Evidences of a giant planet orbiting our sun, in an orbit whose period would last approximately of 15 thousand years it seems to have been found. The orbit of the new planet is gigantic, never coming closer to the Sun than 30.5 billion kilometers. The discovery of planets whose orbits go beyond Pluto is not new. We know Sedna, Haumea and Makemake, and also Eris, which is more massive than Pluto. But all these planets have much less mass than the giant planet that was recently found orbiting our sun. Here we show how massive planets like these can affect the human consciousnesses, when they approach the Sun, and pass nearby the Earth.

Key words: Giant Planet orbiting our Sun, Human Consciences, Earth’s Psychic Atmosphere, Psychic Interaction.

Introduction

The existence of other planets, orbiting our Sun beyond Pluto, has been frequently proposed by several astronomers. Usually they result from the search for explanations for anomalies in the orbits of objects near the Kuiper Belt.

In 2014, Scott Sheppard and Chad Trujillo wrote an article [1] on small objects with strange discrepancies in their orbits, which can have been caused by several factors. However, the most likely cause would be a new unknown planet.

Now, scientists at Caltech (Konstantin Batygin and Mike Brown) seem to have found evidences of a giant planet orbiting our sun, in an orbit whose period would last approximately of 15 thousand years. The article published by Batygin and Brown in the The Astronomical Journal [2], describes this new planet as being five to ten times more massive than the Earth, and having a diameter of two to four times the diameter of the Earth. The orbit of the new planet is gigantic, never coming closer to the Sun than 30.5 billion kilometers.

The discovery of planets whose orbits go beyond Pluto is not new, because we know of the existence of Sedna, Haumea and Makemake (dwarf planets), and also Eris, which is more massive than Pluto. But all these planets have much less mass than the giant planet that was recently predicted by Batygin and Brown.

In this article we show how massive planets like these can affect the human consciousnesses, when they approach the Sun, and pass close to Earth.

2. Theory

In a previous article we have shown that the mass of a material particle is composed by a real part and an imaginary part, both related to the gravitational mass of the particle [3], i.e.,

$$m_g = m_{\text{real part}} + km_{\text{imaginary part}}$$

where $k$ is coefficient related to the particle. The first term is therefore the real gravitational mass of the particle while the second is the imaginary gravitational mass of the particle.

It was shown that an imaginary body (containing imaginary mass only) is equivalent to a consciousness, in such way that imaginary particles would be equivalents to psychic particles and, therefore their masses (imaginary and psychic) would be equivalents. This lead to the conclusion that material particles have a psychic mass associated to its real mass. In a general way, it would be something similar to electric charges associated to material particles. Thus, similarly that the electric charges interact each other
through electrical interaction, and the gravitational masses by means of gravitational interaction, also psychic masses interact each other through a specific interaction, which we call psychic interaction.

We have shown that the psychic interaction between two psychics masses \( m_{\psi 1} \) and \( m_{\psi 2} \) generates a force, \( F_\psi \), whose expression is similar to the expression of the force between two gravitational masses (Newton’s law)\(^{[3]}\), i.e.,

\[
\vec{F}_\psi = -G \frac{m_{\psi 1} m_{\psi 2}}{r^2} \hat{\mu}
\]  
(2)

where

\[
m_{\psi} = m_{g(\text{imaginary})} = \chi m_{0(\text{imaginary})} = \chi (km_{0}) = km_0 \ i
\]  
(3)

Also it was shown in the mentioned paper that the superficial electric charge, \( q \), of a material particle (or consciousness) is related to its psychic mass, \( m_{\psi} \), by means the following expression:

\[
q = \sqrt{4\pi\varepsilon_0 G} \ m_{g(\text{imaginary})} i = \left(\sqrt{4\pi\varepsilon_0 G}\right) m_{\psi} i
\]  
(4)

From this equation we can conclude that the psychic mass of material particles with electric charge is given by

\[
m_{\psi} = -\frac{q}{\sqrt{4\pi\varepsilon_0 G}} i
\]  
(5)

\* According to Eq. (3), we have:

\[
m_{\psi} = m_{g(\text{imaginary})} = \chi m_{0(\text{imaginary})} = \chi (km_{0}) i
\]

