Motion indicator

5th Hypothesis explanation:

- 1- The Solar Group Energy is reflected inside the moon orbit (to concentrate the energy)
- 2- The reflected energy in the moon orbit can be similar to a sea of water and the moon is a paper boat. That's why the moon is the energy motion indicator
- 3- The solar group energy is reflected in the moon orbit with small values (shorter distances) because of Lorentz length contraction effect
- 4- There are relativistic effects in the solar group which enable the solar group whole energy to be reflected in the moon orbit to concentrate the energy
- 5- We can't observe the high velocity which produces the relativistic effects but we can observe the relativistic effects in the planets different data
- 6- The relativistic effects cause the distances values to be seen in time values and vice versa...

This Hypothesis is discussed in following papers

The Moon Orbit Analysis

<http://vixra.org/abs/1811.0422>

The Moon Geometry

<http://vixra.org/abs/1811.0389>

The Conclusions

- 1- The Solar Planets motions trajectory is a pyramid
- 2- The planet motion trajectory is a square and not an ellipse
- 3- The energy concentration in the moon orbit aims to produce the sun rays where the sun rays are produced on the moon orbit energy

These Conclusions are discussed in following papers
