

# Three Laws of Spiritual Mechanics

Thomas.A.Nicewicz@protonmail.com

17 May 2026

The ancients once said,

*“As above,  
so below.”*

Let us recall Newton’s three laws.

1. **Inertia.** An object in motion stays in motion, and an object at rest stays at rest, unless acted upon by an external or internal force.
2.  **$\mathbf{F} = \mathbf{ma}$ .** Physical force equals object mass multiplied by object acceleration, equally acceleration amplified by mass.
3. **Cause-effect.** Equal-opposite reactions. Every action has an equal and opposite reaction.

We observe three laws parallel in the higher spiritual dimensions.

1. **Inertia.** A spirit in motion stays in motion, and a spirit at rest stays at rest, unless acted upon by an external or internal force.
2.  **$\mathbf{F} = \mathbf{ma}$ .** Spiritual force equals spirit mass (willpower, causal plane matter) multiplied by spirit acceleration, equally acceleration amplified by pure will.
3. **Karma.** Equal-opposite reactions. Every spiritual action has an equal and opposite spiritual reaction.

With great power comes great responsibility. Wisdom must be used wisely.

Mass is energy. We know this thanks to our friend Einstein:  $E^2 = (mc^2)^2 + (pc)^2$ .

Mass is physical energy which refines into emotional energy which refines into mental energy which refines into willpower energy which refines into compassion energy which refines into pure silent awareness and so on infinitely. We live in infinite-dimensional, or simply *infinidimensional*, reality. There are infinitely many spatial, temporal and other dimensions. The other dimensions are enlightening to explore.

Physical mass is confined to three spatial dimensions and one time dimension. As it refines, the associated energy accesses higher dimensions: the emotional dimension, the mental dimension, the dimension of intent, the dimension of compassion, the dimension of silent awareness, the dimension of pure love, combinations thereof, emergent dimensions, all connected at one point.

I delegate to the reader the joy of deriving other higher dimensional spiritual physics phenomena, such as spiritual kinematics, momentum, up to gluing together math, physics, science, spirituality, all understanding of reality. We are one.

In the beginning, we were one, then we decided to split into two to better understand ourselves, and so on and so forth until we see and observe the seemingly isolated events around us now. In higher consciousness, we see that we never truly separated from unity.

To help get started, consider the following. Spiritual position (distance) along  $n$  dimensions describes an  $n$ -D subset of our higher  $\infty$ -D Self. Spiritual position moves along each dimension, giving rise to velocity, acceleration, and every higher order spatial derivative. We do the same for the non-spatial dimensions. We may mix, match, experiment with all units, creating new units, deeper understanding of ultimate reality.

The real phun has just begun.

Peace, love and happiness.

*Wakey wakey sleepy baby.  
Oh how I love you.*

*Rise, baby phoenix,  
from old ashes*

*into your own light,  
your birthright,*

*our Self right.*