Then, Eq. (5) can be rewritten in the following form

\[
m_{\psi} = \chi (km_{0}) i = -q\sqrt{4\pi\varepsilon_0 G} i
\]

whence we obtain

\[k = -q/\chi m_{0}\sqrt{4\pi\varepsilon_0 G} i .\]

It was also shown in reference \([2]\) that in the case of electrons, \( k = -2/\sqrt{3} \)

and \( \chi = \chi_e = -1.8 \times 10^{21} \) (then electrons have positive psychic masses); in the case of protons \( \chi = \chi_p = -9.7 \times 10^{17} \) and \( k = +2/\sqrt{3} \) (then protons have negative psychic masses). These values are in agreement with the above expression of \( k \).

If \( q < 0 \) then \( q = -|q| \). Thus, Eq.(5) gives

\[
m_{\psi} = +\frac{|q|}{\sqrt{4\pi\varepsilon_0 G}} i
\]  
(6)

If \( q > 0 \) then \( q = +|q| \). Then, Eq. (5) yields

\[
m_{\psi} = -\frac{|q|}{\sqrt{4\pi\varepsilon_0 G}} i
\]  
(7)

On the other hand, the psychic mass of psychic particles (containing psychic mass only) is given by

\[
m_{\psi} = m i
\]  
(8)

where \( m \) a real mass.

The electric charge of Earth’s is \( q_E \approx -500,000 C \) \([4]\), because the electrostatic potential near the surface of the Earth is about 100 V \([5, 6]\). Thus, according to Eq. (5) the Earth’s psychic mass is given by

\[
m_{\psi E} = +5.8 \times 10^{15} i
\]  
(9)

Now consider the following situation: A massive planet X, with a negative electric charge\(^\dagger\), \( q_X \), and individual psychic mass, \( m_{\psi X} = +\left(\sqrt{4\pi\varepsilon_0 G} \right) \ i = +1.16 \times 10^{10} |q_X| i \), passes near the Earth (individual psychic mass, \( m_{\psi E} = +5.8 \times 10^{15} i \)). In the planet Earth exists human consciousnesses with positive psychic mass, \( m_{\psi E} = +m_{cE} i \), and negative psychic mass, \( m_{\psi E} = -m_{cE} i \), incorporated in human bodies\(^\ddagger\).

Therefore, the psychic force that the individual psychic mass of the planet X, \( m_{\psi X} \), exerts on one

\[\dagger \text{Superficial electric charge.}\]

\[\ddagger \text{It was shown in a previous paper \([7]\) that the cultivation of good-quality thoughts is highly beneficial to a person because increase the psychic mass of its consciousness. On the contrary, the cultivation of bad-quality thoughts makes human consciousness lose psychic mass. Thus, the psychic masses of the human consciousnesses can be positive or negative (by the frequent loss of psychic mass).} \]
human consciousnesses with positive psychic mass, is given by

$$\vec{F}_v^{(+)}(\omega_X \& \omega_E) = -\vec{F}_v^{(-)}(\omega_E \& \omega_X) = -G \frac{m_{\omega_X} m_{\omega_E}}{R^2} \hat{\mu} =$$

$$= -G \left(1.16 \times 10^{10} |q_x| i \right) \left(1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu} =$$

$$= G \left(1.16 \times 10^{10} |q_x| \left(1.16 \times 10^{10} |m_{\omega_E} i| \right) \right) \hat{\mu}$$

where \( \hat{\mu} \) is a versor oriented from the planet X to Earth.

