

1.the distance at  $3 \cdot 10^8$  m is independent of time

2.any amount of time is independent of the distance  $3 \cdot 10^8$  m

1.this means that the distance  $3 \cdot 10^8$  m is the distance that you cant add more time more than 1 second

2.this means that no matter how much time you add or take the distance  $3 \cdot 10^8$  is the same in all cases
