Version 1.0 - 6.07.2019

## Abstract

In first chapter of ToE-Framework “The Solution to the Problem of Time” [1] and second Chapter of ToE-Framework “The Solution to the Problem of Gravity” this author informed scientific community about the framework for the Theory of Everything concept, that must be applied in order to get back into Paradise on earth. Within this third chapter, the author explains in how to perform to decode the Matrix of thought and to get back into Paradise to save this planet earth from burning in climate change and to prevent the final fall of the empire of “human being” into the nothingness like the age of dinosaurs ended in nothingness.

Keywords: Theory of Everything, Key of Matrix, End of the World, World War, Artificial Intelligence, Flat Earth, Holographic Universe, Big Bang, Black Holes

## 1. Origin of Matrix

The Matrix of Thinking [1] which everyone in this world somehow “feels” to exist is – unfortunately – real: At today in fact we live in a computer-simulation. This paper is to give you a broad overview on how the Matrix is functioning and who has invented it to play the game with us, how we will switch off the Matrix and how will look the world in 100 years then.

The reader not familiar with the ToE-Framework should first study the initial papers on this. ([www.theoryofall.org](http://www.theoryofall.org))

## 2. Who invented the Matrix and who is the Player ?

There are two player involved in the Matrix. The first player is the past, that is culture and science since 10.000 years of knowledge that we teach our children to bring into future to carry on evolution. It is the accumulated EGO of human knowledge written in books for the youth to remember and improve.

Every now and then a culture of knowledge fails and fade away if there are serious problem with that (Maya, Egypt , Dinosaurs). On the way since the Egypt and greek cultures there were done serious mistakes recently (within the last 3000 years). We think about the world as there should be planets and the sun, solar system, a terrestrial globe, the speed of light c, that should be a limit, we think in GPS and artificial intelligence as well as big data. Unfortunately: this all is just a computer simulation someone is playing with us. The original real world is very different.

The second player is a small child. The genetic code and reality “nature” in us. We are born as children, not yet able to think, but already with full power of “learning” and “playing” the game. Then there is education (the player of the past) working on us.

The adult education that get in action, the child needs love, and the adult wants the child to learn the knowledge of the adult, that is finished with

learning and wants to give this “genetic code” of knowledge in books, computer and databases into the knowledge of thinking in the rising child, while the child is in “slaveship” (depending on the adult). One could say, if the unconditional growth of human society on earth and the destructive action (war, pollution fight each other) is the cancer, that “knowledge of the past” about how to perform healthy in reproduction in books is the genetic code that can cause the cancer, while as each child born has biological healthy genetic code on reproduction (biological in cell).

Somehow unconditional growth in society can happen by mistake if the code is broken (in knowledge) or unconditional growth can be causes in human body, if the genetic code of a biological cell gets ill.

There are two inventors now for the Matrix : Scientist in the past, that created wrong pictures of the world and the original functions of nature and the adult of today that invents the Matrix in every single child in this world, as they teach and “program” this wrong code into children to grow.

There are two player running the Play-Station then: First is Nature / living God in us, the forgotten little child with healthy genetic code, and the nature around us (living reality) that has also healthy genetic code. The “Thinker” is the Screen for projection. Therefore all of us live in a strange “Movie” that our Thinking watches.

The arena of the Matrix is our brain, where we get a “FILM”, that has nothing to do with reality, but is a computer-simulation programmed by the past knowledge to keep the (biological power of free spirit small children have in us to sleep).

## 3. How Reality looks like?

We live in a holographic world that is a three-dimensional world for perception on a two-dimensional round table. The world is first all in one (1 – dimensional), enfolds in two dimensions, and then into three dimensions. Lets have a look on the Theory of Everything – Framework [1].

We live in an ongoing Big-Bang in every little tiny point in Universe. As explained in [1] the concept “time” is the “observer” asking for cause (what is causing / forcing the observation) and “space” is the observer asking for observation in his “3dim” thinking.

Based on this, the 2 dimensional “working” area of forces is created in mind first. It looks like a flat circle in nothingness (time) that represents the balance of the two forces in universe that represent the inner and outer world (Thinking (Ego) / Reality).