The psychic force that the individual psychic mass of the planet X, \( m_{\omega_X} \), exerts on one human consciousnesses with negative psychic mass, is given by

$$\vec{F}_v^{(+)}(\omega_X \& \omega_E) = -\vec{F}_v^{(-)}(\omega_E \& \omega_X) = -G \frac{m_{\omega_X} m_{\omega_E}}{r_2^2} \hat{\mu} =$$

$$= -G \left(1.16 \times 10^{10} |q_x| i \right) \left(-1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu} =$$

$$= -G \left(1.16 \times 10^{10} |q_x| \left(-1.16 \times 10^{10} |m_{\omega_E} i| \right) \right) \hat{\mu}$$

The psychic force that the individual psychic mass of the planet X, \( m_{\omega_X} = +1.16 \times 10^{10} |q_x| i \), exerts on the individual psychic mass of Earth, \( m_{\omega_E} = 5.8 \times 10^{15} i \), is expressed by

$$\vec{F}_v^{(+)}(\omega_X \& \omega_E) = -\vec{F}_v^{(-)}(\omega_E \& \omega_X) = -G \frac{m_{\omega_X} m_{\omega_E}}{R^2} \hat{\mu} =$$

$$= -G \left(1.16 \times 10^{10} |q_x| i \right) \left(5.8 \times 10^{15} i \right) \hat{\mu} =$$

$$= G \left(1.16 \times 10^{10} |q_x| \left(5.8 \times 10^{15} i \right) \right) \hat{\mu}$$

A positive psychic mass \( m_{\omega_E} = +m_{\omega_E} i \) is maintained in the human body \( (m_{\omega_B} = +1.16 \times 10^{10} |q_B| i) \) by means of the contrary psychic forces between, \( m_{\omega_E} \), and \( m_{\omega_B} \), which is given by

$$\vec{F}_v^{(+)}(\omega_B \& \omega_E) = -\vec{F}_v^{(-)}(\omega_E \& \omega_B) = -G \frac{m_{\omega_B} m_{\omega_E}}{r_2^2} \hat{\mu} =$$

$$= -G \left(1.16 \times 10^{10} |q_B| i \right) \left(+1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu} =$$

$$= G \left(1.16 \times 10^{10} |q_B| \left(+1.16 \times 10^{10} |m_{\omega_E} i| \right) \right) \hat{\mu}$$

The psychic forces between a positive psychic mass \( m_{\omega_E} = +m_{\omega_E} i \) and the individual psychic mass of Earth, \( m_{\omega_E} = 5.8 \times 10^{15} i \), are given by

$$\vec{F}_v^{(+)}(m_{\omega_E} \& \omega_E) = -\vec{F}_v^{(-)}(m_{\omega_E} \& \omega_E) = -G \frac{m_{\omega_E} m_{\omega_E}}{r_2^2} \hat{\mu} =$$

$$= -G \left(+5.8 \times 10^{15} i \right) \left(+1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu} =$$

$$= G \left(+5.8 \times 10^{15} i \right) \left(+1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu}$$

The psychic forces between a negative psychic mass \( m_{\omega_E} = -m_{\omega_E} i \) and the individual psychic mass of Earth, \( m_{\omega_E} = 5.8 \times 10^{15} i \), are given by

$$\vec{F}_v^{(+)}(m_{\omega_E} \& \omega_E) = -\vec{F}_v^{(-)}(m_{\omega_E} \& \omega_E) = -G \frac{m_{\omega_E} m_{\omega_E}}{r_2^2} \hat{\mu} =$$

$$= -G \left(-5.8 \times 10^{15} i \right) \left(-1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu} =$$

$$= G \left(-5.8 \times 10^{15} i \right) \left(-1.16 \times 10^{10} |m_{\omega_E} i| \right) \hat{\mu}$$

The resultants upon the human consciousnesses
with positive psychic mass \( R_{+\mathcal{E}} \), and upon the human consciousnesses with negative psychic mass \( R_{-\mathcal{E}} \), are respectively, given by (See Fig.1)

\[
\begin{align*}
\vec{R}_{+\mathcal{E}} & = F_{\mathcal{E}[m_{\mathcal{E}},+\mathcal{E}]} + F_{\mathcal{E}[m_{\mathcal{E}},-\mathcal{E}]} = \nonumber \\
& = +G\left(1.16\times10^{10}\right)\frac{|q_{\mathcal{E}}| m_{\mathcal{E}}}{R^2} \hat{\mu} + \nonumber \\
& + G\left(5.8\times10^{15}\right)\frac{m_{\mathcal{E}}}{r_{\mathcal{E}}} \hat{\mu} = \nonumber \\
& = +G\left(1.16\times10^{10}\right)\frac{|q_{\mathcal{E}}| m_{\mathcal{E}}}{5\times10^{12}R^2} + \frac{1}{r_{\mathcal{E}}} \hat{\mu} \quad (17)
\end{align*}
\]

