

## Atlantis in Auschwitz Birkenau

by Leon Elshout – aurichalcum2018 (at) protonmail.com, 18/1/2020

Researchers who tried to find Atlantis on the sea bottom did not have the slightest idea of what they were looking for. Firstly, the sea of Atlantis was an image of the Sheol, the realm of the dead. Plato's Atlantis was the underworld, while the physical Atlantis was in an opposite direction.

The Sea of Galilee is harp-shaped (Psalm 49:4) and was a blueprint for Atha-nazi-us Kirchers Atlantis map. The name Galilee sounds like Galicia in Poland where Auschwitz is located. It was here where the Jews were collectively driven into the death realm of the sheol, as Atlantis sunk down into the sheol. As king David will be the "Nashi" prince in the coming aion (Ezekiel 37:25), it was Adolf Hitler with his crazy king Atlas spirit who was the false "nazi" prince.

Auschwitz was located in the far most western point of Galicia as the uttermost western point of Atlantis faced gadeira. According to the mirroring principle it was Jesus who crossed the Sea of Galilee and went to the opposite direction of Galilee in the east (Luke 8:26).

On 16 october 1946 ten Nazi war criminals were hanged after the Nurnberg trial. These ten criminals were echo's of the ten kings of Atlantis or the ten sons of Haman in the Book of Esther. Auschwitz was a modern Atlantis that was surrounded by a sea of hostile nations. As Jerusalem is according to Psalm 2. Auschwitz teaches us something important about the inhabitants of Atlantis. They are mainly the Jews of the Endtimes who fulfill the prophecy of the Endtime dimensions of ATlantis that Plato kept secret for us.

What caused the circular shape of Plato's Atlantis, alternated by canals and cyclopic walls? It was the Plato's Cave shaped Sanhedrin court in the heart of the City of David that was a model for Atlantis.