It is linked here to [1] origin of universe (only time) not space:

$$\begin{aligned}
 Force_{universe} &= Frequency_{universe} = 1 \\
 &= \\
 \frac{t_{reality}}{t_{thought}} &= \frac{\text{second}_{reality}}{\text{second}_{thought}} \\
 &= \\
 \frac{\text{meter}}{\text{second}} &= 12 \cdot \pi c^3
 \end{aligned}$$

Interpretation: On the basis of the Big-Bang-Concept (Origin oth thought), there is battling inside and outside in a “higher” dimension at much higher speed than speed of light the origin where Space is first created out of time (String-Theory) into a wovering string of a line (m/s) and on this

basis flat earth is created to be a 2-dim circle first where 12 dimensions are in battle to balance forces. While as nature place action, the reaction on this is a thinking of the oberserver (Newton: action = reaction)

To combine the idea of String Theory with the Standard-Model, one can think of a 12 valve power machine running on the core of nature that looks like 12 dimensional fight of time with time (outside cause = action ; inside cause = reaction).

The reader should think of the outside of thinking something “living” as the outside is the body of the thinker in interaction with the enviroment of the body. The thought and EGO is not materialized in the body. As our body should represent “live” in universe, also the though should represent live. Therefore one can think of Action = Reaction principle that “free will” of our thinking is in battle with “free will” of our body at the core of universe.

$$\frac{m_1 \cdot m_2 \cdot m_3 \cdot m_4 \cdot m_5 \cdot m_6}{s_1 \cdot s_2 \cdot s_3 \cdot s_4 \cdot s_5 \cdot s_6}$$

At the core there are 12 dimensional power-machines creating the projection then into our perception. This represents the 12 Standard-particle-Modell, without the 5 particle needed for interaction (like photon). Those are “fake” (Matrix) as in reality there is no such thing as wave / particle dualism.

## 4. Summary of Reality in Reality

- **Gravitation an Inertia** is the base of the concept of “LOVE”, that is interaction of the soul representing the balance of powers between Thinking (Thought = Ego ) and feeling (Emotion = Body) within us. It is a real physical concept and the origin of space and material world we see. “Gravity” covers velocity meter / second as attraction (Gravity) and the inverse second / meter as to be “inertia”.
-

- The earth is center of the universe. To be precise: The surface of the earth is representing the 2-dim flat circle in on which each observer creates a 3-dim. Viewpoint of universe. As in the core physics time is the force on which all forces rely, the unified field force is m/s while in transformed in 3 dimensional observed space, it becomes the EM Force between positive and negative potential.
- The Special and General Relativity from Einstein are both falsified with this reality. There is only one speed that we all are in at the same time : It is not possible to go faster than this speed. At the same time it is not possible to go lower. The velocity we "see" is only a projection in our brain (EM-Forces on Eye) as interacting with nature.
- $E = m \cdot c^2 = 0 = \text{Zero}$  Out of this finding it becomes clear, that the Energy-concept in general is only to apply on the EM-Force, as "mass" carry no Energy. The total energy of Universe is always Zero, while there is the same amount of positive energy as the negative energy
- The conservation of energy or information in universe is not possible, as reality is only a balancing out of forces of an incoming signal (GOD unified One) that is duty to us

## 5. Unified Field on Earth (Flat Earth projection)

Figure 1 : Gravitational Field = Electromagnetic Field in 2 Dimension representing the Unified Force that is gravity as inverse proportional inertia from the center of creation (Big Bang)

Figure 1 represents the general Unified force :

$$F_{\text{gravity}} = \frac{\text{Cause}_{\text{action}}}{\text{Cause}_{\text{reaction}}} = \frac{T_{\text{action}}}{T_{\text{reaction}}} = \frac{m}{s}$$

$$F_{\text{inertia}} = \frac{\text{Cause}_{\text{reaction}}}{\text{Cause}_{\text{action}}} = \frac{T_{\text{reaction}}}{T_{\text{action}}} = \frac{s}{m}$$

This unified force is not yet in space, but only in brain (mind) to represent the edge on that the conscious EGO is in touch with universe. The "emotion" should be understood as any reception (view with eye, hearing, smelling etc) while the "thought" represents the image in brain / mind = pictures.

The Flat Earth community has not bad arguments here in regards to the EM-Field.

Figure 2 : Flat Earth representing the electromagnetic field as base for projection into 3 dimensional space due to ordering pictures in brain (imaginary time = order).

But obviously such projection looks impossible. This can be improved, if understood that on 2 dimensions time the observer asks for 3 dimensions in space. A Better demonstration then is given with a flat earth that is the surface of a balloon. This is a better perspective and allows to fit for the conservative scientific community as well as the progressive “Flat-Earth” community. A Surface somehow is also flat.