\[
\begin{align*}
\vec{R}_{-\mathcal{E}} & = F_{\mathcal{E}[m_{\mathcal{E}},-\mathcal{E}]} + F_{\mathcal{E}[m_{\mathcal{E}},+\mathcal{E}]} = \nonumber \\
& = -G\left(1.16\times10^{10}\right)\frac{|q_{\mathcal{E}}| m_{\mathcal{E}}}{R^2} \hat{\mu} - \nonumber \\
& - G\left(5.8\times10^{15}\right)\frac{m_{\mathcal{E}}}{r_{\mathcal{E}}} \hat{\mu} = \nonumber \\
& = -G\left(5.8\times10^{15}\right)\frac{|q_{\mathcal{E}}| m_{\mathcal{E}}}{5\times10^{12}R^2} + \frac{1}{r_{\mathcal{E}}} \hat{\mu} \quad (18)
\end{align*}
\]

Note that, if

\[
|q_{\mathcal{E}}| << \left(8.6\times10^{-11}gR^2/|G| - 5\times10^2R^2/r_{\mathcal{E}}^2\right) \equiv \nonumber \\
\leq 1.2 \times 10^{28} C \quad (19)
\]

then \( g_{_{\mathcal{E}}} = R_{_{\mathcal{E}}} / m_{_{\mathcal{E}}} << g \).

This shows that, under these conditions, the psychic accelerations are negligible when compared to Earth’s gravity acceleration.

The psychic force that the individual psychic mass of the planet X exerts on the individual psychic mass of Earth, is expressed by \( F_{\mathcal{E}[m_{\mathcal{E}},+\mathcal{E}]} \) (Eq. (12)). By comparing the intensity of this force with the intensity of the gravitational force between Earth and the Sun, \((-Gm_{\mathcal{E}}m_{E}/r_{S}^2 \equiv 3.4 \times 10^{22} N\)\), then we can easily see that \( F_{\mathcal{E}[m_{\mathcal{E}},+\mathcal{E}]} << -Gm_{\mathcal{E}}m_{E}/r_{S}^2 \)\), because it is expected that \( |q_{\mathcal{E}}| << 5.07 \times 10^{4} (R_{\mathcal{E}}/G) \equiv 6.8 \times 10^{3} C \).

Therefore, we conclude that the Earth’s trajectory around the Sun will not be significantly disturbed by the psychic interaction between the planet X and Earth.

On the other hand, note that if \( |q_{X}| >> \left(\frac{q_{\mathcal{E}}}{r_{B}} - \frac{5 \times 10^{5}}{r_{E}^2}\right)^{2} \cong 10^{9} C \) \( (20) \)

then \( R_{_{\mathcal{E}}} >> \vec{F}_{\mathcal{E}[m_{\mathcal{E}},+\mathcal{E}]} \) (Eqs. (18) and (14)).

When this occurs, the link between the human consciousnesses with negative psychic masses and the human bodies, in which they are incorporated into, will be broken. After, the mentioned consciousnesses will be sucked to the planet X, by means of the action of the force \( \vec{R}_{_{\mathcal{E}}} \).

Similarly, the human consciousnesses with negative psychic masses, which are not incorporated into human bodies on Earth, also they will be sucked to the planet X (See Fig.1).

The removal of the consciousnesses with negative psychic masses means that all the evil will be removed from Earth because they are basically the cause of the evil on Earth.

Under these new conditions, the consciousnesses with positive psychic masses, which will remain on Earth will live in peace, evolving with their good-quality thoughts. Stated thus, “the good shall inherit the earth”.

Finally, note that, according to Eqs. (19) and (20), the planet X should have negative electric charge \( q_{X} \) in the range

\[
10^{9}C << |q_{X}| << 10^{10} C,
\]

in order to produce the phenomena above mentioned.

This electric charge range is not exotic or unusual in the Universe, on the contrary, for example, it is known that the periastron rate of the double pulsar PSR J0737-3039A/B system allows inferring \( |Q_{_{NS}}| \equiv 5 \times 10^{9} C \).

According to the perigiragon precession of the main sequence S2 star in Sgr A*, the electric charge carried by the compact object hosted in the Galactic Center may be as large as \( |Q_{_{C}}| \equiv 4 \times 10^{27} C \).

Considering that \( m_{_{\mathcal{E}}} = \pm m_{E} i \) (see Eq.(8)), and that, according to Eq. (5) we have

\[
m_{_{\mathcal{E}}} = \frac{-q_{_{\mathcal{E}}}}{\sqrt{4\pi\varepsilon_{0} G}} \quad (21)
\]

\(^{8}\) Obviously, this will cause the death of the person.
Fig. 1 – Psychic Interaction among Planet X, Earth and Human Consciousnesses:

(a) Human consciousnesses with negative psychic mass, incorporated to human bodies.
(b) Human consciousnesses with negative psychic mass, not incorporated to human bodies.
(c) Human consciousnesses with positive psychic mass, incorporated to human bodies.
Then, we can write that
\[
m_{cE} = -\frac{q_{vE}}{\sqrt{4\pi\varepsilon_0 G}} = \frac{|q_{vE}|}{\sqrt{4\pi\varepsilon_0 G}}
\] (22)
where \( q_{vE} \) is the electric charge related to \( m_{cE} \) (the psychic mass of the human consciousness).

Starting from Eqs. (17), (18) and (22), we can easily show that
\[
R_{cE} = |\vec{R}_{cE}| = |\vec{R}_{cE}| = \frac{1}{4\pi\varepsilon_0} \frac{|q_{vE}|^2}{R^2} (|q_{vE}|^2) (23)
\]

In practice, the maximum psychic force, \( F_e^{\text{max}} \), which is possible to exert on a consciousness, placing it very near \( r_{\min} \approx 1m \) to a powerful generator of Van Der Graaf \( (q_{\text{max}} = CV = 4\pi\varepsilon_0 V = 4\pi\varepsilon_0 (1m)(10MV) \approx 10^{-3} C) \), or very near to a plate of a big capacitor with large electric charge \( q_{\text{max}} = CV_0 \varepsilon_r (A)dV = 100\varepsilon_0 (10^{-3})^3 (500) \approx 10^{-3} C) \) is given by
\[
F_{e}^{\text{max}} = \frac{1}{4\pi\varepsilon_0} \frac{|q_{vE}|^2 |q_{\text{max}}|}{r_{\min}^2} \approx 10^6 |q_{vE}| (24)
\]

Then, by dividing equations (23) and (24) member by member, we get
\[
R_{cE} = \left( \frac{|q_{X}|}{|q_{\text{max}}|} \right) \frac{r_{\min}^2}{R^2} \frac{|q_{vE}|^2}{F_{e}^{\text{max}}} \approx 10^6 \left( \frac{|q_{X}|}{R^2} \right) F_{e}^{\text{max}} (25)
\]

Substitution of \( R \approx 3 \times 10^{13} m \) into Eq. (25) yields
\[
R_{cE} = 10^{-24} |q_{X}| F_{e}^{\text{max}} (26)
\]

The value of \( |q_{X}| \) is correlated to the intensity of the psychic attraction force that links the human consciousness to the human body, which it is incorporated. In order to calculate the intensity of this force, we start from Eq. (4), which tells us that the superficial electric charge, \( q_s \), of a consciousness is related to its psychic mass, \( m_{\varphi} \), by means of the following expression
\[
q_s = \sqrt{4\pi\varepsilon_0 G} m_{\varphi} i (27)
\]
that can be rewritten as
\[
m_{\varphi} = -\frac{q}{\sqrt{4\pi\varepsilon_0 G}} i (28)
\]
From this equation, we have derived the Eqs. (6) and (7). Equation (6) tells us that, if the electric charge associated to a psychic mass is negative, then the psychic mass is positive, and vice-versa. Equation (7) tells us that, if the electric charge associated to a psychic mass is positive, then the psychic mass is negative, and vice-versa.