Figure 3 : Surface of earth is center of Universe in regards to “Gravity”. In regards to concept “mass”, there is  $E_{inertia} = -mc^2$  and  $E_{gravity} = mc^2$ . The total Energy on Mass in Universe sums up to Zero.

$$E = m_{gravity} c^2 - m_{inertia} c^2 = 0$$

The only useful idea is to set the surface of earth as center of universe then, although there is no “center” in general. Using the sun as center might be possible too, but in general there is no Gravitation between planets / stars.

This concept of Gravity and Inertia (Energy Universe = 0) is in line with findings of other authors (Fisher 2007, Chung-Xuan 2016, Tawdrous 2015) [2],[3],[4]. It is possible to recognize Matrix to be out there with observation and data.

## 6. Can Matrix be turned off and how will the future then look like?

The Matrix in thinking can be turned off for little children easily, as they just need to change the education that is to come to a education based of the “REALITY”. If children are not educated to mind-controlled machines, then they can develop normal intelligence while balancing feeling and thought. As today education is based on wrong thought only, the adult is not able to adopt that easy and to switch of the Matrix he himself has programmed.

The author can perform courses to switch of the Matrix, but would guess that in general for a 30-50 year old adult this will need 4 years work adoption to be able to live in and outside Matrix. For some people already adult it will be nearly impossible, as the “Ego” must be complete detached from the person. If the social group and lifestyle is changed 100% one may leave matrix within a year if there is willing.

If global population will stick to live in the matrix, it is programmed that there will be World War and Civil War and human being will not survive. As even the last 10 Human being will not survive as they would stick to learn sun in center of Solar System. Without fixing this error in code, there is no hope. The computer (machine) will end life on earth, as to switch of the Matrix, the computer and AI must fade away in the long run.

A digital machine is not able to balance the force of creation, as he can only calculate 0 and 1. The Balance between (0,5) he can't calculate.

Some perspective on life after switching off Matrix:

- There will be no more digital machines / computer / handy / database, as it will be known as useless and will be forbidden. There will be allowed only analog computer.
- Population will go down to 500.0000 within short, as people will learn to live in peace and not battle on the children
- All Religions will come together into one, that is the ONE LOVE = Gravity. All History (greek, christianity, Hindu and Islam) would fit into.
- There will be global human rights and duty (believe in one God (living earth) for every citizen on earth that he can claim at any court on this planet
- Justice will be held on court with old wise 12 people, that will interpret the will of earth with analoge computing and will suggest to "heal" persons, so prison is not necessary. There will be no "lawyers"
- It will be forbidden to have weapons of mass destruktion – killing and (for as long as internet is used, there will be total surveillance to the benefit of all.
- Eventually there will be no more cars / much less cars.
- There will be detailed suggestions (law) on how to treat between man and women sexual issues and living. This will not be depending on using condom prevention.
- There will be a therapy to overcome sexual assault and rape, as this is the most danger to any society.
- The people will enjoy life much more, as there is no need to fight anymore and competition is about being helpful for society.

- There will be lot of fun, work and joy
- There will be paradise again.

But if some "Neo" will ever be able to "fight the machines" is hard to guess. It is more likely the world war.

## 7. Unified Adam and Eve

Unifying Inertia and Gravity lead to the unconditional Love that is the "one love" as general law that gives load and duty on every human being to accept the laws of nature, as otherwise each single human being would be able to sink the ship we are all in on this earth.

This belongs to the setup of society, as the law of gravity set rule, the concept of "family" belongs to the society. Pushing individual familiy, is war within the society. Law of Gravity set rule, one must love the child of the brother in same way as the own.

In each case in love affairs (Adam+Eve going to leave paradise) this must be discussed at the terms of rules by Gravity.

## 8. Going to Mars.

As demonstrated with the key to Matrix, unfortunately, going to mars is no Option, as human being can not live on Mars. It belongs to the surface of earth, as otherwise it will slowly die due to imbalance of forces. (Gravity). The surface of earth is center of universe, that our biology (sensitive perception) is adapted to. As earth itself is a living organism, going to mars would be analog to remove the heart out of the human body to measure how often it can beat outside.

## 8. Saving this planet

Howto: 1 week holiday for each citizen on earth to party and have fun. Then we could start thinking on how to go back to the past and how to rebuild the schools. This is most profit for the young generation, as they don't need to go to this school anymore and can teach to adults.