The Human Consciousnesses are obviously, connected to the human bodies (more exactly connected to their Material Individual Consciousnesses**), which they are incorporated. This connection should be similar to an electrical umbilical cord, in order to transfer to the human bodies the commands sent by the Human Consciousnesses incorporated to the human bodies. Then, electric charges would be transferred from the Human Consciousnesses to the Material Individual Consciousnesses of the bodies, and vice-versa.

The transfer of negative electric charges from a Human Consciousness to a Material Individual Consciousness of a human body, would occur, for example, during the increasing of negative psychic mass of a consciousness, according to Eq. (7). Similarly, the transfer of negative electric charges from the Material Individual Consciousnesses of human bodies to the Human Consciousnesses, which they are incorporated, it would occur during the decreasing of negative psychic mass of the consciousnesses. Obviously that there would have an electrostatic equilibrium between the Human Consciousnesses and the Material Individual Consciousnesses of the human body, in such way that the electric charge in the human consciousness, \( q_{vE} \), and the electric charge transferred to the Material Individual Consciousness of the human body, \( q_{vb} \), are symmetric and equals in modulus, i.e., \( q_{vb} = -q_{vE} \).

In this context, the psychic force that links a human body (its Material Individual Consciousness) to a Human Consciousness†† with a negative psychic mass, \( m_{vE} < 0 \), \( m_{vE} < 0 \Rightarrow q_{vE} > 0 \Rightarrow q_{vE} = -q_{vE} \Rightarrow q_{vb} = -q_{vE} \).

** See about the consciousnesses of the materials in reference [2]. The Material Individual Consciousnesses are formed by the aggregation of psychic mass associated to the protons and the electrons of a body. The psychic masses of neutrons are null. The protons have negative psychic masses (positive electric charge) while the electrons have positive psychic mass (negative electric charge). Thus, the total electric charge associated to a Material Individual Consciousnesses is null.

†† The Human Consciousness is the consciousness incorporated to the human body, which leaves the human body after its death. The Material Individual Consciousness is the consciousness which results from the aggregation of psychic mass of matter of the body.
can be expressed by means of the following equation

\[ F_{\text{link}} = \frac{1}{4\pi \varepsilon_0} \frac{q_{\text{scE}} q_{\phi b}}{r^2} = \frac{1}{4\pi \varepsilon_0} \left( \frac{|q_{\text{scE}}|}{r^2} - \frac{|q_{\text{scE}}|}{4\pi \varepsilon_0} \right) \]  

Similarly, the psychic force that links a human body (its Material Individual Consciousness) to a human consciousness with positive psychic mass, \( m_{\text{scE}} > 0 \),

\( m_{\text{scE}} > 0 \Rightarrow q_{\text{scE}} < 0 \Rightarrow q_{\text{scE}} = -\left| q_{\text{scE}} \right| \Rightarrow q_{\phi b} = -\left| q_{\text{scE}} \right| \),

is given by

\[ F_{\text{link}} = \frac{1}{4\pi \varepsilon_0} \frac{q_{\text{scE}} q_{\phi b}}{r^2} = \frac{1}{4\pi \varepsilon_0} \left( \frac{-|q_{\text{scE}}|}{r^2} + \frac{|q_{\text{scE}}|}{4\pi \varepsilon_0} \right) \]  

Note that in both cases the expression of the psychic force that links the Human Consciousness to the body is the same. In this equation, the variable \( r \) is the distance between the center of the human consciousness and the center of the Material Individual Consciousness of the human body (See Fig.2).

The value of \( r \) reaches its minimum value when the Human Consciousness is inside the human body. Based on the dimensions of the human bodies, we can conclude that \( r_{\text{min}} << 1 \text{cm} \). Under these conditions, the force, \( F_{\text{link}} \), has its maximum value given by

\[ F_{\text{link}}^{\text{max}} = \frac{1}{4\pi \varepsilon_0} \frac{q_{\text{scE}}^2}{r_{\text{min}}^2} \]  

The necessary condition for a human consciousness, with negative psychic mass, be sucked by the planet X is that \( |R_{-cE}| > F_{\text{link}}^{\text{max}} \)

\( |R_{-cE}| \) is given by Eq. (23). Thus, we can write that

\[ \left| \frac{1}{4\pi \varepsilon_0} \frac{|q_{\phi b}|}{R^2} \right| > \left| \frac{1}{4\pi \varepsilon_0} \frac{q_{\text{scE}}^2}{r_{\text{min}}^2} \right| \]

whence we obtain

\[ |q_{\phi b}| > \left( \frac{R}{r_{\text{min}}} \right)^2 |q_{\text{scE}}| \]  

Equation (21) tells us that

\[ m_{\text{scE}} = |q_{\text{scE}}/\sqrt{4\pi \varepsilon_0 G}| \]

and

\[ |q_{\text{scE}}| = \sqrt{4\pi \varepsilon_0 G} |m_{\text{scE}}| \]

since \( k \equiv 1 \) (See footnote of column 1, page 2).

In the particular case of Human Consciousnesses incorporated in human bodies on Earth (little-evolved consciousnesses, and therefore with low psychic masses), we can assume that

\[ |q_{\text{scE}}^{\text{max}}| \approx |m_{\phi b}^{\text{max}}| \]
By comparing Eqs. (34) (37) and (35), we get

$$q_{\text{max}}^x = \sqrt{4\pi\varepsilon_0 G m_{\text{max}}^x} \approx \sqrt{4\pi\varepsilon_0 G m_{\text{max}}^{\text{ab}}} =$$

$$= \sqrt{4\pi\varepsilon_0 G m_{\text{max}}^{\text{ab}}}$$

(38)

assuming that $m_{\text{max}}^{\text{ab}} \approx 200$ kg, then Eq. (38) gives

$$q_{\text{max}}^x \approx 1 \times 10^8 C$$

(39)

By substuting this value into Eq.(32), and also $R = 3 \times 10^{13}$ m; $r_{\text{min}} << 1$ cm, we obtain

$$\left| q_{\text{max}}^x \right| \gg 10^{23} C$$

(40)

Thus, if $|q_x| \approx 10^{25} C$, for example, Eq. (26) tells us that

$$R_{cE} \approx 10 F_{cE}$$

(41)

This means that the intensity of the psychic force, $R_{cE}$, exerted by the planet X in the consciousnesses over the Earth, will be about 10 times higher than maximum psychic force, $F_{cE}^{\text{max}}$, which is possible to exert on a consciousness, placing it very near to a powerful generator of Van Der Graaf, or very near to a plate of a big capacitor with large electric charge.

Note that in spite of the intensity of the force $R_{cE}$, the maximum acceleration that it will produce upon the consciousnesses over the Earth will be very smaller than the local gravity acceleration, $g$, (see Eq. (19)).

While the psychic force $R_{cE}$ sucks from the Earth the consciousnesses with negative psychic mass, simultaneously the psychic force $R_{cE}^+$ compresses against Earth the Human Consciousnesses with positive psychic mass (See Fig.3). However, these consciousnesses do not leave the bodies which are incorporated (See Fig.3 (b)) because they can not penetrate in the Earth’s consciousness [9].

Now, we will show that, when Human consciousnesses leave abruptly the human bodies they (the Human bodies) can become imaginary bodies (psychic bodies), and consequently they disappears from the real Universe.

When a human being dies its vital energy, correspondent to $E_{hb} \cong 2500$ kcal $\approx 1.1 \times 10^7$ joules, is radiated from its body‡‡. Obviously, this amount of energy (equivalent to 3kg of TNT) should be radiated in a spectrum of extra-low frequencies (possibly the lower frequencies that the human body can emit). On the contrary, the emission of this energy would produce destruction in the local.

Delta waves are the slowest recorded brain waves in human beings. They were recently defined as having a frequency between 0.01 – 4 Hz [10]. Spontaneous slow fluctuations (0.1–1 Hz) and infra-slow fluctuations (0.01–0.1 Hz) are ubiquitous in brain dynamics. In electrophysiological recordings, these fluctuations have been observed both in single-unit and multiunit firing rates [11, 12, 13, 14, and 15]. Assuming that the lower frequencies of delta radiation correspond to the lower frequencies of radiation that a human body can emit, and that, based on the experimental observations, these frequencies should be of the order of 0.001Hz, then we can infer that the spectrum

‡‡ The liberation of this postmortem energy is a phenomenon known for centuries.
of emission of the energy $E_{hh}$ should have frequencies very close to 0.001Hz. It is easy to show that human bodies practically do not absorb radiations with this frequency. Consider for example, the following equation of the Electrodynamics \[ hbE \], which gives the length $\delta$ necessary to totally absorb a radiation with frequency $f$, through a body with electrical conductivity $\sigma$, magnetic permeability $\mu$, and electrical permittivity $\varepsilon$, i.e.,

$$
\delta = 5 \sqrt{\frac{2 \pi f}{\sqrt{\frac{1}{2} \varepsilon \mu \left(1 + \left(\frac{\sigma}{2 \pi f \varepsilon}\right)^2\right) - 1}}}
$$

(42)

For human bodies we have that $\varepsilon \cong \varepsilon_0$, $\mu \cong \mu_0$. The electrical conductivity of the human bodies is very close to the electrical conductivity of the sea water (5S/m). By substitution of these values, and $f \cong 0.001Hz$, into equation above we obtain $\delta \cong 35,000m$, which shows that human bodies practically do not absorb energy of the radiations with $f \cong 0.001Hz$.

When the consciousness of a human being is removed abruptly, as previously mentioned (for example in the case of planet X), the energy $E_{hh}$ should be radiated in a very short time interval. This situation is similar to the case, when by collision with another particle or atom the valence electron is raised to an excited state, and it remains there for a period (mean life) $\Delta t \cong 1.6 \times 10^{-8}s$ before jumping down to a lower level with emission of a photon. The emission occurs during a time interval of the order of $\Delta t$. In the case of the consciousness removed abruptly, the energy $E_{hh}$ should then remain, after the consciousness be removed, for a similar period $\Delta t \cong 10^{-8}s$ before to be emitted, in a time interval of the order of $\Delta t$. Consequently, we can write that the power of the radiation emitted from the human body is $P_A = 1.1 \times 10^7$ joules/$10^{-8} s \cong 1.1 \times 10^{13}$ watts, and the radiation density, is given by $D_X = P_A / A_{humanbody} \cong 7 \times 10^4$ watts/$m^2$. Under these conditions, the gravitational mass of the human body is strongly reduced, according to the following equation [3]:

$$
m_{hh} \cong \left\{ 1 - 2 \left[ 1 + \left( \frac{\frac{\mu_{hh}}{4\pi \rho_{hh} c}}{\frac{\sigma_{hh} D_X}{\sqrt{4\pi \rho_{hh} c}}} \right)^2 - 1 \right] \right\} m_{0hh} \cong -0.1 m_{0hh}
$$

(43)

where $\mu_{hh} \cong \mu_0 = 4\pi \times 10^{-7} H / m$ is the magnetic permeability of the human body; $\sigma_{hh} \cong 5S / m$ is its electrical conductivity, and $\rho_{hh} \cong 1010kg / m^3$ is its density.

Note that $\chi_{hh} = m_{hh} / m_{0hh} \cong -0.1$ is inside the range $-0.156 < \chi < +0.156$, which is the critical range in which the particles become imaginaries, i.e., they make a transition to the imaginary spacetime [3]. Consequently, we can conclude that, in the above condition (Eq. (43)), a human body becomes imaginary, leaving the real Universe. On the other hand, due to its negative psychic mass $m_{hh} \cong m_{hh} \cong -0.1m_{0hh}$, it will also be sucked to the planet X, similarly to the Human consciousnesses with negative psychic masses.

It is important to note that, when these psychic bodies will approach sufficiently of the planet X all they will be definitively destroyed, by the fragmentation caused by the difference of acceleration inside them, due to the psychic field from the planet X, (Tidal force. See Fig. 4). Under these circumstances, the energy psychic, concentrated inside these psychic bodies, will dispersed in the Universe.

---

\[ \text{Note that, if the energy } E_g \text{ is radiated during 1 second, then } D_X \cong 10^7 \text{ watts} / m^2, \text{ and the decreasing in the gravitational mass of the human body becomes negligible.} \]
